David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.
Yanliu Huang, PhD (The Wharton School, University of Pennsylvania). Assistant Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Daniel Korschun, PhD (Boston University). Assistant Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Hyokjin Kwak, PhD (University of Georgia) Department of Marketing. Associate Professor. Advertising effects, consumer behaviors and e-commerce.

Dali Ma, PhD (University of Chicago). Assistant Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Vibhas Madan, PhD (Michigan State University). Professor. International trade theory, applied microeconomics.

Maria Olivero, PhD (Duke University). Associate Professor. Macroeconomics, international finance.

Stanley Ridgley, PhD (Duke University). Assistant Clinical Professor. Business communication; Cognition and strategy; Competitive intelligence; Determinants of Firm Performance; Global Management; New Markets in Emerging Countries; Russian Business Culture.

Bert Rosenbloom, PhD (Temple University) Rauth Chair of Electronic Commerce. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University's Provost Fellow India Partnerships

Srinivasan Swaminathan, PhD (University of Texas-Austin). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

**Minor in International Economics**

This minor is designed for students with varied backgrounds who have a particular interest in learning more about the international economic environment. The curriculum provides the students a basic understanding of economics and exposes them to advanced topics dealing with international trade, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

### Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

The Pennoni Honors College

About the College

The mission of Drexel University’s Pennoni Honors College is to enrich the University experience for talented and ambitious students from all majors. The College has five units: the Honors Program, the Center for Interdisciplinary Inquiry (which includes the Great Works Symposium and the Custom-Designed Major), the Office of Undergraduate Research (which includes the STAR and SuperNova Programs), the Drexel Fellows Office, and the Center for Cultural Outreach (which includes TheSmartSet.com and The Drexel InterView). Students have the opportunity to apply to the Pennoni Honors Program as late as the spring term of their second year. The other programs in the College are open to all students at the University with the appropriate interests and record of achievement. The College also administers the High School Scholars Program for exceptional high-school students.

The Pennoni Honors College was endowed by Annette and C.R. “Chuck” Pennoni, CEO of Pennoni Associates. Mr. Pennoni, a Drexel graduate, was a two-time interim president of the University. He embodies the qualities of leadership, integrity, intellectual curiosity, and commitment to Drexel and the larger world that the College seeks to imbue in its students.

Major

• Custom-Designed Major (p. 376) (within the Center for Interdisciplinary Inquiry)

Custom-Designed Major

Major: Custom-Designed Major

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 24.0101
Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Custom-Designed Major enables students to pursue an individualized course of study at Drexel University not readily available through an existing major, or a combination of existing majors and/or minors. The program is designed for highly motivated students whose interdisciplinary curiosity and career ambitions cannot be satisfied by a traditional major.

The major offers students an opportunity for an early intensive research experience, incorporates cooperative education as part of its degree requirements, and culminates in an original, interdisciplinary senior-year project.

Each student accepted into the program will be advised by the Program Director and closely mentored by one or more Drexel faculty members expert in at least one of the disciplines comprising the student’s proposed course of study. Students may be admitted as entering freshmen or by transfer. For additional information about applying to this program, contact the Program Director or the The Pennoni Honors College (http://drexel.edu/pennoni).

Admission Requirements

Admission to the custom-designed major will be determined on the basis of an application portfolio. In addition to the standard Admissions application, the portfolio will contain:

• a vision statement describing in detail what the student hopes to accomplish during his or her time in the program, as well as explaining why the student's educational goals cannot be met by pursuing a regular Drexel major, a double major, or a major combined with minors. The vision statement should also contain a plausible plan of study for achieving the student's aims by drawing upon two or more existing Drexel programs.

• student transcript

• SAT scores

• two letters of support from individuals who can speak to the student's desire and ability to embark on an unconventional, individualized course of study.

• examples of projects completed independently by the student, in either a school or an extracurricular setting.

Social sciences courses: 9.0

Mathematics courses: 6.0

Science courses: 8.0

Written Evaluation

At the conclusion of the spring term of the freshman year (or after 3 terms of study for transfers) the student will receive a written evaluation and personal consultation regarding his or her progress. At this point each student will either be allowed to continue in the Custom-Designed Major or will be advised to transfer to another major at Drexel University.

<td>9.0</td>
</tr>
</tbody>
</table>

Guided Course Selection

Students will complete the courses in their agreed-upon customized programs of study under the guidance of the Program Director and other faculty as appropriate. Each student will receive sustained guidance on course selection and sequencing. In addition, at the completion of each academic year, each student will meet with the Program Director to refine and update their vision statement as needed.

Total Credits: 115.0

* Taken for one credit each in the sophomore and junior years.

** All prerequisite courses for these selected courses must also be satisfied.

Co-op and Career Services

Students in the program have the option of two co-op cycles: one is a 5-year program with 3 co-op cycles (SCOP), and the second option is 4-year program with one co-op cycle (4COP). Students will meet with their career
services adviser during their time in the program to closely match career objectives with curriculum design and co-op/research opportunities.
The School of Biomedical Engineering, Science and Health Systems

Mission Statement
The mission of the School of Biomedical Engineering, Science and Health Systems is to promote health and quality of life through education, research and innovation that integrates engineering and life sciences in a global context.

The School of Biomedical Engineering, Science, and Health Systems (http://drexel.edu/biomed) is a nationally recognized center for research in biomedical engineering and science offering multi-disciplinary instruction on a full- and part-time basis at the graduate and undergraduate levels.

The School of Biomedical Engineering, Science, and Health Systems offers a bachelor of science program in biomedical engineering with a choice of five concentration areas: biomaterials and tissue engineering, biomechanics and human performance engineering, biomedical informatics, biomedical devices and imaging, and neuroengineering.

Major
• Biomedical Engineering (BS) (p. 379)

Concentrations
• Biomaterials and Tissue Engineering (p. 382)
• Biomechanics and Human Performance Engineering (p. 385)
• Biomedical Informatics (p. 389)
• Biomedical Devices and Imaging (p. 392)
• Neuroengineering (p. 396)

About the School
The School of Biomedical Engineering, Science, and Health Systems (http://drexel.edu/biomed) (formerly the Biomedical Engineering and Science Institute, founded in 1961) is a leader in biomedical engineering and biomedical science research and education. The undergraduate program was inaugurated in September 1998 and has steadily grown to attract the highest ability students at the University. The undergraduate biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The School's academic thrust areas, both in research and education, are at the forefront of biosensing, bioimaging, bioinformation engineering and integrated bioinformatics, drug delivery, biomedical ultrasound & optics, bionanotechnology, cellular tissue engineering, neuroengineering and human performance. Emerging initiatives include skin bioengineering, pediatric engineering and homeland security technologies. Various departments at Drexel University offer courses that are suited for students in biomedical engineering and biomedical science. The School's curriculum complements the strengths of the Colleges of Arts & Sciences, Business, Engineering, Computing & Informatics, Law and Medicine. As a whole, the curriculum offers the advanced knowledge needed for industrial careers, health professions, graduate research or careers in highly specialized fields such as pre-professional health (medical, dental, and veterinary) and pre-law.

