About Drexel University

Mission Statement
To serve our students and society through comprehensive integrated academic offerings enhanced by technology, co-operative education, and clinical practice in an urban setting, with global outreach embracing research, scholarly activities, and community initiatives.

Yesterday, Today, and Tomorrow
In 1891, near the end of a long and prosperous life, Philadelphia financier and philanthropist Anthony J. Drexel founded the Drexel Institute of Art, Science and Industry. As society’s need for technically proficient leaders grew, so did Mr. Drexel’s institution, first becoming the Drexel Institute of Technology in 1936, and then Drexel University in 1970. Drexel University is privately controlled, nonsectarian, and coeducational.

Today, nearly 16,000 undergraduate and over 9,000 graduate students attend Drexel’s nine colleges and five schools:

- College of Arts and Sciences (http://drexel.edu/coas) grants bachelor’s, master's, and PhD degrees
- LeBow College of Business (http://www.lebow.drexel.edu) grants bachelor’s, master’s, and doctorate degrees
- LeBow College of Business: School of Economics (http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics) grants bachelor’s, master’s, and PhD degrees
- College of Computing & Informatics (http://www.cci.drexel.edu) grants bachelor’s, master’s, and PhD degrees
- College of Engineering (http://www.drexel.edu/coe) grants bachelor’s, master’s, and PhD degrees
- Pennoni Honors College (http://drexel.edu/pennoni) enriches the University experience for students from all majors with demonstrated academic achievement and broad intellectual interests
- Westphal College of Media Arts and Design (http://www.drexel.edu/westphal) grants bachelor’s, master’s, and PhD degrees
- Drexel College of Medicine (http://www.drexel.edu/med) grants MD, master’s and PhD degrees
- College of Medicine: School of Biomedical Science and Professional Studies (http://catalog.drexel.edu/graduate/schoolofbiomedicalsciences) grants master's and PhD degrees
- College of Nursing and Health Professions (http://www.drexel.edu/cnhp) grants bachelor’s, master’s, and PhD degrees
- Goodwin College of Professional Studies (http://drexel.edu/goodwin) grants interdisciplinary bachelor's and master's degrees to part-time students, houses the First-Year Exploratory Studies program for undergraduate freshman, and offers non-credit continuing professional education courses
- School of Biomedical Engineering, Science, and Health Systems (http://www.biomed.drexel.edu) grants bachelor’s, master’s, and PhD degrees
- School of Education (http://drexel.edu/soe) grants bachelor’s, master’s, EdD and PhD degrees, and recommends issuance of Pennsylvania instructional and teaching certificates
- Close School of Entrepreneurship (p. 35) grants bachelor's and a master's degree, and provides curriculum and activities for students to learn and practice innovative behavior in alignment with all other colleges and schools at Drexel
- Center for Hospitality and Sport Management (http://catalog.drexel.edu/centerforhospitalityandsportmanagement) grants bachelor’s and master's degrees
- Dornsife School of Public Health (http://www.publichealth.drexel.edu) grants master's and doctorate degrees
- Thomas R. Kline School of Law (http://www.drexel.edu/law) grants Master's degrees and prepares students for the practice of law by offering a JD degree

Drexel Co-op
Drexel University has been a pioneer in cooperative education since 1919—operating one of the largest cooperative education programs in the nation. Undergraduates alternate on-campus study with full-time employment in fields related to their academic interests. More than 1,700 employer organizations in business, government, health care and education participate at locations in 35 states and 45 countries. The Steinbright Career Development Center (SCDC) works to ensure that students and alumni get the most from their experiential and career placement activities.

Technology
Technology is integrated into every aspect of the Drexel educational experience, marking the university as a leader in educational innovation.

Drexel made history in 1983 when it became the first university to mandate that all students must have personal access to a microcomputer. This tradition of leadership in integrating state-of-the-art technologies into a Drexel education continued when Drexel, in early 1998, inaugurated the first totally wireless library in the nation. In 2000, Drexel again made history by becoming the nation’s first major university to offer completely wireless Internet access across the entire campus.

A pioneer in online learning, Drexel offers distance education programs leading to certificates and degrees in areas including engineering management, business administration, information systems and library and information science. Drexel University Online has over 7,500 unique students from all 50 states and more than 20 countries pursuing one of more than 130 graduate and undergraduate degree and certificate programs. Over all, there are more than 13,000 Drexel University students taking at least one course online.

Drexel is widely recognized for excellence in technology-based, experiential learning and is ranked among the best national doctoral universities by U.S. News & World Report in its “America’s Best Colleges 2013.” Drexel ranked third in the US News 2013 poll of America’s “Up-and-Coming Schools.”

Location
Drexel's 74-acre University City Main Campus is located in the vibrant University City district of Philadelphia, Pennsylvania. Drexel makes full use of its metropolitan setting by integrating Philadelphia and its resources into the classroom, co-op/internship experience, and student life, making it a model for other urban universities. The main campus is a 10-minute walk from Center City, the core of Philadelphia's commercial and business district.

Drexel teaches at two additional locations: the Center City Campus for the College of Nursing and Health Professions and the Queen Lane Medical Campus in East Falls for the College of Medicine.
Programs

Civic Engagement
Civic engagement, participation in the public life of the community, is important to the Drexel University’s strategic plan. Civic engagement can take many forms, from volunteerism doing community service, to electoral participation and advocacy.

Drexel University offers a Certificate in Civic Engagement (p. 972), designed for those whose commitment to civic engagement extends beyond the civic-engagement requirement of University 101, enables students of all majors to attach a recognized body of civic engagement work to their transcript. The program will also provide students with an intellectual core and an element of critical thinking for future civic engagement activities. The program is administered by the Lindy Center for Civic Engagement (http://www.drexel.edu/lindycenter).

Honors Program
The Pennoni College offers a number of academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students’ abilities and aspirations.

The Honors Program offers a number of academic options for its students. These opportunities are designed to be intensive, and are taught by faculty members who understand and accommodate Honors students’ abilities and aspirations. These options include:

- **Honors Colloquia**: These interdisciplinary courses introduce students to topics not typically covered elsewhere. These courses are small, discussion-based, seminar style classes. Past Honors Colloquia topics include: The Hidden God in Cinema; Theory of Special Relativity; The Graphic Novel; Torture and Terrorism, and many others.

- **Honors-Section Courses**: These courses fulfill traditional major requirements but offer Honors credit. While the subject remains the same, the classes are taught to smaller groups, consisting entirely of Honors students, and on an advanced level that encourages discussion and practical application. Honors-section courses include, among other subjects, physics, English, business, general psychology, chemistry, and biology.

- **Honors Options**: With permission from their instructors and approval from the Honors Program, Honors students may elect to enhance non-honors courses to yield honors credit. The student and faculty member conducting may agree on the specific terms before the course begins and jointly submit a proposal to the Honors Program.

- **Independent Study**: Honors students frequently come across topics in their general coursework that they would like to investigate in greater detail. To accommodate this, the Honors College encourages students to study and research a topic of their choosing with guidance from a faculty member.

The Great Works Symposium
The Great Works Symposium (http://www.drexel.edu/interdisciplinary-inquiry/great-works-symposium/overview) is a series of team-taught, interdisciplinary courses, each one focused upon a great human achievement or important global problem. Each course typically has at least three instructors, representing three different academic disciplines, and typically there is a series of about ten guest lecturers, recognized experts on the topic, also representing a wide variety of disciplines and points of view. Each course is broader in its content than what could be covered by any one academic discipline or any single textbook, but each has a concrete center of focus. Each topic is broad and important enough that it is relevant to the education of any student.

ROTC
The Army Reserve Officers’ Training Corps (http://www.armyrotc.com/edu/drexel), established at Drexel in 1918, is an integral part of the University. Army ROTC courses are open to all students, and enrollment alone does not carry a military obligation. Students selected for the advanced course (normally pre-junior, junior, and senior years) will complete their academic and military studies concurrently, and upon graduation will be commissioned as lieutenants in the United States Army, Army Reserve, or Army National Guard. Participation in the advanced course may qualify participants to receive financial aid through a series of scholarships and cooperative education programs. For further information, contact the Professor of Military Science, Drexel University, The Armory, 33rd and Market Streets, Philadelphia, PA 19104.

Drexel students are eligible to participate in the Naval Reserve Officers’ Training Corps (http://www.vpul.upenn.edu/nrotc) (NROTC) through a cross-enrollment agreement with The University of Pennsylvania. All naval science courses are held on Penn’s campus. The NROTC program enables a college student to earn a commission in the Navy or the Marine Corps while concurrently satisfying requirements for his or her baccalaureate degree. Scholarship and nonscholarship programs are available.

Drexel students are eligible to participate in the Air Force Reserve Officers’ Training Corps (http://www.sju.edu/afrotc) (AFROTC) through a cross-enrollment agreement with St. Joseph’s University. All aerospace studies courses will be held on the St. Joseph’s campus. The AFROTC program enables a college student to earn a commission as an Air Force officer while concurrently satisfying requirements for his or her baccalaureate degree.

Study Abroad
Drexel University’s Study Abroad programs are open to students in all disciplines who meet the qualifications of each individual program. Please see the study abroad website (http://www.drexel.edu/studyabroad) for eligibility requirements of each individual program and for the most up to date program offerings.

Certification of Proficiency in a Foreign Language
The University awards an advanced-level Certification of Proficiency in a foreign language in recognition of exceptional ability in oral and written communication in that language. Certification is listed on the official college transcript.

Examinations leading to proficiency certification include listening comprehension, reading comprehension, and written analysis, and the ETS Achievement Test, which is also the qualifying examination for proficiency testing. Certification also requires successful completion of an extensive oral interview, with at least a “2” rating on the FSI/ACTFL rating scale. Certification indicates proven ability to function effectively in professional and social situations in a country in which the target language is spoken.

Affirmative Action and Equal Opportunity

University Policy: Affirmative Action and Equal Opportunity
It is the policy of the University to provide a working and learning environment in which employees and students are able to realize their full potential as productive members of the University community. To this end, the University affirms its commitment to equal opportunity and nondiscrimination in employment and education for all qualified
individuals regardless of race, religion, color, national origin, sex, age, sexual orientation, disability or applicable veteran status or any other characteristic protected by applicable federal or state law. Further, the University is committed to taking affirmative action to increase opportunities at all levels of employment and to increase opportunities for participation in programs and activities by all faculty, staff, and students.

Affirmative Action is directed toward racial and ethnic minorities, women, persons with disabilities, and Vietnam-era veterans. All members of the University community -- faculty, staff, and students -- are expected to cooperate fully in meeting these goals.

It is the policy of the University that no qualified individual with a disability shall, on the basis of the disability, be excluded from participation in University programs and activities. Disability is defined as any physical or mental impairment that substantially limits one or more major life activities; or having a record of such impairment; or being regarded as having such impairment. A qualified individual with a disability means an individual as defined above, who is capable of performing the essential functions of a particular job or of participating in a particular course of study, with or without reasonable accommodations for his/her disability. Reasonable accommodations are determined on a case-by-case basis.
Accreditation

Drexel University's educational programs are accredited by MSCHE (Middle States Commission on Higher Education).

The Antoinette Westphal College of Media Arts and Design
- Architecture is one of the few part-time evening programs accredited by NAAB (National Architectural Accrediting Board).
- Design curricula are accredited by NASAD (National Association of Schools of Arts and Design).
- Media arts curricula, with the exception of the BS in Dramatic Writing, are accredited by NASAD (National Association of Schools of Arts and Design).
- The BS in Interior Design is accredited by CIDA (Council for Interior Design Accreditation).
- The MS in Interior Architecture and Design is accredited by CIDA (Council for Interior Design Accreditation).

The Bennett S. LeBow College of Business
- The Bennett S. LeBow College of Business is accredited by AASCB (Association to Advance Collegiate Schools of Business).

The College of Engineering
- The Construction Management program is accredited by ACCE (American Council for Construction Education).

The College of Arts and Sciences
- The Chemistry BS is certified by ACS (American Chemical Society).
- The Clinical Psychology PhD program is accredited by APA (American Psychological Association).
- The English Language Center is accredited by CEA (Commission on English Language Program Accreditation).

The College of Nursing and Health Professions
- Nursing programs are accredited by the CCNE (Commission on Collegiate Nursing Education), and the PA State Board of Nursing.
- The Couple and Family Therapy MFT degree and Post-Master's Certificates are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).
- The Creative Arts in Therapy MA degrees in Dance/Movement Therapy, Music Therapy, and Art Therapy are approved by the ADTA (American Dance Therapy Association), the AMTA (American Music Therapy Association), and the AATA (American Art Therapy Association), respectively.
- The Didactic Program in Nutrition is accredited by ADA (American Dietetic Association).
- The Health Services Administration program is certified by AUPHA (Association of University Programs in Health Administration).

- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).
- The Nutrition and Foods BS is accredited by ADA (American Dietetic Association, Commission on Accreditation of Dietetic Education).
- The Professional Physical Therapy (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).
- The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).
- The Radiologic Technology program is accredited by JRCERT (Joint Review Committee on Education in Radiologic Technology).

The College of Computing & Informatics
- The Computer Science BS and BA programs are accredited by the Computing Accreditation Commission (CAC) of ABET (http://www.abet.org).
- The Information Systems BS is accredited by the Computing Accreditation Commission (CAC) of ABET (http://www.abet.org). The College of Information Science and Technology was in the first group of schools to have their information systems programs be accredited by ABET (http://www.abet.org).
- The Library and Information Science MS degree is accredited by ALA (American Library Association).

The Drexel University College of Medicine
- The MD degree is accredited by LCME (Liaison Committee on Medical Education).
- The MS degree in Pathologists' Assistant program is accredited by NAACLS (National Accrediting Agency for Clinical Laboratory Sciences).

The Dornsife School of Public Health
- The Dornsife School of Public Health is accredited by CEPH (Council on Education for Public Health).

The School of Biomedical Engineering, Science and Health Systems
- The undergraduate biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The School of Education
- Teacher education programs leading to Pennsylvania State Teacher Certification for various K-12 specialties as well as Instructional Technology Specialist, School Principal, and School Superintendent certification programs are approved by the Pennsylvania Department of Education. Other state-approved programs include K-12 Library Science certification in collaboration with the College of Information Science and Technology and K-12 English as a Second Language Program Specialist in collaboration with the English Language Center.

The Thomas R. Kline School of Law
- The Thomas R. Kline School of Law is accredited by ABA (American Bar Association).

Any student or prospective student may request a copy of the documents describing the institution’s accreditation. This information is available in...
the Provost’s Office and in the Financial Aid Office, both located in the Main Building.
Tuition/Fees

Undergraduate

The Steinbright Career Development Center

The Steinbright Career Development Center (Steinbright) (http://www.drexel.edu/scdc) serves all students and recent alumni through cooperative education and career services offerings. For information about potential co-op experiences, or to access career guides for specific majors, visit the Steinbright Center’s Co-op Career Guide (http://www.drexel.edu/scdc/career-services/counseling/career-guides) page.

I. Drexel Undergraduate Co-op

Cooperative Education at Drexel (http://www.drexel.edu/scdc/coop) enables full-time undergraduate students to alternate periods of classroom theory with professional experience prior to graduation. Participation in co-op is available in most academic programs. Successful completion of the cooperative education experience is a graduation requirement for students enrolled in a co-op degree program. Students have the opportunity to gain 6 to 18 months of career-related work experience integrated with their coursework. Cooperative education helps students explore and confirm their career choices by assisting students in several areas of career development, including self-assessment and career exploration. Through co-op students develop confidence, professionalism and a sense of purpose. Students are expected to take advantage of every possible opportunity to observe different aspects of the workplace and to gain experience.

To learn more about undergraduate co-op, visit the Steinbright Career Development Center’s website (http://www.drexel.com/scdc).

A. Co-op Program Schedule Options (http://www.drexel.edu/scdc/coop/undergraduate)

B. Co-op Cycle Assignments and Eligibility (http://www.drexel.com/scdc)

C. Classes During Co-op Go to the Provost’s website (http://www.drexel.edu/provost/policies/pdf/ug_classes_coop.pdf)

II. Drexel Graduate Co-op Program (GCP)

Drexel’s long tradition in the field of experiential education for undergraduates has been extended into its graduate programs (http://www.drexel.com/scdc/co-op/graduate).

Participating Graduate Co-op Programs

- MS, MBA, LeBow College of Business
- MS, Information Systems, College of Computing & Informatics
- MS, Food Science, Center for Hospitality and Sport Management
- MS, Engineering, College of Engineering
- MS, Biomedical Engineering, School of Biomedical Engineering, Science, and Health Systems

III. Career Services

Career Services offers assistance to all current students and alumni in securing employment consistent with personal career goals and objectives. All services are free of charge to active students and alumni. Services, resources, and events include:

- Individual career counseling, including assessments designed to help individuals choose long-range career goals consistent with their abilities, education, interests, values and personality.
- Individual appointments and group programs covering topics including resume writing, interview preparation, job search strategies and offer negotiation.
- On-Campus Interview Program arranges on-campus interviews with employers from business, industry, education, and government services.
- Dragon Jobs allows students to review job postings and schedule interviews with employers who are interested in hiring Drexel students and alumni. Students can also research companies, information on career fairs, and company-hosted information sessions with Dragon Jobs (http://www.drexel.edu/scdc/dragonjobs).
- Comprehensive pre-professional advising services to students and alumni who are considering careers in law or medicine.
- Steinbright hosts two of the largest career fairs in the Delaware Valley in October and April for all students and alumni. Engineering students are also invited to an engineering major-specific career fair at their college.
About the Program

The major in culinary arts and science allows students to deeply explore cuisine—the practical techniques of cooking, but also its science, history, culture, politics and economics. Students receive a broad overview of cooking and cuisine and specialize in food and beverage management, which prepares students for leadership positions in the restaurant and food industry.

Students majoring in culinary arts and science are prepared for careers in the food industry such as pastry chef, chef, research chef or product developer.

This baccalaureate degree in culinary arts and science is among the first of its kind in the United States. This program comprises approximately equal parts liberal arts, business, hospitality management, food science, and culinary arts. The aim of the program is to prepare students as independent thinkers who can work collaboratively in the food industry.

For more information, visit the Culinary Arts & Science (http://drexel.edu/hsm/academics/Culinary-Arts-Food-Science) page on the Center for Hospitality and Sport Management's website (http://drexel.edu/hsm).

Program Delivery Options

Drexel’s BS degrees include courses in the liberal arts, the humanities, sciences, hospitality management and culinary arts. Three business minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional Four-year option, with one co-op experience:
This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:
This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/programs/mba) website.

Part-time option without co-op experience:
Students work closely with academic advisors to develop a customized plan of study toward degree completion.

London option:
(Available for Hospitality Management and Culinary Arts and Science students.) Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

Baking and Pastry Specialization

The Baking and Pastry Specialization provides BS Culinary Arts & Science students interested in pursuing a career in the bakeshop with the skills necessary to move up the ranks of the professional bakery. High-quality, from-scratch baked goods and pastries continue to find prominent places on menus in fine-dining restaurants, coffee shops, cafes, and dedicated bakery retail shops. For those restaurants and shops that have the facility space, many hire skilled bakers to run internal pastry departments. The need to feature fresh-baked goods has led to the opening of more wholesale and commissary bakeries throughout the Northeast and across the country. Graduates who are highly-skilled in baking and patisserie are in demand to serve in restaurant pastry programs and to run these high-volume commercial bakeries.

Co-op/Career Opportunities

The hospitality industry employs 15 million people nationwide. According to the National Restaurant Association statistics, employment is growing at the rate of eleven percent each year, making this industry one of the fastest growing in the country. Our Culinary Arts & Science program enjoys close relationships with outstanding and internationally acclaimed chefs, in the finest restaurants, hotels and tourism partners in the greater Philadelphia area. We also have relationships with professional organizations that represent the industry on a regional, national and international level such as Research Chefs Association, Institute of Food Technologists and International Association of Culinary Professionals. These relationships result in over $80,000 a year in scholarship funding for our students.

Typical career paths for graduates include the following:

- Restaurants and private clubs, which employ over 9 million people in the US
- Hotels Resorts & Casinos with almost 2.5 million employees
- Airlines, tour operating companies, travel agencies and tourism consulting
- Convention, special events, meeting planning, and tourism agencies
- Food Service and beverage brokers, distributors, and suppliers to the industry
- Food waste and sustainability practices and solutions.

Co-Op Opportunities

Drexel University has long been known for its cooperative education/ internship programs, which allow students to mix periods of full-time, career-related employment with their studies. Culinary Arts & Science students pursue the 6-month co-op employment. This six-month experience during the junior year is tailored to fit the interests of each student. The following hotels, facilities, restaurants and clubs have recently offered co-op positions to Drexel’s Culinary Arts & Science students. Although many of these examples are located in the Philadelphia area, co-op jobs are not limited to any region.

- Vernick Restaurant
- High Street Hospitality Group
- Jose Garces - Garces Group
- Marc Vetri - Vetri Family of Restaurants
- Kevin Spraga - Sbraga Restaurants
- Philadelphia Convention and Visitors Bureau
- America’s Test Kitchen
- Philadelphia Chamber of Commerce
- Frog Commissary Catering at The Franklin Institute
- Walt Disney World Co
- Saxbys

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.
Facilities

The major facility of the Culinary Arts & Science program is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/academic-bistro), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, and conference room. As part of the curriculum, students in this major are required to take food safety and sanitation courses which include lab work at Papadakis Integrated Science Building.

Philadelphia Location

A unique feature of the Culinary Arts & Science program at Drexel is our location in Philadelphia, with proximity to New York City, Boston, Baltimore, and Washington DC, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, and resorts, that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

Culinary Arts & Science Faculty

Jake Lahne, PhD (University of Vermont). Assistant Professor. Sensory perception and preference in foods; flavor chemistry and sensory properties of alcoholic beverages; artisan, traditional, and local foods; consumer food choice and taste; cooking practice and food agency

Brandy-Joe Milliron, PhD (Arizona State University). Assistant Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives;

Michael Traud, JD (Villanova University) Program Director, Hospitality and Tourism Management. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality; Italian cuisine.

Rosemary Trout, MS (Drexel University) Interim Program Director, Culinary Arts and Food Science. Instructor. Food labeling and regulations; food safety and sanitation in food service and food manufacturing; food processing; sensory evaluation.

Charles Ziccardi, MS (Drexel University). Assistant Teaching Professor. Classic Italian cuisine, Italian culture, gardening for the kitchen, food sustainability, and professional hospitality management.

Emeritus Faculty

A. Philip Handel, PhD (University of Massachusetts). Professor Emeritus. Food science, especially lipid chemistry; food composition and functionality; evaluation and analysis of frying fats and fried foods.

Culinary Arts

Major: Culinary Arts
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 184.0
Classification of Instructional Programs (CIP) code: 12.0503
Standard Occupational Classification (SOC) code: 25-1011; 11-9051

About the Program

Note: Effective Fall Term 2015, students are no longer being accepted into this program; however, students may apply to the combined BS in Culinary Arts & Science (p. 14) degree program.

The major in culinary arts prepares students for leadership positions in the fine foods segment of the hospitality industry. This baccalaureate degree in culinary arts is among the first of its kind in the United States. This program comprises approximately equal parts liberal arts, business, hospitality management, and culinary arts. The aim of the program is to prepare students as independent thinkers who can work collaboratively in the field of culinary arts.

Students completing this program also receive a business minor with a choice of one of the following areas:

- Business Administration
- Marketing
- Entrepreneurship

Alternatively, students may meet with their Advisor to select a minor that is more in line with their personal and professional goals.

For more information, visit the Culinary Arts (http://drexel.edu/hsm/academics/Culinary-Arts-Food-Science) page on the Center for Hospitality and Sport Management's website (http://drexel.edu/hsm).

Program Delivery Options

Drexel's BS degrees include courses in the liberal arts, the humanities, sciences, hospitality management and culinary arts. Three business minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional Four-year option, with one co-op experience:
This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:
This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/programs/mba) website.

Full-time Status Evening option without co-op experience:
To be eligible, students should have a minimum of two years full-time work experience related to students' majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

Part-time option without co-op experience:
Students work closely with academic advisors to develop a customized plan of study toward degree completion.

London option:
(Available for Hospitality Management and Culinary Arts students.)
Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program's
emphasis is on the global implications of and opportunities within the hospitality industry.

Co-Op Opportunities  

Drexel University has long been known for its cooperative education/ internship programs, which allow students to mix periods of full-time, career-related employment with their studies. All traditional Hospitality Management students pursue the 6-month co-op employment. This six-month experience during the junior year is in a supervisory or managerial capacity. The following hotels, facilities, restaurants and clubs have recently offered co-op positions to Drexel’s Hospitality Management students. Although many of these examples are located in the Philadelphia area, co-op jobs are not limited to any region.  

• Four Seasons Hotel  
• Jose Garces - Garces Group  
• Mark Vetri - Vetri Family of Restaurants  
• Marriott Hotels and Resorts  
• Philadelphia Convention and Visitors Bureau  
• America’s Test Kitchen  
• Philadelphia Chamber of Commerce  
• Frog Commissary Catering  
• Ritz-Carlton Hotel  
• Sbraga Restaurant  
• Restaurant Business Magazine  
• Union League (private club)  
• Walt Disney World  

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.  

Minor in Culinary Arts  

The minor in culinary arts is designed for students pursuing a variety of majors who also have an interest in food and cuisine. The required courses introduce the major cuisines, and develop necessary culinary technical skills and fundamental knowledge of foods and food preparation. Students are able to select elective courses in various cuisines or can explore more theoretical areas of the field through topics including gastronomy, food history, and food writing.

Facilities

The major facility of the Hospitality Management, Culinary Arts and Food Science programs is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/academic-bistro), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, conference room and the Les Dames d’Escoffier Library.

Philadelphia Location

A unique feature of the Hospitality Management program at Drexel is that it is located in Philadelphia, with close proximity to New York City, Baltimore, and Washington, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, resorts, and casinos that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

Culinary Science

Major: Culinary Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 12-9999
Standard Occupational Classification (SOC) code: 19-1012

About the Program

The Bachelor of Science (BS) in Culinary Science program combines the creative spirit of culinary arts with the technical and scientific expertise of food science. Our program has the distinction of being the only Culinary Science program housed in the same department as a Culinary Arts & Science degree program in the USA. We are accredited as a Culinology Program through the Research Chefs Association. Because of our unique combination of disciplines, our students learn practical and applied knowledge and gain scientific expertise as it pertains to the food industry.

Culinary scientists learn to integrate and apply knowledge from the disciplines of chemistry, microbiology, culinary arts, nutrition and sensory science in order to create, process, and distribute foods that are safe, nutritious, and delicious. Students majoring in culinary science are prepared for careers in the food industry which includes product design and development, flavor technologists, laboratory management and quality assurance, sensory analysis and design, food sustainability and solutions. In such positions, graduates can combine their creative and aesthetic talents with their technical expertise as food scientists.

The Culinary Science program is committed to providing a professional, comprehensive, and challenging college experience as it prepares students for a variety of rewarding careers in the culinary field and food science and manufacturing industries. In order to provide students with a well-rounded educational experience, the culinary science curriculum is composed of coursework in food chemistry, microbiology, nutrition, sensory science and culinary arts.

For more information, visit the Center for Hospitality and Sport Management (http://www.drexel.edu/hsm).

Program Delivery Options

Drexel’s BS degrees include courses in the liberal arts, the humanities, sciences, and culinary arts. Three business minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional 4-year option, with one co-op experience:

This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:

This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/programs/mba/drexel-lebow-mba) website.

Full-time Status Evening option without co-op experience:

To be eligible, students should have a minimum of two years full-time work experience related to students’ majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

Part-time option without co-op experience:

Students work closely with academic advisors to develop a customized plan of study toward degree completion.

London option:

Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

Study Abroad in Osnabruck Germany:

Students have the opportunity to participate in a two week interdisciplinary program which focuses on the practical application of state of the art food processing techniques.

CULA 410 Culture and Gastronomy II 3.0

Business Minor or Science Requirements (See Options Below) 18.0-32.0

Hospitality Management/Culinary Arts Electives
Two CULA or HRM electives 6.0

Free Electives 9.0

Total Credits 185.0-199.0

* Students may substitute MATH 181, MATH 182, and MATH 183 with permission from an advisor.

Concentration Requirements 18.0 - 32.0 Credits
Students have the option of either satisfying the requirements for a business minor or completing a science concentration.

Science Concentration Option Requirements
CHEM 230 Quantitative Analysis 4.0
CHEM 231 [WI] Quantitative Analysis Laboratory 2.0
CHEM 241 Organic Chemistry I 4.0
CHEM 242 Organic Chemistry II 4.0
Select two of the following: 5.0-10.0
- BIO 221 Microbiology
- BIO 222 Microbiology Laboratory
- BIO 312 Genetically Modified Foods
- BIO 424 Microbial Physiology
- CHEM 243 Organic Chemistry III
- CHEM 256 Physical Chemistry for Biological Sciences
- CHEM 430 Analytical Chemistry I
- CHEM 431 [WI] Analytical Chemistry II

Total Credits 19.0-24.0

* BIO 221 + BIO 222 counts as one course.

Business Administration Minor Option
ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
MGMT 301 Introduction to Marketing Management 4.0
MKTG 347 New Product Development 4.0
ORGB 300 [WI] Organizational Behavior 4.0

Total Credits 20.0

Entrepreneurship Minor Option
ACCT 120 Accounting Essentials for New Ventures 4.0
MGMT 260 Introduction to Entrepreneurship 4.0
MGMT 364 Technology Management 4.0
MGMT 365 Business Plan for Entrepreneurs 4.0
MKTG 301 Introduction to Marketing Management 4.0
MKTG 347 New Product Development 4.0
ORGB 300 [WI] Organizational Behavior 4.0

Total Credits 28.0

Marketing Minor Option
MKTG 301 Introduction to Marketing Management 4.0
MKTG 347 New Product Development 4.0
MKTG 380 Seminar in Marketing Strategy 4.0
Select three of the following: 12.0
- MKTG 324 Marketing Channels and Distribution Systems
- MKTG 326 Marketing Insights
- MKTG 353 Business-to-Business Marketing
- MKTG 356 Consumer Behavior
- MKTG 357 Global Marketing
- MKTG 358 Transportation and Logistics

Total Credits 24.0

### Co-op/Career Opportunities

#### Career Outlook

The food industry is one of the largest manufacturing segments of all industries in the US. Employment opportunities for college graduates in the food science industries are expected to remain strong over the next five years. In fact, an estimated 20,000 positions in food and agriculture are filled by people who have had training in an allied field. The Central Atlantic region is home to a number of food producers and processors, flavor companies, the USDA Agricultural Research Center, Eastern...
Regional Research Center, and companies that supply ingredients to the food industry.

Typical career paths for culinary science graduates include the following:

- Food product development
- Flavor technician
- Manager of sustainability practices
- Research chef
- Ingredient marketing and sales
- Food quality assurance manager
- Food microbiologist
- Food chemist
- Research food scientist
- Sensory scientist

Co-op Opportunities

Drexel University has long been known for its co-operative education/internship programs, which allow students to mix periods of full-time, career-related employment with their studies. All traditional Culinary Science students pursue the 6-month co-op employment. This six-month experience during the junior year can be completed locally, nationally, or internationally. The following employers have recently offered positions to Drexel's Culinary Science majors:

- Monell Chemical Senses Center
- Ashland Specialty Ingredients
- Colorcon
- Egglands Best
- Keystone Foods Corporation
- Campbell Soup Company
- IFF/Ottens Flavors
- Victory Brewing Company
- David Michael & Company
- Barry-Callebaut
- USDA ARS ERRC

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

Facilities for the Culinary Science department are mainly located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/academic-bistro), the student-run restaurant. The facility also includes a sensory analysis lab. In addition, students take Microbiology labs in the Papdakis Integrated Science Building, and Chemistry labs through our Department of Chemistry in Disque.

Philadelphia Location

The tri state area is home to hundreds of food companies which include processors, growers, experts in sustainable farming and agricultural practices, flavor companies and ingredient suppliers. We are also several blocks from Monell Chemical Senses Center, which is located on Market Street in Philadelphia.

Culinary Arts & Science Faculty

Jake Lahne, PhD (University of Vermont). Assistant Professor. Sensory perception and preference in foods; flavor chemistry and sensory properties of alcoholic beverages; artisan, traditional, and local foods; consumer food choice and taste; cooking practice and food agency

Brandy-Joe Milliron, PhD (Arizona State University). Assistant Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives;

Michael Traud, JD (Villanova University) Program Director, Hospitality and Tourism Management. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

Rosemary Trout, MS (Drexel University) Interim Program Director, Culinary Arts and Food Science. Instructor. Food labeling and regulations; food safety and sanitation in food service and food manufacturing; food processing; sensory evaluation.

Charles Ziccardi, MS (Drexel University). Assistant Teaching Professor. Classic Italian cuisine, Italian culture, gardening for the kitchen, food sustainability, and professional hospitality management.

Emeritus Faculty

A. Philip Handel, PhD (University of Massachusetts). Professor Emeritus. Food science, especially lipid chemistry; food composition and functionality; evaluation and analysis of frying fats and fried foods.

Hospitality Management

Major: Hospitality Management
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: Three Co-op (Five years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0904
Standard Occupational Classification (SOC) code: 11-9051; 11-9071; 11-9081

About the Program

The hospitality management major at Drexel University prepares students for leadership positions in the lodging, food service, and tourism and gaming industries. It also provides the necessary foundation for graduate school.

The hospitality management program recognizes the critical importance of an interdisciplinary education with a global perspective for tomorrow's leaders and managers. Committed to building student knowledge across functional areas and contributing disciplines, the program allows for increased specialization with elective coursework in the following areas:

- Food and Beverage Management
- Gaming and Resort Management
- Travel and Tourism
- Hotel Administration
- Meeting and Event Planning
Home to one of the top hospitality programs in the region, Drexel prides itself on its reputation for progressive, high-quality education. The thriving metropolis of Philadelphia serves as the learning lab for these unique programs. As the sixth largest city in the United States, Philadelphia is in the midst of a restaurant renaissance featuring world-class cuisine and entertainment. Student-focused faculty members are recognized for their professional affiliations, research, published work, and above all, teaching.

Students also receive a business administration minor and have 24.0 credits of free elective to pursue a second minor option.

For more information, visit the Hospitality Management Program's (http://www.drexel.edu/hsm) website.

Program Delivery Options

Drexel’s BS in Hospitality Management degree includes courses in the liberal arts, the humanities, language, sciences, hospitality management and culinary arts. A business administration minor is also included. The BS degree can be completed on a full-time or part-time basis:

Four plus One option BS/MBA combined degree, with co-op experience:

This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/programs/mba) website.

Five-year option, with three co-op experiences:

This option allows students to pursue a variety of professional experiences in the industry including the option to co-op abroad.

Full-time Status Evening option without co-op experience:

To be eligible, students should have a minimum of two years full-time work experience related to students’ majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

Part-time option without co-op experience:

Students work closely with academic advisors to develop a customized plan of study toward degree completion.

American University in Rome:

Every three years, the Drexel hospitality management faculty participate in a study and teach abroad experience. Students are invited to spend the fall semester abroad in Rome, Italy and earn 18.0 credits. Students take two Hospitality related courses taught by a Drexel professor and two additional courses at AUR of their choosing. All course instruction is in English, but a term of Italian 101 is a pre-requisite for the experience. More information can be found on the Study Abroad website.

London option:

Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

* Three language courses are required from: ARBC, CHIN, FREN, GER, GREC, ITAL, JAPN, KOR, RUSS, or SPAN and then one additional arts & humanities course from any of the above as well as ENGL, GST, HIST, HUM, JUDA, LANG, LING, PHIL, WGST, or WRIT areas.
** Students may choose from ANTH, CJS, PSCI, PSY, and SOC courses.
*** Choose additional Hospitality courses or courses from CULA or SMT.

### Facilities

The major facility of the Hospitality Management, Culinary Arts and Food Science programs is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://www.drexel.edu/hsm/about/academic-bistro), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, conference room and the Les Dames d'Escoffier Library.

### Philadelphia Location

A unique feature of the Hospitality Management program at Drexel is that it is located in Philadelphia, with close proximity to New York City,
Baltimore, and Washington, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, resorts, and casinos that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

**Hospitality Management Faculty**

Robert Ambrose, MS (Fairleigh Dickinson University). Instructor. Creative gaming floor applications, strategy development and implementation, executive decision making, the customer service experience within the casino/hospitality environment.

Linda Forristal, PhD (Purdue University). Associate Teaching Professor. Destination management, marketing, branding, communications, cultural heritage tourism including foodways, indigenous tourism.

Michael Traud, JD (Villanova University) Program Director, Hospitality and Tourism Management. Assistant Clinical Professor. Implementation of Korean Cuisine in the United States; hospitality law; Italian cuisine.

**Sport Management**

**Major: Sport Management**
**Degree Awarded: Bachelor of Science (BS)**
**Calendar Type: Quarter**
**Total Credit Hours: 180.0**
**Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)**
**Classification of Instructional Programs (CIP) code: 31.0504**
**Standard Occupational Classification (SOC) code: 11-1021**

**About the Program**

The Bachelor of Science in Sport Management (http://drexel.edu/hsm) program is designed for students who plan to pursue careers in the sport industry. The major draws on the strengths of its own core offerings which complement the University’s academic programs, in particular business administration. Students may also augment their degrees with minors from the University’s other schools and departments including entrepreneurship, communications, and media arts.

Students will master the knowledge and skills necessary for success in professional sports organizations, collegiate athletics, sport media companies, and businesses that service and are complimentary to the sport industry. The co-op option engages students with extensive experiential learning. Our Philadelphia location is optimal for accessing opportunities throughout the Northeast corridor and beyond.

The program offers options covering a wide range of areas of study; students are able to match their skills, abilities, and interests with a specific niche within the sport industry. Students may choose a minor or create their own particular specialization and area of expertise, in consultation with our department’s academic advisors and faculty.

**Coursework**

The sport management major consists of 180.0 credits. All students enrolled in the program are required to take 46.0 credits of general education courses, 40.0 credits of general business, and a sport business core of 42.0 hours. These courses are supplemented by 36.0 hours creating a specialization that may include a minor or concentration, and 16.0 hours of free electives.

**Degree Completion Options**

The Bachelor of Science degree in sport management can be completed in either four or five years:

**Five-year option, with co-op experience**
This option allows for the greatest amount of employment experience, with three distinct six-month periods of employment included with studies. After the start of the sophomore year, students study or work through all terms, including summers.

**Four-year option, with internship experience**
This option includes just one six-month period of full-time employment. After the start of the sophomore year, students study or work through all terms, including summers.

For more information about this major, visit the Center for Hospitality and Sport Management's Sport Management (http://drexel.edu/hsm/academics/Sport-Management) web page.

Co-op/Career Opportunities

Co-op Opportunities

Drexel University has long been known for its co-operative education programs, through which students combine periods of full-time, career-related employment with their studies. Co-op employment is required for sport management students and is central to their experience.

Within the sport management major, co-operative education gives students experience in a range of sport related jobs and settings, from coaching to the business of sports to health-enhancing activities. Students may be placed with professional athletic teams, or with organizations aligned with sports (e.g., a sports agency). Co-op experiences are available with many of the region’s sports, recreation, and health organizations, including professional sports teams, college athletic departments, sports media networks, non-profit organizations, law firms, youth fitness organizations, fitness centers, sports complexes, and others.

Career Opportunities

The multidisciplinary nature of the sport management program allows its graduates to be ready for a wide range of sport-related professions, including athletic management, sports and recreational activities at all levels (professional, semi-professional, collegiate, scholastic, and youth) within a range of organizations (public, private, community, recreation, scholastic, professional, and amateur), and for varying purposes (competitive, fitness, wellness, and rehabilitation).

Sports management graduates are uniquely qualified for leadership, support, or coaching positions in professional and amateur sports organizations, in recreation and community centers, in high schools and colleges, and in other sports venues, as well as in the health and wellness industry. The program also prepares students for graduate or professional study in a variety of fields including sport management, sports psychology, communication, law, education, business administration, and other fields.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more information on career opportunities.

Minor in Sport Management

The minor in sport business is designed to introduce students to the primary areas of study in the sport industry. Students will be exposed to a variety of perspectives for assessing the sports business.

Sport Management Faculty

Lawrence Cohen, JD (Temple University). Assistant Teaching Professor. Sports and antitrust law; tickets sales data analytics; sport sponsorship trends.

Amy Giddings, PhD (Temple University) Director, Sport Coaching Leadership. Associate Teaching Professor. International aspects of sport and culture, principles of coaching, teambuilding, group dynamics, minority issues in sport including availability and accessibility concerns, character development.

Joel Maxcy, PhD (Washington State University) Department Head, Sport Management. Associate Professor. Economics of sport; labor economics & policy; economics of antitrust & regulation.

Jim Reese, EdD (University of Northern Colorado). Associate Professor. Sport ticket sales, strategies, and operations; quantitative analysis and statistics for sport; economic aspects of sport management.

Ellen Staurowsky, EdD (Temple University) Interim Associate Director, Center for Hospitality and Sport Management. Professor. Social justice issues in sport; gender equity in sport; Title IX pay equity and equal employment opportunity; athlete exploitation; college sport reform; and misappropriation of American Indian imagery in sport.

Karen Weaver, EdD (University of Pennsylvania). Associate Clinical Professor. Sport marketing & promotions, public relations, media, and leadership in sport.

Minor in Food Science

The minor in food science is designed for students interested in applying the basic sciences to the world’s largest industry. The minor should be especially attractive to students in chemistry, chemical engineering, nutrition, and biological sciences, as it provides a background for excellent employment and post-baccalaureate study opportunities in areas closely allied to their basic disciplines.

The minor consists of 25.0 credits. Interested students should consult with a culinary science faculty member to schedule courses appropriate for their background and goals.

Minor in Food Studies

About the Program

Food is central to our existence and is touched upon in a variety of disciplines at the university. This minor seeks to capture and help students navigate the breadth of course offerings that touch upon food systems. Because food systems can be studied through many different lenses, students can adapt this food studies minor to their program of study. For example, students interested in public health policy issues can...
create a minor of hands-on community-based culinary classes, public health, and nutrition classes. If a student is interested in food-related research and development, he or she might tailor the minor with business- or entrepreneurship-centered classes and practical experience in the Drexel Food Lab.

**Minor in Sport Coaching Leadership**

The minor in sport coaching leadership, open to all undergraduate students across the University, provides the foundation for the effective coaching and managing of athletes at various levels.

On completion of the minor, students will have developed the ability to communicate and motivate athletes, enhance the social and emotional growth of athletes, develop sound physical training programs, use sport skills effectively, inform athletes about the principles of good nutrition, reduce injuries by managing roles better, effectively deal with equipment, facilities, scheduling and team logistics and understand the administrative facets of coaching.

The Close School of Entrepreneurship

Entrepreneurship is a central theme of the Drexel University Strategic Plan 2012-2017: Transforming the Modern University. The cultivation of entrepreneurship and innovation is the key to success in today’s world. Drexel’s strong entrepreneurial and innovative culture extends across academic programs through curricular and experiential activities, faculty and student research, and various partnerships with business, non-profits, and government.

The Close School of Entrepreneurship is the hub of such activities, working in alignment with all colleges and schools at Drexel. As a freestanding academic school it provides curricula and activities for students to learn and practice innovative behavior.

The Close School defines entrepreneurship as more than starting a company or sparking innovation within established organizations. For the Close School, entrepreneurship consists of three dimensions:

- A habit of mind and an attitude; a skill set applicable to pursuing innovation in business, personal, and career contexts.
- An approach to life built around innovative thinking, calculated daring and proactive behavior.
- The process through which an individual or team creates or recognizes opportunities to pursue something of value, regardless of the resources available.

The Close School’s academic programs prepare students to face the challenges of self-employment and new venture creation in an evolving 21st century workforce. This pioneering approach to entrepreneurship education addresses a very real market need — an extremely competitive global workforce that increasingly values initiative, independence, and the intellectual dexterity to rethink old ways of doing things and invent new ones.

**Goals and Objectives**

- Infuse entrepreneurship as a way to think, learn, and succeed across the University in terms of values, behaviors, and process, regardless of major.
- Provide a coordinated approach to entrepreneurship education throughout Drexel University.
- Complement and enhance undergraduate and graduate education outcomes for all Drexel University students by developing entrepreneurial thinking within the curriculum and opportunities for entrepreneurial practice.
- Provide students with different paths to engage, learn, and live entrepreneurship, depending on their personal level of interest and career ambitions, having exposed all to introductory concepts and approaches.
- Integrate academic and campus life activities as they relate to entrepreneurship providing multiple paths that align with student aspirations.
- Encourage and create a supportive academic and physical environment to allow the pursuit of student and faculty passions, and big ideas.

**School Offerings**

The Close School of Entrepreneurship offers students various paths to becoming an “entrepreneur.” The School is based on the premise that all students have the potential to be innovative: to take their ideas, in whatever context, and make their ideas a reality. The curricular and co-
curricular programs are formulated to accommodate students’ potential paths to learning and living entrepreneurship.

The School’s curricular initiatives emphasize interdisciplinary coursework in collaboration with other academic units. The School offers a BA in Entrepreneurship and Innovation, minors in Energy Innovations, Entrepreneurship and Innovation, Health Innovations, and Social Entrepreneurship. In addition, elective courses with minimal or no prerequisites are available to all Drexel students to integrate entrepreneurial education with all other academic disciplines at the University. The School collaborates with the Office of Research and Technology Commercialization in developing programs and activities focused on academic entrepreneurship. Through the appointment of joint interdisciplinary faculty, a core of clinical faculty (serial entrepreneurs and seasoned executives) and tenured/tenure-track faculty, the Close School will cultivate a research agenda, providing thought leadership to academics and practitioners. Finally, the Close School of Entrepreneurship collaborates with regional and national organizations and the entrepreneurial community to advance innovation and entrepreneurial initiatives.

Entrepreneurship Living-Learning Community

The Close School of Entrepreneurship has created a community of young entrepreneurs at Drexel. Students of all backgrounds and interests, united by dreams of starting companies and pursuing their entrepreneurial passions, participate in a unique residential program supported by dedicated faculty and staff. This close-knit community of enterprising students lives together and enjoys targeted training, fun activities, and field trips as well as experienced and connected mentors able to foster their innovative aspirations.

The Entrepreneurship Living-Learning Community hosts approximately twenty incoming freshmen annually and is comprised of students from different majors across the University. All full-time entering freshmen planning to live on campus with an interest in innovation and entrepreneurship are encouraged to apply regardless of undergraduate major. Students in this community all live on the same floor and wing of Myers Hall.

Entrepreneurship Co-Op

The co-op experience is the hallmark of a Drexel education. Drexel students intersperse one or three six-month periods of work within their academic plans of study. By weaving together scholarly and practical experiences, Drexel students graduate with a unique set of skills that open up a diverse array of professional opportunities upon graduation.

The Close School recognizes that many undergraduates have already started their own companies. To encourage this entrepreneurial spirit within our student body, the Close School, in collaboration with the Steinbright Career Development Center, offers to all Drexel undergraduate students the opportunity to use their own company as their co-op experience. Students who qualify for this opportunity receive a salary ($15,000), like other co-op students who work for established companies and organizations. Most importantly, students participating in the entrepreneurship co-op receive weekly mentoring from Close School faculty.

Launch It!

During this ten-week capstone course, students work on the actual launching of a start-up and de-risking their business model. Students will talk to customers, partners, and competitors as they engage the iterative process of how a start-up actually works. Students learn how to use the business model canvas to brainstorm each part of a company. Each week will bring a new adventure outside of the classroom as students test each part of their business models, and then share their hard-earned knowledge with the rest of the class.

Entrepreneurship and Innovation

Major: Entrepreneurship and Innovation
Degree Awarded: Bachelor of Arts Degree (BA)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0701
Standard Occupational Classification (SOC) code: 11-1011; 11-1021; 11-9199

About the Program

The BA in Entrepreneurship and Innovation is designed to prepare students to think and act entrepreneurially, in the context of established companies, in working for small and growing ventures, in starting a new venture or self-employment, and in an overall general approach to their personal and professional lives.

Within this innovative curriculum, students build entrepreneurial skills such as resilience, opportunity recognition, collaboration, negotiation and effective communication. Students will learn to manage the growth of their venture, secure funding, and how to run a franchise or family firm.

The program emphasizes interdisciplinary coursework in collaboration with other Drexel colleges and schools providing entrepreneurship students with the opportunity to take classes with future engineers, scientists, artists, and business leaders.

For additional information about the BA in Entrepreneurship and Innovation, please contact Jamuna Saha at js3599@drexel.edu.

Degree Requirements

- Required Courses:
  - The Individual as Entrepreneur: This is a suite of courses that addresses individual entrepreneurial skills such as resiliency, collaboration, innovative thinking and communication. These courses develop personal and interpersonal skills needed to be a successful “entrepreneur” in several contexts.

- The Process of Entrepreneurship: This set of required courses covers a broad range of topics that immerse students in the entire landscape of entrepreneurship.

- A choice of three concentration areas: Social Entrepreneurship, Energy Innovations, Health Innovations. These three areas are not only relevant for students as they begin their careers upon graduation, but they also reflect Drexel University’s strategic research and outreach priorities.

- Interdisciplinary electives: Constitutes a group of courses from across the University that reflect the themes of innovation and entrepreneurship. These courses require few or no prerequisites.
• A capstone course for the Close School student, “Launch It,” provides seed funding for student ideas.

• Minors: The Close School offers four minors available to all undergraduate students.
  • Energy Innovations Minor (p. 39)
  • Entrepreneurship and Innovation (p. 38)
  • Health Innovations Minor (p. 39)
  • Social Entrepreneurship Minor (p. 39)

General Education Requirements

CIVC 101 Introduction to Civic Engagement 1.0
COM 210 Theory and Models of Communication 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
PHIL 105 Critical Reasoning 3.0
UNIV C101 The Drexel Experience 1.0

Two Mathematics Courses (MATH) 6.0

Two Science Courses 6.0

Choose from Bioscience and Biotechnology (BIO), Chemistry (CHEM), Food Science (FDSC), Geoscience (GEO), Physics (PHYS), Physics-Environmental Science (PHEV)

Social/Behavioral Science

Social/Behavioral Science Electives 6.0

Choose 2 courses from Anthropology (ANTH), Communications (COM), Economics (ECON), History (HIST), Political Science (PSCI), Psychology (PSY), Sociology (SOC)

ECON 201 Principles of Microeconomics 4.0

Choose one of the following writing intensive courses: 3.0

COM 270 [WI] Business Communication
COM 310 [WI] Technical Communication
COM 317 [WI] Environmental Communication
COM 320 [WI] Science Writing
COM 375 [WI] Grant Writing
ECON 326 Economic Ideas [WI]
PSY 240 [WI] Abnormal Psychology
PSY 245 [WI] Sports Psychology
PSY 250 [WI] Industrial Psychology

Three Humanities/Fine Arts Courses 9.0

Choose from Africana Studies (AFAS), English (ENGL), Humanities-General (HUM), Global Studies (GST), Judaic Studies (JUDA), Philosophy (PHIL), Women’s & Gender Studies (WGST); Any course from the Westphal College of Media Arts and Design

Two Technology Courses 6.0

Choose from Computer Science (CS), Information Science & Systems (INFO), Management Information Systems (MIS), Software Engineering (SE)

Three Language Course (Language to completion of 103 level) 12.0

Arabic (ARB), Chinese (CHIN), French (FREN), German (GER), Greek (GREC), Hebrew (HBRW), Italian (ITAL), Japanese (JAPN), Korean (KOR), Portuguese (PORT), Russian (RUSS), Spanish (SPAN)

Two Ethics Courses 6.0

Select two of the following:

PHIL 251 Ethics
PHIL 301 Business Ethics
PHIL 305 Ethics and the Media
PHIL 311 Ethics and Information Technology
PHIL 315 Engineering Ethics
PHIL 321 Biomedical Ethics
PHIL 323 Organizational Ethics

PHIL 335 Global Ethical Issues

Entrepreneurship Requirements

ACCT 110 Accounting for Professionals 4.0
CRTV 303 Creativity in the Workplace 3.0
ENTP 100 Innovation Neighborhood 1.0
ENTP 101 Life Strategies I 3.0
ENTP 102 Life Strategies II 3.0
ENTP 205 Ready, Set, Fail 3.0
ENTP 210 Leading Start-Ups 3.0
ENTP 215 Building Entrepreneurial Teams 3.0
ENTP 250 Ideation 3.0
ENTP 325 Early Stage Venture Funding 3.0
ENTP 329 Entrepreneurship & New Technologies 3.0
ENTP 340 Managing Entrepreneurial Growth 3.0
ENTP 350 Dynamics of the Family Firm 3.0
ENTP 385 Innovation in Established Companies 3.0
ENTP 410 Thought Leadership 3.0
ENTP 450 Launch It! 3.0

Concentration Requirements 12.0

Select a concentration from the following options:

Social Entrepreneurship

ENTP 270 Social Entrepreneurship
ENTP 275 Women and Minority Entrepreneurship

Select two of the following:

ENTP 390 Clean Tech Ventures
ENTP 370 Global Entrepreneurship
PBHL 101 Public Health 101 *

Energy Innovations

ECCEP 380 Introduction to Renewable Energy 3.0
ENTP 270 Social Entrepreneurship
ENTP 390 Clean Tech Ventures

MEM 462 [WI] Introduction to Engineering Management

Health Innovations

BIO 112 Biotechnology for Society 4.0
BMES 340 Health Care Administration 4.0
BMES 409 Entrepreneurship for BMES 4.0
PBHL 101 Public Health 101 *

Entrepreneurship Electives ** 21.0

Select seven of the following:

BLAW 346 Entrepreneurial Law
BMES 409 Entrepreneurship for BMES
DIGM 223 Creative Concept Design
DSMR 231 Retail Principles
EAM 211 Strategic Management for Entertainment and Arts Management
ECON 202 Principles of Macroeconomics
ENTP 275 Women and Minority Entrepreneurship
ENTP 270 Social Entrepreneurship
ENTP 360 Franchising
ENTP 370 Global Entrepreneurship
ENTP 390 Clean Tech Ventures
MEM 462 [WI] Introduction to Engineering Management
MIS 200 Management Information Systems
MKTG 201 Introduction to Marketing Management
MKTG 347 New Product Development
MKTG 364 Marketing for New Ventures
PROD 210 Introduction to Product Design
PROD 345 Applied Human Centered Design
PSY 150 Introduction to Social Psychology
RETL 315 Power of Retail Brands
SOC 110 Sociology of the Future
Free Electives 26.0
Total Credits 181.0

* Students may also take any 3 credit Health and Society (HLSO) course.
** BMES 409, ENTP 270, ENTP 275, ENTP 360, ENTP 370 and ENTP 390 cannot satisfy both a concentration requirement and an entrepreneurship elective requirement.

Minor in Entrepreneurship and Innovation

The minor in entrepreneurship and innovation is designed for students from a range of backgrounds who are interested in starting their own ventures, working for start-up companies, or pursuing jobs within established corporations that embrace innovation. Students interested in launching a venture or innovate within a company will learn the process of how to test assumptions related to their new ideas using the lean startup model.

For additional information about the entrepreneurship minor, please contact Jamuna Saha at js3599@drexel.edu.

Entrepreneurship and Innovation Faculty

Roy Carricker, PhD (University of Connecticut) Director of Global Programs. Teaching Professor.
Troy Carter Visiting Professor. Founder and CEO of Atom Factory, a pioneering media and music management company.

Jonathan Corle Adjunct Instructor.

Donna De Carolis, PhD (Temple University) Dean; Silverman Family Professor Entrepreneurial Leadership.

Ozlem Ogutveren-Gonul Assistant Teaching Professor.

Charles Sacco, MBA (Drexel University) Entrepreneur-In-Residence and Director of External Relations & Director of the Baiada Institute for Entrepreneurship.

Damian Salas, MBA (Drexel University) Director, Entrepreneurship Living-Learning Community. Assistant Teaching Professor.

Zahed Subhan, PhD, JD/LLB (Law) (University of Leeds (UK); London University). Teaching Professor.

**Minor in Energy Innovations**

The Energy Innovations minor is designed for students interested in learning about renewable energy and clean technologies and their impact on society. Students interested in launching energy-related ventures will learn the process of how to test assumptions related to their new venture idea using the lean startup model.

The College of Arts and Sciences

About the College

Mission Statement
By pursuing excellence in research and scholarship, we educate our students to become ethical professionals and citizens with knowledge of and appreciation for the fundamental interactions among the humanities, social sciences and the sciences in a fast-changing, challenging, and diverse world.

About the College of Arts and Sciences
The College of Arts and Sciences (http://drexel.edu/coas) was established in 1990. The educational objectives encompass a wide range of goals: to provide interdisciplinary study in the arts and sciences for our Bachelor of Science and Bachelor of Arts majors; to offer Master of Science and Doctoral programs in selected areas of faculty and research strength; to promote research, scholarship, and creative activities which expand disciplinary boundaries and enhance faculty expertise and the quality of the University's instruction; to provide general educational courses for the University's undergraduates; and to improve the quality of life for the University's community through co-curricular programming in the arts and sciences.

Each major combines interdisciplinary study with hands-on, experiential learning to prepare students for a variety of careers, as well as graduate or professional school. All undergraduate majors in the College offer co-operative education program options, with special opportunities relating academic study to work experience, or internships. Additionally, students across the College are encouraged to work alongside faculty in research projects that relate to their academic and professional goals.

Majors
- Anthropology (BA) (p. 42)
- Biological Sciences (BS) (p. 45)
- Chemistry (BA, BS) (p. 55)
- Communication (BA, BS) (p. 62)
- Criminology and Justice Studies (BS) (p. 71)
- English (BA) (p. 80)
- Environmental Science (BS) (p. 87)
- Environmental Studies (BS) (p. 91)
- Environmental Studies and Sustainability (BA) (p. 93)
- Geoscience (BS) (p. 96)
- Global Studies (BA) (p. 101)
- History (BA) (p. 108)
- Mathematics (BA, BS) (p. 116)
- Philosophy (BA) (p. 121)
- Physics (BS) (p. 130)
- Political Science (BA) (p. 133)
- Psychology (BS) (p. 136)
- Sociology (BA) (p. 140)
- Philosophy in Science and Technology (p. 166)
- Philosophy in the Arts and Humanities (p. 171)
- Writing and Publishing (p. 171)

Minors
- Africana Studies (p. 146)
- Anthropology (p. 44)
- Arabic (p. 146)
- Astrophysics (p. 146)
- Bioinformatics (p. 146)
- Biological Sciences (p. 54)
- Biophysics (p. 147)
- Bioscience and Society (p. 147)
- Chemistry (p. 60)
- Chinese (p. 148)
- Communication (p. 70)
- Computer Crime (p. 149)
- Criminal Justice (p. 71)
- Ecology (p. 150)
- English (p. 82)
- Environmental Studies (p. 93)
- French (p. 150)
- Geoscience (p. 98)
- German (p. 153)
- Global Studies (p. 107)
- History (p. 115)
- Human Factors and Ergonomics (p. 156)
- Italian (p. 156)
- Japanese (p. 158)
- Judaic Studies (p. 160)
- Korean (p. 162)
- Mathematics (p. 120)
- Neuroscience (p. 162)
- Nonprofit Communication (p. 163)
- Philosophy (p. 124)
- Physics (p. 131)
- Politics (p. 163)
- Psychology (p. 138)
- Russian (p. 163)
- Science, Technology and Society (p. 163)
- Sociology (p. 142)
- Spanish (p. 164)
- Women's and Gender Studies (p. 164)
- Writing (p. 165)

About the Curriculum
The College of Arts and Sciences is committed to providing high-quality education in the humanities, social sciences and sciences.

Certificates
- Medical Humanities (p. 165)
Bachelor of Arts Degree Programs

The Bachelor of Arts degree provides a broad-based liberal education while allowing students the option to apply their studies through Drexel's well-established co-operative education program.

The BA degree continues the Drexel focus on critical reasoning, a strong grounding in arts and sciences, and effective development of communication skills. The degree is intended to provide a solid liberal arts background for graduate study as well as for professional degrees in such areas as law, public policy, international relations, education, psychology, social work, public health, and medicine.

While the BA degree requires more liberal arts courses than the Bachelor of Science degree, it also allows more varied choices in the fulfillment of math and science requirements and requires study of a foreign language. The BA degree prepares students for an ever-changing and culturally diverse world, and provides them with the tools needed to be leaders in industry, arts, government, and human services.

Bachelor of Science Degree Programs

The College offers Bachelor of Science degrees in many of its majors. The BS degree is similar to the Bachelor of Arts degree, but requires more focused coursework in the sciences than the BA.

In several majors, both a BS and a BA are available. Both degrees provide the same foundation in the discipline. The BS is a more structured approach, while the BA allows for greater flexibility. Drexel's strong advising program helps students learn more about the degree options and which option matches each student's long-term goals.

Science and Mathematics Curriculum

All students in biology, environmental science, geoscience, chemistry, mathematics, and physics study similar subjects during the freshman year. This recognizes the fundamental knowledge common to those disciplines; it also allows for transfer between majors at the end of the freshman year without loss of time. Upper-class students in those disciplines are given the opportunity to take related electives in liberal, scientific, and technical fields.

The flexibility available in the elective programs, and the opportunity to complete an academic minor, permit students to prepare for continuing studies in graduate or professional school, for work in government or industry, or for a change in educational goals.

Generally the basic requirements in each major are completed prior to the senior year. Thus, for science and mathematics majors, the technical electives in the last year may be selected in some advanced specialty within the specific major, and free electives may be used for enrichment or to prepare for a change of field. Each student's elective program must be approved by an advisor from his or her major department.

Humanities and Social Science Curriculum

Students majoring in the humanities and social sciences complete similar sets of courses in the first two years. Some of these courses may be identical (the freshmen year English sequence) while others will vary by discipline, such as major-specific freshmen courses or the math and science requirements in the BA and BS options.

Students in the communication major will take at least one course in their proposed concentration of public relations, journalism, or technical communication in each term during the freshman year. More intensive work in the concentration begins in the sophomore year, as do elective options.

All humanities and social science students have a significant degree of flexibility, allowing them to complete disciplinary requirements, and, through free electives, to take a minor or perhaps another major to prepare for entry into graduate or professional school.

Secondary and Elementary Teacher Certification

The School of Education offers innovative curricula that combine academic majors with appropriate coursework to satisfy state requirements for certification in English, and sciences—including biology, chemistry, earth and space sciences, physics—as well as mathematics and elementary education. Students interested in the teacher education programs should contact the School of Education (http://www.drexel.edu/soe).

Accelerated Degree Program

The Accelerated Degree Program in the College of Arts and Sciences provides opportunities for highly talented and strongly motivated students to complete both an undergraduate degree and a master's degree in five years. Students generally enroll in a five year co-op program and replace the third co-op with courses to complete the graduate degree requirements; some majors require that students enroll for the four-year one co-op program. Students may be offered preliminary admission to such a program when they start at Drexel or can apply when they have completed 90 credits. In both instances, admission to the dual program must be approved before students complete 120 credits.

Accelerated Preprofessional Degree

The College accepts highly qualified and motivated students into accelerated BS/BA +MD and BS/BA +JD degrees. Students must apply to be admitted into these programs before starting at Drexel. For more information, students should contact the Office of Undergraduate Admissions (http://www.drexel.edu/undergrad).

Preprofessional Programs

Students wishing to prepare for admission to professional schools of medicine, veterinary medicine, dentistry, or public health may obtain preprofessional counseling and application assistance at the Steinbright Career Development Center (http://www.drexel.edu/sccd). For health profession application assistance, students may call 215.895.2437. For law school admission assistance, students may call 215.895.1632.

Degree Requirements

Certification for graduation is provided by the individual department or program according to the requirements for each major, which are set forth in subsequent pages. The minimum number of credits required for the degrees of Bachelor of Arts and Bachelor of Science varies from one department and program to another but in no case does it exceed 192 credits of academic work with two to six terms of co-operative experience.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic
Advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-course-list) on the Drexel University Writing Center (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) page. Students scheduling their courses in Banner/DrexelOne can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

The Drexel Writing Center

The Drexel Writing Center (DWC) is dedicated to helping students, faculty, and staff, at all levels of experience and across all disciplines, in their development as writers.

- The DWC works with writers at all stages in the writing process, from brainstorming ideas to polishing final drafts.
- The DWC focus is on individual, one-on-one sessions that feature a conversational, collaborative relationship between the reader and the writer they work with.
- Interaction with the DWC will help writers develop not just writing but critical thinking and reading skills.
- While DWC readers do not perform copy-editing services, they will help students learn strategies for proofreading and editing their documents.

The DWC is located at 0032 MacAlister Hall and can be reached at 215.895.6633. Further information can be found at the Drexel Writing Center (http://drexel.edu/writingcenter) website.

English Language Center

As part of the College of Arts and Sciences, the University Writing Center (http://www.drexel.edu/etc) offers an accredited intensive English program throughout the year. In addition to classes in academic skills such as essay writing and oral presentations, the Center offers the pre-MBA Global Business English program (GLOBE), English for academic purposes, TOEFL and iELTS preparation, and other subjects. Many graduate students begin their studies at Drexel University. The Center offers the pre-MBA Global Business English program (GLOBE), English for academic purposes, TOEFL and iELTS preparation, and other subjects.

The DWC focus is on individual, one-on-one sessions that feature a conversational, collaborative relationship between the reader and the writer they work with.

Interaction with the DWC will help writers develop not just writing but critical thinking and reading skills.

While DWC readers do not perform copy-editing services, they will help students learn strategies for proofreading and editing their documents.

The DWC is located at 0032 MacAlister Hall and can be reached at 215.895.6633. Further information can be found at the Drexel Writing Center (http://drexel.edu/writingcenter) website.

Anthropology

Major: Anthropology
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0201
Standard Occupational Classification (SOC) code: 19-3091

About the Program

Anthropology is the study of human beings — past and present. Students majoring in anthropology broaden their understanding of the ways of life on planet Earth through courses that explore the diversity of human cultures, courses that explore the range of theoretical ideas about culture and human organization, and specialized courses in field techniques and methodology.

The anthropology major is a small, highly specialized program. The program has emphases in digital and media anthropology, symbolic communication, and community organization. Students are provided with an exceptional background in theory, and methodology, and fieldwork that will open doors to various career paths or lead to graduate training.

Two options exist in the anthropology bachelor of arts degree program. The first option is a four-year program with a single six month co-op in the junior year. For the majority of anthropology majors, the co-op will provide a fieldwork experience for students. Students who select to undertake a co-op are guided by interaction with faculty both inside and outside the classroom. The second option is a four-year non-co-op option. The core of the major in this option is the seminar in ethnography which majors are required to take each fall term for a total of 12.0 credits.

Free electives  7.0

**Term Credits**  16.0

**Term 12**
Anthropology program requirement  3.0
Free electives  12.0

**Term Credits**  15.0

Total Credit: 181.0-188.0

* See degree requirements (p. 42).

---

**Co-op/Career Opportunities**

**C0-Op Opportunities**

In order for majors to take the required seminar in ethnography, all anthropology co-ops are scheduled for the fall/winter cycle. Anthropology co-ops are student initiated and developed through discussions with faculty, rather than being selected from an existing list. Co-op ideas frequently emerge from discussions in the seminar in ethnography as students who have undertaken co-ops report on their experiences. Past co-ops have included: teaching English in Costa Rica; working on an archeological dig in the Yucatan; studying agricultural practices in Hawaii; working with an arts program in Oaxaca. In addition, several majors have collaborated on faculty research, while others have been engaged in community outreach projects.

**Post-Graduate Opportunities**

Many corporations, schools and health-care institutions are using ethnographic field techniques and qualitative methods in order to understand their markets and clientele, or for that matter, their own organizational structure. The Anthropology major prepares students for employment in these areas, as well as for further graduate work in anthropology, public policy, law and other social and behavioral sciences.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) web page for more detailed information on post-graduate opportunities.

**Minor in Anthropology**

The anthropology minor provides students in other fields with a cross-cultural awareness that will enable them to interact with a variety of people in a wide range of situations. By giving students a respect for and understanding of the basis of cultural variation, the minor can facilitate working in international settings. Even for students working within the United States, anthropology offers increased sensitivity to ethnic and population diversity. Medicine, law, counseling, nursing, and nutrition are only a few of the fields in which clients and professionals may come from different parts of our heterogeneous society.

**Please note:** No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

**Required (Core) Courses**

Anthropology Faculty

Barbara Hornum, PhD (Byrn Mawr College) Director of Center for Academic Excellence (DCAE). Associate Professor. Comparative gerontology, planned communities, continuing care communities, retirement, faculty development.

David Kutzik, PhD (Temple University). Professor. Sociology and philosophy of science; applied gerontological research; political economy of health care; microprocessor-based assistive technologies to improve case management and increase independent living among frail populations.

Brent Luvaas, PhD (UCLA). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Usha Menon, PhD (University of Chicago). Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Rakhmiel Peltz, PhD (Columbia University, Linguistics; University of Pennsylvania, Biological Sciences) Director of Judaic Studies Program. Professor. Sociolinguistics, ethnography of communication, social history of Yiddish language and culture, Yiddish culture of Eastern Europe, language planning, language and ethnic identity, language and group memory, aging and ethnicity, history of urban neighbors.

Douglas V. Porpora, PhD (Temple University). Professor. International political economy, culture, social theory, and philosophy of social science.

Robert Powell, PhD (Temple University). Assistant Teaching Professor. Early and Middle Bronze Age Crete; archaeoastronomy; early state formation; archaeology and anthropology of frontiers; mass communication.

Amber R. Reed, PhD (UCLA). Visiting Assistant Professor. Democracy, Apartheid, Nostalgia, Race, Postcolonial Theory, Childhood/Youth Studies, Politics of Culture

Rachel R. Reynolds, PhD (University of Illinois at Chicago). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

Wesley Shumar, PhD (Temple University) Department Head, Anthropology. Professor. Ethnography of cyberspace, online learning communities, political economy of higher education, globalization, activity theory, semiotics, critical realism, psychoanalysis, identity and the self.

Judith Storniolo, PhD (University of Pennsylvania). Teaching Professor. Historical and comparative linguistics, Mesoamerican languages and culture, applied anthropology, public policy, oral traditions and narratives, ideology and ritual, Mesoamerican ethnohistory; and pre-Columbian literature.

Emeritus Faculty

Anthony Glascock, PhD (University of Pittsburgh) Coordinator of the Anthropology Program. Professor Emeritus. Aging and health, definitions of functionality and impairment, technology and aging, social organization, Ireland, East Africa.

Biological Sciences

Major: Biological Sciences

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 183.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 26.0101

Standard Occupational Classification (SOC) code: 19-1029

About the Program

The curricular choices are designed to provide a sound basis for careers in the private sector, government and research laboratories, and for advanced study in graduate and professional programs in medicine, other health related areas, or in teaching.

The biological sciences encompass many areas of study. Biologists study the structure and functions of living organisms from the individual cell to the whole organism, and collectively to the community level. Discoveries in the biological sciences influence many aspects of our daily lives and have become the foundation of most new developments of the new century. In the past two decades, advances in molecular biology and genetics have been rapid, opening many new, exciting career opportunities in the fields of biotechnology and genetic engineering. Biologists can pursue a variety of options including careers in medicine, dentistry, veterinary medicine or other health-related areas; in research or commercial laboratories at pharmaceutical companies, medical research laboratories, biotechnology companies or in government agencies; and in teaching. In fact, more than 100 different occupations have been listed for biologists. Graduates in the biological sciences are in demand and enjoy a high placement rate with competitive salaries.

The biological sciences major resides in the Department of Biology (http://drexel.edu/coas/academics/departments-centers/biology). Students earn a bachelor's degree in the biological sciences and are prepared for technical careers in research or commercial laboratories, or for professional schools or graduate study.

The course requirements identifies required support courses in chemistry, physics, mathematics, humanities, and science and human affairs. With proper selection of electives, students can meet teacher certification requirements or complete a minor in another field. Students are encouraged to consult frequently with their academic advisor for curriculum planning.

In addition to the core requirements, students select one of five concentrations in a field of interest:

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Program Options

Co-op employment is an option for biological science students. The major offers three distinct plans:
Five-year option with co-op experience
This option allows for the greatest amount of employment experience, with three distinct six-month periods of employment included with studies. After the start of the sophomore year, students study or work through all terms, including summer.

Four-year option with co-op experience
The degree includes just one six-month period of employment. After the start of sophomore year, students study or work through all terms, including summer.

Four-year option without co-op experience
The degree can be completed in four years without co-op/internship employment. Students are not required to pursue studies during any of the summer terms.

Degree Requirements
The Biological Sciences curriculum is designed to provide students with both depth and flexibility within the field of biology. In addition to the core requirements, students select one of five concentrations in a field of interest.

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Concentration requirements and elective options are outlined below. Within each concentration, students are able to further specialize in a focus area by taking recommended electives.

Requirements

Humanities and Social Sciences
CIVC 101 Introduction to Civic Engagement 1.0
COM 230 Techniques of Speaking 3.0
COM 310 [WI] Technical Communication 3.0
or COM 320 Science Writing
COOP 101 Career Management and Professional Development 0.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
PHIL 251 Ethics 3.0
UNIV S101 The Drexel Experience 1.0
UNIV S201 Looking Forward: Academics and Careers 1.0
Humanities and Social Science Electives 9.0
Science, Technology, Health and Human Affairs Elective 3.0

Mathematics and Statistics
Select one of the following sequences:
Intro to Analysis
MATH 101 Introduction to Analysis I 1.0
& MATH 102 and Introduction to Analysis II 1.0
& MATH 239 and Mathematics for the Life Sciences
Calculus
MATH 121 Calculus I 3.0
& MATH 122 and Calculus II 3.0
& MATH 123 and Calculus III 3.0
MATH 410 Scientific Data Analysis I 3.0
MATH 411 Scientific Data Analysis II 3.0

Physical Sciences
BIO 311 Biochemistry 4.0
or CHEM 243 Organic Chemistry III 4.0
CHEM 101 General Chemistry I 3.5
CHEM 102 General Chemistry II 4.5
CHEM 103 General Chemistry III 5.0
CHEM 241 Organic Chemistry I 4.0
CHEM 242 Organic Chemistry II 4.0
PHYS 152 Introductory Physics I 4.0
PHYS 153 Introductory Physics II 4.0
PHYS 154 Introductory Physics III 4.0

Core Biology Courses
BIO 122 Cells and Genetics 4.5
BIO 124 Evolution & Organismal Diversity 4.5
BIO 126 Physiology and Ecology 4.5
BIO 207 Applications in Biology I 1.0
BIO 208 Applications in Biology II 1.0
BIO 209 Cell, Molecular & Developmental Biology I 4.0
BIO 211 Cell, Molecular & Developmental Biology II 4.0
BIO 219 [WI] Techniques in Molecular Biology 3.0
BIO 224 Form, Function & Evolution of Vertebrates 4.0
BIO 225 Vertebrate Biology and Evolution Laboratory 2.0
BIO 471 Seminar in Biological Sciences 2.0
BIO 472 Seminar in Biological Sciences 2.0
BIO 473 [WI] Seminar in Biological Sciences 2.0
ENVS 212 Evolution 4.0

Concentration Courses
28.0-30.0
Free electives 24.0
Total Credits 183.5

Students select one of five concentration and fulfill the requirements, as outlined below.

1. The Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration
This concentration provides exposure to several vital disciplines within Biology, and will prepare students for a diversity of careers in research, medicine, and industry. Students interested in tailoring their studies more specifically may follow the suggested “focus areas” when selecting their two CMGB Concentration electives.

Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration Requirements
BIO 244 Genetics I 3.0
or BIO 444 Human Genetics
BIO 314 Pharmacology 3.0
or BIO 404 Structure and Function of Biomolecules
BIO 318 Biology of Cancer 3.0
or BIO 430 Cell Biology of Disease
BIO 410 Advanced Molecular Biology 3.0

Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration Electives (See Lists Below)

- Two Cell/Molecular/Genetics/Biochemistry (CMGB) Electives (see list below) 6.0
- Organismal/Physiology Elective (see list below) 3.0
- Ecology/Evolution/Genomics Elective (see list below) 3.0

Concentration Laboratory Courses
Two Laboratory Electives (see list below) 4.0
Total Credits 28.0

* Students interested in pursuing a focus area in Neurobiology, Pharmaceutics, Cell Biology, Biochemistry, Molecular Biology or Genetics should contact the academic advisor in the Biology Department for specific focus recommendations.

2. The Organismal Biology/Physiology Concentration

This concentration combines courses in organismal biology and physiology with an opportunity to focus on human physiology. The concentration is designed to appeal to students interested in health and medicine, but also accommodates students seeking a wider breadth of knowledge in organismal diversity. Students can focus their electives in human physiology or can choose courses that study non-human organisms.

3. The Ecology/Evolution/Genomics Concentration

This concentration focuses on ecological and evolutionary aspects of biology for biology majors who also have specific interests in ecology, evolution or genomics. This concentration is designed to maintain a breadth of knowledge in biology, but also allows students to tailor their course work more specifically to reflect their specific area of interest.

Ecology/Evolution/Genomics concentration electives

Select one Cell/Molecular/Genetics/Biochemistry (CMGB) elective (see list below) 3.0

Select one Organismal/Physiology elective (see list below) 3.0

Select two Ecology/Evolution/Genomics electives (see list below) 6.0

Concentration Laboratory Courses

Select two Laboratory electives (see list below) 4.0

Total Credits 28.0-31.0
* Students interested in pursuing a focus area in Ecology, Evolutionary Biology or Genomics should contact the academic advisor in the Biology Department for specific focus recommendations.