The marriage of technology with biology and medicine drives the 21st Century industrial enterprise. Consistent with this mission, the School strives for clinical and industrial relevance in our academic pursuits. The School maintains a strong entrepreneurship program in biomedical technologies. The School's alliance with regional economic development agencies and corporations together with advisors from business development, legal, and investment communities sustains the growth of this program. The students and faculty of the School are committed to move their discoveries from laboratories to clinical practice or home use. The success of the Translational Research in Biomedical Technologies program has been recognized and funded regionally as well as nationally.

The School has experienced remarkable growth in recent years thanks to our outstanding research portfolio, high quality and innovative undergraduate program, and our multidisciplinary approach to education and research. Another competitive advantage is the unique free-standing university-level administrative structure with its own tenure-track faculty lines, budget and space. This helps transcend the traditional organizational boundaries of engineering, sciences and medicine. The School's independence allows the pursuit of growth and collaborations in various disciplines. The School's small size provides agility to reconfigure and reorganize in response to emerging opportunities. The University Strategic Plan recognizes our School of Biomedical Engineering, Science and Health Systems as “Drexel’s prototype of academic integration.”

Metropolitan Philadelphia has one of the nation’s highest concentrations of medical institutions and pharmaceutical, biotechnology, medical device and systems industry. The School has forged strategic partnerships with select universities, research institutes, health care institutions and industries in the region. The School enjoys a close working relationship with our Drexel College of Medicine as well as alliances with prominent medical institutions in the region to develop joint research and educational programs. These include University of Pennsylvania, Thomas Jefferson University, the Fox Chase Cancer Center and the Wistar Institute. These collaborative initiatives provide students with ample opportunities in basic and clinical research as well as innovative academic programs.

Applicants to the graduate program must meet the requirements for admission to graduate studies at Drexel University. Candidates for degrees in the School of Biomedical Engineering, Science and Health Systems are required to maintain academic standards applicable to all graduate students at Drexel University.

Co-operative Education
Co-op and career opportunities available to students include employment in the medical device, equipment, and systems industry; the biomaterial and implant industry; the pharmaceutical industry; the biotechnology and agricultural industry; the telemedicine and tele-health industry; health care; medical and clinical information and management systems; and biomedical technology transfer. Preprofessional options available in the academic programs of the School prepare students for admission to schools of medicine, dentistry, and veterinary medicine. Students may also choose to continue their education at the graduate level to prepare for careers in research and development in biomedical engineering and science.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.
Special Programs

Accelerated Bachelor’s/Master’s Dual Degree Program

The Accelerated BS/MS degree program provides opportunities for strongly motivated students with high ability to progress toward their educational goals at an accelerated pace. The program makes it possible for top engineering students to obtain both degrees in the same time period that it takes most students to obtain a bachelor’s degree.

Preprofessional Programs

Students who want to prepare for admission to schools of medicine, dentistry, or veterinary medicine, including the BA/BS/MD and early assurance programs at the Drexel College of Medicine, may obtain professional counseling and assistance from the Office of Preprofessional Programs, 215-895-2437.

University Honors

Program Students in the Biomedical Engineering program may apply for admission to the University Honors Program. Admission depends on superior academic performance at Drexel and may be approved after a personal interview with the Honors Committee.

University Leadership Program

Drexel graduates in Biomedical Engineering will be the leaders of their profession—and their communities—in the twenty-first century. The University Leadership Program helps cultivate leadership skills and engages students in exploring the complex aspects of successful leadership by offering multi-dimensional courses featuring service learning.

Biomedical Engineering

Major: Biomedical Engineering
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 196.5 - 203.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0501
Standard Occupational Classification (SOC) code: 17-2302

About the Program

Biomedical Engineering is an innovative Bachelor of Science degree program developed and delivered in collaboration with the College of Engineering, the College of Arts and Sciences and the College of Computing & Informatics. It prepares students to conceive, design, and develop devices and systems that improve human health and quality of life. Biomedical engineering is the convergence of life sciences with engineering. From child car seats and football helmets to drug-delivery systems, minimally invasive surgery, and noninvasive imaging technology, the work of the biomedical engineer makes a difference in everyone’s life.

The undergraduate biomedical engineering curriculum is designed to strike a balance between academic breadth in biomedical engineering and specialization in one of five concentration areas: biomaterials and tissue engineering, biomechanics and human performance engineering, biomedical bioinformatics, biomedical devices and imaging, and neuroengineering.

This program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Concentrations

The undergraduate biomedical engineering curriculum is designed to strike a balance between academic breadth in biomedical engineering and specialization in an area of concentration. Each concentration has its own degree requirements for graduation, and its own plan of study:

- Biomaterials and Tissue Engineering (p. 382)
- Biomechanics and Human Performance Engineering (p. 385)
- Biomedical Informatics (p. 389)
- Biomedical Devices and Imaging (p. 392)
- Neuroengineering (p. 396)

The degree program provides innovative experiences in hands-on experimentation and engineering design as well as opportunities for personal growth and development of leadership and communication skills.

Working with a faculty advisor, students can select their core and elective courses from the curricula offered by the School of Biomedical Engineering, Science, and Health Systems and the Departments of Biology, Chemistry, Physics, Mathematics, Chemical Engineering, Mechanical Engineering, Materials Science and Engineering, Electrical and Computer Engineering, and the College of Computing & Informatics.

Additional Information

More information about the School’s undergraduate program can be found at the School of Biomedical Engineering, Sciences and Health Systems’ Academic Program (http://drexel.edu/biomed/academics/undergraduate-programs) web page.

Students are also encouraged to contact the School’s Director for Student Services:

Caryn Glaser
Director of Student Services
School of Biomedical Engineering, Science and Health Systems
215.895.2237
glasercb@drexel.edu

Career and professional counseling is provided independently by the student’s staff and faculty advisors. Information regarding undergraduate faculty advisors is available on the School’s Undergraduate Advising (http://drexel.edu/biomed/resources/current-students/undergraduate-advising) page.

Program Educational Objectives

Graduates from the School’s undergraduate biomedical engineering program are expected to achieve success in their professional lives and contribute to the good of the global community. The School’s specific objectives for its alumni include the following:

Objective 1: Professional Presence

As a result, within a few years, the graduate has established an Internet presence, either through professional organizations, social networking and/or other activities which demonstrate an appreciation and use of modern technological capabilities.
Objective 2: Workforce Skilled in Integrating Engineering, Design, and Life Sciences

As a result, graduates will identify opportunities to contribute to society from a variety of positions, ranging from biomedical engineering, biotechnology design and development to practicing physicians, lawyers, innovators, entrepreneurs and business managers. The graduate may also pursue further education in the form of graduate and professional degrees.

Objective 3: Leadership in Research, Innovation and Design

As a result, within a few years of graduation, the graduate will have made significant or meaningful contributions in his or her chosen field, either thorough research publications and/or presentations, the development of a product or process, obtaining patents for new products and/or processes, or other evidence of contributing to the advancement of knowledge, particularly in fields integrating engineering and the life sciences.

Objective 4: Ethical Reasoning, Behavior and Professionalism

As a result, within a few years of graduation, the graduate will demonstrate adherence to the professional codes of conduct appropriate to his or her field of study and/or practice, as well as exhibit behavior consistent with accepted standards of fiduciary responsibility, risk/benefit analysis and professional accountability.

Objective 5: Communication

As a result, graduates will have outstanding communication skills as evidenced by their professional presentations, and in their productive interactions with co-workers. The graduates may also use their communication skills to foster collaborative effort among co-workers and/or may represent his or her company, institution and/or laboratory to other interested parties.

Objective 6: Personal Engagement

As a result, within a few years, the graduate will be working independently and in diverse groups to effectively and efficiently achieve personal and organizational goals, engage in community or public service, create a product or process that fills a social need, and/or participate in educating individuals about an issue of societal concern.

Student Learning Outcomes

To support our graduates in achieving success in the program educational objectives, the biomedical engineering program is designed to facilitate student learning and achievement on the following Student Learning Outcomes, which indicate our students’ skills sets at the time of graduation.

Outcome 1: Communication

The graduate employs an understanding of audience, purpose and context to communicate effectively in a range of situations using appropriate media while displaying a significant aptitude for presenting scientific and technical materials to diverse audiences.

Outcome 2: Engagement

The graduate uses his or her knowledge and skills, including those associated with engineering and life science, to make a positive difference on issues of public concern.

Outcome 3: Ethical Reasoning, Behavior, and Professionalism

The graduate recognizes ethical issues, considers multiple points of view, and uses critical ethical reasoning to determine the appropriate behavior to follow. The graduate thus demonstrates a high level of integrity and a positive work ethic combined with a thorough understanding of the ethical implications and obligations associated with the practice of biomedical engineering.

Outcome 4: Innovation and Design

The graduate often asks questions and makes observations that lead to new ideas or hypotheses. He or she formulates highly original solutions while moving beyond the conventional to new methods blending creative and practical approaches, methods and designs which may involve pioneering applications along the interface of engineering and biology. The graduate has the ability to create quality products and processes that are state-of-the-practice in his or her field.

Outcome 5: Leadership

The graduate is able to articulate a vision or goal in such a manner as to promote collaboration and successful implementation. The graduate displays a willingness to overcome adversity and work diligently in pursuit of goals, thus serving as a role model for others.

Outcome 6: Problem-Solving Abilities

The graduate is able to creatively solve problems from both analytic and synthetic perspectives using multiple approaches, integrating the life sciences, engineering, and the humanities. The graduate is able to recognize, incorporate and adapt to the limitations and consequences of applying various problem solutions.

Outcome 7: Research Abilities

The graduate is able to collect and process data, information and knowledge to answer specific questions or generate new conceptual models and hypotheses. The graduate evaluates these models and hypotheses using the appropriate experimental, mathematical and statistical approaches.

Outcome 8: Human Resources and Interactions

The graduate is able to work either independently or in diverse groups to effectively and efficiently respond to academic and work requirements.

Outcome 9: Technological Skills

The graduate makes appropriate use of technologies to communicate, collaborate, solve problems, make decisions, and conduct research, as well as foster creativity and life-long learning. The graduate is able to use state-of-the-art technological resources and tools and keeps up on advancements in her or her field of study and/or practice.

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (University of Pennsylvania) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (Drexel University) School of Biomedical Engineering, Science and Health Systems. Research Associate Professor. Optical
brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (Wayne State University). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (University of Pennsylvania). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (Northwestern University). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (Drexel University). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Uri Hershberg, PhD (Hebrew University of Jerusalem, Israel). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (Drexel University) Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Meltem Izzetoglu, PhD (Drexel University). Associate Research Professor. Cognitive neuroengineering, biomedical signal processing, statistical signal analysis, optimal artifact removal, information processing, optical brain imaging, functional near infrared spectroscopy, working memory, attention, learning, reading and mathematical disabilities, cognitive aging, anesthesia awareness, and social anxiety disorders.

Dov Jaron, PhD (University of Pennsylvania) Calhoun Distinguished Professor of Engineering in Medicine. Professor. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Andres Kriete, PhD (University in Bremen Germany) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (Cornell University). Associate Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (University of Warsaw Engineering College). Professor. Biomedical applications of viscoelastic, acoustoptic and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (University of Denmark, Copenhagen-Lyngby) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (Chinese Academy of Sciences). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (University of California at San Diego) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Karen Moxon, PhD (University of Colorado) Associate Director for Research. Professor. Cortico-thalamic interactions; neurobiological perspectives on design of humanoid robots.

Michael Neidrauer, PhD (Drexel University). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (University of Pennsylvania) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Ahmet Sacan, PhD (Middle East Technical University). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (Drexel University). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Rahamim Seliktar, PhD (University of Strathclyde, Glasgow) Vice Director, School of Biomedical Engineering, Science & Health Systems. Professor. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Patricia A. Shewokis, PhD (University of Georgia). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(NIR) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (Rice University). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric...
finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (Drexel University). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (University of Virginia). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (<em>ex vivo</em> gene therapy) for spinal cord repair.

Ming Xiao, PhD (Baylor University). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (Georgia Institute of Technology). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (St. Petersburg State University, Russia). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (University of Pennsylvania). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty
Hun H. Sun, PhD (Cornell University). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Biomaterials and Tissue Engineering Concentration

Major: Biomedical Engineering: Biomaterials and Tissue Engineering Concentration
Degree Awarded: Bachelor of Science
Calendar Type: Quarter
Total Credit Hours: 198.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0501

Standard Occupational Classification (SOC) code: 17-2031

About the Program
The biomaterials and tissue engineering concentration focuses on the fundamental knowledge of natural and synthetic biomaterials and cellular biology and educates students in the emerging field of cellular and tissue engineering.

The concentration in biomaterials and tissue engineering includes courses from the Departments of Biology, Chemistry, and Mechanical Engineering & Mechanics. The program builds on the fundamental knowledge of natural and synthetic biomaterials and cellular biology and educates students in the emerging field of cellular and tissue engineering.

Biomaterials research has recently expanded to include fibrous materials and various prosthetic devices requiring the use of both synthetic and natural fibers. The emphasis is on improved materials and design of biological replacement tissues through cellular tissue engineering. Upon graduation, students will be able to:

- select and evaluate biomaterials for use in biomedical applications in vivo;
- develop in vitro models for drug delivery, drug toxicity and drug discovery choosing the appropriate biomaterials;
- create high-fidelity tissue models in vitro;
- develop and evaluate tissue engineering approaches to initiate and promote regenerative processes in vivo.

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (http://drexel.edu/biomed/research/facilities) web page for more details about the laboratories and equipment available.

For more information about this concentration, see Drexel's School of Biomedical Engineering, Science, and Health Systems (http://drexel.edu/biomed) web site.