**Cell/Molecular/Genetics/Biochemistry (CMGB) electives**

- BIO 244 Genetics I 3.0
- BIO 285 Forensic Biology 3.0
- BIO 311 Biochemistry 4.0
- BIO 314 Pharmacology 3.0
- BIO 318 Biology of Cancer 3.0
- BIO 346 Stem Cell Research 3.0
- BIO 348 Neuroscience: From Cells to Circuits 3.0
- BIO 404 Structure and Function of Biomolecules 4.0
- BIO 410 Advanced Molecular Biology 3.0
- BIO 414 Behavioral Genetics 3.0
- BIO 415 Proteins 3.0
- BIO 416 Biochemistry of Major Diseases 3.0
- BIO 421 Biomembranes 3.0
- BIO 430 Cell Biology of Disease 3.0
- BIO 433 Advanced Cell Biology 3.0
- BIO 444 Human Genetics 3.0
- BIO 449 Recombinant DNA Laboratory 5.0
- BIO 453 Protein Dysfunction in Disease 3.0
- BIO 462 Biology of Neuron Function 3.0
- BIO 463 Molecular Mechanisms of Neuregeneration 3.0

**Organismal/Physiology electives**

- BIO 201 Human Physiology I 4.0
- BIO 221 Microbiology 3.0
- BIO 223 Parasitology 3.0
- BIO 256 Vertebrate Morphology and Physiology 3.0
- BIO 284 Biology of Stress 3.0

- ENVS 383 Ecology of the New Jersey Pine Barrens 4.0
- ENVS 388 Marine Field Methods 4.0
- ENVS 394 Entomology Laboratory 2.0

4. The Pathobiology Concentration

The Pathobiology concentration focuses on pathogenesis, and provides a unique option for students that differs from the more traditional disciplines in cell/molecular/genetics/biochemistry. This concentration is designed to appeal to students with an interest in pursuing careers in areas of public and allied health.
Select two Organismal/Physiology electives (see list below) 6.0
Select one Evolutionary Bio/Ecology elective (see list below) 3.0
Concentration Laboratory Courses
Two Laboratory electives (see list below) 4.0
Total Credits 28.0

Cell/Molecular/Genetics/Biochemistry (CMGB) electives:

- BIO 244 Genetics I 3.0
- BIO 285 Forensic Biology 3.0
- BIO 311 Biochemistry 4.0
- BIO 314 Pharmacology 3.0
- BIO 318 Biology of Cancer 3.0
- BIO 346 Stem Cell Research 3.0
- BIO 348 Neuroscience: From Cells to Circuits 3.0
- BIO 404 Structure and Function of Biomolecules 4.0
- BIO 410 Advanced Molecular Biology 3.0
- BIO 414 Behavioral Genetics 3.0
- BIO 415 Proteins 3.0
- BIO 421 Membranes 3.0
- BIO 430 Cell Biology of Disease 3.0
- BIO 433 Advanced Cell Biology 3.0
- BIO 444 Human Genetics 3.0
- BIO 449 Recombinant DNA Laboratory 5.0
- BIO 453 Protein Dysfunction in Disease 3.0
- BIO 462 Biology of Neuron Function 3.0
- BIO 463 Molecular Mechanisms of Neurodegeneration 3.0
- ENVS 326 Molecular Ecology 3.0

Organismal/Physiology electives

- BIO 201 Human Physiology I 4.0
- BIO 221 Microbiology 3.0
- BIO 223 Parasitology 3.0
- BIO 256 Vertebrate Morphology and Physiology 3.0
- BIO 270 Developmental Biology 3.0
- BIO 284 Biology of Stress 3.0
- BIO 286 Forensic Toxicology 3.0
- BIO 310 Comparative Physiology 3.0
- BIO 322 Mycology 4.5
- BIO 349 Behavioral Neuroscience 3.0
- BIO 368 Embryology 4.0
- BIO 370 Teratology 3.0
- BIO 372 Histology 4.0
- BIO 386 Gross Anatomy I 2.0

- ENVS 344 Equatorial Guinea: Field Research 6.0
- ENVS 365 Animal Behavior Laboratory 2.0

5. The General Biology Concentration

This concentration will allow maximum flexibility for students who want to develop their own unique plan of study. The concentration is designed for students who may not have one specific area of interest, but who are looking to be well-rounded in the biological sciences. Students pursuing careers in education, where a wider breadth of knowledge in biology is desirable, may choose to select this concentration.

General Biology Concentration Electives 24.0
2 or 3 Cell/Molecular/Genetics/Biochemistry (CMGB) electives (see list below)
2 or 3 Organismal/Physiology electives (see list below)
2 or 3 Ecology/Evolution/Genomics electives (see list below)

Concentration Laboratory Courses
Two Laboratory electives (see list below) 4.0
Total Credits 28.0

Cell/Molecular/Genetics/Biochemistry (CMGB) electives

- BIO 231 Cell Physiology 3.0
- BIO 244 Genetics I 3.0
- BIO 285 Forensic Biology 3.0
- BIO 311 Biochemistry 4.0
- BIO 314 Pharmacology 3.0
- BIO 318 Biology of Cancer 3.0
- BIO 331 Bioinformatics I 3.0
- BIO 332 Bioinformatics II 3.0
- BIO 346 Stem Cell Research 3.0
- BIO 348 Neuroscience: From Cells to Circuits 3.0
BIO 404  Structure and Function of Biomolecules  4.0
BIO 413  Genomics  3.0
BIO 415  Proteins  3.0
BIO 421  Biomembranes  3.0
BIO 430  Cell Biology of Disease  3.0
BIO 433  Advanced Cell Biology  3.0
BIO 444  Human Genetics  3.0
BIO 445  Microbial Genetics  3.0
BIO 447  Advanced Genetics and Molecular Biology  3.0
BIO 449  Recombinant DNA Laboratory  5.0
BIO 451  Genetic Reg Development  3.0
BIO 453  Protein Dysfunction in Disease  3.0
BIO 462  Biology of Neuron Function  3.0
BIO 465  Neurobiology of Disease  3.0
ENVS 326  Molecular Ecology  3.0

**Organismal/Physiology electives**

BIO 201  Human Physiology I  4.0
BIO 203  Human Physiology II  4.0
BIO 221  Microbiology  3.0
BIO 223  Parasitology  3.0
BIO 256  Vertebrate Morphology and Physiology  3.0

* See degree requirements (p. 46).  

Biological Sciences Major: Four-year Non-co-op  

Term 1  
BIO 122  Cells and Genetics  4.5  
CHEM 101  General Chemistry I  3.5  
ENGL 101  Composition and Rhetoric I: Inquiry and Exploratory Research  3.0  
MATH 121  Calculus I  4.0  
or 101  Introduction to Analysis I  
UNIV S101  The Drexel Experience  1.0  

Term Credits  16.0  

Term 2  
BIO 124  Evolution & Organismal Diversity  4.5  
CHEM 102  General Chemistry II  4.5  
CIVC 101  Introduction to Civic Engagement  1.0  
ENGL 102  Composition and Rhetoric II: Advanced Research and Evidence-Based Writing  3.0  

Term Credits  16.0  

MATH 122  Calculus II  4.0  
or 102  Introduction to Analysis II  

Term Credits  17.0  

Term 3  
BIO 126  Physiology and Ecology  4.5  
CHEM 103  General Chemistry III  5.0  
ENGL 103  Composition and Rhetoric III: Themes and Genres  3.0  
MATH 239  Mathematics for the Life Sciences  4.0  
or 123  Calculus III  

Term Credits  16.5  

Term 4  
BIO 207  Applications in Biology I  1.0  
BIO 209  Cell, Molecular & Developmental Biology I  4.0  
BIO 219 [WI]  Techniques in Molecular Biology  3.0  
CHEM 241  Organic Chemistry I  4.0  
PHYS 152  Introductory Physics I  4.0  

Term Credits  16.0  

Term 5  
BIO 208  Applications in Biology II  1.0  
BIO 211  Cell, Molecular & Developmental Biology II  4.0  
Biology Laboratory Requirement  2.0  
CHEM 242  Organic Chemistry II  4.0  
PHYS 153  Introductory Physics II  4.0  
UNIV S201  Looking Forward: Academics and Careers  1.0  

Term Credits  17.0  

Term 6  
BIO 224  Form, Function & Evolution of Vertebrates  4.0  
BIO 225  Vertebrate Biology and Evolution Laboratory  2.0  
BIO 311  Biochemistry  4.0  
or CHEM 243  Organic Chemistry III  
PHIL 251  Ethics  3.0  
PHYS 154  Introductory Physics III  4.0  

Term Credits  17.0  

Term 7  
MATH 410  Scientific Data Analysis I  3.0  
ENVS 212  Evolution  4.0  
BIO/ENVS Elective  3.0  
Humanities/Social Science Elective  3.0  
Sci, tech, health & human affairs elective  3.0  

Term Credits  16.0  

Term 8  
COM 310 [WI]  Technical Communication  3.0  
MATH 411  Scientific Data Analysis II  3.0  
BIO/ENVS Elective  3.0  
Humanities/Social Science Elective  3.0  
Free Elective  3.0  

Term Credits  14.0  

Term 9  
COM 230  Techniques of Speaking  3.0  
BIO/ENVS Elective  3.0  
Humanities/Social Science Elective  3.0  
Sci, tech, health & human affairs elective  3.0  

Term Credits  12.0  

Term 10

Co-op/Career Opportunities

Opportunities

Students earn a bachelor’s degree in the biological sciences and are prepared for technical careers in research or commercial laboratories or for professional schools.

Graduates typically work for pharmaceutical companies, medical research laboratories, biotechnology companies, or in government laboratories. Many graduates also choose to pursue an advanced degree in the field.

Co-op Opportunities

Past co-op employers of biosciences majors have included:

- GlaxoSmithKline
- AstraZeneca Pharmaceuticals
- Wistar Institute
- Moss Rehab
- ViroPharma, Inc.
- NovaFlora, Inc.
- Wyeth

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Combined Bachelors/Masters Degree

Qualified students can take graduate courses in their junior and senior years for undergraduate or graduate credit. They can also complete a combined BS /MS degree in five years. Further questions about the BS / MS degree program should be directed to the departmental graduate advisor:

Kate Pelusi
Graduate Program Manager
Department of Biology
215.895.6374
kp475@drexel.edu

Minor in Biological Sciences

The minor in biological sciences is designed for students who wish to become acquainted with the life sciences while pursuing a major in another area. This option should be particularly useful for students majoring in areas such as chemistry, engineering, physics, or psychology who are interested in admission to medical schools or graduate programs. Students interested in the minor should consult with an academic advisor in the department for help with course selections.

</tbody>
</table>

Total Credits 24.5

* A grade of "C" or better must be earned for each course in this minor for the course to meet the requirement.

** The Biology Elective can be selected from any of the regularly offered Biology department lecture courses 200-level and above according to your specific interests. Note that existing course prerequisites may affect which courses may be selected.

Facilities

The Department of Biology has well-equipped teaching laboratories with networked computers and advanced digital image analysis capability. Both teaching and research laboratories contain a range of modern equipment including microscopes, centrifuges, chromatographs, spectrophotometers, scintillation counters, culture chambers, and densitometers.

Visit the Research in Biology (http://www.drexel.edu/coas/academics/departments-centers/biology/research) web page for more information.

Biological Sciences Faculty

Michael Akins, PhD (Yale University). Assistant Professor. The neural mechanisms underlying how organisms interact with the environment; circuit formation, particularly of sensory circuits, and neural diseases including autism and Fragile X syndrome (FXS).

Shivanthi Anandan, PhD (University of California, Los Angeles). Associate Professor. Microbial genetics, in particular the analysis of light-regulated signal transduction pathways and the regulation of gene expression in photosynthesizing organisms.

Joseph Bentz, PhD (State University of New York (SUNY) at Buffalo). Professor. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

John R. Bethea, PhD (University of Alabama at Birmingham) Department Head. Professor. Neuroscience and immunology.

Valerie Bracchi-Ricard, PhD (University Joseph Fourier, Grenoble, France). Research Assistant Professor. Role of TNF and TNF receptors in neuroinflammation and remyelination following spinal cord injury.

Laura Duwel, PhD (University of Cincinnati) Assistant Department Head, Department of Biology. Teaching Professor. Immunology and microbiology.

Felice Elefant, PhD (Temple University). Associate Professor. Understanding the roles of two classes of chromatin regulatory proteins termed histone acetyltransferases(HATs)and histone de-methylases.

Denise Garcia, PhD (UCLA). Assistant Professor. Neuroscience, the role of astrocytes in the central nervous system.
Tali Gidalevitz, PhD (University of Chicago). Assistant Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Mary Katherine Gonder, PhD (The City University of New York) Director, Bioke Biodiversity Protection Program Co-Founder, Central African Biodiversity Alliance. Associate Professor. Deciphering spatial patterns of biodiversity across the Gulf of Guinea and Congo Basin region; Conservation measures to mitigate the effects of habitat loss and climate change in western equatorial Africa.

Susan Gurney, PhD (Westfälische Wilhelms-Universität Münster (Germany)). Assistant Teaching Professor. Evolutionary genetics (human and equids); stem cell biology; parasitic interactions.

Meshagae Hunte-Brown, PhD (Drexel University). Associate Teaching Professor. Stable isotopes in aquatic food webs, ecosystem ecology, STEM education.

Jiu Jiang, MD, PhD (Shanghai Second Medical University). Research Associate Professor. T cell immune response to virus infection in aged mice.

Karen Kabnick, PhD (Massachusetts Institute of Technology). Associate Teaching Professor. Molecular and genetic mechanisms of cellular biology, human disease, host/parasite interactions.

Joy Little, PhD (Wake Forest University). Assistant Teaching Professor. Stem education, cancer cell biology.

Robert Loudon, PhD (Thomas Jefferson University). Associate Teaching Professor. Rho GTPases, regulation of actin cytoskeleton, Regulation of G protein-coupled receptors by receptor kinases and arrestins.

Daniel Marenda, PhD (Syracuse University) Director of the Biology Graduate Program, Co-Director of the Cell Imaging Center. Associate Professor. Developmental neurobiology and behavior; CHARGE syndrome; Pitt-Hopkins syndrome; Alzheimer's disease.

Donna Murasko, PhD (Penn State Hershey Medical Center) Dean, College of Arts and Sciences. Professor. The effects of aging on the adaptive immune response to influenza virus and retrovirus latency and reactivation.

Michael O'Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Ryan Petrie, PhD (McGill University). Assistant Professor, Mechanisms of cell movement through three-dimensional extracellular matrix.

Jerome Ricard, PhD (University Joseph Fourier, Grenoble, France). Research Assistant Professor. Inflammation and cell death after spinal cord injury. Regulation of cell death by Eph receptors.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Nianli Sang, MB, PhD (M.B., Fudan University Shanghai Medical College; Ph.D., Thomas Jefferson University) Co-Director of the Cell Imaging Center. Associate Professor. Molecular and cellular biology of cancer; posttranslational modification, folding and quality control of proteins and their implication in cell physiology and human diseases.

Aleister Saunders, PhD (University of North Carolina, Chapel Hill) Senior Vice Provost for Research, Director of the RNAi Resource Center.

Associate Professor. Identification and characterization of genes and proteins involved in Alzheimer's disease.

Kevin P.W. Smith, PhD (Drexel University). Assistant Teaching Professor. Linking behavioral ecology and organismal diversity, neonate behavior in herpetological models, STEM education.

Elias T. Spiriotis, PhD (The Johns Hopkins University) Director of the Cell Imaging Center. Associate Professor. Cell polarity and cell division; regulation of cytoskeleton-dependent motility.

Jennifer Stanford, PhD (Harvard University). Assistant Professor. Evaluating and improving approaches to teach STEM content in higher education environments to promote student learning, engagement in STEM courses, and STEM student retention.

Monica M. Togni, PhD (New Jersey Institute of Technology). Assistant Teaching Professor. Examination of the structure and function of living organisms from the cellular to the organismal level in order to better understand common physiological processes.

Emeritus Faculty

Chemistry

Major: Chemistry
Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: BA -184.5; BS - 190.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 40.0501
Standard Occupational Classification (SOC) code: 19-2031

About the Program

Drexel's Department of Chemistry offers both a BA and a BS degree in chemistry. The BA is offered as a 4-year non-co-op program for those interested in following their undergraduate education in chemistry with professional school, such as law or medicine. The BS degree, offered in three formats (a 5-year three co-op, 4-year one co-op and a 4-year non-co-op), is certified by the American Chemical Society. In addition, a minor in chemistry is available for students in other majors who desire a strong physical science background.

Each student plans a course of study and selects electives in consultation with an advisor in the Department of Chemistry (http://www.drexel.edu/coas/academics/departments-centers/chemistry). Students who show initiative and laboratory ability are encouraged to participate in undergraduate research by selecting a research problem in collaboration with one of the departmental faculty members. Students in the BS program are required to participate in undergraduate research through the Senior Research courses.

Most graduate courses in chemistry are open to qualified seniors. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.
About the Accelerated Bachelor’s/Master’s Dual Degree Program in Chemistry

The Bachelor's/Master's (BS/MS) dual degree program is an accelerated program providing the academically qualified student with an opportunity to earn both a BS and an MS degree (two diplomas are awarded) in five years, the time normally required to finish the co-op option BS degree alone.

This is an academically demanding program, but there are several allowances built in to enable the program to be completed in the time allotted. For instance, only 180 rather than 190.5 undergraduate quarter credits are required. The co-op experience may be adjusted; the student may take two rather than three co-op cycles, enabling two additional quarters of on-campus study. If needed, the student may also take evening courses while on co-op.

Eligibility

Exceptional students with a cumulative grade point average of at least 3.0 and who are enrolled in the five-year co-op option program are eligible for the BS/MS program. Students formally apply to the program after they have completed 90 credits but before they have completed 120 credits. Students are strongly encouraged to begin planning for the program as early as their freshman year. Students who have more than 120 credits are not eligible.

Transfer students are eligible to join the BS/MS program, but they must be able to complete the program in the time it would take to complete the BS degree alone. International transfer students must be able to meet the required minimum TOEFL score for the department graduate program (currently 550) in order to be admitted to the BS/MS program.

Application Process

Interested applicants need to formally apply to the program. Applications are available in the Office of Graduate Admissions or in the College of Arts & Sciences advisor's office. Applications must be accompanied by a Plan of Study prepared in consultation with the undergraduate and graduate advisor in the department and approved by both the Department Head and the Dean. Entry into the program must be officially approved by both the Department Head and Academic Dean.

BS/MS Requirements

Students enrolled in the BS/MS dual degree program must complete 180 undergraduate quarter credits for the BS degree and at least 45 graduate quarter credits for the MS degree. All graduate departmental requirements must be satisfied in full, including producing a thesis, if the thesis-option Master’s program is elected. Master’s thesis requirements may be completed in the summer term of the final year with prior approval of the department. Students in the BS/MS program must maintain a cumulative GPA of 3.0 in their undergraduate and graduate coursework to remain in the program. Further questions about the BS/MS degree program should be directed to the departmental graduate advisor.

Additional Information

Four-year Non-Co-op Sample Plan of Study (BA)

**Categories of Electives:**
- **Humanities and Arts Electives**
  Designated courses in art, art history, communication studies, foreign languages (300-level or above), history, literature, music, philosophy, religion, and theatre arts.
- **International Electives**
  Designated courses in anthropology, art history, history, literature, music, politics and sociology. Courses with an international focus may be used to fulfill requirements in other categories as well.
- **Social and Behavioral Studies Electives**
  Designated courses in anthropology, criminal justice, economics, international relations, history, politics, psychology and sociology.
- **Studies in Diversity Electives**
  Africana studies, women’s studies or designated cross-listed courses in anthropology, art, art history, history, literature, music, philosophy, politics and sociology.
- **Language Requirement**
  Students may satisfy the language course requirements in two ways: (1) taking two terms of sequential study of a foreign language (or placement at the exit level of 103 or above); or (2) taking two terms of a computer language or placement out as determined by the Department of Computer Science.

**Courses with CHEM prefix, although ENVS chemistry courses can also fulfill this requirement.**

**Humanities electives**

| BIO 306 | Biochemistry Laboratory 2.0 |
| CHEM 493 | Senior Research Project 3.0 |
| **Liberal Studies electives** | 6.0 |

---

**Footnotes**

* Technical electives are defined as 200+ level courses from Science, Mathematics, Business, Engineering or Information Studies. Liberal studies electives are defined as courses (at any level) from all other areas.

** The American Chemical Society requires ACS-certified students to take a specified number of biochemistry courses. To fulfill this requirement in the BS curriculum, you should take a combination of one lecture and one lab course from the choice of: BIO 404, CHEM 311, CHEM 306 or BIO 404 to fulfill the biochemistry requirement. Students may also choose to take the two lecture courses (BIO 404 and BIO 311) rather than a lecture/laboratory combination.

CHEM 493  Senior Research Project  3.0
Free Elective  3.0
Term Credits  15.5

Total Credit: 190.5

* CHEM 230 and CHEM 231 must be taken concurrently.

** Biochemistry Requirement: The American Chemical Society requires ACS-certified students to take a specified number of biochemistry courses. To fulfill this requirement in the BS curriculum, you should take a combination of one lecture and one lab course from the choice of: BIO 311, BIO 306 or BIO 404 to fulfill the biochemistry requirement. Students may also choose to take the two lecture courses (BIO 404 and BIO 311) rather than a lecture/laboratory combination. Note that the courses BIO 122 and BIO 214 are required in order to provide adequate background in biology for taking these upper-level biochemistry courses.

*** Must be at a 200+ level. See Degree Requirements for more information on acceptable classes.

Co-op/Career Opportunities

Opportunities for chemistry majors include working in research and development in corporate and government laboratories in the chemical, pharmaceutical and agricultural (e.g., U.S. Department of Agriculture) sectors. There is a remarkably high concentration of chemical and pharmaceutical companies in the Philadelphia region. Other options include entering medical, dental, law, or other professional schools.

The major in chemistry is sufficiently flexible to allow students to prepare to teach at the secondary level. With proper selection of electives, students can meet teacher certification requirements.

Sample Co-op Opportunities

A five-year co-op degree is offered. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Assistant chemist, pharmaceuticals manufacturer: "My position involved the synthesis and characterization of target compounds in the endotheline project. Involved the development of synthetic roots to the prescribed target. This would include the investigation of reactions which were going to be used. . .the position was very independent. . .great working environment."

Co-op chemist, petroleum refiner: "Performed synthesis of ligands and metal complexes. Operated FT-IR spectrometer for sample analysis. Submitted samples for analysis by mass spectrometer and NMR. . .The position allowed me to develop the skills necessary for independent research in organic synthesis."

Assistant lab technician, pharmaceuticals manufacturer: "I was an assistant technician in a mass spectrometry lab. . .I was responsible for the development of SDS-gel electrophoresis techniques for gels and gel membranes. . .I developed the methods independently and my employer encouraged me to be an expert on the technique and explore any method I found that would benefit the lab."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Chemistry

The academic minor program in chemistry is designed to expose students to each of the major sub-disciplines of chemistry (analytical, inorganic, organic, and physical). In order to accomplish this students take a total of at least 27.5 credits of chemistry past the freshman year (100 level courses).
As chemistry is an experimental science at least two laboratory courses must be included in the group of courses taken for the minor. Students should note that their academic major may require certain chemistry courses that can also be used to fulfill the requirements for a minor in chemistry.

**Required Courses**

</tbody>
</table>

**Total Credits** 27.5

* May substitute CHEC 352 Physical Chemistry and Applications II (4 credits) or CHEC 353 Physical Chemistry and Applications III (4 credits) for the CHEM 253 Thermodynamics and Kinetics requirement.

** The 9.5 credits of chemistry electives must include at least one additional laboratory course. These electives are selected from any of the regularly offered chemistry department lecture or laboratory courses 200-level and above according to your specific interests. Note that existing course pre-requisites may affect which courses may be selected. The variable credit courses CHEM 493 Senior Research Project or CHEM 497 Research (Undergraduate) may also be used to fulfill either the lecture or laboratory requirements for the minor.

**Additional Information**

For more information about the minor in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair
Department of Chemistry
Drexel University
dk68@drexel.edu

**Facilities**

There are nine undergraduate teaching laboratories in the department: three freshman Chemistry labs, three Organic Chemistry labs, a Physical Chemistry lab, an Analytical Instrumentation Laboratory and a combined Analytical/Inorganic Chemistry lab.

**Mass Spectrometry Laboratory**

The department maintains a professionally staffed mass spectrometry facility available to all members of the university community. Currently available instrumentation consists of a Waters Autospec M high resolution magnetic-sector mass spectrometer, a Bruker Autoflex III MALDI Time-of-Flight Mass Spectrometer, a Thermo LTQ-FT Fourier Transform Mass Spectrometer, a Sciex API-3000 triple-quadrupole mass spectrometer, and a Varian Saturn 2000 Gas Chromatograph/Ion-trap mass spectrometer system.

**Nuclear Magnetic Resonance Laboratory**

The professionally staffed Chemistry Department NMR facility is equipped with 300MHz and 500MHz Varian Unity INNOVA NMR systems; both instruments have multi-nuclear capability. The probe on the 500MHz instrument is a cryogenically cooled triple resonance model (1H (13C/15N)) suitable for protein analysis. A Varian X-band 12" EPR spectrometer is also available.

**Analytical Instrumentation Laboratory**

The open-access departmental Analytical Instrumentation Laboratory includes two Perkin-Elmer (PE) Spectrum One Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Lambda-35 UV/visible spectrometer, a PE Lambda-950 UV/visible/NIR spectrometer with a 60-mm-diameter diffuse reflectance integrating sphere, a PE model 343 polarimeter, a PE LS55B luminescence spectrometer, a PE Clarus 500 capillary-column GC with dual FID detectors, a Clarus 500 capillary-column GC/MS system (with electron impact capability), a PE Series 200 Quaternary HPLC development system with UV/visible photodiode array detector, a PE Series 200 binary HPLC system interfaced to a Sciex 2000 triple-quadrupole mass spectrometer, a PE Series 2000 binary Gel Permeation Chromatography system with refractive index detector, and a Varian AA240FS flame atomic absorption spectrometer equipped with a GTA 120 Graphite Furnace Acessory.

**Organic Instrumentation Laboratory**

The Organic Instrumentation Laboratory (co-located with the organic synthesis teaching laboratories in the Papdakis Integrated Sciences Building) is equipped with two Perkin-Elmer (PE) Spectrum Two Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Clarus 500 capillary-column GC with one FID and one TCD detector, and an Anasazi EFT-90 FT-NMR system.

**Other Departmental Facilities**

The department has a VEECO INNOVA N3 Multimode Scanning Probe Microscope and also maintains a computational chemistry laboratory equipped with nine Dell Optiplex 790 computers running Hyperchem v 8.0. Research laboratories for each of the department faculty members are located in Disque and Stratton Halls. Instrumentation available in the research laboratories is described on individual faculty web pages. Full-time professional support includes an electronic instrument specialist (for NMR and MS- Chemistry Department), a glassblower (Chemistry Department), two electronics specialists (College of Arts & Sciences Electronics Shop), and four machinists (Drexel University Machine Shop).

**Chemistry Faculty**

Anthony W. Addison, PhD (University of Kent at Canterbury, England). Professor. Design and synthesis of novel biomimetic and oligonuclear chelates of copper, nickel, iron, ruthenium and vanadium; their interpretation by magnetochemical, electrochemical and spectroscopic methods, including electron spin resonance; CD and ESR spectroscopy and kinetics for elucidation of molecular architecture of derivatives (including NO) of oxygen-binding and electron-transfer heme- and non-heme iron metalloproteins of vertebrate and invertebrate origins; energy-transfer by Ru, Ir and lanthanide-containing molecules and assemblies.

Jason Cross, PhD (University of Surrey (UK)). Assistant Teaching Professor. Luminescent lanthanide complexes

Peter DeCarlo, PhD (University of Colorado). Assistant Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Aaron Fafarman, PhD (Stanford University). Assistant Professor. Photovoltaic energy conversion; solution-based synthesis of semiconductor thin films; colloidal nanocrystals; electromodulation and photomodulation spectroscopy.
peptide self-aggregation; structure and function of heme proteins; investigating protein-membrane interactions; use of IR, VCD, Raman, NMR and absorption spectroscopy for structure analysis.

Karl Sohlberg, PhD (University of Delaware). Associate Professor. <em>Chemistry</em>. Computational and theoretical materials-related chemistry: (1) complex catalytic materials; (2) mechanical and electrical molecular devices.

Peter A. Wade, PhD (Purdue University). Associate Professor. Exploration of a newly discovered [3,3]-sigmatropic rearrangement in which O-allyl nitronic esters are thermally converted to #,#-unsaturated nitro compounds; development and exploitation of a carbon-based hemiacetal mimic; and exploration of cycloaddition reactions involving nitroethylene derivatives and novel nitrile oxides.

Anthony Wambgsans, PhD (Rice University). Associate Teaching Professor.

Jun Xi, PhD (Cornell University). Associate Teaching Professor. Biomacromolecular interactions both in solution and in confined environment; mechanisms of DNA replication and DNA repair; structure and function of molecular chaperones; drug target identification and new therapeutic development; single molecule enzymology; DNA directed organic synthesis.

Emeritus Faculty

Amar Nath, PhD (Moscow State University, Moscow USSR). Professor Emeritus.

Communication

Major: Communication

Degree Awarded: Bachelor of Science (BS) or Bachelor of Arts (BA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 09.0401; 09.0900; 09.0908; 09.9999: 23.1303

Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 27-3022; 27-3041; 27-3042; 27-3043

About the Program

The Communication department offers a major in communication, with concentrations in public relations, journalism, technical and science communication, and an open, flexible track.

The department is committed to helping students become broadly educated and professionally competent individuals. Students are exposed to a variety of media and are guided in the development of their interpretive and expressive skills.

All communication majors take a common core of courses that emphasize communication theory and methods. They then specialize in one of three concentrations. Students in the public relations concentration pursue careers in public relations, event planning, media relations, and corporate communication. Those who choose the technical and science communication concentration go on to work in technical writing, science writing, publishing, and software and hardware documentation. Journalism students pursue careers in journalism and news. Many communication
graduates also go on to law school, to business school for an MBA, or to graduate school.

Students who elect the public relations concentration have the option of pursuing either a bachelor of arts degree or a bachelor of science degree. Students who elect the technical and science communication concentration must pursue the bachelor of science degree. Students in journalism must complete the requirements for the bachelor of arts degree. Students in the open track complete the requirements for the bachelor of arts degree.

Degree Requirements: Journalism (BA)

Journalism provides students with the skills and theoretical perspective they need to be a journalist in today’s swiftly changing media environment. An extension of the program’s core curriculum, the concentration hones the student’s ability to write, edit, and produce audiovisual content while at the same time exposing the student to new and evolving aspects of the field.

**Total Credits** 180.0
Skills in this field include written, oral, and visual communication. A public relations specialist might be called on to write articles for an in-house newsletter, to research and write an annual report to shareholders, to publicize a special event, to write a speech for an executive, to plan a press conference, to develop a media plan for an organization, or to script a video for an employee orientation session.

**Degree Requirements: Public Relations (BS)**  
The concentration public relations covers a broad range of activities that help an organization and its publics communicate with one another. The field includes public relations, media relations, event planning, publication design, employee and customer communication, and government relations.  

Skills in this field include written, oral, and visual communication. A public relations specialist might be called on to write articles for an in-house newsletter, to research and write an annual report to shareholders, to publicize a special event, to write a speech for an executive, to plan a press conference, to develop a media plan for an organization, or to script a video for an employee orientation session.  

**General Requirements**  
CIVC 101 Introduction to Civic Engagement 1.0  
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0  
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0  
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0  
PSY 101 General Psychology I 3.0  
UNIV H101 The Drexel Experience 1.0  
UNIV H201 Looking Forward: Academics and Careers 1.0  
Humanities and fine arts 12.0  
Social science 9.0  
International studies 6.0  
Studies in diversity 6.0

### Co-op/Career Opportunities

#### Public Relations

Graduates with a concentration in public relations find employment in a wide variety of fields, including public relations, advertising, special events planning, writing and editing, and public information. In addition, the strong communication and management skills stressed by this concentration enable the graduates to find administrative positions in various business areas with an indirect relationship to public relations such as marketing, sales, human resources consulting, or publishing.

Although graduate study is not necessary for those who pursue careers in public relations, students have used the major as a basis for graduate work in a variety of areas, including communication, business, and law.

#### Co-op Experiences in Public Relations

Cooperative education opportunities are available with a variety of corporations and nonprofits in such positions as corporate communication specialist, public relations assistant, and newsletter writer. The following are samples of past co-op experiences:

- Advertising and Promotions Assistant, CoreStates Bicycle Championships, Philadelphia.
- Advertising/ Promotions Co-op, U.S. Marketing Division, Mobil Oil Corp., Fairfax, VA.
- Assistant Coordinator, Communications Bureau, United Way of Southeastern Pennsylvania, Philadelphia.

#### Journalism

Journalism students pursue careers in journalism, creative writing, and news. Given the rapidly changing nature of these fields, graduates may also find work in new types of publishing platforms, such as social media or mobile, or involving audiovisual content creation. Journalism graduates...
may also choose to pursue graduate study, whether in journalism or another discipline.

Co-op Experiences in Journalism
Journalism students have held co-ops with a number of media, news, and information companies, including the following:

• Production assistant, WPVI-TV (Channel 6) Philadelphia
• Staff writer, Delaware County Times
• Promotions department, WPLY-FM (Y-100)
• Production assistant, sports department, FOX-29 (WTFX-TV)

Technical and Science Communication
Students who study technical and science communication are prepared for a variety of career options. Many students become technical writers and editors who produce manuals and reports about high-technology products and services. Students may also go on to write specifications and in-house organs for business, industry, and government. Other students conduct and interpret surveys for business. In addition, this program is excellent preparation for graduate study in a number of fields, such as law and medicine.

Co-op Experiences in Technical and Science Communication
Communication students have worked for corporations and nonprofit organizations. The following are some samples of past co-op experiences:

• Technical writer, Unisys Corp. and Hewlett Packard
• Web page writer, Hospital of the University of Pennsylvania
• Pharmaceutical writer, GlaxoSmithKline
• Medical writer, Medcases Corp.

Open Communication Track
Students in the Open track will develop a focus that fits their interests in the field of Communication and will thus be ready for a variety of career options, which can include any of the directions open to students in the other concentrations in communication. In addition, this program is excellent preparation for graduate study in a number of fields, such as law and medicine.

Co-op Experiences in the Open Communication track
Students in this track can choose from the variety of co-op opportunities open to any student in Communication.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Communication
The minor in communication is a 24.0 credit curriculum designed to familiarize students with communication theory while providing training in print and digital communication. The minor can provide a strong complement for majors that emphasize presentations, interpersonal skills, publicity, and marketing. Students minoring in communication can focus on public relations, journalism, technical and science communication, environmental communication, or nonprofit communication.

Finally, students complete three additional electives from the area that fits their interest.

Please note: No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

Communication Faculty
Ronald Bishop, III, PhD (Temple University). Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Karen Cristiano, MS (Temple University) Assistant Department Head of Communication. Associate Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Instructor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD (Carnegie Mellon University) Interim Department Head of Communication; Associate Dean for Undergraduate Education, College of Arts and Sciences. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD (Temple University). Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, and semiotics.

Barbara Hoekje, PhD (University of Pennsylvania) Director, English Language Center. Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).
Frank Kelley, PhD (Temple University). Associate Teaching Professor. Corporate university systems online, power structure of media enterprises, public relations, event planning.

Julia May, PhD (Drexel University). Assistant Teaching Professor. Political communication; international politics and its news coverage; public opinion; transatlantic relations; war, torture and human rights; debate in the public sphere.

Jordan McClain, PhD (Temple University). Assistant Teaching Professor. Media framing and music journalism; relationship between television and music; American popular culture; celebrity, consumerism, and consumer behavior; branding, brand positioning, and advertising criticism.

Alexander Nikolaev, PhD (Florida State University) Interim Director, Communication Undergraduate Programs. Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rosemary Rys, MA. Instructor. Public relations and marketing.

Lawrence Souder, PhD (Temple University). Associate Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.

Allan Stegeman, MA (University of Houston). Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD (University of Wisconsin) Graduate Director. Associate Teaching Professor. Science, environmental, and health communication

Asta Zelenkaukaitse, PhD (Indiana University). Assistant Professor. Social media; user-generated content; computer-mediated communication; interactivity; active audience analysis; mobile communication; gender and online identity; prosumer culture; internet of things; quantitative/qualitative research.

### Criminology and Justice Studies

#### About the Program

In what ways did the War on Drugs of the 1980s and 1990s impact urban communities in terms of street-corner dealing, violence, and overall health? What about national incarceration rates, and racial disparities in the adjudication process? How do so-called Three Strikes laws typically influence the decisions of judges at sentencing? How far will the War on Terrorism push the legal boundaries of government surveillance and the monitoring of electronic communications, and what will be the impacts of such forces? Finally, how are “big data” being used (now and in the future) by justice, intelligence, or private organizations to identify social networks, conduct risk assessments, and make decisions about crime policy and resource deployment?

Drexel University's Program of Criminology and Justice Studies offers a rich educational experience that emphasizes justice and criminological theory, and translating concepts into practice. With its three thematic concentrations -- one in Criminology and Justice Policy, one in Justice Informatics, and one in Criminal Justice -- the Program in Criminology and Justice Studies provides all students with foundational knowledge and tools of the discipline, while allowing them to specialize in different areas of interest within the discipline.

Please click the links below to explore the degree concentrations in Criminology and Justice Studies.

#### Degree Concentrations

- Justice Informatics (p. 77)
- Criminal Justice

#### Minor in Criminal Justice

Students from any major who are interested in the law, legal issues and the forensic sciences may envision a future connection with the criminal justice system. These students could enhance their career possibilities by adding a minor in criminal justice to their major field of study.

The minor consists of four required courses and four criminal justice electives chosen from two categories, for a total of 24.0 credits. Students minoring in criminal justice are assumed to have already taken SOC 101 Introduction to Sociology.

Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Criminal Justice Concentration

The Criminal Justice concentration is housed in the Program of Criminology and Justice Studies and serves as the “generalist” concentration for the program. Specifically, the Criminal Justice concentration focuses its curriculum primarily on the substance of criminal justice institutions and crime and does not require many of the analytics and computer-based courses that the other two concentrations require. This concentration is primarily intended for students seeking a traditional criminal justice education. Because the Criminal Justice concentration reserves 41.0 credits of free electives, it is the most flexible of the three concentrations, allowing students, for example, to relatively easily double major, or to take on a minor while still reserving enough free credit for other courses of interest outside the program.

Despite that the CJ concentration is the least analytically demanding of the three concentrations, it still offers the community-based learning and global perspective of the other two concentrations. Students in all three concentrations are encouraged to participate in at least one faculty-led study abroad program during which students will explore various justice related themes. Recent trips have been The Legacy of Nazi Policing and Cold War Justice in Munich and Prague and The Roots of Common Law Justice in London. Please see the Study Abroad Program (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) web page to view the location and itinerary of the 2016 study tour. The emphasis on comparative justice and study abroad reside at the leading edges of Drexel’s core value of global citizenship.

### Criminal Justice Concentration

#### Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. When they return for the start of their senior year, they can immediately begin their...
(impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney’s Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have done co-ops and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, the US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Criminology and Justice Policy concentration

About the Program

The Criminology & Justice Policy concentration grounds students in criminological theory and crime policy, as well as justice analytics, to help them identify, describe, and respond to current and emerging crime and security problems. A key goal of any rational crime policy is to maximize its benefits — e.g., reducing crime — while limiting its social costs, such as mass-incarceration, racial disparities, and violent backlashes. Through that lens, C&JP students will work with crime and police calls for service data, geo-tagged social media transmissions, and other sources of information to identify and explain crime trends, “hotspots,” and “coldspots” across given geographies; and they will put their theory to use as they learn to generate and test research hypotheses related to crime and justice policy outcomes. Moreover, through community-based learning (a core value of the program), C&JP offers students the unique opportunity to experience criminology and justice education from the perspectives of those most affected by the criminal justice system: One required course is taught in an active jail; another is taught in a local community service organization.

Finally, recognizing the global nature of crime and justice issues, C&JP requires one course on international justice systems, two globally-themed courses outside the program; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: The Legacy of Nazi Policing and Cold War Justice in Munich and Prague; The Roots of Common Law Justice in London. Please see the Study Abroad Program (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) web page to view the location and itinerary of the 2016 study tour.). The emphasis on comparative justice and study abroad resides at the leading edge of Drexel’s core value of global citizenship.

The Criminology & Justice Policy thematic concentration reserves 31.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Visit Drexel’s Modern Languages Program (http://www.drexel.edu/coas/academics/departments-centers/global-studies-modern-languages/degrees-programs/modern-languages) web page for a list of language minors.

Total Credits: 24.0

Minor in Criminal Justice

Students from any major who are interested in the law, legal issues and the forensic sciences may envision a future connection with the criminal justice system. These students could enhance their career possibilities by adding a minor in criminal justice to their major field of study.

The minor consists of four required courses and four criminal justice electives chosen from two categories, for a total of 24.0 credits. Students minoring in criminal justice are assumed to have already taken SOC 101 Introduction to Sociology.

Required Courses
- CJS 101 Introduction to Criminal Justice 3.0
- CJS 200 Criminology 3.0

Criminology and Justice Policy concentration

Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. When they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney’s Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia
and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have done co-ops and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, The US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Criminology and Justice Studies Faculty

Robert D'Ovidio, PhD (Temple University) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.

Ashley Dickinson, PhD (Indiana University of Pennsylvania). Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Julia Hall, PhD (University of Pennsylvania). Professor. Criminal justice and juvenile justice reform, including community based alternatives to incarceration, correctional education and programming, reentry and reintegration, restorative justice, and issues relating to special needs offenders, including the eld

Jordan Hyatt, PhD, JD (University of Pennsylvania, Villanova University School of Law). Assistant Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Lallen Johnson, PhD (Temple University). Assistant Professor. Drugs and violence; race, crime and justice; ecology of crime; geographic information systems.

Robert J. Kane, PhD (Temple University) Director, Criminology and Justice Studies Program. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Cyndi Rickards, EdD (Drexel University) Senior Assistant Dean for Community Engagement. Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

Criminology and Justice Studies

Major: Criminology and Justice Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Justice Informatics Concentration

Program Description
With its thematic concentration in Justice Informatics (JI), Drexel University has transformed the traditional criminal justice degree program to produce graduates who possess knowledge and skills that are highly valued by criminal justice agencies in the 21st century. Namely, the program draws from criminology and criminal justice and computing and informatics to produce globally aware and technology proficient graduates who bring an analytical and information-led approach to solving the problems crime creates for society.

Each exposure to the criminal justice system represents a data collection point, which becomes part of a massive and disparate array of data held by the government. Students will learn how to collect, manage, visualize, and analyze large sources of information so that they can bring their expertise into the crime and justice occupational arena and/or graduate school. In addition to learning to work with “big” data in the public justice arena, students will learn how to identify, collect, manage, and use data from the expansive -- and rapidly growing -- private system of justice and security to creative innovative solutions for identifying, solving, and preventing crime.

Graduates of Drexel’s Justice Informatics concentration will be ideally suited to meet the demands of the growing job market for crime analysts among criminal justice, defense, and intelligence agencies and in the private-sector security community. Crime analysts have become an essential part of the modern criminal justice agency. They have become vital to, for example, the large police department looking to deploy resources in a manner that matches crime trends, the intelligence agency working to prevent terrorist events, and the financial services firm hoping to identify the fraudulent use of a credit card. JI graduates can also play an integral role on teams that build future information technology solutions for intelligence, defense, and criminal justice agencies from the public and private sectors.

Given the global nature of crime and justice issues, JI requires one course on international justice systems; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: The Legacy of Nazi Policing and Cold War Justice in Munich and Prague; The Roots of Common Law Justice in London. Please click HERE (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) to view the location and itinerary of the 2016 study tour). The emphasis on comparative justice and study abroad reside at the leading edge of Drexel’s core value of global citizenship.

The Justice Informatics thematic concentration reserves 27.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Click HERE (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages) to visit Drexel’s Modern Languages Program for a list of language minors.

Additional Information

Classification of Instructional Programs (CIP) code: 23.9999

Standard Occupational Classification (SOC) code: 25-1123

About the Program

Specifically designed to engage students in critical thinking and applied writing skills, the English major offers a wide-ranging curriculum on British, American and World literatures and stresses the cultural, historical and political contexts that shape and affect literary production. The Department of English and Philosophy (http://www.drexel.edu/coas/academics/departments-centers/english-philosophy) also offers variety of courses on periods and genres; creative writing; and the relationship between literature and the visual arts, science and technology.

Students develop solid techniques in critical inquiry as well as in writing, literary, and reading skills. Implicit in our undertaking is the leadership role of our department in the formulation and discussion of such broad theoretical and practical questions as the following: the connection between oral and written communication skills; analytical, ethical, and critical thinking; questions of value and morality; the relevance and relation of the past to the present; the relations between and among cultures; the role of literary and philosophical texts in our attempts to explain human motives and behavior; and the relations between the sexes.

Co-op/Career Opportunities

English majors pursue many professional fields in addition to teaching and creative writing. Many go on to law school, politics and government, or business careers. The critical thinking, analytical and writing skills provided by our program are essential for high-level decision-making and problem solving in any professional situation.

Co-op employment is an option for English majors who can explore co-op or internship opportunities at Philadelphia museums, city government and visitors' bureaus, television and radio stations, law firms, and nonprofit organizations.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and postgraduate opportunities.

Minor in English

The English minor provides students from other majors with a more intensive background in literature. Coursework in the minor exposes students to literature from a variety of periods, cultures and genres and also provides practice in critical thinking, literary analysis and writing. These courses enrich students' intellectual lives and provide them with skills that are valuable in a variety of professional situations.
Where a course required for the minor is already required for a student’s major, the student is directed to choose another English elective. Other substitutions are permissible at the discretion of the Program Director.

Requirements

Select a minimum of 9 credits of the following: 9.0
ENGL 200 [WI] Classical to Medieval Literature
ENGL 201 Renaissance to the Enlightenment
ENGL 202 [WI] Romanticism to Modernism
ENGL 203 [WI] Post-Colonial Literature I
ENGL 204 Post-Colonial Literature II
ENGL 205 [WI] American Literature I
ENGL 206 [WI] American Literature II
ENGL 207 [WI] African American Literature
ENGL 211 [WI] British Literature I
ENGL 212 British Literature II
ENGL 214 Readings in Fiction
ENGL 215 [WI] Readings in Poetry
ENGL 216 [WI] Readings in Drama

Select a minimum of 6 credits of the following: 6.0
WRIT 220 [WI] Creative Nonfiction Writing
WRIT 225 [WI] Creative Writing
WRIT 301 [WI] Writing Poetry
WRIT 302 [WI] Writing Fiction
WRIT 303 Writing Humor and Comedy
WRIT 304 [WI] Special Topics in Writing
WRIT 306 Writing About the Media
WRIT 310 Literary Editing & Publication
WRIT 312 [WI] The Practice of Professional Writing
WRIT 400 [WI] Writing in Cyberspace
WRIT 405 Internship in Literary Publishing

Select a minimum of 9 credits of the following: 9.0
ENGL 300 [WI] Literature & Science
ENGL 302 Environmental Literature
ENGL 303 Science Fiction
ENGL 305 [WI] The Mystery Story
ENGL 306 Literature of Baseball
ENGL 307 Literature of the Holocausts
ENGL 310 [WI] Period Studies
ENGL 315 [WI] Shakespeare
ENGL 320 [WI] Major Authors
ENGL 325 Topics in World Literature
ENGL 330 The Bible as Literature
ENGL 335 Mythology
ENGL 345 American Ethnic Literature
ENGL 350 Jewish Literature and Civilization
ENGL 355 [WI] Women and Literature
ENGL 360 [WI] Literature and Society
ENGL 365 Topics in African American Literature
ENGL 370 Topics in Literature and Medicine
ENGL 380 Literary Theory

Total Credits 24.0

Accelerated/Dual Degree

About the Program

In keeping with Drexel University’s commitment to experiential learning, the accelerated degree program of a BA in English and an MA in Publishing offers students the opportunity to graduate in five years with two separate six-month co-op experiences and a Masters degree, which also includes many opportunities for hands-on experience.

Drexel’s unique quarter system allows English majors with considerable flexibility within their course of study. Students can focus on writing, literary criticism, or comparative literature, for example, while also enhancing the breadth and depth of their education with courses taught in other departments and programs across the University. Drexel Publishing Group (DPG) is a unique part of the English department. DPG is solely responsible for three publications, each one unique and vital: Painted Bride Quarterly, one of the nation’s oldest literary magazines; 5027mac.org, a news and culture blog written by our students; and The 33rd, the only university-based text in the United States that includes interdisciplinary, multi-genre pieces written by students at all levels and faculty as well. DPG and its activities are the overlapping element between our undergraduate and graduate programs, with student at all levels working together to make each element more successful.

Drexel’s Masters of Arts in Publishing is interdisciplinary, offering courses in law, marketing, and graphic design. Instructors come from all areas of publishing: from newspapers to small presses, from online venues to academic presses. Classes often feature guest speakers who are also currently working in the industry, such as small press founders, trade magazine editors, agents, and more. Course instructors and guest speakers inform students and broaden perspectives on career opportunities in the publishing industry.

Admission Requirements

Students must apply when their undergrad status is at a minimum of 90.0 credits and a maximum of 120.0 credits.

Students apply through Graduate Admissions and must follow Drexel University admission application guidelines.

Degree Requirements

Undergraduate Requirements:

University Requirements:
CIVC 101 Introduction to Civic Engagement 1.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
UNIV H101 The Drexel Experience 1.0
UNIV H201 Looking Forward: Academics and Careers 1.0

Two Mathematics Courses 6.0
Two Science Courses 6.0
Two Foreign Language Courses 8.0

Any two (2) consecutive foreign language courses (completing level 201)

---

**English Faculty**

Jan Armon, PhD *(University of Michigan)*. Associate Teaching Professor. Academic functions of personal writing, composition.

Valerie Arms, PhD *(Temple University)*. Professor. Rhetoric and Composition

Kenneth Bingham, MA *(Temple University)*. Teaching Professor. First-year writing; engineering ethics; literature of baseball.

Valerie Booth, PhD *(Emory University)*. Associate Teaching Professor.

Raymond Brebach, PhD *(University of Illinois)*. Associate Professor. Modern British fiction; the novel; textual studies.

André Carrington, PhD *(New York University)*. Assistant Professor. Cultural politics of race, gender and genre; feminism criticism; critical race theory.

Albert DiBartolomeo, MA *(Temple University)*. Teaching Professor. Co-Director, Drexel Publishing Group; Creative writing; first-year writing; non-fiction.

Dan Driscoll, MA *(Temple University)*. Associate Teaching Professor. Associate Director, University Writing Center; Curricular Initiatives. Co-Director, Minor in Writing. First-year writing.

Anne Erickson, PhD *(Purdue University)*. Assistant Teaching Professor. Online educational applications; the short story cycle.

Nomi Eve, MFA *(Brown University)*. Assistant Teaching Professor.

Lisa Farley, Med *(Temple University)*. Associate Teaching Professor. English as a Second Language (ESL).

Robert Finegan, MFA *(University of Pittsburgh)*. Associate Teaching Professor. First-year writing; technical and creative writing.

Alexis Finger, MS *(Queens College, CUNY)*. Associate Teaching Professor. Speech; ESL; oral communication.

Valerie Fox, PhD *(SUNY at Binghamton)*. Teaching Professor. Founding Editor, *Press 1*. Twentieth century drama; modern and contemporary American poetry; first-year writing.

Edward Fristrom, PhD *(State University of New York-Albany)*. Associate Teaching Professor. Professional writing, creative writing, multimedia, and writing education.

Keunah Han, PhD *(Temple University)*. Assistant Teaching Professor. English as a Second Language (ESL)

Cassandra Hirsch, MFA *(Rosemont College)*. Assistant Teaching Professor. Fiction.

Gabriella Ibieto, PhD *(City University of New York)*. Associate Professor. Comparative literature; Cuban and Latin American fiction.

Henry Israeli, MFA *(University of Iowa)* Associate Director, Certificate in Writing and Publishing. Associate Teaching Professor. Founder and editor of *Saturnalia Books*, a publisher of contemporary poetry.

Miriam Kotzin, PhD *(New York University)*. Professor. Founding Editor, *Per Contra*. American literature; genre studies; creative writing; communications.

Stephen Mandell, PhD *(Temple University)*. Professor. First-year writing; technical writing; speech; American literature.

Deirdre McMahon, PhD *(University of Iowa)*. Associate Teaching Professor. 19th-century British literature and culture: empire, critical race studies and analyses of material culture.
Maria Volynsky, EdD (Temple University) Associate Director, First-Year Writing Program; ESL Coordinator. Assistant Teaching Professor. English as a Second Language (ESL).

Scott Wernick, PhD (Temple University) Director, Drexel Writing Center; Director, University Writing Program. Associate Professor. Rhetoric and composition; medical writing; information technology and literacy.

Robert A. Watts, MA (Temple University). Associate Teaching Professor. Creative writing; first-year writing.

Rachel Wernick, MFA (Columbia University) Associate Director, University Writing Program: Strategic Initiatives; Co-Director, Minor in Writing. Associate Teaching Professor. First-year writing.

Vincent Williams, PhD (Temple University). Assistant Teaching Professor. First-year writing; the intersection of race, gender, class and urbanism.

Jennifer Yusin, PhD (Emory University). Associate Professor. Postcolonial literature; trauma theory; literary theory; psychoanalysis, and memory studies in contemporary literature in English.

Emeritus Faculty

Richard Astro, PhD (University of Washington) Distinguished Professor. Provost Emeritus. Twentieth-century American literature; literature and sports.

Environmental Science

Major: Environmental Science

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 182.5 - 186.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 03.0104

Standard Occupational Classification (SOC) code: 19-2041

About the Program

The environmental science program at Drexel University is committed to educating undergraduates for technical careers and graduate study in the diverse areas of environmental science vital to restoration of a clean and healthy environment in the 21st century. The affiliation between the Academy of Natural Science (http://www.anisp.org) and Drexel University offers the opportunity to take a national leadership role in environmental science and environmental policy, and grow the scope, capacity and reputation of the natural sciences at the University. The philosophy of the Biodiversity, Earth, and Environmental Science Department is “Experiential Learning Early and Often.”

Environmental science is a multidisciplinary field designed to examine environmental problems and find solutions. This field requires understanding of a number of disciplines, including biology, physics and chemistry. Solving some of our environmental problems also requires knowledge of environmental policy, ethics, and scientific data analysis.

The program has an integrated curricular approach designed around student laboratory investigations. The goal of this program is to give students not only knowledge about biology, chemistry, and ecology but also the ability to use the tools and skills of a scientist. The program includes extensive use of computers in the laboratory, and students make frequent oral and written presentations based on their laboratory projects.
Field experience electives may include trips to local aquatic and terrestrial habitats such as streams, lakes, the John Heinz National Wildlife Refuge, New Jersey Pine Barrens, Delaware, Barnegat and Chesapeake Bays, and Appalachian Mountains. Students are also encouraged to take advantage of study abroad (http://www.drexel.edu/studyabroad) options. These programs often require early planning so it is advisable for interested students to speak to their advisor about opportunities in their first year.

Concentrations are available in:

- Biodiversity and Evolution
- Earth Science
- Ecology & Conservation
- Environmental Science

**Additional Information**

For more information about the program, visit the Department of Biodiversity, Earth & Environmental Science's (http://www.drexel.edu/coas/academics/departments-centers/bees) webpage.

Susan Cole
Undergraduate Advisor
Environmental Science
coles@drexel.edu or email bees@drexel.edu.

**Degree Requirements**

The program is designed to prepare students for careers in environmental science, environmental assessment, marine science, applied ecology, biodiversity and conservation and paleontology. The requirements for specific concentrations in biodiversity and evolution; earth science; ecology & conservation; and environmental science follow the list of degree requirements.

**Degree Requirements**

**Humanities and Social Science**

Notes about Environmental Science Opportunities:

- Field experience electives include quantitative environmental measurements in local aquatic and terrestrial habitats, such as streams, lakes, the Delaware Bay, the Poconos, and the New Jersey Pine Barrens (for example, Field Botany: NJ Pine Barrens; Ecology of the Pine Barrens; Marine Field Methods).
- Students are required to consult frequently with their academic advisors for curriculum planning. Many of the graduate courses in environmental science are also open to qualified seniors who wish to become familiar with some of the applications in the field. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.
- The Equatorial Guinea: Bioko Island Study Abroad Program offers a unique opportunity for undergraduates and recent graduates to study tropical biodiversity and its conservation, with an emphasis on field work that takes advantage of Bioko Island’s pristine rainforests ranging from sea level to over 10,000 feet in altitude, its seven species of rare monkeys and its four species of nesting sea turtles. For more information, please visit the Drexel Study Abroad Office (http://www.drexel.edu/studyabroad).

Co-op/Career Opportunities

Environmental scientists pursue careers in environmental assessment, environmental health, ecology, conservation, marine science, and atmospheric science.

Co-op Opportunities

Co-op and research opportunities will be available with the scientists at the Academy of Natural Sciences (http://www.ansp.org). In addition, recent co-op experiences have included:

CHPlanning, Center City Philadelphia
Lakes Environmental Assn., Maine
US Environmental Protection Agency, Center City Philadelphia
Criterion Lab Inc, Philadelphia PA Suburbs
Philadelphia Water Department, Philadelphia
Temple University, Philadelphia
Fairway Testing Co., NYC
University of Alaska, Fairbanks, Alaska
Bioko Biodiversity Protection Program, Equatorial Guinea
React Environmental Professional Services Group Inc., Philadelphia
Air Management Services, Philadelphia
Exelon Corporation, Philadelphia

Graduate Opportunities

Graduates in this major typically work for government environmental agencies, in environmental consulting firms, and in environmental departments of various industries. Additional training at the graduate level is an option for many students.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Environmental Science Faculty

Walter F. Bien, PhD (Drexel University) Director, Laboratory of Pinelands Research. Research Professor. Natural resource management, restoration ecology, conservation biology, and New Jersey Pinelands community dynamics.

Elizabeth Burke Watson, PhD (University of California, Berkeley). Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Donald F. Charles, PhD (Indiana University) Senior Scientist and Section Leader, Phycology Section, Academy of Natural Sciences. Professor. Diatoms as water quality indicators; paleolimnological approaches for inferring change in biology and chemistry of lakes; lake management; assessment of perturbations in aquatic ecosystems due to municipal and industrial effluents, land-use change, acid deposition, eutrophication and climate change.

Carol Collier, FAICP, MRP (University of Pennsylvania) Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library; Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Daniel P. Duran, PhD (Vanderbilt University). Assistant Teaching Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect systems to better understand fundamental evolutionary processes and maintain biodiversity.

Jon Gelhaus, PhD (University of Kansas) Curator, Department of Entomology; Academy of Natural Sciences. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Richard J. Horwitz, PhD (University of Chicago) Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012; Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecologival modeling.

Sean O’Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions;
neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pillsby Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Ron Smith, MS (Rutgers University). Instructor. Shorebird Ecology and Conservation; Amphibians of the NJ Pine Barrens; Restoration Ecology; Climate Change – Regional Effects and Education

James R. Spotila, PhD (University of Arkansas) L. D. Betz Chair Professor. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluysen, PhD (University of Hawaii). Assistant Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD (Old Dominion University) Department Head, Biodiversity, Earth and Environmental Science. Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

John G. Lundberg, PhD (University of Michigan). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Environmental Studies

Major: Environmental Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Classification of Instructional Programs (CIP) code: 03.0313
Standard Occupational Classification (SOC) code: 19-2041

About the Program

Note: Effective Fall 2014, students are no longer being accepted into this program. Please see the BA in Environmental Studies and Sustainability (p. 93).

The major in environmental studies is a multi-disciplinary program designed to provide students with both a technical grounding in environmental science as well as a strong emphasis in social science in order to prepare students for environmental policy careers

The causes and consequences of environmental problems are extremely complex, involving the connection of natural ecological systems to human systems such as physical infrastructure and the built environment. Equally important to understanding environmental problems are the social, economic and political considerations that govern society’s ability to balance its current needs and desires with those of future generations. Indeed, ecological problems and their consequences are an enduring problem of society. Problems such as air and water pollution, exposure to toxic chemicals, sprawling land development, environmentally damaging energy extraction and unsustainable energy use practices, to name a few, all conspire to negatively influence our natural world as well as human health and well being.

The environmental studies major draws on the University’s academic strengths in science, technology, social science and communication. Courses and faculty are drawn from a diverse set of academic programs: including the natural sciences, social sciences and the humanities. The program also benefits from Drexel’s urban location -- as issues related to urban sustainability policy and planning, including urban redevelopment and land reuse practices, transportation policy, green building, energy efficiency, urban farming and food systems, recycling, and racial and class-based environmental justice and health -- are core topics of the program of study.

The degree is designed to prepare students for a wide set of vocational opportunities with governmental agencies, corporations, and nonprofit organizations that develop, implement and communicate environmental policies. Students are strongly encouraged to gain valuable professional experience through Drexel’s cooperative education program.

For more information visit the Department of Biodiversity, Earth & Environmental Science (http://www.drexel.edu/coas/academics/departments-centers/bees) web page.

Sample Plan of Study
Minor in Environmental Studies

The environmental studies minor is an interdisciplinary minor designed to give students specializing in other fields a background in contemporary environmental issues and the ability to analyze such issues. For students majoring in such fields as business and engineering, the minor in environmental studies will provide them with the tools to make better decisions about products or projects related to environmental economics, political pollutants, environmental policy, and environmental justice. For students who are liberal arts majors, the minor in environmental studies offers the opportunity to focus on the social- and natural-science aspects of the environment, and to be prepared for issues they may encounter in their careers.

Total Credits: 24.0

Other courses may be taken as electives with Departmental approval.

Environmental Studies and Sustainability

Major: Environmental Studies and Sustainability

Degree Awarded: Bachelor of Arts (BA)

Calendar Type: Quarter

Total Credit Hours: 184.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 03.0313

Standard Occupational Classification (SOC) code: 19-2041

The BA in Environmental Studies and Sustainability is administered in the Department of Biodiversity, Earth and Environmental Science. It is a multidisciplinary degree that takes advantage of existing courses in both the Arts and Sciences to educate graduates who will be able to work in government agencies, corporations and nonprofit organizations who develop, implement or are affected by environmental policies.

Objective

The objective of this major is to educate students so that they will be successful in finding common solutions to environmental challenges that all societies will face in the 21st century. Graduates will be educated with the goal of thinking in terms of cross-cultural ideas and dialogue. In that way they will be encouraged to help people of all cultures understand environmental problems and act in the area of environmental stewardship.

The BA in Environmental Studies and Sustainability will provide our graduates with communication skills, collaboration abilities and team orientation, a “customer” orientation, creativity and innovative thinking ability, a broad environmental science understanding, analytical ability and critical thinking and problem solving ability, a work orientation with
professionalism and a positive attitude, occupation-specific skill and knowledge through co-op, and leadership ability.

Drexel Advantage

There is a distinct advantage to a student in undertaking an environmental studies degree at Drexel. Drexel University was one of the first universities in the nation to establish an undergraduate environmental science degree in the late 1960s. Since that time Drexel is known for its research and scholarship in this area. Over the long history of the program, Drexel has established an extensive network of co-op employers who value Drexel students. Therefore, there is a natural constituency for our students in Environmental Studies and Sustainability as well. Drexel students will take advantage of the co-op program to both get more extensive experience and get paid while doing so.

Degree Requirements

General Requirements

ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0

Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology; phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family

The largest job opportunities exist in the areas of environmental communication, sustainability, environmental policy, community action, water quality, parks, outdoor recreation, ecotourism, natural resources and conservation, policy analyst, naturalist, international environmental specialist, and renewable energy.

This major will educate individuals who seek careers and/or additional academic training in the following fields:

- Sustainability planning and implementation
- Urban, Regional and Community Planning
- Geographic Information Systems
- Environmental Communications
- Environmental Journalism
- Environmental Law
- Park Management and Outdoor Recreation
- Environmental Consulting
- Environmental Policy Analysis

The largest job opportunities exist in the areas of environmental communication, sustainability, environmental policy, community action, water quality, parks, outdoor recreation, ecotourism, natural resources and conservation, policy analyst, naturalist, international environmental specialist, and renewable energy.
(Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University, 2010-2012: Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O'Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Associate Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pillsbury Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Ron Smith, MS (Rutgers University). Instructor. Shorebird Ecology and Conservation; Amphibians of the NJ Pine Barrens; Restoration Ecology; Climate Change – Regional Effects and Education

James R. Spotila, PhD (University of Arkansas) L. D. Betz Chair Professor. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluysen, PhD (University of Hawaii). Assistant Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

John G. Lundberg, PhD (University of Michigan). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Geoscience

Major: Geoscience

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 185.0 - 189.0

Co-op Options: Three Co-op (Five years)

Classification of Instructional Programs (CIP) code: 40.0601

Standard Occupational Classification (SOC) code: 11-9121; 19-2042

About the Program

From energy to climate change to environmental degradation, many of the most pressing societal issues of the coming century will pertain to geoscience. The study of the Earth is central to maintaining clean drinking water, mitigating environmental contamination, providing ores and rare elements necessary for industry, and locating new sources of energy.

The Biodiversity, Earth and Environmental Science (BEES) Department offers a major in geoscience, with three concentration options designed to meet the needs of students wishing to pursue graduate school or immediate employment in the geosciences:

- Applied Geology
- General Geoscience
- Paleontology

The core requirements encompass foundational courses in science, writing, and math, and traditional courses that form the backbone of the geosciences. Building upon these are innovative courses focused on Earth systems processes, key environmental issues, practical field experiences, and advanced geological study.

In addition to nourishing and honing the passions of students studying the Earth, the core curriculum is designed to:

1. Instill key technical skills early-on, as a pathway to high-quality co-op opportunities;
2. Lay the groundwork for our students to pursue advanced graduate study in the geosciences and other disciplines, and;
3. Enable our graduates to translate marketable skills and knowledge into high-quality jobs in industry and government.

Geoscience majors will begin their field experiences during the first term of their freshmen year. Most courses include a laboratory section or a hands-on recitation section ("dry lab"), plus at least three field trips to relevant regional geological sites. These courses, combined with the co-op experience and summer geological field camp, provide students real-world experience in the field.

About the Concentrations

Applied Geology

The applied geology concentration is designed for students wishing to enter the geoscience workforce upon graduation. Possible employment opportunities include jobs in: environmental consulting, geotechnical consulting, geophysical consulting, the petroleum and natural gas industry, the mining industry, federal agencies (e.g., USGS, USDA, NOAA, FEMA, EPA, DOI, and Army Corps of Engineers), and state and local agencies (e.g., state environmental agencies, state geological surveys, and municipal water departments).
General Geoscience

The general geoscience concentration allows maximum flexibility and is designed for students wishing to pursue other areas of study within the geosciences, students wishing to pursue policy-related careers, and students planning to apply to professional graduate programs, such as those in law or business schools. The policy component of this concentration allows students to explore related societal issues, which may help guide their career aspirations. This concentration also provides transfer students with a pathway to graduate on time.

Students graduating from this concentration will be well prepared to enter graduate school in science or policy, as well as to pursue professional studies. Students seeking immediate employment will be competitive for jobs with, for example, certain NGOs, environmental foundations, consulting companies, and government policy positions related to natural resources and the environment.

Paleontology

The concentration in paleontology prepares students who are interested in pursuing related research in graduate school and students seeking entry-level positions in paleontology. Examples of these jobs include biostratigrapher for petroleum companies, fossil resource manager for the Bureau of Land Management, and related positions with the National Parks Service, USGS, and state geological surveys.

Undergraduates in this concentration benefit from world-class resources already established at the Academy of Natural Sciences. These include the Invertebrate paleontology collection, with over 1 million specimens; the vertebrate fossil collection, with over 22,000 specimens; historically important specimens, such as the Thomas Jefferson fossil collection, the first discovered dinosaur skeleton, and the first discovered tyrannosaur; and the paleobotany collection, with over 5,000 specimens, including a large proportion of type specimens.

Students in the paleontology concentration will have access to numerous fossil sites along the Atlantic Coastal Plain and in the Appalachian Province. Opportunities exist for student research at two well-established sites: Dr. Daeschler’s Red Hill site, which produces evolutionarily important forms representing the fish to tetrapod transition; and Dr. Lacovara’s Inversand site, which records a mass-death assemblage at the end of the Cretaceous Period.

Additional Information

For additional information about this program, visit the Biodiversity, Earth and Environmental Science (BEES) Department website.

*See the Biodiversity, Earth and Environmental Science (BEES) for the GEO Core and Paleo elective list.

Minor in Geoscience

Geosciences are at the core of numerous problems facing the world today, and impact the lives of communities across the planet. Climate change, natural disasters, access to mineral resources and clean water, and availability of energy all shape government policies and corporate strategies, and are a cause of concern for society at large.
The geoscience minor is designed to give students specializing in other fields the skills to understand and analyze these issues. It is a natural fit for environmental science majors who wish to understand how the physical world can impact biodiversity, ecological processes and environmental impacts. For students majoring in such fields as business and engineering, the minor in geoscience will provide them with the tools to make better decisions about products or projects related to natural hazards and their impact, cost and availability of natural resources, energy policy, space exploration, land use, and environmental justice. For students who are liberal arts majors, the minor in geoscience offers the opportunity to explore earth science issues that shape the social, cultural, political and scientific debate, and to be prepared for issues they may encounter in their careers.

Co-Op/Career Opportunities

Co-Op Opportunities

There are over one hundred environmental, geophysical, and geotechnical firms within the greater Philadelphia region. Plus, there are opportunities with federal, state, and municipal agencies, jobs in central Pennsylvania related to the Marcellus Shale, and research opportunities between Drexel and the Academy of Natural Sciences.

All geoscience majors follow the five-year, three co-op plan of study program. Transfer students may be granted an exception for a two co-op plan of study, so that they may remain on schedule. The summer geological field camp will occur during the third co-op cycle. In this third co-op, geoscience students attend field camp and also partake in an abbreviated co-op work experience.

Career Opportunities

According to the US Bureau of Labor Statistics (BLS), employment for geoscientists through 2020 is expected to grow faster than the average for all occupations. In addition, the geosciences are expected to outpace life, physical, and social sciences in job creation. The employment outlook for geoscientists in Drexel’s surrounding area is particularly bright, with a robust environmental consulting industry and exploding demand related to Marcellus Shale drilling.

The geoscience major, with its three concentrations, prepares students who are interested in entering the workforce immediately as well as those who are interested in pursuing related research in graduate schools.

Facilities and Field Sites

Facilities

The geoscience major leverages resources at Drexel University and the Academy of Natural Sciences (http://www.ansp.org), such as a mineral collection with 9,000 specimens, over a million fossil specimens, Dinosaur Hall, The Patrick Center for Environmental Research, a state-of-the-art fossil preparation lab, notable research programs, and faculty with expertise in geology, paleontology, and related disciplines.

Summer Geological Field Camp

Summer geological field camp is the quintessential undergraduate experience for geosciences students. It is a long-held tradition in geology departments that students head out West, during the summer before graduation, to apply their knowledge to real-world situations and to acquire field skills that will serve them throughout their careers. This is particularly important for students in eastern schools, where the mountains are small and outcrops are scarce. Field camp also provides networking and bonding opportunity for students. Friends made at field camp often become colleagues for life. At the Geological Society of America meeting, reunions are organized by university and by field camp.

The summer geological field camp for geoscience students will occur during the third co-op cycle.

Barnegat Bay Coastal Field Station

The BEES field station on Barnegat Bay in Waretown, NJ provides geoscience students with opportunities to engage in hands-on research in coastal geology, barrier island morphology, oceanography, and sedimentology. The facility includes a lodge, two classrooms/meeting rooms, dining hall, dormitories, and rustic cabins. The field station is located on 194 acres of diverse coastal habitat, including a maritime forest, tidal creek, salt marsh, fresh water pond, brackish impoundment, and bayshore environments. The department’s research vessel gives students access to back-bay and near-shore marine environments.

The department holds its introductory field session for incoming freshmen and other events at the field station. The facility may also serve as a base for excursions into the Pine Barrens, a heavily forested area containing a number of interesting deposits related to the last glacial period.

Red Hill Fossil Site

The Red Hill fossil site, in Tioga County, Pennsylvania, exposes Devonian coastal sedimentary rocks that preserve a rich fossil fauna. Of particular importance is a fossil fish species, studied by Dr. Ted Daeschler, representing a critical transition between fish and tetrapods (land animals.) This site offers opportunities for studying vertebrate paleontology, stratigraphy, and sedimentology and provides students with a window into an important moment in the history of life on Earth.

Inversand Fossil Site: Local training ground for Geoscience Majors

The Inversand fossil site is a unique resource for geological education, research, and STEM outreach. The quarry is located in Gloucester
Country, NJ, only 20 minutes from Drexel’s campus, making it possible to conduct field exercises there within a three-hour class period. The geological formations that outcrop in the Inversand Quarry have yielded many new fossil species. The site has significance beyond vertebrate paleontology, however, and will provide a local laboratory for classes in geochemistry, geophysics, stratigraphy, sedimentology, hydrogeology, and environmental geology. As such, it will provide a valuable training-ground, a short distance from campus, for all Drexel geoscience majors.

Geoscience Faculty

Walter F. Bien, PhD (Drexel University) Director, Laboratory of Pinelands Research. Research Professor. Natural resource management, restoration ecology, conservation biology, and New Jersey Pinelands community dynamics.

Elizabeth Burke Watson, PhD (University of California, Berkeley). Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Donald F. Charles, PhD (Indiana University) Senior Scientist and Section Leader, Physiology Section, Academy of Natural Sciences. Professor. Diatoms as water quality indicators; paleolimnological approaches for inferring change in biology and chemistry of lakes; lake management; assessment of perturbations in aquatic ecosystems due to municipal and industrial effluents, land-use change, acid deposition, eutrophication and climate change.

Carol Collier, FAICP, MRP (University of Pennsylvania) Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Daniel P. Duran, PhD (Vanderbilt University). Assistant Teaching Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect systems to better understand fundamental evolutionary processes and maintain biodiversity.

Jon Gelhaus, PhD (University of Kansas) Curator, Department of Entomology: Academy of Natural Sciences. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Richard J. Horwitz, PhD (University of Chicago) Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O’Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Associate Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pillsbury Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Ron Smith, MS (Rutgers University). Instructor. Shorebird Ecology and Conservation; Amphibians of the NJ Pine Barrens; Restoration Ecology; Climate Change – Regional Effects and Education.

James R. Spotila, PhD (University of Arkansas) L. D. Betz Chair Professor. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluysen, PhD (University of Hawaii). Assistant Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD (Old Dominion University) Department Head, Biodiversity, Earth and Environmental Science. Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.
Emeritus Faculty

John G. Lundberg, PhD (University of Michigan), Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Global Studies

Major: Global Studies
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 23.9999
Standard Occupational Classification (SOC) code: 25-1123

About the Program

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.

Our students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel's Co-Op opportunities

Global Business, Economics, and Development Distribution Options

**Electives**

Global Studies Core Requirements

- GST 190 Global Research Methods 3.0
- GST 359 Culture and Values 3.0
- GST 360 Civilizations 3.0
- WGST 240 Women and Society in a Global Context 3.0

**Language minor**

- GST 101 Societies In Transition: The Impact of Modernization and the Third World 3.0-4.0
- or GST 330 Development and Underdevelopment in the Global South 3.0
- BLAW 340 International Business Law 4.0
- ECON 342 Economic Development 4.0
- ENGL 308 [WI] The Literature of Business 3.0
- INTB 332 Multinational Corporations 4.0
- INTB 334 International Trade 4.0
- INTB 338 Regional Studies in Economic Policies and International Business 4.0
- PHIL 301 Business Ethics 3.0
- SCCS 355 [WI] Classical Social Theory 4.0

**Global Business, Economics, and Development Concentration Requirements**

General Requirements

- ANTH 101 Introduction to Cultural Diversity 3.0
- CIVC 101 Introduction to Civic Engagement 1.0
- ECON 201 Principles of Microeconomics 4.0
- ECON 202 Principles of Macroeconomics 4.0
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- ENGL 204 Post-Colonial Literature II 3.0
- LING 102 Language and Society 3.0
- PHIL 105 Critical Reasoning 3.0
- PSCI 150 International Politics 4.0
- UNIV H101 The Drexel Experience 1.0
- UNIV H201 Looking Forward: Academics and Careers 1.0

Two mathematics courses 6.0-8.0

Two science courses 6.0-8.0

One ethics course 3.0

**Global Health and Sustainability Concentration**

General Requirements

- ANTH 101 Introduction to Cultural Diversity 3.0
- CIVC 101 Introduction to Civic Engagement 1.0
- ECON 201 Principles of Microeconomics 4.0
- ECON 202 Principles of Macroeconomics 4.0

**Total Credits**

- 182.0-183.0
PBHL 303 Overview of Issues in Global Health 3.0
SOC 235 Sociology of Health and Illness 4.0
PHIL 335 Global Ethical Issues 3.0
SOC 346 Environmental Justice 4.0
ANTH 360 Culture and the Environment 3.0-4.0
or SOC 345 Sociology of the Environment

Choose one of the following Culinary Arts classes 3.0
CULA 425 The Kitchen Garden
CULA 426 The Kitchen Garden: Summer
CULA 427 The Kitchen Garden: Fall

Choose one of the following English classes 3.0
ENGL 300 [WI] Literature & Science
ENGL 302 Environmental Literature
ENGL 370 Topics in Literature and Medicine

Choose one of the following History courses 4.0
HIST 287 History of Science: Ancient to Medieval
HIST 288 History of Science: Medieval to Enlightenment
HIST 289 History of Science: Enlightenment to Modernity

Global Health and Sustainability Distribution Options 33.0-44.0
Select of 11 of the following:
ANTH 210 [WI] Worldview: Science, Religion and Magic
ANTH 310 Societies In Transition: The Impact of Modernization and the Third World
ANTH 360 Culture and the Environment
BIO 109 Biological Diversity, Ecology & Evolution
BIO 264 Ethnobotany
BIO 312 Genetically Modified Foods
CJS 373 Environmental Crime
COM 316 Campaigns for Health & Environment
COM 317 [WI] Environmental Communication
COM 320 [WI] Science Writing
COM 375 [WI] Grant Writing
ECON 301 Microeconomics
ECON 321 Macroeconomics
ECON 351 Resource and Environmental Economics
ENGL 300 [WI] Literature & Science
ENGL 302 Environmental Literature
ENGL 370 Topics in Literature and Medicine
ENVS 169 Environmental Science
ENVS 275 Global Climate Change
ENVS 289 Global Warming, Biodiversity and Your Future
ENVS 328 Conservation Biology
HSAD 312 Development of World Health Care
HIST 287 History of Science: Ancient to Medieval
HIST 288 History of Science: Medieval to Enlightenment
HIST 289 History of Science: Enlightenment to Modernity
HSAD 316 Health Care across Cultures

Global Justice and Human Rights Concentration

General Requirements
ANTH 101 Introduction to Cultural Diversity 3.0
GIVC 101 Introduction to Civic Engagement 1.0
ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
ENGL 204 Post-Colonial Literature II 3.0
LING 102 Language and Society 3.0
PHIL 105 Critical Reasoning 3.0
PSCI 150 International Politics 4.0
UNIV H101 The Drexel Experience 1.0
UNIV H201 Looking Forward: Academics and Careers 1.0
Two mathematics courses 6.0-8.0
Two science courses 6.0-8.0
One ethics course 3.0

GST Core Curriculum Requirements
GST 190 Global Research Methods 3.0
GST 359 Culture and Values 3.0
GST 360 Civilizations 3.0
WGST 240 Women and Society in a Global Context 3.0

Language Minor 24.0
Students must complete at least 24 credits above the 103-105 level to earn a language minor.