Opportunities

Metropolitan Philadephia has one of the highest concentrations of medical institutions and pharmaceutical and biotechnology industries in the nation. The bachelor of science degree in biomedical engineering gives students access to a broad spectrum of career opportunities in medical device and equipment industry; prosthetics and assist devices industry; biomaterials and implants industry; and the telemedicine, pharmaceutical, biotechnology, and agricultural sectors.

Biomedical engineering graduates are also ideally prepared for professional education in medicine, dentistry, veterinary medicine, and law. Those who choose to pursue graduate education can aim for careers in research and development, biomedical technology innovation and transfer, as well as health care technology management.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (University of Pennsylvania) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (Drexel University) School of Biomedical Engineering, Science and Health Systems. Research Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (Wayne State University). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (University of Pennsylvania). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (Northwestern University). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport.

Jamie Dougherty, PhD (Drexel University). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Uri Herschberg, PhD (Hebrew University of Jerusalem, Israel). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (Drexel University) Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging.

Meltem Izzetoglu, PhD (Drexel University). Associate Research Professor. Cognitive neuroengineering, biomedical signal processing, statistical signal analysis, optimal artifact removal, information processing, optical brain imaging, functional near infrared spectroscopy, working memory, attention, learning, reading and mathematical disabilities, cognitive aging, anesthesia awareness, and social anxiety disorders.

Dov Jaron, PhD (University of Pennsylvania) Calhoun Distinguished Professor of Engineering in Medicine. Professor. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Andres Kriete, PhD (University in Bremen Germany) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (Cornell University). Associate Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (University of Warsaw Engineering College). Professor. Biomedical applications of viscoelastic, acoustoptic and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (University of Denmark, Copenhagen-Lynby) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.
Hualou Liang, PhD (Chinese Academy of Sciences). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomechanical signal processing.

Donald L. McEachron, PhD (University of California at San Diego) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Karen Moxon, PhD (University of Colorado) Associate Director for Research. Professor. Cortico-thalamic interactions; neurobiological perspectives on design of humanoid robots.

Michael Neidrauer, PhD (Drexel University). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (University of Pennsylvania) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (Rensselaer Polytechnic Institute). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Ahmet Sacan, PhD (Middle East Technical University). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (Drexel University). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Rahamim Seliktar, PhD (University of Strathclyde, Glasgow) Vice Director, School of Biomedical Engineering, Science & Health Systems. Professor. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Patricia A. Shewokis, PhD (University of Georgia). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy (fNIR) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (Rice University). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (Drexel University). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (University of Virginia). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices.

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (<em>ex vivo</em> gene therapy) for spinal cord repair.

Ming Xiao, PhD (Baylor University). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (Georgia Institute of Technology). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (St. Petersburg State University, Russia). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis.

Catherin von Reyn, PhD (University of Pennsylvania). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Hun H. Sun, PhD (Cornell University). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Biomechanics and Human Performance Engineering Concentration

Major: Biomedical Engineering: Biomechanics and Human Performance Engineering Concentration
Degree Awarded: Bachelor of Science
Calendar Type: Quarter
Total Credit Hours: 199.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0501
Standard Occupational Classification (SOC) code: 17-2031
About the Program

The concentration in biomechanics and human performance engineering provides students with the background and skills needed to create work and living environments which improve human health and enhance performance.

The biomechanics concentration applies engineering principles to study the interactions between humans and various machine systems in both working and living environments. Courses in this area of specialization cover such topics as the mechanics of materials, chronobiology, biomechanics, and human factors and cognitive engineering.

Upon graduation, students will be able to:

• model the effects of external forces on the human body and its tissues;
• design implanted prosthetic devices through an understanding of the interaction between biological tissues and engineering material;
• understand neural control of posture and locomotion;
• apply system approaches to the interaction of humans with their environment in order to optimize performance;
• design devices to aid people with disabilities by capitalizing on their engineering skills and human performance criteria.

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (http://drexel.edu/biomed/research/facilities) web page for more details about the laboratories and equipment available.

For more information about this concentration, see the Drexel School of Biomedical Engineering, Science, and Health System (http://drexel.edu/biomed)’s (http://www.biomed.drexel.edu/new04) web site.

**Opportunities**

Metropolitan Philadelphia has one of the highest concentrations of medical institutions and pharmaceutical and biotechnology industries in the nation. The bachelor of science degree in biomedical engineering gives students access to a broad spectrum of career opportunities in medical device and equipment industry; prosthetics and assist devices industry; biomaterials and implants industry; and the telemedicine, pharmaceutical, biotechnology, and agricultural sectors.

Biomedical engineering graduates are also ideally prepared for professional education in medicine, dentistry, veterinary medicine, and law. Those who choose to pursue graduate education can aim for careers in research and development, biomedical technology innovation and transfer, as well as health care technology management.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Biomedical Engineering, Science and Health Systems Faculty**

Fred D. Allen, PhD (University of Pennsylvania) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering,
cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (Drexel University) School of Biomedical Engineering, Science and Health Systems. Research Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (Wayne State University). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (University of Pennsylvania). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (Northwestern University). Research Professor. Biotechnology, physiology, systems biology, blood flow, microrcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (Drexel University). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Uri Hershberg, PhD (Hebrew University of Jerusalem, Israel). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (Drexel University) Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Meitem Izzetoglu, PhD (Drexel University). Associate Research Professor. Cognitive neuroengineering, biomedical signal processing, statistical signal analysis, optimal artifact removal, information processing, optical brain imaging, functional near infrared spectroscopy, working memory, attention, learning, reading and mathematical disabilities, cognitive aging, anesthesia awareness, and social anxiety disorders.

Dov Jaron, PhD (University of Pennsylvania) Calhoun Distinguished Professor of Engineering in Medicine. Professor. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Andres Kriete, PhD (University in Bremen Germany) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (Cornell University). Associate Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (University of Warsaw Engineering College). Professor. Biomedical applications of viscoelastic, acoustoptic and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (University of Denmark, Copenhagen-Lyngby) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (Chinese Academy of Sciences). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (University of California at San Diego) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Karen Moxon, PhD (University of Colorado) Associate Director for Research. Professor. Cortico-thalamic interactions; neurobiological perspectives on design of humanoid robots.

Michael Neidrauer, PhD (Drexel University). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (University of Pennsylvania) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (Rensselaer Polytechnic University). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Ahmet Sacan, PhD (Middle East Technical University). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (Drexel University). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Rahamim Seliktar, PhD (University of Strathclyde, Glasgow) Vice Director, School of Biomedical Engineering, Science & Health Systems. Professor. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Patricia A. Shewokis, PhD (University of Georgia). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(NIRS) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (Rice University). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine
signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biomaterial interactions, drug delivery systems, and chronic wound healing. Cell-biomaterial interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (Drexel University). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (University of Virginia). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (<em>ex vivo</em> gene therapy) for spinal cord repair.

Ming Xiao, PhD (Baylor University). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (Georgia Institute of Technology). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (St. Petersburg State University, Russia). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (University of Pennsylvania). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Hun H. Sun, PhD (Cornell University). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

Biomedical Informatics Concentration

Major: Biomedical Engineering

Biomechanics

Informatics Concentration

Upon graduation, students will be able to:

• select, access and integrate bioinformatics related databases for applications in genomics and proteomics;
• apply biostatistical techniques to analyze high-throughput data for genotyping, gene expression and proteomics data;
• develop and evaluate computational models to describe and simulate gene regulatory, protein and metabolic networks.

About the Program

The biomedical informatics concentration focuses on the management, analysis and visualization of data that is generated in molecular and cellular biology, genomics and other areas of biology and biomedicine. Students are trained in the development of useful computational models of living systems and novel informatics technologies in life sciences.

Bioinformatics is an emerging field of science that is concerned with the management, analysis and visualization of the flood of data being generated in molecular and cellular biology, genomics and other areas of biology and biomedicine. The field of bioinformatics enables information at the gene, protein, cell, tissue, organ, and system level to be integrated and interpreted for early detection, accurate diagnosis, and effective treatment of complex diseases such as cancer.

The biomedical informatics concentration includes courses in biology, computer science, and information technology. The concentration introduces information handling systems for people in the allied health professions, with specific examples drawn from health care and covers locating, manipulating, and displaying information in the health system setting. Students are also introduced to the mathematical and computational analysis of biological systems. The systems analyzed include the genome, protein and gene networks, cell division cycles, and cellular level disease. Mathematical tools include matrix algebra, differential equations, cellular automata, and cluster analysis.

Upon graduation, students will be able to:

Calendar Type: Quarter
Total Credit Hours: 197.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 14.0501
Standard Occupational Classification (SOC) code: 17-2031

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (http://drexel.edu/biomed/research/facilities) page for more details about the laboratories and equipment available.

For more information about this concentration, see Drexel's School of Biomedical Engineering, Science, and Health Systems (http://www.biomed.drexel.edu) website.

Sample Plan of Study

Term 1
- BMES 124
- CHEM 101
- ENGL 103
- ENGR 102
- ENGR 101
- ENGR 121
- MATH 121
- PHYS 101

Term Credits: 19.5

Term 2
- BMES 126
- CHEM 102
- ENGL 103
- ENGR 202
- ENGR 220
- ENGR 231
- MATH 200
- PHYS 102

Term Credits: 19.5

Term 3
- BIO 122
- BMES 130
- ENGR 103
- ENGR 210
- ENGR 220
- PHYS 200
- PHYS 102

Term Credits: 19.5

Term 4
- BIO 201
- BMES 201
- ENGR 202
- ENGR 231
- ENGR 232
- MEM 202

Term Credits: 18.0

Term 5
- BIO 203
- BMES 202
- BMES 212
- ENGR 210
- ENGR 232
- MEM 202

Term Credits: 19.0

Term 6
- BIO 218
- BMES 325
- BMES 372
- CS 171
- ECE 201

Term Credits: 19.0

Term 7
- BMES 303
- BMES 310
- BMES 326

Term Credits: 19.0

Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (University of Pennsylvania) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (Drexel University) School of Biomedical Engineering, Science and Health Systems. Research Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (Wayne State University). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (University of Pennsylvania). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (Northwestern University). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport

Jamie Dougherty, PhD (Drexel University). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulussensitivity, and geometry.

Uri Hershberg, PhD (Hebrew University of Jerusalem, Israel). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (Drexel University) Associate Research Professor. Cognitive neuroengineering, functional brain imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging

Meltem Izzetoglu, PhD (Drexel University). Associate Research Professor. Cognitive neuroengineering, biomedical signal processing, statistical signal analysis, optimal artifact removal, information processing, optical brain imaging, functional near infrared spectroscopy, working memory, attention, learning, reading and mathematical disabilities, cognitive aging, anesthesia awareness, and social anxiety disorders.

Dov Jaron, PhD (University of Pennsylvania) Calhoun Distinguished Professor of Engineering in Medicine. Professor. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Andres Kriete, PhD (University in Bremen Germany) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (Cornell University). Associate Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of
polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (University of Warsaw Engineering College). Professor. Biomedical applications of viscoelastic, acoustooptical and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (University of Denmark, Copenhagen-Lyngby) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasounds, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (Chinese Academy of Sciences). Professor. Neuroengineering, neuroinformatics, cognitive and computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (University of California at San Diego) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autodiagnostic, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Karen Moxon, PhD (University of Colorado) Associate Director for Research. Professor. Cortico-thalamic interactions; neurobiological perspectives on design of humanoids robots.

Michael Neidrauer, PhD (Drexel University). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices

Banu Onaral, PhD (University of Pennsylvania) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (Rensselaer Polytechnic University). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Ahmet Sacan, PhD (Middle East Technical University). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (Drexel University). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Rahamim Seliktar, PhD (University of Strathclyde, Glasgow) Vice Director, School of Biomedical Engineering, Science & Health Systems. Professor. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Patricia A. Shewokis, PhD (University of Georgia). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills, noninvasive neural imaging techniques of functional near infrared spectroscopy(fNIR) and electroencephalography (EEG) and methodology and research design.

Adrian C. Shieh, PhD (Rice University). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dots development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biometrical interactions, drug delivery systems, and chronic wound healing. Cell-biometrical interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (Drexel University). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (University of Virginia). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (<em>ex vivo</em> gene therapy) for spinal cord repair.

Ming Xiao, PhD (Baylor University). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (Georgia Institute of Technology). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (St. Petersburg State University, Russia). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (University of Pennsylvania). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

**Emeritus Faculty**

Hun H. Sun, PhD (Cornell University). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

*Major: Biomedical Engineering: Biomedical Devices and Imaging Concentration*
About the Program

Biomedical imaging focuses on the theoretical and practical issues related to machine vision, image processing and analysis, and signal processing associated with such medical applications as ultrasound, optics, magnetic resonance, and autoradiographic imaging.

The concentration in biomedical devices and imaging is for those individuals interested in careers in medical imaging, medical device development, and clinical engineering. The concentration covers the fundamentals of modern imaging methodologies, covering aspects of light imaging, ultrasound imaging, and volumetric and functional imaging systems, and the principles of magnetic resonance imaging (MRI).

Upon graduation, students will be able to:

- understand the multi-disciplinary background and limitations of current and emerging instrumentation, imaging and internet technologies used in clinical, pharmaceutical and research environments;
- select and evaluate sensors and imaging modalities for specific biomedical research, diagnostic and theragnostic applications;
- analyze the performance of different systems including microscopic and medical imaging methodologies in terms of safety, resolution and the trade-offs important for a given application;
- optimize digital acquisition, enhancement, visualization and analysis of signals from biomedical instruments in multidimensions;
- understand the impact of compliance with the standards and guidelines of regulatory agencies such as FDA on the design and application of devices in clinical practice and knowledge of basic quality assurance tools.

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (http://drexel.edu/biomed/research/facilities) page for more details about the laboratories and equipment available.

For more information about this concentration, see Drexel's School of Biomedical Engineering, Science, and Health Systems (http://www.biomed.drexel.edu) website.