Area-Specific Requirement 6.0-8.0
Students select two region specific courses, approved by the GST advisor.
Courses must be on the same region, but can be in any discipline.

Global Justice and Human Rights Distribution Requirements
ANTH 310 Societies In Transition: The Impact of Modernization and the Third World 3.0-4.0
or SOC 330 Development and Underdevelopment in the Global South
ENGL 360 [WI] Literature and Society 3.0
PHIL 335 Global Ethical Issues 3.0
PSCI 120 History of Political Thought 4.0
PSCI 229 Theories of Justice 4.0
PSCI 352 Ethics and International Relations 4.0
PSCI 353 International Human Rights 4.0
SOC 355 [WI] Classical Social Theory 4.0

Select one of the following: 3.0-4.0
GST 435 Model Organization of American States
PSCI 351 International Organizations: The United Nations
PSCI 357 The European Union in World Politics

Justice and Human Rights Distribution Options 33.0-44.0
Students choose 11 of the following:
AFAS T280 Special Topics in Africana Studies (Course must have a global theme)
ANTH 312 Approaches to Intercultural Behavior
or COM 345 Intercultural Communication

Minor in Global Studies

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.

Students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel's Co-op opportunities

Program Requirements

Students must complete at least 201 of a language before earning the GST minor.

Core requirements

Total Credits: 182.0

Global Studies Faculty

Anne C. Cecil, MA (University of the Arts). Assistant Teaching Professor. Web designer, product designer, merchandising and artist.

George Ciccariello-Maher, PhD (University of California, Berkeley). Associate Professor. Colonialism, social movements, political theory.

Rose Corrigan, PhD (Rutgers University). Associate Professor. Women, public law, American politics and policy.

Brenda Dyer, MA (University of Pennsylvania). Associate Teaching Professor. Language acquisition pedagogy, teaching writing, seventeenth and eighteenth century French literature, women writers, translation.

Mary Ebeling, PhD (University of Surrey) Director, Women's and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

David Fryer, PhD (Brown University). Assistant Teaching Professor. Gender theory; psychoanalysis; ethics; queer theory; genderqueer theory; phenomenology; Africana thought; secular Jewish thought.

Christian Hunold, PhD (University of Pittsburgh). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Gabriella Ibieta, PhD (City University of New York). Associate Professor. Comparative literature; Cuban and Latin American fiction.

Emmanuel F. Koku, PhD (University of Toronto). Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of...
development; communication and information technology; community and urban sociology.

Christopher A. Laincz, PhD (Duke University). Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Maria delaluz Matus-Mendoza, PhD (Temple University) Language Program Coordinator. Associate Professor. Spanish Linguistic variation in the US; the relationship between language variation and mobility (social and geographical) among the Mexican communities in Mexico and in the United States; second language acquisition; language variation in media.

Usha Menon, PhD (University of Chicago). Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Rogelio Minana, PhD (Penn State) Department Head, Global Studies and Modern Languages. Professor. The role of classic cultural icons, particularly Don Quixote, in 21st century political and social justice discourse; the interplay between the traditional humanities, youth organizations, and digital storytelling.

Julie Mostov, PhD (New York University) Vice Provost for Global Initiatives. Professor. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.

Joel E. Oestreich, PhD (Brown University) Director of the Global Studies major. Associate Professor. International organizations, international finance, development, and human rights.

Emilie Passow, PhD. Associate Teaching Professor. Medical Humanities, Jewish Studies

Rakhmiel Peltz, PhD (Columbia University, Linguistics; University of Pennsylvania, Biological Sciences) Director of Judaic Studies Program. Professor. Sociolinguistics, ethnography of communication, social history of Yiddish language and culture, Yiddish culture of Eastern Europe, language planning, language and ethnic identity, language and group memory, aging and ethnicity, history of urban neighbors.

Abioseh Porter, PhD (University of Alberta, Canada). Professor. Comparative literature; postcolonial literatures; Editor, <em>JALA, Journal of the African Literature Association</em>.

Robert Powell, PhD (Temple University). Assistant Teaching Professor. Early and Middle Bronze Age Crete; archaeoastronomy; early state formation; archaeology and anthropology of frontiers; mass communication.

Rachel R. Reynolds, PhD (University of Illinois at Chicago). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

Simone Schlichting-Artur, EdD (University of Pennsylvania) Senior Assistant Dean of Global Initiatives. Teaching Professor. International business communication (Germany and the U.S.), public health policy and languages, German post-war history through film and literature, development of writing assessment tools for German minor.

Natsumi Shor, MA. Assistant Teaching Professor. Business and professional Japanese; Japanese film and culture; interrelation between Japanese language to the nation’s culture and thought.

Wesley Shumar, PhD (Temple University) Department Head, Anthropology. Professor. Ethnography of cyberspace, online learning communities, political economy of higher education, globalization, activity theory, semiotics, critical realism, psychoanalysis, identity and the self.

Judith Storniolo, PhD (University of Pennsylvania). Teaching Professor. Historical and comparative linguistics, Mesoamerican languages and culture, applied anthropology, public policy, oral traditions and narratives, ideology and ritual, Mesoamerican ethnohistory; and pre-Columbian literature.

Alden Young, PhD (Princeton University) Director of the Program in African Studies. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Jennifer Yusin, PhD (Emory University). Associate Professor. Postcolonial literature; trauma theory; literary theory; psychoanalysis, and memory studies in contemporary literature in English.

History

Major: History

Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 182.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 54.0101

Standard Occupational Classification (SOC) code: 19-3093

Note: Effective Fall 2015, students are no longer being accepted into the Bachelor of Science (BS) program.

About the Program

The history program reflects the strengths of Drexel University, including specialization in transnational history and in the history of science, technology and the environment. A series of required courses in history build skills in research and interpretation of the past while elective courses within and outside the history program allow students to shape their curriculum to meet their needs and interests. Our history graduates go to graduate school in history, to professional schools in law, medicine, and business, and to work in business, government agencies, and non-profit organizations.

We apply Drexel's experiential, research-intensive approach to the discipline of history. Using the extensive historical resources of Philadelphia, the region, and the digital world, students develop a profound understanding of history and the ways it is made. We also encourage students to enrich their education through co-op, study abroad, and summer research projects working alongside department faculty.

Degree Offered

The Bachelor of Arts (BA) provides a course of study that includes foreign language courses and a broad grounding in the liberal arts, with flexibility for students to choose courses to fulfill humanities, social
science, math, and science requirements that will contribute to their overall educational and career plans.

The History (http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/history/#historyminortext) minor allows students in other majors to explore the historical background of their discipline, to better understand the origins of the contemporary world, and to build the knowledge and skills needed to understand the development of human societies over time and to understand historical episodes into their proper contexts. The minor in History is highly flexible and allows students to choose those History courses which appeal to them and which will contribute to their broader education. To complete the minor, students must take a total of six History courses (24.0 credits), five of which must be at the 200-level or above.

Additional Information
For more information about this program, please visit the Department of History (http://drexel.edu/history) website or contact:

### Co-Op/Career Opportunities

#### Co-Op Experiences

History majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the "real" world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

#### Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the MS in Science, Technology, and Society program (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyand society), an MBA or other business program, or law school.

### Accelerated/Dual Degrees

#### About the Programs

Two accelerated/dual degrees are available:

- BA in History and MS in Science, Technology and Society program
- BA in History and the MS(LIS) program

Drexel University permits undergraduate students in 5-year programs to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time.

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone.

Students entering the program must:

- have and maintain a minimum of 3.0 grade point average throughout the program
- have no fewer than 90.0 earned credits
- have no more than 120.0 registered credits
- complete only 2 co-ops if in a BA/MS program.

#### BA in History and the MS in Science, Technology, and Society Accelerated Degree

The accelerated degree program in History and Science, Technology and Society provides an opportunity to earn both a BA degree and an MS degree (two diplomas are awarded) in five years.

This program was created to meet the academic needs of History students who are interested in History, Technology and Science, and interested in pursuing careers in the rapidly growing field of STS.

#### Recommended Plan of Study

Students should work closely with undergraduate advisor and the graduate Science, Technology & Society advisor to schedule an individualized plan of study for their accelerated degree completion.

The following is a sample plan of study.

* Must be 200-level or above.
** Must be 200-level or above. May not be HIST 201.
*** See catalog for BA-History degree requirements.
† At least four core courses must be 200-level or above.

Students are strongly encouraged to take a course during each term while on co-op. Please refer to university policy for more information.

For more information about the accelerated BA/MS program, contact:
Irene Cho
Assistant Director
Center for Science, Technology, and Society
3600 Market Street, 7th Floor
215.895.3852

BA in History and the MS(LIS) Accelerated Degree

This program pairs the undergraduate History major with the school's MS in Library and Information Science in an accelerated time-frame. Students have the opportunity to earn both the undergraduate and graduate degrees in five years. Two diplomas are awarded. For students completing this program, the undergraduate background in history provides a natural fit with areas of library specialization, such as archival studies, records management, and related fields

About the Program

Applicants may be provisionally admitted into the program as incoming freshmen. Participants have the option of choosing either a one or a two co-op history program. The non-co-op option is not available for students choosing this accelerated degree option.

When students have accumulated 90.0 credits, but have not yet registered for 120.0 credits, they can apply to formally enter the graduate program. The student must have at least a 3.2 GPA and must maintain this 3.2 GPA for the graduate portion of the program.

Advising/Plan of Study

Students should work closely with faculty advisers to schedule and maintain a plan of study throughout the accelerated program.

* Must be 200-level or above.

** Select from the following INFO courses: INFO 101, INFO 102, INFO 105, INFO 108, INFO 110, INFO 215.

*** Must be 200-level or above. May not be HIST 201.

† See History degree requirements.

†† At least four core courses must be 200-level or above.

### Additional Information

For more information on the undergraduate history portion of the program, contact:

Melissa Mansfield, Department Administrator Department of History MacAlister Hall 3025 mmm462@drexel.edu

For more information on the graduate portion of the program, contact:

Susan E. Davis
Associate Teaching Professor
College of Computing and Informatics sedavis@drexel.edu

### Minor in History

**History Electives**

* Take any 6 HIST courses; 5 of 6 must be 200-level or higher

**Total Credits**

**24.0**

### History Faculty

Lloyd Ackert, PhD (*Johns Hopkins University*). Associate Teaching Professor. History of science and technology; ecology; Russian science.
Debjani Bhattacharyya, PhD (Emory University). Assistant Professor. Modern South Asian history; urban environmental history; history of economic thought; and post-colonial theory.

Scott G. Knowles, PhD (Johns Hopkins University) Interim Department Head, History. Associate Professor. Urban history, history of technology, history of disasters, modern history.

Sharon Ku, PhD (University of Cambridge, UK). Assistant Research Professor. History and sociology of science; nanotechnology; scientific standardization.

Jonson Miller, PhD (Virginia Tech). Associate Professor. Science and technology, American history, military history.

Tiago Saraiva, PhD (Universidad Autónoma de Madrid). Assistant Professor. History of science and technology; transnational history; environmental history

Jonathan Seltz, PhD (University of Wisconsin) Assistant Department Head, History. Associate Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Amy Slaton, PhD (University of Pennsylvania). Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Kathryn Steen, PhD (University of Delaware). Associate Professor. History of technology, history of industry and business, and comparative history.

Donald F. Stevens, PhD (University of Chicago). Associate Professor. Modern Latin American history.

Alden Young, PhD (Princeton University) Director of the Program in Africana Studies. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Michael Yudell, MPH, MPhil, PhD (Columbia University) Chair, Department of Community Health and Prevention. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

Robert Zaller, PhD (Washington University). Professor. English history and early modern European history.

Emeritus Faculty

Eric Dorn Brose, PhD (Ohio State University). Professor Emeritus. German and European history.

Mathematics

Major: Mathematics
Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 27.0101
Standard Occupational Classification (SOC) code: 15-2021; 15-2041

About the Program

The mathematics major at Drexel provides a supportive learning environment in which students obtain a firm grounding in the core areas of mathematics and apply this knowledge to problems encountered in a technological society. The Department of Mathematics (http://drexel.edu/coas/academics/departments-centers/mathematics) offers students the option of either a BA or a BS degree.

The Mathematics Department takes pride in offering a balanced and flexible curriculum. Three very different kinds of skills are emphasized in the mathematics major:

- **Abstract Reasoning**
  All students majoring in mathematics take courses that emphasize abstract reasoning. Students read and write proofs, and graduate well prepared to enter a PhD program in mathematics.

- **Computing**
  All students majoring in mathematics take a series of computing courses. This emphasis on computing is one of the distinctive features of the mathematics program at Drexel, and provides students with a competitive advantage in the job market.

- **Mathematical Modeling**
  All students majoring in mathematics take multidisciplinary courses that focus on the interplay between mathematics and an area of application.

Students often use electives to focus on an area of personal interest. The Department of Mathematics encourages students to minor in a subject where mathematics is applied. The Department provides an advisor to assist students in selecting electives and planning career paths.

Students select two courses from chemistry, biology or physics. Both courses may be in the same subject or they may be in different subject areas.

- **Social and behavioral sciences electives**
  Designated courses in anthropology, economics, criminology & justice studies, international relations, history, politics, psychology and sociology.

- **Studies in diversity electives**
  Designated courses in Africana studies, anthropology, communication, English, history, Judaic studies, linguistics, music, sociology and women's & gender studies.

| Total Credits | 14.0-15.0 |

| **Term 2** | |
| ENGL 102 | Composition and Rhetoric II: Advanced Research and Evidence-Based Writing | 3.0 |
| MATH 122 | Calculus II | 4.0 |
| Computer Science (CS) sequence course | 3.0 |
| Science elective | 3.0-4.0 |
| CIVC 101 | Introduction to Civic Engagement | 1.0 |

| Total Credits | 14.0-15.0 |

| **Term 3** | |
| ENGL 103 | Composition and Rhetoric III: Themes and Genres | 3.0 |
| MATH 123 | Calculus III | 4.0 |
| MATH 220 [WI] | Introduction to Mathematical Reasoning | 3.0 |
| Computer Science (CS) sequence course | 3.0 |
| Social and behavioral science elective | 3.0 |

| Total Credits | 16.0 |

| **Term 4** | |
| COM 230 | Techniques of Speaking | 3.0 |
| MATH 200 | Multivariate Calculus | 4.0 |
| MATH 201 | Linear Algebra | 4.0 |
| Diversity studies elective | 3.0 |
| International studies elective | 3.0 |

| Total Credits | 17.0 |

| **Term 5** | |
| Mathematics (MATH) courses ** | 6.0 |
| Humanities/Fine arts elective | 3.0 |
| Free electives | 6.0 |

| Total Credits | 15.0 |

| **Term 6** | |
| MATH 210 | Differential Equations | 4.0 |
| Mathematics (MATH) course ** | 3.0 |
| Social and behavioral science elective | 3.0 |
| Humanities/Fine arts elective | 3.0 |
| Free elective | 3.0 |

| Total Credits | 16.0 |

| **Term 7** | |
| Mathematics (MATH) course ** | 3.0 |
| Diversity studies elective | 3.0 |

---

* Math majors must pass MATH 121 with a grade of B or higher.

** If a student takes both of MATH 331 and MATH 401, then one of these can count as a Mathematics Elective. Up to 3 mathematics-related courses from other departments may be substituted for Mathematics Electives with departmental permission. MATH special topics courses may be substituted for Mathematics Electives with departmental permission.

** Categories of Electives

- **Humanities and arts electives**
  Designated courses in art, art history, communication studies, foreign languages (300-level or above), history, literature, music, philosophy, religion, and theatre arts.

- **International electives**
  Designated courses in anthropology, art history, history, literature, music, politics and sociology. Courses with an international focus may be used to fulfill requirements in other categories as well.

- **Science electives**
### Degree Requirements (BS)

Free electives 8.0

**Term Credits 15.0**

**Term 12**
Mathematics (MATH) electives ** 6.0
Free electives 9.0-10.0

**Term Credits 15.0-16.0**

Total Credit: 181.0-184.0

* See degree requirements (p. 116).

** Select from MATH 221, MATH 235, MATH 250, MATH 285,
MATH 300, MATH 301, MATH 305, MATH 311, MATH 312,
MATH 316, MATH 318 [WI], MATH 319, MATH 320, MATH 321,
MATH 322, MATH 323, MATH 387, MATH 422, MATH 449,
MATH 450, MATH 475, MATH 483, MATH 489. MATH special
topics courses may be substituted for Mathematics Electives with
departmental permission.

Co-op/Career Opportunities

Mathematicians are employed in a variety of capacities in business,
industry, and government. Students can combine courses in economics
or finance and mathematics to prepare for careers in the actuarial field,
banks, stock exchanges, or finance departments of large corporations
or other financial institutions. Students interested in science careers
may focus on probability and statistics in order to work for industries like
pharmaceutical manufacturers. Many others combine math studies with
computer science courses to prepare for careers in information systems
or engineering.

Teacher certification is also a career option available through a joint
program in mathematics and teacher education.

Visit the Drexel Steinbright Career Development Center (http://
www.drexel.edu/scdc) for more detailed information on co-op and post-
graduate opportunities.

Dual Degree Bachelor’s Programs

Since applied mathematics plays an important role in many different
disciplines, mathematics majors often choose to pursue specialization in
a second field of study. Students may choose a dual major that involves completing the requirements of two separate majors or they can opt for a minor, which involves completing the major in one field and a smaller set of courses in another.

Dual majors are common in mathematics/computer science and mathematics/physics. Students interested in a dual major should consult with their advisor or contact the assistant department head. Dual majors in other fields are also possible, but early planning and discussions with advisors is essential.

Minor in Mathematics

The minor in mathematics consists of five required courses and elective courses from the specified group of courses listed below resulting in a minimum of 38.0 credits.

Required Courses

<table>
<thead>
<tr>
<th>Course Code</th>

</table>

Total Credits 38.0

* Students count only one of these two courses for their minor.
** A request form is available for any other mathematics courses upon the written approval prior to the beginning of the quarter in which the course is to be offered. Students should contact the Mathematics undergraduate academic advisor at advisor@math.drexel.edu.
*** Students who take MATH 291 cannot also count MATH 321 or MATH 322 toward their minor.

Mathematics Faculty

David M. Ambrose, PhD (Duke University) Associate Department Head, Mathematics. Associate Professor. Applied analysis and computing for systems of nonlinear partial differential equations, especially free-surface problems in fluid dynamics.

Jason Aran, MS (Drexel University). Assistant Teaching Professor.

Jonah D. Blasiak, PhD (University of California at Berkeley). Associate Professor. Algebraic combinatorics, representation theory, and complexity theory.

Robert P. Boyer, PhD (University of Pennsylvania) Associate Head of the Mathematics Department. Professor. Functional analysis, C*-algebras and the theory of group representations.

Patrick Clarke, PhD (University of Miami). Assistant Professor. Homological mirror symmetry, Landau-Ginzburg models, algebraic geometry, symplectic geometry.

Daryl Falco, MS (Drexel University). Assistant Teaching Professor. Discrete mathematics and automata theory.

Raymond Favocci, MS (Drexel University). Assistant Teaching Professor.

Carlo Fazioli, PhD (University of Illinois at Chicago). Assistant Teaching Professor. Computational Fluid Dynamics, Free Boundary Problems.

Pavel Grinfeld, PhD (Massachusetts Institute of Technology). Associate Professor. Intersection of physics, engineering, applied mathematics and computational science.

Anatolii Grinshpan, PhD (University of California at Berkeley). Assistant Teaching Professor. Function theory and operator theory, harmonic analysis, matrix theory.

Yixin Guo, PhD (University of Pittsburgh). Associate Professor. Biomathematics, dynamical systems, ordinary and partial differential equations and math education.

R. Andrew Hicks, PhD (University of Pennsylvania). Professor. Geometry; optics; computer vision.

Robert Immordino, MS (Drexel University). Assistant Teaching Professor.

Ryan Kaliszewski, PhD (The University of North Carolina at Chapel Hill). Visiting Assistant Professor. Algebraic Combinatorics and Algebraic Geometry—specifically positivity results for generating polynomials.

Dmitry Kaluzhnyi-Verbovetskyi, PhD (Kharkov University). Associate Professor. Operator theory, systems theory, complex analysis, C*-algebras and harmonic analysis.
Hwan Yong Lee, PhD (University of Utah). Assistant Teaching Professor. Electromagnetic wave propagation in composite media, optimization and inverse problem.

Georgi S. Medvedev, PhD (Boston University). Associate Professor. Ordinary and partial differential equations, mathematical neuroscience.

Taoufik Meklachi, PhD (University of Houston). Visiting Assistant Professor. Inverse Problems

Jennifer Morse, PhD (University of California, San Diego) Undergraduate Advisor. Professor. Algebraic combinatorics.

Oksana P. Odintsova, PhD (Omsk State University). Associate Teaching Professor. Math education; geometrical modeling.

Dimitrios Papadopoulos, MS (Drexel University). Instructor.

Ronald K. Perline, PhD (University of California at Berkeley). Associate Professor. Applied mathematics, numerical analysis, symbolic computation, differential geometry, mathematical physics.

Marcia A. Perlstadt, PhD (University of California at Berkeley). Associate Professor. Applied mathematics, computed tomography, numerical analysis of function reconstruction, signal processing, combinatorics.

Adam C. Rickert, MS (Drexel University). Associate Teaching Professor.

Li Sheng, PhD (Rutgers University). Associate Professor. Discrete optimization, combinatorics, operations research, graph theory and its application in molecular biology, social sciences and communication networks, biostatistics.

Gideon Simpson, PhD (Columbia University). Assistant Professor. Partial differential equations, scientific computing and applied mathematics.

Justin R. Smith, PhD (Courant Institute, New York University). Professor. Homotopy theory, operad theory, quantum mechanics, quantum computing.

Xiaoming Song, PhD (University of Kansas). Assistant Professor. Stochastic Calculus, Large Deviation Theory, Theoretical Statistics, Data Network Modeling and Numerical Analysis.

Jeanne M. Steuber, MS (Boston University). Assistant Teaching Professor.

Kenneth P. Swartz, PhD (Harvard University). Assistant Teaching Professor. Applied statistics, data analysis, calculus, discrete mathematics, biostatistics.

Vaishalee T. Wadke, MS (Columbia University). Instructor.

Richard D. White, MS (Penn State University). Assistant Teaching Professor.

Hugo J. Woerdeman, PhD (Vrije Universiteit, Amsterdam). Professor. Matrix and operator theory, systems theory, signal and image processing, and harmonic analysis.

J. Douglas Wright, PhD (Boston University) Graduate Advisor. Associate Professor. Partial differential equations, specifically nonlinear waves and their interactions.

Dennis G. Yang, PhD (Cornell University). Assistant Teaching Professor. Dynamical systems, neurodynamics.

Thomas (Pok-Yin) Yu, PhD (Stanford University). Professor. Multiscale mathematics, wavelets, applied harmonic analysis, subdivision algorithms, nonlinear analysis, applied differential geometry and data analysis.

**Emeritus Faculty**

Loren N. Argabright, PhD (University of Washington). Professor Emeritus. Functional analysis, wavelets, abstract harmonic analysis, the theory of group representations.

Robert C. Busby, PhD (University of Pennsylvania). Professor Emeritus. Functional analysis, C*-algebras and group representations, computer science.

William M.Y. Goh, PhD (Ohio State University). Associate Professor Emeritus. Number theory, approximation theory and special functions, combinatorics, asymptotic analysis.

Bernard Kolman, PhD (University of Pennsylvania). Professor Emeritus. Lie algebras; theory, applications, and computational techniques; operations research.

Charles J. Mode, PhD (University of California at Davis). Professor Emeritus. Probability and statistics, biostatistics, epidemiology, mathematical demography, data analysis, computer-intensive methods.

**Philosophy**

**Major: Philosophy**

**Degree Awarded: Bachelor of Arts (BA)**

**Calendar Type: Quarter**

**Total Credit Hours: 182.0 - 195.0**

**Co-op Options: One Co-op (Four years); No Co-op (Four years); Three Co-op (Five years)**

**Classification of Instructional Programs (CIP) code: 38.0101**

**Standard Occupational Classification (SOC) code: 25-1126**

**About the Program**

A great philosopher once said, "Philosophers have just interpreted the world--but the point is to change it." At Drexel, we believe ideas do affect and change the world--in how we choose what to do, in how we approach
our activities, and in what we learn from them. At Drexel we believe that the most important reason to engage in philosophy is that we can change the world.

The Drexel philosophy program is organized around the idea that the study of philosophy should help students confront life’s most difficult and complex challenges. Philosophy classes at Drexel involve students in the active development of their reflective, creative, rational, logical, and linguistic abilities by engaging them with the problems of life and the world. The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication about real issues and concerns. It is particularly valuable as a preparation for careers in education and law, or in graduate study in philosophy, or in fields related to philosophy like critical media studies, public policy, or science, technology, and society (STS).

Drexel philosophy majors take a mixture of historical and topical courses in the major fields of philosophical inquiry. These fields include ethics, metaphysics (philosophy of reality), epistemology (philosophy of knowledge), aesthetics (philosophy of art and beauty), social and political philosophy, philosophy of science, and logic. Our philosophy elective classes cover a wide range of applied subjects including technology, medicine, law, religion, science, the environment, and more. Our upper-level seminar classes are discussion-driven, reading- and writing-intensive classes usually limited to 10-12 students.

Prior to the end of sophomore year students may choose to focus their philosophical studies in one of three areas of concentration. These are:

- Ethical Theory and Practice,
- Philosophy and Law,
- Philosophy, Technology and Science.

Students may also remain in the general Philosophy concentration, which gives them the widest range of options from which to select their courses.

Prior to the end of junior year, students may opt to work on a nine-credit Senior Thesis. This is a year-long, self-designed independent research and writing project, culminating in a defense before the program’s faculty and students. This project consists of three one-on-one tutorials with a faculty member of the student’s choosing.

The philosophy BA includes about 50.0 credits of free electives, which makes it possible for many students to double major. The Drexel philosophy program also offers a minor in philosophy (24.0 credits) and certificate programs in Philosophy in the Arts and Humanities and Philosophy in Science and Technology, (18.0 credits each).

Additional Information

For more information about Drexel philosophy classes and programs, please visit the Department of English & Philosophy website or drop by to see our director anytime. The Department of English and Philosophy is located in MacAlister Hall, room 5044. The director can be contacted at:

**Minor in Philosophy**

This minor is intended for undergraduates seeking to broaden and enhance their education by attaining a firm grounding in philosophy. The minor requires seven carefully-selected classes, plus one of the senior seminars. Students who have completed 30.0 credits may apply for the philosophy minor by submitting the Application for Admission to Minor Program form, available online at the Drexel Central (http://www.drexel.edu/src) website.

Dr. Peter Amato  
Director of Programs in Philosophy  
Department of English and Philosophy
Co-op/Career Opportunities

Opportunities

No major prepares students for success in as wide a variety of careers as a philosophy major does. Because philosophical work helps students develop superior reasoning, communication, and analytical skills, a philosophy major can be an ideal choice for students in pre-med or pre-law. It is also particularly valuable as a preparation for graduate study in philosophy, and in fields related to philosophy such as critical media studies, public policy, and science, technology, and society (STS). The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication. Philosophy majors graduate into a wide range of successful careers in business, industry, law, government, and service organizations and agencies as well as many fields of graduate study and research.

In only its first five years, the Drexel philosophy BA program has graduated students into careers including the law, public policy, and academic philosophy taking them to The Law School of the University of Pennsylvania, The New School, and Northeastern University.

Co-op Experiences

Philosophy students at Drexel are encouraged to seek out interesting co-op opportunities related to the skills and interests they are developing through their philosophical studies and potential career options they would like to explore. These can be as broad as the difference between an ethics-related co-op that has the student shadowing an ethicist working for a hospital’s board of institutional review, to a student who is interested in aesthetics and politics working with the Philadelphia Mural Arts Program in liaison with community groups. Students in philosophy who are pre-law frequently pursue law-related co-ops and co-ops at public and private agencies and organizations that employ lawyers and law students. Students in philosophy who are thinking about careers in academia have the full gamut of writing, editing, and publishing co-ops available to them, as well as research related co-ops they can develop by working with professors. While academically-oriented co-ops and co-ops in the Humanities generally pay less than those in the sciences, business, law, and engineering—if they pay at all—they are still enormously valuable as a way for students to develop a sense of what various careers might actually be like and how they work.

For detailed information on co-op and career opportunities, visit the Drexel Steinbright Career Development Center web page. For further information about co-op and career prospects related to philosophy, contact the Drexel philosophy program director:

Accelerated/Dual Degrees

About the Programs

Drexel University offers undergraduates the opportunity to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time.

Two accelerated/dual degrees are available:

- BA in Philosophy and MS in Public Policy
- BA in Philosophy and MS in Science, Technology & Society

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone.

Admission Requirements

Students who meet the standard eligibility requirement for accelerated programs should consult with their advisor and work on an individual plan of study to submit with the Change of Curriculum form.

**Thesis or Non-Thesis Option** 9.0

**Thesis Option:**

- PHIL 497 (WI) Senior Essay I: Research & Thesis Development
- PHIL 498 (WI) Senior Essay II: Argument Construction
- PHIL 499 (WI) Senior Essay III: Defense

**Non-Thesis Option:**

- PHIL 481 (WI) Seminar in a Philosophical School
- PHIL 485 (WI) Seminar in a Major Philosopher
- Select one of the following:
  - PHIL 341 Philosophy of the Environment
  - PHIL 351 Philosophy of Technology
  - PHIL 355 Philosophy of Medicine
  - PHIL 361 Philosophy of Science
  - PHIL 371 Philosophy of Social Sciences
  - PHIL 381 (WI) Philosophy in Literature
  - PHIL 385 Philosophy of Law
  - PHIL 391 Philosophy of Religion
  - PHIL 395 Advanced Topics in Logic

**Electives** 51.0

**Free Electives**

**Concentration Option** 21.0

General Philosophy Concentration:

- PHIL 111 Symbolic Logic I
- PHIL 231 Aesthetics: Philosophy of Art
- PHIL 481 (WI) Seminar in a Philosophical School
- PHIL 485 (WI) Seminar in a Major Philosopher
- Select one of the following:
  - PHIL 207 Symbolic Logic II
  - PHIL 301 Business Ethics
  - PHIL 305 Ethics and the Media
  - PHIL 311 Ethics and Information Technology
  - PHIL 315 Engineering Ethics
  - PHIL 317 Ethics and Design Professions
  - PHIL 321 Biomedical Ethics
  - PHIL 322 Ethics of Human Enhancement
  - PHIL 323 Organizational Ethics
  - PHIL 325 Ethics in Sports Management
  - PHIL 330 Criminal Justice Ethics
  - PHIL 335 Global Ethical Issues
  - PHIL 340 Environmental Ethics
- Select two of the following:
  - PHIL 341 Philosophy of the Environment
  - PHIL 351 Philosophy of Technology
  - PHIL 355 Philosophy of Medicine
  - PHIL 361 Philosophy of Science
  - PHIL 371 Philosophy of Social Sciences
  - PHIL 381 (WI) Philosophy in Literature
  - PHIL 385 Philosophy of Law
  - PHIL 391 Philosophy of Religion
  - PHIL 395 Advanced Topics in Logic

**Total Credits** 182.0

* Philosophy students are encouraged to choose the General Philosophy Concentration to complete the accelerated program, but may also opt for concentrations in Ethical Theory and Practice, Philosophy and Law, or Philosophy, Technology and Science.

Philosophy Faculty

Stacey Ake, PhD (Pennsylvania State University). Associate Teaching Professor. Ethics, semiotics, existentialism

Peter Amato, PhD (Fordham University) Director, Philosophy. Teaching Professor. Ethics, Marxism, Continental philosophy.

Jacques N. Catudal, PhD (Temple University). Associate Professor. Epistemology, aesthetics, philosophy of religion.

Nathan Hanna, PhD (Syracuse University). Assistant Professor. Ethics; philosophy of law; political philosophy.

Carol Mele, PhD (University of Pennsylvania). Associate Teaching Professor. Ethics, medical ethics, critical reasoning.

Flavia Padovani, PhD (University of Geneva). Assistant Professor. History and philosophy of science, philosophy of science, epistemology, logic.

Marilyn Gaye Piety, PhD (McGill University). Associate Professor. History of philosophy, philosophy of religion, critical reasoning, Kierkegaard.
Andrew Smith, PhD (SUNY, Stony Brook), Assistant Professor. Social and political philosophy, ethics, American philosophy.

Physics

Major: Physics
Degree Awarded: Bachelor of Science (BS)

Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 40.0801
Standard Occupational Classification (SOC) code: 19-120

About the Program

Drexel's undergraduate program provides a solid foundation in physics suitable for graduate study or to branch out into other scientific or technical disciplines. The physics program offers an innovative curriculum in a top-notch learning environment: small class sizes, personal input from faculty, and close interaction with researchers who are leaders in their fields. Students explore the span of universal phenomenon—from the farthest reaches of astrophysics and cosmology, to molecular biophysics and subatomic particle physics—providing a solid foundation for continued study and exploration. Most undergraduates actively participate in research projects, including co-authoring publications and presenting results at conferences.

Virtually every course in the physics major is designed to extend the students' ability to handle real-world problems solved by state-of-the-art techniques. An important feature of the program is the large number of electives, which allow a student to pursue topics of special interest. There are numerous elective courses in areas as diverse as biophysics and cosmology, nanoscience and particle physics. Students can also choose electives to meet teacher certification requirements.

The Laboratory for High-Performance Computational Physics is a venue for students to become proficient in numerical techniques, parallel processing, electronic communication, and the basic computer languages and software relevant to advanced studies and research in physics.

The Department of Physics (http://www.drexel.edu/coas/academics/departments-physics) conducts a broad array of outreach activities including the Kaczmarczik Lecture Series, public observing nights at the Lynch Observatory (http://www.physics.drexel.edu/observatory), and demonstrations in grade school performed by the Drexel Chapter of the Society of Physics Students (http://www.drexel.edu/coas/academics/departments-physics/student-organizations/society-physics-students) (SPS).

In addition to the physics major, the Department also offers a minor in physics as well as a minor in astrophysics (p. 146) and a minor in biophysics (p. 147).

Co-op/Career Opportunities

Students who complete a degree in physics have many options. Some enter graduate school with the intention of obtaining a master’s or a PhD. Others attend medical school. Engineering is yet another option, and graduates of an undergraduate physics program can enter this field with an unusually solid background in fundamental physical principles, mathematics, and computation. It is also possible for physics graduates to work in business and finance; for example, Wall Street employs many analysts trained in such “hard sciences” as physics. Many Drexel physics graduates proceed directly into graduate schools, or medical or other professional programs. Physics graduates have attended some of the best graduate programs in the United States, including Columbia, Harvard, and CalTech. Other graduates have found jobs in engineering and business, and with such government agencies as the National Bureau of Standards.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.
Minor in Physics

Physics is a science that studies the natural phenomena at all scales, from that of the universe to elementary particles. This minor exposes the students to some of the basic principles of physics and would easily complement any other discipline—from engineering to other sciences.

The minor in physics requires a total of 10.0 credits from the elective list in addition to the prerequisite and core courses.

Because of the overlap in requirements between the astrophysics minor (p. 146) and the physics minor, students cannot minor in both.

Electives

Select at least 10 credits from PHYS courses at the 300 level or above 10.0

* PHYS 101, PHYS 102 and PHYS 201 will also satisfy the prerequisite requirements.

Physics Faculty

Alexey Aprelev, PhD (St Petersburg State University). Assistant Teaching Professor. Experimental biophysics.

Shyamalendu Bose, PhD (University of Maryland). Professor. Nanoscience, high-temperature superconductivity, theory of surfaces and interfaces, disordered systems, electron and X-ray spectroscopies of solids.

Luis R. Cruz Cruz, PhD (MIT). Associate Professor. Computational studies of confinement effects on the folding of amyloidiogenic proteins, spatial correlations of neurons in the brain, firing dynamics of neuronal networks, fluid flow through porous media.

N. John DiNardo, PhD (University of Pennsylvania) Senior Vice Provost for Academic Affairs. Professor. Vibrational and electron dynamics at semiconductor surfaces and interfaces, metal-semiconductor interfaces, polymer surfaces and interfaces, diamond-like carbon thin films, and protein and cell interactions with biomaterials surfaces.

Michelle Dolinski, PhD (University of California, Berkeley). Assistant Professor. Neutrino physics, rare nuclear decays, cryogenic detector technologies.

Frank A. Ferrone, PhD (Princeton University). Professor. Experimental and theoretical protein dynamics, kinetics of biological self-assembly, including sickle cell and Alzheimer's disease, sickle cell testing and diagnostic devices.

Robert Gilmore, PhD (Massachusetts Institute of Technology). Professor. Applications of compact and non-compact Lie algebras for problems in nuclear, atomic, and molecular physics; nonlinear dynamics and chaos and the analysis of chaotic data.

David M. Goldberg, PhD (Princeton University) Associate Dean for Research and Graduate Education, Associate Department Head for Undergraduate Studies. Professor. Theoretical and computational cosmology, extragalactic astrophysics, gravitational lensing.

Maher Harb, PhD (University of Toronto). Assistant Professor. Solid state physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Goran Karapetrov, PhD (Oregon State University). Associate Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Rachael M. Kratzer, PhD (Drexel University). Assistant Teaching Professor. Quasars, active galactic nuclei.

Charles Lane, PhD (California Institute of Technology). Professor. Experimental tests of invariance principles and conservation laws, neutrino oscillations and properties.

Christina Love, PhD (Temple University). Assistant Teaching Professor. Educational methods and technology, STEM education, science literacy and outreach, particle physics, astrophysics.

Stephen L. W. McMillan, PhD (Harvard University) Department Head. Professor. Stellar dynamics, large-scale computations of stellar systems, and high-performance special-purpose computers.

Naoko Kurahashi Neilson, PhD (Stanford University). Assistant Professor. Neutrino physics, high energy astro-particle physics.

Russell Neilson, PhD (Stanford University). Assistant Professor. Dark matter, neutrino physics.

Gordon Richards, PhD (University of Chicago). Professor. Quasars, active galactic nuclei, supermassive black holes, galaxy evolution, sky surveys, infrared/X-ray/radio astronomy.

Jonathan E. Spanier, PhD (Columbia University) Associate Dean, Strategic Planning, College of Engineering. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Richard I Steinberg, PhD (Yale University). Professor. Neutrino physics.

Somdev Tyagi, PhD (Brigham Young University) Associate Head of Non-Major Studies in Physics. Professor. Nanobiophysics, Raman spectroscopy, magnetic materials.

Brigita Urbanc, PhD (University of Ljubljana, Slovenia). Associate Professor. Computational and experimental biophysics of protein folding and assembly, relevant to Alzheimer's and Parkinson's disease; discrete molecular dynamics of coarse-grained protein and lipid models.

Michel Vallières, PhD (University of Pennsylvania). Professor. Shell-model and mean field studies of nuclei on and off beta-stability, chaotic scattering, computational physics.
Michael Vogeley, PhD (Harvard University) Associate Department Head for Graduate Studies. Professor. Cosmology; galaxy formation and evolution; statistical analysis of large data sets; active galactic nuclei.

Jian-Min Yuan, PhD (University of Chicago). Professor. Protein folding, signal transduction pathways, computational biophysics, nonlinear dynamics and chaos in atomic and molecular systems, protein folding.

Emeritus Faculty

Leonard D. Cohen, PhD (University of Pennsylvania). Professor Emeritus.

Richard D. Haracz, PhD (Wayne State University). Professor Emeritus.

Frederick House, PhD (University of Wisconsin). Professor Emeritus.

Arthur P. Joblin, PhD (Drexel University). Professor Emeritus.

Donald C. Larson, PhD (Harvard University). Professor Emeritus.

Arthur E. Lord, PhD (Columbia University). Professor Emeritus.

James McCray, PhD (California Institute of Technology). Professor Emeritus.

Political Science

Major: Political Science

Degree Awarded: Bachelor of Arts (BA)

Calendar Type: Quarter

Total Credit Hours: 181.0

Co-op Options: One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 45.1001

Standard Occupational Classification (SOC) code: 19-3094

About the Program

The political science program in the Department of Politics (http://www.drexel.edu/coas/academics/departments-centers/politics) helps students cultivate perspective, develop critical thinking and communication skills, and understand the economic, social, and political systems within which we live and work. Our curriculum builds on the department’s research focuses and strengths. These include public policy, environmental politics, international organizations, human rights, and law and society. This flexible program allows students to shape a curriculum that meets their needs, whether they are preparing for public service, the business world, graduate school in political science, an MBA or other business program, or law school.

Degree Offered

The department offers a Bachelor of Arts (BA) in political science. Students may choose a substantive ‘track’ that best fits their needs and future goals. Our current tracks are: American Politics and Policy, International Politics, and Law and Politics.

The Bachelor of Arts (BA) provides a flexible course of study, which includes foreign language and allows for options in the fulfillment of humanities, social science, math, and science requirements.

**Accelerated BA in Political Science and MS in Science, Technology & Society**

**About the Program**

Drexel University permits undergraduate students to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time.

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree in Science, Technology & Society (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety) (two diplomas are awarded) in five years.

Students entering the program must:

- have and maintain a minimum of 3.0 grade point average throughout the program
- have no fewer than 90.0 earned credits
- have no more than 120.0 registered credits

The Department of Politics would especially like to encourage its own majors to consider the accelerated degree program in Science, Technology & Society. If you are currently enrolled in a 4+1 (4COP Accelerated Program) degree program, you are required to fill out the Accelerated Degree Level Conversion Form. After obtaining all the required signatures, please direct the form to the Assistant Director for Graduate Studies Office, Randell 240.

For more information about the accelerated BA/MS program, contact: STS Program Director Macalister Hall, 3025 215.895.2463

**Recommended Plan of Study**

Students should work closely with faculty advisors in the Science, Technology & Society program to schedule an individualized plan of study for their accelerated degree completion.

**Dual Bachelor's Degree & MSTS Degree**

**225.0 minimum credits**

### Co-Op/Career Opportunities

Political science majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many lucrative possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the “real” world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

### Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the Department's Masters Program in Science, Technology, and Society (http://drexel.edu/coas/academics/departments-centers/science-technology-society), an MBA or other business program, or law school.
Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Politics Faculty**

Phillip Ayoub, PhD *(Cornell University)*. Assistant Professor. International relations, comparative politics, transnational social movements, marginalized groups.

Scott Barclay, PhD *(Northwestern University)* Department Head. Politics. Professor. Judicial systems, civil rights, public policy and administration.

Zoltan Buzas, PhD *(Ohio State University)*. Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

George Ciccariello-Maher, PhD *(University of California, Berkeley)*. Associate Professor. Colonialism, social movements, political theory.

Rose Corrigan, PhD *(Rutgers University)*. Associate Professor. Women, public law, American politics and policy.

Richardson Dilworth, PhD *(Johns Hopkins University)* Director, Center for Public Policy. Professor. American political development, urban politics, public policy.

Erin R. Graham, PhD *(Ohio State University)*. Assistant Professor. International institutions, international relations theory, global environmental politics.

Amelia Hoover Green, PhD *(Yale University)*. Assistant Professor. Dynamics of conflict-related violence; intra-armed group politics and socialization; statistics in human rights.

Christian Hunold, PhD *(University of Pittsburgh)*. Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Alison Kenner, PhD *(Rensselaer Polytechnic Institute)*. Assistant Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities.

Julie Mostov, PhD *(New York University)* Vice Provost for Global Initiatives. Professor. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.

Joel E. Oestreich, PhD *(Brown University)* Director of the Global Studies major. Associate Professor. International organizations, international finance, development, and human rights.

Elva Orozco-Mendoza, PhD *(University of Massachusetts)*. Assistant Teaching Professor. Political freedom and action in the thought of Hanna Arendt; Feminist theory and feminist methodology; Protest politics; Theories of Violence; Identity politics; race, and gender in Latin American politics.

Gwen Ottinger, PhD *(University of California, Berkeley)*. Assistant Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Joshua Plencner, PhD *(University of Oregon)*. Assistant Teaching Professor. American politics, race and racism, visual politics, political theory.

William L. Rosenberg, PhD *(Temple University)*. Professor. Behavioral politics, public opinion, and political communication.

Chloe Silverman, PhD *(University of Pennsylvania)*. Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Jose Tapia, PhD *(New School for Social Research)*. Associate Professor. The crises and fluctuations of the economy and the relation between these fluctuations and health conditions; quantitative aspects of social science.

**Psychology**

Major: Psychology

*Degree Awarded: Bachelor of Science (BS)*

*Calendar Type: Quarter*

*Total Credit Hours: 183.0*

*Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: 42.0101*

*Standard Occupational Classification (SOC) code: 19-3031; 19-3032; 19-3039*

**About the Program**

Psychology seeks the answers to a broad variety of questions regarding the behavior, thoughts, and emotions of individuals. These questions range from the biochemical basis of memory and the effects of stress on health to understanding the causes of emotional problems or such experiences as falling in love. These questions are studied by using scientific research techniques both in the laboratory and the “real” world. The answers are applied in fields such as business, the health sciences, law, education, counseling, and the design of useful and usable technologies.

One strength of the psychology program at Drexel is its emphasis on psychological statistics and research methodology. Psychology majors are well trained in research data analysis and find employment opportunities in research and corporate settings more readily. One other opportunity available to Drexel psychology undergraduates is the cooperative education/internship programs, through which students mix periods of full-time, career-related employment with their academic studies. This allows students to have “hands on” experience in a variety of clinical settings throughout the Philadelphia metropolitan region, and makes them more competitive for employment after graduation.

**Combined Bachelors/Masters Degree**

There is an accelerated MS program entitled the Psychology BS/MS Scholars program to which undergraduates may apply. For more information, visit the Drexel University Department of Psychology (http://www.drexel.edu/coas/academics/departments-centers/psychology) homepage.

**Additional Information**

To schedule an appointment students should contact the Psychology department’s academic advisor: Tara McNair.
Degree Requirements

College Requirements

ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
COM 230 Techniques of Speaking 3.0

Select one of the following:

- MATH 101 Introduction to Analysis I
- MATH 102 Introduction to Analysis II
- MATH 121 Calculus I & MATH 122 Calculus II
- PSCI 100 Introduction to Political Science 4.0
- UNIV H101 The Drexel Experience 1.0
- CIVC 101 Introduction to Civic Engagement 1.0
- UNIV H201 Looking Forward: Academics and Careers 1.0
- Economics elective 4.0
- Fine Arts elective 3.0
- History electives 6.0
- Philosophy elective 3.0
- Sociology (SOC) course 3.0
- Anthropology (ANTH) course 3.0
- Two English (ENGL) courses, 200-level or above 6.0

Select one of the following sequences:

- Biology:
  - BIO 107 Cells, Genetics & Physiology
  - BIO 108 Cells, Genetics and Physiology Laboratory
  - BIO 109 Biological Diversity, Ecology & Evolution
  - BIO 110 Biological Diversity, Ecology and Evolution Laboratory
- Chemistry:
  - CHEM 111 General Chemistry I
  - CHEM 112 General Chemistry II
- Physics:
  - PHYS 103 General Physics I
  - PHYS 104 and General Physics II

Other Courses

- Free electives 51.0

Departmental Requirements

General Psychology Requirements

- PSY 111 Pre-Professional General Psychology I 3.0
- PSY 112 Pre-Professional General Psychology II 3.0

100-Level Requirements

Select two of the following:

- PSY 120 Developmental Psychology
- PSY 140 Approaches to Personality
- PSY 150 Introduction to Social Psychology

Required Psychology Courses

- PSY 212 Physiological Psychology 3.0
- PSY 325 Psychology of Learning 3.0
- PSY 240 [WI] Abnormal Psychology 3.0
- PSY 280 Psychological Research I 3.0
- PSY 264 Computer-Assisted Data Analysis I 3.0
- PSY 265 Computer-Assisted Data Analysis II 3.0
- PSY 290 History and Systems of Psychology 3.0
- PSY 330 Cognitive Psychology 3.0
- PSY 360 [WI] Experimental Psychology 3.0

PSY 380 Psychological Testing and Assessment 3.0

Advanced Psychology Electives (See Term Master Schedule for additional course offerings)

Select four of the following:

- PSY 210 Evolutionary Psychology
- PSY 213 Sensation and Perception
- PSY 222 Psychological Problems of Modern Youth
- PSY 225 Child Psychopathology
- PSY 242 Psychology of Disability
- PSY 244 Culture and Personality
- PSY 245 [WI] Sports Psychology
- PSY 250 [WI] Industrial Psychology
- PSY 252 Death and Dying
- PSY 254 Psychology of Sexual Behavior
- PSY 305 Science and Pseudoscience in Psychology
- PSY 310 Drugs & Human Behavior
- PSY 322 Advanced Developmental Psychology
- PSY 332 Human Factors and Cognitive Engineering
- PSY 336 Psychology of Language
- PSY 337 Human-Computer Interaction
- PSY 342 Counseling Psychology
- PSY 345 Narrative Psychology
- PSY 350 Advanced Social Psychology
- PSY 352 Environmental Psychology
- PSY 355 Health Psychology
- PSY 356 Women's Health Psychology
- PSY 357 The Psychology of Eating Disorders and Obesity
- PSY 370 Forensic Psychology
- PSY 371 Law and Psychology
- PSY 410 Neuropsychology
- PSY 450 Autism Spectrum Disorders
- PSY 463 Memory

Senior Seminar Sequence OR Psychology Electives **

- PSY 490 [WI] Psychology Senior Thesis I 4.0
- PSY 491 [WI] Psychology Senior Thesis II 4.0
- PSY 492 [WI] Psychology Senior Thesis III 4.0

Total Credits 180.0

* Students with AP psychology, or transfer students with PSY 101 credit, should check the AP Student Placement Exam Crosswalk (http://www.drexel.edu/provost/policies/pdf/supporting/ap_crosswalk.pdf) or check with their advisor.

** Students who do not wish to elect the research seminar sequence are required to take four additional advanced psychology electives instead.

Total Credit: 180.0

* See degree requirements (p. 137).

Co-op/Career Opportunities

Some graduates seek employment immediately after receiving their bachelor’s degrees. They are well trained to work as research assistants in consulting firms and medical settings or to provide front-line services in mental health and educational settings. Other graduates go on to professional schools in law, business, medicine, and other health professions. Still others pursue graduate training in psychology and related fields. Students build skills and knowledge that provide a foundation for advanced study, create opportunities for future growth, and can be used to improve the quality of life for others.

Co-Op Experiences

Drexel University has long been known for its co-operative education programs, through which students mix periods of full-time, career-related employment with their studies. Co-op/internship employment is an option for psychology majors. Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Psychology

The minor in psychology is intended to meet the needs of students who recognize that an understanding and analysis of individual psychological processes is an important component of their education. The minor may also be of interest to students who have an interest in a double major but are unable to satisfy all of the requirements in two major fields.

Entry into the minor requires that PSY 101 General Psychology (or an equivalent introductory course) be taken as a prerequisite. Students who have completed and who are interested in a minor in Psychology are expected to meet with a Psychology Department faculty member to discuss the selection of courses appropriate to their major and their own personal interests. No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

Required Prerequisite

PSY 101 General Psychology I (or equivalent)

Required Courses

Select eight of the following: 24.0

PSY 120 Developmental Psychology

PSY 140 Approaches to Personality
interventions for health behavior change (for problems of obesity and cardiac disease) as well as mood and anxiety disorders; neurocognition of eating.

Jennifer Gallo, PhD (Drexel University) Director, Neuropsychology Concentration. Associate Teaching Professor. Neuropsychology of aging and dementia; neurocognitive correlates of goal-directed activities; behavioral and psychological symptoms associated with dementia

Pamela Geller, PhD (Kent State University). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Maureen Gibney, PsyD (Widener University). Associate Teaching Professor. Clinical psychopathology; neuropsychological evaluation and intervention with the elderly.

Naomi Goldstein, PhD (University of Massachusetts) Co-Director of the JD-PhD Program; Stoneleigh Foundation Fellow. Associate Professor. Forensic psychology; juvenile justice; Miranda rights comprehension; false confessions; juvenile justice treatment outcome research; anger management intervention development; child and adolescent behavior problems.

Kirk Heilbrun, PhD (University of Texas at Austin) Interim Department Head. Professor. Forensic psychology, juvenile and adult criminality, violence risk assessment, forensic psychological assessment, treatment of mentally disordered offenders, academic-sports mentoring.

James D. Herbert, PhD (University of North Carolina) Dean, Graduate College; Executive Vice Provost. Professor. Assessment and treatment of anxiety disorders; acceptance and mindfulness-based psychotherapies; the role of empiricism in clinical psychology; evidence-based practice in behavioral health.

Adrienne Juara Socio, PhD (Drexel University). Assistant Research Professor. Enhancing treatment outcomes for eating disorders and obesity; Acceptance-based behavioral treatments; Evaluating mechanisms of action in behavioral treatments

Marlin Killen, PhD (Trident University International) Faculty Coordinator of ePsychology; Online Learning Council Fellow. Associate Teaching Professor. Authentic teaching methods in Psychology as well as student persistence behavior.

John Kounios, PhD (University of Michigan) Director, PhD Program in Applied Cognitive and Brain Sciences. Professor. Cognitive neuroscience, especially creativity, problem solving, and cognitive enhancement.

Michael Lowe, PhD (Boston College). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Dan Mirman, PhD (Carnegie Mellon University). Assistant Professor. Recognition, comprehension, and production of spoken words; organization and processing of semantic knowledge; computational models of brain and behavior; statistical methods for analysis of time course data

Arthur Nezu, PhD, DLLL, ABPP (State University of New York at Stony Brook). Distinguished Professor. Behavioral medicine applications of problem-solving therapy and other cognitive-behavior therapies (e.g., to decrease emotional and psychosocial risk factors; improve

---

### Psychology Faculty

Cathy Bolton, PhD (Drexel University). Assistant Teaching Professor. Program Evaluation in healthcare, supportive housing, and government-based social services; Design of performance metrics for quality assessment and clinical outcomes; Implementing Systems and Change Leadership to sustain Compliance with Regulatory Bodies.

Meghan Butryn, PhD (Drexel University). Associate Research Professor. Treatment and prevention of obesity and eating disorders, behavioral treatment, acceptance and commitment therapy.

Dorothy Charbonnier, PhD (SUNY Stony Brook). Assistant Teaching Professor. The nature of the creative process and writing.

Douglas L. Chute, PhD (University of Missouri) Louis and Bessie Stein Fellow; Faculty coordinator of ePsychology. Professor. Neuropsychology and rehabilitation; technological applications for the cognitively compromised and those with acquired brain injuries.

Brian Daly, PhD (Loyola University, Chicago) Director, Practicum Training. Assistant Professor. Pediatric neuropsychology, intervention with at-risk youth.

Paige Davis, PhD (Durham University, England). Assistant Teaching Professor. The development of imagination in children; private speech; theory of mind and executive functioning; mental state commentary and mind minded parenting; audio verbal hallucinations.

David DeMatteo, PhD, JD (MCP Hahnemann University; Villanova University School of Law) Director of the JD-PhD Program in Law and Psychology. Associate Professor. Psychopathy, forensic mental health assessment, drug policy; offender diversion.

Evan M. Forman, PhD (University of Rochester) Director of Graduate Studies. Professor. Clinical psychology: mechanisms and measurement of psychotherapy outcome, cognitive-behavioral and acceptance based psychotherapies, the development and evaluation of acceptance-based
adherence), particularly with regard to patients with cardiovascular disease; assessment.

Christine Maguth Nezu, PhD (Fairleigh Dickinson University). Professor. Cognitive-behavioral assessment and treatment for mood, anxiety, personality disorders, and coping with chronic illness; mind/body studies; stress and coping; developmental disabilities and comorbid behavioral and emotional disorders; spirituality and psychology.

Karol Osipowicz, PhD (Thomas Jefferson University) Assistant Director of Undergraduate Studies. Assistant Teaching Professor. The application of advanced neuroimaging to the study of human brain function and anatomy.

Nancy Raitano Lee, PhD (University of Denver). Assistant Professor. Neuropsychological and neuroanatomic correlates of intellectual and developmental disabilities; Verbal memory and language difficulties in Down syndrome and other genetic disorders; Comorbid autism spectrum disorder symptoms in youth with genetic disorders; Neuroanatomic correlates of individual differences in typical and atypical cognition.

Ludo Scheffer, PhD (University of Pennsylvania) Director of Undergraduate Studies; Chair Senate Committee on Academic Affairs. Teaching Professor. Meta-cognitive development, writing, and computers; Language and literacy development in the early years in the context of family and schooling; Youth-at-risk; School violence and bullying; Program/intervention effectiveness.

Maria Schultheis, PhD (Drexel University) Director of Clinical Training. Associate Professor. Clinical Neuropsychology and rehabilitation following neurological compromise (brain injury, stroke, multiple sclerosis), application of technologies in psychology. Specialization in the use of virtual reality (VR) simulation, and evaluation of the demands of driving after disability.

Jennifer Schwartz, PhD (Idaho State University) Director of Psychological Services Center. Associate Teaching Professor. Adult psychopathology; evidence-based clinical practice; competency-based training; competency-based clinical supervision.

Chris Sims, PhD (Rensselaer Polytechnic Institute). Assistant Professor. Learning and decision-making under uncertainty; visual memory and perceptual expertise; sensorimotor control and motor learning; computational models of cognition.

Julia Sluzenski, PhD (Temple University). Assistant Teaching Professor. Spatial and episodic memory, memory loss across the lifespan, developmental psychology.

Mary Spiers, PhD (University of Alabama at Birmingham) Director MS and BS/MS Programs. Associate Professor. Clinical neuropsychology and medical psychology; memory and practical applications for memory disorders in the elderly; cognitive health of women.

J. Michael Williams, PhD (University of Vermont). Associate Professor. Memory disorder; traumatic brain injury; auditory neglect; neuropsychological assessment; recovery and rehabilitation of brain function; functional magnetic resonance imaging.

Fengqing (Zoe) Zhang, PhD (Northwestern University). Assistant Professor. Neuroimaging data analysis; Data mining; Bayesian inference; High dimensional data analysis.

Eric A Zillmer, PsyD (Florida Institute of Technology) Carl R. Pacilco Professor of Neuropsychology and the Director of Athletics. Professor. Psychological assessment (neuropsychological, cognitive, personality), psychiatric and neurological disorders, behavioral medicine, neurogerontology, mathematical modeling, sports psychology, psychology of genocide.

Emeritus Faculty

Donald Bershoff, JD, PhD (Yale University, New York University). Professor Emeritus. Law and psychology; mental health law.

Thomas T. Hewett, PhD (University of Illinois at Urbana-Champaign). Professor Emeritus. Human computer interaction and cognitive engineering; development of computing environments to support knowledge, workers, and high performance experts.

Sociology

Major: Sociology
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.1101
Standard Occupational Classification (SOC) code: 19-3041

About the Program

The sociology major at Drexel University has three components: theory, methods, substantive coursework and features specialized coursework relating to social justice issues.

Sociology is the systematic study of societies. Society is the sum total of individual and group interaction and relations, from small groups and families to global networks and complex social organizations. The discipline covers a wide variety of fields of inquiry. Sociologists examine structural relations—how human society is organized from small groups to large institutions—and is committed to developing a critical understanding of these relationships. Thus the sociology major stresses theory, research methods, quantitative and qualitative data analysis as applied to a wide variety of substantive areas including but not limited to social inequality, political power, gender, class, race, ethnicity, family, crime, technology and environmental change as well as a wide variety of social and political movements connected with social change. The stress on critical understanding means that sociology majors will strive not only to develop strong analytic abilities but an intellectual and ethical engagement reflected in sociologically informed thinking and action. The research and analytical skills developed in our program are sought after by a wide variety of professions.

Specialized social justice coursework is typically carried out in connection with community groups and organizations. It is a way through which the Sociology Program and Drexel University as a whole seeks to become
practically engaged with the wider community while promoting social justice.

For more information about the sociology major, visit the Department of Sociology (http://www.drexel.edu/coas/academics/departments-centers/sociology) web page.

Co-op/Career Opportunities

An undergraduate degree in sociology is excellent preparation for law school, medical school, or for graduate work in such fields as sociology, history, gerontology, or political science.

Outside of academics, sociologists work in a wide variety of settings. Some serve as statistical analysts for market research firms, health care agencies, and government. Others are involved in urban planning, survey research, public relations, agency management, trend analysis, or criminal justice. There are sociologists of religion working for national church organizations, and sociologists specializing in gerontology who are engaged in research or administration for agencies concerned with the aged.

Co-op Experiences

Some recent co-op positions held by sociology students include the following:

- Research Coordinator, West Philadelphia Community Center
- Counselor, Camden Youth Program
- Research Analyst, Philadelphia Stock Exchange
- Case Investigator, Howard County Police Department
- Assistant Copy Editor, Philadelphia Newspapers, Inc.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Sociology

The sociology minor is designed to give students specializing in other fields a broader knowledge of contemporary social issues and the ability to analyze them in a reasoned fashion. For students majoring in such fields as business and engineering, the minor helps develop skills in critical thinking that go beyond the acquisition of specialized, professional techniques. For students majoring in another area of the liberal arts, the minor offers the opportunity to place the issues raised in the major discipline within a larger social context.

Please note: No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

Required Courses

- SOC 355 [WI] Classical Social Theory 4.0  
  or SOC 356 Contemporary Social Theory  
Select five of the following: 20.0

SOC 115 Social Problems  
SOC 210 Race, Ethnicity and Social Inequality  
SOC 215 Sociology of Work  
SOC 220 Wealth and Power  
SOC 221 Sociology of the Family  
SOC 222 Sex and Society  
SOC 230 Gender and Society  
SOC 235 Sociology of Health and Illness  
SOC 240 Urban Sociology  
SOC 245 Sociology of the Future  
SOC 250 Research Methods I  
SOC 255 Sociology of Sport  
SOC 268 Sociology of Aging  
SOC 269 Global Climate Change  
SOC 310 Topics in Political Sociology  
SOC 312 Topics in Sociology of Science and Technology  
SOC 315 HIV/AIDS and Africa  
SOC 320 Sociology of Deviant Behavior  
SOC 326 Cities and Sustainability  
SOC 330 Development and Underdevelopment in the Global South  
SOC 340 Globalization  
SOC 341 Environmental Movements in America  
SOC 345 Sociology of the Environment  
SOC 346 Environmental Justice  
SOC 347 Introduction to Environmental Policy Analysis  
SOC 349 Sociology of Disasters  
SOC 350 Research Methods II  
SOC 370 Practicum in Applied and Community Sociology  
SOC 430 Politics of Life  
SOC 444 Social Movements
Prospective students for the MS in STS see this educational opportunity as a crucial factor in their skill development and career advancement. They are recent college graduates in the social sciences, humanities, natural sciences, and engineering; middle and high school teachers; and professionals in businesses, city and state government offices, and area hospitals. Students can attend full time or part time and complete all coursework in the evening.

Sociology Faculty

Susan Bell, PhD (Brandeis University) Department Head, Sociology.
Professor. The interaction between patient cultures and embodied health movements; changing culture and structure of biomedicine; the experience of illness, women’s health, and narrative representations of the politics of cancer, medicine, and women’s bodies.

Robert J. Brulle, PhD (George Washington University). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Mary Ebeling, PhD (University of Surrey) Director, Women’s and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Julia Hall, PhD (University of Pennsylvania). Professor. Criminal justice and juvenile justice reform, including community based alternatives to incarceration, correctional education and programming, reentry and reintegration, restorative justice, and issues relating to special needs offenders, including the el

Kelly Joyce, PhD (Boston College) Director, Master’s Program in Science Technology & Society. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Emmanuel F. Koku, PhD (University of Toronto). Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

Diamantino Machado, PhD (Temple University). Teaching Professor. Globalization, political economy, political sociology, philosophy of social science, postmodernism and social reflection.

Elizabeth McGhee Hassrick, PhD (University of Chicago). Assistant Research Professor. Social network interventions that promote positive outcomes for people with ASD, their families and communities

Kevin Mobey, PhD (University of California-San Diego). Assistant Teaching Professor. The social and cultural studies of biomedicine/health, particularly as those domains intersect with and through the institutions of race/sexuality/gender, social movements/community advocacy, HIV/AIDS, racial health disparities, science and technological studies, and Black Studies

David Ridgway, MS (St. Joseph’s University) Faculty fellow of the Sigma Phi Epsilon fraternity. Instructor. The correlations between poverty and public welfare, especially theories of the perpetuation of poverty; Sociology of crime; police practices and police procedure

Mimi Sheller, PhD (New School for Social Research) Director, Center for Mobilities Research and Policy. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Diane Scitote, PhD (Arizona State University). Associate Professor. Sociology of environmental injustice; inequalities in the citing of environmental hazards; community-based research in neighborhoods dealing with industrial hazards; sociology of the environment; urban sociology; social inequalities.
Minor in Africana Studies

The minor in Africana studies was created to provide the opportunity for undergraduate students throughout the University to gain an understanding of and background in the history and cultures of peoples of African descent in North and South America, the Caribbean, and Africa. This interdisciplinary minor includes courses in anthropology, history, literature, music, political science, and sociology, and provides an opportunity for directed study in areas of particular interest to the students. The Africana studies minor has intrinsic intellectual value and helps prepare individuals to become contributors to an increasingly pluralistic society. At the same time, this minor allows students interested in business, the sciences, engineering, government, and social services to present to prospective employers a unique academic background.

Total Credits 24.0

* Students take an additional 18.0 credits including but not limited to the following courses. (Students must check with the Program Director for approval prior to making substitutions.)
** With a focus on the Caribbean, Latin America or the Diaspora.
*** With a focus on race or the Diaspora.

Minor in Arabic

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Arabic minor requires 24 credits of language study above Arabic 103. Students can choose from the following courses.

Minor in Astrophysics

Astrophysics brings together many disparate areas of physics—gravitational physics govern the evolution of galaxies and clusters, nuclear physics dominates the cores of stars, electromagnetism governs the radiation that we use to observe these objects. Students majoring in mathematics and computer science, as well as other disciplines, are often fascinated by the questions raised by astrophysics.

Because of the overlap in requirements between the astrophysics minor and the physics minor, (p. 131) students cannot minor in both.

Admission requirements: Consultation with the Physics Department.

Total Credits 24.0

Minor in Bioinformatics

The bioinformatics minor examines the application of computer technology and programming to biological fields such as genomics or proteomics. This multidisciplinary program is designed for students majoring in biomedical engineering, biological sciences, computer science, information systems, or mathematics. Combination with other majors is possible through consultation with the program director.

The minor is divided among courses in biology, programming and computation, human-computer interface design, databases, and statistics.

Students must complete a minimum of 24 credits of coursework as follows:

Core Courses

Minor in Biophysics

About the Program

Biophysics is the study of the complexity of life using tools provided by physics. It attempts to construct mathematical frameworks that explain among many other topics, how organisms obtain energy from the environment, how complex structures appear in the cell and how these relate to function. In essence, biophysics looks for principles that describe observed patterns and propose predictions based on these principles.

Admissions Requirements

Consultation and approval of the program director and completion of one of the prerequisite sequences. Students who have completed the PHYS 152, PHYS 153, PHYS 154 sequence will also be accepted into the minor provided they have an A- average in those courses and have completed MATH 121 and MATH 122.

Minor in Bioscience and Society

About the Program

Designed for non-majors, the minor in bioscience and society is accessible to all students with an interest in biology. The minor includes a list of topical courses from which students can choose freely depending upon interest.

Required Courses

Select one of the following options: 

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Minor in Biophysics

About the Program

Biophysics is the study of the complexity of life using tools provided by physics. It attempts to construct mathematical frameworks that explain among many other topics, how organisms obtain energy from the environment, how complex structures appear in the cell and how these relate to function. In essence, biophysics looks for principles that describe observed patterns and propose predictions based on these principles.

Admissions Requirements

Consultation and approval of the program director and completion of one of the prerequisite sequences. Students who have completed the PHYS 152, PHYS 153, PHYS 154 sequence will also be accepted into the minor provided they have an A- average in those courses and have completed MATH 121 and MATH 122.

Minor in Chinese

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Chinese minor requires 24.0 credits of language study above Chinese 105. Students can choose from the following course options.

Courses

CHIN 101 Chinese I 4.0 Credits
Introductory Mandarin Chinese. Includes listening, speaking, and reading, with individual audiolingual practice. Offered all terms.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHIN 102 Chinese II 4.0 Credits
Continues CHIN 101. Offered all terms.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 101 [Min Grade: C]

CHIN 103 Chinese III 4.0 Credits
Continues CHIN 102. Offered all terms.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 102 [Min Grade: C]

CHIN 104 Chinese Speaking, Level II (Pinyin Only Track Option) 4.0 Credits
Chinese Speaking, Level II (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. In this class, more emphasis will be given to the training of standard pronunciation and listening comprehension as well as some basic grammar and vocabulary usage. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 101 [Min Grade: C]

CHIN 105 Chinese Speaking, Level III (Pinyin Only Track Option) 4.0 Credits
Chinese Speaking, Level III (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language. This course is specifically designed for spoken language acquisition. Students who take Chinese Speaking, Level III will not be able to continue on to Chinese 201.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 104 [Min Grade: C]

CHIN 201 Chinese IV 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 103.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 103 [Min Grade: C]

CHIN 202 Chinese V 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 201.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 201 [Min Grade: C]

CHIN 203 Chinese VI 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 202.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 202 [Min Grade: C]
CHIN 301 Chinese VII 3.0 Credits
Advanced Chinese. Includes reading, writing, and extensive conversational practice. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 203 [Min Grade: C]

CHIN 302 Chinese VIII 3.0 Credits
Continues CHIN 301. Covers techniques of translation and communication. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 301 [Min Grade: C]

CHIN 303 Chinese IX 3.0 Credits
Continues CHIN 302. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 302 [Min Grade: C]

CHIN 411 Introduction to Chinese Stylistics 3.0 Credits
Fourth year of Chinese. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 431 Introduction to Chinese Literature 3.0 Credits
Provides intensive reading, writing, and conversational practice in Chinese, based on selected texts in Chinese literature. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 451 Introduction to Business and Professional Chinese 3.0 Credits
Fourth year of Chinese. Provides intensive oral practice and written work in business, professional, and commercial Chinese. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 480 Chinese Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHIN I299 Independent Study in CHIN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN I399 Independent Study in CHIN 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN I499 Independent Study in CHIN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T180 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T280 Special Topics in Chinese 12.0 Credits
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T380 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T480 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Minor in Computer Crime
Computers have created new opportunities for crime and have affected the requisite capacity to commit criminal acts. The minor in computer crime provides students with an overview of the behavioral, legal, technical, and administrative issues faced by the criminal justice system and security communities in addressing crime involving computers and related networking technologies. The curriculum exposes students to state-of-the-art solutions used within the public and private sectors to respond to and prevent computer crime

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with cultural contexts. Minor in Ecology

The minor in ecology meets the needs of engineering, science, arts, applied arts, information, and business students interested in environmental science. Prior to taking ENVS 230 General Ecology, students are minimally expected to have had one term to a year of both general biology and general chemistry.

Required Courses
- ENVS 212 Evolution 4.0
- ENVS 230 General Ecology 3.0
- ENVS 260 Environmental Science and Society 3.0
- ENVS 284 Physiological and Population Ecology 3.0
- ENVS 286 Community and Ecosystem Ecology 3.0
- ENVS 328 Conservation Biology 3.0
- Environmental Science elective 3.0
- Field Course 4.0

Choose one of:
- ENVS 382 Field Botany of the New Jersey Pine Barrens
- ENVS 383 Ecology of the New Jersey Pine Barrens
- ENVS 388 Marine Field Methods

Total Credits 26.0

Minor in French

About the Program
In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The French minor requires a minimum of 24 credits above French 103, including at least 12 credits above French 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.

Courses
- FREN 101 French I 4.0 Credits
  Introductory French. Includes listening, speaking, reading, and writing. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
- FREN 102 French II 4.0 Credits
  Continues FREN 101. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 101 [Min Grade: C]
- FREN 103 French III 4.0 Credits
  Continues FREN 102. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 102 [Min Grade: C]
- FREN 201 French IV 4.0 Credits
  Intermediate French. Includes grammar review, listening, speaking, and reading, with individual audiolingual practice. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 103 [Min Grade: C]
- FREN 202 French V 4.0 Credits
  Continues FREN 201. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 201 [Min Grade: C]
- FREN 203 French VI: Conversations & Composition 4.0 Credits
  Provides intensive practice in comprehension and written and oral communication. Emphasizes development of writing skills and increased oral competence in everyday situations. Offered all terms.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 202 [Min Grade: C]
- FREN 310 Advanced Writing and Speaking 4.0 Credits
  French 310 provides advanced practice in written and oral communication, including journalistic, professional, and creative writing. Examines contemporary cultural contexts through media and news. Taught in French.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 202 [Min Grade: C]
- FREN 311 [WI] Introduction to French Stylistics 3.0 Credits
  Provides advanced practice in comprehension and written and oral communication, based primarily on periodicals and contemporary media. Offered every term. This is a writing intensive course.
  College/Department: College of Arts and Sciences
  Repeat Status: Not repeatable for credit
  Prerequisites: FREN 203 [Min Grade: C]
FREN 312 [WI] French Stylistics 3.0 Credits
Continues FREN 311. Provides extensive study of the techniques of translation and communication. Offered all terms. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: FREN 311 [Min Grade: C]

FREN 313 [WI] Advanced French Stylistics 3.0 Credits
Continues FREN 312. Provides advanced training in oral and written communication in French. Particularly recommended for students who have pre-proficiency status, French minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: FREN 312 [Min Grade: C]

FREN 320 Introduction to Language for the Professions 3.0 Credits
This course provides an introduction to communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C]

FREN 330 Introduction to Identities and Communities 3.0 Credits
This course provides an introduction to the analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C]

FREN 331 Introduction to Studies in French Literature 3.0 Credits
Advanced French. Reading, writing, and extensive conversational practice, based on masterpieces of French literature.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 332 Studies in French Literature 3.0 Credits
Includes reading and oral and written analysis of representative texts in French literature, including familiarization with the historical and cultural contexts. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 333 Advanced French Literature 3.0 Credits
Continues FREN 332. Provides advanced study of French literature. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 340 Introduction to Power and Resistance 3.0 Credits
This course provides an introduction to the analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C]

FREN 350 Introduction to Language, Media, and Society 3.0 Credits
This course provides an introduction to the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C]

FREN 351 Introduction to Business and Professional French 3.0 Credits
Provides intensive oral practice and written work in business, professional, and commercial French. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 352 Business and Professional French 3.0 Credits
Advanced Business and Professional French. Advanced practice in oral and written French for business and the professions. Based on advanced texts, periodicals, and technical journals.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 353 Advanced Business and Professional French 0.5-20.0 Credits
Provides advanced study in business and professional terminology, with emphasis on the structure and protocols of the business world. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 160 credits
Prerequisites: FREN 312 [Min Grade: C]

FREN 371 Special Studies in French Civilization and Culture 3.0 Credits
Presents an integrated approach in French to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 312 [Min Grade: C]
FREN 410 Advanced Grammar and Translation 3.0 Credits
This course provides advanced grammar instruction and fosters translation and communication skills within a contemporary cultural context. The content of this course may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

FREN 411 [WI] Special Studies in Advanced French Stylistics 3.0 Credits
Particularly recommended for students who have proficiency status, French minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FREN 312 [Min Grade: C]

FREN 420 Advanced Studies in Language for the Professions 3.0 Credits
French 420 provides an advanced communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of FREN 420 may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

FREN 430 Advanced Studies in Identities and Communities 3.0 Credits
French 430 provides an advanced analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of FREN 430 may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

FREN 431 [WI] Special Studies in Advanced French Literature 3.0 Credits
Particularly recommended for students who have proficiency status, French minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FREN 312 [Min Grade: C]

FREN 440 Advanced Studies in Power and Resistance 3.0 Credits
French 440 provides an advanced analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of FREN 440 may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

FREN 450 Advanced Studies in Language, Media, and Society 3.0 Credits
French 450 provides an advanced analysis of the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of FREN 450 may change every term it is offered and is repeatable for credit. Taught in French.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: FREN 310 [Min Grade: C] and (FREN 320 [Min Grade: C] or FREN 330 [Min Grade: C] or FREN 340 [Min Grade: C] or FREN 350 [Min Grade: C])

FREN 451 Special Studies in Advanced Business and Professional French 3.0 Credits
Continues FREN 353, with emphasis on the structure and protocols of the European Union. Particularly recommended for students who have proficiency status, French minors, and students interested in graduate study and/or international careers. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FREN 312 [Min Grade: D]

FREN 471 [WI] Special Studies in French Civilization 3.0 Credits
Presents an integrated approach, at the advanced level, to the civilization, culture, history, and literature of a given period specific to the areas in which French is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FREN 312 [Min Grade: C]

FREN 480 French Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

FREN 1199 Independent Study in FREN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
FREN I299 Independent Study in FREN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN I399 Independent Study in FREN 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN I499 Independent Study in FREN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN T180 Special Topics in French 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN T280 Special Topics in French 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN T380 Special Topics in French 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

FREN T480 Special Topics in French 0.5-12.0 Credits
Recommended for French minors and for students with proficiency status. Offered all terms. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 96 credits

Minor in German

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

Courses

GER 101 German I 4.0 Credits
Introductory German. Includes listening, reading, writing, and speaking. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

GER 102 German II 4.0 Credits
Continues GER 101. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 101 [Min Grade: C]

GER 103 German III 4.0 Credits
Continues GER 102. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 102 [Min Grade: C]

GER 201 German IV 4.0 Credits
Intermediate German. Includes grammar review, listening, speaking, and reading. Recommended for students who wish to attain oral competence. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 103 [Min Grade: C]

GER 202 German V 4.0 Credits
Continues GER 201. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 201 [Min Grade: C]

GER 203 German VI: Conversation & Composition 4.0 Credits
Provides intensive practice in comprehension and written and oral communication. Emphasizes development of writing skills and increased oral competence in everyday situations. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 202 [Min Grade: C]

GER 310 Advanced Writing and Speaking 4.0 Credits
This course provides advanced practice in written and oral communication, including journalistic, professional, and creative writing. Examines contemporary cultural contexts through media and news. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: GER 202 [Min Grade: C]

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The German minor requires a minimum of 24 credits above German 103, including at least 12 credits above German 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.

GER 311 [WI] Introduction to German Stylistics 3.0 Credits
Provides advanced practice in comprehension and written and oral communication, based primarily on periodicals and contemporary media. Offered as needed. This is a writing intensive course.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** GER 203 [Min Grade: C]

GER 312 [WI] German Stylistics 3.0 Credits
Continues GER 311. Provides extensive study of the techniques of translation and communication. Offered as needed. This is a writing intensive course.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** GER 311 [Min Grade: C]

GER 313 [WI] Advanced German Stylistics 3.0 Credits
Continues GER 312. Provides advanced training in oral and written communication in German. Particularly recommended for students who have pre-proficiency status, German minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** GER 312 [Min Grade: C]

GER 320 Introduction to Language for the Professions 3.0 Credits
This course provides an introduction to communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. Taught in German.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 27 credits

GER 330 Introduction to Identities and Communities 3.0 Credits
This course provides an introduction to the analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 27 credits
**Prerequisites:** GER 310 [Min Grade: C]

GER 331 Introduction to Studies in German Literature 3.0 Credits
Advanced German. Reading, writing, and extensive conversational practice, based on masterpieces of German literature.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 332 Studies in German Literature 3.0 Credits
Includes reading and oral and written analysis of representative texts in German literature, including familiarization with the historical and cultural contexts. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 333 Advanced German Literature 3.0 Credits
Continues GER 332. Provides advanced study of German literature. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 340 Introduction to Power and Resistance 3.0 Credits
This course provides an introduction to the analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 27 credits
**Prerequisites:** GER 310 [Min Grade: C]

GER 350 Introduction to Language, Media, and Society 3.0 Credits
This course provides an introduction to the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 27 credits
**Prerequisites:** GER 310 [Min Grade: C]

GER 351 Introduction to Business and Professional German 3.0 Credits
Provides intensive oral practice and written work in business, professional, and commercial German. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 352 Business and Professional German 3.0 Credits
Advanced business and professional German. Advanced practice in oral and written German for business and the professions. Based on advanced texts, periodicals, and technical journals.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 353 Advanced Business and Professional German 3.0 Credits
Provides advanced study in business and professional terminology, with emphasis on the structure and protocols of the business world. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]

GER 354 Special Studies in German Civilization & Culture 3.0 Credits
Presents an integrated approach in German to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 8 times for 24 credits
**Prerequisites:** GER 312 [Min Grade: C]
GER 410 Advanced Grammar and Translation 3.0 Credits
German 410 provides advanced grammar instruction and fosters translation and communication skills within a contemporary cultural context. The content of GER 410 may change every term it is offered and is repeatable for credit. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: GER 310 [Min Grade: C] and (GER 320 [Min Grade: C] or GER 330 [Min Grade: C] or GER 340 [Min Grade: C] or GER 350 [Min Grade: C])

GER 411 [WI] Special Studies in Advanced German Stylistics 3.0 Credits
Continues GER 313. Particularly recommended for students who have proficiency status, German minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: GER 312 [Min Grade: C]

GER 420 Advanced Studies in Language for the Professions 3.0 Credits
This course provides advanced communication skills in areas such as contemporary business, health, and law in a culturally sensitive fashion. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: GER 310 [Min Grade: C] and (GER 320 [Min Grade: C] or GER 330 [Min Grade: C] or GER 340 [Min Grade: C] or GER 350 [Min Grade: C])

GER 430 Advanced Studies in Identities and Communities 3.0 Credits
This course provides an advanced analysis of individual and collective identities, including issues of gender, sexual orientation, race, ethnicity, class, nationality, and religion. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: GER 310 [Min Grade: C] and (GER 320 [Min Grade: C] or GER 330 [Min Grade: C] or GER 340 [Min Grade: C] or GER 350 [Min Grade: C])

GER 431 [WI] Special Studies in Advanced German Literature 3.0 Credits
Continues GER 333. Particularly recommended for students who have proficiency status, German minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: GER 312 [Min Grade: C]

GER 440 Advanced Studies in Power and Resistance 3.0 Credits
This course provides an advanced analysis of power relations and issues of (in)equality rooted in contemporary political and socio-economic systems. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: GER 310 [Min Grade: C] and (GER 320 [Min Grade: C] or GER 330 [Min Grade: C] or GER 340 [Min Grade: C] or GER 350 [Min Grade: C])

GER 450 Advanced Studies in Language, Media, and Society 3.0 Credits
This course provides an advanced analysis of the role of language and media in society, including sociolinguistics, gender, media studies, and communication. The content of this course may change every term it is offered and is repeatable for credit. Taught in German.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 27 credits
Prerequisites: GER 310 [Min Grade: C] and (GER 320 [Min Grade: C] or GER 330 [Min Grade: C] or GER 340 [Min Grade: C] or GER 350 [Min Grade: C])

GER 451 Special Studies in Advanced Business and Professional German 3.0 Credits
Continues GER 353, with emphasis on the structure and protocols of the European Union. Particularly recommended for students who have proficiency status, German minors, and students interested in graduate study and/or international careers. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: GER 312 [Min Grade: C]

GER 471 [WI] Special Studies in German Civilization 3.0 Credits
Presents an integrated approach, at the advanced level, to the civilization, culture, history, and literature of a given period specific to the areas in which German is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: GER 312 [Min Grade: C]

GER 480 German Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

GER 1199 Independent Study in GER 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Minor in Human Factors and Ergonomics

Note: Effective Fall 2015, students will no longer be accepted into this minor.

This minor is intended to meet the needs of the students who have an interest in any type of design and who recognize the importance of taking account of human characteristics, both strengths and weaknesses, in the design of artifacts intended for human use (e.g., equipment, computer software, consumer products, and even entire work environments).

The minor should also be of particular interest to students who have an interest in doing graduate work in human factors, ergonomics, industrial design, etc.

Entry into the minor requires that general psychology (or an equivalent introductory course) be taken as a prerequisite. Students who have completed PSY 101 and who are interested in a minor in Psychology are expected to meet with a Psychology Department faculty member to discuss the selection of appropriate courses. No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

Required Prerequisite
General Psychology course (PSY 101 or equivalent)

Required Courses
PSY 212  Physiological Psychology  3.0
PSY 213  Sensation and Perception  3.0
PSY 250  Industrial Psychology  3.0
PSY 330  Cognitive Psychology  3.0
PSY 332  Human Factors and Cognitive Engineering  3.0
PSY 337  Human-Computer Interaction  3.0
PSY 360  Experimental Psychology  3.0
BMES 330  Biological Rhythm in Pharmacology and Toxicology  3.0

Select one course from the following:

Total Credits: 24.0

Minor in Italian

Note: Effective Fall 2015, students will no longer be accepted into this minor.

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Italian language is a prominent Romance language spoken mostly in Italy, by approximately 60 million people. Italian is also spoken by substantial populations outside of Italy, including in Switzerland, South America (particularly Brazil, Uruguay, and Argentina), and former colonial regions in Africa (Somalia, Libya, and Eritrea).

All Italian language courses are oral-intensive (with additional hours required in the Language Lab) and all include individual oral examinations at the end of each term. In Western languages, enrollments are limited to 15 to 18 students in the first three years of study; fourth-year courses use a seminar format, with a usual enrollment of four to eight students.

Please contact Kate Hughes, Associate Director of the Department of Global Studies and Modern Languages, for more information about the Italian minor: khughes@drexel.edu
Courses

ITAL 101 Italian I 4.0 Credits
Introductory Italian. Includes listening, speaking, reading, and writing. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ITAL 102 Italian II 4.0 Credits
Continues ITAL 101. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 101 [Min Grade: C]

ITAL 103 Italian III 4.0 Credits
Continues ITAL 102. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 102 [Min Grade: C]

ITAL 201 Italian IV 4.0 Credits
Intermediate Italian. Includes grammar review, listening, speaking, and reading. Recommended for students who wish to attain oral competence based on standard usage. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 103 [Min Grade: C]

ITAL 202 Italian V 4.0 Credits
Continues ITAL 201. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 201 [Min Grade: C]

ITAL 203 Italian VI: Conversation and Composition 4.0 Credits
Provides intensive practice in comprehension and written and oral communication. Emphasizes development of writing skills and increased oral competence in everyday situations. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 202 [Min Grade: C]

ITAL 300 Advanced Grammar and Translation 4.0 Credits
Provides advanced practice in written and oral communication, including journalistic, professional, and creative writing. Examines contemporary cultural contexts through media and news. Taught in Italian.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 202 [Min Grade: C]

ITAL 311 [WI] Introduction to Italian Stylistics 3.0 Credits
Provides advanced practice in comprehension and written and oral communication, based primarily on periodicals and contemporary media. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 203 [Min Grade: C]

ITAL 312 [WI] Italian Stylistics 3.0 Credits
Continues ITAL 311. Provides extensive study of the techniques of translation and communication. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 311 [Min Grade: C]

ITAL 313 [WI] Advanced Italian Stylistics 3.0 Credits
Continues ITAL 312. Provides advanced training in oral and written communication in Italian. Particularly recommended for students who have pre-proficiency status, Italian minors and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 331 Introduction to Italian Literature Studies 3.0 Credits
Provides intensive oral practice and written work in business, professional, and commercial Italian. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 332 Advanced Italian Literature 3.0 Credits
Continues ITAL 331. Provides advanced study of Italian literature. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 333 Advanced Italian Literature 3.0 Credits
Continues ITAL 332. Provides advanced study of Italian literature. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 351 Introduction to Business and Professional Italian 3.0 Credits
Provides intensive oral practice and written work in business, professional, and commercial Italian. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 352 Business and Professional Italian 3.0 Credits
Advanced business and professional Italian. Advanced practice in oral and written Italian for business and the professions. Based on advanced texts, periodicals, and technical journals.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 371 Special Studies in Italian Civilization and Culture 3.0 Credits
Presents an integrated approach in Italian to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ITAL 312 [Min Grade: C]
ITAL 411 [WI] Special Studies in Advanced Italian Stylistics 3.0 Credits
Continues ITAL 313. Particularly recommended for students who have proficiency status, Italian minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 431 [WI] Special Studies in Advanced Italian Literature 3.0 Credits
Continues ITAL 333. Particularly recommended for students who have proficiency status, Italian minors, and students interested in graduate study and/or international careers. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 451 Special Studies in Advanced Business and Professional Italian 3.0 Credits
Continues ITAL 353, with emphasis on the structure and protocols of the European Union. Particularly recommended for students who have proficiency status, Italian minors, and students interested in graduate study and/or international careers. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 471 [WI] Special Studies in Italian Civilization 3.0 Credits
Presents an integrated approach, at the advanced level, to the civilization, culture, history, and literature of a given period specific to the areas in which Italian is spoken, with emphasis on the development and evaluation of cultural values. Offered as needed. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ITAL 312 [Min Grade: C]

ITAL 480 Italian Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper or oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ITAL I199 Independent Study in ITAL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL I299 Independent Study in ITAL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL I399 Independent Study in ITAL 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL I499 Independent Study in ITAL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL T180 Special Topics in Italian 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL T280 Special Topics in Italian 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL T380 Special Topics in Italian 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ITAL T480 Special Topics in Italian 0.5-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Minor in Japanese

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Japanese minor requires 24.0 credits of language study above Japanese.

105. Students can choose from the following course options.

Courses

**JAPN 101 Japanese I 4.0 Credits**
Introductory Japanese. Includes listening and speaking, with individual audiolingual practice. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

**JAPN 102 Japanese II 4.0 Credits**
Continues JAPN 101. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 101 [Min Grade: C]

**JAPN 103 Japanese III 4.0 Credits**
Continues JAPN 102. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 102 [Min Grade: C]

**JAPN 104 Japanese Writing I 3.0 Credits**
This course focuses on reading and writing in the Japanese language. The course introduces the basic elements of the Japanese writing systems, which include Katakana, Hiragana and Kanji.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 101 [Min Grade: C] and JAPN 102 [Min Grade: C]

**JAPN 105 Japanese Writing II 3.0 Credits**
This course focuses on reading and writing in the Japanese language. The course builds on lessons from Japanese Writing I.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 104 [Min Grade: C]

**JAPN 201 Japanese IV 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Japanese 103.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 103 [Min Grade: C]

**JAPN 202 Japanese V 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on JAPN 201.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 201 [Min Grade: C]

**JAPN 203 Japanese VI 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on JAPN 202.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 202 [Min Grade: C]

**JAPN 204 Japanese Writing III 3.0 Credits**
This course focuses on reading and writing in the Japanese language. The course builds on lessons from Japanese Writing I and II.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 105 [Min Grade: C]

**JAPN 301 Japanese VII 3.0 Credits**
Advanced Japanese. Provides reading, writing, and extensive conversational practice. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 203 [Min Grade: C]

**JAPN 302 Japanese VIII 3.0 Credits**
Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 301 [Min Grade: C]

**JAPN 303 Japanese IX 3.0 Credits**
Continues JAPN 302. Offered as needed and with sufficient enrollment.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: JAPN 302 [Min Grade: C]

**JAPN 411 Introduction to Japanese Stylistics 3.0 Credits**
Fourth year of Japanese. Provides advanced practice in comprehension and written and oral communication. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: JAPN 303 [Min Grade: C]

**JAPN 451 Introduction to Business and Professional Japanese 3.0 Credits**
Fourth year of Japanese. Provides intensive oral practice and written work in business, professional, and commercial Japanese. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: JAPN 303 [Min Grade: C]

**JAPN 480 Japanese Minor Thesis Course 0.5-4.0 Credits**
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
The Louis Stein Minor in Judaic Studies

The Louis Stein Minor in Judaic Studies, housed within the College of Arts and Sciences, is designed to give students the opportunity to explore and understand the history, culture, politics, and religion of the Jewish people. Through interdisciplinary coursework and directed field study, students investigate the Jewish experience from both a contemporary and a historical perspective.

The Louis Stein Minor in Judaic Studies requires 24.0 credits: 11.0 from required courses, and 13.0 from electives. Students can apply a maximum of 6.0 credits toward the minor from field study under the supervision of the academic advisor.

### Notes:

* Offered concurrently with ENGL 350 Jewish Literature and Civilization.

** Offered concurrently with HIST 253 Jewish Life and Culture in the Middle Ages.

† Offered concurrently with HIST 249 Modern Jewish History.

Courses offered as electives have included:

- JUDA 211 American Jewish Experience
- JUDA 212 [WI (http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/judaicstudies)] Contemporary Jewish Life
- JUDA 213 Jewish Cultural Tapestry
- JUDA 214 Language and Cultural Diversity in the USA
- JUDA 215 Reconstructing History After Genocide
- JUDA 216 Yiddish Literature and Culture
- JUDA 280 Special Topics in Judaic Studies
- JUDA 298 Field Work in Judaic Studies
- JUDA I299 Independent Study in Judaic Studies
- ANTH 120 Biblical Archeology of Israel and Jordan
- ANTH 380 Special Topics in Anthropology (When offered as Archeology of the Middle East)
- HBRW 101 Introduction to Hebrew I
- HBRW 102 Introduction to Hebrew II
- HBRW 103 Introduction to Hebrew III
- HBRW 201 Intermediate Hebrew IV
- HBRW 202 Intermediate Hebrew V
- HBRW 203 Intermediate Hebrew VI
- ENGL 395 [WI (http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/judaicstudies)] Special Studies in Literature (When offered as Jewish Women in Literature and History)
- ENGL 323 Literature and Other Arts (When offered as Holocaust Testimonies)
- ENGL 345 American Ethnic Literature (When offered as Jewish American Writers)
- ENGL 325 Topics as World Literature (When offered as Israeli Literature & Culture, or as Yiddish Literature & Culture)
- LANG 180 Special Topics in Languages (When offered as Yiddish Language I)
- LANG 180 Special Topics in Languages (When offered as Yiddish Language II)

Director of Judaic Studies
215-895-1499
The Judaic Studies Program offices are located in Room 331 of Hagerty Library.

Courses

JUDA 201 Jewish Literature and Civilization 3.0 Credits
This course explores the origins of the Jewish people and their core narratives and beliefs that have become the foundations of Jewish civilization and religion, introducing the first five books of the Torah, the Jewish Bible and analyzing its influence. Major events of the Jewish lifecycle and calendar are examined.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 202 Jewish Life and Culture in the Middle Ages 4.0 Credits
This course is an introductory survey of the history of the Jewish people, their civilization, religion and contacts with other cultures in medieval times. Topics will include the rise of Christianity and Islam, the Talmud, Jewish mysticism and the growth of Ashkenazic and Sephardic Jewry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 203 Modern Jewish History 4.0 Credits
This course is an exploration of the social, cultural, political and religious forces that have shaped Jewry the world over from the 18th to the 20th centuries. Topics will include Emancipation and Enlightenment, modern religious movements, socialism, Hebrew and Yiddish literature, the Holocaust, Zionism and the state of Israel.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 211 American Jewish Experience 3.0 Credits
The course explores communal organization of Jews in America from colonial times until today. Topics include westward expansion, urban neighborhoods, American Jewish religion and culture, and Jewish contributions to American culture. The study of this ethno-religious group elucidates historical issues, such as the immigration legacy, minority rights, discrimination, and intermarriage.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 212 [WI] Contemporary Jewish Life 3.0 Credits
The course will analyze Jewish social, cultural, and religious activities since the 1970s through four ethnographic community studies and documentary films, aiming to understand the meaning that Jews derive from their beliefs, rituals, and institutions. We will stress identity development over the lifespan and historical issues since the Holocaust and the establishment of the State of Israel.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 213 Jewish Cultural Tapestry 3.0 Credits
The course examines the different customs and traditions of Jews in various parts of the world throughout history. How do minorities develop and maintain their group identity? How have the Jews evolved both diversity and uniformity of practice and ideology? The focus will be on the geography and history of folk traditions: language, religious practice, foodways, dress, and music. The class will examine the phenomenon of diaspora, the dispersion of a people from its homeland, and will analyze the shared religious culture and the parallel, local specific culture.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 214 Language and Cultural Diversity in the USA 3.0 Credits
Starting with research on communication patterns of men and women, moving on to the language diversity of African Americans, and then emphasizing the cultural production of various immigrant groups, the predominance of a rich array of languages and cultures will be shown to pertain to most periods of American history. The Yiddish language-based immigrant culture of American Jews will be treated as a case study, dwelling on the rich Yiddish literature created, as well as language-based cultural institutions, such as the press, theater, radio, klezmer music, and film.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 215 Reconstructing History After Genocide 3.0 Credits
The course explores educational restitution to peoples who are victims of genocide. After conceptualizing the world’s responsibility to maintain its cultures and help victims of genocide to recover their history, the class will compare educational efforts to document life before the destruction in places such as Rwanda, the former Yugoslavia and among Native Americans. Our main focus will be the politics of teaching about Polish Jewry, the largest community of Jews before WW II that was destroyed by the Nazis in the Holocaust. Students will evaluate sources that describe Jewish life in one city, Lublin, Poland.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 216 Yiddish Literature & Culture 3.0 Credits
The course describes the major Jewish culture during the past thousand years. In a lively course stressing the arts and everyday family life, students will be introduced to the multi-faceted Yiddish language and culture. Through study and meetings with community members, students learn how Yiddish both reflects and gives meaning to life. Texts will include English translations of proverbs, folktales, folksongs, prayers, epics, personal diaries, memoirs, drama, films, memorial literature, modern fiction and poetry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

JUDA 280 Special Topics in Judaic Studies 3.0 Credits
In this course, students will explore specific areas not covered in the regularly offered Judaic Studies courses. The course will be taught by teaching faculty members of the Judaic Studies Program, Drexel professors who are members of the Judaic Studies Faculty Committee, or by visiting professors. This is a three-credit elective course for the Louis Stein Judaic Studies Minor. It may also be used as a free elective course for a variety of students.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 9 credits
JUDA 298 Field Work in Judaic Studies 3.0 Credits
In this course, students will do independent fieldwork within a Jewish communal organization in the USA or abroad, or ethnographic or archeological fieldwork. The plan of the work, weekly time commitment, and periodic reports will be agreed upon in advance by the student and Professor Peltz, Director of Judaic Studies, or another Drexel Judaic Studies faculty member. This is a three-credit elective course for the Louis Stein Judaic Studies Minor. It may also be used as a free elective course for a variety of students.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

JUDA I199 Independent Study in JUDA 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 9 credits

JUDA I299 Independent Study in JUDA 3.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

JUDA I399 Independent Study in JUDA 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 9 credits

JUDA I499 Independent Study in JUDA 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

JUDA T298 Special Topics in Judaic Studies 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

JUDA T380 Special Topics in Judaic Studies 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 9 credits

JUDA T480 Special Topics in Judaic Studies 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Minor in Korean

About the Program
In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.
The Korean minor requires 24 credits of language study above Korean 103

KOR 101 Korean I 4.0

KOR T280 Special Topics in Korean 12.0
KOR T380 Special Topics in Korean 12.0

Minor in Neuroscience

About the Program
The Neuroscience minor allows students from a vast array of disciplines the opportunity for formalized study in Neuroscience. This interdisciplinary minor integrates content from cellular, molecular, and systems neurobiology with neuropsychology, providing students with a strong foundation in basic principles of neurobiology and neuropsychology. This minor is a collaborative effort between Biology and Psychology, but is open to students in any major with an interest gaining a deeper understanding of the biological and cognitive principles underlying brain function.

Required Courses
BIO 348 Neuroscience: From Cells to Circuits 3.0
BIO 349 Behavioral Neuroscience 3.0
PSY 312 Cognitive Neuroscience 3.0
PSY 410 Neuropsychology 3.0

Biological and Psychology Electives
Select 2 BIO courses:
BIO 414 Behavioral Genetics
BIO 461 Neurobiology of Autism Disorders
BIO 462 Biology of Neuron Function
BIO 463 Molecular Mechanisms of Neurodegeneration
BIO 465 Neurobiology of Disease

Select 2 PSY courses:
PSY 212 Physiological Psychology
PSY 213 Sensation and Perception
PSY 310 Drugs & Human Behavior
PSY 325 Psychology of Learning
PSY 330 Cognitive Psychology
A grade of "C" or better must be earned for each course in this minor to meet the requirements.

* 3 credits of research in neuroscience as BIO 497 or PSY 499 can be substituted for 1 elective in either of the categories

### Minor in Nonprofit Communication

#### About the Program

The minor in nonprofit communication is a 24.0 credit curriculum designed to familiarize students with general communication theory and practice while providing training in print and electronic communication skills peculiar to the nonprofit sector. In addition to conventional course work this minor will include a practicum in the form of a 3.0 credit independent study (COM I399) for one term in which students will provide service and consultation for an area of nonprofit organization as selected and coordinated by Drexel Edits (http://www.drexel.edu/coas/academics/departments-centers/communication/drexel-edits), the university’s center for the support of nonprofit communication.

### Minor in Russian

#### About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Russian minor requires 24.0 credits of language study above Russian 103. Students can choose from the following course options.

- RUSS 201 Russian IV
- RUSS 202 Russian V
- RUSS 203 Russian VI
- RUSS 301 Russian VII
- RUSS 302 Russian VIII
- RUSS 303 Russian IX
- RUSS 411 Introduction to Russian Stylistics
- RUSS 431 Introduction to Russian Literature
- RUSS 451 Introduction to Business & Professional Russian

### Minor in Science, Technology and Society

The minor in Science, Technology and Society [STS] allows students to explore the cultural, ethical, historical, political, and institutional dimensions of science, medicine, and technology. By taking courses in different disciplines, students develop an interdisciplinary approach that empowers them to critically analyze the social dimensions of science, medicine, and technology. Science, technology and society (STS) programs, also called science and technology studies (STS), are growing in the US and worldwide. The ability to critically identify the values and incentives built into scientific knowledge and technology design and use is highly valued in settings such as health care organizations, government agencies, public policy realms, tech industries, and more.

For more information about this program, visit Drexel's Center for Science, Technology and Society (http://drexel.edu/coas/academics/departments-centers/science-technology-society) page.

Select 6 - 8 classes from the list below, with a minimum of 24 credits. At least 3 different subject areas must be represented among these classes.

- ANTH 330 Media Anthropology
- ANTH 345 Visual Anthropology
- ANTH 355 Anthropology of Cyberspace
- ANTH 360 Culture and the Environment
- ARCH 315 Sustainable Built Environment I
- BIO 112 Biotechnology for Society
- BIO 312 Genetically Modified Foods
- COM 240 New Technologies In Communication
- COM 351 Computer Mediated Communication
- COM 352 Social Media and Communication
- ENGL 300 [WI] Literature & Science

Total Credits: 24.0
The Spanish minor requires a minimum of 24 credits above SPAN 103, including at least 12 credits above SPAN 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.

The minor in women's and gender studies is intended to give students a broad, interdisciplinary understanding of the ways in which gender interacts with race, age, class, and sexual orientation to shape human consciousness and the social, political, and cultural organization of society. In addition, the minor is intended to enrich the educational experience of students. It may also provide both men and women with tools for understanding and coping with the larger societal systems in which they must operate as both students and professionals.

Because business and industry are increasingly sensitive to issues such as sex discrimination, sexual harassment, equal pay for comparable work, parental leave, and day care, students with a minor in women's studies will have a definite edge over other applicants for managerial and policy-making positions.

Minor in Women's and Gender Studies

The minor in women's and gender studies is intended to give students a broad, interdisciplinary understanding of the ways in which gender interacts with race, age, class, and sexual orientation to shape human consciousness and the social, political, and cultural organization of society. In addition, the minor is intended to enrich the educational experience of students. It may also provide both men and women with tools for understanding and coping with the larger societal systems in which they must operate as both students and professionals.

Because business and industry are increasingly sensitive to issues such as sex discrimination, sexual harassment, equal pay for comparable work, parental leave, and day care, students with a minor in women's studies will have a definite edge over other applicants for managerial and policy-making positions.

Minor in Spanish

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Spanish minor requires a minimum of 24 credits above SPAN 103, including at least 12 credits above SPAN 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.

Minor in Writing

The minor in writing invites students from all disciplines to develop their writing skills and further their abilities to think critically and creatively by encouraging them to make connections beyond the scope of their discipline.

Students who complete the writing minor will:

- obtain a strong background in theoretical perspectives and practices of writing and rhetoric, as well as reading;
- be able to select additional writing courses in a variety of areas of interest;
- achieve a better understanding of writing within their major fields of study;
- gain significant practice and experience in writing in many genres and rhetorical modes;
- be better positioned to succeed as writers in their future professional and personal endeavors.

**Required Courses**

- ENGL 340 [WI] Classical Rhetoric
- WRIT 225 [WI] Creative Writing
- WRIT 312 [WI] The Practice of Professional Writing
- COM 210 Theory and Models of Communication

or ANTH 350 Anthropology of Language
or PHIL 305 Ethics and the Media

**Reading Courses**

Select one of the following: 3.0

- ENGL 200 [WI] Classical to Medieval Literature
- ENGL 201 Renaissance to the Enlightenment
- ENGL 202 [WI] Romanticism to Modernism
- ENGL 203 [WI] Post-Colonial Literature I
- ENGL 204 Post-Colonial Literature II
- ENGL 205 [WI] American Literature I
- ENGL 206 [WI] American Literature II
- ENGL 207 [WI] African American Literature
- ENGL 211 [WI] British Literature I
- ENGL 212 British Literature II
- ENGL 214 Readings in Fiction
- ENGL 215 [WI] Readings in Poetry
- ENGL 216 [WI] Readings in Drama
- PHIL 105 Critical Reasoning

**Theoretical Perspectives on Writing Courses**

Select one of the following: 3.0

- ANTH 330 Media Anthropology
- ANTH 350 Anthropology of Language
- CJS 377 Intellectual Property Theft in the Digital Age
- COM 220 Qualitative Research Methods
- COM 355 Ethnography of Communication
- EDUC 236 Early Literacy I
- EDUC 256 Teaching Writing Grades 4-8
- EDUC 326 Language Arts Processes [WI]
- ENGL 340 [WI] Classical Rhetoric
- PHIL 305 Ethics and the Media
- PSCI 335 Political Communication
- PSY 336 Psychology of Language

**Writing in Practice Courses**

Select two of the following: 6.0

- COM 160 Introduction to Journalism
- COM 270 [WI] Business Communication
- COM 310 [WI] Technical Communication
- COM 320 [WI] Science Writing
- COM 335 Electronic Publishing
- CULA 412 Food Writing
- DSMR 233 [WI] Retail Image Analysis
- FASH 467 Style and the Media
- SCR 220 Playwriting I
- SCR 225 Playwriting II
- SCR 270 [WI] Screenwriting I
- SCR 275 [WI] Screenwriting II
- SCR 350 TV Comedy Practicum
- SCR 353 TV Drama Practicum
- TVPR 220 TV News Writing
- WRIT 220 [WI] Creative Nonfiction Writing
- WRIT 301 [WI] Writing Poetry
- WRIT 302 [WI] Writing Fiction
- WRIT 303 Writing Humor and Comedy
- WRIT 304 [WI] Special Topics in Writing
- WRIT 306 Writing About the Media
- WRIT 310 Literary Editing & Publication
- WRIT 400 [WI] Writing in Cyberspace

**Certificate in Medical Humanities**

Certificate Level: Undergraduate

Admission Requirements: Current Drexel students only

Certificate Type: Certificate

Number of Credits to Completion: 18.0

Instructional Delivery: Campus
The Certificate Program in Medical Humanities is designed for students majoring in any of the biological sciences, health professions including biomedical engineering, nursing and public health, the humanities, and the social sciences, with the aim of promoting dialogue and mutual appreciation for various approaches to health related issues.

The wide range of applicable courses within designated disciplines fosters an interdisciplinary context for investigating the many challenges within medicine and caregiving. This format, in turn, encourages students to explore illness, disability, dying and healing as human experiences and to evaluate some of the limitations of an exclusively scientific perspective on medical practice and research.

A three credit introductory seminar (HUM 315) and a concluding Capstone Seminar (ENGL 470) further provide intellectual cohesiveness and a sense of community among students enrolled in the program. Both co-directors of the program and other student advisors will help students choose courses best suited for their personal and professional interests. Note that most courses applicable to the program also fulfill humanities electives for other majors and that courses may change as departments offer more options.

Opportunities
Those students who successfully complete the program will receive a certificate in medical humanities. This certificate highlights the student’s proficiency in an interdisciplinary approach to health related issues not easily attainable through isolated courses.

Additional Information
For additional information, contact the program directors:

Total Credits 18.0

Courses

PHIL 101 Introduction to Western Philosophy 3.0 Credits
Introduces the main methods and aims of Western Philosophy, involving the study of problems central to metaphysics, theory of knowledge, and ethics.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
PHIL 102 Introduction to Eastern Philosophy 3.0 Credits
Introduction to the main topics of study in Buddhist, Hindu and other systems of Eastern thought.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 105 Critical Reasoning 3.0 Credits
Introduces and develops the skills involved in reasoning effectively about experience, and being able to distinguish strong arguments from weak ones.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 107 Philosophy and Knowledge Organization 3.0 Credits
This course imparts knowledge and skills associated with organizing concepts. The context for the course is the history of knowledge organization, viewed philosophically, with special emphasis on the Platonic, Cartesian, Kantian, Comtean and Digital paradigms. Students will learn to recognize the classical principles of knowledge organization and how to apply them using a "logic of concepts." Students will also come to understand how and why knowledge is organized the way it is in the modern university.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 111 Symbolic Logic I 3.0 Credits
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: PHIL 111 [Min Grade: D]

PHIL 121 Metaphysics 3.0 Credits
Studies theories about the nature of reality and philosophical issues such as the nature of time, mind, personal identity, and free will.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D]

PHIL 122 Ancient Philosophy 3.0 Credits
Studies central works that have shaped Western Philosophy and culture from the Ancient Greek era and its legacy.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 124 Modern Philosophy 3.0 Credits
Studies central works that have shaped Western Philosophy and culture from the Renaissance through the late Nineteenth Century.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 125 Contemporary Philosophy 3.0 Credits
Studies central works that have had important impacts upon Western Philosophy and culture from the Twentieth Century through the present.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 210 Philosophy of Sport 3.0 Credits
Studies theories about philosophical issues arising in sport, in areas including its personal, social, aesthetic, and political dimensions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 211 Metaphysics 3.0 Credits
Studies theories about the nature of reality and philosophical issues such as the nature of time, mind, personal identity, and free will.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D]

PHIL 215 Contemporary Philosophy 3.0 Credits
Studies central works that have had important impacts upon Western Philosophy and culture from the Twentieth Century through the present.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 231 Aesthetics 3.0 Credits
Studies theories about art and the nature of beauty that bear on philosophical issues concerned with the nature and status of knowledge claims as expressed in concepts like belief, truth, and justification.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D]
PHIL 241 Social & Political Philosophy 3.0 Credits
Studies theories about human social and political life that bear on philosophical issues such as the nature and scope of justice, the legitimacy of states, and the relationship between democracy, civil rights, and civil disobedience.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 251 Ethics 3.0 Credits
Studies theories about human conduct which bear upon the rightness and wrongness of actions, and the goodness and badness of ends, including the nature, scope, purposes, and varieties of moral and ethical theories.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 255 Philosophy of Sex & Love 3.0 Credits
This course investigates sexual activity and desire, and the morality of sexual behavior. It also examines various types of love and their links with sexuality. Figures studied include Plato, Aristotle, Augustine, Aquinas, Kant, Kierkegaard, Freud and Foucault. Topics include marriage, prostitution, pornography, homosexuality, perversion, rape, intentionality, irreplaceability, unconditionality, reciprocity, and exclusivity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 301 Business Ethics 3.0 Credits
Study of such moral issues as truth-telling, puffery, and lying in business communications; employer-employee relations; obligations to customers; obligations to foreign populations; and government contracts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 305 Communication Ethics 3.0 Credits
Ethical analysis of current laws and legislation aimed at regulating speech in the context of mass communications (radio, television and film).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 311 Computer Ethics 3.0 Credits
Ethical analyses of current laws and pending legislation aimed at regulating computer use as well as Internet practices and content.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 315 Engineering Ethics 3.0 Credits
Provides critical reflection on the nature of engineering and technology and on the ethical obligations and responsibilities unique to the engineering profession. Topics include the social responsibilities of engineering, the nature of professionalism, professional autonomy, whistleblowing, conflicts of interest, organizational (dis)obedience, the ethics of risk assessment, and the place and purpose of engineering codes of ethics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

PHIL 317 Ethics and Design Professions 3.0 Credits
Examines ethical theories and their application to architecture; the ethics of architectural space and place; the logic of ethical reasoning applied to the practice of architecture; professional ethics and the social responsibility of architects; the ethics of safety and risk in the production of architectural structures; sustainable environmental architectural design.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.

PHIL 321 Biomedical Ethics 3.0 Credits
Studies moral issues related to health and disease, patients’ rights and professional responsibilities, informed consent, abortion, euthanasia, and biomedical research.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 322 Ethics of Human Enhancement 3.0 Credits
Discussion of developments in health-care with the potential not only to treat disease, but also to improve human performance and cosmetically change the human body, thereby creating ethical considerations about the nature of health and disease and the proper scope and goals of health care.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 323 Organizational Ethics 3.0 Credits
This course focuses on the application of ethical theories and principles to organizational systems and decision-making. Emphasis will be placed on how ethical principles affect and are applied to organizational policy-making, leadership behavior, systems of communication, technology use, and other systems of organization.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.

PHIL 325 Ethics in Sports Management 3.0 Credits
An introduction to various ethical issues in sports and sports management, such as leadership and coaching; gender and racial equity in sports; fair play and cheating; violence and competition; commercialization of sports; the relation of sports to cultural value systems; ethics of technology and sports performance.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

PHIL 330 Ethical Issues in Criminal Justice 3.0 Credits
Studies ethical issues in the policies and practices of criminal justice, and theories that bear upon issues such as the relationship of law to justice, the definition of crime, the use of deception and coercion in law enforcement, and the purposes and varieties of criminal punishment.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
PHIL 335 Global Ethical Issues 3.0 Credits
Offers an introduction to the ethical tensions of our age, globally
construed. May address such issues as terrorism, genocide, religious
exclusivism, nuclear proliferation, the regulation of the Internet, as well as
culturally competing notions of right and wrong, and good and bad.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 340 Environmental Ethics 3.0 Credits
This course examines ethical questions about human relations with
the nonhuman world. These questions will be informed by assessing
sustainable practices, indigenous ways of life, environmental movements,
and such issues as biodiversity loss and global climate change.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 341 Philosophy of the Environment 3.0 Credits
Studies ecological issues from a philosophical standpoint stressing the
implications of scientific and technological developments as they affect
people’s lives and choices.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

PHIL 351 Philosophy of Technology 3.0 Credits
Studies technology from a philosophical standpoint stressing its role
in shaping human existence and values, considering issues such as the
control and distribution of information, housing and city planning,
automation, and the uses of technology in medicine.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 355 Philosophy of Medicine 3.0 Credits
Examines the ideas of medicine, disease, and health from a philosophical
perspective. Examines such concepts as gender, mental-illness, mind-
body unity, aging and physical perfection as derived from both Eastern
and Western traditions. Current health policy alternative treatment
practices are also discussed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 361 Philosophy of Science 3.0 Credits
Studies natural scientific theory-construction and investigative methods
from a philosophical standpoint, considering issues such as the nature
and scope of experimental method, and the history and justification of
theory change.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D] or PHIL 102 [Min Grade: D] or
PHIL 105 [Min Grade: D] or PHIL 107 [Min Grade: D] or PHIL 111 [Min
Grade: D]

PHIL 371 Philosophy of Social Sciences 3.0 Credits
Studies social scientific theory-construction and investigative methods
from a philosophical standpoint, considering issues such as the distinction
between explanation and interpretation, and the history and justification of
theory change.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D] or PHIL 102 [Min Grade: D] or
PHIL 105 [Min Grade: D] or PHIL 107 [Min Grade: D] or PHIL 111 [Min
Grade: D]

PHIL 375 Philosophy of Law 3.0 Credits
Studies various aspects of religious belief and experience from a
philosophical standpoint, considering issues such as the definition and
existence of God, the nature and course of evil, and the relationship
between faith and reason in a religious life.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHIL 101 [Min Grade: D] or PHIL 102 [Min Grade: D] or
PHIL 105 [Min Grade: D] or PHIL 107 [Min Grade: D] or PHIL 111 [Min
Grade: D]

PHIL 381 [WI] Philosophy in Literature 3.0 Credits
Studies philosophical issues such as the concept of the self, the nature
and course of evil, the nature and scope of free will, and ideals in living as
they appear in significant works of literature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 385 Philosophy of Religion 3.0 Credits
This course addresses philosophical issues in the law. Topics include
the meaning of "law," the nature and logic of legal (in contrast to moral)
concepts and principles, and competing conceptions of law (Natural Law,
Positivism, Realism, Rights-Based, etc.). Authors may include Plato, Mill,
Rawls, Hart, Dworkin and others.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

PHIL 389 Advanced Topics in Logic 3.0 Credits
Specialized topics, from among: self-reference paradoxes, set theory,
axiomatization of arithmetic, computability, Church-Turing thesis,
Gödel's theorem, minds and machines, Turing test, artificial intelligence,
deﬁnitions of truth, models and satisfaction, analyticity, syntax/semantics,
onontological commitment, intention/extension, reference justifying
deduction, nominalism/realism, multi-valued logic, intuitionism, modal
logic, doxastic logic, and logic of moral discourse.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 6 credits
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: PHIL 111 [Min Grade: D] and PHIL 207 [Min Grade: D]
PHIL 251 [Min Grade: D]  
Prerequisites: (PHIL 211 [Min Grade: D] or PHIL 212 [Min Grade: D] or PHIL 214 [Min Grade: D] or PHIL 215 [Min Grade: D]) and (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 245 [WI]  
Seminar in a Major Philosopher 3.0 Credits  
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Locke, Hume, Kant, etc. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 451 [WI]  
Seminar in Ancient Philosophy 3.0 Credits  
Advanced study and discussion of the works of the leading philosophers and philosophical schools of Western antiquity. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 211 [Min Grade: D] or PHIL 212 [Min Grade: D] or PHIL 214 [Min Grade: D] or PHIL 215 [Min Grade: D]) and (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 425 [WI]  
Seminar in Medieval Philosophy 3.0 Credits  
Advanced study and discussion of the works of the leading philosophers and philosophical schools of the Medieval period. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 211 [Min Grade: D] or PHIL 212 [Min Grade: D] or PHIL 214 [Min Grade: D] or PHIL 215 [Min Grade: D]) and (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 431 [WI]  
Seminar in Modern Philosophy 3.0 Credits  
Advanced study and discussion of the works of the leading philosophers and philosophical schools of the Modern period (circa. 1500 A.D. to 1900 A.D.) on the European Continent and British Isles. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 465 [WI]  
Seminar in American Philosophy 3.0 Credits  
Advanced study and discussion of works by leading American philosophers, including Peirce, James, Mead, Royce, C.I. Lewis, Quine, Davidson, Rorty and others. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 211 [Min Grade: D] or PHIL 212 [Min Grade: D] or PHIL 214 [Min Grade: D] or PHIL 215 [Min Grade: D]) and (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 481 [WI]  
Seminar in a Philosophical School 3.0 Credits  
Development of doctrines, theories, arguments and problems associated with one or more philosophical schools (or movements). Schools (or movements) may include Pythagoreanism, Platonism, Epicureanism, or recently, Positivism, Pragmatism, and Existentialism. This course is Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 485 [WI]  
Seminar in American Philosophy 3.0 Credits  
Study of the works of a major philosopher such as Plato, Aristotle, Descartes, Locke, Hume, Kant, etc. Reading and Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore  
Prerequisites: (PHIL 221 [Min Grade: D] or PHIL 231 [Min Grade: D] or PHIL 241 [Min Grade: D] or PHIL 251 [Min Grade: D])

PHIL 497 [WI]  
Senior Essay I: Research & Thesis Development 3.0 Credits  
Individual supervision. Selection of research topic for the senior argumentative essay; collection and analysis of hard-copy and electronic research material; construction of bibliography. Initial thesis formulation and drafting of argument sketch. Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Can enroll if major is PHIL and classification is Senior.  
Prerequisites: PHIL 497 [Min Grade: D]

PHIL 498 [WI]  
Senior Essay II: Argument Construction 3.0 Credits  
Supervised construction of the main and supporting arguments of the senior essay involving drafting and re-drafting of the prose statement. Writing Intensive.  
Repeat Status: Not repeatable for credit  
Restrictions: Can enroll if major is PHIL and classification is Senior.  
Prerequisites: PHIL 497 [Min Grade: D]
PHIL 499 [WI] Senior Essay III: Defense 3.0 Credits
Individual Supervision. Defense of the senior essay thesis before the philosophy faculty and fellow senior philosophy majors. Written replies to main criticisms as determined by the faculty supervisor. Final submission of senior essay. Writing Intensive.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is PHIL and classification is Senior.
Prerequisites: PHIL 498 [Min Grade: D]

PHIL I199 Independent Study in PHIL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

PHIL I299 Independent Study in PHIL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

PHIL I399 Independent Study in PHIL 1.0-12.0 Credit
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

PHIL I499 Independent Study in PHIL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

PHIL T180 Special Topics in Philosophy 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

PHIL T280 Special Topics in Philosophy 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences

Philosophy in Arts & Humanities Certificate
Certificate Level: Undergraduate
Admissions Requirements: Current Drexel students only
Certificate Type: Undergraduate
Number of Credits to Completion: 18.0
Instructional Delivery: Campus, Online, Hybrid
Calendar Type: Quarter

The Certificate in Philosophy in Arts and Humanities provides an excellent opportunity for undergraduate students in all majors to deepen and broaden their educational experience by enhancing and exercising their philosophical skills in relation to some of the most central issues and ideas related to the arts and the humanities.

Certificate in Writing and Publishing
Certificate Level: Undergraduate
Admission Requirements: Current Drexel students only
Certificate Type: Certificate
Number of Credits to Completion: 18.0
Instructional Delivery: Campus, Online, Hybrid
Calendar Type: Quarter
Expected Time to Completion: Not Applicable

About the program
The certificate in writing and publishing (CWP) offers the opportunity for both professional and personal development through a combination of available courses in professional writing, creative writing and publishing. The certificate enhances employment opportunities, opening a broad range of professional choices in cooperative employment and in the post-degree job market as skills are acquired. The CWP improves on-the-job performance, as the student develops writing skills and associated professional knowledge.

The program develops core competencies through the synergy of writing and publishing courses. The courses develop the student's skills in writing and publishing both through theory and practical application.

General requirements
The certificate in writing and publishing allows students to achieve certification in one or more of the following tracks:

• professional writing and publishing
• creative writing and publishing
• comprehensive writing and publishing
Each track requires the completion of a minimum of six courses (18.0 credits). Tracks can be designed to meet the professional needs and personal interests of the individual student.

Working with an advisor, students will choose not only the track but the courses within the track to develop an individually tailored program. Students can choose courses that will meet the general requirements of the program, while also satisfying their own professional and personal requirements.

Those students who have successfully completed this program will receive a certificate in writing and publishing. The transcript will indicate the completion of the CWP. This certification will indicate proficiency in written communication and familiarity with techniques in publishing in a variety of venues. The certificate program in writing and publishing highlights the student's acquisition of skills more than they would be in a list of courses on a transcript.

The completion of the certificate demonstrates the student's commitment to writing and publishing skills. It highlights writing skills of students majoring in business and technical areas; similarly, for students in the humanities and social sciences, it certifies writing and publishing skills, either in creative writing or professional writing.

Students meet with one of the two program co-directors to determine their track:

Harriet Levin Millan
Director, Certificate in Writing and Publishing
harriet.levin.millan@drexel.edu

Henry Israeli
Associate Director, Certificate in Writing and Publishing
hpi22@drexel.edu

Track Requirements

The professional writing and publishing track offers three options: business communication and publishing; technical communication and publishing; and journalism. This track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena. The creative writing and publishing track, is useful to all students as it encourages personal and professional development through creative writing and a knowledge of publishing. The comprehensive track is for students who do not wish to specialize in either of the other two tracks.

Note: Many majors already require one or more of the courses leading to the certificate in writing and publishing or list these courses as recommended electives

Professional Writing and Publishing Track

18.0 quarter credits

The professional writing and publishing track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena.

This track offers three focus options:

- business communication and publishing: for students interested in a career in business.
- technical communication and publishing: for students interested in engineering, science, information science and technology and careers in higher education.
- journalism: for students interested in global journalism and international affairs.

This track is designed for students who want to develop their creative writing skills either for personal development and expression, or because they recognize that creative writing develops imagination; sharpens clarity of expression; and enhances sensitivity to other people. Creative writing is a good pre-professional concentration for pre-law, pre-med, and the social sciences. The importance of creative writing has been recognized for engineering and for business.

**Track B**
- **WRIT 225 [WI]** Creative Writing
- Any 300-level writing (WRIT) course

### Professional Writing

**Track A**
- **COM 310 [WI]** Technical Communication
- **COM 420** Technical and Science Editing
  - or **COM 375** Grant Writing
  - or **VSCM 480** Graphic Design Seminar: Design Perceptions

**Track B**
- **COM 270 [WI]** Business Communication
- **COM 375 [WI]** Grant Writing
  - or **COM 350** Document Design and Evaluation
  - or **VSCM 480** Graphic Design Seminar: Design Perceptions

### Journalism

- **COM 160** Introduction to Journalism 3.0

Select one of the following:
- **COM 315** Investigative Journalism
- **COM 390 [WI]** Global Journalism
- **CULA 412** Food Writing
  - **WRIT 210 [WI]** The Peer Reader in Context ***

**Total Credits** 21.0

---

* WRIT 405 Must be taken twice.
** Students select two of the following course sequences from at least two different categories
*** By Director's permission only.
College of Computing & Informatics

The College of Computing & Informatics provides a University focal point for inquiry related to computation and information. The College addresses both theory and practice along dimensions that include technical, human, organizational, policy, and societal considerations. This broad expertise positions the College’s education and research programs to address the complex, multi-disciplinary problems that are increasingly common as society becomes more dependent on information technology.

The academic programs of the College provide broad and deep coverage of computing & informatics. For more information about the College, please visit the College’s website (http://www.drexel.edu/cci).

Majors
- Computer Science (BA, BS) (p. 175)
  - Computer Security Concentration (p. 185)
  - Game Programming and Development Concentration (p. 187)
- Computing and Security Technology (BS) (p. 188)
- Data Science (BS) (p. 195)
- Informatics (BS) (p. 201)
- Information Systems (BS) (p. 206)
- Information Technology (BS) (p. 212)
- Software Engineering (BS) (p. 218)

Minors
- Computer Science (p. 180)
- Data Science (p. 197)
- Emergency Management (p. 225)
- Human Centered Computing (p. 226)
- Informatics (p. 202)
- Information Systems (p. 207)
- Security Technology (p. 226)
- Software Engineering (p. 220)

Certificates
- Computing and Security Technology (p. 226)

About the College

The College of Computing & Informatics (http://www.drexel.edu/cci) (CCI) offers a number of undergraduate degrees in computer science, computing & security technology, data science, information systems, and software engineering. The degree programs are open to freshmen and transfers from other departments at Drexel and other universities. Students have access to the computing facilities available to all Drexel students.

The College educates professionals through its interdisciplinary programs to meet a wide range of needs in the computing and informatics fields to benefit all sectors of society.

Transfer admission for traditional undergraduate programs occurs in the fall term only due to the sequence of required courses. Internal transfer students can be admitted at any term. Admission to the BS online completion program in computing & security technology is offered on a rolling basis. Please contact an undergraduate advisor (http://cci.drexel.edu/resources/current-students/undergraduate/advising.aspx) for more information.

Cooperative Education

Cooperative education emphasizes career management through experiential learning as an integral part of the education process. The co-op is based on employment in practical, major-related positions consistent with the interests, abilities, and aptitudes of the students.

For more general information on Drexel University's co-op opportunities, visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc).

Computer Science

Major: Computer Science

Degree Awarded: Bachelor of Science (BS) or Bachelor of Arts (BA)

Calendar Type: Quarter

Total Credit Hours: 186.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 11.0701

Standard Occupational Classification (SOC) code: 11-3021; 15-1111; 15-1131; 15-1132; 11-1199

About the Program

The College of Computing & Informatics' Bachelor of Science/Arts in Computer Science offers extensive exposure and hands-on practice in the core areas of the field, including programming paradigms and languages, algorithms, systems, networking, and software engineering. Students also select upper level tracks in areas such as artificial intelligence, security, graphics and vision, and human-computer interaction. The program’s flexibility allows students to easily sample from areas in which they would like to apply their computing knowledge. This hands-on curriculum combined with co-op provides real-world experience that culminates in a full-year software project.

The programs of study in computer science are designed with the flexibility to prepare students for careers in a rapidly changing profession and to allow strong preparation for graduate education in the field. In addition to the courses in the major, the Bachelor of Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering. The Bachelor of Arts degree emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Core courses in all programs include programming and data structures, programming language concepts, computer systems architecture, and software methodology and engineering. Students also choose two other tracks from a list of possible specializations. Please contact your advisor (http://cci.drexel.edu/resources/current-students/undergraduate/advising.aspx) at the College of Computing & Informatics for a current list of computer science track and elective courses.

Concentrations
- Computer Security (p. 185)
- Game Programming and Development (p. 187)
Additional Information
For more information about this program, please visit the BS/BA in Computer Science web page (http://drexel.edu/cci/programs/undergraduate-programs/bsba-computer-science) on the College of Computing & Informatics’ website.

Degree Requirements (BS)
The Bachelor of Science (BS) in Computer Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering.

**Free electives** 10.5-15.5

Total Credits 186.5-191.5

* At least 4.0 credit must be taken from a Business category course (see below) and at least 3.0 credits must be from a Social Studies category course (see below)

**Program Electives**

- **Computer Science electives**: any CS course numbered 300 or higher
- **Mathematics electives**: MATH 200, MATH 210, MATH 262, ENGR 232, any MATH course numbered 300 or higher
- **Science electives**: any CHEM (except 111, 112, 113, 114, 151), BIO (except 161, 162, 163; can take only one of BIO100, BIO107, BIO122; can take only one of BIO101, BIO109, BIO124), PHYS (except 050, 100, 103, 104, 105, 106, 121, 122, 151, 160, 305, 306, 307, 324, 405; cannot take both PHYS 131 & 181), ENVVS, GEO; cannot take NFS courses
- **Writing & Communications electives**: any WRIT, COM, ENGL courses officially certified as Writing Intensive (http://drexel.edu/engphil/about/DrexelWritingCenter/wiCourses/course_list) (WI), and SCRP270
- **Business electives**: any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX
- **Social Studies electives**: any AFAS, ANTH, GST, HIST, JUDA, PSCI, PSY (except 330, 332, 337, 364, 365), SOC (except 364, 365), WGST
- **Arts & Humanities electives**: any ARCH, ARTH, CMGT, CJJS, COM, CUDA, DANC, EDEX, EDUC, ENGL (except 101, 102, 103, 105), ESTM, FASH, FMVD, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages) as defined by the College of Arts and Sciences, and GMAP260, ANIM140, ANIM141, ANIM152, ANIM211, ANIM212

**Computer Science Tracks**

Students must complete two of the following Computer Science tracks for a total of 18.0 credits. The tracks may overlap by one course. Students should check with the College for any additional Special Topics courses being offered that may be appropriate for one of the tracks.

**Algorithms and Data Structures**

<table>
<thead>

Select two of the following: 6.0
Degree Requirements (BA)

The Bachelor of Arts (BA) program emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Computer Science Requirements

- **CS 164** Introduction to Computer Science 3.0
- **CS 171** Computer Programming I 3.0
- or **CS 175** Advanced Computer Programming I 3.0
- **CS 172** Computer Programming II 3.0
- or **CS 176** Advanced Computer Programming II 3.0
- **CS 260** Data Structures 3.0
- **CS 285** Advanced Programming Tools and Techniques 3.0
- **CS 270** Mathematical Foundations of Computer Science 3.0
- **CS 275** Web and Mobile App Development 3.0
- **CS 281** Systems Architecture 4.0
- **CS 283** Systems Programming 3.0
- **CS 350 [WI]** Software Design 3.0
- **CS 360** Programming Language Concepts 3.0
- **CS 451** Software Engineering 3.0
- Computer Science track courses (see below) 18.0
- Computer Science electives (see below) 6.0

Computing & Informatics Requirements

- **CI 101** Computing and Informatics Design I 2.0
- **CI 102** Computing and Informatics Design II 2.0
- **CI 103** Computing and Informatics Design III 2.0
- **CI 491 [WI]** Senior Project I 3.0
- **CI 492 [WI]** Senior Project II 3.0
- **CI 493 [WI]** Senior Project III 3.0

Mathematics Requirements

- **MATH 121** Calculus I 4.0
- **MATH 122** Calculus II 4.0
- **MATH 123** Calculus III 4.0
- **MATH 201** Linear Algebra 3.0-4.0
  - or **MATH 261** Linear Algebra 3.0
  - or **ENGR 231** Linear Engineering Systems 3.0
- **MATH 221** Discrete Mathematics 3.0
- **MATH 311** Probability and Statistics I 3.0-4.0
  - or **MATH 410** Scientific Data Analysis I 3.0
- Mathematics elective (see below) 4.0

Science Requirements

- Select one of the following lab science sequences:
  - **BIO 122** Cells and Genetics
  - or **BIO 124** and Evolution & Organismal Diversity
  - or **BIO 126** and Physiology and Ecology
  - **CHEM 101** General Chemistry I
  - & **CHEM 102** and General Chemistry II
  - & **CHEM 103** and General Chemistry III
  - **PHYS 101** Fundamentals of Physics I
  - & **PHYS 102** and Fundamentals of Physics II
  - & **PHYS 201** and Fundamentals of Physics III
- Science electives (see below) 18.0

Arts & Humanities Requirements

- **ENGL 101** Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- **ENGL 102** Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- **ENGL 103** Composition and Rhetoric III: Themes and Genres 3.0
- **PHIL 311** Ethics and Information Technology 3.0
- **COM 230** Techniques of Speaking 3.0
- Social Studies electives (see below) 12.0
- International electives (see below) 6.0
- Diversity Studies electives (see below) 6.0

\[\text{Drexel University}\]
Program Electives

- Computer Science electives: any CS course numbered 300 or higher
- Mathematics electives: MATH 200, MATH 210, MATH 262, ENGR 232, any MATH course numbered 300 or higher
- Science electives: any CHEM (except 111, 112, 113, 114, 151), BIO (except 161, 162, 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except 050, 100, 103, 104, 105, 106, 121, 122, 151, 160, 305, 306, 307, 324, 405; cannot take both PHYS 131 & 181); ENVS, GEO, PHEV, cannot take NFS courses
- Social Studies electives: any AFAS, ANTH, GST, HIST, JUDA, PSCI, PSY (except 330, 332, 337, 364, 365), SOC (except 364, 365), WGST

**Total Credit: 186.5**
The Computer Science minor is available to all University students in good standing, with the exception of Computer Science majors.

**Prerequisites**
One of the following Mathematics sequences must be completed before entering the program:

- MATH 101 and MATH 102
- MATH 121 and MATH 122

**Requirements**
Select one of the following:

- CS 171 Computer Programming I
- CS 172 Computer Programming II
- CS 175 Advanced Computer Programming I
- CS 260 Data Structures
- CS 265 Advanced Programming Tools and Techniques

Additional CS courses numbered 200 or higher. Students who take CS 175 should select 5 courses; all other students should select 4 courses.

**Total Credits**
24.0

Note: No more than 9 credits from a student's major may be used to fulfill the minor requirements. Students who, because of this rule, require additional credits to reach 24 total credits may select additional Advanced Electives as needed.

**Accelerated Degrees**

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College's bachelor’s and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel's website.

**Bachelor’s/Master’s Accelerated Degree in Computer Science**

**Applying**

The guidelines for applying to the Computer Science Bachelor's/Master's (BS/MS) Accelerated Degree Program are as follows:

- University regulations require application after the completion of 90.0 credits but before the completion of 120.0 credits.
- Applicants must have an overall cumulative Grade Point Average of 3.25 or higher.
- Letters of recommendation from two Computer Science faculty are required.
- Students must submit a plan of study. Consult your advisor and course schedules for guidance.
• Applicants must have completed the following courses with a minimum GPA of 3.50:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 171</td>
<td>Computer Programming I</td>
<td>3.0</td>
</tr>
<tr>
<td>or CS 175</td>
<td>Advanced Computer Programming I</td>
<td></td>
</tr>
<tr>
<td>CS 172</td>
<td>Computer Programming II</td>

<td>Systems Architecture</td>
<td>4.0</td>
</tr>
<tr>
<td>MATH 221</td>
<td>Discrete Mathematics</td>
<td>3.0</td>
</tr>
<tr>
<td>CS 350</td>
<td>Programming Language Concepts</td>
<td>3.0</td>
</tr>
</tbody>
</table>

One additional CS course numbered 300 or higher

### Requirements

The requirements of the Computer Science BS/MS program follow the requirements of both the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbsbtext) and the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degreerequirementsmsbtext). Students must complete all the requirements of the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbsbtext) except that they may drop two free electives (still maintaining the 180.0 credit minimum for the BS degree). In addition, students must complete 45.0 credits of graduate courses to satisfy the requirements of the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degreerequirementsmsbtext). Please refer to the linked program pages for the details of these requirements.

When completing undergraduate CS electives and graduate CS courses, students should take care to avoid equivalent courses at both the undergraduate and graduate levels. The table below indicates pairs of equivalent courses; students may only take one or the other in each pair but not both.

<table>
<thead>
<tr>
<th>Course</th>

### Plan of Study

Students in the BS/MS program typically forego their third co-op and take advanced courses during those two terms. The sample plan of study below thus assumes a total of 14 terms completed within a 5-year period.

#### Term 1

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CI 101</td>
<td>Computing and Informatics Design I</td>
<td>2.0</td>
</tr>
<tr>
<td>CS 164</td>
<td>Introduction to Computer Science</td>
<td>3.0</td>
</tr>
<tr>
<td>MATH 121</td>
<td>Calculus I</td>
<td>4.0</td>
</tr>
<tr>
<td>ENGL 101</td>
<td>Composition and Rhetoric I: Inquiry and Exploratory Research</td>
<td>3.0</td>
</tr>
<tr>
<td>UNIV 101</td>
<td>The Drexel Experience</td>
<td>1.0</td>
</tr>
<tr>
<td>Science lab</td>
<td></td>
<td>4.5</td>
</tr>
</tbody>
</table>

#### Term Credits: 17.5

#### Term 2

<table>

</table>

#### Term Credits: 16.0
Co-op/Career Opportunities

Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op

Career Opportunities

The demand for computing skills is tremendous and growing, with highly paid jobs. Most professionals in the field focus on the design and development of software and software-based applications. Typical jobs include software engineer, programmer, web designer, multimedia or software developer, systems analyst or consultant, manager of technical staff, client-server architect, network designer, and database specialist. Most positions require at least a bachelor’s degree. Relevant work experience, such as that provided by co-operative education, is also very important, as cited by the Occupational Outlook Handbook (http://www.bls.gov/ooh) published by the US Bureau of Labor Statistics.

Job titles of recent computer science graduates include:

- Web Developer
- Software Systems Engineer
- Software Developer
- Network Engineer
- Application Analyst

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W. W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms.
within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building
The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab
CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories
The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GiCL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden
The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street
3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computer Science degree is evaluated relative to the following Objectives and Outcomes.

Computer Science Program Educational Objectives
Drexel Computer Science alumni will:

a. be valued employees in a wide variety of occupations in industry, government and academia, in particular as computer scientists and software engineers;

b. succeed in graduate and professional studies, such as engineering, science, law, medicine and business;

c. pursue life-long learning and professional development to remain current in an ever changing technological world;

d. provide leadership in their profession, in their communities, and society;

e. function as responsible members of society with an awareness of the social and ethical ramifications of their work.
### Computer Science Student Outcomes (for Bachelor of Science and Bachelor of Arts)

The Drexel Computer Science program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline

b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

d. An ability to function effectively on teams to accomplish a common goal

e. An understanding of professional, ethical, legal, security and social issues and responsibilities

f. An ability to communicate effectively with a range of audiences

g. An ability to analyze the local and global impact of computing on individuals, organizations, and society

h. Recognition of the need for and an ability to engage in continuing professional development

i. An ability to use current techniques, skills, and tools necessary for computing practice

j. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.

k. An ability to apply design and development principles in the construction of software systems of varying complexity.

### Additional Information

The Computer Science BS and BA programs are accredited by the Computing Accreditation Commission (CAC) of ABET, [http://www.abet.org](http://www.abet.org).

To view the latest BS/BA in Computer Science program enrollment numbers, please click here [http://drexel.edu/cci/programs/undergraduate-programs/Facts](http://drexel.edu/cci/programs/undergraduate-programs/Facts).

### Computer Science Faculty

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (Texas Tech University) Senior Research Scientist, Applied Informatics Group. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

M. Brian Blake, PhD (George Mason University) Executive Vice President for Academic Affairs and Provost; Distinguished Professor of Systems and Software Engineering; Joint Appointments with the College of Engineering and the College of Medicine. Software engineering approaches for integration of Web-based systems.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Rachel Greenslade, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD (University of Rhode Island). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Adelaide Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach
was to handle information efficiently to realize one or more objectives (for example, a customer relations management system helping an organization support and manage customers to achieve increased sales). However, the world has moved from a clear separation between people and technology to a network of systems that provide critical resources to modern living. In fact, today’s world is comprised of systems and systems of systems where we see interactions at local, regional and global levels. Unfortunately, this cyberspace also allows for the connections among international organized crime, terrorists, hackers, foreign intelligence agencies, military and civilians including families and children. Furthermore, such connections enable threats to and invasions of privacy.

Specialists are needed who can work within cyberspace to help secure, defend against, respond to, and in some instance, even initiate preemptive attacks. These individuals must have detailed knowledge of the systems they protect, an understanding of the cyber-environment and physical environment in which they operate, and an understanding of the ethical expectations and legal surroundings of their field.

The Computer Science concentration in Computer Security is designed to supply graduates with the skills needed to prepare them for a wide range of opportunities. It gives students the ability to design and implement computing security and privacy processes, software and systems. Students use mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of such systems.

**Additional Information**
For more information about this concentration, visit the College of Computing & Informatics (http://www.drexel.edu/cci)’ web site.

**Computer Security Concentration Program Requirements**
Students in the Computer Security Concentration should follow the below concentration requirements in addition to the core degree requirements for the BS in Computer Science program (p. 176). For any questions regarding your plan of study, please contact your Undergraduate Advisor (http://drexel.edu/cci/resources/current-students/undergraduate/advising).

The concentration in Computer Security follows the requirements of the B.S. in Computer Science (p. 176) except as noted below.

**Computer Security Concentration**

**Sample Plan of Study**

**Term 1**
- CI 101 Computing and Informatics Design I 2.0
- CS 164 Introduction to Computer Science 3.0
- MATH 121 Calculus I 4.0
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- UNIV 101 The Drexel Experience 1.0
- Science lab 4.5
- **Term Credits** 17.5

**Term 2**
- CI 102 Computing and Informatics Design II 2.0
- CS 171 Computer Programming I 3.0
- or 175 Advanced Computer Programming I 3.0
- MATH 122 Calculus II 4.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- CIVC 101 Introduction to Civic Engagement 1.0
- COOP 101 Career Management and Professional Development 0.0
- Science lab 4.5
- **Term Credits** 17.5

**Term 3**
- CI 103 Computing and Informatics Design III 2.0
- CS 172 Computer Programming II 3.0
- or 176 Advanced Computer Programming II 3.0
- MATH 123 Calculus III 4.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- UNIV 101 The Drexel Experience 1.0
- Science lab 4.5
- **Term Credits** 17.5

**Term 4**
- CS 265 Advanced Programming Tools and Techniques 3.0
- CS 270 Mathematical Foundations of Computer Science 3.0
- PSY 101 General Psychology I 3.0
- Science elective 3.0
- **Term Credits** 12.0

**Term 5**
- CS 260 Data Structures 3.0
- CS 275 Web and Mobile App Development 3.0
- MATH 221 Discrete Mathematics 3.0
- ECON 201 Principles of Microeconomics 4.0
- Science elective 3.0
- **Term Credits** 16.0

**Term 6**
- CS 281 Systems Architecture 4.0
- CS 350 [WI] Software Design 3.0
- MATH 201 Linear Algebra 4.0
- COM 230 Techniques of Speaking 3.0
- Arts & Humanities elective 3.0
- **Term Credits** 17.0

**Term 7**
- CS 283 Systems Programming 3.0
- CS 360 Programming Language Concepts 3.0
- Arts & Humanities electives 3.0
- **Term Credits** 15.0

**Term 8**
- CS 303 Algorithmic Number Theory and Cryptography 3.0
- CS 361 Concurrent Programming 3.0
- MATH 410 Scientific Data Analysis I 3.0
- INFO 310 Human-Computer Interaction II 3.0
- PHIL 311 Ethics and Information Technology 3.0
- **Term Credits** 15.0

**Term 9**
- CS 451 Software Engineering 3.0
- CS 370 Operating Systems 3.0
- Arts & Humanities elective 3.0
- Writing & Communications Elective 3.0
- Math Elective 3.0
- **Term Credits** 15.0

**Term 10**
- CI 491 [WI] Senior Project I 3.0
- CS 467 Security and Human Behavior 3.0
- CS 472 Computer Networks: Theory, Applications and Programming 3.0
- Writing & Communications elective 3.0
- Arts & Humanities elective 3.0
- **Term Credits** 15.0

**Term 11**
- CI 492 [WI] Senior Project II 3.0
- CS 475 Computer and Network Security 3.0
- Arts & Humanities elective 3.0
- Free Elective 7.0
- **Term Credits** 16.0

**Term 12**
- CI 493 [WI] Senior Project III 3.0
- CS 377 Software Security 3.0
- Science Elective 3.0
- Arts & Humanities Elective 3.0
- **Term Credits** 12.0

**Total Credit:** 186.5

**Free Elective** 3.0
**Science elective** 4.0

**Term Credits** 16.0

**Term 8**
- CS 303 Algorithmic Number Theory and Cryptography 3.0
- CS 361 Concurrent Programming 3.0
- MATH 410 Scientific Data Analysis I 3.0
- INFO 310 Human-Computer Interaction II 3.0
- PHIL 311 Ethics and Information Technology 3.0

- Arts & Humanities elective 3.0
- Writing & Communications Elective 3.0
- Math Elective 3.0
- **Term Credits** 15.0

**Term 10**
- CI 491 [WI] Senior Project I 3.0
- CS 467 Security and Human Behavior 3.0
- CS 472 Computer Networks: Theory, Applications and Programming 3.0
- Writing & Communications elective 3.0
- Arts & Humanities elective 3.0
- **Term Credits** 15.0

**Term 11**
- CI 492 [WI] Senior Project II 3.0
- CS 475 Computer and Network Security 3.0
- Arts & Humanities elective 3.0
- Free Elective 7.0
- **Term Credits** 16.0

**Term 12**
- CI 493 [WI] Senior Project III 3.0
- CS 377 Software Security 3.0
- Science Elective 3.0
- Arts & Humanities Elective 3.0
- **Term Credits** 12.0

**Total Credit:** 186.5

**Co-op and Career Opportunities**

**Co-Op Options**

Three co-op options are available for this program:
- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

**Career Opportunities**

The U.S. Bureau of Labor Statistics confirmed the need for a larger and more dynamic network security workforce. In its Occupational Outlook Handbook (http://www.bls.gov/ooh/home.htm), the agency predicts that the demand for cybersecurity experts, including Computer Network Architects, is expected to increase at a faster than average rate (2014 to 2024) as the world responds to imminent security threats.

While government might have the most immediate need for cybersecurity professionals, market observers see tremendous growth in other organizations for cybersecurity professionals where they can have a variety of rules working on vulnerability research, antivirus software design, reverse engineering, and mobile code analysis and design.
Infrastructure security is another area requiring experts in computer security. As information technology has become more available, critical infrastructures increasingly rely on it and have become so interconnected that intrusions and disruptions in one infrastructure can potentially cause failures to others. Critical infrastructure includes airports, rail transport, hospitals, bridges, network communications, the electricity grid and power plants, seaports, oil refineries, and water systems. Infrastructure security experts work to limit the vulnerability of these systems to sabotage, terrorism, information warfare, and natural disasters.

Industries with high cybersecurity demand include:

- Computer systems design services
- Research and development in the physical, engineering, and life sciences
- Instrument manufacturing
- Consulting services
- Engineering services
- Computer and computer peripheral equipment and software merchant wholesalers
- Custom computer programming services

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Computer Science**

**Game Programming and Development Concentration**

The concentration in game programming and development provides conceptual understanding of game design and practical experience in the design and the development of games. The courses in this concentration include fundamentals of game design and development, large-scale game development, and special topics in educational and experimental game design.

**Game Programming and Development Concentration**

**Program Requirements**

Students in the Game Programming and Development Concentration should follow the below concentration requirements in addition to the core degree requirements for the BS in Computer Science program (p. 176).

For any questions regarding your plan of study, please contact your Undergraduate Advisor (http://drexel.edu/cci/resources/current-students/undergraduate/advising).

The Game Programming and Development concentration follows the requirements of the B.S. in Computer Science (p. 176) except as noted below.

**Computer Science Requirements**

The following courses must be taken to fulfill the Game Development and Design track:

- CS 345 Computer Game Design and Development
- or GMAP 346 Game Development Foundations
- GMAP 377 Game Development: Workshop I
- GMAP 378 Game Development: Workshop II

**Computing & Informatics Requirements**

The following courses must be taken to fulfill the Game Development and Design track:

- GMAP 260 Overview of Computer Gaming
- GMAP 267 Game Design and Development
- GMAP 351 Game Programming
- GMAP 352 Introduction to Game Engine Development
- GMAP 353 Game Development II: Design and Implementation
- GMAP 354 Game Development III: Advanced Game Design and Development

**Sample Plan of Study (BS) - Game Programming and Development Concentration**

### Computing and Security Technology

**Major:** Computing and Security Technology  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 188.0  
**Co-op Options:** Three Co-op (Five years); One Co-op (Four years)  
**Classification of Instructional Programs (CIP) Code:** 11.1003  
**Standard Occupational Classification (SOC) Code:** 15-1122

#### About the Program

The College of Computing & Informatics' Bachelor of Science in Computing & Security Technology (BSCST) prepares students for work related to the management and administration of large-scale computing infrastructure. Students gain experience with core information technology (IT) areas including servers, databases, networks, the Web, and computer security. The program places emphasis on practical education and fundamental concepts that are supplemented by laboratory experience.

Core courses provide students with practical knowledge and skills related to proprietary and open source servers, network administration, software development, database administration, and IT security. Students take advanced electives and a concentration in either Computing Technology or Computing Security. The advanced courses include topics such as: mobile applications, IT risk assessment, intrusion detection, security audits, and computer forensics.

The degrees in Computing & Security Technology, Data Science (p. 195), and Information Systems (p. 206) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

The BS in Computing & Security Technology is offered as a full-time, on-campus bachelor's degree program or as an online, part-time degree completion program for students who have already earned an associate's degree or have completed approximately two years of college work. Students who are no longer being admitted to the on-site BSCST degree program that was offered at Burlington County College (BCC), Delaware County Community College (DCCC), and the Montgomery County Community College (MCCC). Students from these institutions are invited to apply to transfer into the online program or the on-campus program at Drexel. Also, students are no longer being admitted to the Drexel Saturday Scholars program.

For more information about this program, please visit the BS in Computing & Security Technology web page (http://drexel.edu/cci/programs/undergraduate-programs/bs-computing-security) on the College of Computing & Informatics' website.

#### Degree Requirements

Students completing this major must select either a concentration in computing technology or a concentration in computing security.

### Co-Op/Career Opportunities

#### Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree: 5-year/2 co-op

Co-op is not available for online students.

#### Career Opportunities

Graduates of the Computing and Security Technology program who complete a concentration in Computing Technology can pursue careers as information technologists and advanced technicians in a wide range of industries. Information technologists are capable of performing multiple IT tasks and accessing various information resources. The program gives students a unique set of applied skills that allow them to fill a number of roles as part of the information systems team. Graduates with a concentration in Computing Security pursue careers as advanced technicians who operate and administer the security tools, technologists who create and install security solutions, and leaders who define the security policies.

Job titles of recent computing and security technology graduates include:

- Security Administrator
- Chief Information Security Officer
- IT Audit Manager
- Project Manager
- Lead Systems Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more information on career opportunities.

### Facilities

**Drexel University Libraries**

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online.
at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

**iCommons**

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as "DreamSpark" that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

**Rush Building**

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

**University Crossings - Cyber Learning Center and Computer Lab**

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

**Research Laboratories**

The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

**Alumni Garden**

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

**3401 Market Street**

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cyberscience Institute (http://drexel.edu/cci/research/centers-institutes/Cyberscience). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

**Evaluations**

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computing & Security Technology degree is evaluated relative to the following Objectives and Outcomes.
BS Computing & Security Technology
Program Educational Objectives
Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the profession and community as demonstrated by contributions towards society’s greater good and prosperity

BS Computing & Security Technology
Program Student Outcomes
The program enables students to attain, by the time of graduation:

- An ability to apply knowledge of computing and mathematics appropriate to the program’s student outcomes and to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues and responsibilities
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Computing & Informatics Faculty

Larry Alexander, PhD (University of Pennsylvania) Executive in Residence. Research Professor. Large scale modeling and simulation, pattern recognition, the future of information technology.

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balducci, PhD (Texas Tech University) Senior Research Scientist, Applied Informatics Group. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

Jennifer Booker, PhD (Drexel University). Associate Teaching Professor. Software engineering, systems analysis and design, networking, statistics and measurement, process improvement, object-oriented analysis and design, bioinformatics, and modeling of biological systems.

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

John D’Ignazio, MS (Carnegie Mellon University). Assistant Teaching Professor. Human information interaction, digital curation, design of information infrastructures, methods development to elicit and evaluate impact on information environments, metadata schemes.

Prudence W. Dairymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Research and Teaching Professor. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.
M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing.

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval.

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Michael Khoo, PhD (University of Colorado at Boulder). Assistant Teaching Professor. The understandings and practices that users bring to their interactions with information systems, with a focus on the evaluation of digital libraries and educational technologies.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach.