Sample Plan of Study

**Term 1**
- BMES 124: Biomedical Engineering Freshman Seminar I (1.0)
- CHEM 101: General Chemistry I (3.5)
- ENGL 101: Composition and Rhetoric I: Inquiry and Exploratory Research (3.0)
- ENGR 100: Beginning Computer Aided Drafting for Design (1.0)
- ENGR 101: Engineering Design Laboratory I (2.0)
- ENGR 121: Computation Lab I (2.0)
- MATH 121: Calculus I (4.0)
- CIVC 101: Introduction to Civic Engagement (1.0)
- UNIV R101: The Drexel Experience (1.0)

**Term Credits:** 18.5

**Term 2**
- BMES 126: Biomedical Engineering Freshman Seminar II (1.0)
- CHEM 102: General Chemistry II (4.5)
- ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing (3.0)
- ENGR 102: Engineering Design Laboratory II (2.0)
- ENGR 122: Computation Lab II (1.0)
- MATH 122: Calculus II (4.0)
- PHYS 101: Fundamentals of Physics I (4.0)

**Term Credits:** 19.5

**Term 3**
- BIO 122: Cells and Genetics (4.5)
- BMES 130: Problem Solving in Biomedical Engineering (2.0)
- ENGL 103: Composition and Rhetoric III: Themes and Genres (3.0)
- ENGR 103: Engineering Design Laboratory III (2.0)
- MATH 200: Multivariate Calculus (4.0)
- PHYS 102: Fundamentals of Physics II (4.0)

**Term Credits:** 19.5

**Term 4**
- BIO 201: Human Physiology I (4.0)
- BMES 201: Programming and Modeling for Biomedical Engineers I (3.0)
- ENGR 220: Fundamentals of Materials (4.0)
- ENGR 231: Linear Engineering Systems (3.0)
- PHYS 201: Fundamentals of Physics III (4.0)

**Term Credits:** 18.0

**Term 5**
- BIO 203: Human Physiology II (4.0)
- BMES 202: Programming and Modeling for Biomedical Engineers II (3.0)
- BMES 212: The Body Synthetic (3.0)
- ENGR 210: Introduction to Thermodynamics (3.0)
- ENGR 232: Dynamic Engineering Systems (3.0)
- MEM 202: Statics (3.0)

**Term Credits:** 19.0

**Term 6**
- BMES 301: Laboratory I: Experimental Biomechanics (Laboratory Requirement) (2.0)
- BMES 302: Laboratory II: Biomeasuresments (2.0)
- BMES 325: Principles of Biomedical Engineering I (3.0)
- BMES 372: Biosimulation (3.0)
- ECE 201: Foundations of Electric Circuits (3.0)
- HIST 285: Technology in Historical Perspective (4.0)

**Term Credits:** 17.0

**Term 7**
- BMES 303: Laboratory III: Biomedical Electronics (2.0)
- BMES 310: Biomedical Statistics (4.0)

**Term Credits:** 6.0

**Total Credits:** 199.5

---

**Opportunities**

Metropolitan Philadelphia has one of the highest concentrations of medical institutions and pharmaceutical and biotechnology industries in the nation. The bachelor of science degree in biomedical engineering gives students access to a broad spectrum of career opportunities in medical device and equipment industry; prosthetics and assist devices industry; biomaterials and implants industry; and the telemedicine, pharmaceutical, biotechnology, and agricultural sectors.

Biomedical engineering graduates are also ideally prepared for professional education in medicine, dentistry, veterinary medicine, and law. Those who choose to pursue graduate education can aim for careers in research and development, biomedical technology innovation and transfer, as well as health care technology management.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.
Biomedical Engineering, Science and Health Systems Faculty

Fred D. Allen, PhD (University of Pennsylvania) Associate Director, Undergraduate Education. Assistant Professor. Tissue engineering, cell engineering, orthopedics, bone remodeling, wound healing, mechanotransduction, signal transduction, adhesion, migration.

Hasan Ayaz, PhD (Drexel University) School of Biomedical Engineering, Science and Health Systems. Research Associate Professor. Optical brain imaging, cognitive neuroengineering, brain computer interface (BCI), functional near infrared (fNIR), and near infrared spectroscopy (NIRS).

Sriram Balasubramanian, PhD (Wayne State University). Assistant Professor. Structural characteristics of the pediatric thoracic cage using CT scans and developing an age-equivalent animal model for pediatric long bones.

Kenneth A. Barbee, PhD (University of Pennsylvania). Professor. Cellular biomechanics of neural and vascular injury, mechanotransduction in the cardiovascular system, mechanical control of growth and development for wound healing and tissue engineering.

Donald Buerk, PhD (Northwestern University). Research Professor. Biotechnology, physiology, systems biology, blood flow, microcirculation, nitric oxide, oxygen transport.

Jamie Dougherty, PhD (Drexel University). Assistant Teaching Professor. Brain-computer interface, neural encoding, electrophysiological signal acquisition and processing.

Lin Han, PhD (Massachusetts Institute of Technology). Assistant Professor. Nanoscale structure-property relationships of biological materials, genetic and molecular origins soft joint tissue diseases, biomaterials under extreme conditions, coupling between stimulus-responsiveness and geometry.

Uri Hershberg, PhD (Hebrew University of Jerusalem, Israel). Assistant Professor. Bioinformatics, immunology, neural computation, system biology, somatic selection, autoimmunity, genetic stability, germline diversity, dendritic cell, transcription elements, pathogens, computational and mathematical modeling, complex systems, cognition and inflammation.

Kurtulus Izzetoglu, PhD (Drexel University) Associate Research Professor. Cognitive neuroengineering, functional imaging, near infrared spectroscopy, medical sensor development, biomedical signal processing, human performance assessment, and cognitive aging.

Meltem Izzetoglu, PhD (Drexel University). Associate Research Professor. Cognitive neuroengineering, biomedical signal processing, statistical signal analysis, optimal artifact removal, information processing, optical brain imaging, functional near infrared spectroscopy, working memory, attention, learning, reading and mathematical disabilities, cognitive aging, anesthesia awareness, and social anxiety disorders.

Dov Jaron, PhD (University of Pennsylvania) Calhoun Distinguished Professor of Engineering in Medicine. Professor. Mathematical, computer and electromechanical simulations of the cardiovascular system.

Andres Kriete, PhD (University in Bremen Germany) Associate Director for Graduate Studies and Academic Operations. Systems biology, bioimaging, control theory, biology of aging, skin cancer.

Steven Kurtz, PhD (Cornell University). Associate Research Professor. Computational biomechanics of bone-implant systems and impact-related injuries, orthopaedic biomechanics, contact mechanics, orthopaedic biomaterials, large-deformation mechanical behavior and wear of polymers, and degradation and crosslinking of polyolefins in implant applications.

Ryszard Lec, PhD (University of Warsaw Engineering College). Professor. Biomedical applications of viscoelastic, acoustooptic and ultrasonic properties of liquid and solid media.