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning.

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession.

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.
William C. Regli, PhD *(University of Maryland-College Park)*. Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Lori Richards, PhD *(University of North Carolina)*. Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD *(University of Wisconsin-Madison)*. Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS *(Drexel University)*. Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD *(Carnegie Mellon University)* Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS *(Drexel University)*. Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD *(Rutgers University)* Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD *(Tufts University)*. Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD *(Louisiana State University)* PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD *(Columbia University)*. Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD *(Purdue University)*. Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Deborah Turner, PhD *(University of Washington)*. Assistant Professor. Information behavior/interaction, management of information institutions, orality and information.

Kristene Unsworth, PhD *(University of Washington)*. Assistant Professor. Information policy, ethics, government information.

Filippos Vokolos, PhD *(Polytechnic University)*. Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD *(Federal University of Santa Catarina)*. Associate Professor. Knowledge-based systems; case-based reasoning; textual case-based reasoning; computational intelligence; knowledge discovery; uncertainty, mainly targeting knowledge management goals in different domains, e.g., software engineering, military, finance, law, bioninformatics, and health sciences.

Erija Yan, PhD *(Indiana University)*. Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD *(University of Arizona, Tucson)*. Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Valerie Ann Yonker, PhD *(Drexel University)*. Associate Teaching Professor. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

**Emeritus Faculty**

Michael E. Atwood, PhD *(University of Colorado)* Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD *(Rutgers University)*. Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD *(University of Wisconsin-Madison)*. Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD *(Florida State University)*. Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD *(Drexel University)*. Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD *(Drexel University)* Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Gerry Stahl, PhD *(University of Colorado, Northwestern University)*. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD *(University of California at Berkeley)*. Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD *(University of Pittsburgh)*. Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

**Data Science**

*Major: Data Science*
Degree Awarded: Bachelor of Science in Data Science (BSDS)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0401; 11.0501; 11.0802
Standard Occupational Classification (SOC) code: 15-1121; 15-1141

About the Program

The Bachelor of Data Science (BSDS) prepares students to meet the challenges presented by the explosive growth of very large scale and complex data sources. The availability of data from sources such as business activities, social media and scientific instruments constantly creates new problems requiring data-driven solutions and opportunities and problems for innovation. BS in Data Science students develop the knowledge and skill to address these opportunities for the benefit of individuals and organizations. Students in the degree complete a minor, typically in business or the sciences, to provide knowledge and skill in a specific subject area to which data science techniques can be applied.

Data Science students learn to:

• Define domain specific and context-relevant data analytics questions and hypotheses for individuals and organizations.
• Select relevant data sources and transform data suitable for solving data analytics problems.
• Identify appropriate techniques and tools for acquiring, retrieving, analyzing, and making use of the data.
• Apply data analytics techniques and skills to build analytical and predictive models for answering data science questions.
• Create visualizations and communicate data analytics results to a large audience and decision makers.
• Assess the necessary skills arising from the interdisciplinary nature of data science as a combination of hacking skills, analytical techniques, and domain knowledge.

The degrees in Computing and Security Technology (p. 188), Data Science, and Information Systems (p. 206) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Data Science web page (http://drexel.edu/cci/programs/undergraduate-programs/bs-datascience) on the College of Computing & Informatics’ website.

Computing and Informatics Requirements

| CI 101 Computing and Informatics Design I | 2.0 |
| CI 102 Computing and Informatics Design II | 2.0 |
| CI 103 Computing and Informatics Design III | 2.0 |
| CI 491 [WI] Senior Project I | 3.0 |
| CI 492 [WI] Senior Project II | 3.0 |
| CI 493 [WI] Senior Project III | 3.0 |

Mathematics and Statistics Requirements

Select one of the following sequences:

| Select the following sequences: | 12.0 |
| MATH 101 Introduction to Analysis I | |
| & MATH 102 and Introduction to Analysis II | |
| & MATH 180 and Discrete Computational Structures | |
| MATH 121 Calculus I | |
| & MATH 122 and Calculus II | |
| & MATH 180 and Discrete Computational Structures | |
| STAT 201 Introduction to Business Statistics | 4.0 |
| STAT 202 Business Statistics II | 4.0 |

Natural Science Requirements

Science electives: Select from ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval.

| ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research | 3.0 |
| ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing | 3.0 |
| ENGL 103 Composition and Rhetoric III: Themes and Genres | 3.0 |
| COM 230 Techniques of Speaking | 3.0 |
| or COM 310 Technical Communication | |

University and College Requirements

| UNIV C101 The Drexel Experience | 2.0 |
| or CI 120 CCI Transfer Student Seminar | |
| CIVC 101 Introduction to Civic Engagement | 1.0 |
| COOP 101 Career Management and Professional Development | 0.0 |

Minor Requirements 1

| Minor Requirements 1 | 24.0 |

Free Electives

| Free Electives | 31.0 |

Total Credits

| Total Credits | 188.0 |

1 Students should consult their academic advisor regarding a minor that requires more than 24.0 credits.
## Sample Plan of Study

**Term 1**
- **CI 101** Computing and Informatics Design I  
  Credits: 2.0
- **ENGL 101** Composition and Rhetoric I: Inquiry and Exploratory Research  
  Credits: 3.0
- **INFO 101** Introduction to Information Technology  
  Credits: 3.0
- **INFO 108** Foundations of Software  
  Credits: 3.0
- **MATH 101** or **MATH 121** Introduction to Analysis I or Calculus I  
  Credits: 4.0
- **UNIV CI101** The Drexel Experience  
  Credits: 1.0

Term Credits: 16.0

**Term 2**
- **CI 102** Computing and Informatics Design II  
  Credits: 2.0
- **CIVC 101** Introduction to Civic Engagement  
  Credits: 1.0
- **ENGL 102** Composition and Rhetoric II: Advanced Research and Evidence-Based Writing  
  Credits: 3.0
- **INFO 105** Introduction to Informatics  
  Credits: 3.0
- **INFO 151** Web Systems and Services I  
  Credits: 3.0
- **MATH 102** or **MATH 122** Introduction to Analysis II or Calculus II  
  Credits: 4.0
- **COOP 101** Career Management and Professional Development  
  Credits: 0.0

Term Credits: 16.0

**Term 3**
- **CI 103** Computing and Informatics Design III  
  Credits: 2.0
- **ENGL 103** Composition and Rhetoric III: Themes and Genres  
  Credits: 3.0
- **INFO 152** Web Systems and Services II  
  Credits: 3.0
- **INFO 215** Social Aspects of Information Systems  
  Credits: 3.0
- **MATH 180** Discrete Computational Structures  
  Credits: 4.0
- **UNIV CI101** The Drexel Experience  
  Credits: 1.0
- **COOP 101** Career Management and Professional Development  
  Credits: 0.0

**Minor in Data Science**

Data Science provides a foundation for problem-solving in a data-driven society. The minor in Data Science combined basic courses in statistics, information and technology and social contexts to address problems that require large and disparate datasets.

Any student in any major can benefit from a minor in data science. Graduates with such background knowledge are prepared to actively participate in the application of data science within their major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in data science.

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College bachelor's and master's degree programs as well as other options.

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics’ website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

Co-op/Career Opportunities

Co-op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

Career Opportunities

The new data science major provides valuable skills that can be transported to a number of job settings. The demand for graduates with data science knowledge is strong, and employers often want evidence of additional communication and problem-solving skills that can be applicable to specific disciplines. Data science program graduates could potentially serve as key members of organizational data science teams able to create novel information products, with an emphasis on solving problems that can only be addressed using large and disparate data sources. The program is also an excellent preparation for graduate study in data science.

Sample job titles for data science graduates include:

- Data Scientist
- Business Intelligence Officer
- Information Architect
- Usability Analyst

Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University's academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high
powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College's research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such as University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Data Science degree is evaluated relative to the following Objectives and Outcomes.

BS Data Science Program Educational Objectives

Within three to five years of graduation, alumni of the program are expected to achieve one or more of the following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the professional and community as demonstrated by contributions towards society's greater good and prosperity.

BS Data Science Program Student Outcomes

The program enables students to attain, by the time of graduation

- An ability to apply knowledge of computing and mathematics appropriate to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Information Science Faculty

Larry Alexander, PhD (University of Pennsylvania) Executive in Residence. Research Professor. Large scale modeling and simulation, pattern recognition, the future of information technology.

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement.
and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Jennifer Booker, PhD (Drexel University). Associate Teaching Professor. Software engineering, systems analysis and design, networking, statistics and measurement, process improvement, object-oriented analysis and design, bioinformatics, and modeling of biological systems.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visul analysis, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

John D'Ignazio, MS (Carnegie Mellon University). Assistant Teaching Professor. Human information interaction, digital curation, design of information infrastructures, methods development to elicit and evaluate impact on information environments, metadata schemes.

Prudence W. Dalrymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Research and Teaching Professor. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Jung-ran Park, PhD (University of Hawai’i at Manoa). Associate Professor. Computer-supported cooperative work, human-computer interaction, knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Aleksandra Sarcevic, PhD (Rutgers University). Assistant Professor. Computer-supported cooperative work, human-computer interaction, healthcare informatics, crisis informatics, social analysis of information and communications technology (ICT).

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Deborah Turner, PhD (University of Washington). Assistant Professor. Information behavior/interaction, management of information institutions, orality and information.

Kristene Unsworth, PhD (University of Washington). Assistant Professor. Information policy, ethics, government information.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor. Knowledge-based systems; case-based reasoning; textual case-based reasoning; computational intelligence; knowledge discovery; uncertainty, mainly targeting knowledge management goals.
in different domains, e.g., software engineering, military, finance, law, bioninformatics, and health sciences.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Valerie Ann Yonker, PhD (Drexel University). Associate Teaching Professor. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Informatics

Major: Informatics

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 188.0-189.0

Classification of Instructional Programs (CIP) code: 11.1014

Standard Occupational Classification (SOC) code: 15-1132; 15-1133

About the Program

Note: Effective Fall 2016, students will no longer be accepted into this program. Students are encouraged to apply for the BS in Data Science (p. 195) program, which encompasses the content of the BS in Informatics program while adding additional coverage in computational techniques.

The College of Computing & Informatics’ Bachelor of Science in Informatics (BSI) prepares students to extract and present valuable information from massive data sets. The volume of data from sources such as social media and scientific measurement continues to grow at high rates, and organizations are creating teams of technical experts who can deal with this deluge of data. BSI students develop the knowledge and skill to work on these problems in data science.

Informatics students learn to

• define information needs of individuals and organizations;
• select and transform data to increase usefulness for solving particular problems;
• analyze and synthesize unstructured data to create actionable information;
• create information visualizations for data exploration and presentation;
• manage very large volume data sources from acquisition through disposal;
• secure, preserve, and control access to data in a manner consistent with legal and organizational considerations.

The informatics curriculum focuses on the key components of informatics: people, information, and technology. The degree encompasses a broad range of topics related to the data life cycle from creation to presentation. To link the degree program to real work problems, students will be required to align themselves with a discipline through the identification of a minor.

### Minor in Informatics

*Note: Effective Fall Term 2015, students are no longer being accepted into this program.*

Informatics is the science of information, the practice of information processing, and the engineering of information systems. The minor in informatics combines basic courses in information systems and technology with courses that address the cognitive issues and social contexts in which information systems and technologies are embedded.

Any student in any major can benefit from a minor in informatics. Graduates with such background knowledge are prepared to actively participate in the application of information technology within their major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in informatics, information systems, or information technology.

### Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College’s bachelor’s and master’s degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel’s website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics’ website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

### Co-op/Career Opportunities

#### Co-Op Options

Two co-op options are available for this program:
Career Opportunities

The informatics major provides valuable skills that can be transported to a number of job settings. The demand for graduates with informatics knowledge is strong, and employers often want evidence of additional communication and problem-solving skills that can be applicable to specific disciplines. The program is also an excellent preparation for graduate study.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Informatics degree is evaluated relative to the following Outcomes and Objectives.

Program Educational Objectives

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Be a valued contributor to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
b. Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
c. Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
d. Demonstrate commitment and leadership within their profession and community as demonstrated by professional and community activity or contributions towards society’s greater good and prosperity

c. An ability to present data tailored to the information needs of different stakeholder groups using a variety of appropriate visualization techniques.

e. An ability to secure, retain, and preserve data and information using the latest techniques and in accordance with data life cycle management practices and current information policies at the organizational, local, national and global levels.

Computing & Informatics Faculty

Larry Alexander, PhD (University of Pennsylvania) Executive in Residence. Research Professor. Large scale modeling and simulation, pattern recognition, the future of information technology.

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

Jennifer Booker, PhD (Drexel University). Associate Teaching Professor. Software engineering, systems analysis and design, networking, statistics and measurement, process improvement, object-oriented analysis and design, bioinformatics, and modeling of biological systems.

David Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.
Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

John D'Ignazio, MS (Carnegie Mellon University). Assistant Teaching Professor. Human information interaction, digital curation, design of information infrastructures, methods development to elicit and evaluate impact on information environments, metadata schemes.

Prudence W. Dairymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Research and Teaching Professor. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval.

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Michael Khoo, PhD (University of Colorado at Boulder). Assistant Teaching Professor. The understandings and practices that users bring to their interactions with information systems, with a focus on the evaluation of digital libraries and educational technologies.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach.

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity.

Della Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.
Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona), Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Poppyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

William C. Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison), Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Deborah Turner, PhD (University of Washington). Assistant Professor. Information behavior/interaction, management of information institutions, orality and information.

Kristene Unsworth, PhD (University of Washington). Assistant Professor. Information policy, ethics, government information.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor. Knowledge-based systems; case-based reasoning; textual case-based reasoning; computational intelligence; knowledge discovery; uncertainty, mainly targeting knowledge management goals in different domains, e.g., software engineering, military, finance, law, bioninformatics, and health sciences.

Erija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Valerie Ann Yonker, PhD (Drexel University). Associate Teaching Professor. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.
Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Information Systems

Major: Information Systems
Degree Awarded: Bachelor of Science Degree (BS)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0401
Standard Occupational Classification (SOC) code: 11-3021

About the Program

The College of Computing & Informatics’ Bachelor of Science in Information Systems (BSIS) prepares students to apply information technology for the benefit of individuals and organizations. Students develop the skills and knowledge to design, develop, and manage leading-edge information systems. Since many Information Systems students choose careers in business organizations, a minor in business is built into the degree requirements.

The Information Systems curriculum prepares students for a wide range of information technology applications. Students learn how to determine client needs, design appropriate solutions, specify data architectures, and improve usability of systems.

The core courses in the program address topics including fundamentals of programming, system design, database management systems, networking, security and privacy, and social implications of information technology. These courses provide a foundation for more advanced courses in technical areas of interest to each student. The technical courses are supplemented by course in business, behavioral sciences, natural science, mathematics, and humanities to provide balance and useful supplemental materials for information systems careers.

The degrees in Computing and Security Technology (p. 188), Data Science (p. 195), and Information Systems share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Information Systems web page (http://drexel.edu/cci/programs/undergraduate-programs/bs-information-systems) on the College of Computing & Informatics’ website.

Business Minor Requirements (See Minor Requirements below) 24.0

Students not selecting a business minor are still required to take STAT 201.

Mathematics Requirements

Select one of the following sequences: 12.0

- MATH 101 Introduction to Analysis I
- MATH 102 Introduction to Analysis II
- MATH 180 and Discrete Computational Structures
- MATH 121 Calculus I
- MATH 122 and Calculus II
- MATH 180 and Discrete Computational Structures

Natural Science Requirements

Select 8.0 credits from any non-required courses from the following: ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS, HSCI, GEO, ENSS 8.0

Liberal Studies Requirements

**Business Minor Requirement**

In addition to taking STAT 201, students complete the requirements for one of the following business minors. Please note: MIS classes do not count towards the Business Administration Minor for Information Systems students. Students must choose another option to fulfill the Business Administration Minor requirements.

- Accounting (p. 330)
- Business Administration
- Economics
- Finance
- International Economics (p. 375)
- Legal Studies (p. 343)
- Marketing (p. 349)
- Operations & Supply Chain Management (p. 352)

**Total Credit: 194.0**

* See degree requirements (p. 206).

** COOP 101 is taken either winter or spring depending on co-op cycle. Please consult your advisor for additional information.

### Minor in Information Systems

The information systems minor is available to all University students in good standing, with the exception of students already majoring in information systems, information technology or informatics.

#### Required Courses

- INFO 101 Introduction to Information Technology 3.0

---

* Any non-required INFO course
The following list is a sample of recent co-op job titles and employers:

- Applications Architect, Aetna
- e-Communications Intern, Airgas
- PC Network Support, Aramark
- Information Systems Intern, Campbell's Soup
- Distributed WAN Support Co-op, Cigna
- Network Services, GlaxoSmithKline
- Programmer/Analyst, Independence Blue Cross
- Information Management Co-op, Johnson & Johnson
- Database Developer, Princeton Plasma Physics
- Website Developer, QVC
- Shared Services Co-op, Wyeth

### Career Opportunities

The demand for information systems professionals is strong. Graduates find careers in a number of areas, including designing information systems, leading project teams, planning, developing, and marketing information systems. Most information systems students enter the professional world right after graduation, but some continue their studies in advanced information technology programs.

Job titles of recent information systems graduates include:

- Security Analyst
- Network Systems Analyst
- Database Administrator
- Data Communications Analyst
- Systems Administrator
- Systems Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

### Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W. W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

### iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

Two information system electives 6.0

Total Credits 25.0

* An additional 6 credits or more are to be chosen from other course offerings in information systems pertinent to the student’s overall program of study. Guidance in selecting these electives will be provided by staff and faculty of the College of Information Science and Technology.

### Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the College’s bachelor’s and master’s degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel’s website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics’ website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).
The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the National SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building
The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab
CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories
The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GiCL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden
The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street
3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Systems degree is evaluated relative to the following Objectives and Outcomes.

BS in Information Systems Program Educational Objectives
Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
b. Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
c. Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
d. Demonstrate commitment and leadership within their profession and community as demonstrated by professional and community activity or contributions towards society’s greater good and prosperity

BS in Information Systems Student Outcomes
The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline
b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
d. An ability to function effectively on teams to accomplish a common goal

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

John D'Ignazio, MS (Carnegie Mellon University). Associate Teaching Professor. Human information interaction, digital curation, design of information infrastructures, methods development to elicit and evaluate impact on information environments, metadata schemes.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code,
formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Michael Khoo, PhD (University of Colorado at Boulder). Assistant Teaching Professor. The understandings and practices that users bring to their interactions with information systems, with a focus on the evaluation of digital libraries and educational technologies.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

William C. Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.
Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Deborah Turner, PhD (University of Washington). Assistant Professor. Information behavior/interaction, management of information institutions, orality and information.

Kristene Unsworth, PhD (University of Washington). Assistant Professor. Information policy, ethics, government information.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor. Knowledge-based systems; case-based reasoning; textual case-based reasoning; computational intelligence; knowledge discovery; uncertainty, mainly targeting knowledge management goals in different domains, e.g., software engineering, military, finance, law, bioinformatics, and health sciences.

Erija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Valerie Ann Yonker, PhD (Drexel University). Associate Teaching Professor. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Information Technology

Major: Information Technology
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 188.0
Classification of Instructional Programs (CIP) code: 11.0401
Standard Occupational Classification (SOC) Code: 11-3021; 15-1133

About the Program

Note: Effective Fall 2016, students will no longer be accepted into this program. Students are encouraged to apply for the BS in Computing & Security Technology (p. 188) program, which encompasses the content of the BS in Information Technology program plus a significant expansion in coverage of computer security technology.

The College of Computing & Informatics' Bachelor of Science in Information Technology (BSIT) prepares students to manage the infrastructure of the information revolution. With organizations and individuals increasingly dependent on information technology, there is great demand for expertise related to the servers, databases, networks, and software systems that provide the “pipes and wires” of the Internet.
world. BSIT students tend to be hands-on problem solvers who like to apply their technical expertise to operate and manage information technology.

The Information Technology curriculum helps students develop expertise in the core information technologies of networking, databases, Web systems, programming, security, and human-computer interaction. BSIT students learn to install, operate, monitor, and upgrade these technologies to provide the technology environments required to deliver information products and services. BSIT students learn to approach the application of information technology from a user-centered perspective aimed at meeting the needs of users and organizations in a societal and global context.

The core courses in the program address the core information technologies mentioned above. These foundation courses are followed by advanced courses focusing on management and administration of the core technologies (including database administration, network administration, etc.).

Total Credit: 188.0
**Accelerated Degrees**

The College of Computing & Informatics offers several accelerated degree programs designed to allow students to complete both a bachelor's degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the College of Computing & Informatics' bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/accelerated-degrees) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

**Co-op/Career Opportunities**

**Co-Op Options**

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

The following list is a sample of recent co-op job titles and employers:

- **Collaborative Services Analyst**, GlaxoSmithKline
- **Information Technology & Computer Support Consultant**, University of Pennsylvania
- **Operations Development**, PJM Interconnection
- **Portal Operations Analyst**, SAP America
- **PECO Technical Services**, Exelon Corporation

**Career Opportunities**

The demand for information technology professionals continues to be strong. Graduates find careers in a number of areas, including designing IT services, leading project teams, providing user support, operating and managing networks, and administrating servers and databases.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Drexel University Libraries**

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

**iCommons**

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

**Rush Building**

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.
The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab
CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories
The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden
The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street
3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such as University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Technology degree is evaluated relative to the following Objectives and Outcomes.

BS in Information Technology Program Educational Objectives
Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
b. Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
c. Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
d. Demonstrate commitment and leadership within their profession and community as demonstrated by professional and community activity or contributions towards society’s greater good and prosperity

BS in Information Technology Student Outcomes
The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline
b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
d. An ability to function effectively on teams to accomplish a common goal
e. An understanding of professional, ethical, legal, security and social issues and responsibilities
f. An ability to communicate effectively with a range of audiences
g. An ability to analyze the local and global impact of computing on individuals, organizations, and society
h. Recognition of the need for and an ability to engage in continuing professional development
i. An ability to use current techniques, skills, and tools necessary for computing practice
j. An ability to use and apply current technical concepts and practices in the core information technologies
k. An ability to identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems
l. An ability to effectively integrate IT-based solutions into the user environment

m. An understanding of best practices and standards and their application

n. An ability to assist in the creation of an effective project plan

The BS in Information Technology is accredited by the Computing Accreditation Commission (CAC) of ABET, http://www.abet.org.

To view the latest BS in Information Technology program enrollment numbers, please click here (http://drexel.edu/ccj/programs/undergraduate-programs/Facts).

Computing & Informatics Faculty

Larry Alexander, PhD (University of Pennsylvania) Executive in Residence. Research Professor. Large scale modeling and simulation, pattern recognition, the future of information technology.

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Balduccini, PhD (Texas Tech University) Senior Research Scientist, Applied Informatics Group. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science, Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

Jennifer Booker, PhD (Drexel University). Associate Teaching Professor. Software engineering, systems analysis and design, networking, statistics and measurement, process improvement, object-oriented analysis and design, bioinformatics, and modeling of biological systems.

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

John D'Ignazio, MS (Carnegie Mellon University). Assistant Teaching Professor. Human information interaction, digital curation, design of information infrastructures, methods development to elicit and evaluate impact on information environments, metadata schemes.

Prudence W. Dalrymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Research and Teaching Professor. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval
Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Michael Khoo, PhD (University of Colorado at Boulder). Assistant Teaching Professor. The understandings and practices that users bring to their interactions with information systems, with a focus on the evaluation of digital libraries and educational technologies.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Adelaide Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach.

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning.

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession.

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

William C. Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.
Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Deborah Turner, PhD (University of Washington). Assistant Professor. Information behavior/interaction, management of information institutions, orality and information.

Kristene Unsworth, PhD (University of Washington). Assistant Professor. Information policy, ethics, government information.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor. Knowledge-based systems; case-based reasoning; textual case-based reasoning; computational intelligence; knowledge discovery; uncertainty, mainly targeting knowledge management goals in different domains, e.g., software engineering, military, finance, law, bioinformatics, and health sciences.

Erija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Valerie Ann Yonker, PhD (Drexel University). Associate Teaching Professor. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus.

Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Software Engineering

Major: Software Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Program (CIP) code: 14.0903
Standard Occupational Classification (SOC) code: 15-1132; 15-1133

About the Program

The College of Computing & Informatics' Bachelor of Science in Software Engineering (BSSE) prepares students to design and build software systems. Software is essential to the functioning of modern society but high quality software is very challenging to create. Software engineering focuses on the knowledge and skills to meet that challenge and create high quality software on schedule within budget.

The Software Engineering curriculum addresses a full range of software activities including gathering client requirements, designing and constructing software solutions, testing software, and modifying and extending existing systems. The curriculum also recognizes that most software is developed by teams, and students develop skills in project management and team operation. Graduates are well-prepared to
function as software engineering team members and also move toward software engineering management.

The core courses address programming and use of software development tools, specification and design, software architecture, verification and validation, software evolution, and team projects. These courses are supplemented with courses drawn from computer science and Informatics that provide theoretical background and application knowledge. The full curriculum prepares BSSE students to apply processes, methods, and tools to the problem of building and maintaining software with a defined level of quality, at a predictable cost, on a predictable schedule.

Additional Information

For more information about this program, please visit the BS in Software Engineering web page (http://drexel.edu/cci/programs/undergraduate-programs/bs-software-engineering) on the College of Computing & Informatics’ website.

Science electives (see below)

Program Electives

- **Computing & Informatics electives:** any non-required CS, INFO, SE course numbered 300 or higher except CS 350 or CS 451
- **Science electives:** any CHEM (except 111, 112, 113, 114, 151), BIO (except 161, 162, 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except 050, 100, 103, 104, 105, 106, 121, 122, 151, 160, 305, 306, 307, 324, 405; cannot take both PHYS 131 and PHYS 181), ENVS, PHEV. Cannot take NFS courses.
- **Business electives:** any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX
- **Social Studies electives:** any AFAS, ANTH, HIST, GST, JUDA, PSCI, PSY (except 330, 332, 337, 364, 365), SOC (except 364, 365), WGST
- **Arts & Humanities electives:** any ARCH, ARTH, CMGT, CJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except 101, 102, 103, 105), ESTM, FASH, FMVD, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/moderlang/languages) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 152, ANIM 211, ANIM 212

Sample Plan of Study

5 YR UG Co-op Concentration

5 YR UG Co-op Concentration
**Minor in Software Engineering**

The Software Engineering minor is available to all University students in good standing, with the exception of Software Engineering majors.

**Prerequisites**

One of the following Mathematics sequences must be completed before entering the program:

- MATH 101 and MATH 102
- MATH 121 and MATH 122

**Requirements**

**Term Credits**

- **Term 1**
  - CI 101: Computing and Informatics Design I 2.0
  - CS 164: Introduction to Computer Science 3.0
  - ENGL 101: Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
  - MATH 121: Calculus I 4.0
  - UNIV C1101: The Drexel Experience 1.0
  - Term Credits 17.0
  - Science lab 4.0

- **Term 2**
  - CI 102: Computing and Informatics Design II 2.0
  - CIVC 101: Introduction to Civic Engagement 1.0
  - COOP 101: Career Management and Professional Development 0.0
  - CS 171: Computer Programming I or 175: Advanced Computer Programming I 3.0
  - ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
  - MATH 122: Calculus II 4.0
  - Term Credits 17.0
  - Science lab 4.0

- **Term 3**
  - CI 103: Computing and Informatics Design III 2.0
  - CS 172: Computer Programming II or 176: Advanced Computer Programming II 3.0
  - ENGL 103: Composition and Rhetoric III: Themes and Genres 3.0
  - MATH 123: Calculus III 4.0
  - UNIV C1101: The Drexel Experience 1.0
  - Term Credits 17.0

- **Term 4**
  - COM 230: Techniques of Speaking 3.0
  - CS 265: Advanced Programming Tools and Techniques 3.0
  - CS 270: Mathematical Foundations of Computer Science 3.0
  - SE 210: Software Specification and Design I 3.0
  - Term Credits 15.0

- **Term 5**
  - CS 260: Data Structures 3.0
  - INFO 210: Database Management Systems 3.0
  - MATH 221: Discrete Mathematics 3.0
  - SE 211: Software Specification and Design II 3.0
  - Term Credits 15.0

- **Term 6**
  - COM 310 [WI]: Technical Communication 3.0
  - CS 281: Systems Architecture 4.0
  - PSY 101: General Psychology I 3.0
  - SE 310: Software Architecture I 3.0
  - STAT 201: Introduction to Business Statistics 3.0
  - Term Credits 15.0

- **Term 7**
  - CS 283: Systems Programming 3.0
  - SE 311: Software Architecture II 3.0
  - STAT 202: Business Statistics II 4.0
  - Term Credits 17.0

- **Term 8**
  - INFO 420: Software Project Management 3.0
  - PHIL 105: Critical Reasoning 3.0
  - SE 320: Software Verification and Validation 3.0
  - Term Credits 16.0

- **Term 9**
  - INFO 310: Human-Computer Interaction II 3.0
  - PHIL 311: Ethics and Information Technology 3.0
  - SE 410: Software Evolution 3.0
  - Term Credits 15.0

- **Term 10**
  - CI 491 [WI]: Senior Project I 3.0
  - INFO 330: Computer Networking Technology I or CS 472: Computer Networks: Theory, Applications and Programming 4.0
  - Select one of the following: 4.0
    - ACCT 110: Accounting for Professionals
    - ECON 201: Principles of Microeconomics
    - ECON 202: Principles of Macroeconomics
  - Term Credits 16.0

- **Term 11**
  - CI 492 [WI]: Senior Project II 3.0
  - PSY 330: Cognitive Psychology 3.0
  - Select one of the following: 4.0
    - ACCT 110: Accounting for Professionals
    - ECON 201: Principles of Microeconomics
    - ECON 202: Principles of Macroeconomics
  - Term Credits 16.0

- **Term 12**
  - CI 493 [WI]: Senior Project III 3.0
  - Arts & Humanities elective 3.0
  - Free elective 3.0
  - Term Credits 12.0

**Total Credit**: 188.0

**Free elective**: 3.0

**Requirements**: 16.0

**Free elective**: 3.0

**Term Credits**: 15.0
an estimated 186,600 new jobs by 2024. Although they have jobs in most fastest growing U.S. careers requiring at least a bachelor's degree, with Handbook (http://www.bls.gov/ooh), software developer is among the according to the U.S. Bureau of Labor Statistics' Occupational Outlook software project teams. They have knowledge and skills to help them graduates are particularly well suited to work as members or leaders of development in a variety of application areas. Software engineering career opportunities in software design and the demand for software engineering professionals is quite strong.

**Career Opportunities**

The demand for software engineering professionals is quite strong. Graduates can expect career opportunities in software design and development in a variety of application areas. Software engineering graduates are particularly well suited to work as members or leaders of software project teams. They have knowledge and skills to help them develop quality software within schedule and cost constraints.

According to the U.S. Bureau of Labor Statistics' Occupational Outlook Handbook (http://www.bls.gov/ooh), software developer is among the fastest growing U.S. careers requiring at least a bachelor's degree, with an estimated 186,600 new jobs by 2024. Although they have jobs in most industries, many software developers work in computer systems design and related services firms or software publishers. The field's rapid growth is mainly due to the increase in demand for computer software, especially in healthcare.

Most software engineering students enter the professional world right after graduation, but some continue their studies in advanced software engineering programs.

Job titles of recent software engineering graduates include:

- Software Engineer
- Software Architect
- Software System Project Manager
- Software Project Team Leader

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Accelerated Degrees**

The College of Computing & Informatics offers several accelerated degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the Computing and Informatics bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS /MBA Accelerated Degree (BS/MBA) (BS & MBA in four years, including 1 Co-op option only)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on the Drexel website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

**Co-op/Career Opportunities**

**Co-Op Options**

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree: 5-year/2 co-op

**iCommons**

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is
a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

**Rush Building**

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building houses 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

**University Crossings - Cyber Learning Center and Computer Lab**

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

**Research Laboratories**

The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

**Alumni Garden**

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

**3401 Market Street**

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

**Evaluations**

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the software engineering degree is evaluated relative to the following Objectives and Outcomes.

**Program Educational Objectives**

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Graduates of the program obtain employment as software developers, where their software and communication skills eventually propel them toward technical and administrative leadership positions in industry and government.

b. Graduates of the program demonstrate an ability to continue to learn throughout their career and to keep pace with changing technology as appropriate to their positions.

c. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and completing technical graduate courses and other technical education to position them to advance software engineering practice as senior technical staff members or managers.

d. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and graduating from MSc and PhD degree programs to position them to contribute to the intellectual foundations of the discipline of software engineering as researchers in industrial and government laboratories as well as in academia.

e. Graduates of the program advance toward becoming leaders in disciplines other than software engineering by enrolling and graduating from graduate-level degree programs in complimentary disciplines such as law and business, where the BSSE serves as an educational foundation.

f. Graduates of the program will demonstrate an awareness of their professional and social responsibility as software engineers by participation in professional activities and application of their knowledge for the good of society.
Software Engineering Student Outcomes

The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of mathematics, science and engineering
b. An ability to design and conduct experiments, as well as to analyze and interpret data
c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability
d. An ability to function on multidisciplinary teams
e. An ability to identify, formulate and solve engineering problems
f. An understanding of professional and ethical responsibility
g. An ability to communicate effectively
h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context
i. A recognition of the need for, and an ability to engage in life-long learning
j. A knowledge of contemporary issues
k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Additional Information

The Software Engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET (http://www.abet.org).

To view the latest BS in Software Engineering program enrollment numbers, please click here (http://drexel.edu/cci/programs/undergraduate-programs/Facts).

Computing & Informatics Faculty

Denise E. Agosto, PhD (Rutgers, The State University of New Jersey), Professor. Information behavior, public libraries, gender, children, young adults, multicultural materials.

Larry Alexander, PhD (University of Pennsylvania) Executive in Residence. Research Professor. Large scale modeling and simulation, pattern recognition, the future of information technology.

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augustink, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Marcello Baldi, PhD (Texas Tech University) Senior Research Scientist, Applied Informatics Group. Associate Research Professor. Logic programming, declarative programming, answer set programming, knowledge representation, various types of reasoning.

Andrea Forte, PhD (Georgia Institute of Technology). Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.
Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Christopher Geib, PhD (University of Edinburgh). Associate Professor. Decision making and reasoning under conditions of uncertainty, planning, scheduling, constraint, based reasoning, human computer and robot interaction, probabilistic reasoning, computer network security, large scale process control, user interfaces.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Michael Khoo, PhD (University of Colorado at Boulder). Assistant Teaching Professor. The understandings and practices that users bring to their interactions with information systems, with a focus on the evaluation of digital libraries and educational technologies.

Xia Lin, PhD (University of Maryland). Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Linda S. Marion, PhD (Drexel University). Teaching Professor. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Hawaii at Manoa). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (University of North Carolina). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popayack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

William Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.
This minor is designed to equip individuals with the fundamental competencies expected of professionals in the field of emergency management. Natural or man-made disasters can strike at anytime and anywhere. They take many forms—a hurricane, an earthquake, a tornado, a flood, a fire or a hazardous spill, an act of nature or an act of terrorism. Disasters can build over days or weeks, or hit suddenly, without warning. Every year, millions of people face disasters and their consequences.

### Minor in Emergency Management

Natural or man-made disasters can strike at anytime and anywhere. They take many forms—a hurricane, an earthquake, a tornado, a flood, a fire or a hazardous spill, an act of nature or an act of terrorism. Disasters can build over days or weeks, or hit suddenly, without warning. Every year, millions of people face disasters and their consequences.

This minor is designed to equip individuals with the fundamental competencies expected of professionals in the field of emergency management. It covers the following areas:

- **Emergency Management Principles**: Understanding the concepts and principles of emergency management, including disaster preparedness, response, and recovery.
- **Disaster Preparedness**: Strategies for preparing individuals, communities, and organizations to respond to disasters.
- **Disaster Response and Recovery**: Techniques for effectively responding to disasters and recovering from their aftermath.
- **Disaster Management Tools**: Use of technology and software tools in emergency management.
- **Case Studies and Case Management**: Analyzing real-world disaster scenarios and applying case management techniques.
- **Psychosocial Support and Community Resilience**: Strategies for providing psychological support and enhancing community resilience.
- **Policy and Planning**: Developing emergency management policies and plans at various levels.

By completing this minor, students will gain a comprehensive understanding of emergency management and be well-prepared for careers in disaster response and recovery.
management. It provides the knowledge, skills, and abilities necessary to be competent emergency managers.

Students interested in pursuing a minor in emergency management may include individuals majoring in architecture, civil engineering, construction management, criminal justice, political science, and professional studies.

The minor is available to all University students in good standing.

### Minor Requirements

**INFO 101** Human-Computer Interaction I 3.0  
**INFO 150** Ubiquitous Information Technologies 3.0  
**INFO 216** Issues in Information Policy 3.0  
**INFO 310** Human-Computer Interaction II 3.0  
**INFO 405** Social and Collaborative Computing 3.0  
**INFO 440** Social Media Trend Spotting 3.0

Select 2 of the following: 6.0  
**CS 275** Web and Mobile App Development  
**CS 338** Graphical User Interfaces  
**CS 345** Computer Game Design and Development  
**CS 432** Interactive Computer Graphics  
**INFO 220** Geographic Information Science  
**INFO 250** Information Visualization  
**INFO 350** Visual Analytics  
**INFO 405** Social and Collaborative Computing

**Total Credits** 24.0

### Minor in Human Centered Computing

Human-Centered Computing looks to improve the integration of computing in the lives of individuals and the collaboration within groups. The minor in Human-Centered Computing combines basic courses in areas including human computer interaction, collaborative work, and graphical user interfaces.

A student in any major can benefit from a minor in Human-Centered Computing. The minor is available to all University students in good standing.

**INFO 110** Human-Computer Interaction I 3.0  
**INFO 150** Ubiquitous Information Technologies 3.0  
**INFO 216** Issues in Information Policy 3.0  
**INFO 310** Human-Computer Interaction II 3.0  
**INFO 405** Social and Collaborative Computing 3.0  
**INFO 440** Social Media Trend Spotting 3.0

Select 2 of the following: 6.0  
**CS 275** Web and Mobile App Development  
**CS 338** Graphical User Interfaces  
**CS 345** Computer Game Design and Development  
**CS 432** Interactive Computer Graphics  
**INFO 220** Geographic Information Science  
**INFO 250** Information Visualization  
**INFO 350** Visual Analytics  
**INFO 405** Social and Collaborative Computing

**Total Credits** 24.0

### Minor in Security Technology

The demand for individuals with security related skills is increasing and essential in today's internet-dominated society. Computer and information systems managers are becoming more involved with the security of data, responsible for sophisticated and more efficient computer networks and increasingly more complex websites and intranets. The minor in Security Technology combines basic courses in security and technology required to help organizations keep their computer systems secure.

Any student in any major can benefit from a minor in Security Technology. Graduates with such background knowledge are prepared to actively participate in the application of security technology within the major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in Computing and Security Technology.

**INFO 101** Introduction to Information Technology 3.0  
**INFO 110** Human-Computer Interaction I 3.0  
**INFO 210** Open System I 3.0  
**INFO 310** Access Control and Intrusion Detection Technology 3.0  
**INFO 315** Information Technology Security I 3.0  
**INFO 393** Information Technology Security Policies 3.0  
**INFO 420** Information Technology Security II 3.0  
**INFO 422** Incident Response Best Practices 3.0  
**INFO 432** Information Technology Security Systems Audits 3.0  
**CT 210** Security and Information Warfare 3.0  
**CT 225** Data Mining Technology for Security 3.0  
**CT 315** Security Management Practice 3.0  
**CT 362** Search and Rescue 3.0  
**CT 393** Critical Incident Stress Management 3.0  
**CT 415** Disaster Recovery and Continuity Planning 3.0  
**CT 420** Information Technology Security I 3.0

**Total Credits** 24.0

### Certificate in Computing and Security Technology

**Certificate Level:** Post-Baccalaureate  
**Certificate Type:** Post-Baccalaureate Certificate  
**Number of Credits to Completion:** 24.0  
**Instructional Delivery:** Online; Campus (part-time only)  
**Calendar Type:** Quarter  
**Expected Time to Completion:** 5 years  
**Financial Aid Eligibility:** Not aid eligible  
**Classification of Instructional Program (CIP) Code:** 11.1003  
**Standard Occupational Classification (SOC) Code:** 15-1152

*Note: Effective Fall 2014, students are no longer being accepted into this certificate program.*

The certificate in computing & security technology is designed for computing technology professionals who have a BS degree in computing technology or considerable experience in the area, and who are seeking a career change or professional advancement with an additional focus on security.

The curriculum provides a deep understanding of the basic security-related issues and technologies as well as the flexibility to choose additional areas of study tailored to the needs of the individual student.

### Required Courses

**INFO 300** Security Technology Models and Architecture 3.0  
**CT 312** Access Control and Intrusion Detection Technology 3.0

The College of Engineering

The College of Engineering curriculum is designed to provide students a thorough understanding of scientific, mathematical, and engineering fundamentals—as well as the ability to apply these areas of knowledge creatively to a wide variety of engineering problems.

Majors

- Architectural Engineering (BS) (p. 230)
- Chemical Engineering (BS) (p. 237)
- Civil Engineering (BS) (p. 240)
- Computer Engineering (BS) (p. 244)
- Construction Management (BS) (p. 251)
  - Real Estate Concentration (p. 253)
- Electrical Engineering (BS) (p. 255)
- Engineering (BS) (p. 262)
- Engineering Technology (BS) (p. 264)
  - Biomedical Engineering Technology Concentration (p. 265)
  - Electrical Engineering Technology Concentration (p. 267)
  - Industrial Engineering Technology Concentration (p. 268)
  - Mechanical Engineering Technology Concentration (p. 270)
- Environmental Engineering (BS) (p. 271)
- Materials Science and Engineering (BS) (p. 275)
- Mechanical Engineering (BS) (p. 282)
- Property Management (BS) (p. 288)
- Systems Engineering (BS/MS) (p. 290)

Minors

- Architectural Engineering (p. 235)
- Computer Engineering (p. 247)
- Construction Management (p. 254)
- Electrical Engineering (p. 258)
- Engineering Management (p. 292)
- Engineering Policy Analysis (p. 292)
- Entertainment Engineering (p. 293)
- Environmental Engineering (p. 274)
- Global Engineering (p. 293)
- Materials Science and Engineering (p. 279)
- Mechanical Engineering (p. 285)
- Nuclear Engineering (p. 294)
- Project Management (p. 294)
- Property Management (p. 290)
- Real Estate (p. 295)
- Systems Engineering (p. 295)

Certificates

- Construction Management (I, II, III, IV) (p. 295)

About the College

Drexel University's College of Engineering has emphasized its strengths in engineering, science and technology to train students to become the leaders of the future. In little over a century, Drexel University has transformed itself into a large, comprehensive institution committed to excellence in education, research and service to the engineering society and to the broader community. Although much has changed, the original mission of the University still rings true today.

The College of Engineering offers students a diverse academic learning and research environment embodying the highest standards of knowledge and preparing them to impact society's greatest challenges. Through entrepreneurial risk-taking and exploration, students are encouraged to find innovative solutions that promote economic development and improve life.

In addition to the traditional engineering curriculum, the college offers Property Management (p. 288), Engineering Technology (p. 264), and Construction Management (p. 251).

Objectives of the traditional Undergraduate Engineering Program

The profession of engineering is concerned with turning the natural elements and energies to the service of mankind. The objectives of the undergraduate program in the College of Engineering (http://www.drexel.edu/coe) are:

- To offer an education that will give graduates the flexibility to adjust to future changes in technology
- To develop a sense of professionalism and entrepreneurship
- To provide a framework for concentrated study in a professional area

To implement those objectives the curricula of the College of Engineering are designed to provide a firm grounding in basic science and liberal arts, along with broad-based engineering sciences and professional engineering subjects.

Cooperative Education

In five-year cooperative programs, engineering majors spend a total of 12 terms in school and six terms on co-op assignment. Freshmen attend classes for three terms. During their sophomore, pre-junior, and junior years, students generally attend class for two terms and are assigned a cooperative employment position for two terms each year.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

About the Traditional Engineering Curriculum

Degree Requirements

The degree of Bachelor of Science in the engineering specialties is comprised of academic work and six terms of co-op or engineering experience for the five-year program. For the four-year program, only two terms of co-op are required. Transfer students must complete a minimum of two terms of co-op or engineering experience in order to earn a cooperative engineering degree accredited by ABET (http://www.abet.org).
Engineering student must maintain an overall grade point average of 2.0 in all required courses in their major.

The Bachelor of Science in Engineering (BSE) program is a customizable undergraduate engineering degree program offered in the College of Engineering. The program is designed for students who are seeking an interdisciplinary education rooted in engineering. The degree is structured so students achieve a strong foundation in science, math and engineering. Upper level engineering electives can be chosen to fit the student’s individual interests and career objectives. The BS in Engineering program allows the student to create their own engineering curriculum path with the assistance of their BSE advisors. The program is also flexible enough so that students can complete up to two minors in areas which may include but are not limited to environmental studies, finance, entrepreneurship, music, legal studies or pre-med. To learn more about the Bachelor of Science in Engineering program, please visit the Program Overview webpage (http://drexel.edu/engineering/areas-of-study/engineering/BSE/ProgramOverview).

Curricular Organization

Students in the traditional engineering programs study the same subjects during the three terms in the first year. During the two terms of the sophomore year, students begin taking department specific coursework.

The first five terms are devoted to those subjects that form the foundation of the engineering curriculum. Courses in the core engineering curriculum are organized and taught to provide an integrated view of the basic sciences and an introduction to the art of engineering through group projects that deal with open-ended problems characteristic of the practice of engineering. Students also learn to use the modern tools of engineering both on the computer and in the laboratory.

The college considers it essential that students entering the Drexel Engineering Curriculum be placed in courses that take advantage of their abilities and prior training. Student preparation level is determined by a review committee that evaluates the student’s high school record, standardized test scores, and placement tests administered during freshman orientation.

Students who demonstrate the preparation and skills to succeed in our integrated engineering calculus course immediately will be placed in the course starting in the fall term. Students who are not prepared for this sequence may participate in a special "pre-engineering" program before the fall term. These students may also have a modified fall schedule and may need summer school during the following summer.

In the second year, professional subjects are introduced, and all the first-level professional courses are completed by the junior year. The senior year in all curricula contains at least one elective sequence so that students can study some aspect of engineering more deeply. In addition, all curricula provide a design experience in the senior year. Recognizing the importance of general education studies in the education of an engineer, all curricula require that courses be taken in this area. These requirements are described in more detail in the General Education Requirements (http://drexel.edu/engineering/resources/undergraduate-advising/current-students/electives/general-ed-electives).

</tbody>
</table>

In addition, engineering students complete thirty (30.0) credits of General Education Requirements (p. 229).

Electives

In addition to the electives in the General Education electives there are two types of elective sequences in the engineering curricula: technical electives and free electives. Technical electives are courses in engineering, science, or management that build on the required professional courses and lead to a specific technical specialization. Possible elective sequences should be discussed with and approved by advisors before the end of the junior year. Free electives are any courses for which students are eligible and that are not remedial in nature for engineering students.

General Education Requirements

The General Education Program is designed to give engineering students an opportunity to take a set of courses that complement their technical studies and satisfy their intellectual and/or career interests. All engineering majors must take thirty (30.0) credits. Nine (9.0) of the thirty credits are designated as follows and must be completed by all majors:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research</td>
<td>3.0</td>
<td></td>
</tr>
<tr>
<td>ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing</td>
<td>3.0</td>
<td></td>
</tr>
<tr>
<td>ENGL 103 Composition and Rhetoric III: Themes and Genres</td>
<td>3.0</td>
<td></td>
</tr>
</tbody>
</table>

General Education requirements for specific majors can be found in the degree requirements for each major. The remaining credits can be chosen from the disciplines listed below.

Course Subjects

This following list is a sampling of subject codes for courses that can be taken to fulfill General Education requirements; other courses may be accepted upon advisor approval.

Accounting (ACCT), Africana Studies (AFAS), Anthropology (ANTH), Arabic (ARBC), Architecture (ARCH), Art History (ARTH), Business Law (BLAW), Chinese (CHIN), Communication (COM), Criminology & Justice Studies (CJS), Culinary Arts (CULA), Customer Operations (CUST),
Freshman Design courses taken by all new freshmen are held exclusively in the Innovation Studio which was completed in the fall of 2015. A team of Drexel faculty and staff designed the studio to allow activities of many scales as well as to promote open communication within and across groups of students. The lab tables accommodate work in small and larger groups.

The Innovation Studios are an example of Drexel’s commitment to undergraduate education, but providing up-to-date, high-quality technology to facilitate the kind of experiential learning that keeps Drexel at the cutting edge.

**Department Facilities**

Departments within the College of Engineering have laboratory equipment appropriate for required lab coursework within curriculum. Most engineering department webpages describe their specialized facilities in detail.

### Architectural Engineering

**Major:** Architectural Engineering  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 193.0  
**Co-op Options:** Three Co-op (Five years); One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 14.0401  
**Standard Occupational Classification (SOC) code:** 11-9041

**About the Program**

The architectural engineering major prepares graduates for professional work in the analysis, design, construction, and operation of residential, commercial, institutional, and industrial buildings. The program develops engineers familiar with all aspects of safe and economical construction. Students study the principles of structural support and external cladding, building environmental systems, and project management and develop depth in at least one area. The program integrates building disciplines, including coordination with architects, construction managers, civil, mechanical, and electrical engineers, and others. Students use computer-aided design tools to understand system interactions, perform analysis, design, scheduling, and cost analysis, and present their work.

The first two years of the curriculum cover fundamentals necessary for all engineers. The pre-junior and junior years emphasize building systems and the principles governing their performance. In addition to the core engineering and science, students learn architectural approaches through studio design. Seniors focus on either structural or building environmental systems design, as well as a full-year realistic design project. The academic program is complemented by exposure to professional practice in the co-op experience.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All architectural engineering students participate in a design project.

**Mission Statement**

The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and
communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives
Architectural engineering graduates will become professionals who analyze, design, construct, manage, or operate residential, commercial, institutional and industrial buildings and systems, or advance knowledge of the field.

Student Outcomes
The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for architectural engineering practice.

Concentration Options
Mechanical Concentration (HVAC)
Students who choose the mechanical concentration (HVAC) prepare for careers dealing with the building environment. As co-ops and graduates, they will be involved in the many design aspects of building environmental control, including:

• building load definitions
• equipment selection and design
• distribution system design
• control systems design
• energy analysis and system optimization
• building operation for safety, economy and maximum performance

Structural Concentration
Students who choose the structural concentration prepare for careers dealing with the building structure. As co-ops and graduates, they will be involved in the design of the many aspects of building structure including:

• structural system design
• foundation system design

Digital Building Concentration
Students who choose the digital building concentration prepare for careers dealing with the role of computer technology in building design, construction and operation. As co-ops and graduates, they will be involved in:

• development and use of Building Information Models (BIM) and databases
• configuration and operation of building sensor and actuator networks and monitoring systems
• developing and maintaining construction schedules, databases and monitoring systems

Additional Information

### Concentration Courses

Students select one of the following concentrations for a total of 29.0 credits:

#### Mechanical Concentration

- **AE 430** Control Systems for HVAC
- **CIVE 370** Introduction to Structural Analysis
- **CIVE 371** Introduction to Structural Design
- **CIVE 372** Structural Laboratory
- **MEM 345** Heat Transfer
- **MEM 413** HVAC Loads
- **MEM 414** HVAC Equipment
- Three professional electives

#### Structural Concentration

- **CIVE 300** Structural Analysis I
- **CIVE 301** Structural Design I
- **CIVE 310** Soil Mechanics I
- **CIVE 400** First Principles of Structural Design
- **CIVE 401** Structural Design II
- **CIVE 402** Structural Design III
- **CIVE 410** Foundation Engineering
- Two professional electives

#### Digital Building Concentration

- **AE 510** Intelligent Buildings
- **CIVE 370** Introduction to Structural Analysis
- **CIVE 371** Introduction to Structural Design
- **CIVE 372** Structural Laboratory
- **CMGT 361** Contracts And Specifications I
- **CMGT 467** Techniques of Project Control
- **INFO 210** Database Management Systems
- **INFO 203** Information Technology for Engineers
- Two professional electives

#### Co-op/Career Opportunities

The major in architectural engineering prepares students for professional work in residential, commercial, institutional, and industrial building systems, in cooperation with architects and other engineers.

*See degree requirements (p. 231).*

**Students are asked to speak with their program advisor before registering for the INFO elective.**
Sample Co-op Experiences

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Project technician, major university: “Studied and surveyed existing buildings and facilities for: their compliance with the Americans with Disabilities Act, heating and air conditioning equipment sizing, electrical loads, and their planning and usage of space. Designed improvements from the field surveys taken, and developed construction drawings. Worked closely with the workforce in implementing these changes.”

CAD technician, private engineering firm: “Prepared computer generated construction plans for various water and sewer reconstruction projects. . . . Was able to expand my knowledge of Auto CAD to include Advanced Design Modules.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor’s Programs

A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Bachelor’s/Master’s Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. For more information about this program, visit the Department's BS/MS Dual Degree Program (http://www.cae.drexel.edu/dual_degree.asp) page.

Minor in Architectural Engineering

The minor in architectural engineering, designed to broaden the professional capabilities of students, offers the building systems portion of the architectural engineering curriculum with enough attention to structural components for completeness. Pursuing a minor in architectural engineering can be of interest to mechanical engineering students who wish to learn the application of HVAC systems within the building context; to civil engineering students who require knowledge of large-scale infrastructure systems; and to chemical engineering students who wish to understand the energy and distribution aspects of process plant design.

The minor consists of a minimum of 24.0 credits total, with five required core courses. Students take a minimum of eight additional credits taken from a list of optional courses.

While this minor is primarily designed to provide technical knowledge and skills to other engineers, with the appropriate prerequisites students from other disciplines—such as architecture—can also complete this minor.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the College of Engineering. Students from other colleges will need the appropriate background prerequisite courses in physics, mathematics and thermodynamics.

Total Credits 24.5

Facilities

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work).
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (University of Alberta), Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.
A. Emin Aktan, PhD (University of Illinois at Urbana-Champaign) John Roebling Professor of Infrastructure Studies. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (University of California, San Diego). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (Drexel University). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (West Virginia University). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containsments; engineering education.

Peter DeCarlo, PhD (University of Colorado). Assistant Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (Virginia Polytechnic Institute). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (Carnegie-Mellon University). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (University of Illinois-Urbana) L. D. Betz Professor and Department Head. Civil, Architectural and Environmental Engineering. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (McMaster University). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (Imperial College). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (University of Iowa) Dean of the College of Engineering and Distinguished Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (University of Texas at Austin). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (Drexel University). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (Colorado State University). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (University of Pennsylvania) Associate Dean for Undergraduate Affairs. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (Cornell University). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Joseph V. Mullin, PhD (Pennsylvania State University) Associate Department Head. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (University of Virginia) Graduate Studies Advisor. Associate Professor. Environmental remediation; contaminant and bacterial transport in porous media and bacterial response to dynamic environments.

Michael Ryan, PhD (Drexel University). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology.

Christopher Sales, PhD (University of California, Berkeley). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (Johns Hopkins University). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (Massachusetts Institute of Technology). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (University of Toronto). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (University of Texas-Austin) Associate Department Head for Undergraduate Programs. Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (University of Iowa). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (University of Illinois). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.
Emeritus Faculty

Harry G. Harris, PhD (Cornell University). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Chemical Engineering

Major: Chemical Engineering
Degree Awarded: Bachelor of Science in Chemical Engineering (BSCHE)
Calendar Type: Quarter
Total Credit Hours: 184.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0701
Standard Occupational Classification (SOC) code: 17-2041

About the Program

The department of Chemical and Biological Engineering’s chemical engineering curriculum is structured so that students progress through sequences in the fundamental physical sciences, humanities, engineering sciences, and engineering design.

Chemical engineers are concerned primarily with process engineering, the conversion of raw materials into valuable products. The products can include pharmaceuticals, specialized plastics, petrochemicals, materials for biomedical applications, and energy. The processes, which usually start out at a small laboratory scale, must be developed for production at a large chemical plant scale. The large change in scale requires careful engineering to minimize environmental contamination and to ensure public safety.

The Department of Chemical and Biological Engineering is responsible for equipping our graduates with the broad technical knowledge and teamwork skills required for them to make substantial contributions to society.

Sample Senior Design Projects

A special feature of the major is senior design. A group of students in the chemical engineering major works with a faculty advisor to develop a significant design project. Some recent examples include:

- Design of a process to make petrochemical intermediates
- Plastics recycling design
- Process design for antibiotic products

Program Educational Objectives

The chemical engineering major has four goals for its students:

- Our graduates will contribute to research and development at the forefront of chemical engineering and related fields.
- Our graduates will succeed in careers requiring strong skills in engineering, science, communication, and teamwork.
- Our graduates will continue to upgrade their technological skills through life-long learning involving self- or group-study.
- Our graduates will conduct their work with an understanding of its global impact and ethical consequences.

To help students reach these goals, the curriculum is structured so that they progress through sequences in the fundamental physical sciences, humanities, engineering sciences, and design.

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;
b) an ability to design and conduct experiments, as well as to analyze and interpret data;
c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
d) an ability to function on multidisciplinary teams;
e) an ability to identify, formulate, and solve engineering problems;
f) an understanding of professional and ethical responsibility;
g) an ability to communicate effectively;
h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
i) a recognition of the need for, and an ability to engage in life-long learning;
j) a knowledge of contemporary issues;
k) an ability to use the techniques, skills, and modern engineering tools necessary for chemical engineering practice.

Additional Information

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Complete 5 credits from the following:

- CHE 360
- BIO 214
- BIO 311
- BIO 218
- PHY 101
- PHY 102

**Core Courses**

- ENGR 121 Computation Lab I
- ENGR 122 Computation Lab II
- ENGR 220 Fundamentals of Materials
- MATH 121 Calculus I
- MATH 122 Calculus II
- MATH 210 Multivariable Calculus
- PHY 101 Fundamentals of Physics I
- PHY 102 Fundamentals of Physics II

**Professional Requirements**

- CHE 211 Material and Energy Balances I
- CHE 212 Material and Energy Balances II
- CHE 220 Computational Methods in Chemical Engineering I
- CHE 230 Chemical Engineering Thermodynamics I
- CHE 320 Computational Methods in Chemical Engineering II
- CHE 330 Chemical Engineering Thermodynamics II
- CHE 331 Separation Processes
- CHE 341 Fluid Mechanics
- CHE 342 Heat Transfer
- CHE 343 Mass Transfer
- CHE 350 Statistics and Design of Experiments
- CHE 351 Chemical Engineering Laboratory I
- CHE 352 Chemical Engineering Laboratory II
- CHE 362 Chemical Kinetics and Reactor Design
- CHE 371 Engineering Economics and Professional Practice
- CHE 372 Integrated Case Studies in Chemical Engineering
- CHE 453 Chemical Engineering Laboratory III
- CHE 464 Process Dynamics and Control
- CHE 466 Chemical Process Safety
- CHE 471 Process Design I
- CHE 472 Process Design II
- CHE 473 Process Design III
- CHE 474 Physical Chemistry and Applications III
- CHEM 214 Organic Chemistry I
- CHEM 242 Organic Chemistry II
- CHEM 356 Physical Chemistry Laboratory

**Technical Electives**

12.0

**Total Credits** 184.0

*General Education Requirements (p. 229).

**An optional concentration in Biological Engineering is available. If you elect to take that option, the 12.0 technical elective credits will count toward the concentration.

**Biological Engineering Concentration**

**Core Courses**

- BIO 218 Principles of Molecular Biology
- BIO 270 Development Biology
- BIO 306 Biochemistry Laboratory
- BIO 311 Biochemistry
- BIO 214 Principles of Cell Biology
- BIO 360 BioProcess Principles

**Complete 5 credits from the following:**

- BIO 215 [WI] Techniques in Cell Biology
- BIO 219 [WI] Techniques in Molecular Biology
- BIO 221 Microbiology
- BIO 222 Microbiology Laboratory
- BIO 318 Biology of Cancer
- BIO 346 Stem Cell Research
- BIO 404 Structure and Function of Biomolecules
- BIO 415 Proteins

**Graduate-Level Electives**

- CHE 502 Mathematical Methods in Chemical Engineering
- CHE 513 Chemical Engineering Thermodynamics
- CHE 525 Transport Phenomena I
- CHE 543 Kinetics & Catalysis I
- CHE 554 Process Systems Engineering
- CHE 562 Bioreactor Engineering
- CHE 564 Unit Operations in Bioprocess Systems
- CHE 614 Chemical Engineering Thermodynamics II

**Sample Plan of Study**

**5 YR UG Co-op Concentration**

**Term 1**

- CHEM 101 General Chemistry I
- COOP 101 Career Management and Professional Development
- ENGL 102 Composition and Rhetoric I: Inquiry and Exploratory Research
- ENGR 100 Beginning Computer Aided Drafting for Design
- ENGR 101 Engineering Design Laboratory I
- ENGR 121 Computation Lab I
- MATH 121 Calculus I
- UNIV E101 The Drexel Experience

**Term Credits** 16.5

**Term 2**

- CHEM 102 General Chemistry II
- CIVC 101 Introduction to Civic Engagement
- ENGL 103 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing
- ENGR 102 Engineering Design Laboratory II
- ENGR 122 Computation Lab II
- MATH 122 Calculus II
- PHYS 101 Fundamentals of Physics I

**Term Credits** 19.5

**Term 3**

- BIO 141 Essential Biology
- ENGL 103 Composition and Rhetoric III: Themes and Genres
- ENGR 103 Engineering Design Laboratory III
- MATH 220 Multivariable Calculus
- PHYS 102 Fundamentals of Physics II

**Term Credits** 17.5

**Term 4**

- CHEM 211 Material and Energy Balances I
- CHEM 220 Computational Methods in Chemical Engineering I
- CHEM 241 Organic Chemistry I

**Term Credits** 4.0
Chemical engineers tend to work for large corporations with such job assignments as process engineering, design engineering, plant operation, research and development, sales, and management. They also work for federal and state government agencies on projects related to environmental problems, defense, energy, and health-related research.

Some major employers of Drexel’s chemical engineering graduates are DuPont, Merck, BASF, ExxonMobil, Dow Chemical, and Air Products. A number of graduates go on to pursue master’s and/or doctoral degrees. Graduate schools that Drexel’s chemical engineers have attended include the University of California at Berkeley and Massachusetts Institute of Technology, among others.

Co-op Experiences

Drexel is located in downtown Philadelphia with easy access to major pharmaceutical, chemical, and petroleum companies. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Research assistant, chemicals manufacturer: “Conducted research in a developmental polyamide process. Aspects included scale-up from bench-scale to batch demonstration, installation and calibration of online composition sensors, off-line analytical techniques to assess product quality, and interfacing with plant sites to define and standardize a critical quality lab procedure. Documented results in technical memos and in a plant presentation . . . I had a lot of freedom and responsibility. It was great interacting with other researchers and technicians. Everyone was so helpful.”

Co-op engineer, chemicals manufacturer: “Created material safety data sheets, which involved chemical composition, hazard communication, occupational safety and health, emergency response, and regulatory issues for numerous products and wastes. Handled domestic and international regulatory reviews. Determined hazardous waste reporting requirements, handling and disposal procedures. Evaluated toxicological and ecological data for assessment of hazard ratings. Provided input on product safety technical reports.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

The Department of Chemical and Biological Engineering occupies the 2nd, 3rd, and 4th floors of the Center for Automation Technology. Approximately 35,000 square feet (gross) are available for the department.

Two thousand square feet of laboratory facilities are designed for the pre-junior and junior year laboratory courses. Experiments in these laboratory courses focus on applying concepts in thermodynamics, fluid mechanics, heat and mass transfer, separations, and reaction engineering. Laboratory courses are run with class sizes of 18 students or less.

The department has two computer laboratories:

- A second computer lab contains over 30 individual work stations with general and engineering-specific software.
- A second computer lab contains over 30 individual work stations with general and engineering-specific software.
Many undergraduate students participate in research projects in faculty laboratories as part of independent study coursework or BS/MS thesis work. Chemical engineering faculty are engaged in a wide range of research activities in areas including energy and the environment, polymer science and engineering, biological engineering, and multi-scale modeling and process systems engineering. Further details can be found on the Department of Chemical and Biological Engineering’s Research Group (http://drexel.edu/cbe/research/groups) web page.

Dual/Accelerated Degree

Accelerated Program

The accelerated program of the College of Engineering provides opportunities for highly-talented and strongly-motivated students to progress toward their educational goals essentially at their own pace. Through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Bachelor’s/Master’s Dual Degree Program

Drexel offers a combined BS/MS degree program for our top engineering students who want to obtain both degrees in the same time period as most students obtain a Bachelor’s degree. In chemical engineering, the course sequence for BS/MS students involves additional graduate courses and electives.

Chemical Engineering Faculty

Cameron F. Abrams, PhD (University of California, Berkeley). Professor. Molecular interactions in biophysics and materials; receptors for insulin and growth factors; and HIV-1 envelope structure and function.

Nicolas Alvarez, PhD (Carnegie Mellon University). Assistant Professor. Photonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Jason Baxter, PhD (University of California, Santa Barbara). Associate Professor. Solar cells, semiconductor nanomaterials, ultrafast spectroscopy.

Richard A. Cairncross, PhD (University of Minnesota). Associate Professor. Effects of microstructure on transport and properties of polymers; moisture transport and degradation on biodegradation of biodegradable polymers; production of biofuel.

Nily R. Dan, PhD (University of Minnesota). Associate Professor. Design of synthetic gene and drug carriers; design of polymeric drug carriers; metal cluster formation in polymeric matrices; colloidal absorption in patterned surfaces.

Aaron Fafarman, PhD (Stanford University). Assistant Professor. Photovoltaic energy conversion; solution-based synthesis of semiconductor thin films; colloidal nanocrystals; electromodulation and photomodulation spectroscopy.

Vibha Kalra, PhD (Cornell University) Chemical and Biological Engineering. Assistant Professor. Electrodes for energy storage and conversion; supercapacitors; Li-S batteries; fuel cells; flow batteries; electrospraying for nanofibers; molecular dynamics simulations; Nanotechnology, polymer nanocomposites.

Kenneth K.S. Lau, PhD (Massachusetts Institute of Technology) Chemical and Biological Engineering. Associate Professor. Surface science; nanotechnology; polymer thin films and coatings; chemical vapor deposition.

Raj Mutharasan, PhD (Drexel University) Frank A. Fletcher Professor. Biochemical engineering; cellular metabolism in bioreactors; biosensors.

Giuseppe R. Palmese, PhD (University of Delaware) Department Head, Chemical and Biological Engineering. Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Joshua Snyder, PhD (Johns Hopkins University). Assistant Professor. Electrocatalysis (energy conversion/storage); heterogeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Masoud Soroush, PhD (University of Michigan). Professor. Process systems engineering; polymer engineering.

John H. Speidel, BSHE, MCHE (University of Delaware; Illinois Institute of Technology). Teaching Professor. Chemical process safety; process design engineering.

Maureen Tang, PhD (University of California, Berkeley). Assistant Professor. Batteries and fuel cells; nonaqueous electrochemistry; charge transport at interfaces.

Michael Walters, PhD (Drexel University). Assistant Teaching Professor. Undergraduate laboratory.

Stephen P. Wrenn, PhD (University of Delaware) Assistant Dean of Graduate Affairs, College of Engineering. Associate Professor. Biomedical engineering; biological colloids; membrane phase behavior and cholesterol transport.

Emeritus Faculty

Civil Engineering

Major: Civil Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 190.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0801
Standard Occupational Classification (SOC) code: 17-2051

About the Program

The civil engineering major prepares students in the fundamental principles necessary to practice this profession in any of its branches, including construction management, water resources, structural, transportation, environmental, geotechnical, and public facilities engineering.

Civil engineers are active in the planning, design, construction, research and development, operation, maintenance, and rehabilitation of large engineering systems. A particular focus is the reconstruction of the
nation’s infrastructure through solutions that minimize the disruption of social and natural environments.

Civil engineering graduates are grounded in the fundamental principles necessary for the practice of this profession in any of its modern branches, including construction management, water resources engineering, structural engineering, geotechnical engineering, transportation engineering, and environmental engineering.

Seven of the required courses in the discipline include integral laboratories or field projects for both educational illustration and professional practice exposure.

Careful selection of the electives specified in the curriculum can lead to a wide variety of career objectives. For instance, students with an interest in water resources engineering may elect advanced courses in hydrology, ecology, and chemistry; select senior professional electives in the geotechnical and water resources areas; and choose appropriate topics for senior design and senior seminar. Seniors, with the approval of the department head, can elect certain graduate courses.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All civil engineering students participate in a design project.

Mission Statement
The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives
Civil engineering graduates will become professionals who analyze, design, construct, manage or operate physical infrastructure and systems, or advance knowledge of the field.

Student Outcomes
The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for civil engineering practice.

Additional Information
The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Select one of the following:  
CIVE 370  Introduction to Structural Analysis  
CIVE 300  Structural Analysis I  
Based on whether or not students are pursuing a structural or non-structural concentration, students select one of the following options:  
CIVE 301  Structural Design I  
CIVE 371  Introduction to Structural Design & CIVE 372 and Structural Laboratory  
Total Credits  190.5  

* General Education Requirements (p. 229).  
** A sequence of three courses in a major area of study is required, with a total of six 3-credit professional electives.

Sample Plan of Study

BS Civil Engineering

5 YR UG Co-op Concentration

Term 1  Credits
CHEM 101  General Chemistry I  3.5  
COOP 101  Career Management and Professional Development  0.0  
ENGL 101  Composition and Rhetoric I: Inquiry and Exploratory Research  3.0  
ENGR 100  Beginning Computer Aided Drafting for Design  1.0  
ENGR 101  Engineering Design Laboratory I  2.0  
ENGR 121  Computation Lab I  2.0  
MATH 121  Calculus I  4.0  
UNIV E101  The Drexel Experience  1.0  
Term Credits  16.5  

Term 2  Credits
CHEM 102  General Chemistry II  4.5  
CIVC 101  Introduction to Civic Engagement  1.0  
ENGL 102  Composition and Rhetoric II: Advanced Research and Evidence-Based Writing  3.0  
ENGR 102  Engineering Design Laboratory II  2.0  
ENGR 122  Computation Lab II  1.0  
MATH 122  Calculus II  4.0  
PHYS 101  Fundamentals of Physics I  4.0  
Term Credits  19.5  

Term 3  Credits
BIO 141  Essential Biology  4.5  
ENGL 103  Composition and Rhetoric III: Themes and Genres  3.0  
ENGR 103  Engineering Design Laboratory III  2.0  
MATH 200  Multivariable Calculus  4.0  
PHYS 102  Fundamentals of Physics II  4.0  
Term Credits  17.5  

Term 4  Credits
CAEE 202  Introduction to Civil, Architectural & Environmental Engineering  3.0  
ENGR 201  Evaluation & Presentation of Experimental Data I  3.0  
ENGR 220  Fundamentals of Materials  4.0  
ENGR 231  Linear Engineering Systems  3.0  
PHYS 201  Fundamentals of Physics III  4.0  
Term Credits  17.0  

CAEE 203  System Balances and Design in CAEE  3.0  
ENGR 202  Evaluation & Presentation of Experimental Data II  3.0  
ENGR 210  Introduction to Thermodynamics  3.0  
ENGR 232  Dynamic Engineering Systems  3.0  
MEM 202  Statics  3.0  
Term Credits  15.0  

Term 6  Credits
CIVE 320  Introduction to Fluid Flow  3.0  
ENGR 361  Statistical Analysis of Engineering Systems  3.0  
ENVE 300  Introduction to Environmental Engineering  3.0  
MEM 230  Mechanics of Materials I  4.0  
General Education Elective*  3.0  
Term Credits  16.0  

Term 7  Credits
CAEE 212  Geologic Principles for Infrastructure & Environmental Engineering  4.0  
CIVE 240 [WI]  Engineering Economic Analysis  3.0  
CIVE 250  Construction Materials  4.0  
CIVE 330  Hydraulics  4.0  
General Education Elective*  3.0  
Term Credits  18.0  

Term 8  Credits
CIVE 310  Soil Mechanics I  4.0  
CIVE 430  Hydrology  3.0  
CIVE 370  Introduction to Structural Analysis  3.0  
or 300 Structural Analysis I  3.0  
General Education Elective*  3.0  
Free Elective  3.0  
Term Credits  16.0  

Term 9  Credits
CIVE 301  Structural Design I (Non-structural concentration takes CIVE 371 & CIVE 372)  4.0  
CIVE 375  Structural Material Behavior  3.0  
CIVE 410  Foundation Engineering  3.0  
General Education Electives*  3.0  
Term Credits  13.0  

Term 10  Credits
CAE 491 [WI]  Senior Design Project I  3.0  
CIVE 477 [WI]  Seminar  2.0  
Professional Electives*  6.0  
General Education Elective*  3.0  
Term Credits  14.0  

Term 11  Credits
CAE 492 [WI]  Senior Design Project II  3.0  
CIVE 478 [WI]  Seminar  1.0  
Professional Electives*  6.0  
General Education Elective*  3.0  
Term Credits  13.0  

Term 12  Credits
CAE 493 [WI]  Senior Design Project III  3.0  
Free Elective  3.0  
Professional Electives*  6.0  
General Education Elective*  3.0  
Term Credits  15.0  

Total Credit: 190.5  

* See degree requirements (p. 241).

Co-op/Career Opportunities

When students complete their co-op jobs, they are asked to write an overview of
their experiences. These brief quotes are taken from some recent student reports:

*Engineering construction inspector, state department of transportation:* Supervised daily activities involved in the roadway construction of the interstate bypass. Recorded daily visual inspection reports for soil sub-base and materials placed on site. Aided senior roadway engineers in approving grade prior to asphalt placement. Used various instruments to check temperature and depths for asphalt placement. Took part in on-site discussions with contractor to clear up any daily construction problems that would hinder quality of construction."

*Construction inspector, municipal department of public property:* "Inspected work performed by private contractors on city public works construction and rehabilitation projects for adherence to contract plans and specifications. Projects included health centers, police and fire stations, libraries, city hall, transit concourses, and prisons. Responsible for daily inspection reports and overall coordination for each respective project. Also responsible for reviewing bills and writing contract modifications and amendments. . . .the variety of work was excellent."

*Environmental co-op, chemicals manufacturer:* "Compiled data and wrote monthly regulatory reports, in charge of hazardous waste management and small projects as needed. . . . I had my own responsibilities that had an impact on the entire company. Employer was really interested in my opinion and gave me a chance to demonstrate my abilities, but also knew when to step in. Everybody was willing to answer any questions I may have had."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

## Dual/Accelerated Degree

### Accelerated program

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, this program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

### Dual Degree Bachelor's Programs

A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Civil Engineering students can also complete a dual degree with the Bachelor of Science in Environmental Engineering.

### Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information about this program, visit the Department’s BS/MS Dual Degree Program (http://www.drexel.edu/cae/academics/bs-environmental-engineering/Accelerated%20and%20Dual%20Degree%20Programs%20CAEE) web page.

## Facilities

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work).
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements.
- A $4.5-million instruction and research lab renovation was funded by the National Science Foundation, alumni, and corporations.

## Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (*University of Alberta*). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (*University of Illinois at Urbana-Champaign*) John Roebling Professor of Infrastructure Studies. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (*University of California, San Diego*). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (*Drexel University*). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (*West Virginia University*). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (*University of Colorado*). Assistant Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (*Virginia Polytechnic State University*). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (*Virginia Polytechnic Institute*). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (*Carnegie-Mellon University*). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (*University of Illinois-Urbana*) L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.
Ahmad Hamid, PhD (McMaster University). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (Imperial College). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (University of Iowa) Dean of the College of Engineering and Distinguished Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (University of Texas at Austin). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (Drexel University). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (Colorado State University). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (University of Pennsylvania) Associate Dean for Undergraduate Affairs. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (Cornell University). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Joseph V. Mullin, PhD (Pennsylvania State University) Associate Department Head. Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (University of Virginia) Graduate Studies Advisor. Associate Professor. Environmental remediation; contaminant and bacterial transport in porous media and bacterial response to dynamic environments.

Michael Ryan, PhD (Drexel University). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology

Christopher Sales, PhD (University of California, Berkeley). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (Johns Hopkins University). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (Massachusetts Institute of Technology). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (University of Toronto). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (University of Iowa). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (University of Illinois). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (Cornell University). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Computer Engineering

Major: Computer Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 192.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0901
Standard Occupational Classification (SOC) code: 15-1132; 15-1133; 15-1143; 17-2031

About the Program

The major provides a broad focus on digital circuit design, computer hardware and organization, programming and computer software, algorithms, and networks.

Computer engineers design smaller, faster, and more reliable computers and digital systems, embed microprocessors in larger systems (e.g., anti-lock brake systems), work in theoretical issues in computing, use object-oriented programming languages, and design large-scale software systems and computer networks. Computer engineers may work in positions that apply computers in control systems, digital signal processing, telecommunications, and power systems, and may design very large-scale integration (VLSI) integrated circuits and systems.

The computer engineering degree program is designed to provide our students with breadth in engineering, the sciences, mathematics, and the humanities, as well as depth in both software and hardware disciplines
appropriate for a computer engineer. It embodies the philosophy and style of the Drexel Engineering Curriculum, and will develop the student's design and analytical skills. In combination with the co-op experience, it opens to the student opportunities in engineering practice, advanced training in engineering or in other professions, and an entry to business and administration.

The computer engineering program's courses in ECE are supplemented with courses from the departments of Mathematics and Computer Science. Students gain the depth of knowledge of computer hardware and software essential for the computer engineer.

Mission Statement
The ECE Department at Drexel University (http://drexel.edu/ece) serves the public and the university community by providing superior career-integrated education in electrical and computer engineering; by conducting research in these fields, to generate new knowledge and technologies; and by promoting among all its constituents professionalism, social responsibility, civic engagement and leadership.