Peter Lewin, PhD (University of Denmark, Copenhagen-Lyngby) Richard B. Beard Professor, School Of Biomedical Engineering, Science & Health Systems. Professor. Biomedical ultrasonics, piezoelectric and polymer transducers and hydrophones; shock wave sensors.

Hualou Liang, PhD (Chinese Academy of Sciences). Professor. Neuroengineering, computational neuroscience, neural data analysis and computational modeling, biomedical signal processing.

Donald L. McEachron, PhD (University of California at San Diego) Coordinator, Academic Assessment and Improvement. Teaching Professor. Animal behavior, autoradiography, biological rhythms, cerebral metabolism, evolutionary theory, image processing, neuroendocrinology.

Karen Moxon, PhD (University of Colorado) Associate Director for Research. Professor. Cortico-thalamic interactions; neurobiological perspectives on design of humanoid robots.

Michael Neidrauer, PhD (Drexel University). Assistant Research Professor. Wound healing, near infrared, spectroscopy, cell culture, data analysis, optical coherence tomography (OCT), matlab, life sciences assay development, confocal microscopy, biomaterials, in-vivo, medical devices.

Banu Onaral, PhD (University of Pennsylvania) H.H. Sun Professor; Senior Advisor to the President, Global Partnerships. Professor. Biomedical signal processing; complexity and scaling in biomedical signals and systems.

Kambiz Pourrezaei, PhD (Rensselaer Polytechnic University). Professor. Thin film technology; nanotechnology; near infrared imaging; power electronics.

Ahmet Sacan, PhD (Middle East Technical University). Assistant Professor. Indexing and data mining in biological databases; protein sequence and structure; similarity search; protein structure modeling; protein-protein interaction; automated cell tracking.

Joseph J. Sarver, PhD (Drexel University). Associate Professor. Neuromuscular adaptation to changes in the myo-mechanical environment.

Rahamim Seliktar, PhD (University of Strathclyde, Glasgow) Vice Director, School of Biomedical Engineering, Science & Health Systems. Professor. Limb prostheses, biomechanics of human motion, orthopedic biomechanics.

Patricia A. Shewokis, PhD (University of Georgia). Professor. Roles of cognition and motor function during motor skill learning; role of information feedback frequency on the memory of motor skills; noninvasive neural imaging techniques of functional near infrared spectroscopy (NIRS) and electroencephalography (EEG) and methodology and research design.
Adrian C. Shieh, PhD (Rice University). Assistant Professor. Contribution of mechanical forces to tumor invasion and metastasis, with a particular emphasis on how biomechanical signals may drive the invasive switch, and how the biomechanical microenvironment interacts with cytokine signaling and the extracellular matrix to influence tumor and stromal cell behavior.

Wan Y. Shih, PhD (Ohio State University). Associate Professor. Piezoelectric microcantilever biosensors development, piezoelectric finger development, quantum dot development, tissue elasticity imaging, piezoelectric microcantilever force probes.

Kara Spiller, PhD (Drexel University). Assistant Professor. Macrophage-biometric interactions, drug delivery systems, and chronic wound healing. Cell-biometric interactions, biomaterial design, and international engineering education.

Marek Swoboda, PhD (Drexel University). Assistant Teaching Professor. Cardiovascular engineering, cardiovascular system, diagnostic devices in cardiology, piezoelectric biosensors, and pathogen detection.

Amy Throckmorton, PhD (University of Virginia). Associate Professor. Computational and experimental fluid dynamics; cardiovascular modeling, including transient, fluid-structure interaction, and patient-specific anatomical studies; bench-to-bedside development of medical devices; artificial organs research; prediction and quantification of blood trauma and thrombosis in medical devices; design of therapeutic alternatives for patients with dysfunctional single ventricle physiology; human factors engineering of mechanical circulatory assist devices

Margaret Wheatley, PhD (University of Toronto) John M. Reid Professor. Ultrasound contrast agent development (tumor targeting and triggered drug delivery), controlled release technology (bioactive compounds), microencapsulated allografts (ex vivo gene therapy) for spinal cord repair.

Ming Xiao, PhD (Baylor University). Associate Professor. Nanotechnology, single molecule detection, single molecule fluorescent imaging, genomics, genetics, genome mapping, DNA sequencing, DNA biochemistry, and biophysics.

Yinghui Zhong, PhD (Georgia Institute of Technology). Assistant Professor. Spinal cord repair, and engineering neural prosthesis/brain interface using biomaterials, drug delivery, and stem cell therapy.

Leonid Zubkov, PhD, DSc (St. Petersburg State University, Russia). Research Professor. Physiology, wound healing, physiologic neovascularization, near-infrared spectroscopy, optical tomography, histological techniques, computer-assisted diagnosis, infrared spectrophotometry, physiologic monitoring, experimental diabetes mellitus, penetrating wounds, diabetes complications, skin, animal models, radiation scattering, failure analysis

Catherin von Reyn, PhD (University of Pennsylvania). Assistant Professor. Cell type-specific genetic engineering, whole-cell patch clamp in behaving animals, modeling, and detailed behavioral analysis to identify and characterize sensorimotor circuits.

Emeritus Faculty

Hun H. Sun, PhD (Cornell University). Professor Emeritus. Biological control systems, physiological modeling, systems analysis.

### Neuroengineering Concentration

**Major: Biomedical Engineering: Neuroengineering Concentration**

**Degree Awarded:** Bachelor of Science

**Calendar Type:** Quarter

**Total Credit Hours:** 196.5 - 198.5

**Co-op Options:** Three Co-op (Five years); One Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 14.0501

**Standard Occupational Classification (SOC) code:** 17-2031

### About the Program

**Bachelor of Science in Biomedical Engineering (BMES) 197.0 credits**

Neuroengineering is broadly defined to include the modeling of neural and endocrine systems, neural networks, complexity in physiological systems, evolutionary influences in biological control systems, neurocontrol, neurorobotics, and neuromposites.

This concentration focuses on the theory of neural signaling, as well as addressing issues that have a neuroscientific basis, such as locomotion and pattern generation, central control of movement, and the processing of sensory information. Students pursuing this concentration will learn the fundamental theory of cellular potentials and chemical signaling, the Hodgkin Huxley description of action potential generation, circuit representations of neurons and be able to derive and integrate equations describing the circuit as well as design computer models.

Upon graduation, students will be able to:

- model specific aspects of neural systems;
- understand control system theory as applied to neural systems;
- understand how neuroengineering can be applied in clinical situations.

The School maintains extensive facilities and laboratories devoted to areas of research. Visit the School's BIOMED Research Facilities and Laboratory Map (http://www.biomed.drexel.edu/new04/Content/research/facilities) page for more details about the laboratories and equipment available.

For more information about this concentration, see Drexel's School of Biomedical Engineering, Science, and Health Systems (http://www.biomed.drexel.edu/new04) web page.

**Opportunities**

Metropolitan Philadelphia has one of the highest concentrations of medical institutions and pharmaceutical and biotechnology industries in the nation. The bachelor of science degree in biomedical engineering gives students access to a broad spectrum of career opportunities in medical device and equipment industry; prosthetics and assist devices industry; biomaterials and implants industry; and the telemedicine, pharmaceutical, biotechnology, and agricultural sectors.