Program Educational Objectives
The Electrical and Computer Engineering Program Educational Objectives are such that its alumni, in their early years after graduation can:

1. Secure positions and continue as valued, creative, dependable, and proficient employees in a wide variety of fields and industries, in particular as electrical and computer engineers;
2. Succeed in graduate and professional studies, such as engineering, science, law, medicine and business;
3. Pursue professional development through lifelong learning opportunities for a successful and rewarding career;
4. Provide leadership in their profession, in their communities, and in the global society;
5. Contribute to their professional disciplines body of knowledge;
6. Function as responsible members of society with an awareness of the social and ethical ramifications of their work.

Student Outcomes
The department's student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for computer engineering practice.

Additional Information

Additional information about the major is available on the ECE Department website (http://www.ece.drexel.edu/Undergraduate_Programs2.html).

For advising questions, please e-mail advising@ece.drexel.edu.

To make an appointment, please call 215.895.2837.

Drop-in hours: Please e-mail advising@ece.drexel.edu for up-to-date drop-in availability.

* General Education Requirements (p. 229).
** In addition to completing 192.0 credits, students majoring in computer engineering student must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their Computer Engineering courses.
Co-op/Career Opportunities

Drexel University's co-op program has an 80 year history and is one of the oldest and largest co-op programs in the world. Students graduate with 6-18 months of full time employment experience, depending on their choice of a 4-year or 5-year program. The majority of Computer Engineering students in ECE choose the 5-year program and graduate with 18 months of full-time work experience, and often receive a job offer from their third co-op employer or from a connection made from one of their co-op experiences.

Computer engineers work for computer and microprocessor manufacturers; manufacturers of digital devices for telecommunications, peripherals, electronics, control, and robotics; software engineering; the computer network industry; and related fields. A degree in computer engineering can also serve as an excellent foundation to pursue graduate professional careers in medicine, law, business, and government.

Graduates are also pursuing advanced studies in electrical and computer engineering, aerospace engineering, and mechanical engineering at such schools as MIT, Stanford, Princeton, Georgia Institute of Technology, University of California at Berkeley, University of Pennsylvania, and University of Maryland.

The Steinbright Career Development Center had a co-op placement rate of approximately 99% for electrical and computer engineering majors.

Co-op employers for computer engineering majors include:

- Comcast Corporation
- Independence Blue Cross
- Lockheed Martin
- Micron Technology, Inc
- National Board of Medical Examiners
- PJM Interconnection, LLC
- SAP America
- Susquehanna International Group LLC
- UNISYS Corporation
- Woodward McCoach, Inc.
- Amazon, Inc.
- Microsoft's Explore Internship Program
- South Korea KAIST Hubo lab

For more information about the co-op process, please contact the Steinbright Career Development Center (http://drexel.edu/scdc).

Dual/Accelerated Degree

Accelerated Program

The accelerated programs of the College of Engineering provide opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, and combined bachelor's/master's programs.

Dual Degree Bachelor's Programs

With careful planning, students can complete both a Computer Engineering and an Electrical Engineering degree in the time usually required to complete one degree. For detailed information the student should contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising).

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information on these and other options, visit the Department of Electrical and Computer Engineering BS/MS (http://drexel.edu/ece/academics/undergrad/bs-ms) page.

Minor in Computer Engineering

The computer engineering minor is designed to provide students from other computer-intensive majors—such as computer science or other engineering majors—with a foundation of knowledge in the hardware portion of computer systems. The minor consists of a minimum of seven ECE courses. There are four required courses and an additional 12.0 credits of elective courses. Students majoring in Electrical Engineering and minoring in Computer Engineering may only choose CE minor electives from the ECEC courses.

Prerequisites

The minor assumes that students will have a background in mathematics, physics, and computer programming equivalent to that covered in the first two years of engineering.

Calculus prerequisites should include MATH 121 (p. 244), MATH 122 (p. 244) and MATH 200 (p. 244). Physics requirements are PHYS 101 (p. 244), PHYS 102 (p. 244) and PHYS 201 (p. 244). Programming experience must include ENGR 121/ENGR 122 or CS 171 (p. 244) at the minimum. CS 172 (p. 244), CS 260 (p. 244) and CS 265 (p. 244) are also recommended, and are required for some upper level ECEC courses. Courses taken to meet these requirements will not count toward the minor.

**Research Laboratories at the ECE Department**

**Adaptive Signal Processing and Information Theory Research Group**

The Adaptive Signal Processing and Information Theory Research Group (http://www.ece.drexel.edu/walsh/aspitrg/home.html) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

i) Delay mitigating codes for network coded systems,

ii) Distributed estimation in sensor networks via expectation propagation,

iii) Turbo speaker identification,

iv) Performance and convergence of expectation propagation,

v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

**Applied Networking Research Lab**

Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

**Bioimage Laboratory**

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

**Data Fusion Laboratory**

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

**Drexel Network Modeling Laboratory**

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

**Drexel Power-Aware Computing Laboratory**

The Power-Aware Computing Lab (http://dpac.ece.drexel.edu) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

**Drexel University Nuclear Engineering Education Laboratory**

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

**Drexel VLSI Laboratory**

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in
these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

**Drexel Wireless Systems Laboratory**

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

**Ecological and Evolutionary Signal-processing and Informatics Laboratory**

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (http://www.ece.drexel.edu/ga/EEEI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and interspecies relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

**Electric Power Engineering Center**

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

**Electronic Design Automation Facility**

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

**Microwave-Photonics Device Laboratories**

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz-1.3 GHz and 45 Mhz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwarz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetc CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

**Music and Entertainment Technology Laboratory**

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

**NanoPhotonics+ Lab (http://drexelnanophotonics.com)**

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

**Opto-Electro-Mechanical Laboratory**

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging,
communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

Plasma and Magnetics Laboratory

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation, development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

Power Electronics Research Laboratory

The Power Electronics Research Laboratory (PERL) is involved in circuit design and testing, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMTP, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

RE Touch Lab

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscience and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

Testbed for Power-Performance Management of Enterprise Computing Systems

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare’s ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

Computer Engineering Faculty

Suryadevara Basavaiah, PhD (University of Pennsylvania), Teaching Professor. Computer engineering; computer engineering education; custom circuit design; VLSI technology; process and silicon fabrication

Tom Chmielewski, PhD (Drexel University). Assistant Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK

Fernand Cohen, PhD (Brown University). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization

Kapil Dandekar, PhD (University of Texas-Austin) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (Drexel University). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Bruce A. Eisenstein, PhD (University of Pennsylvania) Vice Dean, College of Engineering; Arthur J. Rowland Professor. Professor. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (Brown University) Vice Dean, Graduate College. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (University of Maryland-College Park). Professor. Biological and biomedical applications of nanoscale magnetic systems.

Eli Fromm, PhD (Jefferson Medical College) LeRoy A. Brothers University Professor / Director of Center for Educational Research. Professor. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD (University of Pennsylvania). Professor. Computerized instruments and measurements; undergraduate engineering education.

Allon Guez, PhD (University of Florida). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.
Students interested in extending their construction management studies that are designed to produce well-rounded construction professionals.

Students in Drexel's Construction Management program receive broad participation in the liberal arts and free elective requirements. Pursuing majors in art and science. While an understanding of the technical aspects of construction is extremely important, it is also essential that construction professionals have knowledge of the business and management aspects of the profession. While construction has traditionally been a very conservative industry, the increasing rate of technological development and competition in the industry serves to accelerate the development of new construction methods, equipment, materials, and management techniques. As a result of these forces, there is an increasing need for innovative and professionally competent construction professionals.

The Construction Management major prepares students for all phases of operation and management of the construction organization including cost estimating, project scheduling, and planning. Students are able to choose from a wide range of subjects in the social sciences and humanities to satisfy electives in the liberal arts and free elective requirements. Pursuing part-time, degree completion on average takes six years.

About the Program

Construction management is a dynamic profession that is a combination of art and science. While an understanding of the technical aspects of construction is extremely important, it is also essential that construction professionals have knowledge of the business and management aspects of the profession. While construction has traditionally been a very conservative industry, the increasing rate of technological development and competition in the industry serves to accelerate the development of new construction methods, equipment, materials, and management techniques. As a result of these forces, there is an increasing need for innovative and professionally competent construction professionals.
into real estate development should consider the concentration in real estate. This concentration in real estate is designed for students to attain the knowledge and skills required to create and maintain built environments for living, working and entertainment purposes, as well as to explore issues in the real estate development process and the industry as a whole.

**Program Delivery Options**

Program delivery options for the Construction Management program include:

- A traditional 5-year with co-op
- A part-time study option
- The Drexel University and Burlington County College (BCC) option (Available for currently enrolled, full-time Drexel at BCC Construction Management Students): Drexel University and Burlington County College (BCC) joined together to create a unique educational opportunity: Drexel at BCC. This partnership enabled BCC students to earn a bachelor’s degree from Drexel University while remaining on BCC’s Mount Laurel campus. **Drexel University has elected to phase out its Drexel at BCC on-site program and will no longer be accepting students.**

**Additional Information**

**Construction Electives**

Select four of the following:

- CMGT 265 Information Technologies in Construction
- CMGT 355 Introduction to Sustainability in Construction
- CMGT 451 Heavy Construction Principles & Practices
- CMGT 465 Marketing Construction Services
- CMGT 468 Real Estate
- CMGT 469 Construction Seminar: Contemporary Issues
- CMGT 470 Productivity in Construction
- Other Approved CMGT Elective

**Construction Capstone**

CMGT 499 Independent Study in CMGT 3.0

**University Requirements**

CIVC 101 Introduction to Civic Engagement 1.0
UNIV G101 The Drexel Experience 1.0

**Free Electives**

12.0

**Total Credits** 184.5

* Students may choose another construction elective but the permission of the Program is required.

### Real Estate Concentration

The concentration in real estate provides students with training in issues such as project finance, real estate as investment, design and construction, operations, development law, environmental remediation, public policy, market analysis, and architecture. For this specialization, students take the same Construction Management (CMGT) core requirements, replacing some electives with the concentration-specific courses.

Total Credits  184.5  

**Career Opportunities**

The graduates of the construction management program have secured positions as project managers, estimators, schedulers, and field superintendents for general contractors, subcontractors, and construction managers. Many are employed as owner representatives working for architectural firms, consulting engineering firms, commercial companies and institutions that have needs for building or other construction projects. Some have risen to executive positions within companies while others own their own firms. Graduates have also returned to the program after obtaining positions in the field to teach and share expertise.

The College of Engineering offers a Bachelor of Science in Construction Management as well as a Certificate Program in Construction Management. Depending on student goals, each option provides a strong educational foundation for successful performance and/or entrance into the construction industry.

**Employers**

Some of the companies that have hired Drexel students as co-op or full-time employees:

- Gilbane Building Company
- L.F. Driscoll Construction Company
- Allan Myers
- Pennoni Associates
- Brandywine Realty Trust
- Turner Construction Company
- Intech Construction Managers
- Urban Engineers, Inc.

**Potential Careers**

**Construction Manager:** Coordinates a venture from its initial development through final construction. Develops a schedule and ensures the project is completed on time and within budget. Obtains necessary licenses and permits and oversees the progress of the project.

**Cost Estimator:** Prepares information about costs that are necessary for a business to bid on a contract or to determine the profitability of a proposed product. Assembles information about factors that can influence costs such as materials, labor, location, and special machinery requirements, including computer hardware and software.

**Project Manager:** Develops requirements, budgets, and timetables for a firm’s construction plans to ensure that the projects are successful. Determines the tasks to complete, assigns responsibilities to team members, and sees the project through from conception to completion.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more information on career opportunities.

**Minor in Construction Management**

Students in civil engineering, architectural engineering and architecture may select to pursue construction management as a minor area of study. Because construction is inherently related to design in these disciplines, the construction management minor can be a natural extension of each field of study.

The requirements for the minor include:

- Completion of a minimum of 24.0 credits.
- Courses used to fulfill general education requirements may not be counted toward an academic minor.
- Up to nine credits earned within the student's major may be counted toward the minor with minor department approval.
- Prerequisite courses may be counted toward the minor if recommended by the minor department.

**Required Courses**

Construction Management Faculty

Robert Beard, PhD (Georgia Institute of Technology). Associate Clinical 
Professor. Project and Program Management; Entrepreneurship in 
design and construction; Integrated project delivery systems; History of 
engineering and construction; Sustainable design and construction.

Douglas Carney, MBA, AIA (Eastern University). Clinical Professor. 
Architecture; Contract management; Master planning; Site analysis; 
Feasibility and zoning issues; Space needs and program development; 
Code analysis and compliance studies; project scheduling.

Charles Cook, PhD (New York University). Assistant Clinical Professor. 
Construction management; project management; leadership and 
teambuilding; oral and written communication.

Christine M. Fiori, PhD (Drexel University) Program Director. Clinical 
Professor. Improving the delivery of safety education in construction 
curriculum; Ancient construction techniques; Design and construction in 
developing countries; Leadership in construction; Workforce development

Kenneth S. Sands, PhD (Virginia Tech). Associate Clinical Professor. 
Workforce development and lifelong learning; ethics and construction 
education; transformative safety leadership for construction education; 
sustainable facilities and infrastructure.

Richard Sievert, PhD (Northwestern University). Associate Clinical 
Professor. Project management and construction management; value 
engineering; cost reduction and waste minimization; facilities planning 
and management; marketing and selling professional services; quality 
management, engineering and construction business administration.

Electrical Engineering

Major: Electrical Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 192.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1001
Standard Occupational Classification (SOC) code: 17-2071

About the Program

The electrical engineering major emphasizes the fundamentals of 
electrical engineering, hands-on learning, and flexibility in course selection 
to satisfy diverse career goals. Students choose one or more areas of 
study beginning in their pre-junior year.

State-of-the-art interdisciplinary courses have been developed to prepare 
the Drexel engineer for the technical challenges and the business 
atmosphere of the 21st century. Strong emphasis is given to the role of 
the engineer in the global competitive economy, and to the need to work 
closely with experts and practitioners in many fields.

Students can choose courses in various areas of study, including 
telecommunications, digital signal processing, electronics, power and 
systems and control.

---

Mission Statement

The ECE Department at Drexel University serves the public and the 
university community by providing superior career-integrated education 
in electrical and computer engineering; by conducting research in these 
fields, to generate new knowledge and technologies; and by promoting 
among all its constituents professionalism, social responsibility, civic 
engagement and leadership.

Program Educational Objectives

The Electrical and Computer Engineering Program Educational Objectives 
are that its alumni in their early years after graduation:

1. Secure positions and continue as valued, creative, dependable, and 
proficient employees in a wide variety of fields and industries, in particular 
as electrical and computer engineers;

2. Succeed in graduate and professional studies, such as engineering, 
science, law, medicine and business;

3. Pursue professional development through lifelong learning 
opportunities for a successful and rewarding career;

4. Provide leadership in their profession, in their communities, and in the 
global society;

5. Contribute to their professional disciplines body of knowledge;

6. Function as responsible members of society with an awareness of the 
social and ethical ramifications of their work.

Student Outcomes

The department’s student outcomes reflect the skills and abilities that the 
curriculum is designed to provide to students by the time they graduate.

These are:

a) an ability to apply knowledge of mathematics, science, and 
engineering;

b) an ability to design and conduct experiments, as well as to analyze 
and interpret data;

c) an ability to design a system, component, or process to meet desired 
needs within realistic constraints such as economic, environmental, social, 
political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of 
engineering solutions in a global, economic, environmental, and societal 
context;

i) a recognition of the need for, and an ability to engage in life-long 
learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools 
necessary for electrical engineering practice.
Areas of Study

Telecommunications and Digital Signal Processing (DSP)

Telecommunications and digital signal processing (DSP) are two of the fastest-growing fields of electrical engineering. The telecommunications and DSP areas of study prepare students for mastery of fundamental and applied knowledge in the theory and the technology of the transmission and processing of information-bearing signals such as voice, audio, data, images, and video. The curriculum includes core courses in electromagnetic propagation, communication devices and media, signal processing, analog and digital communication. Complementary electives can be taken in computers, electronics, control systems, and electric power systems.

Career opportunities include design and development of digital communications systems and telephony, speech recognition systems, fiber-optic networks, digital radio, medical diagnostic image processing, high-definition television, cellular and wireless communications, satellite communications, networked multimedia communications, and personal communication systems.

Electronics

The electronics area of study constitutes the study of electronic and optical semiconductor devices; analog and digital electronic circuits; and generation, transmission, and reception of information both in optical and microwave frequency ranges and guided or free-space conditions.

Career opportunities include jobs in telecommunications (optical, wireless, wired, satellite, and radar), VLSI (analog and digital), aerospace, remote sensing and instrumentation, computer circuitry interface, biomedical instrumentation, semiconductor device fabrication, and transportation.

Power and Systems/Control

Power and Systems/Control has at its core the areas of controls engineering and electric power engineering, the classic core of electrical engineering, and exploits the synergies between these two areas. These areas of study explore subjects such as modeling, analysis and control of dynamic systems including power systems, planning and optimization, electromechanical energy conversion, motor operation and control, transformers, power electronics, sensors and actuators, and the electrical and economic structure of the power industry. These areas of study offer access to two state-of-the-art laboratories. In the Interconnected Power System Laboratory, students can operate and control a small power system through the fusing of computer software and hardware technology with high-voltage, high-power technology. The Ortlip Systems Laboratory houses various experiments in sensing, feedback, and control. Both laboratories stress the use of modeling software, especially MATLAB, and the integrated use of computers and hardware.

Career opportunities include options ranging from manufacturing, the power industry (generation, transmission, distribution, marketing, and consumption), robotics, and transportation to Wall Street.

Additional Information

Additional information about the major is available on the ECE Department website (http://www.ece.drexel.edu/Undergraduate_Programs2.html).

For advising questions, please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu).

To make an appointment, please call 215.895.2837.

Drop-in hours: Please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu) for up-to-date drop-in availability.

Advising

Co-op/Career Opportunities

Top co-op employers for electrical engineering majors include:

- AT&T Mobility
- Central Intelligence Agency
- Comcast Corporation
EwingCole
Exelon Corporation (PECO)
Lockheed Martin
NAVSEA
PJM Interconnection LLC
Schweitzer Engineering Laboratories Inc
U.S. Federal Aviation Administration
Singapore as a Apple iPhone App Developer
Vietnam as a Game Developer for Glass Egg

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

Drexel University’s co-op program has a 80 year history and is one of the oldest and largest co-op programs in the world. Students graduate with 6-18 months of full time employment experience, depending on their choice of a 4-year or 5-year program. The majority of Computer Engineering students in ECE choose the 5-year program and graduate with 18 months of full-time work experience, and often receive a job offer from their third co-op employer or from a connection made from one of their co-op experiences.

Electrical engineers are employed in corporations, government agencies, and other organizations. In their work, these engineers are developers of electrical equipment for digital communications (such as satellite communication, fiber-optic networks, and coding and cryptography), mobile radio, radar and surveillance, process control, robotics, speech processing, aerospace circuitry, power generation and distribution, computer hardware and software, computer networks, sensor technology, counter-crime measures, electronic compatibility, consumer electronics, and related fields.

Graduates are also pursuing advanced studies in electrical and computer engineering, aerospace engineering, and mechanical engineering at such schools as MIT, Stanford, Princeton, Georgia Institute of Technology, University of California at Berkeley, University of Pennsylvania, and University of Maryland.

The Steinbright Career Development Center had a co-op placement rate of approximately 99% for electrical and computer engineering majors.

A degree in electrical engineering can also serve as an excellent foundation to pursue graduate professional careers in medicine, law, business, and government.

Dual/Accelerated Degree

Accelerated Program
The accelerated programs of the College of Engineering provide opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, and combined bachelor’s/master’s programs.

Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the “fast track” makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor’s Programs
With careful planning, students can complete both an Electrical Engineering degree and a Computer Engineering degree in the time usually required to complete one degree. For detailed information the student should contact the ECE advisor (http://drexel.edu/ece/undergrad/advising).

Bachelor’s/Master’s Dual Degree Program
Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information on these and other options, visit the Department of Electrical and Computer Engineering BS/MS (http://drexel.edu/ece/academics/undergrad-bs-ms) page.

Minor in Electrical Engineering
This minor is designed to provide other engineering majors or students from other disciplines an introduction to the wide-ranging content of the electrical engineering major. The minor consists of a minimum of nine ECE courses resulting in 26.0 credits. There are six required courses and an additional 9 credits of elective courses.

Prerequisites
The minor assumes that students will have a background in mathematics and physics equivalent to that covered in the first two years of the engineering curriculum. In mathematics, this would cover calculus and differential equations. Knowledge of linear algebra is also recommended. Courses taken to meet these requirements will not count toward the minor.

* Students should choose 9 credits from the 300- and/or 400-level ECE courses. These courses can come from the Computer (ECEC), Electrophysics (ECEE), Electric Power (ECEP), or Systems (ECES) groups. All prerequisites must be satisfied. Students majoring in Computer Engineering and minoring in Electrical Engineering may only choose elective courses from the ECEE, ECEP, and ECES course groups.

Additional information
Additional information about this minor is available on the ECE Department website (http://www.drexel.edu/ece/academics/undergrad/minors).

For advising questions, please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu).

To make an appointment, please call 215.895.2241
Drop-in hours: Please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu) for up-to-date drop-in availability.
Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group
The Adaptive Signal Processing and Information Theory Research Group (http://www.ece.drexel.edu/walsh/aspitrg/home.html) conducts research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

i) Delay mitigating codes for network coded systems,
ii) Distributed estimation in sensor networks via expectation propagation,
iii) Turbo speaker identification,
iv) Performance and convergence of expectation propagation,
v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

Applied Networking Research Lab
Applied Networking Research Lab (ANRL) projects focus on modeling and simulation as well as experimentation in wired, wireless and sensor networks. ANRL is the home of MuTANT, a Multi-Protocol Label Switched Traffic Engineering and Analysis Testbed composed of 10 high-end Cisco routers and several PC-routers, also used to study other protocols in data networks as well as automated network configuration and management. The lab also houses a sensor network testbed.

Bioimage Laboratory
Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

Data Fusion Laboratory
The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

Drexel Network Modeling Laboratory
The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

Drexel Power-Aware Computing Laboratory
The Power-Aware Computing Lab (http://dpac.ece.drexel.edu) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

Drexel University Nuclear Engineering Education Laboratory
The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

Drexel VLSI Laboratory
The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

Drexel Wireless Systems Laboratory
The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and
- wireless protocol conformance testing equipment from Aeroflex.
The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCiTe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

**Ecological and Evolutionary Signal-processing and Informatics Laboratory**

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and interspecies relationships, and inferring microbial evolutionary relationships from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

**Electric Power Engineering Center**

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

**Electronic Design Automation Facility**

Industrial-grade electronic design automation software suite and intergraded design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

**Microwave-Photonics Device Laboratories**

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz-1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwarz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz; data pattern generator and BER tester up to 3 Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10 Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

**Music and Entertainment Technology Laboratory**

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

**NanoPhotonics+ Lab**

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

**Opto-Electro-Mechanical Laboratory**

This lab concentrates on the system integration on optics, electronics, and mechanical components and systems, for applications in imaging, communication, and biomedical research. Research areas include: Programmable Imaging with Optical Micro-electrical-mechanical systems (MEMS), in which microscopic mirrors are used to image light into a single photodetector; Pre-Cancerous Detection using White Light Spectroscopy, which performs a cellular size analysis of nuclei in tissue; Free-space Optical Communication using Space Time Coding, which consists of diffused light for computer-to-computer communications, and also tiny lasers and detectors for chip-to-chip communication; Magnetic Particle Locomotion, which showed that particles could swim in a uniform field; and Transparent Antennas using Polymer, which enables antennas to be printed through an ink-jet printer.

**Plasma and Magnetics Laboratory**

Research is focused on applications of electrical and magnetic technologies to biology and medicine. This includes the subjects of non-thermal atmospheric pressure plasma for medicine, magnetic manipulation of particles for drug delivery and bio-separation,
development of miniature NMR sensors for cellular imaging and carbon nanotube cellular probes.

**Power Electronics Research Laboratory**

The Power Electronics Research Laboratory (PERL) is involved in circuit and design simulation, device modeling and simulation, and experimental testing and fabrication of power electronic circuits. The research and development activities include electrical terminations, power quality, solar photovoltaic systems, GTO modeling, protection and relay coordination, and solid-state circuit breakers. The analysis tools include EMPT, SPICE, and others, which have been modified to incorporate models of such controllable solid-state switches as SCRs, GTOs, and MOSFETs. These programs have a wide variety and range of modeling capabilities used to model electromagnetics and electromechanical transients ranging from microseconds to seconds in duration. The PERL is a fully equipped laboratory with 42 kVA AC and 70 kVA DC power sources and data acquisition systems, which have the ability to display and store data for detailed analysis. Some of the equipment available is a distribution and HV transformer and three phase rectifiers for power sources and digital oscilloscopes for data measuring and experimental analysis. Some of the recent studies performed by the PERL include static VAR compensators, power quality of motor controllers, solid-state circuit breakers, and power device modeling which have been supported by PECO, GE, Gould, and EPRI.

**RE Touch Lab**

The RE Touch Lab is investigating the perceptual and mechanical basis of active touch perception, or haptics, and the development of new technologies for stimulating the sense of touch, allowing people to touch, feel, and interact with digital content as seamlessly as we do with objects in the real world. We study the scientific foundations of haptic perception and action, and the neuroscience and biomechanical basis of touch, with a long-term goal of uncovering the fundamental perceptual and mechanical computations that enable haptic interaction. We also create new technologies for rendering artificial touch sensations that simulate those that are experienced when interacting with real objects, inspired by new findings on haptic perception.

**Testbed for Power-Performance Management of Enterprise Computing Systems**

This computing testbed is used to validate techniques and algorithms aimed at managing the performance and power consumption of enterprise computing systems. The testbed comprises a rack of Dell 2950 and Dell 1950 PowerEdge servers, as well as assorted desktop machines, networked via a gigabit switch. Virtualization of this cluster is enabled by VMWare's ESX Server running the Linux RedHat kernel. It also comprises of a rack of ten Apple Xserve machines networked via a gigabit switch. These servers run the OS X Leopard operating systems and have access to a RAID with TBs of total disk capacity.

**Electrical Engineering Faculty**

Suryadevara Basavaiah, PhD (University of Pennsylvania). Teaching Professor. Computer engineering; computer engineering education; custom circuit design; VLSI technology; process and silicon fabrication.

Tom Chmielewski, PhD (Drexel University). Assistant Teaching Professor. Modeling and simulation of electro-mechanical systems; optimal, adaptive and non-linear control; DC motor control; system identification; kalman filters (smoothing algorithms, tracking); image processing; robot design; biometric technology and design of embedded systems for control applications utilizing MATLAB and SIMULINK.

Fernand Cohen, PhD (Brown University). Professor. Surface modeling; tissue characterization and modeling; face modeling; recognition and tracking.

Andrew Cohen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Image processing; multi-target tracking; statistical pattern recognition and machine learning; algorithmic information theory; 5-D visualization.

Kapil Dandekar, PhD (University of Texas-Austin) Director of the Drexel Wireless Systems Laboratory (DWSL); Associate Dean of Research, College of Engineering. Professor. Cellular/mobile communications and wireless LAN; smart antenna/MIMO for wireless communications; applied computational electromagnetics; microwave antenna and receiver development; free space optical communication; ultrasonic communication; sensor networks for homeland security; ultrawideband communication.

Afshin Daryoush, ScD (Drexel University). Professor. Digital and microwave photonics; nonlinear microwave circuits; RFIC; medical imaging.

Bruce A. Eisenstein, PhD (University of Pennsylvania) Vice Dean, College of Engineering; Arthur J. Rowland Professor. Professor. Pattern recognition; estimation; decision theory.

Adam K. Fontecchio, PhD (Brown University) Vice Dean, Graduate College. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Gary Friedman, PhD (University of Maryland-College Park). Professor. Biological and biomedical applications of nanoscale magnetic systems.

Eli Fromm, PhD (Jefferson Medical College) LeRoy A. Brothers University Professor / Director for Center of Educational Research. Professor. Engineering education; academic research policy; bioinstrumentation; physiologic systems.

Edwin L. Gerber, PhD (University of Pennsylvania). Professor. Computerized instruments and measurements; undergraduate engineering education.

Allon Guez, PhD (University of Florida). Professor. Intelligent control systems; robotics, biomedical, automation and manufacturing; business systems engineering.

Peter R. Herczfeld, PhD (University of Minnesota) Lester A. Kraus Professor/Director, Center for Microwave/Lightwave Engineering. Professor. Lightwave technology; microwaves; millimeter waves; fiberoptic and integrated optic devices.

Leonid Hrebin, PhD (Drexel University). Professor. Tissue excitability; acceleration effects on physiology; bioinformatics.

Nagarajan Kandasamy, PhD (University of Michigan) Associate Department Head for Graduate Affairs. Associate Professor. Embedded systems, self-managing systems, reliable and fault-tolerant computing, distributed systems, computer architecture, and testing and verification of digital systems.

Bruce Katz, PhD (University of Illinois). Adjunct Professor. Speech communication and computer science; artificial intelligence.
Engineering

Youngmoo Kim, PhD (MIT). Associate Professor. Audio and music signal processing, voice analysis and synthesis, music information retrieval, machine learning.

Timothy P. Kurzweg, PhD (University of Pittsburgh). Associate Professor. Micro-optical systems; optical spectroscopy; programmable imaging with MEMS; bio-sensors; diffuse optical communication; MEMS fabrication; diffractive optics; optical automation; optical modeling and simulation; magnetic particle locomotion; meta-materials; reconfigurable antennas

John Lacontora, PhD (New Jersey Institute of Technology). Associate Research Professor. Service engineering; industrial engineering.

Karen Miu, PhD (Cornell University). Professor. Power systems; distribution networks; distribution automation; optimization; system analysis.

Bahram Nabet, PhD (University of Washington) Associate Dean for Special Projects, College of Engineering; Electrical and Computer Engineering. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Prawat Nagvajara, Ph.D. (Boston University). Associate Professor. System on a chip; embedded systems; power grid computation; testing of computer hardware; fault-tolerant computing; VLSI systems; error control coding.

Dagmar Niebur, PhD (Swiss Federal Institute of Technology). Associate Professor. Intelligent systems; dynamical systems; power system monitoring and control.

Chika Nwankpa, PhD (Illinois Institute of Technology) ECE Department Head. Professor. Power system dynamics; power electronic switching systems; optically controlled high power switches.

Christopher Peters, PhD (University of Michigan). Teaching Professor. Nuclear reactor design; ionizing radiation detection; nuclear forensics; power plant reliability and risk analysis; naval/marine power and propulsion; directed energy/high power microwaves; nonstationary signal processing; radar; electronic survivability/susceptibility to harsh environments; electronic warfare

Karkal S. Prahbu, PhD (Harvard University). Auxiliary Professor. Computer and software engineering; advanced microprocessors and distributed operating systems.

William C. Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Gail L. Rosen, PhD (Georgia Institute of Technology). Associate Professor. Signal processing, signal processing for biological analysis and modeling, bio-inspired designs, source localization and tracking.

Ionnis Savidis, PhD (University of Rochester). Assistant Professor. Analysis, modeling, and design methodologies for high performance digital and mixed-signal integrated circuits; Emerging integrated circuit technologies; Electrical and thermal modeling and characterization, signal and power integrity, and power and clock delivery for 3-D IC technologies

Kevin J. Scopes, PhD (Dartmouth College). Associate Professor. Microelectronics; electric vehicles; solar energy; biomedical electronics.

Harish Sethu, PhD (Lehigh University). Associate Professor. Protocols, architectures and algorithms in computer networks; computer security; mobile ad hoc networks; large-scale complex adaptive networks and systems.

James Shackleford, PhD (Drexel University). Assistant Professor. Medical image processing, high performance computing, embedded systems, computer vision, machine learning

P. Mohana Shankar, PhD (Indian Institute of Technology) Allen Rothwarf Professor of Electrical and Computer Engineering. Professor. Wireless communications; biomedical ultrasensos; fiberoptic bio-sensors.

Jonathan E. Spanier, PhD (Columbia University) Associate Dean, Strategic Planning, College of Engineering. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laster spectroscopy, including Raman scattering.

Matthew Stamm, PhD (University of Maryland, College Park). Assistant Professor. Information Security; multimedia forensics and anti-forensics; information verification; adversarial dynamics; signal processing

Jaudelice Cavalcante de Oliveira, PhD (Georgia Institute of Technology). Associate Professor. Software-defined networking; social and economic networks; network security; design and analysis of protocols, algorithms and architectures in computer networks, particularly solutions for the Internet of Things

About the Program

The Bachelor of Science in Engineering major is an interdisciplinary engineering major for students who do not intend to be practicing engineers. Students in the Bachelor of Science in Engineering major combine a rigorous engineering education in the College of Engineering with interdisciplinary studies in fields outside of engineering such as law, medicine, business, entrepreneurship, teaching, international studies, public policy, music, art, environmental studies, and more. The Bachelor of Science in Engineering major provides a strong grounding in the foundations of engineering, in quantitative skills, and in the analytic processes that engineers use in design of practical technology.

Drexel's Bachelor of Science in Engineering major was developed to provide students with educational and professional challenges not available in the traditional engineering curriculum.

Program Objectives

The key objectives of the Bachelor of Science in Engineering program are to provide the student with:

• a strong foundation in science and mathematics
• a foundation of the fundamentals of engineering as a discipline

- a strong grounding in a second cognate area (either technical, pre-
  professional, cultural, global, or another area worked out between the
  student and his/her advisor)
- an integrating experience that ties the technical and the cognate
  areas together. Examples of such experiences may be, but are not
  limited to, research projects, capstone designs, a public service
  assignment, etc.

**Additional Information**

Additional information about the Bachelor of Science in Engineering
program is available on the Bachelor of Science in Engineering website.

To meet the increasing need for engineering technologists, the BS in engineering courses focus on the development of concepts. Courses stress the application of engineering techniques, while traditional technology and traditional engineering are similar, engineering technology although the subject areas of core courses in both engineering practice and the application of theory to solve real-world problems.

Engineering Technology is a branch of engineering that emphasizes career is knowledge of software which will be vital in today's work environment. Generators. The Computer Labs imbue these pre-engineers with digital multimeters, power supplies, oscilloscopes, and waveform generators. The Computer Labs imbue these pre-engineers with knowledge of software which will be vital in today's work environment.

Facilities

From the start of their freshman year, students learn to use the equipment they are likely to need in their careers, such as oscilloscopes, signal generators, amplifiers, and power supplies. These skills make students more useful as co-op employees and give them a competitive advantage in their engineering careers.

Computer/Design Center

The Drexel Curriculum boasts two types of lab experience: Instrumentation and Computer Design. Instrumentation Labs introduce Engineering Majors to the sight, sound, and feel of equipment such as digital multimeters, power supplies, oscilloscopes, and waveform generators. The Computer Labs imbue these pre-engineers with knowledge of software which will be vital in today's work environment.

Engineering Technology

Major: Engineering Technology
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 187.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional (CIP) code: 15.0000
Standard Occupational Classification (SOC) code: 17-3029

About the Program

The degree is Engineering Technology, the career is Engineering.™

Engineering Technology is a branch of engineering that emphasizes practice and the application of theory to solve real-world problems. Although the subject areas of core courses in both engineering technology and traditional engineering are similar, engineering technology courses stress the application of engineering techniques, while traditional engineering courses focus on the development of concepts.

To meet the increasing need for engineering technologists, the BS in Engineering Technology program at Drexel University is organized around a practice-based learning approach to knowledge development. There is extensive use of hands-on laboratory exercises in a majority of the classes. Due to its application-oriented focus, the program is ideally suited for students who plan to pursue careers in a variety of design-, production-, and service-related positions and who learn best by seeing concepts put into practice.

As Engineering Technology students advance, the practice-based approach leads them to skills in the practical and immediate use of technology. Engineering Technology graduates focus on using current and emerging technologies to solve applied engineering problems that industry faces.

The state-of-the-art technology at the heart of the practice-based laboratories, allows graduates to be well versed in the application of modern technology to production-level engineering problems. Through real world industry-sponsored capstone projects, internships with local companies, etc., students in the Engineering Technology program frequently become closely connected to the regional industry and often end up employed with those local industries.

Concentrations are available in biomedical, electrical, mechanical, and industrial engineering technology:

- Biomedical Engineering Technology (p. 265)
- Electrical Engineering Technology (p. 267)
- Industrial Engineering Technology (p. 268)
- Mechanical Engineering Technology (p. 270)

All students enrolled in the program are required to take general education courses, including mathematics, sciences and liberal arts. All concentrations consist of core fundamental courses, technical electives, free electives, and a three-term senior design project, reflecting industrial practices. During their sophomore year, students need to choose one of the four available concentrations.

The program includes full-time and part-time enrollment options. Students pursuing the full-time option can opt for a four-year program with a six-month internship or a five-year program with three six-month co-op cycles.

Engineering technology graduates are uniquely qualified to serve in a variety of functions requiring traditional and nontraditional technological skills. The program also prepares students for graduate study in a variety of fields, including engineering technology, engineering management, business administration, and health-care.

Mission

The mission of the Engineering Technology program is to provide contemporary students with an academic foundation and practical education in engineering technology through an outstanding curriculum and applied research program, and the participation of our students in one of the nation's most successful cooperative educational programs.

Engineering Technology Program

Educational Objectives

The Engineering Technology program produces graduates who:

- apply discipline-specific theory, experiments and real world experience to interpret, analyze and solve current and emerging technical problems;
- communicate clearly and persuasively with technical and non-technical people in oral, written and graphical forms;
• function individually and on teams to design quality systems, components or processes in a timely, responsible and creative manner;
• demonstrate behavior consistent with professional ethics and are cognizant of social concerns as they relate to the practice of engineering technology;
• strive for professional growth and engage in lifelong learning.

Engineering Technology Student Outcomes
The program’s outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

• an ability to select and apply the knowledge, techniques, skills, and modern tools of the discipline to broadly-defined engineering technology activities;
• an ability to select and apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require the application of principles and applied procedures or methodologies;
• an ability to conduct standard tests and measurements, to conduct, analyze, and interpret experiments, and to apply experimental results to improve processes;
• an ability to design systems, components, or processes for broadly-defined engineering technology problems appropriate to program educational objectives;
• an ability to function effectively as a member or leader on a technical team;
• an ability to identify, analyze, and solve broadly-defined engineering technology problems;
• an ability to apply written, oral, and graphical communication in both technical and non-technical environments, and an ability to identify and use appropriate technical literature;
• an understanding of the need for and an ability to engage in self-directed continuing professional development;
• an understanding of and a commitment to address professional and ethical responsibilities including a respect for diversity;
• a knowledge of the impact of engineering technology solutions in a societal and global context;
• a commitment to quality, timeliness, and continuous improvement.

Additional Information
The Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, (http://www.abet.org)

For additional information, please visit the Engineering Technology (http://www.drexel.edu/engtech) web page.

Career Opportunities
The Engineering Technology program is designed to meet employers’ growing needs for college-educated problem-solvers, created by the technology revolution. Career opportunities in engineering technology are virtually limitless with at least 5,500 companies in the region offering more than 150 current job openings for engineering technologists. As a leading urban university in the Greater Philadelphia region, Drexel's location offers access to a vast number of industries including:

• Defense
• Aerospace

• Power generation
• Public utilities
• Shipbuilding
• Railroad
• Manufacturing
• Environmental
• Chemical
• Pharmaceutical
• Medical care

With the skills developed in this program, students will be able to integrate academic theory and professional practice in order to communicate effectively with engineers from different fields, scientists, the production workforce, marketing professionals, company management, and ultimately the customer. Students may participate in the design, development, testing, and manufacturing of industrial machinery, electric and electronic equipment, medical devices, consumer products, and other equipment.

Engineering technologists can serve in industry in many capacities; some fields include:

• Automation design and process engineering
• Mechanical/production engineering
• Electrical engineering and electronics
• Field engineering
• Systems engineering and management
• Environmental engineering
• Quality control
• Sales and customer service
• Systems/programming
• Testing engineering

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on post-graduate opportunities.

Biomedical Engineering Technology Concentration
The biomedical engineering technology concentration focuses on the practice of medical equipment operation and support in the clinical environment. This concentration provides students with the knowledge they need to work in the medical field operating complicated diagnostic and patient care equipment.

During the first three years, students of all concentrations in engineering technology take electrical, mechanical, and industrial courses to get a solid, systematic background in different engineering fields. Students are required to complete general and concentration engineering technology courses, technical electives, and free elective courses that permit students great latitude in tailoring the program of study to match their career goals.
### Biomedical Engineering Technology Concentration

#### Degree Requirements

**Humanities and Social Sciences Requirements**
- COM 111 Principles of Communication 3.0
- COM 230 Techniques of Speaking 3.0
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- HIST 285 Technology in Historical Perspective 4.0
- PHIL 315 Engineering Ethics 3.0
- General Educational Electives 9.0

**Basic Science Requirements**
- CHEM 111 General Chemistry I 4.0
- CHEM 113 General Chemistry I Laboratory 1.5
- PHYS 103 General Physics I 4.0
- PHYS 104 General Physics II 4.0

**Mathematics Requirements**
- MATH 110 Precalculus 3.0
- MATH 121 Calculus I 4.0
- MATH 122 Calculus II 4.0
- STAT 201 Introduction to Business Statistics 4.0

**Engineering Technology Core**
- EET 102 Introduction to Engineering Technology 3.0
- EET 201 Circuit Analysis I 4.0
- EET 202 Circuit Analysis II 4.0
- EET 204 Introduction to Nanotechnology 3.0
- EET 205 Digital Electronics 4.0
- EET 208 Introduction to Programming for Embedded Systems 3.0
- EET 209 Fundamentals of Virtual Instrumentation 3.0
- EET 311 Modeling of Engineering Systems 4.0
- EET 319 PLC Fundamentals 4.0
- EET 333 [WI] Non-Destructive Evaluation of Materials 4.0
- EET 401 Applied Microcontrollers 4.0
- MET 100 Graphical Communication 3.0
- MET 101 Engineering Materials 3.0
- MET 204 Applied Quality Control 3.0
- MET 205 Robotics and Mechatronics 3.0
- MET 209 Fluid Power 3.0
- MET 213 Applied Mechanics 4.0
- MHT 205 Thermodynamics I 3.0
- MHT 226 Measurement Techniques and Instrumentation 3.0
- INDE 240 Technology Economics 3.0
- INDE 370 Industrial Project Management 3.0

**Biomedical Engineering Technology Concentration Requirements**
- BET 301 Healthcare Technology 3.0
- BET 302 Biomedical Electronics 4.0
- BET 303 Medical Imaging Systems 3.0
- BET 307 Applied Biomedical Instrumentation 3.0
- BIO 107 Cells, Genetics & Physiology 3.0
- BIO 108 Cells, Genetics and Physiology Laboratory 1.0
- BMES 302 Laboratory II: Biomeasurements 2.0
- BMES 335 Biomedical Informatics I 3.0
- BMES 391 Biomedical Instrumentation I 3.0
- BMES 488 Medical Device Development 3.0

**Technical Electives**
- Students select 6.0 additional credits from any BET, EET, MET, or INDE courses not already required. See advisor for specific courses.
- Capstone Course Requirements

**Capstone Course Requirements**
- MET 421 [WI] Senior Design Project I 3.0
- MET 422 Senior Design Project II 3.0
- MET 423 [WI] Senior Design Project III 3.0

**Miscellaneous**
- CIVC 101 Introduction to Civic Engagement 1.0
- COOP 101 Career Management and Professional Development 0.0
- UNIV E101 The Drexel Experience 1.0

**Free Electives**
12.0

**Total Credits**
187.5

Engineering Technology

Industrial Engineering Technology Concentration

The industrial engineering technology concentration provides students with knowledge and skills in management and relevant engineering technology disciplines for manufacturing, service, and healthcare enterprises, including automation, logistics, scheduling, simulation, maintainability, and advanced manufacturing processes. Students learn how to co-ordinate, integrate, and optimize people, machines, materials, and energy to improve efficiency, sustainability, quality, and environment.

During the first three years, students of all concentrations in engineering technology take electrical, mechanical, and industrial courses to get a solid, systematic background in different engineering fields. Students are required to complete general and concentration engineering technology courses, technical electives, and free elective courses that permit...

Engineering Technology

Mechanical Engineering Technology Concentration

The mechanical engineering technology concentration stresses on the design, development, testing, and manufacturing of industrial machinery, consumer and biomedical products, CNC (Computer Numerical Control), prototyping machinery, and similar equipment. The concentration includes study in computer graphics, statics, dynamics, stress analysis, fluid dynamics, and Computer Aided Engineering (CAE) tools, including instrumentation and testing procedures of various industrial systems.

During the first three years, students of all concentrations in engineering technology take electrical, mechanical, and industrial courses to get a solid, systematic background in different engineering fields. Students are required to complete general and concentration engineering technology courses, technical electives, and free elective courses that permit students great latitude in tailoring the program of study to match their career goals.

**Environmental Engineering**

Major: Environmental Engineering

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 193.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 14.1401

Standard Occupational Classification (SOC) code: 17-2081

About the Program

Environmental engineering is concerned with the design of systems, policies and processes to protect human, animal, and plant populations from the effects of adverse environmental factors, including toxic chemicals and wastes, pathogenic bacteria, and global warming, and to design systems that enable a more sustainable society.
Environmental engineers design systems, processes and policies to minimize the effect of human activities on the physical and living environment so that we can all live more healthy and sustainable lives. Environmental engineers work to meet human needs for resources in ways to minimize impact on the ecosystem and adverse effects on health. This field builds on other branches of engineering, especially civil, chemical, and mechanical engineering. It also builds on information from many of the sciences, such as chemistry, physics, hydrology, geology, atmospheric science, and several specializations of biology (ecology, microbiology, and biochemistry). Students who elect to study environmental engineering will become familiar with many of these areas because maintaining and improving the environment requires that problems be evaluated and solutions found using a multidisciplinary approach.

**Mission**

The mission of the undergraduate environmental engineering program at Drexel University is to graduate outstanding engineers who can identify, evaluate and solve complex environmental problems, and who desire to continue their education on a lifelong basis.

**Program Educational Objectives**

Environmental engineering graduates will become professionals who analyze, design, construct, manage or operate facilities or systems to protect or enhance the environment of people and other living things, or advance knowledge of the field.

**Student Outcomes**

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for environmental engineering practice.

**Additional Information**

For more information about this major, visit the Civil, Architectural and Environmental Engineering Department (http://www.cae.drexel.edu) and the BS in Environmental Engineering (http://www.drexel.edu/cae/academics/bs-environmental-engineering) page.

- General Education elective* 3.0  

**Term Credits**: 14.0

**Total Credit**: 193.5

* See degree requirements (p. 272).

**Co-op/Career Opportunities**

Environmental Engineers pursue careers with many different industries, such as chemical, pharmaceutical and manufacturing, in groundwater...
and hazardous waste remediation, in water or wastewater treatment, in air pollution abatement and control, and in mining. Some also join environmental consulting firms which serve several engineering areas. In addition, some students go to graduate school. The breadth of an environmental engineering education prepares the student to follow many career paths.

**Co-op Experiences**

Past co-op employers of Environmental Engineering majors have included:

- Exelon, Philadelphia, PA
- U.S. Environmental Protection Agency, Philadelphia, PA
- Philadelphia Water Department, Philadelphia, PA
- Sun Co., Philadelphia, PA
- Aqua America, Bryn Mawr, PA
- Fairmount Park Commission, Philadelphia, PA
- Weston Solutions, West Chester, PA
- CDM Consultants, Philadelphia PA and other offices

**Dual/Accelerated Degree**

The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

**Bachelor’s/Master’s Dual Degree Program**

Drexel offers a combined BS/MS degree program for our top engineering students who want to obtain both degrees in the same time period as most students obtain a Bachelors degree.

For more information on this program visit the Department’s BS/MS Dual Degree Program (http://www.drexel.edu/cae/academics/bs-environmental-engineering/Accelerated%20and%20Dual%20Degree%20Programs%20CAEE) page.

**Minor in Environmental Engineering**

The Environmental Engineering minor focuses on pollution control and is primarily designed to broaden the professional capabilities of engineering students. For example, chemical and mechanical engineers working in process and manufacturing plants will be provided with a better understanding of the natural context of their facilities, better equipped to perform fate and risk analyses, and better able to apply the appropriate technology to control air and water discharges.

While this minor is designed to provide technical knowledge and skills to other engineers, with the appropriate prerequisites students from disciplines other than engineering can also complete this minor.

The minor consists of five required core courses and nine additional credits taken from a list of options.

**Prerequisites**

The common engineering core curriculum prerequisites are required of all students in the College of Engineering. Students from other colleges will need the appropriate background in physics, mathematics and thermodynamics.

**Facilities**

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work)
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements
- Molecular microbiology laboratory to conduct PCR and qPCR analyses, as well as classical measurements
- Analytical equipment for chemical contaminants
- Instrumentation for characterization of indoor and outdoor atmospheric aerosols

**Civil, Architectural and Environmental Engineering Faculty**

Abieyuwa Aghayere, PhD (University of Alberta). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (University of Illinois at Urbana-Champaign) John Roebling Professor of Infrastructure Studies. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (University of California, San Diego). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (Drexel University). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (West Virginia University). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containment; engineering education.

Peter DeCarlo, PhD (University of Colorado). Assistant Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.
Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (Virginia Polytechnic Institute). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (Carnegie-Mellon University). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (University of Illinois-Urbana) L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (McMaster University). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (Imperial College). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Joseph B. Hughes, PhD (University of Iowa) Dean of the College of Engineering and Distinguished Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (University of Texas at Austin). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (Drexel University). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (Colorado State University). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (University of Pennsylvania) Associate Dean for Undergraduate Affairs. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (Cornell University). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Joseph V. Mullin, PhD (Pennsylvania State University) Associate Department Head, Teaching Professor. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Mira S. Olson, PhD (University of Virginia) Graduate Studies Advisor. Associate Professor. Environmental remediation; contaminant and bacterial transport in porous media and bacterial response to dynamic environments.

Michael Ryan, PhD (Drexel University). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology.

Christopher Sales, PhD (University of California, Berkeley). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (Johns Hopkins University). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (Massachusetts Institute of Technology). Assistant Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (University of Toronto). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (University of Iowa). Associate Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (University of Illinois). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (Cornell University). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Richard Weggel, PhD (University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Materials Science and Engineering

Major: Materials Science and Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 192.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.1801
Standard Occupational Classification (SOC) code: 17-2131

About the Program

Materials science and engineering (MSE) is concerned with the production, structure, characterization, properties, and utilization of metals, ceramics, polymers, composites, electronic, optical, nano- and bio-compatible materials. Materials scientists and engineers play a key role in our increasingly complex technological society by extending the limited supply of materials, improving existing materials, and developing and designing new and superior materials and processes with an awareness of their cost, reliability, safety, and societal/environmental implications.

Students majoring in materials science and engineering (MSE) receive a thorough grounding in the basic sciences and engineering of all materials. All students are required to take course sequences that include materials processing, thermodynamics and kinetics of materials, and their physical and mechanical behavior, plus laboratories designed to familiarize them with the instruments and advanced techniques used to characterize materials and evaluate their structure, properties and performance. A number of custom tracks allow upper level students to focus their technical electives in areas of specialization, including nanoscale materials and nanotechnology, biomaterials, electronic and photonic materials, soft materials and polymers, advanced materials design and processing, or in a custom track. In addition, several required senior level courses emphasize the role of materials selection and specification in design.

Throughout the senior year, students majoring in materials science and engineering work on a capstone senior design project over the course of three terms, with guidance from a faculty advisor and graduate student mentor. Students, working individually or in small groups, synthesize information from their courses to arrive at solutions to real-world engineering problems.

Some recent senior design projects include:

- Analyzing Nonskid Material for Naval Applications
- Core-Cladding Electrospun Nanofibers for Controlled Release Applications
- Adsorption of Antibiotics onto Nanodiamond Platforms
- Effect of Nickel Distribution on Hardenability
- Synthesis and Characterization of Mo2GaC, Mo2GaN and Mo2AlC MAX Phases

Mission Statement

The Department of Materials Science and Engineering (http://www.drexel.edu/materials) will provide our BS, MS and PhD graduates with the technical and theoretical knowledge, design capabilities, professionalism, and communications skills necessary for them to excel in leadership positions in academia, industry, and government at the national and international levels.

Vision

Materials science and engineering is a multi-disciplinary field that is at the forefront of all emerging technologies. Advances in the understanding of the process-structure-property-performance relationships of materials will be critical for future developments in energy storage and power generation, biomaterials and nanomaterials. The Department of Materials Science and Engineering at Drexel University is recognized as a leader in these areas through its teaching and scholarly research.

Program Educational Objectives

The educational objectives of the Materials Science and Engineering BS degree program are:

- Materials Science and Engineering program graduates possess the core technical competencies in their field necessary to successfully interface with other engineering disciplines in the workplace.
- At least 30% of Materials Science and Engineering program graduates have progressed towards graduate education.
- Materials Science and Engineering program graduates are leaders in their chosen fields.
- Materials Science and Engineering program graduates are engaged in lifelong learning.
- Materials Science and Engineering program graduates possess written and verbal communication skills appropriate for professional materials engineers and/or scientists.

Student Outcomes

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a. an ability to apply knowledge of mathematics, science and engineering.

b. an ability to design and conduct experiments, as well as to analyze and interpret data.

c. an ability to design a material, system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability.

d. an ability to function on multidisciplinary teams.

e. an ability to identify, formulate and solve materials engineering problems.

f. an understanding of professional and ethical responsibility.

g. an ability to communicate effectively.

h. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context.

i. a recognition of the need for, and an ability to engage in, lifelong learning.

j. a knowledge of contemporary issues.

k. an ability to use the techniques, skills and modern engineering tools necessary for materials science and engineering practice.

Total Credits: 192.0

A “Track” is a sequence of 4-5 technical electives (12.0-18.0 credits) with an underlying connection to a specific area of materials science and engineering. With the rapid expansion of the technical and scientific knowledge in the field of materials science and engineering, organizing technical electives into thematic tracks benefits students. Combined with relevant co-op experiences and senior design, the tracks can provide strong evidence of specialization, which will benefit students in future job searches.

Technical electives can be taken during the junior and (mostly) during the senior year. For planning reasons, better coordination with senior design, and to accommodate students with an out-of-cycle schedule (e.g., transfer students), tracks need to be declared by the beginning of the pre-junior year. Students may change their track selection after consulting with their MSE department advisor.

### Co-op/Career Opportunities

Examples of industries in which materials science and engineering graduates play major roles include: base metals industries; specialist alloys; advanced ceramics; petrochemical; biomaterials and implants; pharmaceuticals; consumer products; electronics and photonics; nanotechnology; power generation; energy conversion, storage and conservation (fuel cells, advanced batteries, supercapacitors and solar cells); environmental protection and remediation; information and telecommunications; and transportation (aerospace, automotive, bicycles, railways). Typical job functions include design and development of new materials, materials selection for specific applications, manufacturing, performance and failure analysis, quality control and testing, research and development, technical management, sales and marketing, teaching, technical services, and technical writing.

Please visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

### Dual/Accelerated Degree

#### Accelerated Program

The Accelerated Program of the College of Engineering provides opportunities for highly talented and motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, as well as a combined bachelor’s/master’s (BS/MS) program. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, this “fast-track” makes it possible to complete the undergraduate curriculum and initiate graduate studies in less than the five years required by the standard curriculum.

#### Dual Degree Bachelor’s Programs

With careful planning, students can complete two full degrees in the time usually required to complete one. For detailed information, students should contact their advisors.

#### Bachelor’s/Master’s Dual Degree Program

Exceptional students can also pursue a master of science (MS) degree in the same period as the bachelor of science (BS). The combined BS/MS degree in Materials Science and Engineering differs from the standard BS degree in that there are two Co-op periods instead of three and in the last two years, specific graduate courses are taken.

For more information about this program, please visit the Department’s BS/MS Dual Degree Program (http://www.drexel.edu/materials/academics/undergrad/bs-ms) page.

### Minor in Materials Science and Engineering

In addition to the core engineering curriculum and the courses required for majors in chemical, civil, electrical, or mechanical engineering, engineering students from other majors can obtain a minor in materials engineering by taking 24.0 credits from the courses listed below.

#### Required Courses

** Note: Only one of the prerequisites (either MATH 201 or CHEM 241) can count toward the 21 credits. ** Note: MATE 370 requires MATH 201 as a prerequisite. If MATE 370 is elected, the credits for MATH 201 can count toward the 21 credits.

### Facilities

#### Biomaterials and Biosurfaces Laboratory

This laboratory contains 10 kN biaxial and 5 kN uniaxial servo-hydraulic mechanical testing machines, a Fluoroscan X-ray system, a microscopic...
imaging system, a spectra fluorometer, a table autoclave, centrifuge, vacuum oven, CO$_2$ incubators, biological safety cabinet, thermostatic water baths, precision balance and ultrasonic sterilizer.

**Nanobiomaterials and Cell Engineering Laboratory**
This laboratory contains fume hood with vacuum/gas dual manifold, vacuum pump and rotary evaporator for general organic/polymer synthesis; gel electrophoresis and electroblotting for protein characterization; bath sonicator, glass homogenizer and mini-extruder for nanoparticle preparation; centrifuge; ultrapure water conditioning system; precision balance; pH meter and shaker.

**Ceramics Processing Laboratory**
This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrofluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

**Dynamic Characterization Laboratory**
This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrofluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

**MAX/MXene Ceramics Laboratory**
This laboratory contains a vacuum hot-press; a hot isostatic press (HIP) for materials consolidation and synthesis; laser scattering particle size analyzer; creep testers, and assorted high temperature furnaces; metallographic preparation facilities; high temperature closed-loop servo-hydraulic testing machines.

**Mechanical Testing Laboratory**
This laboratory contains a photo-resist spinner, impedance analyzer, Zeta potential meter, spectrofluorometer, piezoelectric d33 meter, wire-bonder, and laser displacement meter.

**Microscopy and Photonics Laboratory**
This laboratory contains a high resolution X-ray tomography instrument and a cluster of computers for 3D microstructure reconstruction; mechanical stage, a positioning stage and a cryostage for in-situ testing. For more information on departmental facilities, please visit the Department’s Facilities web page (http://www.materials.drexel.edu/research/facilities).

**Centralized Research Facilities**
The Department of Materials Science & Engineering relies on Core Facilities within the University for materials characterization and micro- and nano-fabrication. These facilities contain state-of-the-art materials characterization instruments, including environmental and variable pressure field-emission scanning electron microscopes with Energy Dispersive Spectroscopy (EDS) for elemental analysis, and Orientation Image Microscopy (OIM) for texture analysis; a Transmission Electron Microscope (TEM) with STEM capability and TEM sample preparation equipment; a dual beam focused ion beam (FIB) system for nano-characterization and nano fabrication; a femtosecond/terahertz laser Raman spectrometer; visible and ultraviolet Raman micro spectrometers with a total of 7 excitation wavelengths for non-destructive chemical and structural analysis and Surface Enhanced Raman (SERS); a Fourier Transform Infrared (FTIR) spectrometer with a microscope and full array of accessories; a Nanocentner; an X-ray Photoelectron Spectrometer (XPS)/Electron Spectroscopy for Chemical Analysis (ESCA) system; and X-Ray Diffractometers (XRD), including small angle/wide angle X-Ray scattering (SAX/WAX).

More details of these instruments, information how to access them and instrument usage rates can be found at Drexel University’s Centralized Research Facilities (http://crf.coe.drexel.edu) web page.

**Materials Science and Engineering Faculty**
Michel Barsoum, PhD (Massachusetts Institute of Technology), Distinguished Professor. Processing and characterization of novel
ceramics and ternary compounds, especially the MAX and 2-D MXene phases.

Jason Baxter, PhD (University of California, Santa Barbara). Associate Professor. Solar cells, semiconductor nanomaterials, ultrafast spectroscopy.

Hao Cheng, PhD (Northwestern University). Assistant Professor. Drug delivery, molecular self-assembly, cell-nanomaterial interactions, regenerative medicine and cell membrane engineering.

Adam K. Fontecchio, PhD (Brown University) Vice Dean, Graduate College. Professor. Electro-optics; remote sensing; active optical elements; liquid crystal devices.

Alexander Fridman, DSc, PhD (Moscow Institute of Physics and Technology) Mechanical Engineering and Mechanics, John A. Nyheim Endowed University Chair Professor, Director of the Drexel Plasma Institute. Professor. Plasma science and technology; pollutant mitigation; super-adiabatic combustion; nanotechnology and manufacturing.

Yury Gogotsi, PhD (Kiev Polytechnic Institute) Director, A. J. Drexel Nanotechnology Institute. Distinguished University & Trustee Chair Professor. Nanomaterials; carbon nanotubes; nanodiamond; graphene; MXene; materials for energy storage, supercapacitors, and batteries.

Haviva M. Goldman, PhD (City University of New York) Neurobiology and Anatomy. Associate Professor. Understanding how the size and shape of whole bones, as well as the distribution quantity and quality of the mineralized tissue that forms the bone, reflect both evolutionary constraints of skeletal growth and development, and responsiveness to mechanical loading during life.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Maher Harb, PhD (University of Toronto). Assistant Professor. Solid state physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Haifeng Frank Ji, PhD (Chinese Academy of Sciences). Professor. Chemistry Micromechanical sensors for biological and environmental applications; Nanomechanical drug screening technology.

Vibha Kalra, PhD (Cornell University) Chemical and Biological Engineering. Assistant Professor. Electrodes for energy storage and conversion; supercapacitors; Li-S batteries; fuel cells; flow batteries; electrospinning for nanofibers; molecular dynamics simulations; Nanotechnology, polymer nanocomposites.

Richard Knight, PhD (Loughborough University) Associate Department Head and Undergraduate Advisor. Teaching Professor. Thermal plasma technology; thermal spray coatings and education; plasma chemistry and synthesis.

E. Caglan Kumbur, PhD (Pennsylvania State University). Associate Professor. Mechanical Engineering and Mechanics. Next generation energy technologies; fuel cell design and development.

Harry G. Kwatry, PhD (University of Pennsylvania) S. Herbert Raynes Professor of Mechanical Engineering. Professor. Dynamic systems analysis; stochastic optimal control; control of electric power plants and systems.

Leslie Lamberson, PhD (California Institute of Technology) P.C. Chou Assistant Professor of Mechanical Engineering. Assistant Professor. Dynamic behavior of materials, dynamic fracture, damage micromechanics, active materials.

Kenneth K.S. Lau, PhD (Massachusetts Institute of Technology) Chemical and Biological Engineering. Associate Professor. Surface science; nanotechnology; polymer thin films and coatings; chemical vapor deposition.

Christopher Y. Li, PhD (University of Akron). Professor. Soft and hybrid materials for optical, energy, and bio applications; polymeric materials, nanocomposites, structure and properties.

Andrew Magenau, PhD (University of Southern Mississippi). Assistant Professor. Structurally complex materials exhibiting unique physical properties designed and fabricated using an assortment of methodologies involving directed self-assembly, externally applied stimuli, structure-function correlation, and applied engineering principles suited for technologies in regenerative medicine, biological interfacing, catalytic, electronic, and optical applications.

Michele Marcolongo, PhD, PE (University of Pennsylvania) Department Head. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

Steven May, PhD (Northwestern University). Associate Professor. Synthesis of complex oxide films, superlattices, and devices; materials for energy conversion and storage; magnetic and electronic materials; x-ray and neutron scattering.

Bahram Nabet, PhD (University of Washington) Associate Dean for Special Projects, College of Engineering; Electrical and Computer Engineering. Professor. Optoelectronics; fabrication and modeling; fiber optic devices; nanoelectronics; nanowires.

Giuseppe R. Palmese, PhD (University of Delaware) Department Head, Chemical and Biological Engineering. Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Ekaterina Pomerantseva, PhD (Moscow State University, Russia). Assistant Professor. Solid state chemistry; electrochemical characterization, lithium-ion batteries, energy generation and storage; development and characterization of novel nanostructured materials, systems and architectures for batteries, supercapacitors and fuel cells.

Caroline L. Schauer, PhD (SUNY Stony Brook) Graduate Advisor. Associate Professor. Polysaccharide thin films and nanofibers.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Wei-Heng Shih, PhD (Ohio State University). Professor. Colloidal ceramics and sol-gel processing; piezoelectric biosensors, optoelectronics, and energy harvesting devices; nanocrystalline quantum dots for bioimaging, lighting, and solar cells.

Karl Sohberg, PhD (University of Delaware). Associate Professor. Chemistry Computational and theoretical materials-related
chemistry: (1) complex catalytic materials; (2) mechanical and electrical molecular devices.

Jonathan E. Spanier, PhD (Columbia University) Associate Dean, Strategic Planning, College of Engineering. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; luster spectroscopy, including Raman scattering.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Garrett Tucker, PhD (Georgian Institute of Technology). Assistant Professor. Computational materials science and engineering; microstructural evolution and material behavior in extreme environments; interfacial-driven processes for improving material functionality; multi-scale physics modeling.

Christopher Weinberger, PhD (Stanford University). Assistant Professor. <em>Mechanical Engineering and Mechanics</em>-Multiscale materials modeling of mechanical properties including DFT, atomistics, mesoscale and microscale FEM modeling.

Christopher Weyant, PhD (Northwestern University). Associate Teaching Professor.

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (<em>ex vivo</em> gene therapy) for spinal cord repair.

Antonios Zavaliangos, PhD (Massachusetts Institute of Technology) A.W. Grosvenor Professor. Professor. Constitutive modeling; powder compaction and sintering; pharmaceutical tableting, X-ray tomography.

Emeritus Faculty

Roger D. Cornelissen, PhD (University of Chicago). Professor Emeritus. Fracture, blends and alloys, as well as compounding.

Ihab L. Kamel, PhD (University of Maryland). Professor Emeritus. Nanotechnology, polymers, composites, biomedical applications, and materials-induced changes through plasma and high energy radiation.

Jack Keeran, PhD (Massachusetts Institute of Technology). Professor Emeritus. Rapid parts manufacturing, computer integrated manufacturing systems, strip production systems, technical and/or economic modeling, melting and casting systems, recycling systems.

Alan Lawley, PhD (University of Birmingham, England). Professor Emeritus. Mechanical and physical metallurgy, powder metallurgy, materials engineering design, engineering education.

Mechanical Engineering

Major: Mechanical Engineering

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 192.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 14.1901

Standard Occupational Classification (SOC) code: 17-2141

About the Program

The role of the mechanical engineer in today’s society is rapidly changing. Advances in manufacturing, transportation, infrastructure systems, materials, communications, and high-performance computing have introduced new demands, opportunities, and challenges for mechanical engineers. What was once an individual endeavor has now become a team activity. Today’s industries require that mechanical engineers possess diverse interdisciplinary skills, a global viewpoint, entrepreneurial and managerial abilities, and an understanding of the forces governing the marketplace.

Traditionally, mechanical engineers have been associated with industries like automotive, transportation, and power generation, and with activities involving the design, analysis, and manufacturing of products useful to society. While today such activities are still dominated by mechanical engineers, the spectrum of opportunities for these professionals has expanded tremendously. For example, mechanical engineers are involved in the design and analysis of biomedical instrumentation, electronic components, smart structures, and advanced materials; they are involved in sophisticated studies of human motion, control of satellites, and the development of more efficient energy-transfer techniques.

Drexel’s Department of Mechanical Engineering and Mechanics (http://www.drexel.edu/coe/departments/mech_eng) prides itself on providing its students with a comprehensive program of courses, laboratories, design projects, and co-op experiences. The MEM curriculum is designed to balance technical breadth (provided by a set of fundamental required core courses) with technical depth (provided by optional concentrations that emphasize particular fields within the profession). Thus, the MEM program not only prepares its graduates to become successful mechanical engineers needed in industry and government, but also provides an excellent springboard to pursue graduate studies in medical sciences, law, business, information technology, and any other disciplines where technological and analytical skills play an important role.

Mission Statement

The mission of the Department of Mechanical Engineering and Mechanics of Drexel University is to transfer and acquire knowledge through: (a) the education of engineers for leadership in industry, business, academia, and government; and (b) the establishment of internationally recognized research programs. This mission is accomplished by the delivery of an outstanding curriculum, by the participation of our students in one of the nation’s most prestigious co-operative educational programs, and by the scholarly activities of the faculty.

Program Educational Objectives

- Graduates will be successful in careers that deal with the design, simulation and analysis of engineering systems, experimentation and testing, manufacturing, technical services, and research.
• Graduates will enter and complete academic and professional programs in engineering, business, management, law and medicine.
• Graduates will communicate effectively with peers and be successful working with and leading multi-disciplinary and multi-cultural teams.
• Graduates will recognize the global, legal, societal, and ethical contexts of their work.
• Graduates will advance in their careers; for example, assuming increasing levels of responsibility and acquiring professional licensure.

Student Outcomes
The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for mechanical engineering and mechanics practice.

Additional Information
The Mechanical Engineering and Mechanics program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

### Elective Courses

**MEM Fundamental Courses**  
12.0

**MEM Open Electives (Any two MEM courses 300 level or higher.)**  
6.0-8.0

**COE Electives (Any 2 College of Engineering courses, including MEM courses, 300 level or higher.)**  
6.0-8.0

**Math/Science Electives (300+ level MATH, PHYS, BIO, CHEM, CHEC, and ENVS.)**  
6.0-8.0

**Free Electives**  
6.0-8.0

**Total Credits**  
193.5-201.5

* General Education Requirements (p. 229).

** MEM students must complete a minimum of four of the MEM Fundamentals courses. (See List Below)**

### MEM Fundamental Courses

Select four of the following:

- MEM 320 Fluid Dynamics I
- MEM 330 Mechanics of Materials II
- MEM 410 Thermodynamic Analysis II
- MEM 417 Introduction to Microfabrication
- MEM 423 Mechanics of Vibration
- MEM 431 Machine Design I
- MEM 437 Manufacturing Process I
- MEM 440 Thermal Systems Design
- MEM 458 Micro-Based Control Systems I
- MEM 459 Control Applications of DSP Microprocessors

### Sample Plan of Study

Co-op/Career Opportunities
Mechanical engineers are employed in a growing number of areas, including aerospace, automotive, biomechanics, computer systems, electronic entertainment, energy, environmental, health care, manufacturing, nuclear technology, and utilities. Most mechanical engineering graduates begin full-time employment immediately upon graduation. However, there are a number of graduates who go on to pursue master's and/or doctoral degrees in mechanical engineering. The graduate schools that Drexel's mechanical engineers have attended include Harvard, UC Berkeley, and the University of Pennsylvania.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree
Accelerated Program
The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. These options include opportunities for accelerated studies, dual degrees, a combined bachelor's/master's program as well as participation in the University Honors Program (http://www.drexel.edu/honors).

Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the "fast track" makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor’s Programs
With careful planning, you can complete two full degrees in the time usually required to complete one. The double major option works best in closely related areas. For detailed information please contact your advisor.

Bachelor's/Master's (BS/MS) Dual Degree Program
Exceptional students can also pursue a master of science degree in the same period as the bachelor of science. For MEM undergraduate students, the following are the possible graduate programs for the Master's degree in the BS/MS dual degree program:

- Electrical Engineering
- Computer Engineering
- Material Science Engineering
- Mechanical Engineering and Mechanics
- Biomedical Engineering
- Chemical Engineering

BS/MS students must be in the 5-year co-op option, must have a 3.2 GPA to gain admission, and must maintain a 3.0 GPA while in the program. For more information about this program, visit the College of Engineering BS/MS Dual Degree Program page.

Minor in Mechanical Engineering and Mechanics
Any undergraduate student in good standing who has completed more than 30.0 credits at Drexel may apply for the minor in mechanical engineering.

The minor must contain a minimum of 24.0 MEM credits according to the following distribution: (a) 16.0 credits from any four of the 4-credit required course options; (b) at least eight credits from additional required courses or from the laboratory components and recommended electives.

Required Course Options

Total Credits 24.0

Facilities
Advanced Design and Manufacturing Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=6)
This laboratory provides research opportunities in design methodology, computer-aided design, analysis and manufacturing, and materials processing and manufacturing. Facilities include various computers and software, I-DEAS, Pro/E, ANSYS, MasterCAM, Mechanical Desktop, SurfCAM, Euclid, Strim, ABQUS, and more. The machines include two Sanders Model Maker rapid prototyping machines, a BridgePort CNC Machining Center, a BOY 220 injection molding machine, an Electra high-temperature furnace for metal sintering, infiltration, and other heat treatment.

Biofluid Mechanics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=5)
The biofluid mechanics laboratory conducts computational and experimental research on the dynamics of flow in the cardiovascular and respiratory system, and the effects of flow on biological processes, particularly hemostasis and thrombosis. Lab resources include high-performance engineering workstations, commercial computational fluid dynamics (CFD) software, and basic experimental facilities including Laser Doppler Velocimetry (LDV), pressure and flow transducers, pumps, and microscopes.

Biomechanics Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=2)
Emphasis in this laboratory is placed on understanding the mechanical properties of human joints, characterization of the mechanical properties of biological materials, studies of human movements, and design and development of artificial limbs. Facilities include a 3-D kinematic measuring system, Instron testing machine, and microcomputers for data acquisition and processing. Additional biomechanical laboratory facilities are available at Moss Rehab.

Combustion and Fuels Chemistry Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=9)
Research is conducted in the areas of (1) low temperature hydrocarbon oxidation, (2) cool flames, (3) auto-ignition, (4) flame instabilities, (5) flame structure, (6) flame ignition, and (7) flame extinction (quenching). New ways to improve fuel efficiency in practical combustors and recover waste energy in the transportation sector are also being explored.

Combustion Emissions/Engine Laboratory
In this laboratory the effects of engine operating variables, fuel type, ambient conditions, and control devices on engine performance and emissions are studied. The laboratory contains both diesel and spark ignition engines, as well as extensive engine and emissions monitoring instrumentation, including dynamometers and continuous gaseous emission analyzers. The laboratory has a high-pressure flow reactor for detailed kinetic studies of hydrocarbon oxidation processes in engines.

Composite Mechanics Laboratory
Emphasis in this laboratory is placed on the characterization of performance of composite materials. Current interest includes damage mechanisms, failure processes, and time-dependent behavior in resin-, metal-, and ceramic-matrix composites. Major equipment includes servo-hydraulic and electromechanical Instron testing machines, strain/displacement monitoring systems, environmental chambers, microcomputers for data acquisition and processing, composites fabrication facility, interferometric displacement gauge, X-ray radiography, and acoustic emission systems.

Drexel Plasma Institute (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=11)
The Drexel Plasma Institute (DPI) was formed in 2002 to stimulate and coordinate research projects related to plasma and other modern high energy engineering techniques. Today the DPI is an active multidisciplinary organization involving 23 faculty members from 6 engineering departments working in close collaboration with School of Biomedical Engineering, College of Arts and Sciences and College of Nursing and Health Professions.

Heat Transfer Laboratory
The heat transfer laboratory is outfitted with an array of instrumentation and equipment for conducting single- and multiphase heat transfer experiments in controlled environments. Facilities include computer-controlled data acquisition (LabVIEW and MacAdios) systems, a Newport holographic interferometer system with associated lasers and optics, image enlargers, power amplifiers, precision voltmeters, slip-ring assemblies, and an IBM RISC/6000 workstation for large-scale computing and simulation. A draft-free room is available with independent temperature control for carrying out natural convection experiments. An experimental test-rig is available for studying heat transfer from rotating surfaces. A bubble column has been recently built to study multiphase flow and heat transfer problems. Facilities are also available for measuring thermal conductivities of thin films using a thermal comparator.

Industrial Robot Performance Laboratory
Emphasis in this laboratory is placed on determining the relationship between robot design parameters and performance criteria.

Microcomputer Controls Laboratory
This laboratory provides an environment conducive to appreciating aspects of systems and control through hands-on experiments. They range from data acquisition and processing to modeling of dynamical systems and implementing a variety of controllers to control systems, such as DC motors and the inverted pendulum. Active research is being conducted on control reconfiguration in the event of actuator failures in aircrafts.

Non-Newtonian Fluid and Heat Transfer Laboratory
Emphasis in this laboratory is placed on the study of hydrodynamic and thermal performance of various non-Newtonian viscoelastic fluids in complex flow geometries. Facilities and equipment include a 20-foot-long recirculating flow loop with a 500-gallon reservoir tank and a thermal conductivity measurement cell. A complete data acquisition system provides fully automated experimental operation and data reduction. State-of-the-art finite element codes provide three-dimensional flow and heat transfer simulations of flows in complex geometries, with a complete post-processing graphic capability backed by template.

Polymer Processing Laboratory
This laboratory is devoted to understanding the basic controlling parameters in polymer processing and the procedures for communicating between the automated processing machine and the rest of the manufacturing facilities, such as the material handling system and the intelligent monitoring system. Facilities include a BOY 55-ton injection molding machine with necessary equipment for processing fiber-reinforced polymers, an IBM microcomputer for data acquisition and control, a Macintosh II microcomputer with software for mold design and process simulation, a Brookfield digital viscometer, and a Tinius Olsen tensile strength tester for material property evaluation.

Precision Instrumentation and Metrology Laboratory (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=7)
This laboratory is focused on activities related to precision measurement, computer-aided inspection, and precision instrument design. Facilities include 3D Coordinate Measuring Machine (Brown & Sharpe) with Micro Measurement and Reverse engineering software, Surface Profiometer, and Laser Displacement Measuring System.
Program for Robotics, Intelligent Sensing, and Mechatronics (PRISM) Laboratory
The PRISM Laboratory is a state-of-the-art laboratory for pursuing research in the areas of medical robotics, haptic (sense of touch) and vision feedback through a user interface for augmenting a surgeon's capability in performing surgery, and visual servoing. The laboratory is equipped with a robotic arm, haptic interface devices, head-mounted display for immersion in the surgical environment, and dedicated hardware and software for the above research areas.

Rheology Laboratory
Emphasis in this laboratory is placed on developing tools for rheological property measurement of various non-Newtonian fluids, including friction-reducing viscoelastic fluids, molten polymers, coal-water slurries, ceramic slurries, and bonding cements for biomedical applications. A capillary tube viscometer, falling ball and needle viscometers, and Brookfield rotating viscometer are available. In particular, the capillary tube viscometer is designed to allow fully automated operation, thus avoiding time-consuming data collection procedures. A high-temperature and high-pressure capillary tube viscometer is under development, so that viscosities of advanced polymer materials can be measured at relatively high temperatures and shear rates.

Stress Wave and Ballistics Laboratory
Emphasis in this laboratory is placed on studying the effects of stress waves in structures. Equipment and facilities include a pendulum impact system, small air gun, high-air-pressure mass accelerator, drop impact system, explosion wire, explosion chamber, and instrumented charpy impact system.

Rapid Product Development Center (http://www.mem.drexel.edu/current/labs/?m=research&a=lab_desc&labID=4)
This center provides fundamental research, educational instruction, and engineering services in product design and manufacturing, solid freeform fabrication, and computer-aided tissue engineering. The center is equipped with state-of-the-art CAD/CAE/CAM, medical imaging processing, and 3D reconstruction software, and a rapid prototyping system.

Mechanical Engineering Faculty
Hisham Abdel-Aal, PhD (University of North Carolina). Associate Teaching Professor. Bio-tribology; biomimetics and bio-inspired design; high-speed machining; metrology of biological surfaces; mechano-biology thermodynamics

Jonathan Awerbuch, DSc (Technion, Israel Institute of Technology). Professor. Mechanics of composites; fracture and fatigue; impact and wave propagation; structural dynamics.

Nicholas P. Cernansky, PhD (University of California-Berkeley) Hess Chair Professor of Combustion. Professor. Combustion chemistry and kinetics; combustion generated pollution; utilization of alternative and synthetic fuels.

Bor-Chin Chang, PhD (Rice University). Professor. Computer-aided design of multivariable control systems; robust and optimal control systems.

Richard Chiou, PhD (Georgia Institute of Technology). Associate Professor. Green manufacturing, mechatronics, Internet-based robotics and automation, and remote sensors and monitoring.

Young I. Cho, PhD (University of Illinois-Chicago). Professor. Heat transfer; fluid mechanics; non-Newtonian flows; biofluid mechanics; rheology.

Alisa Clyne, PhD (Harvard-Massachusetts Institute of Technology). Associate Professor. Cardiovascular biomechanics.

Baktier Farouk, PhD (University of Delaware) Billings Professor of Mechanical Engineering. Professor. Heat transfer; combustion; numerical methods; turbulence modeling; materials processing.

Alexander Fridman, DSc, PhD (Moscow Institute of Physics and Technology) Mechanical Engineering and Mechanics. John A. Nyheim Endowed University Chair Professor, Director of the Drexel Plasma Institute. Professor. Plasma science and technology; pollutant mitigation; super-adiabatic combustion; nanotechnology and manufacturing.

Michael Glaser, MFA (Ohio State University) Program Director for Product Design. Associate Professor. <em>Ohio State University</em> Program Director for Product Design. Associate Professor. Quantifying the designer’s intuition; the interplay between digital and physical forms; human desire to shape our surroundings.

Li-Hsin Han, PhD (University of Texas at Austin). Assistant Professor. Polymeric, micro/nano-fabrication, biomaterial design, tissue engineering, rapid prototyping, free-form fabrication, polymer micro actuators, photonics

Ani Hsieh, PhD (University of Pennsylvania). Associate Professor. Multi-robot systems, decentralized and distributed control, bio-inspired control, swarm robotics.

Y. Grace Hsuan, PhD (Imperial College). Professor. Durability of polymeric construction materials; advanced construction materials; and performance of geosynthetics.

Andrei Jablokow, PhD (University of Wisconsin, Madison) Associate Department Head for Undergraduate Affairs, Mechanical Engineering and Mechanics. Associate Teaching Professor. Kinematics; geometric modeling.

Antonios Kontsos, PhD (Rice University). Associate Professor. Applied mechanics; probabilistic engineering mechanics; modeling of smart multifunctional materials.

E. Caglan Kumbur, PhD (Pennsylvania State University). Associate Professor. Mechanical Engineering and Mechanics. Next generation energy technologies; fuel cell design and development.

John Lacontora, PhD (New Jersey Institute of Technology). Associate Research Professor. Service engineering; industrial engineering.

Leslie Lamberson, PhD (California Institute of Technology) P.C. Chou Assistant Professor of Mechanical Engineering. Assistant Professor. Dynamic behavior of materials, dynamic fracture, damage micromechanics, active materials.

Alan Lau, PhD (Massachusetts Institute of Technology) Associate Department Head for Graduate Affairs, Mechanical Engineering and Mechanics. Professor. Deformation and fracture of nano-devices and macroscopic structures; damage-tolerant structures and microstructures.

Michele Marcolongo, PhD, PE (University of Pennsylvania) Department Head. Professor. Orthopedic biomaterials; acellular regenerative medicine, biomimetic proteoglycans; hydrogels.

David L. Miller, PhD (Louisiana State University) Department Head, Mechanical Engineering and Mechanics. Professor. Gas-phase reaction kinetics; thermodynamics; biofuels.

Hongseok (Moses) Noh, PhD (Georgia Institute of Technology). Associate Professor. MEMS; BioMEMS; lab-on-a-chip; microfabrication; microfluidics.

Mira S. Olson, PhD (University of Virginia) Graduate Studies Advisor. Associate Professor. Environmental remediation; contaminant and bacterial transport in porous media and bacterial response to dynamic environments.

William C. Regli, PhD (University of Maryland-College Park). Professor. Artificial intelligence; computer graphics; engineering design and Internet computing.

Sorin Siegler, PhD (Drexel University). Professor. Orthopedic biomechanics; robotics; dynamics and control of human motion; applied mechanics.

Jonathan E. Spanier, PhD (Columbia University) Associate Dean, Strategic Planning, College of Engineering. Professor. Light-matter interactions in electronic materials, including ferroelectric semiconductors, complex oxide thin film science; laser spectroscopy, including Raman scattering.

Wei Sun, PhD (Drexel University) Albert Sofra Chair Professor of Mechanical Engineering. Professor. Computer-aided tissue engineering; solid freeform fabrication; CAD/CAM; design and modeling of nanodevices.

Ying Sun, PhD (University of Iowa). Associate Professor. Transport processes in multi-component systems with fluid flow; heat and mass transfer; phase change; pattern formation.

Tein-Min Tan, PhD (Purdue University). Associate Professor. Mechanics of composites; computational mechanics and finite-elements methods; structural dynamics.

James Tangorra, PhD (Massachusetts Institute of Technology). Associate Professor. Analysis of human and (other) animal physiological systems; head-neck dynamics and control; balance, vision, and the vestibular system; animal swimming and flight; robotics; system identification; bio-inspired design.

Christopher Weinberger, PhD (Stanford University). Assistant Professor. <em>Mechanical Engineering and Mechanics</em>. Multiscale materials modeling of mechanical properties including DFT, atomistics, mesoscale and microscale FEM modeling.

Ajmal Yousuff, PhD (Purdue University). Associate Professor. Optimal control; flexible structures; model and control simplifications.

Jack G. Zhou, PhD (New Jersey Institute of Technology). Professor. CAD/CAM; computer integrated manufacturing systems; rapid prototyping; system dynamics and automatic control.

Emeritus Faculty

Leon Y. Bahar, PhD (Lehigh University). Professor Emeritus. Analytical methods in engineering, coupled thermoelasticity, interaction between analytical dynamics and control systems.

Donald H. Thomas, PhD (Case Institute of Technology). Professor Emeritus. Biocontrol theory, biomechanics, fluids and fluid control, vehicle dynamics, engineering design.

Albert S. Wang, PhD (University of Delaware) Albert and Harriet Sofra Professor. Professor Emeritus. Treatment of damage evolution processes in multi-phased high-temperature materials, including ceramics and ceramic-matrix composites.

Property Management

Major: Property Management

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1501

Standard Occupational Classification (SOC) code: 11-9141

About the Program

Drexel's Bachelor of Science in Property Management provides an interdisciplinary education necessary for success in the ever-expanding and complex field of real estate management. This full-time, face-to-face bachelor's degree program incorporates Philadelphia's amazing real estate market as its outdoor classroom. The curriculum consists of courses that will equip students with a foundation in real estate operations and management, along with specialized courses in asset management, sustainability, urban economics, business law, accounting, finance, and construction management. In addition, students complete courses that will lead to a minor in Business Administration. The curriculum also includes a six-month co-op experience that partners classroom knowledge with experiential learning to further develop the requisite skills students need to succeed as professionals.

For additional information, visit the Property Management site.

Minor in Property Management

A minor in property management is designed to prepare students to engage, analyze, and synthesize investment real estate portfolios from a comprehensive operational perspective. Students completing the transdisciplinary curriculum will be able to approach management of the built environment with a holistic view of the multifaceted real estate industry.

The property management minor is open to all undergraduate students across the University.

Program Requirements

- Completion of a minimum of 24 credits.
- A grade of "C" (2.0) or better must be earned for every courses in the curriculum or the minor will not be conferred.
- Students should verify prerequisites when selecting courses. It is the student's responsibility to ensure all course prerequisites are completely timely and satisfactorily.
- An academic major and minor within the same curriculum cannot be completed.

Total Credits: 24.0

Property Management Faculty

Kimberly Mitchell, PhD (Virginia Polytechnic Institute and State University) Property Management Program Director. Associate Teaching Professor. Multi-family real estate operations, sustainability, affordability, and policy; asset management; real estate development.

Systems Engineering BS/MS

Major: Systems Engineering

Degree Awarded: Bachelor of Science (BS) AND Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 228

Classification of Instructional Programs (CIP) code: 14.2701

Standard Occupational Classification (SOC) code: 17-2199

About the Program

The Master of Science in Systems Engineering is an online curriculum integrating systems and financial management and planning. The degree enables engineering leaders to perform, lead, and manage systems development throughout the life cycle, from conceptual development and engineering design through the operation and sustainment phases.

Program Outcomes

Graduates of the Drexel University Master of Science in Systems Engineering will be competent in their ability to:

- develop and implement models and tools to enhance and optimize complex systems;
- develop and manage processes relevant to complex systems development;
- architect, design, implement, integrate, verify, validate, support and decommission complex systems;
- use systems engineering tools and practices to identify and execute effective technical solutions;
- manage system-intensive projects within cost and schedule constraints;
- consider financial elements in all complex systems solutions.

Minor in Engineering Management

This minor focuses on the management of technical organizations. The required courses enhance an engineer’s resume to show understanding of management and leadership behaviors, economics, and systems engineering and thinking.

While this minor is primarily designed to provide engineering management knowledge and skills to other engineers, with the equivalent science background students from other majors (biomedical engineering science, for example) can also complete this minor.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the college of engineering. Students from other colleges will need the appropriate background prerequisite courses.

Additional Information

Engineering Policy Analysis Minor

An increasingly complex, interrelated, and technological society has come to rely on quantitative models of engineering systems to make decisions. While these models are used to make decisions in domains as varied as telecommunications, energy, and environmental quality, a common set of tools for the use of such models in decision making has been developed and forms the basis of an emerging discipline in engineering policy analysis. The practitioners of this discipline need training in mathematical and social science analytic approaches, as well as an understanding of the human factors that inevitably influence real-world policy choices. The minor in engineering policy analysis is designed to introduce students to these topics.

This minor broadens the exposure of engineering students to societal issues and provides an initial introduction to analytic skills which they may use both in engineering practice and as managers (given that many engineers become managers both in the private and public sector). Graduates will have additional training and credentials relevant not only to engineering careers, but also to other fields, including urban planning, management consulting, and public administration.

The program provides a basis for students to evaluate their interest and aptitude for graduate studies in fields such as business administration, public administration, and public policy. For pre-law students, the minor introduces them to analytic methods that inform the establishment and interpretation of laws as a mechanism of public policy implementation.

Students are required to complete a total of 24.0 credits. At least 12.0 of these credits may not be counted as part of their major.

Applied Quantitative Methods (6.0 credits)

Students select one sequence in probability and statistics consisting of one introductory course and one advanced course. Any introductory course may be combined with advanced course provided that the prerequisites of the advanced course are met.

Introductory Course Options

Select one of the following: 3.0-4.0

<table>

Other courses accepted with Director approval

Total Credits: 26.0
OPR 330  Advanced Decision Making and Simulation

Policy Analytic Methods (11.0)

Students are required to take at least 11.0 credits, including a course on capital investment decision making and a two-course sequence in economics.

CIVE 240 [WI]  Engineering Economic Analysis  3.0
ECON 201  Principles of Microeconomics  4.0
ECON 202  Principles of Macroeconomics  4.0

Additional Policy Analytic Methods Electives

ECON 250  Game Theory and Applications
ECON 301  Microeconomics
ECON 330  Managerial Economics
ECON 334  Public Finance
ECON 351  Resource and Environmental Economics
ENVS 370  Practice of Environmental Economics
ENVE 727  Risk Assessment

Human Factors (6.0)

Select two of the following:  6.0

PSCI 110  American Government I
PSCI 211  American Government II
PSCI 220  Constitutional Law I
PSCI 329  Theories of Justice
PSCI 331  Environmental Politics
PSCI 372  City in United States Political Development
SOC 215  Sociology of Work
SOC 240  Urban Sociology
SOC 347  Introduction to Environmental Policy Analysis

Elective

One additional credit of coursework is required for the minor. This credit may be any of the three areas above. It is permissible to count 3.0 of the credits from a 4.0 credit class towards fulfilling one of the other areas, thereby using the 4th credit to meet the elective credit requirement.

Total Credits  24.0

Minor in Entertainment Engineering

Digital technologies have revolutionized the world of entertainment and created a new field combining the foundations of electrical engineering with entertainment media. This minor is designed for students with the technical literacy to effectively use, as well as develop, new tools for digital content creation and manipulation for entertainment applications.

The entertainment engineering minor consists of a minimum of six (6) required courses and an additional two (2) elective courses.

Entertainment Engineering Option for Non-Engineering Majors

The minor assumes students have a background in mathematics (equivalent to Calculus II). Courses taken to meet these pre-requisite requirements will not count toward the minor.

Required Courses

DIGM 105  Overview of Digital Media  3.0
ECE 101  Electrical and Computer Engineering in the Real World  1.0
ECE 121  Introduction to Entertainment Engineering  3.0
ECES 201  Introduction to Audio-Visual Signals  4.0
ECES 352  Introduction to Digital Signal Process  4.0
PSY 101  General Psychology I  3.0

Electives

Select one of the following:  3.0

PSY 213  Sensation and Perception
INFO 310  Human-Computer Interaction II

Select one of the following:  3.0

FMVD 110  Basic Shooting and Lighting
FMVD 115  Basic Editing
FMVD 120  Basic Sound
MIP 133  Digital Audio Workstations I

Total Credits  24.0

Additional Information

Additional information about this minor is available on the ECE Department (http://www.ece.drexel.edu) website.

For advising questions, please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu).

To make an appointment, please call 215.895.2837.

Drop-in hours: Please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu) for up-to-date drop-in availability.

Minor in Global Engineering

The Minor in Global Engineering is designed to train engineering students to become global citizens, skilled in meeting the challenges of a global work environment. Coursework in this minor aims at developing students’ international historical, political, and cultural awareness as well as their knowledge of international business in order to succeed in the global economy. In addition to the required coursework, students must successfully complete an experience abroad prior to graduation. Experiences other than approved Study Abroad (http://www.drexel.edu/studyabroad) or Co-op Abroad programs must receive prior approval from the College of Engineering Associate Dean for Undergraduate Affairs.

Foreign language

Foreign language is not required for the Minor in Global Engineering, but it may be required as a prerequisite to a student’s experience abroad. In addition, a student can choose to apply as many as eight (8) credits of 200-level or higher foreign language toward the credit requirements for the minor.

Restrictions

Currently, only students enrolled in either the the College of Engineering or the School of Biomedical Engineering, Science and Health Systems can enroll in this minor.
Minor in Nuclear Engineering

The minor assumes that students will have a background in mathematics and physics equivalent to that covered in the first two years of the engineering curriculum. Specifically, students are required to complete the following pre-requisites: PHYS 101 Fundamentals of Physics I; PHYS 102 Fundamentals of Physics II; PHYS 201 Fundamentals of Physics III; ENGR 210 Introduction to Thermodynamics and ENGR 220 Fundamentals of Materials. Courses taken to meet these prerequisite requirements will not count toward the minor.

</tbody>
</table>

**Note:** Students may petition the Engineering Management Department Head for permission to apply other courses they believe relevant to the Minor in Global Engineering toward their credit requirements. Such requests will be handled on a case-by-case basis.

The Nuclear Engineering minor is open to all engineering majors. The minor consists of a minimum of six required courses for 17.0 credits and an additional 9.0 credits of elective courses.

The minor consists of a minimum of six required courses for 17.0 credits and an additional 9.0 credits of elective courses.

Additional Information

Additional information about the minor is available on the ECE Department website (http://www.ece.drexel.edu/Undergraduate_Programs2.html).

To make an appointment, please call 215.895.2241 Drop-in hours: Please e-mail advising@ece.drexel.edu (advising@ece.drexel.edu) for up-to-date drop-in availability.

Minor in Project Management

Project management focuses on the management of teams of people and other resources in the planning, design, execution, and implementation of various aspects of projects in practically every industry. The minor in Project Management provides students with the skills necessary to perform successfully as members of project management teams.

The minor in Project Management will provide a foundation for graduate education in project management and prepare interested students to pursue the Certified Associate in Project Management (CAPM)® or

Project Management Professional (PMP)® credentials from the Project Management Institute (PMI)®.

Requirements

- Open to Drexel undergraduate students in any discipline.
- Must have sophomore, pre-junior, junior, or senior standing.
- Must have a cumulative GPA of at least 3.0.
- A minimum grade of “C” (2.0) must be earned in each course in this minor for the course to be counted.

- PROJ 420 Essentials of Project Risk Assessment & Management
- PROJ 435 Essentials of International Project Management

- Project Management Elective (4XX or higher)

Other courses, with prior written approval of student’s Academic Advisor and the Project Management program (must be 4XX or higher and be relevant to Project Management)

Total Credits 24.0

For additional information or questions about the minor in Project Management contact:

Mercedes Moultrie
Program Manager
Project Management Program
Tel: 215.571.3939
E-mail: mm342@drexel.edu

CAPM, PMP, and PMBOK are registered marks of the Project Management Institute, Inc.

Minor in Real Estate

Designed for students in various disciplines (such as architecture, business, civil engineering, architectural engineering, fashion merchandising and interior design) the minor in real estate provides the necessary knowledge, skills, and perspective to be successful in the real estate development process. Students will explore the knowledge and skill sets required to create and maintain built environments for living, working and entertainment purposes.

Minor in Systems Engineering

About the Program

Systems engineering is a set of processes and tools used to guide the engineering of large scale systems. Unlike traditional engineering which may focus on very specific technical components, systems engineers focus on the entirety of a system to ensure it is run efficiently and effectively. The Minor will prepare undergraduate students for the current demands of industry and provide them with the opportunity to achieve a formal education in systems engineering.

The Minor in Systems Engineering is designed for students in the College of Engineering and School of Biomedical Engineering who are interested in the management of large, complex systems. It leads to careers in a wide range of industries, such as aerospace, communications, healthcare, manufacturing, and transportation.

The opportunity to pursue a minor in systems engineering will be offered to students who meet the following conditions:

- Minimum 3.0 Cumulative GPA
- Upper Class students (sophomores, juniors, pre-juniors and seniors)
- Student in the College of Engineering or the School of Biomedical Engineering

Certificate in Construction Management

Certificate Level: Undergraduate

Admission Requirements: High school diploma or GED

Certificate Type: Certificate
Certificate in Construction Management

Number of Credits to Completion: 18.0 - 19.0
Instructional Delivery: Campus, Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 52.2001
Standard Occupational Classification (SOC) Code: 11-9021

Construction Management I - Fundamentals

18.0 quarter credits

The Construction Management I - Fundamentals Certificate introduces students to the basic concepts of the construction industry.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 251).

Requirements

Construction Management II - Construction Science

18.0 quarter credits

The Construction Management II - Construction Science Certificate focuses on introducing students to design concepts relating to heating, ventilation, and air conditioning systems and the integration of these systems into the construction process. In addition, the certificate also covers the process of estimating as well as building codes involved in construction projects.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 251).

Total Credits: 19.0

Construction Management IV - Customized Independent

18.0 quarter credits

The Construction Management IV - Customized Independent Certificate is designed to allow students to choose the higher-level courses that best suit their special needs and interests. Students must select all six of their courses at the start of the Certificate program.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 251).

Requirements

A minimum of six (6) 300-level or higher approved CMGT courses 18.0

* CIVE and CAEE majors may not include CMGT 371 or CMGT 372.
The College of Nursing and Health Professions

By anticipating and meeting the challenges presented by the nation’s health care system, Drexel’s College of Nursing and Health Professions is doing its part to guarantee a lasting legacy for current and future health professionals.

The College of Nursing and Health Professions offers a wide range of undergraduate programs. Many offer flexible scheduling, making it possible for students to continue their education through part-time, online, night, or weekend study.

**Majors**
- Behavioral Health Counseling (BS) (p. 298)
- Health Sciences (BS) (p. 300)
  - Accelerated BS/DPT (p. 305)
  - Accelerated BS/MHS (p. 305)
- Health Services Administration (BS) (p. 307)
- Nursing (BSN) (p. 311)
  - Accelerated Career Entry (ACE) (p. 313)
  - RN/BSN Completion Program (p. 313)
  - Dual/Accelerated Degree (p. 314)
- Nutrition and Foods (BS) (p. 316)

**Minors**
- Addictions Counseling (p. 320)
- Health Services Administration (p. 310)
- Nutrition (p. 318)
- Psychiatric Rehabilitation (p. 320)

**Certificates**
- Human Lactation (p. 321)
- Medical Billing and Coding (p. 321)

**About the College**

According to the US Bureau of Labor Statistics’ employment projections, the health care sector accounts for nearly 40% of the net increase in employment over the next 10 years, adding 3.8 million jobs by 2024. The national movement to improve health and care delivery is rising in tandem with these numbers.

The College of Nursing and Health Professions has more than a century-long history of educating nurses and health professionals, uniquely preparing clinicians to practice and lead in a rapidly changing healthcare system. Since 2002, the College has embraced the practical ingenuity of Drexel through the refinement and development of more than 25 undergraduate and graduate nursing and health professions programs characterized by the integration of learning and work through cooperative education, a culture of excellence, innovation and technology infusion, research and deep civic engagement. The College has grown to include more than 5,000 students, 200 full-time faculty and 104 staff.

**Mission and Approach**

The College of Nursing and Health Professions prepares competent and compassionate health professionals through technology-infused and evidence-based programs. The College is committed to leading the way in improving health, reducing health disparities through innovative education, interdisciplinary research, and community-based practice initiatives.

The College has established an interdisciplinary practice in primary care, physical therapy, nutrition sciences and mental health care, including couple and family therapy, behavioral health counseling and creative arts therapies, where students learn and work with faculty in honing their clinical skills. In addition, Drexel’s partnerships with employers of health professionals through its co-operative education program affords the opportunity for its undergraduate nursing and health professions students to work in the best healthcare institutions, regionally and nationally, as part of their program of study. This approach challenges the notion of “best practice” with “real practice” and helps our students to achieve the highest learning and clinical outcomes, while gaining a competitive edge in the job market.

Every program in the College has integrated into its curriculum cutting edge technology, including the use of high fidelity manikins and simulation, to build knowledge and skills in both safe and experimental learning situations before practice in actual clinical settings. All courses are web-enhanced with learning tools and information that support knowledge mastery.

The College’s researchers in nutrition and rehabilitation sciences, couple and family therapy, and nursing and creative arts therapies have garnered on average $2.9 million in external funding annually. Undergraduate and graduate students work with cutting-edge researchers building knowledge in clinical disciplines with the ultimate goal of improving the quality and outcomes of care.

**Accreditation**

The College has 12 nationally accredited or approved clinical programs. Pass rates for professional licensing and board certifications are well above the national mean, with nine programs boasting a 100% pass rate and nursing first-time pass rates consistently above 95%.

- The Baccalaureate Degree in Nursing (BSN) and the Master’s Degree in Nursing (MSN) programs are accredited by the Commission on Collegiate Nursing Education (CCNE), One DuPont Circle, NW, Suite 530, Washington, DC, 20036, 202-887-6791. These programs and the post-graduate APRN certificates are also approved by the Pennsylvania State Board of Nursing.

- The Couple and Family Therapy MFT degree and Post-Master’s Certificate programs are accredited by COAMFTE (Commission on Accreditation of Marriage and Family Therapy Education).

- The Creative Arts Therapies MA degree programs in Dance/Movement Therapy and Counseling, Music Therapy and Counseling, and Art Therapy and Counseling are approved by the ADTA (American Dance Therapy Association), the AMTA (American Music Therapy Association), and the AATA (American Art Therapy Association), respectively.

- The Didactic Program in Nutrition is accredited by ACEND (Accreditation Council for Education in Nutrition and Dietetics).

- The Nurse Anesthesia program is accredited by COA (Council on Accreditation of Nurse Anesthesia Educational Programs).
• The Doctor of Physical Therapy Program (DPT) program is accredited by CAPTE (Commission on Accreditation in Physical Therapy Education).

• The Physician Assistant program is accredited by ARC-PA (Accreditation Review Commission on Education for the Physician Assistant).

Behavioral Health Counseling

Major: Behavioral Health Counseling
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.1501; 51.1508
Standard Occupational Classification (SOC) code: 21-1011

About the Program

The Behavioral Health Counseling program develops clinical competencies needed to counsel and support people experiencing mental illnesses and substance use disorders. Our students go on to graduate school or begin work in areas such as psychiatric rehabilitation, prevention and treatment of substance use disorders, child and adolescent services, and case management. Students create a plan of study and select courses based on their career interests.

During the freshman and sophomore years, students develop a foundation for clinical practice by studying humanities, social sciences, writing, biological sciences, math, and research methods. Behavioral Health Counseling (BHC) courses build on this foundation by demonstrating that biological, psychological, and social perspectives are needed to deliver today's evidence-based practices and develop tomorrow's innovative interventions. BHC courses offer a comprehensive selection of topics that focus on aspects of therapeutic rapport building, assessment, planning, and intervening with people from diverse backgrounds and needs.

The major also offers a co-op experience in a clinical setting that greatly enhances the student's preparation for employment after graduation and for graduate study in professional counseling, social work, or psychology. For students interested in certification as addictions counselors, all program courses are accredited by the Pennsylvania Certification Board. Students may also pursue certification in psychiatric rehabilitation.

For additional information about this major, visit the Behavioral Health Counseling (https://www.drexel.edu/cnhp/academics/departments/Behavioral-Health) Department on the College of Nursing and Health Profession's site.

The behavioral health care field is tremendously diverse and encompasses far more career opportunities than are listed here. There are career choices to be made at all levels of service — from direct care to administration and policy making. In this regard, students will find tremendous benefit both in the listings and outreach offered by Drexel’s Steinbright Career Development Center and in the diverse professional career experience our faculty bring to our students.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) webpage for more detailed information on post-graduate opportunities.

**Facilities**

The College of Nursing and Health Professions is located at Drexel University’s Health Sciences Campus in Center City. A Clinical Learning Resource Center (http://www.drexel.edu/cnhp/about/CELR) offers a simulation lab where students practice skills needed in their chosen behavioral health career. Sessions are video captured to allow students the opportunity to observe and critique their performance.

**Behavioral Health Counseling Faculty**

Veronica Carey, PhD (Capella University) Associate Director of the Saturday Scholars Program. Assistant Clinical Professor. Evidence-based best practices in recovery-oriented services, treatment planning, behavioral health care system practices, program planning, and implementation of psychiatric rehabilitation services.

Angela L. Colistra, PhD, CAADC, CCS (University of North Carolina at Charlotte). Clinical Assistant Professor. Best practices in substance use disorder treatment, opioid prevention and epidemic intervention, addiction related cognitive impairment, multicultural competence in clinical supervision, the intersect between loss and grief and addiction, the relationship between spiritual well-being and burnout.

Ronald C. Comer, DSW (University of Pennsylvania, School of Social Work) Chair, Behavioral Health Counseling Program. Clinical Associate Professor. Pre-professional and professional workforce development, and behavioral health care policy -- particularly at the service delivery level.

Lisa T. Schmidt, PhD (University of Medicine and Dentistry of New Jersey). Associate Clinical Professor. The identification of best practices in psychiatric rehabilitation, illness management and recovery, and psycho-education.

**Health Sciences**

**Major: Health Sciences**

**Degree Awarded: Bachelor of Science (BS)**

**Calendar Type: Quarter**

**Total Credit Hours: 181.0**

**Co-op Options: One Co-op (Four years); No Co-op (Four years)**

**Classification of Instructional Programs (CIP) code: 51.1199**

**Standard Occupational Classification (SOC) code: 11-9111**

**About the Program**

The Bachelor’s degree program in Health Sciences at Drexel University exposes students to a wide variety of careers in health care and related professions. Our emphasis on interdisciplinary study, coupled with expert faculty, gives students the opportunity to explore different facets of health-related professions before matriculating to specialized graduate programs.
or entering the workplace. Whether you are on the fast track to a career in health professions or still finding your path, our Health Sciences Program offers a multitude of options for completing your degree.

**What you will learn**
The Health Sciences Program offers a rigorous four-year curriculum for students interested in pursuing careers in health-related professions. Courses in health and clinical sciences, research methods, statistics, and healthcare ethics are combined with a core curriculum of mathematics, humanities, and social sciences to provide a fully integrated and comprehensive curriculum.

**Career Opportunities**
Health care professions are one of the fastest growing job sectors in the United States. There is tremendous demand for trained health care providers at all levels. In the Health Sciences Program, our multidisciplinary approach, flexible curriculum, and co-op experience provide students with a highly competitive edge in the market place and in the pursuit of graduate program admission. Some of the fields Health Sciences graduates can expect to pursue post-graduation include:

- Rehabilitation Professions
  - Physical therapy
  - Occupational therapy
- Speech and language pathology
- Cardiac rehabilitation
- Physician Assistant Studies
- Medicine and Dentistry
- Optometry
- Audiology
- Clinical Research
- Public Health and Health Advocacy
- Nursing
- Exercise Physiology
- Nutrition Sciences
- Bioethics
- Health Psychology

**Co-op Experience**
Drexel University has long been known for its cooperative education programs. As part of the Health Sciences curriculum, students incorporate a six-month co-op experience into their plan of study. This allows students to learn from healthcare leaders at renowned facilities nationwide. By building career-related employment into undergraduate study, students gain work experience, network with healthcare professionals, and hone their clinical and research skills. Some local co-op employers of Health Sciences students include Children's Hospital of Philadelphia, Magee Rehabilitation Hospital, Bryn Mawr Rehabilitation Hospital, Hahnemann University Hospital, Good Shepherd Penn Partners, NovaCare, and many other health care facilities in the region.

**Accelerated Options**
The Health Sciences program offers accelerated academic tracks for high achieving students to pursue degrees in the Physician Assistant Studies program and the Doctor of Physical Therapy program within the College of Nursing and Health Professions.

**Articulation Agreement Options**
Drexel's Health Sciences Department and Salus University’s Occupational Therapy Department have partnered to offer a BS/MSOT sequential degree program. In the BS/MSOT Option, students first complete a Bachelor of Science (BS) degree in Health Sciences at Drexel University, then enroll into the 2-year Master of Science in Occupational Therapy (MSOT) program at Salus University.

**Drexel Graduate Options in Biomedical Sciences**
Graduates of the Health Sciences program may also continue their education in the Graduate School of Biomedical Sciences and Professional Studies which offers over 40 doctoral, master's and professional development programs. These academic programs emphasize real-world experience and help guide students to make career decisions that best fit their abilities and evolving needs.

For more information, visit the Health Sciences Program (http://www.drexel.edu/cnhp/academics/departments/Health-Sciences) page at the College of Nursing and Health Professions web site.

**Clinical Research Courses**
- HSCI 310 Introduction to Clinical Research 4.0
- HSCI 313 Clinical Trials Protocols 4.0

**Statistics and Assessment**
- HSCI 201 Health Assessment through the Lifespan 4.0
- STS 345 Statistics for the Health Sciences 4.0
- STS 350 Advanced Statistics for Clinical Science 4.0

**Health Sciences electives (HSCI, PHGY, ANAT, NEUR, NFS)** 28.0

Free electives 19.0

Total Credits 180.5

* Health Sciences electives include any HSCI, ANAT, PHGY, NEUR or NFS course. Certain Health Services Administration (HSAD) and Behavioral & Addictions Counseling (BACS) courses may also be taken as Health Sciences electives; see your advisor for more information.

**Optional Concentration in Exercise Science**

The concentration in Exercise Science helps prepare students for graduate studies in Exercise Physiology. In addition, the concentration provides foundational knowledge and skills for a variety of fitness certifications from the American College of Sports Medicine, National Strength and Conditioning Association, and others. These certifications are often required of graduates interested in seeking employment in the fitness industry.

Students wishing to complete the concentration in Exercise Science must complete the courses listed below as 17.0 of their elective credits.

**Required courses:**
- HSCI 325 Exercise Physiology 4.0
- HSCI 326 Applied Anatomy and Kinesiology 4.0

**Complete 9.0 credits from the following list:**
- HSCI 415 Musculoskeletal Pathophysiology 4.0
- HSCI 490 Senior Research Project 4.0
- HSCI T480 Special Topics in Health Sciences 4.0
- NFS 100 Nutrition, Foods, and Health 3.0
- NFS 101 Nutrition, Foods, and Health & Introduction to Nutrition & Food 3.0
- NFS 325 Nutrition & Exercise Physiology 4.0

**Sample Plans of Study**

For accelerated clinical track sample plans, students should visit the Health Sciences Professions Program page.

**BACHELOR OF SCIENCE IN HEALTH SCIENCES - 12 TERMS**

2 terms of COOP occur after Term 7.

**Term 1**
- BIO 122 Cells and Genetics 4.5
- CHEM 101 General Chemistry I 3.5
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- UNIV NH101 The Drexel Experience 1.0
- Free elective 3.0

**Term Credits** 15.0

**Term 2**
- BIO 124 Evolution & Organismal Diversity 4.5
- CHEM 102 General Chemistry II 4.5
- CIVC 101 Introduction to Civic Engagement 1.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- MATH 101 Introduction to Analysis I 4.0

**Term Credits** 17.0

**Term 3**
- BIO 126 Physiology and Ecology 4.5
- CHEM 103 General Chemistry III 5.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- MATH 102 Introduction to Analysis II 4.0

**Term Credits** 16.5

**Term 4**
- ANAT 101 Anatomy & Physiology I 5.0
- BIO 226 Microbiology for Health Professionals 5.0
- STS 345 Statistics for the Health Sciences 4.0
- Free elective 3.0

**Term Credits** 17.0

**Term 5**
- ANAT 102 Anatomy & Physiology II 5.0
- COOP 101 Career Management and Professional Development 0.0
- PSY 101 General Psychology I 3.0
- STS 350 Advanced Statistics for Clinical Science 4.0
- Free elective 3.0

**Term Credits** 15.0

**Term 6**
- ANAT 103 Anatomy & Physiology III 5.0
- COM 320 [WI] Science Writing 3.0
- HSAD 210 Health-Care Ethics I 3.0
- HSCI 310 Introduction to Clinical Research 4.0

**Term Credits** 15.0

**Term 7**
- SOC 101 Introduction to Sociology 3.0
- One of the following: 3.0
  - HSAD 309 Advanced Health-Care Ethics 3.0
  - HSAD 310 Introduction to Health-Systems Administration 3.0
  - HSAD 345 Ethics in Health Care Management 3.0
  - PSY elective 3.0
  - Free elective 3.0

**Term Credits** 12.0

**Term 8**
- HSCI 313 Clinical Trials Protocols 4.0
- PBHL 101 Public Health 101 3.0
- Health Sciences electives 6.0

**Term Credits** 13.0

**Term 9**
- HSCI 201 Health Assessment through the Lifespan 4.0
- Health Sciences electives 4.0
- Sociology elective 4.0
- Free elective 3.0

**Term Credits** 15.0

**Term 10**
- ECON 240 Economics of Health Care Systems 4.0
- Health Sciences electives 7.0
- Free elective 3.0

**Term Credits** 14.0

**Term 11**

Accelerated BS/DPT: Physical Therapy Option

About the Accelerated BS/DPT Option

Drexel’s undergraduate Health Sciences Program and graduate Physical Therapy (PT) Program have partnered to offer an Accelerated dual-degree BS/DPT option available to high-achieving students enrolled in the Health Sciences Program. The Accelerated BS/DPT Option is an accelerated academic track that enables students to complete their Bachelor of Sciences and Doctor of Physical Therapy degrees in 5.5 years as opposed to the traditional 6.5 years. Students pursue a BS degree in Health Sciences during their first three years of study, and a DPT degree during their final 2.5 years of study. The bachelor’s degree in Health Sciences is awarded following completion of year four (first year of graduate study), and the doctoral degree is awarded following completion of the Physical Therapy program.

For additional information visit the Accelerated BS/DPT Option (http://www.drexel.edu/cnhp/academics/departments/Health-Sciences) on Health Sciences page.

Health Sciences electives (HSCI, PHGY, ANAT, NEUR, NFS) * 15.0

1st-Year DPT Courses - see DPT curriculum ** 49.0

Total Credits 189.5

* Health Sciences electives include any HSCI, ANAT, PHGY, NEUR or NFS course. Certain Health Services Administration (HSAD) and Behavioral Health Counseling (BHC) courses may also be taken as Health Sciences electives; see your advisor for more information.

** Students receive their BS degree in Health Sciences after successful completion of the Fall, Winter, and Spring term courses in the first year of the DPT curriculum.

Accelerated BS/MHS: Physician Assistant Option

About the Accelerated BS/MHS Option

Drexel’s undergraduate Health Sciences Program and graduate Physician Assistant (PA) Program have partnered to offer an accelerated dual-degree BS/MHS option available to high achieving students enrolled in the Health Sciences Program. The Accelerated BS/MHS PA Option is an accelerated academic track that enables students to complete their bachelor’s and master’s degrees in Health Sciences, including sitting for the Physician Assistant National Certifying Exam (PANCE), in 5.25 years as opposed to the traditional 6.25 years. Students pursue a Bachelor of Science degree in Health Sciences during their first three years of study, and a Master of Health Science degree during the final 2.25 years of study. The bachelor’s degree in Health Sciences is awarded following completion of year four (first year of graduate study), and the master’s degree is awarded following completion of the Physician Assistant Program.

For additional information visit the Accelerated BS/MHS Option (http://www.drexel.edu/cnhp/academics/departments/Health-Sciences) on Health Sciences page.

Health Sciences electives (HSCI, PHGY, ANAT, NEUR, NFS) * 15.0

1st-Year DPT Courses - see DPT curriculum ** 49.0

Total Credits 189.5

* Health Sciences electives include any HSCI, ANAT, PHGY, NEUR or NFS course. Certain Health Services Administration (HSAD) and Behavioral Health Counseling (BHC) courses may also be taken as Health Sciences electives; see your advisor for more information.

** Students receive their BS degree in Health Sciences after successful completion of the Fall, Winter, and Spring term courses in the first year of the DPT curriculum.
Students have access to the environment for students to study and experience the health sciences. Hospital. The proximity of this major medical center provides a rich environment for students to study and experience the health sciences. Students have access to the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) which utilizes patient actors and automated simulation manikins to mimic real-life human physiology. The CICSP provides undergraduate Health Sciences students the opportunity to learn assessment and communication skills in a controlled setting. The College of Nursing and Health Professions also maintains the Stephen and Sandra Sheller 11th Street Family Health Services of Drexel University, a comprehensive, community-based health center, where students have unique opportunities to observe and participate in health care delivery.

Health Sciences Faculty

William D’Andrea, MS, BS Pharm, CCP (MCP Hahnemann University). Assistant Clinical Professor. Pharmacology, anatomy & physiology, advanced pharmacology.

David Ebaugh, PT, PhD (Drexel University) Director, Human Anatomy Lab. Clinical Professor. Physical Therapy, identification and treatment of underlying neuromusculoskeletal factors associated with rotator cuff disease.

Mary Elizabeth Flynn, PhD (Temple University). Assistant Teaching Professor. Anatomy and physiology, developmental biology, genetics

Alan Haroian, PhD (St. Louis University). Associate Teaching Professor. Examination of the normal afferent and efferent connections of the mouse cerebella nuclei.

Michael L. Kirifides, PhD (Hahnemann University). Assistant Teaching Professor. Intracellular electrophysiology, ratiometric calcium imaging, fluorescence microscopy and flow cytometry.

Margery A. Lockard, PT, PhD (Hahnemann University). Clinical Professor. Orthopedic/musculoskeletal physical therapy; management of patients using prosthetic and orthotic devices; and anatomy and physiology.

Janel L. Mensinger, PhD (City University of New York). Associate Teaching Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

R. Peter Meyer, PhD (Temple University). Associate Professor. Quantitative microscopy studies.

Krista L. Rompolski, PhD (University of Pittsburgh). Assistant Teaching Professor. Interventions to prevent and treat diabetes mellitus, obesity, cardiovascular disease, and complications during pregnancy.

Joseph A. Rubertone, MPT, PhD (West Virginia University). Associate Clinical Professor. Connectivity of vestibular nuclear complex, brain tumor imaging, and clinical studies pertaining to the effectiveness of stroke rehabilitation.

Sinclair A. Smith, MS, DSc (Boston University) Chair, Health Sciences. Professor. The use of magnetic resonance spectroscopy and near infrared spectroscopy to non-invasively study neuromuscular metabolism in humans; creatine supplementation on mitochondrial respiration; weight training studies.

Vincent J. Zarro, MD, PhD (Hahnemann Medical College). Clinical Associate Professor. Community and preventative medicine.

---

Facilities

The College of Nursing and Health Professions is located on Drexel University’s Center City Campus, adjacent to Hahnemann University Hospital. The proximity of this major medical center provides a rich environment for students to study and experience the health sciences. Students have access to the Center for Interdisciplinary Clinical
Health Services Administration

Major: Health Services Administration
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.0701
Standard Occupational Classification (SOC) code: 11-9111

About the Program

The Health Services Administration program provides students with a foundation in management and economic principles related to health care, as well as an understanding of the administrative structure, operations, and policies of the health care industry.

Additional options are available for students wishing to complete an accelerated BS degree immediately prior to pursuing graduate study.

The Health Services Administration (HSA) curriculum is a four-year full-time course of study consisting of 180.0 quarter credits and including one cooperative (co-op) experience comprised of two consecutive quarter terms during the first half or the second half of the junior year. (A non-co-op full-time time option is also available). Transfer students are eligible for the full-time curriculum with or without co-op depending on the number of approved transfer credits.) The curriculum is designed to give students a foundation in general management and economic principles and policies related to health care, as well as to expose students to the quantitative and qualitative aspects of the health care industry by means of courses in health care related to policy, law, economics, management, marketing, and health information systems. At the same time, the curriculum provides interdisciplinary courses dealing with religious, ethical, psychosocial, political, legal, literary, and historical perspectives regarding health care practices and populations in need of health care. Courses in disability and aging expand students' understanding of the role of society and health care in the lives of individuals not always well understood. In addition, the curriculum can prepare students wishing to pursue graduate studies in health services administration, business administration, public health, law, and health communication.

The program also provides a concentration and a minor in HSA and an online certificate in Medical Billing and Coding (p. 321) for Drexel University bachelor's degree-seeking students.

Courses are available online (http://online.drexel.edu/online-degrees/healthcare-degrees/bs-hsa). A maximum of 90.0 semester credits can be transferred.

Additional Information

### Dual/Accelerated Degree

#### Accelerated Dual Degree BS/MPH in Health Services Administration/Masters of Public Health

The Health Services Administration program and the Master of Public Health program in the School of Public Health offer an accelerated dual degree option. Participants can earn both a BS degree in Health Services Administration and a Master of Public Health (MPH) degree in five years.

In this accelerated dual degree program, students participate in the Health Services Administration program for three years (nine academic quarters and one co-operative experience). After three years of undergraduate study students begin their graduate studies in the Master of Public Health program. Nineteen (19.0) quarter credits from the first year of graduate study will be credited toward completion of the students’ Bachelor of Science degrees. After the successful completion of the first year of graduate study, students receive their BS. When students successfully complete the remainder of their graduate studies (typically one additional year), they will receive the MPH degree.

Students in this accelerated, dual degree program apply to the graduate Masters of Public Health Program (http://catalog.drexel.edu/graduate/schoolofpublichealth/publichealth) during the fall quarter of their junior year. They then follow the same application procedures as other applicants, including being interviewed by the graduate faculty. (Any student who does not meet the entrance requirements of the graduate program will be able to complete the fourth year of the Health Services Administration program and receive a BS degree.)

Students in the Master of Public Health program complete 64.0 graduate quarter credits to meet the requirements of the master's program. The accelerated, dual degree program represents an acceleration of only the undergraduate portion of the student's curriculum.

For additional information, visit the College of Nursing and Health Professions Accelerated Dual Degree Programs (https://www.drexel.edu/cnhp/academics/undergraduate/BS-MPH-Dual-Degree-Program) page.

Term Credits 18.0
Minor in Health Services Administration

The minor in health services administration is designed for students interested in preparing for careers in health services administration while pursuing a major in another area. In addition, the curriculum can prepare students wishing to pursue graduate studies in health services administration, business administration, public health, and law.

**Electives**

- Requires ACCT 115 (p. 550) as a prerequisite.

**Health Services Administration Faculty**

Jesse Ballenger, PhD (*Case Western Reserve University*). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Fred DiCostanzo, EdD (*Rutgers University*). Assistant Professor. Organizational leadership, Healthcare Management, Human resources and team effectiveness.

David Flood, PhD (*University of Pennsylvania*). Professor. Medical humanities: an examination of topics in medicine and health care from the perspectives of literature, the arts, and medical ethics.

Stephen F. Gambescia, PhD, MEd, MBA (*Temple University*). Professor. Health care policy, nonprofits and health care, and health care management and leadership.

Kristine A. Mulhorn, PhD (*University of Delaware*) Chair, Department of Health Administration. Professor. Disability and aging; cross-national methods of functioning.

Constance Karin Perry, PhD, EMT (*University of Buffalo*). Associate Professor. Biomedical ethics and ethical theory. Research interests include autonomy, personhood, feminist ethics, the ethics of animal experimentation, and ethical issues in reproduction and pregnancy.

Michelle Sahl, PhD, MEd, MBA, MBE (*The University of the Sciences in Philadelphia*). Associate Teaching Professor. Health management and policy: management and leadership of health services organizations, urban health, and the history of health care systems.

Spencer R. Ward, PhD (*University of Nebraska*). Assistant Professor. The use of behavioral techniques to reduce performance anxiety, improve the knowledge acquisition process and promote distance-learning models.
Nursing

Major: Nursing
Degree Awarded: Bachelor of Science Degree in Nursing (BSN)
Calendar Type: Quarter
Total Credit Hours: 185.0; Accelerated Career Entry: 220.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.3801
Standard Occupational Classification (SOC) code: 29-1141

About the Program

The BS in Nursing (BSN) is a full-time, five year program. This program offers three paid, six-month cooperative education experiences. There is also a full-time, four-year option with one, 6 month co-op experience in the 3rd year of study. Students graduate with a bachelor of science in nursing and eligibility to sit for the RN licensure examination.

The BS in nursing degree is approved by the Pennsylvania State Board of Nursing, the National League for Nursing Accreditation Commission, and the American Association of Colleges of Nursing.

Drexel’s nursing curriculum is built to respond to the rapidly changing health care system, as well as to student’s needs. Graduates of the baccalaureate program will be prepared to:

- Utilize the growing compendium of knowledge and information sources from nursing and other disciplines to learn, teach, heal the sick, and conserve health.
- Contribute to the profession by sharing knowledge and skills with clients, peers, and other professionals in a variety of methods.
- Utilize multiple technologies that access and manage information to guide professional practice.
- Participate in culturally sensitive health promotion activities that contribute to the community’s health and wellness.
- Participate in ongoing educational activities related to personal growth, professional practice, and community service.
- Apply knowledge and skills appropriate to their selected areas of career clinical practice.
- Develop personal potential for leadership in a changing health care environment.
- Integrate ethical concepts and principles, The Code of Ethics for Nurses, and professional standards into practice within professional, academic, and community settings.
- Utilize critical-thinking skills to improve the health outcomes of patients, families, and communities across the continuum of care.

A BSN is awarded at the completion of the program.

For more information about the BSN with Co-Op option at Drexel, visit the Nursing Co-Op Program (https://www.drexel.edu/cnhp/academics/undergraduate/BSN-Nursing-CO-OP) page.

**About the Co-op**

Cooperative education was designed to provide students with real-world experience in a variety of professional settings before graduation. Co-op integrates full-time work experience in the student's field of study throughout the academic program. The College of Nursing and Health Professions co-op program is one of only two of its kind in the nation.

The nursing co-op provides students with 18 months of cooperative education in addition to the traditional clinical educational experiences.

Through co-op, students will have the opportunity to learn the role of the nurse and unlicensed assistive personnel as well as other daily professional, political, and social issues in a work environment. Both before and during co-op, students will receive instruction on career management and professional development skills, such as résumé writing, job searches, interviewing skills, maintaining a career portfolio, negotiating salary, and professional behavior in the workplace. The clinical background students gain from co-op, coupled with a knowledge of career management, makes the Drexel option a value-added model of nursing education.

**Co-op Descriptions**

**First Experience**

**Co-op I: Nursing in Contemporary Health Networks**
Second Experience
Co-op II: Acute and Chronic Health and Illness
Students on the 4-year track participate in Co-Op II, an education experience in the traditional health care environment that emphasize the delivery of nursing care to adults and adolescents with acute and chronic illnesses. The majority of placements will be in general and specialty medical-surgical units. Students will function in the role as an unlicensed assistive person and their job description will be modeled similarly to unlicensed assistive personnel or nursing externs.

Third Experience
Co-op III: Specialty Nursing Concentration
Students will have cooperative education experiences in a specialty area of their choice which will build upon their previous clinical courses and work experiences. For example, students may elect to specialize in labor and delivery, critical care, or return to work for a pharmaceutical or managed care company. Selection of content area for the Co-op III site will be made by each student in consultation with the student’s faculty advisor. Students will be given a suggested reading list and texts to be used for supplemental reading and learning for the specialty co-op area. Students will function in the role as an unlicensed assistive person and their job description will be modeled similarly to the role of unlicensed assistive personnel or nursing externs.

Accelerated Career Entry (ACE) BSN
About the Program
Drexel University offers the Accelerated Career Entry Option (https://www.drexel.edu/cnhp/academics/undergraduate/Accelerated-Career-Entry-to-Nursing-Program), a one-year intensive nursing program for students who already have bachelor’s or graduate degrees. The program is ideal for working adults or college graduates who want to change careers and earn a new degree in one year. This innovative program is geared to students who will benefit from intense education in nursing science rather than the traditional program, which takes three or four years.

Like their counterparts in the traditional baccalaureate nursing program, graduates of the accelerated program emerge with a set of skills that will serve them well in their chosen profession. Our graduates:

• Develop personal potential for leadership in a changing health care environment.
• Integrate ethical concepts and principles, The Code of Ethics for Nurses, and professional standards into practice within professional, academic, and community settings.
• Utilize critical-thinking skills to improve the health outcomes of patients, families, and communities across the continuum of care.

Admission requirements/Prerequisites
Candidates for admission must be college graduates with a 3.0 overall GPA or a 3.0 GPA in their most-recent 60 semester hours of coursework completed. Admitted students must complete all prerequisites before continuing with the program. Applicants whose native language is not English and/or were born outside of the United States are required to take both the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) and achieve a passing score in each.

Prerequisites
Effective for spring quarter 2013-14 (201335) and beyond, the following 8 courses, in semester terms, are prerequisites for the ACE program:

<table>
<thead>
<tr>

RN/BSN Completion Program

Bachelor of Science Degree in Nursing (BSN): 180.0 quarter credits (for Registered Nurses)

The RN/BSN Completion program is an option for nurses from associate degree and diploma nursing programs looking to complete the bachelor of science degree in nursing.

About the Program

The Bachelor of Science in Nursing program continues the education of registered nurses to prepare them for the rapidly changing health care environment. Core courses prepare the graduate for population-based cases and the managed care environment. Support courses, electives, and study in an area of the student’s choosing build on foundational educational experiences to facilitate the examination of critical issues from a variety of perspectives.

A BSN is awarded at the completion of the program. Qualified students are encouraged to submatriculate in the MSN program (RN/BSN/MSN pathway) while enrolled in the BSN program.

For more information about this completion program at Drexel, visit the RN/BSN Completion Program page.

Admission Requirements/Prerequisites

Admission Requirements

• RN licensure (provisional acceptance will generally be offered pending successful completion of the NCLEX-RN examination)
• Official college transcripts
• College grade point average of 2.0 or better
• High school degree or equivalent

To be eligible for admission to the Bachelor of Science in nursing program, students must have completed 60.0 semester hours (90.0 quarter credits) of college prerequisites, as follows, with a grade of C or better. Students may transfer in up to 135.0 quarter credits. Remaining credits will be evaluated on an individual basis. To graduate, students must have completed 180.0 quarter credits.

The required 60.0 semester hours include:

<table>

</tbody>
</table>

Students must be graduates of nursing programs that are both regionally accredited and accredited by the Accreditation Commission for Education for Nursing (ACEN). Students who meet the criteria of the Pennsylvania Nursing Articulation Model will receive credit for 30.0 semester hours (45.0 quarter credits) of nursing, which may be applied toward the program entrance requirements.

Degree Requirements

The College of Nursing and Health Professions faculty uses a variety of teaching and learning methods to facilitate the achievement of a student’s personal objectives. Most courses incorporate e-mail and Internet assignments as well as a variety of innovative, active learning assignments. Courses are offered in several stimulating educational formats, including in an online format.

Students should contact their Academic Advisor for any changes to their plans of study prior to registration due to ongoing curriculum updates.

The plan of study posted is contingent on all students having an active, non-restricted RN license, and having completed 45.0 quarter credits from an accredited nursing program and 135.0 quarter credits in Tier I & Tier II.

Students enter the program with a variable amount of credits to complete. Students need a minimum of 90.0 quarter credits, or Tier I completed, to be accepted into the program. Students may start Tier III upon entering the RN-BSN program; however, all course work in Tier I & II must be completed prior to graduation for a total of 180.0 quarter credits.
Accelerated RN/BSN/MSN

The RN-BSN-MSN Option is a pathway for students who are currently in the Drexel RN to BSN completion program and are interested in continuing their studies to pursue the MSN.

Admission

For the following tracks, students submit an application to the MSN program in the final term of BSN study:

- MSN in Nursing Education and Faculty Role
- MSN in Clinical Trials
- MSN in Clinical Nurse Leader
- MSN in Leadership in Health Systems Management
- MSN in Innovation & Intra/Entrepreneurship for Advanced Practice Nursing.

Students interested in either the Nurse Anesthesia program or Nurse Practitioner programs may opt for an accelerated option. The following Nurse Practitioner tracks are available:

- Adult-Gerontology Acute Care Nurse Practitioner (online track)
- Adult-Gerontology Primary Care Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/adultgerontologyprimarycarecon) (online track)
- Family/Individual Across the Life Span Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/familynursepractitionercon) (online track)
- Pediatric Acute Care Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/pediatricacutecon) (online track)
- Pediatric Primary Care Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/pediatricprimarycarecon) (online track)
- Psychiatric Mental Health Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/psychiatricmentalhealthpractitionercon) (online track)
- Women's Health/Gender Related Nurse Practitioner (http://catalog.drexel.edu/graduate/collegeofnursingandhealthprofessions/womensnursepractitionercon) (online track)

For both the Nurse Anesthesia and the Nurse Practitioner programs, students submit an application when close to completing their BSN degrees. The BSN students must meet the admission requirements for the MSN program. Specific admission criteria are outlined on the Admission Requirements RN to BSN to MSN Option (http://drexel.edu/cnhp/academics/graduate/MSN-Bridge) page.

Students may not register for graduate courses until they are accepted in the program. Additional information is available on the RN-BSN-MSN (http://drexel.edu/cnhp/academics/graduate/MSN-Bridge) program page.

Student in any of the MSN Nurse practitioner tracks may be admitted from any state, except New York. In addition, students taking an online course with a clinical component or practicum cannot do the clinical or practicum portion of the course within the state of Maryland at this time. If a student is a licensed registered nurse in Maryland, the student may complete a clinical or practicum in Virginia and/or Delaware, which share a nurse compact licensure with Maryland. Drexel University is in the process of applying for a certificate of approval to operate in Maryland.

Clinical Affiliations

Clinical Placement Sites

The Undergraduate Nursing Programs have an extensive network of clinical placement sites, including:

- Stephen and Sandra Sheller 11th Street Family Health Services
- Abington Memorial Hospital
- Albert Einstein Medical Center
- ARIA Health Torresdale
- Belmont Behavioral Health
- Bryn Mawr Hospital of Main Line Health
- Chandler Hall Health Services
- Chestnut Hill Hospital
- Children's Hospital of Philadelphia
- Cooper University Hospital
- Crozer-Chester Medical Center
- Delaware County Memorial Hospital
- Doylestown Hospital
- Einstein Medical Center Montgomery
- Fairmount Behavioral Health
- Hahnemann University Hospital
- Holy Redeemer Health System
- Hospital of the University of Pennsylvania
- Inspira Health Network Woodbury
- Kennedy Health
- Kirkbride Center
- Lankenau Medical Center
- Mercy Philadelphia Hospital
- Methodist Hospital
- Nazareth Hospital
- Norcom Community Center
- Norris Square Civic Association
- Northeast Treatment Centers
- Our Brother's Place
- Paoli Hospital
- Paul's Run Retirement Community
- Pennsylvania Hospital
The nutrition and foods curriculum emphasizes the relationship between food, food choices, nutrient metabolism, and medical nutrition therapy to meet health and nutrient needs of individuals and groups.

The BS in Nutrition and Foods program requires four years of study and the completion of at least 180.0 credits. The curriculum is designed to provide a sound basis for careers in dietetics and the application of the principles of nutrition and food science to the nutritional care of individuals and groups—such as in school food service or community nutrition—or to provide a sound basis for careers in the food and pharmaceutical industries.

The study of the biochemical nature of nutrients and foods, their interaction with the environment, and their eventual metabolic fate is a strong career path for more research-minded students and provides a unique base for graduate study.

About the Nutrition Program

Dietetics is the practical application of nutrition in the prevention and treatment of disease. Dietetics is an exciting and challenging profession because there are many diseases that are related to nutrition, such as heart disease, high blood pressure, stroke, cancer, diabetes and obesity.

The nutrition program at Drexel University is referred to as a Didactic Program in Dietetics (DPD) because it provides classroom training for students who want to become Registered Dietitians/Nutritionists (RD/ RDN). Our Didactic Program in Dietetics is accredited by the Accreditation Council For Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics:

Academy of Nutrition and Dietetics
120 S. Riverside Plaza
Suite 2000
Chicago, IL 60606
800-877-1600 x5400
www.eatright.org (http://www.eatright.org)

The Academy of Nutrition and Dietetics (AND) is the nation's largest organization of food and nutrition professionals, most of whom are Registered Dietitians (RD) or Registered Dietitian Nutritionists (RDN).

To become an RD/RDN, students must complete a:

- Minimum of a bachelor's degree with course work approved by ACEND. Coursework typically includes food and nutrition sciences, chemistry, biochemistry, physiology, microbiology, community nutrition, nutrition counseling, basic and quantity food preparation, foodservice systems management and medical nutrition therapy.
- An accredited, supervised practice program, also called a dietetic internship (DI), at health-care facilities, community agencies and in foodservice operations. The internship must provide a minimum of 1200 hours of hands-on training.
- Pass a national examination administered by the Commission on Dietetic Registration.

After successfully completing the BS program in Nutrition and all DPD-required courses with a C or better, students will receive a BS degree and a DPD Verification Statement. The Verification Statement is a certificate documenting completion of an accredited Didactic Program in Dietetics. Students need both a minimum of Bachelor’s degree and a Verification Statement to be eligible for a dietetic internship.

During the senior year, most students apply for admission into a dietetic internship. To have a good chance of getting accepted into a dietetic internship, students should do the following:

- Maintain a cumulative GPA greater than 3.0 (this includes college courses regardless of where taken).
- Work several hundred hours in dietetics-related work and volunteer experience (especially in the food and nutrition departments at hospitals and nursing homes and in community programs such as WIC).
- Participate in activities that demonstrate leadership.

Mission, Goals, and Outcome Measures

The mission of the Drexel University Didactic Program in Dietetics is to integrate a foundation in the nutrition sciences with courses in the humanities to provide the knowledge, skills, and professional values (such as ethics) needed for successful entry into dietetic internships, graduate school, and/or dietetics employment. The learning environment is structured to allow students opportunities for experiential learning, including co-operative education, participation in research, and use of current technologies.

GOAL 1

To provide quality didactic instruction and learning experiences to prepare graduates to be accepted into dietetic internships and graduate schools, and/or work in the field of dietetics.
75% of graduating BS students and 90% of graduating MS students will apply to an accredited dietetic internship.

80% of students who apply to dietetic internships are accepted.

75% of students who apply to graduate school are accepted.

Of those graduates seeking employment in nutrition and food-related careers, 80% will be employed within 6 months of program completion.

On surveys to internship directors, graduate school advisors, and employers, the mean rating of each of 10 learning outcomes will exceed the rating of “3” (satisfactory) or better.

On course evaluation responses, 90% of the knowledge and skill statements identified in the course syllabi will be rated as competent.

GOAL 2
To prepare graduates who are accepted into accredited internship programs to become competent entry-level dietitians.

The program’s first time pass rate on the entry level exam is 80% or above.

GOAL 3
Through recruitment efforts, encouragement, motivation, and support, faculty and staff will increase the number of students and the diversity of students who enter and complete the didactic program in dietetics.

At least 10% of DPD students will be from underrepresented groups.

At least 90% of students will complete the program within 150% of the expected time frame for the program (BS full-time = 4 years; BS part-time = 5-7 years).

For more information, visit the College’s Nutrition and Sciences (https://www.drexel.edu/cnhp/academics/undergraduate/BS-Nutrition-and-Foods) web page.

Admission/Graduation Requirements

Admission Requirements
Drexel takes into consideration a number of criteria when determining admission, including the applicant’s application, transcripts, courses in progress, two recommendations, standardized test scores, essay, and special interests (list of extracurricular activities, employment, etc.). Applicants to the Nutrition and Foods program must have completed four years of high school mathematics (algebra I and II, geometry, and trigonometry) and two years of a laboratory science (biology, chemistry, or physics). Applicants should have a strong interest in, and aptitude for, the basic sciences that are required in the program.

To be considered as a transfer student, candidates should have completed a minimum of 24 college credits. Drexel operates on a rolling admission basis, which means that students will be notified about the admission decision as soon as possible after their files are complete.

Visit the Admissions (http://drexel.edu/undergrad/academics/majors) web site for more information and to apply online.

Graduation Requirements
To receive a BS in Nutrition and Foods, students in the program must complete a plan of study of all required courses and enough elective courses to total at least 180.0 credits. An overall GPA of 2.0 or higher for all coursework undertaken at Drexel University must be earned to receive a BS. A “C” or better is required in all courses in the Didactic Program in Dietetics in order to receive a verification statement.

For the current academic calendar, visit Drexel University Academic Calendars (http://drexel.edu/provost/calendars/academic-calendars).

Degree Requirements

Communications and English
- COM 230 Techniques of Speaking 3.0
- COM 345 Intercultural Communication 3.0
- or COM 310 Technical Communication 3.0

ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0

Physical and Biological Sciences
- ANAT 101 Anatomy & Physiology I 5.0
- ANAT 102 Anatomy & Physiology II 5.0
- ANAT 103 Anatomy & Physiology III 5.0
- BIO 122 Cells and Genetics 4.5
- CHEM 101 General Chemistry I 3.5
- CHEM 102 General Chemistry II 4.5
- CHEM 103 General Chemistry III 5.0
- NFS 215 Nutritional Chemistry 3.0
- NFS 217 Nutrient Quality & Composition 1.0

Humanities and Social Sciences
- ANTH 101 Introduction to Cultural Diversity 3.0
- or SOC 101 Introduction to Sociology 3.0
- PSY 101 General Psychology I 3.0

Management and Computing
- CS 161 Introduction to Computing 3.0
- HRM 455 Hospitality Human Resources Management 3.0
- ORGB 300 [WI] Organizational Behavior 4.0

Foods, Food Safety, and Food Production
- CULA 115 Culinary Fundamentals 3.0
- FDSC 154 Science of Food and Cooking 4.0
- FDSC 270 Microbial Food Safety and Sanitation 4.0
- FDSC 350 Experimental Foods: Product Development 3.0
- HRM 215 Commercial Food Production 4.0

Mathematics and Statistics
- MATH 101 Introduction to Analysis I 4.0
- MATH 102 Introduction to Analysis II 4.0
- STS 345 Statistics for the Health Sciences 4.0

Nutrition and Food Sciences
- NFS 100 Nutrition, Foods, and Health 2.0
- NFS 101 Introduction to Nutrition & Food 1.0
- NFS 203 Nutrition II: Nutrition in the Lifecycle 4.0
- NFS 230 Intermediate Nutrition 4.0
- NFS 265 Professional Issues in Nutrition and Foods 3.0
- NFS 345 Foods and Nutrition of World Cultures 3.0
- NFS 370 Foodservice Systems Management 4.0
- NFS 391 Community Nutrition 4.0
- NFS 415 Advanced Nutrition I: Macronutrients 4.0
- NFS 416 Advanced Nutrition II: Micronutrients 4.0
- NFS 431 Nutrition Counseling 4.0
- NFS 443 Medical Nutrition Therapy I 3.0
- NFS 444 Medical Nutrition Therapy II 3.0
- NFS 445 Medical Nutrition Therapy III 3.0
- NFS 475 Advanced Seminar in the Dietetics Profession 3.0
- NFS 494 Senior Project I 2.0
- NFS 495 Senior Project II 2.0
Sample Plan of Study

BS Nutrition and Foods: 4 YR UG (with one co-op spring/summer junior year)

Term 1
- CHEM 101 General Chemistry I: 3.5 credits
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research: 3.0 credits
- PSY 101 General Psychology I: 3.0 credits
- NFS 100 Nutrition, Foods, and Health: 2.0 credits
- NFS 101 Introduction to Nutrition & Food: 1.0 credits
- UNIV NH101 The Drexel Experience: 2.0 credits

Total Credits: 14.5

Term 2
- CHEM 102 General Chemistry II: 4.5 credits
- CS 161 Introduction to Computing: 3.0 credits
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing: 3.0 credits
- MATH 101 Introduction to Analysis I: 4.0 credits

Total Credits: 14.5

Term 3
- CHEM 103 General Chemistry III: 5.0 credits
- ENGL 103 Composition and Rhetoric III: Themes and Genres: 3.0 credits
- FDSC 154 Science of Food and Cooking: 4.0 credits
- MATH 102 Introduction to Analysis II: 4.0 credits

Total Credits: 16.0

Term 4
- ANAT 101 Anatomy & Physiology I: 5.0 credits
- BIO 122 Cells and Genetics: 4.5 credits
- NFS 230 Intermediate Nutrition: 4.0 credits
- Free Elective: 3.0 credits

Total Credits: 18.5

Term 5
- ANAT 102 Anatomy & Physiology II: 5.0 credits
- CULA 115 Culinary Fundamentals: 3.0 credits
- FDSC 270 Microbial Food Safety and Sanitation: 4.0 credits
- NFS 215 Nutritional Chemistry: 3.0 credits
- NFS 217 Nutrient Quality & Composition: 1.0 credits

Total Credits: 16.0

Term 6
- ANAT 103 Anatomy & Physiology III: 5.0 credits
- COM 345 Intercultural Communication: 3.0 credits
- NFS 203 Nutrition II: Nutrition in the Lifecycle: 4.0 credits
- NFS 265 Professional Issues in Nutrition and Foods: 3.0 credits

Total Credits: 15.0

Term 7
- ANTH 101 Introduction to Cultural Diversity
  or SOC 101 Introduction to Sociology: 3.0 credits
- COM 230 Techniques of Speaking: 3.0 credits
- STS 345 Statistics for the Health Sciences: 4.0 credits
- Free Elective: 6.0 credits

Total Credits: 16.0

Term 8
- HRM 215 Commercial Food Production: 4.0 credits
- FDSC 350 Experimental Foods: Product Development: 3.0 credits
- NFS 415 Advanced Nutrition I: Macronutrition: 4.0 credits
- Free Elective: 6.0 credits

Total Credits: 16.0

Term 9
- NFS 416 Advanced Nutrition II: Micronutrients: 4.0 credits
- ORGB 300 [WI] Organizational Behavior: 4.0 credits
- Free Elective: 6.0 credits

Total Credits: 14.0

Term 10
- NFS 391 Community Nutrition: 4.0 credits
- NFS 443 Medical Nutrition Therapy I: 3.0 credits
- NFS 475 Advanced Seminar in the Dietetics Profession: 3.0 credits
- NFS 494 Senior Project I: 2.0 credits
- Free Elective: 3.0 credits

Total Credits: 15.0

Term 11
- NFS 370 Foodservice Systems Management: 4.0 credits
- NFS 431 Nutrition Counseling: 4.0 credits
- NFS 444 Medical Nutrition Therapy II: 3.0 credits
- NFS 495 Senior Project II: 2.0 credits
- Free Elective: 3.0 credits

Total Credits: 16.0

Term 12
- HRM 455 Hospitality Human Resources Management: 3.0 credits
- NFS 345 Foods and Nutrition of World Cultures: 3.0 credits
- NFS 445 Medical Nutrition Therapy III: 3.0 credits
- NFS 496 Senior Project III: 2.0 credits
- Free Elective: 3.0 credits

Total Credits: 14.0

Total Credit: 184.5

Minor in Nutrition

The minor in nutrition is designed for students interested in enhancing their major with an application in human nutrition. The nutrition minor should be especially attractive to students in the premedical, biological, and behavioral neurological sciences, as it provides a background for enhanced employment and post-baccalaureate study opportunities in areas closely allied to their basic disciplines.

The minor consists of 25.0 credits. Interested students should consult with a nutrition and food science faculty member to schedule courses appropriate for their background and goals.

Required courses
- NFS 200 Nutrition I: Principles of Nutrition: 4.0 credits
- or NFS 230 Intermediate Nutrition: 4.0 credits
- NFS 203 Nutrition II: Nutrition in the Lifecycle: 4.0 credits
- NFS 315 Nutrition in Chronic Disease: 4.0 credits

Select four of the following courses: 12.0-14.0 credits
- NFS 320 Pediatric Nutrition: 4.0 credits
- NFS 325 Nutrition & Exercise Physiology: 4.0 credits
- NFS 415 Advanced Nutrition I: Macronutrition: 4.0 credits
- NFS 416 Advanced Nutrition II: Micronutrients: 4.0 credits
- NFS 446 Perspectives in World Nutrition: 4.0 credits
- NFS 480 Special Studies in Nutrition and Food: 4.0 credits

Total Credits: 24.0-26.0

Career Opportunities

Possible career opportunities in dietetics include the following:

- **Clinical Dietitians** are specialists in food nutrition services in hospitals, outpatient clinics, and private practices. They assess patient nutrition,
develop dietary plans, provide patient counseling, and monitor patient progress.

- **Community Dietitians** work in public health agencies, health and fitness clubs, and day care centers. They counsel people on food choices and direct programs in nutrition awareness and disease prevention.
- **Management Dietitians** specialize in food service systems or clinical management. They work in hospitals, nursing homes, school food service, cafeterias, and restaurants. They manage personnel, plan and conduct employee training programs, design food systems, and plan budgets.
- **Business Dietitians** work in the food industry in product development and marketing, public relations, food styling, and menu design.
- **Consultant Dietitians** are independent business people who work as consultants to nursing homes, sports team, and other clients.

**Facilities**

The Center for Integrated Nutrition and Performance (CINP), located in the Daskalakis Athletic Center, provides a variety of nutrition services to the Drexel community, including workshops, lectures, support for athletic teams, and individual counseling. An employee weight loss program is available through CINP.

Food preparation laboratories feature state-of-the-art equipment for both experimental and quantity food production.

Bioscience teaching laboratories are available with networked computers and advanced digital image analysis capabilities. Both teaching and research laboratories contain a range of equipment including microscopes, centrifuges, chromatographs, spectrophotometers, scintillation counters, culture chambers, and densitometers.

**Nutrition Sciences Faculty**

Joan Rosen Bloch, PhD, CRNP (University of Pennsylvania). Associate Professor. Maternal and infant health outcomes with a particular focus on racial and ethnic perinatal health disparities.

Joseph Bouillata, PharmD, RPh, BCSNP, FASPEN (University of Maryland). Clinical Professor. Nutrition-medication interactions; vitamin D metabolism; nutrition support.

Charlene Compher, PhD, RD, CNSC, LDN, FADA, FASPEN (Drexel University) Courtesy Appointment. Visiting Research Professor.

Robin M. Danowski, MS, RD, LDN. Instructor. Renal Nutrition

Nyree Dardarian, MS, RD, LDN, CSSD, FAND (Drexel University) Director, Center for Nutrition and Performance. Clinical Assistant Professor. Energy expenditure; sports nutrition

Francesco De Luca, MD (Catholic University of Sacred Heart, Rome, Italy) Courtesy Appointment. Visiting Research Professor.

Angelo Del Parigi, MD (University of Bari, Italy) Courtesy Appointment. Visiting Research Professor.

Rose Ann DiMaria-Ghalili, PhD, MSN, BSN, CNSC (New York University, School of Education, Division of Nursing). Associate Professor. Nutrition and surgical recovery to improve the care of older adults undergoing surgery; nutrition assessment, inflammation, and health outcomes.

Garrison L. Draper, MSc, CSCS, USAW, ISPAS (Edith Cowan University, Perth, WA) Courtesy Appointment. Visiting instructor

Susan Ettinger, PhD, RD, DABN, CDN (Columbia University) Courtesy Appointment. Visiting Research Professor.

Debi Page Ferrarello, RN, MSN, MS, IBCLC, RLC (Jefferson University, Arcadia University). Instructor. Human lactation

Andrea Judge, MPH, IBCLC, RLC (University of North Carolina). Clinical Instructor. Human lactation

Joseph Kehayias, PhD (Indiana University). Professor. Body composition analyses; measurement of sarcopenia; osteoporosis; energy expenditure.

Jake Lahne, PhD (University of Vermont). Assistant Professor. Sensory perception and preference in foods; flavor chemistry and sensory properties of alcoholic beverages; artisan, traditional, and local foods; consumer food choice and taste; cooking practice and food agency

Beth L. Leonberg, MS, MA, RD (Colorado State University, Rowan University) Director, Didactic Program in Dietetics. Instructor. Pediatric nutrition.

Rachelle Lessen, MS, RD, IBCLC, LDN (Arcadia University). Instructor. Human lactation

Michael Lowe, PhD (Boston College). Professor. Prevention and treatment of eating disorders and obesity; effects of appetitive responsiveness and dietary restraint on eating regulation; psychobiology of obesity-proneness; empirical foundations of unconscious processes.

Janell L. Mensinger, PhD (City University of New York). Associate Teaching Professor. Behavioral health promotion strategies, treating obesity, clinical research methods, statistics. Body perception, obesity and eating disorders.

Brandy-Joe Milliron, PhD (Arizona State University). Assistant Professor. The development and evaluation of modifications in the natural environment to promote healthier living; farm to table school initiatives;

Juan Muniz, PhD (Oregon State University) Director, Nutrition Biochemistry Laboratory. Assistant Research Professor. Food microbiology; community-based research to assess pesticide levels in homes; prevention of health effects of pesticides for indigenous farmworkers.

Jennifer Nasser, PhD, RD, FTOS (Rutgers University). Associate Professor. Dopamine-mediated mechanisms of food intake regulation in humans and its impact on metabolic homeostasis, especially as it applies to obesity, eating disorders and aging.

Margaret O'Neil, PT, PhD, MPH (MCP Hahnemann University; Duke University: University of North Carolina at Chapel Hill). Associate Professor. Measurement of and interventions to improve physical activity and fitness levels and promote participation in children and youth with who are overweight/obese and those with physical disabilities (especially cerebral palsy).
 Minor in Addictions Counseling

The minor in addictions counseling provides students with an understanding of current best-practice approaches in counseling interventions aimed at assisting people in recovery from substance use disorders. This minor appeals to students in a wide range of Drexel majors, including psychology, criminal justice, health services administration, sociology, health sciences, education, general humanities and social science, nutrition and foods, as well as other fields of study.

Academic Requirements

The minor requirements includes 15.0 credits in five required courses and 9.0 credits in three courses selected from a list of ten electives. Students may elect to begin coursework in this minor at any point in their undergraduate education. It is strongly suggested that students pursuing this minor consult with faculty in the Behavioral Health Counseling (https://www.drexel.edu/cnhp/academics/departments/Behavioral-Health) program for advice in selecting electives that will best meet their goals in this minor.

Minor in Psychiatric Rehabilitation

The minor in psychiatric rehabilitation provides students with an understanding of how people with serious mental illnesses learn skills and acquire resources that promote recovery and wellness. The curriculum covers a variety of evidence-based practices that support healthy living, learning, working, and socializing. This minor appeals to students in a wide range of Drexel majors, including psychology, criminology and justice studies, health services administration, sociology, health sciences, education, general humanities and social science, nutrition and foods, as well as other fields of study.

Academic Requirements

The minor requires completion of 24.0 credits, comprised of 15.0 credits in five required courses and 9.0 credits in three courses selected from a list of twelve electives. Students may elect to begin coursework in this minor at any point in their undergraduate education. It is strongly suggested that students pursuing this minor consult with faculty in the Behavioral Health Counseling (http://www.drexel.edu/cnhp/faculty/behavioral-health) program for advice in selecting electives that will best meet their goals in this minor.

Certificate Level: Undergraduate
Admission Requirements: High School Diploma
Certificate Type: Certificate
Number of Credits to Completion: 18.0
Instructional Delivery: Campus
Calendar Type: Quarter
Expected Time to Completion: 2 years
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 51.0815
Standard Occupational Classification (SOC) Code: 31-9099

The Human Lactation Certificate Program is designed to provide an opportunity for individuals interested in becoming Internationally Board Certified Lactation Consultants (IBCLCs) to obtain the required 90 hours of didactic coursework and 300 hours of supervised practice to meet eligibility through the International Board Certified Lactation Examiner’s Pathway 2. The courses are designed for current Drexel students, practicing health care and public health professionals outside of Drexel, and others interested in entering the health professions. There is currently a strong global and national emphasis on increasing breastfeeding to promote health at the population level, prevent acute and chronic illness and decrease societal health care costs. The United States Surgeon General, the Centers for Disease Control and Prevention, Healthy People 2020, the Institutes of Medicine, the Joint Commission, Michelle Obama’s Let’s Move Campaign and many professional associations include breastfeeding as a key health strategy.

The certificate program consists of six, 3.0 credit courses in lactation. The didactic coursework is offered in the classroom setting. The supervised practice is offered at area hospitals with whom CNHP is affiliated, as well as a variety of community-based lactation education/support programs.

Students who wish to become IBCLCs must complete all six courses. To be eligible to take the certifying exam given by the International Board of Lactation Consultant’s Health Sciences Education Guide, applicants must have also completed coursework including anatomy and physiology, biology, child growth and development, nutrition, and psychology, which may be taken at Drexel or other institutions.

Admission Requirements

Applicants must have a high school diploma. The International Board of Lactation Consultant Examiners requires education in 14 health science subjects in addition to education provided in human lactation and breastfeeding in the Certificate Program. Health Sciences courses should be completed prior to enrolling in the Certificate Program; all health sciences courses, with the exception of those noted with an asterisk in the list below, must be completed before enrolling in the Certificate in Human Lactation.

A minimum of one quarter, term or semester of each of the following eight academic subjects must be completed at an accredited college or university:

- Biology
- Human Anatomy
- Introduction to Clinical Research
- Nutrition
- Psychology, OR Counseling Skills, OR Communication Skills
- Sociology, OR Cultural Sensitivity, OR Cultural Anthropology

The remaining six subjects may be completed at an accredited college or university, OR through continuing education courses:

- Basic Life Support*
- Medical Documentation
- Medical Terminology
- Occupational Safety and Security for Health Professionals*
- Professional Ethics for Health Professionals
- Universal Safety Precautions and Infection Control*

*These subjects will be covered during the Compliance process prior to beginning supervised practice, and do not need to be completed before enrolling in the program.

A detailed description of acceptable coursework to fulfill these requirements is available in the International Board of Lactation Consultant’s Health Sciences Education Guide.

Transcripts:

- Official transcripts demonstrating completion of health science requirements must be sent directly to Drexel from all the colleges/universities that you have attended. Transcripts must be submitted in a sealed envelope with the college/university seal over the flap or delivered electronically via secure delivery directly to the Program Director. Please note that transcripts are required regardless of number of credits taken or if the credits were transferred to another school. An admission decision may be delayed if you do not send transcripts from all colleges/universities attended.
- Transcripts must show course-by-course grades and degree conferrals. If your school issues only one transcript for life, you are required to have a course-by-course evaluation completed by an approved transcript evaluation agency.
- Please see the Drexel University Supporting Documents Submission Guide (http://online.drexel.edu/support/supporting-documents.aspx) for more information.

A minimum grade of C is required for NFS 205, 305, and 405. NFS 485 is pass/fail.

Certificate in Medical Billing and Coding

Certificate Level: Undergraduate
Admission Requirements: High school transcript minimum
This online certificate program is designed for those who want to begin medical billing, coding, and medical record auditing careers or prepare for certification exams in these areas. Students will learn principles of medical billing and coding related to the three main coding manuals: CPT, ICD-10-CM, ICD-10-PCS and HCPCS. The curriculum covers principles of medical billing and coding for in-patient and outpatient hospitals.

Goodwin College of Professional Studies

In today’s competitive job market, education is a smart investment in your future. Goodwin responds to the demands of today’s learner by offering programs that tailor a student’s learning experience to their career aspirations. Our General Studies degree-completion program is ideal for transfer students who already possess an associate’s degree or just have existing college credits. It is also ideal for students who wish to chart their own path toward a college degree.

Major

- Communication and Applied Technology (BS) (p. 323)
- General Studies (BS) (p. 324)
- Professional Studies (BS) (p. 325)

Communication and Applied Technology

Major: Communications and Applied Technology
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 52.0207
Standard Occupational Classification (SOC) code: 43-1011

About the Program

Note: Effective Winter Term 2014, students are no longer being accepted into this program.

The Bachelor of Science in Communications and Applied Technology is a multidisciplinary program designed for individuals who want to increase their knowledge of all aspects of business communications and relevant communication technologies, while understanding the business principles that are necessary to achieve corporate goals.

The major offers a multidisciplinary approach combining theoretical and applied learning principles and encompasses the spectrum of internal and external communications that organizations utilize in their management and marketing functions. The program is tailored to meet the needs of people who sell, communicate, and manage in industries that are heavily customer oriented and are involved in or affected by world markets. The goal of the program is to increase students’ understanding of communication, management, applicable technology, business, the world economy, and relationships within their corporate culture.

Curriculum

To complete the Bachelor of Science degree in Communications and Applied Technology, students must earn a minimum of 180.0 quarter credits comprising the following:

- English Composition
- Humanities
- Social Sciences
- Physical Sciences
- Mathematics
- Business
- Computing Technology
- Customer Operations

Total Credits 180.0

* Students select 9.0 credits from any of the following sciences: ANAT, BIO, CHEM, ENVIR, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval.
** Africana studies, anthropology, fine arts (history of architecture, art, film, music, theatre), foreign language, history, linguistics, literature, philosophy, political science, psychology, sociology, women’s studies, writing.
No more than 2 transferred courses may be used to complete the minor. A grade of C (2.0) or better must be earned in each courses in the Minor in Business.

After completion of CT 230, CT 240 and CT 385, students can sit for the Certified Internet Webmaster (CIW) exam. Additional self-study may be necessary.

General Studies

Major: General Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 24.0102
Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Bachelor of Science (BS) in General Studies is the ideal degree completion program for self-directed students who desire a program they can tailor to their personal and professional interests. The program covers the fundamentals of a university education while allowing students to exhibit intellectual interest and discipline across a broad range of college-level coursework. A general studies degree informs employers of a graduate’s ability to think creatively when problem solving and work independently at a high level with a minimum of direction.

General studies students have more options for courses which apply to their degree requirements when they register for a given term. The flexibility to study subjects which have produced some of the greatest ideas, innovations and art in recorded history, can be both a personally and professionally rewarding benefit of a general studies degree.

Designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. Students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives.

The ability to include minors (http://catalog.drexel.edu/minors) within the General Studies major can be of great value to working adults who are seeking advancement or a change in their employment. Adult learners looking to improve their earning potential often find that a degree makes them eligible for higher-level positions within their organizations or others.

The Goodwin General Studies degree completion program offers students evening and online options to make it as convenient as possible for working adults to take advantage of the opportunity to return to school and complete their college degree.

Advising

Students in the BS in General Studies program are advised by an academic advisor (determined alphabetically by last name) who serves as an important resource to students as they progress and manage their educational and career goals.

Students receive one-on-one personal advisement to ensure that educational and professional objectives are met within the course of study.

For more information on this major, visit Goodwin College's (http://goodwin.drexel.edu/mep/ug_ptgstd.php) web page.

Degree Requirements

This program is designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. In consultation with their academic advisor, students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives. An attractive feature is that students can complete minors (http://catalog.drexel.edu/minors) en route to their degree.

Upper Level Course Requirements

As students choose electives from the categories below, a minimum of 36.0 credits must be upper-level courses (typically 300-level and above).

Natural Science Electives

Students select 9.0 credits from the following: ANAT, BIO, CHEM, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval. 9.0

Specialization Requirements

Students must complete 45.0 credits within an area of specialization. The specialization is a set of courses built around a cohesive area of study. An academic advisor must pre-approve the specialization. The specialization will not appear on the student transcript. 45.0

Liberal Studies Requirements

Students must complete 36.0 credits in Liberal Studies, covering a range of subject areas in the humanities and/or social sciences: anthropology, psychology, sociology, political science, history, philosophy, religion, literature and fine arts. (Arts history or appreciation courses, rather than applied courses.) 36.0

Free Electives

60.0

Total Credits

180.0

* Courses older than three years will not be transferred into the curriculum.

Co-op/Career Opportunities

A well-rounded education results in an enriched view of the world. Full-time students majoring in General Studies find careers in diverse areas, taking skills they learn at Drexel to their future endeavors.

Some General Studies students are already established in their careers and simply need a bachelor’s degree to move into higher positions within their organizations and industries and/or to pursue a master’s degree.
Goodwin College's General Studies BS degree is designed for students planning to pursue graduate studies in various professional areas.

**Professional Studies**

### About the Program

**Note:** Effective Winter Term 2014, students are no longer being accepted into this program.

The Bachelor of Science in Professional Studies program is a multidisciplinary major that prepares students to move into the professional ranks of an organization. Coursework for the major is constructed around five domains that are central to modern professional life—social science (understanding people in a diverse world), critical thinking, creativity, communication, and business. The curriculum is designed to enable students to become professionals in their field of choice, building on their prior education and experience.

The program is designed for aspiring professionals in any industry. Students are encouraged to take the technical knowledge they already possess in their fields, and learn to utilize it as creative and innovative leaders and communicators.

### Career Opportunities

The program helps students from a variety of industries improve their professional skills and strengthen their position in the job market. Industries with employees that may benefit from the Professional Studies include, but are not limited to:

- Telecommunications
- Aerospace
- Pharmaceutical
- Retail

Opportunities for Professional Studies graduates include:

- Career advancement within students’ current organizations and industries
- Preparation to pursue a master’s degree in a variety of areas

**No more than 2 transferred courses may be used to complete the minor. A grade of C (2.0) or better must be earned in each courses in the Minor in Business.**

Depending on transfer credits and professional goals, students may use free electives to pursue a minor/certificate. Students should see their advisor for details.

Total Credits: 180.0

- Students select one humanities elective, such as English (ENGL); history (HIST); philosophy (PHIL); fine arts, or a foreign language course.
- **No more than 2 transferred courses may be used to complete the minor. A grade of C (2.0) or better must be earned in each courses in the Minor in Business.**
LeBow College of Business

About the College

The mission of the LeBow College of Business is to integrate Drexel University's technological prominence with experience-based education to develop world-class leaders and advance knowledge through research. At the undergraduate level, this objective is accomplished by providing high-quality educational programs that integrate theory and practice. Drexel's highly regarded co-operative education program in which students interchange periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools. The College and its distinguished faculty are committed to advancing the science and practice of management through basic, applied, and instructional research in the various disciplines of business. The College maintains strong connections to business professions and the community through participation in professional organizations, a commitment to community service, and dedication to providing opportunities for lifelong learning. Drexel's LeBow College of Business—fully accredited by AASCB-International—offers four distinct undergraduate degrees, twelve majors, ten minors and three certificate programs.

About the Curriculum

BS in Business Administration Program

The Bachelor of Science in Business Administration program is designed to prepare students for managerial positions in business and other institutions. To accomplish this, the undergraduate curriculum has the following characteristics and goals:

- An early exposure to the structure and functions of business enterprises
- The bridging of theory and concepts with professional practice
- The integration of material across disciplines within business as well as between business and other fields
- The enhancement of effective communication, problem-solving, and interpersonal skills
- Coverage of the ethical issues inherent in a business setting
- Coverage of the global, political, social, and legal/regulatory environment in which businesses operate
- Coverage of the impact of technology and technological changes on the operation of the business enterprise
- An emphasis on career preparation
- Opportunities for experiential learning through traditional co-op programs and other "hands-on" opportunities

BS in Business and Engineering Program

The Business and Engineering Degree Program contains a broad-based business and engineering curriculum, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study more deeply the areas of accounting, economics, finance, information systems, law, marketing, organizational behavior, entrepreneurship, operations, and statistics along with the functional areas of engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The Business and Engineering Degree Program gives students the opportunity to:

Majors

- Accounting (BS) (p. 328)
- Business Analytics (co-major) (BS) (p. 331)
- Business and Engineering (BS) (p. 334)
- Finance (BS) (p. 337)
- General Business (BS) (p. 340)
- Legal Studies (BS) (p. 342)
- Management Information Systems (BS) (p. 344)
- Marketing (BS) (p. 347)
- Operations and Supply Chain Management (BS) (p. 350)
- Organizational Management (co-major) (BS) (p. 353)
- Technology Innovation Management (co-major) (BS) (p. 355)

Minors

- Accounting (p. 330)
- Business Administration (p. 357)
- Business Analytics (p. 333)
- Finance (p. 339)
- Legal Studies (p. 343)
- Management Information Systems (p. 346)
- Marketing (p. 349)
- Operations and Supply Chain Management (p. 352)
- Organizational Management (p. 354)
- Technology Innovation Management (p. 357)

Certificates

- Brand and Reputation Management (p. 358)
- Social Responsibility in Business (p. 358)
• Develop a breadth and depth of knowledge in functional business areas such as accounting, economics, entrepreneurship, finance, information systems, law, marketing, organizational behavior, operations, and statistics.
• Complete a broad education in engineering disciplines after completing a firm foundation in science and mathematics.
• Develop skills in technical communication and critical reasoning.
• Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.
• Apply acquired skills from co-op work experiences to further enhance their knowledge base.
• Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.
• Learn the operational aspects of business operations to improve the functioning of technically oriented businesses.

BS in Economics Program
The Bachelor of Science in Economics program is designed to provide students with an understanding of the market system, as well as economic institutions, policies and development. In addition to this deep coverage of economics, the major includes liberal arts and sciences requirements. The program is flexible, allowing the student to customize the curriculum and choose areas of emphasis including concentrations in business economics or mathematical economics, as well as to select a coordinating field from other majors and minors at Drexel. The BS in Economics program provides excellent training for graduate school in economics.

BA in Economics Program
The Bachelor of Arts in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with interest in the less quantitative features of economics and a broader liberal arts education, particularly in areas offered by the College of Arts and Sciences. The degree gives students the flexibility to major or minor in a coordinate field outside of economics.

The Economics program:
• Provides a deep understanding of economics and broad training in arts and sciences.
• Enables students to apply acquired skills from co-op work experiences to further enhance their knowledge base.
• Prepares students for a wide variety of opportunities after graduations ranging from; corporate positions, consulting, government agencies, business, and law.
• Is a rigorous program that develops students’ critical thinking and problem solving skills.

Degree Requirements
The Business Administration curriculum requires a minimum of 180.0 credits. The Business & Engineering curriculum requires a minimum of 185 credits. The Economics curriculum requires a minimum of 187.0 credits. The courses in each curriculum may be grouped into three categories:

General Education
The liberal arts comprise 50 percent or more of total credits required. Courses in communications, economics, English, history, mathematics, natural science, political science, psychology, sociology, and statistics teach students to think effectively and to communicate ideas to others. In addition, they provide a good understanding of the economic, social, and political systems within which we live and business operates.

Common Body of Knowledge in Business
Courses in accounting, business strategy and social responsibility, finance, law, organizational behavior, management information systems, production management, and marketing introduce students to all the functional areas of business, the quantitative aspects of decision-making, and the behavioral factors common to all organizational structures.

Major (BSBA) or Coordinated Field (BSECON & BAECON)
The curriculum permits students to pursue one or more majors within the (BSBA) programs. The major coursework and the common body of knowledge in business together comprise not more than 50 percent of the total credits required for graduation. In the Economic programs, students must select a coordinated field to augment the general education and economics course work.

Writing-Intensive Course Requirements
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/engphil/about/DrexelWritingCenter/wiCourses/course_list) on the Drexel University Writing Center (http://www.drexel.edu/engphil/writingcenter) page. Students scheduling their courses in Banner/DrexelOne can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Cooperative Education
The five-year cooperative education programs consist of 12 terms in college and six terms in co-operative employment. During the freshman year, students spend three terms in school (fall, winter, and spring) and have a summer vacation. For each of the next three years, students alternate two terms in school with two terms of co-op. The senior year consists of three terms in college with no cooperative employment.

The four-year cooperative education program consists of 12 terms in college and two terms in cooperative employment. The two terms of co-op experience take place in the third year.

The non-cooperative four-year program comprises 12 terms in school with vacations during the summers.

Cooperative education, academic eligibility requirements, acceptance of transfer students, and placement services are described in detail in other sections of this catalog. Students wishing to prepare for admission to professional schools may obtain preprofessional counseling from the Office of Preprofessional Programs, 215.895.2437.
Special Programs

Accelerated/Dual Degrees

LeBow College offers an accelerated BS/MBA and BS/MS degree programs that provides academically qualified students with the opportunity to earn both a bachelor’s degree and an MBA or MS in Accounting in the time normally required for the undergraduate degree at Drexel University. The program combines the advantage of practical work experience in the renowned Drexel Co-op with the graduate credentials of our nationally recognized programs.

LeBow College also offers a five-year dual-degree program with the European Business School (ESB) at Reutlingen University in Germany. This exciting dual degree program allows undergraduate students to earn degrees from both Drexel University’s LeBow College of Business and Reutlingen University’s European School of Business. In total students will spend 18 months in Germany completing two semesters of study and one semester on Co-op.

Drexel in London

The College’s Drexel in London Program offers flexible schedules for study abroad, ranging from six-week summer sessions to six-month (two-terms) combined study and co-operative education programs in which students can earn up to 18 credits and fulfill one of their co-op requirements. The program’s emphasis is on international business in general, with a particular focus on the United Kingdom and the European Union. Business course selections each year will be selected from the list of courses that constitute the international business concentration, but students in other concentrations may participate in the program. Housing is provided in South Kensington, one of central London’s most desirable residential sections. Drexel in London applications are administered by the Study Abroad office, 215.571.3558.

Business Learning Community (BLC)

LeBow College’s Business Learning Community (BLC) is a way of life at Drexel University - a cohort of freshman business students who live and attend classes together. The BLC was recently recognized by AACSB Accreditation Committee as a “strength and effective practice of the LeBow College of Business.” The program is designed to ease transition to university life, enhance student academic performance, provide opportunities for student engagement and networking and improve the overall student experience.

LeBow BRIDGE

BRIDGE is a LeBow College of Business undergraduate program that provides support to students in four critical areas: academic excellence, financial literacy and social engagement and community service. BRIDGE scholars receive the tools to be successful through advising programs related to academics, financial skills, professional development, cultural awareness and community service.

Students work together to build relationships within a dynamic and diverse group experience. Mentors are also available to BRIDGE scholars to provide guidance and ensure a positive college experience. After freshman year, BRIDGE scholars can serve as peer mentors to underclassmen.

Global Classroom

The LeBow Global Classroom program prepares candidates to become 21st Century Executives, able to tackle the toughest business challenges in our increasingly globalized business world. Each year a select cohort of 20 high-potential students from around the world enters this rigorous global education experience to acquire the complex set of skills and attitudes to thrive in an increasingly uncharted and globalized marketplace. The learning community experience is akin to a “Global Classroom”.

Peer Leader Program

LeBow College’s Peer Leader Program is an outstanding learning experience for sophomore business students. Through a highly competitive application process, top-performing LeBow students with extraordinary leadership potential are identified, selected, trained and paired with UNIV 101 instructors to serve as mentors for new freshmen both inside and outside the classroom.

Summer Institutes

LeBow Summer Institutes offer an introduction to business education through exceptional summer programs designed for outstanding high school students with an interest in business. LeBow Summer Institutes offer the opportunity to maximize and develop the business and leadership skills sought after by employers and college admissions officers.

Accounting

Major: Accounting
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0301
Standard Occupational Classification (SOC) code: 13-2011; 13-2080

About the Program

The LeBow College of Business’s accounting major is designed to provide basic conceptual accounting and business knowledge for careers in accounting and taxation in many settings. Courses cover accounting, auditing, tax preparation, and related topics. Students learn how accounting produces information for making decisions about organizations.

The greatest range of career opportunities are in public, private and government accounting. Professional accountants are normally certified as public accountants (CPA) or managerial accountants (CMA) after passing professional examinations. The University’s co-op program provides practical experience for accounting students. Time spent working in accounting co-op positions is accepted as part of the one year of accounting experience required for the Certified Public Accountant certificate in Pennsylvania and many other states.

Students planning to obtain a CPA license must take additional coursework to meet state mandated requirements. Interested students should contact the Department of Accounting (http://www.lebow.drexel.edu/Faculty/Departments/Accounting) upon declaring the major to ensure ample time to fulfill such requirements.

Co-op/Career Opportunities

Public, private, and government accounting provide the greatest range of career possibilities. Professional accountants are normally certified as public accountants (CPA) or managerial accountants (CMA) after passing the appropriate professional examinations.

Drexel’s co-op program provides an added advantage to accounting students; time spent working in accounting co-op positions is often accepted as part of the one year of accounting experience needed for CPA certification.

Drexel’s accounting graduates accept positions in public accounting, private industry, government, and nonprofit organizations. Many also choose to continue their studies in graduate schools, pursuing such degrees as a MBA, master’s in taxation, master’s in accounting or a PhD. Overall, Drexel’s graduates enjoy a high placement rate.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Accounting

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Accounting Faculty

Maureen Breen, MAS, MBA (University of Illinois at Urbana-Champaign; Drexel University). Assistant Clinical Professor.

Hsihui Chang, PhD (University of Minnesota) KPMG Professor of Accounting.

Hiu Lam Choy, PhD (University of Rochester). Associate Professor.

Financial accounting.
Anthony P. Curatola, PhD (Texas A&M University) Joseph F. Ford Professor of Accounting. Professor. Federal and state income tax policy, retirement income taxation, fringe benefits taxation, educational savings and tax incentives, federal and state income tax research.

Xin Dai, PhD (University of Minnesota). Assistant Professor.

Patricia L. Daniel Derrick, PhD (The George Washington University). Assistant Clinical Professor.

Hubert Glover, PhD (Texas A&M University). Associate Clinical Professor. International financial reporting.

Barbara Murray Grein, PhD (Kenan-Flagler Business School, University of North Carolina) Department Head, Accounting and Tax. Associate Professor. Auditing, auditor selection, audit adjustments, audit fees, corporate governance, financial reporting.

Curtis M. Hall, MBA (University of Arizona). Assistant Professor. Strategic cost management; corporate governance; capital markets research in accounting; human capital investment.

Kevin K. Jones, DBA (Georgia State University). Assistant Clinical Professor.

Natalya V. Khimich, PhD (University of California at Berkeley). Assistant Professor. Equity valuation, earnings quality, and accounting for innovation and intangible assets.

Stacy Kline, MBA (Temple University). Clinical Professor. Individual, corporation; S corporation and partnership taxation.

Duri Park, PhD (Ohio State University). Assistant Professor. Financial accounting, insider trading, investments, and cash holdings.

Bernhard Reichert, PhD, CPA (University of Texas at Austin). Assistant Professor. Behavioral research in accounting and experimental economics.

Mark Vargus, PhD (Wharton School, University of Pennsylvania). Assistant Professor. Capital market research and executive compensation.

Jennifer Wright, MTA (Villanova University) Assistant Department Head, Accounting and Tax. Associate Clinical Professor.

Business Analytics

Co-Major: Business Analytics
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1301
Standard Occupational Classification (SOC) code: 11-1021

The Business Analytics program is a "co-major"

About the Program

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior analyst providing daily reports on production to the CEO seeking to transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

Example business analytics jobs include, BA Strategy Consultants, Business Intelligence and Performance Management Consultants, Advanced Analytics, Optimization Consultants.

Because students in this co-major are required to choose a major in one of the functional areas of business, the curriculum enables students to tailor the program to their interests and anticipated career path.

Students complete the business analytics co-major in conjunction with one of the following majors:

- Accounting
- International Business
- Finance
- Legal Studies
- Management Information Systems
- Marketing
- Operations & Supply Chain Management

An additional distinguishing feature of the business analytics co-major is the required senior project (BUSN 460) where students work in small teams on real business analytics projects from LeBow College’s corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company’s current business challenges. Experiencing this data driven decision-making process is invaluable career preparation.

Students completing the Business Analytics co-major must do so in conjunction with a primary business major. Students must select a primary major from the following list:
- Accounting
- Entrepreneurship
- Finance
- Legal Studies
- Management Information Systems
- Marketing
- Operations & Supply Chain Management
- Technology and Innovation Management

Sample Plan of Study

**Term 1**
- BUSN 101 Foundations of Business I *4.0*
- ECON 201 Principles of Microeconomics *4.0*
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research *3.0*
- MATH 101 Introduction to Analysis I *4.0*
- The Drexel Experience *1.0*
- Term Credits 16.0

**Term 2**
- BUSN 102 Foundations of Business II *4.0*
- ECON 202 Principles of Macroeconomics *4.0*
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing *3.0*
- MATH 102 Introduction to Analysis II *4.0*
- Term Credits 15.0

**Term 3**
- ACCT 115 Financial Accounting Foundations *4.0*
- CIVC 101 Introduction to Civic Engagement *1.0*
- ENGL 103 Composition and Rhetoric III: Themes and Genres *3.0*
- PSY 101 General Psychology I *3.0*
- Select one of the following: *3.0*
  - BIO 100 Applied Cells, Genetics & Physiology
  - or 101 Applied Biological Diversity, Ecology & Evolution
  - CHEM 151 Applied Chemistry
  - PHYS 151 Applied Physics
- General Education elective *3.0*
- Term Credits 17.0

**Term 4**
- ACCT 116 Managerial Accounting Foundations *4.0*
- BLAW 201 Business Law I *4.0*
- COM 270 [WI] Business Communication *3.0*
- STAT 201 Introduction to Business Statistics *4.0*
- Term Credits 15.0

**Term 5**
- INTB 200 International Business *4.0*
- MIS 200 Management Information Systems *4.0*
- STAT 202 Business Statistics II *4.0*
- Select one of the following: *3.0*
  - BIO 101 Applied Biological Diversity, Ecology & Evolution
  - or 100 Applied Cells, Genetics & Physiology
  - CHEM 151 Applied Chemistry
  - PHYS 151 Applied Physics
- Term Credits 15.0

**Term 6**
- Any 200-399 English (ENGL) course *3.0*
- FIN 301 Introduction to Finance *4.0*
- MKTG 201 Introduction to Marketing Management *4.0*
- OPM 200 Operations Management *4.0*
- Term Credits 15.0

17.0  
Total Credits: 186.0  

* See degree requirements (p. 331) for a list of business majors that may be completed in conjunction with the business analytics major.

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, organizational management, technology innovation management, and operations & supply chain management.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

**Minor in Business Analytics**

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior analyst providing daily reports on production to the CEO seeking to transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

The Business Analytics minor at LeBow consists of basic courses in statistics, operations research, and management information systems as well as advanced courses in management information systems, statistics/ econometrics, and modeling. The curriculum enables students to tailor the program to their interests and anticipated career path.

One of the distinguishing features of the business analytics minor is the required senior project (BUSN 460) where students work in small teams on real business analytics projects from LeBow College’s corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company’s current business challenges. Experiencing this data driven decision making process is invaluable career preparation.

Business and Engineering

**Business and Engineering Faculty**

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization.

Michaela Draganska, PhD (Kellogg School of Management, Northwestern University) Department of Marketing. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (University of Michigan) Department of Marketing. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo.

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University's Provost Fellow India Partnerships.

Chaojiang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

**About the Business Program**

The major in business and engineering combines two of Drexel's most exciting programs, linking business and engineering to provide students with expertise in both fields.

The program contains a curriculum combining coursework in both business and engineering, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study quantitative decision making within a business context, technology innovation management, and operations management. They complete a minor in business as well as a concentration in engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The major gives students the opportunity to learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.

**Mission**

The Bachelor of Science in Business and Engineering program provides students the opportunity to:

- Learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.
- Study in more depth the areas of operations, technology innovation management, and other functional business areas.
- Complete a course of studies in an engineering discipline after completing a firm foundation in science and mathematics.
- Develop skills in technical communication and critical reasoning.
- Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.
- Apply acquired skills in co-op work experiences to further enhance their knowledge base.
- Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.
- Learn to improve the functioning of technically oriented businesses through operational competencies.

**About the Business Minors**

All Business and Engineering students are required to complete a business minor under the curriculum, and they will have the ability to choose from any of the business minors that are currently offered by the LeBow College of Business.

- Accounting (p. 330)
- Business Analytics
- Economics
• Finance
• International Economics (p. 375)
• Legal Studies (p. 343)
• Management Information Systems (p. 346)
• Marketing (p. 349)
• Operations & Supply Chain Management (p. 352)
• Organizational Management (p. 354)
• Technology Innovation Management (p. 357)

About the Engineering Concentrations

All Business and Engineering students are required to complete an engineering concentration under the curriculum, and they will have the ability to choose from the following:

• Chemical Engineering
• Civil Engineering
• Electrical and Computer Engineering
• Mechanical Engineering
• General Engineering

For more information on the specific courses for the concentration, please refer to the Degree Requirements Page (p. 335).

Additional Information

For additional information about the program or to schedule an appointment, please contact the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Decision).

Total Credits: 183.0-184.0

Students must take 4-5 LeBow courses to complete the requirements of a business minor. Students must select a minor from the following list:

• Accounting
• Economics
• Entrepreneurship
• Finance
• International Economics
• Legal Studies
• Management Information Systems
• Marketing
• Operations & Supply Chain Management
• Technology Innovation Management

** Decision Sciences & MIS Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD  (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.
Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS); Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD (The Ohio State University) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management.

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization.

Oben Ceryan, PhD (University of Michigan Ann Arbor) Department of Decision Sciences. Assistant Professor. Dynamic Pricing, Inventory Control, Revenue Management, Stochastic Optimization, Supply Chain Management.

Christopher Gaffney, PhD (Rutgers University, New Brunswick). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis.

David Gegen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD (Penn State University) Department of Decision Sciences. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management.

Jeongsik Lee, PhD (University of California Los Angeles). Assistant Professor. Economics of Innovation; Social networks; Technology management.

Benjamin Lev, PhD (Case Western Reserve University). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo.

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Hazem Maragah, PhD (Louisiana University) Department of Decision Sciences. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Matthew Reindorp Associate Clinical Professor.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University's Provost Fellow India Partnerships.

Wenjing Shen, PhD (University of Michigan) Department of Decision Sciences. Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (Columbia University) Department of Decision Sciences. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management.

Chaojiang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Finance

Major: Finance

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0801

Standard Occupational Classification (SOC) code: 11-3031; 13-2052; 13-2041; 13-2051

About the Program

Students with a major in finance obtain a thorough understanding of the basic concepts, principles, operating procedures, and analytical techniques in the various areas of finance. Throughout the finance curriculum, students develop and apply quantitative skills for financial decision making within the business environment.

This major prepares students for careers in private business firms, including positions involving forecasting and budgeting for financial resources, cost-effectiveness analysis, control of expenditures, evaluation and financing of new projects, and evaluation of alternative methods of financing; in the investment field, including positions in security analysis, sales and trading, and investment banking and in the public sector, including positions at the federal, state, and local government levels.

For more information about the program, contact the Department of Finance (http://www.lebow.drexel.edu/faculty-and-research/disciplines/finance).

Major Requirements

All core mathematics and statistics courses should be completed before embarking on the upper-level finance major courses. A second course in business statistics, STAT 202, must be completed as a prerequisite for the major's required courses.

Because of the relevance of financial accounting to the field of finance, it is strongly recommended that finance students also complete ACCT 321.
and ACCT 322 (Financial Accounting I and II) as two of their free electives.

**Total Credits**

180.0
Typical positions include financial analyst, capital budgeting officer, credit analyst, merger and acquisition manager, bank trust officer, portfolio analyst, personal financial planner, and securities broker.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

**Minor in Finance**

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.

* Cannot do a major and a minor in the same field of study.

All core mathematics and statistics courses should be completed before embarking on the upper-level finance minor courses. A second course in business statistics, STAT 202, must be completed as a prerequisite for the minor’s required courses.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment. Prospective students may also consult with the Finance Department for more detailed information on co-op and post-graduate opportunities.

### Finance Faculty

David A. Becher, PhD (Pennsylvania State University) Department of Finance. Associate Professor. Mergers and acquisitions, corporate governance, financial institutions.

Erik Benrud, PhD, FRM, CAIA, CFA (University of Virginia) Department of Finance. Clinical Professor. Economics/managerial economics: game theory; finance: alternative investments, derivatives.

Jie Cai, PhD (University of Iowa) Department of Finance. Associate Professor. Investment banking, mergers and acquisitions, corporate finance and corporate governance.

Thomas Chi-Nan Chiang, PhD (The Pennsylvania State University) Marshall M. Austin Professor of Finance. Professor. International finance;
time series analysis of financial data; econometric modeling & forecasting; financial markets; international risk management; monetary theory; macroeconomics; emerging markets; and global country funds.

Naveen Daniel, PhD (Arizona State University). Associate Professor. Corporate governance, mutual funds, hedge funds.

Daniel Dorn, PhD (Columbia University) Department of Finance. Associate Professor. Capital markets and investments; behavioral finance.

Casey Dougal, PhD (University of North Carolina, Chapel Hill). Assistant Professor. Empirical asset pricing, financial media, behavioral finance, and urban economics.

Michael Joseph Gombola, PhD (University of South Carolina) Department Chair, Finance. Professor. Stock offerings and repurchases, mergers, acquisitions, and restructuring; working capital management, time series analysis; options and derivatives, financial statement analysis.

Jennifer Juergens, PhD (Pennsylvania State University). Assistant Professor. Corporate Control and Mergers and Acquisitions; Corporate Governance; Executive Compensation; Investments; Securities Analysts.

Amy Kratchman, MBA (Drexel University). Associate Clinical Professor. Investments; Portfolio Management.

Michelle Lowry, PhD (University of Rochester) TD Bank Endowed Professor. Empirical corporate finance, including initial public offerings, mergers, and corporate governance.

Edward Nelling, PhD, CFA (University of Pennsylvania-Wharton) Department of Finance. Professor. Investments; corporate finance; real estate finance.

Gregory Nini, PhD (The Wharton School, University of Pennsylvania). Assistant Professor. Creditor control rights, corporate governance, and firm value; insurance economics.

Patricia Robak, PhD (Lehigh University) Department of Finance. Associate Clinical Professor. Investments, money and banking, international finance.

John Robinson, PhD (Arizona State University). Assistant Clinical Professor. Board of Directors; Capital Structure; Executive Compensation.

Diana Sandberg, MS (Drexel University) Department of Finance. Associate Clinical Professor. Portfolio management, derivatives, investment management.

Samuel H. Szewczyk, PhD (Pennsylvania State University) Department of Finance. Associate Professor. Corporate governance, mergers and acquisitions, financial engineering, investment banking, financial institutions.

George Tsetsekos, PhD (The University of Tennessee) Dean Emeritus, LeBow College of Business; Francis Professor of Finance. Professor. Valuation and corporate restructuring, treasury and risk/hedging operations, investment banking, securitization, emerging capital markets, multinational finance, bank asset-liability management.

Ralph Walkling, PhD (University of Maryland) Stratakis Professor of Corporate Governance, Department of Finance. Professor. Corporate governance, mergers and acquisitions.

**General Business**

**Major: General Business**

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021; 11-2022; 11-3011; 11-9199

**About the Program**

The major in general business equips students with a thorough understanding of theory and practice in the fundamental areas of business such as accounting, economics, finance, management, and marketing. This major is intended for business students who wish to gain breadth within their undergraduate studies. Students will develop the skills and competencies necessary for success across a diverse spectrum of business organizations.

Students selecting the major in general business should choose eight courses from at least five of the following fields: accounting (ACCT), economics (ECON), finance (FIN), human resource management (HRMT), international business (INTB), legal studies (BLAW), management (MGMT), marketing (MKTG), management information systems (MIS), business statistics (STAT), organizational behavior (ORGB), operations research (OPR) and operations management (OPM).

**General Education Electives**

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

- **Society and Culture**
  - Communication, English, Fine Arts, Global Studies, Language or Philosophy (3.0)
- **Social Science**
  - Anthropology, History, Sociology, Political Science, Psychology (3.0)
- **Science**
  - Computer Science, Information Systems, Science (3.0)

**Additional General Education Electives**

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science.

### Legal Studies

**Major:** Legal Studies

**Degree Awarded:** Bachelor of Science in Business Administration (BSBA)

**Calendar Type:** Quarter

**Total Credit Hours:** 180.0

**Co-op Options:** Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 22.9999

**Standard Occupational Classification (SOC) code:** 11-9199

### About the Program

Law is pervasive in all aspects of business and life. The major in legal studies provides Drexel University students with the ability to recognize the influence of the law, understand its application and make informed and intelligent decisions regarding the course of action to take.

Although the major in legal studies will benefit those interested in pursuing a career in law, it is not intended solely for students aspiring to attend law school. This major enhances any business student's perspective on the impact of legal issues within their respective professions.

Students will learn the basics of various areas of the law and the legal environment of business and will learn to identify the factual situation in which to apply that law. They will be able to analyze the facts, determine which aspects of the law are pertinent, apply that to those facts, and draw a conclusion. Clarity of thought, reasoning and expression (both oral and written) are additional results of this process.

Minor in Legal Studies

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Legal Studies Faculty

Roger D. Collons, JD, PhD (George Washington University; Georgia State University) Department of Legal Studies. Professor. Patent law, preservation of wealth.

Richard P. Freedman, JD, LLM (Temple University) Head of the Department of Legal Studies. Associate Professor. Taxation, corporate and business matters, real estate, estate planning, estate administration and elder law.

Andrew Genetta, JD (Cleveland-Marshall College of Law). Associate Clinical Professor.

Rosalie S. Kreider, JD (Villanova University) Department of Legal Studies. Clinical Professor. Business law, international business law.

Neal Orkin, JD (Temple University) Department of Legal Studies. Associate Professor. Intellectual property rights of employed inventors and authors; labor relations.

Natalie Pedersen, JD (Harvard University) Department of Legal Studies. Assistant Professor. American law, contract law, labor and employment law.

Steven R. Sher, JD (Georgetown University Law Center) Department of Legal Studies. Associate Professor. Business law, product liability, negligence, medical malpractice.

Management Information Systems

Major: Management Information Systems
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1201
Standard Occupational Classification (SOC) code: 11-3021

About the Major

Management Information Systems (MIS) is about managing how and why people, organizations, and markets apply, design, and deploy information technology to achieve tactical and strategic business goals. MIS is about the integration of both areas of expertise and applying the power of technology to solving business problems.

The major in management information systems prepares students for opportunities in the information technology field and business. Aimed at producing graduates who bridge the gap between technical knowledge and business functions, the program focuses on a mix of applied computer systems content, interpersonal interaction, and a practical business orientation.

While administered by the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Management), the major in management information systems is interdisciplinary in nature. The courses may be taken by students in other colleges and departments who wish to complement other computer-related studies with business-oriented information systems subjects.

Co-op/Career Opportunities

Career opportunities exist in a wide range of business settings. Students prepare for careers as managers of information resource units, or as staff members who develop and support computer systems.

Recent Management Information System (MIS) graduates have gone on to work for many types of businesses and other organizations. Some job titles include: Management Consultants, IS Business Analysts, IT Project Management, IT Consultants, IT Systems Managers, Systems Analysts. Some MIS students also choose to continue their studies with an MBA; recent Drexel MIS graduates are now attending Columbia, Princeton, and the University of Pennsylvania.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Management Information Systems

Requirements

- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.

* Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Facilities

Decision Sciences & MIS Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD (The Ohio State University) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Oben Ceryan, PhD (University of Michigan Ann Arbor) Department of Decision Sciences. Assistant Professor. Dynamic Pricing, Inventory Control, Revenue Management, Stochastic Optimization, Supply Chain Management

Christopher Gaffney, PhD (Rutgers University, New Brunswick). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD (Penn State University) Department of Decision Sciences. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jeongsik Lee, PhD (University of California Los Angeles). Assistant Professor. Economics of Innovation; Social networks; Technology management

Benjamin Lev, PhD (Case Western Reserve University). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Hazem Maragah, PhD (Louisiana University) Department of Decision Sciences. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Fariborz Y. Partovi, PhD (The Wharton School, University of Pennsylvania) Department of Decision Sciences. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Matthew Reindorp Associate Clinical Professor.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University's Provost Fellow India Partnerships

Wenjing Shen, PhD (University of Michigan) Department of Decision Sciences. Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (Columbia University) Department of Decision Sciences. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management

Chaojiang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Calendar Type: Quarter

Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1401
Standard Occupational Classification (SOC) code: 11-2021

About the Program
Marketing is one of the most dynamic areas of business because it focuses on satisfying the ever-changing wants and needs of people. Professional marketers research and identify target audiences, develop products and services, formulate pricing strategies, develop advertising and promotional campaigns, and implement methods of distribution so that customers receive products and services where and when they want them. Perhaps the most basic marketing skill is to be able to see an organization's activities from the customer's viewpoint.

A major in marketing prepares students for the many opportunities that exist in product and brand management, marketing research, advertising, digital marketing, customer analytics, retailing, channel management, logistics and physical distribution, professional personal selling and sales management, purchasing, wholesaling, marketing planning and analysis, public relations, marketing entrepreneurship, and new-product development. In combination with the commerce and engineering curriculum, this major prepares students to fill marketing positions that require a technical background.

For more information about the major, contact the Department of Marketing (http://www.lebow.drexel.edu/academics/disciplines/marketing).

Term Credits: 9.0
Developed product placement charts for forecasting. Assisted in the development of new products, which included gathering information concerning competitive products, markets, pricing. Conducted testing of new products. Assisted in special projects. . . gained good experience.

Retail analyst, producer of luxury home products: “Supported the sales and production divisions. Tracked weekly and monthly sales information. Developed product placement charts for forecasting. Assisted in maintaining productivity reports. Developed and presented a window treatment market analysis.”

Co-op/Career Opportunities

Marketing opportunities abound in all types of organizations — including manufacturing firms, wholesalers, retail stores, Internet firms, service organizations, banking and financial institutions, law and accounting firms, hospitals, colleges and universities, museums, chambers of commerce, professional sports teams, government agencies, charitable foundations, churches, and countless other settings. Any organization that seeks to reach a particular audience or consumer group needs the skills of marketers.

There are many specialized jobs in marketing, including product and brand managers, marketing researchers, advertising executives, pricing analysts, direct (non-store) marketers, Internet marketers, professional buyers, manufacturing agents, transportation and distribution managers, industrial and consumer salespeople, stockbrokers, sales managers, college enrollment managers, wholesalers, retailers, marketing planners, sales forecasters, marketing cost analysts, public relations managers, media and event planners, sales promotion managers, trade show or exhibit marketers, new product development managers, management consultants, digital marketers, marketing data analytics and international marketers.

Co-op Experiences

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Marketing research assistant, manufacturing firm: “Assisted in the development of new products, which included gathering information concerning competitive products, markets, pricing. Conducted testing of new products. Assisted in special projects. . . gained good experience.”

Retail analyst, producer of luxury home products: “Supported the sales and production divisions. Tracked weekly and monthly sales information. Developed product placement charts for forecasting. Assisted in maintaining productivity reports. Developed and presented a window treatment market analysis.”

Activity-based management (ABM) analyst, pharmaceuticals manufacturer: “Supported the ABM team (5 people). Member of two sub-project teams. Maintained full participation on both sub-teams while still maintaining responsibilities on core team. Developed proficiencies in re-engineering methodologies, activity-based costing methodologies, and support of change management. . . included as a full team member.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Marketing

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Marketing Faculty

Rolph E. Anderson, PhD (University of Florida) Royal H. Gibson Sr. Professor of Marketing. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina Larsen Andras, PhD (University of Texas at Austin) Head of the Department of Marketing; Academic Director, Center for Corporate Research Management. Professor. International marketing, marketing channels management, cross-cultural communication.
Boryana Dimitrova, PhD (Drexel University). Assistant Clinical Professor. Global marketing, inter-organizational, marketing channels, retailing and retail management.

Michaela Draganska, PhD (Kellogg School of Management, Northwestern University) Department of Marketing. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Lawrence Duke, MBA (Harvard Business School). Associate Clinical Professor. International marketing and strategy, new product development, business-to-business marketing, marketing of financial services.

Elea Feit, PhD (University of Michigan) Department of Marketing. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

Michael Howley, PhD (Arizona State University). Associate Clinical Professor. Investments in dissatisfied customers, service recovery, health-care marketing, marketing of service organizations, financial consequences of marketing actions.

Yanliu Huang, PhD (The Wharton School, University of Pennsylvania). Assistant Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Daniel Korschun, PhD (Boston University). Assistant Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Hyokjin Kwak, PhD (University of Georgia) Department of Marketing. Associate Professor. Advertising effects, consumer behaviors and e-commerce.

Bert Rosenbloom, PhD (Temple University) Rauth Chair of Electronic Commerce. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Prashant Srivastava, PhD (Oklahoma State University) Department of Marketing. Associate Clinical Professor. New product development, supply chain management, B2B marketing, sales, strategic alliances, organizational learning, market orientation, healthcare marketing, and database marketing.

Rajneesh Suri, PhD (University of Illinois at Urbana-Champaign) Associate Dean for Research, Marketing Department. Professor. Pricing, promotions and branding.

Srinivasan Swaminathan, PhD (University of Texas-Austin). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Chen Wang, PhD (University of British Columbia). Assistant Professor. Consumer curiosity, self-regulation and goals, sensory perception.

Operations & Supply Chain Management

Major: Operations & Supply Chain Management

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0205
Standard Occupational Classification (SOC) code: 11-3051; 11-3071

About the Program

The major in operations and supply chain management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems.

Operations and supply chain management stresses a thorough knowledge of the rapidly accumulating analytical techniques in systems analysis, in addition to a full appreciation of all other phases of business.

With the proper choice of electives, this program also prepares students for graduate studies in industrial management, industrial engineering, management science, or operations research.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Decision).

Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surrounds. In this minor, courses drawing on the foundations and the state-of-the-art for both production and service industries allows students to craft a course of study that can complement their existing major.

Co-op/Career Opportunities

Many production and operation management students go on to work in a variety of fields, including manufacturing, product planning and research and development.

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Manufacturing engineering co-op, corporate setting: "Developed manufacturing projects, procedures, and documentation in assisting with International Standards Organization certification. The best feature of the job was the chance to work within a manufacturing plant and witness the accomplishments and setbacks that can and will occur in all manufacturing jobs."

Meter operation co-op, major utility company: "Coordinated customer demand survey. Gathered and analyzed statistics pertaining to the water usage of residential, industrial, and commercial customers. . . . Management in department was excellent; very supportive."

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Operations and Supply Chain Management

The minor in operations and supply chain management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems. Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings. In this minor, courses drawing on the foundations and the state-of-the-art for both production and service industries allows students to craft a course of study that can complement their existing major.

Requirements

• No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
• A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
• No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
• Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
• Business administration and business & engineering & economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management and technology innovation management.
• Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences (http://www.lebow.drexel.edu/Faculty/Departments/Decision).

Facilities

Decision Sciences & MIS Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD (The Ohio State University) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management.
Co-Major: Organizational Management

Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Classification of Instructional Programs (CIP) code: 52.0213
Standard Occupational Classification (SOC) code: 11-9199

The Organizational Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing or Operations and Supply Chain Management.

About the Program

The co-major in “Organizational Management” is designed for students with varied backgrounds who seek to develop knowledge and skills in leadership, teamwork, and communication. These organizational management skills are intended to supplement core technical skills such as Finance, Accounting, Marketing, etc. The curriculum provides students with a foundation of skills for effectively working with others in a variety of contexts and situations. This co-major complements a variety of degrees and is suitable for business majors.

### Requirements

- **No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.**
- **A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.**
- **No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.**
- **Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.**
• Business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, technology innovation management, organizational management and operations & supply chain management.

• Cannot do a major and a minor in the same field of study.

Learning Goals

Upon completing the minor, students will be able to:

• Discover important insights about oneself as a leader and develop a self-awareness of strengths and opportunities for personal growth
• Manage career and networks to achieve personal growth
• Develop the skills and competencies needed to lead effectively in today’s dynamic and diverse environment
• Increase conceptual understanding of leadership in different types of situations and facing different types of challenges
• Learn how to influence and manage conflict within organizations
• Identify various approaches and imperatives for leading teams
• Recognize ethical dilemmas in management practice and how to infuse ethical standards within a group or team
• Learn how to effectively function within a team and lead a team for success
• Recognize how human factors can both distort and enhance the process of managerial decision making
• Understand how the changing nature of work (e.g., global, technological, etc.) influences choices about design and practices within organizations

Organizational Management Faculty

Lauren D’Innocenzo, PhD (University of Connecticut). Assistant Professor. Groups/Teams; Multi-Level Modeling; Shared Leadership.

Cuneyt Gozu, PhD (University of Albany). Associate Clinical Professor. Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

David Kurz, EdD (University of Pennsylvania). Assistant Clinical Professor. Business Education; Groups/Teams; Leadership; Supply Chain Leadership.

Mary Mawritz, PhD (University of Central Florida). Assistant Professor. <em>Management Department</em> Abusive supervision; deviant behavior; leadership.

Christian Resick, PhD (Wayne State University). Associate Professor. Groups/Teams; Leadership; Organizational Culture and Fit; Personality.

Joan Weiner, PhD (The Wharton School, University of Pennsylvania). Professor. Business ethics, leadership, communication and decision making; educational innovation; health system management design.

Jonathan C. Ziegert, PhD (University of Maryland). Associate Professor. <em>Management Department</em> Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

Technology Innovation Management

Co-Major: Technology Innovation Management
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Classification of Instructional Programs (CIP) code: 52.0201
Standard Occupational Classification (SOC) code: 11-1021; 11-9199

The Technology Innovation Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing or Operations and Supply Chain Management.

About the Program

Over the last two decades, Technology and Innovation Management has emerged as a unique and exciting area within the broad field of management. The field focuses broadly on understanding the process of innovation, and management approaches to innovation with special emphasis on technology change a source of innovations.

The Technology Innovation Management program offers a very significant way of differentiating the Drexel business student in the marketplace by embedding skill sets and knowledge base emphasizing technology innovation management which is built on a sold business background. Students most likely to benefit from a technology innovation management co-major will have majors in Operations and Supply Chain Management, Marketing, and Management Information Systems; however, this is not a restricted co-major. Technology Innovation Management courses are oriented primarily toward innovation, with an emphasis on technology-based innovation.

**Technology Innovation Management Faculty**

Shanti Dewi Anak Agung Istri, PhD (Georgia Institute of Technology). Assistant Professor. Technology commercialization; Technology entrepreneurship.

Suresh Chandran, PhD (Vanderbilt University). Associate Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Robert W. Keidel, PhD (Wharton School, University of Pennsylvania). Clinical Professor. Cognitive coaching; Executive team building; Organizational design; Strategic thinking; Strategy creation.

Jeongsik Lee, PhD (University of California Los Angeles). Assistant Professor. Economics of Innovation; Social networks; Technology management.

Yu-Chieh Lo, PhD (University of Southern California). Assistant Professor. Categorization in markets; Organization theory; Technology innovation.

Dai Ma, PhD (University of Chicago). Assistant Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China.

Michele K. Masterfano, DBA (Argosy University). Associate Clinical Professor. Business Planning; Marketing Research; Marketing Strategy; Social Capital; Social Networking.

Rajiv Nag, PhD (Pennsylvania State University). Assistant Professor. Organizational Knowledge and Identity; Organizational learning and change; Strategic Leadership; Strategic Performativity

V. K. Narayanan, PhD (University of Pittsburgh). Delloitte Touche Jones Stubbs Professor. Management Department. Cognition and Strategy; Corporate Entrepreneurship; Organization design.

Haemin Park, PhD (University of Washington). Associate Professor. IPO, Knowledge-based Vie of the Firm; Technology Entrepreneurship; Venture capital.

Stanley Ridgley, PhD (Duke University). Assistant Clinical Professor. Business communication; Cognition and strategy; Competitive intelligence; Determinants of Firm Performance; Global Management; New Markets in Emerging Countries; Russian Business Culture.

Daniel Tzabbar, PhD (University of Toronto). Assistant Professor. Management Department. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation.

---

**Minor in Business Administration**

The minor in business administration is designed to provide some flexibility while at the same time assuring exposure to a number of critical business functional areas.

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration and business & engineering & economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal
studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.

- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

### Certificate in Brand and Reputation Management

**Certificate Level:** Undergraduate  
**Admission Requirements:** Current Drexel students only  
**Certificate Type:** Certificate  
**Number of Credits to Completion:** 16.0  
**Instructional Delivery:** Campus  
**Calendar Type:** Quarter  
**Expected Time to Completion:** 3 years  
**Classification of Instructional Program (CIP) Code:** 33.0104  
**Standard Occupational Classification (SOC) Code:** 11-2021

In the increasingly competitive and volatile global marketplace, brand and reputation management have gained considerable interest and importance in organizations, including corporations, non-profits, and those in the public sector.

The Brand and Reputation Management Certificate program introduces the concept of the product and/or corporate brand, the components that make up a good brand, and how to develop brand strategies that are appropriate for various types of organizations. Students will also learn about the various stakeholders that impact or enhance an organization’s ability to build its brand and reputation as well as learn to analyze the business environment in order to identify a desired image, to create brand positioning strategy, and to develop and nurture the positive perception of a product, organization, individual or place.

Following the completion of all other required courses, all students must also complete an "honors" project as part of MKTG 363 Brand & Reputation Management Project. The topic and scope of the project must be approved by the Department Head in the Department of Marketing (http://www.lebow.drexel.edu/faculty-and-research/disciplines/marketing). Completed projects will be a written project submitted to the Department Head of Marketing for evaluation in a pass/fail manner.

### Certificate in Social Responsibility in Business

**Certificate Level:** Undergraduate  
**Admission Requirements:** Current Drexel students only  
**Certificate Type:** Certificate  
**Number of Credits to Completion:** 15.0  
**Instructional Delivery:** Campus  
**Calendar Type:** Quarter  
**Classification of Instructional Program (CIP) Code:** 33.0104  
**Standard Occupational Classification (SOC) Code:** 11-9199

Through course work, civic engagement and related co-op experience, the Certificate in Social Responsibility in Business provides a well-rounded look at corporate social responsibility, giving students a unique perspective on ethical leadership in the business community. The certificate program encourages students to seek co-op experience and positions after graduation with firms committed to acting with social responsibly.

### Program Requirements

In conjunction with the Lindy Center for Civic Engagement, (http://drexel.edu/lindycenter) students initiate and complete a socially focused winter break or spring break project during any one term/break. The scope of the project entails civic responsibility and focuses on business applications. An example would be to assist in the preparation of income tax forms for under privileged Philadelphia residents. This project is in addition to requirements of the University 101 course.

Student will use their My LIFE e-portfolios to retain reflections and relevant writings from each of the required courses.

Coordinated with the Center for Civic Engagement, students will complete a minimum of sixty hours (60) of civic engagement while a student at Drexel University.

Students are required to earn a minimum of "C" in the following required courses, and a "B" average over all the courses.

Students must take BUSN 103 Social Responsibility in Business.
Economics is one of Drexel LeBow’s strongest disciplines. The LeBow College of Business celebrated its strengths in economics teaching and research by elevating its economics department into a School of Economics. The School of Economics will continue Drexel LeBow’s commitment to offering a curriculum that is current and challenging, and to conducting research that aligns with business trends and informs policy makers.

A degree, major or minor in Economics provides students with a robust understanding of the workings of the market system and major economic institutions, economic policy, and development.

**Majors**

**BA, BS, BS-JD Economics**
- Economics (BA, BS, BS-JD) (p. 360)

**BS Business Administration**
- Business Economics co-major (p. 367)
- International Business (p. 370)
- International Business co-major (p. 372)

**Minors**
- Economics (p. 364)
- International Economics (p. 375)

**Economics**

*Degree Awarded: Bachelor of Science in Economics (BS) or Bachelor of Arts in Economics (BA)*

*Calendar Type: Quarter*

*Total Credit Hours: 187.0*

*Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)*

*Classification of Instructional Programs (CIP) code: (BS) 45.0603; (BA) 45.0601*

*Standard Occupational Classification (SOC) code: 19-3011; 13-2000*

**About the Program**

Economics is at the root of business decisions, government policy making, and global relations. As a course of study, it can lead to diverse career opportunities, and is often viewed favorably as excellent preparation for graduate programs such as business and law.

**Bachelor of Arts in Economics**

The BA in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with interest in the less quantitative features of economics and a broader liberal arts education, particularly in areas offered by the College of Arts and Sciences. The degree requires students to conduct research that aligns with business trends and informs policy makers.

**Bachelor of Science in Economics**

The BS in Economics program introduces students to modern economics within the context of a general scientific and humanities curriculum. This degree is oriented towards students interested in acquiring a broad-based education with a focus on quantitative and professional skills.

The program is designed to provide students with an understanding of the market system, as well as economic institutions, policies and development. In addition to this deep coverage of economics, the major also includes liberal arts and sciences requirements. The degree stipulates that students either complete one of the specific economic concentrations (Business Economics or Mathematical Economics) or develop a depth of knowledge in a minor or secondary major field outside of economics. The BS in Economics program provides excellent training for graduate school in economics.

The BS in Economics offers concentration choices in both Business Economics and Mathematical Economics.

**Business Economics Concentration**

This concentration prepares students to apply the rigorous methods of modern quantitative economics as professionals in a business context. This program combines coursework in economics and the functional fields of business administration within the context of a general scientific and humanities curriculum.

**Mathematical Economics Concentration**

This concentration prepares students for graduate study in quantitative and rigorous programs in economics and related fields. This program will also prepare students for professional work in quantitative economics or closely related areas, by providing coursework in economics and mathematics, in the context of a general scientific and humanities curriculum.

**Coordinate Field Option**

As an alternative to choosing one of these concentrations, students may also personalize their degree by developing a depth of knowledge in a minor or secondary major field outside of economics such as finance, social sciences, international studies or natural sciences. Examples of possible coordinating minors could include a minor in History and Politics for students interested in political economy or policy studies; a minor in American or European Studies for students interested in the economics of those countries, or a minor in Communication for students interested in economic journalism. In addition, students can complete a specialization in business economics or mathematical economics as an area of concentration.

**Minor in Economics**

The minor in Economics provides a solid background in the application of economic theory to markets. Students complete standard courses in micro- and macroeconomics that emphasize core training in economic decision making. Students also choose a course that applies this training to areas such as international economics, firm and industry behavior, quantitative economic analysis, and public policy. This type of analytical training provides a strong complement to many majors, including business
fields, but would be especially useful for students interested in careers in public policy or law.

Minor in International Economics

The minor in International Economics is designed for students with varied backgrounds who have a particular interest in learning more about the international economic environment. The curriculum provides the students a basic understanding of economics and exposes them to advanced topics dealing with international trade, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

Additional Information

For more information about this major, contact the School of Economics. (http://www.lebow.drexel.edu/Faculty/Departments/Economics)

Degree Requirements (BS)

While a variety of options are available for study in coordinating fields, two specific concentrations have been developed to address key areas in economics.

- The business economics concentration
- The mathematical economics concentration

The requirements for those concentrations are listed beneath the general requirements for the BS in Economics program.

**General education requirements**

- ANTH 101 Introduction to Cultural Diversity 3.0
- CIVC 101 Introduction to Civic Engagement 1.0
- COM 270 [WI] Business Communication 3.0
- CS 143 Computer Programming Fundamentals 3.0
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- PSY 101 General Psychology I 3.0
- SOC 101 Introduction to Sociology 3.0
- UNIV B101 [WI] The Drexel Experience 1.0
- UNIV B201 Career Management 1.0

**Select one of the following math sequences:** 8.0

- MATH 101 Introduction to Analysis I
- & MATH 102 and Introduction to Analysis II
- MATH 121 Calculus I
- & MATH 122 and Calculus II

- Fine arts elective 3.0
- Three laboratory science electives 9.0
- Two English literature electives: (ENGL 200 through ENGL 399) 6.0
- One history elective 4.0
- Two philosophy electives 6.0

**Economics Requirements**

- ECON 201 Principles of Microeconomics 4.0
- ECON 202 Principles of Macroeconomics 4.0
- ECON 250 Game Theory and Applications 4.0
- ECON 301 Microeconomics 4.0
- ECON 321 Macroeconomics 4.0
- ECON 322 [WI] Economics Seminar 4.0
- ECON 350 [WI] Applied Econometrics 4.0
- ECON 360 Time Series Econometrics 4.0
- INTB 334 International Trade 4.0

**Economics Electives** 20.0

Select 20.0 credits from any of the following:

- ECON 203 Survey of Economic Policy
- ECON 260 Economics of Small Business
- ECON 326 [WI] Economic Ideas
- ECON 330 Managerial Economics
- ECON 331 International Macroeconomics
- ECON 334 Public Finance
- ECON 336 Labor Economics
- ECON 338 Industrial Organization
- ECON 342 Economic Development
- ECON 344 Comparative Economic Systems
- ECON 348 Mathematical Economics
- ECON 351 Resource and Environmental Economics
- ECON T480 Special Topics in ECON
- ENVS 370 Practice of Environmental Economics
- FIN 301 Introduction to Finance
- FIN 325 Financial Institutions and Markets
- INTB 332 Multinational Corporations
- INTB 440 Seminar in International Business
- INTB 338 Regional Studies in Economic Policies and International Business
- SOC 240 Urban Sociology
- SOC 260 Classical Social Theory

**Additional Requirements**

Coordinate Field 26.0

Additional courses as required to satisfy a coordinating field (a second major, minor, or one of the two available concentrations below)

**Free electives** 30.0

Total Credits 187.0

- Students pursuing the concentration in Mathematical Economics can select CS 171 instead of CS 143.
- Students who take the Mathematical Economics or Business Economics concentrations must complete the required concentration courses and free electives for a total of 56.0 credits.

Mathematical Economics Concentration

Students selecting this concentration must have satisfied the general educational mathematics requirements by completing MATH 121 and MATH 122.

- ECON 348 Mathematical Economics 4.0
- MATH 123 Calculus III 4.0
- MATH 200 Multivariate Calculus 4.0
- MATH 201 Linear Algebra 4.0
- MATH 210 Differential Equations 4.0

Select three of the following: 9.0-12.0

- MATH 220 Introduction to Mathematical Reasoning [WI]
- MATH 285 Differential Equations II
- MATH 300 Numerical Analysis I
- MATH 301 Numerical Analysis II
- MATH 305 Introduction to Optimization Theory
- MATH 320 Actuarial Mathematics
- MATH 401 Elements of Modern Analysis I
- MATH 402 Elements of Modern Analysis II
### Business Economics Concentration

#### Required Courses
- **ACCT 115** Financial Accounting Foundations 4.0
- **ECON 330** Managerial Economics 4.0
- **FIN 301** Introduction to Finance 4.0
- **MIS 200** Management Information Systems 4.0
- **ORGB 300 [WI]** Organizational Behavior 4.0
  or **BLAW 201** Business Law I

Select two of the following: 8.0
- **ACCT 116** Managerial Accounting Foundations
- **FIN 321** Investment Securities & Markets
- **MKTG 201** Introduction to Marketing Management
- **OPM 200** Operations Management

#### Free electives 28.0

**Total Credits 56.0**

---

### Sample Plan of Study (BS)

#### Term 1
- **ECON 201** Principles of Microeconomics 4.0
- **ENGL 101** Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- **MATH 121** Calculus I 4.0
  or **MATH 101** Introduction to Analysis I 4.0
- **PSY 101** General Psychology I 3.0
- **UNIV B101 [WI]** The Drexel Experience 1.0

**Term Credits 15.0**

#### Term 2
- **CS 143** Computer Programming Fundamentals 3.0
- **ECON 202** Principles of Macroeconomics 4.0
- **ENGL 102** Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- **MATH 122** Calculus II 4.0
  or **MATH 102** Introduction to Analysis II 4.0
- **SOC 101** Introduction to Sociology 3.0

**Term Credits 17.0**

#### Term 3
- **ANTH 101** Introduction to Cultural Diversity 3.0
- **CIVC 101** Introduction to Civic Engagement 1.0
- **ENGL 103** Composition and Rhetoric III: Themes and Genres 3.0
- Laboratory science course 3.0
- Philosophy elective 3.0
- Economics elective 4.0

**Term Credits 17.0**

#### Term 4
- **COM 270 [WI]** Business Communication 3.0
- **ECON 301** Microeconomics 4.0
- **STAT 201** Introduction to Business Statistics 4.0
- History elective 4.0
- Laboratory Science course 3.0

**Term Credits 18.0**

#### Term 5
- **ECON 250** Game Theory and Applications 4.0
- **ECON 321** Macroeconomics 4.0
- **STAT 202** Business Statistics II 4.0
- Laboratory Science course 3.0

**Term Credits 15.0**

---

#### Term 6
- **ECON 350 [WI]** Applied Econometrics 4.0
- **INTB 334** International Trade 4.0
- **ENGL 200 through ENGL 399** Coordinate Field course (concentration/minor) or a Free elective 3.0
- Philosophy elective 3.0

**Term Credits 17.0**

#### Term 7
- **ECON 360** Time Series Econometrics 4.0
- **INTB 336** International Money and Finance 4.0
- Coordinate Field course (concentration/minor) or a Free elective 3.0
- Fine Arts elective 3.0

**Term Credits 15.0**

#### Term 8
- Economics electives* 8.0
- ENGL 200 through ENGL 399 course 3.0
- Coordinate field course (concentration/minor) or a Free elective 3.0
- Fine Arts elective 3.0

**Term Credits 15.0**

#### Term 9
- Economics elective* 4.0
- Coordinate Field courses (concentration/minor) or Free electives 6.0
- Free electives 5.0

**Term Credits 15.0**

#### Term 10
- **ECON 302 [WI]** Economics Seminar 4.0
- **UNIV B101 [WI]** The Drexel Experience 1.0
- Coordinate Field course (concentration/minor) or a Free elective 3.0
- Economics elective* 4.0
- Free elective 3.0

**Term Credits 15.0**

#### Term 11
- Coordinate Field courses (concentration/minor) or Free electives 6.0
- Economics elective* 4.0
- Free elective 4.0

**Term Credits 14.0**

#### Term 12
- Free electives 12.0

**Term Credits 12.0**

**Total Credit: 187.0**

* See degree requirements for a list of courses that satisfy the Economics elective requirements.

Co-op/Career Opportunities
The study of economics prepares students for a variety of fields: research economists in banks, government and universities; law; economic development for local government, banks and firms; business management and consulting; government and international agencies, such as the CIA, World Bank, IMF and USAID; and business and economic journalism.

Career Paths and Degree Combinations
Economics provides an excellent foundation for many career options and can also be combined with many other majors and minors in preparing students for great careers. For example:

Banking and Finance
- Economics and Finance
- Economics and Business
- Economics and Mathematics
- Business Economics Concentration
- Economics and Physics

Academia
- Economics and Anthropology
- Economics and Psychology
- Economics and Mathematics
- Economics and Philosophy

Economics Research in Industry
- Economics and Mathematics
- Mathematical Economics Concentration
- Economics and Marketing
- Economics and Finance

High Tech and IT Industries
- Economics and Information Systems
- Economics and Chemistry
- Economics and Biology

Economics Research in Governments and International Organizations
- Economics and Environmental Studies
- Economics and Political Science

Law School and Other Graduate School Options
- Economics and Legal Studies
- Economics and Philosophy
- Economics and Political Science
- Economics and International Studies

Opportunities
Recently, economics students have obtained positions at the following institutions:
- Federal Reserve Bank, Board of Governors
- Citibank
- Vanguard Corporation
- Deloitte Consulting
- Black Rock Inc.
- Tyco Electronics

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Economics
The minor in economics provides a solid background in the application of economic theory to markets. Students complete standard courses in micro- and macroeconomics that emphasize core training in economic decision making. Students also choose a course that applies this training to areas such as international economics, firm and industry behavior, quantitative economic analysis, and public policy. This type of analytical training provides a strong complement to many majors, including business fields, but would be especially useful for students interested in careers in public policy or law.

Requirements
- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Minor in International Economics

This minor is designed for students with varied backgrounds who have a particular interest in learning more about the international economic environment. The curriculum provides the student a basic understanding of economics and exposes them to advanced topics dealing with international trade, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Required Courses

ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
INTB 200 International Business 4.0
INTB 334 International Trade 4.0
or INTB 336 International Money and Finance
Select two of the following (at least one from the following list): 8.0
INTB 332 Multinational Corporations
INTB 334 International Trade
INTB 336 International Money and Finance
INTB 338 Regional Studies in Economic Policies and International Business
ECON 342 Economic Development

Other Options

ECON 301 Microeconomics
ECON 321 Macroeconomics
ECON 322 Economics Seminar [WI]
ECON 336 Labor Economics

ECON 338 Industrial Organization
ECON 348 Mathematical Economics
ECON 350 Applied Econometrics [WI]
ECON 351 Resource and Environmental Economics
BLAW 340 International Business Law

MKTG 357 Global Marketing

Total Credits 24.0

Degree Requirements BS ECON Dual Degree

General Education Requirements

ANTH 101 Introduction to Cultural Diversity 3.0
CIVC 101 Introduction to Civic Engagement 1.0
COM 270 [WI] Business Communication (WI) 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0

Select one of the following sequences:

MATH 101 Introduction to Analysis I
& MATH 102 and Introduction to Analysis II
MATH 121 Calculus I
& MATH 122 Calculus II (recommended)

PSY 101 General Psychology I 3.0
SOC 101 Introduction to Sociology 3.0
UNIV B101 [WI] The Drexel Experience 1.0
UNIV B201 Career Management 1.0
Fine Arts Elective 3.0
Three Laboratory Science Electives 9.0-12.0
Two English Literature Electives: (ENGL 200 through ENGL 399) 6.0
History Elective 4.0
Two Philosophy Electives 6.0
Select one of the following: 3.0
CS 161 Introduction to Computing
CS 171 Computer Programming I

Professional Requirements

ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
ECON 250 Game Theory and Applications 4.0
ECON 301 Microeconomics 4.0
ECON 302 Macroeconomics 4.0
ECON 322 [WI] Economics Seminar 4.0
ECON 330 Managerial Economics 4.0
ECON 348 Mathematical Economics 4.0
ECON 350 [WI] Applied Econometrics (WI) 4.0
ECON 360 Time Series Econometrics 4.0
INTB 334 International Trade 4.0
INTB 336 International Money and Finance 4.0
Select one of the following sequences: 8.0
MATH 311 Probability and Statistics I
& MATH 312 Probability and Statistics II
STAT 201 Introduction to Business Statistics
& STAT 202 and Business Statistics II
Professional Electives
Select six of the following: 20.0

- Any other ECON courses numbered above 240
- Any other INTB courses

ENVS 370 Practice of Environmental Economics
FIN 301 Introduction to Finance
FIN 325 Financial Institutions and Markets
SOC 240 Urban Sociology
SOC 260 Classical Social Theory

Additional Requirements:

- BS in Economics
  Coordinate Field 24.0
  Additional courses as required to satisfy a coordinating field (a second major, minor, or one of the two available concentrations below).

- Free Electives 29.0

Total Credits 184.0-187.0

* Only required for students pursuing the BS in Economics/Business Economics Concentration
** Only required for students pursuing the BS in Economics/Mathematical Economics Concentration
*** Required for the BS in Economics/Business Economics Concentration

Bachelor of Science / Juris Doctor
This program is a modified BS in Economics that allows students the ability to consider a BS/JD degree.

Conditional on successful admittance into Drexel’s Kline School of Law (http://drexel.edu/law).

Due to the complex nature of this program students should work closely with their advisor when selecting courses.

School of Economics Faculty

Marco Airaudo, PhD (University of Pennsylvania Philadelphia). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (Drexel University). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (University of Minnesota). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (University of Michigan). Assistant Professor. Public finance, international economics.

Mian Dai, PhD (Northwestern University). Assistant Professor. Managerial economics and strategy.

Pia DiGirolamo, PhD (Purdue University). Assistant Clinical Professor. Macroeconomics, international finance.

Matthew Freedman, PhD (University of Maryland). Associate Professor. Labor economics, public economics.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa D. Harrison, PhD (University of Texas Austin) Associate Dean, Academic Affairs. Associate Professor. School of Economics. Econometrics, public finance, industry organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (Penn State University) Associate Dean, College of Business. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (Temple University). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (University of Virginia). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.
Business Economics

Major: Business Economics

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 184.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 45.0601

Standard Occupational Classification (SOC) code: 11-9199; 19-3011

The Business Economics program is a “co-major.”

About the Program

Economics is the study of allocating scarce resources among competing needs. The program places particular emphasis on the application of theory toward the solution of particular problems in such areas as international trade, money and finance, consumer activities, economic development, and other areas.

Drexel’s Business Economics co-major is designed for students who wish to receive a sound education within a specific functional area of business (Primary major) while supplementing that knowledge with an overview of economics.

Prepares students to apply the rigorous methods of modern quantitative economics in a business context. This program combines coursework in economics and the functional fields of business administration within the context of a general scientific and humanities curriculum.

More information can be found on the School of Economics webpage (http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics).

**Term 12**
ECON 322 [WI] Economics Seminar 4.0
Primary Major course* 4.0
Select one of the following: 4.0

- MGMT 260 Introduction to Entrepreneurship
- MGMT 370 Business Consulting for Nonprofits
- MGMT 371 Business Consulting for Nonprofits
- MGMT 451 Management Simulation
- STAT 202 Business Statistics II

General education electives 6.0

Total Credits 18.0

* Students completing the Business Economics Co-major must do so in conjunction with a primary business major. Students must select a primary major from the following list: Accounting, Entrepreneurship, Finance, Legal Studies, Management Information Systems, Marketing, or Operations & Supply Chain Management.

**School of Economics Faculty**

Marco Airaudo, PhD (University of Pennsylvania Philadelphia). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (Drexel University). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (University of Minnesota). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (University of Michigan). Assistant Professor. Public finance, international economics.

Mian Dai, PhD (Northwestern University). Assistant Professor. Managerial economics and strategy.

Pia DiGirolamo, PhD (Purdue University). Assistant Clinical Professor. Macroeconomics, international finance.

Matthew Freedman, PhD (University of Maryland). Associate Professor. Labor economics, public economics.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa D. Harrison, PhD (University of Texas Austin) Associate Dean, Academic Affairs. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (Penn State University) Associate Dean, College of Business. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (Temple University). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (University of Virginia). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (Duke University). Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Philip Luck, PhD (University of California, Davis). Assistant Professor. International economics, international trade.

Vibhas Madan, PhD (Michigan State University). Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (Louisiana State University). Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD (Michigan State University). Assistant Professor. Applied econometrics.

Maria Olivo, PhD (Duke University). Associate Professor. Macroeconomics, international finance.

Eydis Olsen, MA (American University). Clinical Associate Professor. Macroeconomics, political economy.

Tristan Potter, PhD (Boston College). Assistant Professor. Macroeconomics, labor.

Konstantinos Serfes, PhD (University of Illinois at Champaign-Urbana). Professor. Industrial organization; microeconomics.

Ricardo Serrano-Padial, PhD (University of California at San Diego). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (University of California at Berkeley) Assistant Director School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Matthew Weinberg, PhD (Princeton University). Associate Professor. Antitrust and regulation, applied econometrics, industrial organization.
Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD (University of Wisconsin). Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD (University of Pennsylvania). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (Boston College). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiu-shuang Yan, PhD (Purdue University). Professor Emeritus. International economics, input-output analysis.

International Business

Major: International Business

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The international business major explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

International business focuses on business activities that cross national borders. The plan of study explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

This major allows students to choose from a menu of courses. The curriculum is interdisciplinary, with courses drawn from across business disciplines and anthropology. Specialized operational courses are offered, along with more general theoretical and comparative ones.

For more information about this program, contact the School of Economics (http://www.lebow.drexel.edu/academics/disciplines/economics).

Degree Requirements

Students completing the major in international business are required to complete six courses in the same language (a language other than the student's native language) at Drexel University. It is recommended that students also take a 351 language course, focusing on the language of business. This requires a minimum of 5 language courses (24.0 credits) at the college level or up to level 6 (e.g., ITAL 203) placement, including proficiency in at least one language. Some of these courses may count toward the student's general education electives.

Students may satisfy the language requirement through foreign language course replacement by studying overseas. All study abroad programs must be approved by the Study Abroad Office (http://www.drexel.edu/studyabroad).

Total Credit: 180.0

* See degree requirements.
Co-op/Career Opportunities

International business graduates are employed in a variety of corporate settings, including the pharmaceutical, banking and telecommunication industries. Some students pursue graduate studies or find employment in multilateral governmental organizations.

The concentration has been designed to provide a competitive advantage for those students interested in international business careers. In addition to business coursework, students also take advantage of Drexel’s programs in history-politics, sociology, anthropology, and other areas that focus on international topics.

The University offers a foreign language class in Arabic and minors in Chinese, French, German, Italian, Japanese, Russian, and Spanish. Each minor can include study of the vocabulary needed for business transactions within the particular language.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

International Business Faculty

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Rolph E. Anderson, PhD (University of Florida) Royal H. Gibson Sr. Professor of Marketing. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

International Business Co-Major

Major: International Business
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 184.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
### About the Program

The International Business Co-Major explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

The International Business Co-Major allows students to choose from a menu of courses. The curriculum is interdisciplinary, with courses drawn from across business disciplines and anthropology. Specialized operational courses are offered, along with more general theoretical and comparative ones. The co-major option substitutes further training in a relevant business discipline or functional field in the form of a Primary Major instead of the language courses.