Biomedical engineering graduates are also ideally prepared for professional education in medicine, dentistry, veterinary medicine, and law. Those who choose to pursue graduate education can aim for careers in research and development, biomedical technology innovation and transfer, as well as health care technology management.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.
The School of Education

The School of Education offers Pennsylvania Department of Education-approved programs to certify students who want to become teachers. Undergraduate students have the option to choose from a variety of traditional full-time and non-traditional part-time on-campus and online programs. These programs are designed to meet the needs of a variety of diverse learners who wish to pursue a bachelor’s degree and Pennsylvania State Certification in elementary (grades Prek-4), middle level (grades 4-8) and/or secondary (grades 7-9).

School of Education undergraduate students have the option to choose from the following program options: BS on-campus (full or part-time) taking day or evening courses, or the part-time Online BS Degree completion program. In addition, any Drexel non-education undergraduate student who is interested in becoming a teacher has the option to enroll in either the BS/MS or BA/MS Dual Degree programs (4 or 5 year options) regardless of their major.

The School of Education (http://www.drexel.edu/soe) seeks to enrich knowledge and practice related to lifespan learning, based on the most current and appropriate research and practice. Our goal is to improve human understanding through programs and activities that emphasize creative uses of human effort, technology, leadership, and problem solving.

Majors

- Elementary Education (BS) (p. 401)
  - PK-4 (p. 403)
  - PK-4 and Special Education (p. 406)
  - Middle Level Math and English (p. 410)
  - Middle Level Science and Math (p. 413)
  - Middle Level Science and English (p. 416)
- Learning, Culture and Technology (BS) (p. 419)
- Teacher Education (BS) (p. 423)
  - Biology (p. 425)
  - Chemistry (p. 428)
  - Earth and Space Science (p. 431)
  - English (p. 435)
  - General Science (p. 438)
  - Mathematics (p. 441)
  - Physics (p. 444)
  - Social Studies (p. 447)

Minor

- Education (p. 450)
- STEM Education (p. 451)

Certificates

- Creativity and Innovation (p. 451)

About the Curriculum

The School of Education’s programs apply the most updated trends in theory, instruction, and leadership, with an emphasis on effective teaching integrating the sciences, enhancing teaching by using technology, two central components of every Drexel Education. In addition, this is the only such program in the country to incorporate a six-month paid internship in industry related to the student’s area of certification or individual interest.

Certification for classroom instruction is organized according to the two majors, the BS in Elementary Education and the BS in Secondary Education. Below is a list of all certification areas currently offered by the School of Education.

- Elementary education
  - Elementary: PK-4
  - Elementary: PK-4 and Special Education
  - Middle Level Math and English
  - Middle Level Science and English
  - Middle Level Science and Math
- Secondary education (grades 7-12)
  - Biology
  - Chemistry
  - Earth and Space Science
  - English
  - General Science
  - Mathematics
  - Physics
  - Social Studies
  - Environmental Education (grades K-12)

Students may acquire certification in more than one subject area.

The School of Education uses university-wide resources to prepare fully qualified teachers at both the elementary and secondary levels. The Teacher Education Program at Drexel University is closely aligned with National INTASC Teaching Standards as well as the Pennsylvania Department of Education’s Four Domains for Professional Teaching. In addition, the Teacher Ed Program has identified seven Program Outcomes, which identify the specific qualities that set the Drexel Teacher Candidate apart from other candidates in the field. These program outcomes are directly aligned with the Drexel University Student Learning Priorities (DSLP). It is expected that students exiting the Teacher Education Program at Drexel University will exhibit these seven standards in his/her professional teaching practice.

Program Outcomes:

1. The teacher candidate demonstrates independent and creative academic leadership skills that can be applied in the classroom, school community and the profession.
2. The teacher candidate understands the changing role of the educator in an increasingly diverse society, and applies this understanding in the classroom, school community and profession.
3. The teacher candidate holds a global perspective on current issues in education, understands best pedagogical practices, and utilizes this knowledge in the classroom, school community and profession.
4. The teacher candidate recognizes the importance of the application of educational research as a tool to explore critical aspects of teaching and learning in PK-12 setting.
5. The teacher candidate demonstrates a strong academic background in all subject areas that meet PDE content requirements, with strong emphasis on mathematics and science.
6. The teacher candidate can effectively integrate tools of technology in curriculum, assessment and instruction to enhance PK-12 student learning.

7. The teacher candidate demonstrates the ability to reflect upon one’s professional practice through the successful completion of course work and engagement in experiential learning to promote positive, transformative change within the profession.

**Pennsylvania Instructional I Teaching Certifications**

There are multiple ways for Drexel University students to obtain their initial and add-on teaching certifications in Pennsylvania while pursuing their current major at Drexel. Education majors have the opportunity to achieve these certifications through the Bachelors of Science Education program, the BS/MS dual degree, the graduate level Post-baccalaureate (PBC) and Masters (MS) in Teaching Learning and Curriculum programs.

Non-teaching education majors may have the opportunity to build teacher certification into their program of study as electives, depending on their major. Those students who cannot manage the whole certification program may opt to participate in the (non-certification) education minor. Undergraduate students also have the option to enroll in as many content courses as can be managed in their undergraduate degree and then finish their teaching certification requirements through the Post-baccalaureate Teaching Certification or Masters in Teaching Learning and Curriculum programs. Additionally, undergraduate non-education majors can pursue a Master’s degree in Teaching, Learning, and Curriculum with Teaching Certification through the BA/MS or BS/MS dual degree route while in their current major provided they meet and maintain the program’s minimum criteria of a 3.0 cumulative GPA requirement and have completed no more than 90-120 credits at Drexel at the time of applying for the dual degree program.

*Please note that during a Drexel student’s senior year, undergraduate students have the option to take up to and including 9 graduate credits in core pedagogy education courses that can be applied to a future graduate level Post-baccalaureate Teacher Certification or MS degree program at Drexel provided that these graduate credits are not required for UG degree completion and the student received a minimum grade of a “B” in those graduate courses.

Please be advised that the Pennsylvania Department of Education requires that all teacher certification candidates must maintain a 3.0 GPA in their degree or certification program in order to be recommended for state certification.

Combination certifications are available from the School of Education. Sample combinations include:

- Grades PreK-4 certification, with certification in Special Education.
- Biology certification, with courses for additional certification in chemistry.
- Chemistry certification, with courses for additional certification in biology.
- Earth and space science certification, with courses for additional certification in chemistry.
- Earth and space science certification, with courses for additional certification in physics.
- Mathematics certification, with courses for additional certification in mathematics.
- Physics certification, with courses for additional certification in mathematics.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study.

For more information, please contact the Program Manager or the School of Education at 215.895.6770.

**Post-Graduate Opportunities**

Students obtain employment in the School District of Philadelphia and neighboring school districts in Pennsylvania and such surrounding states as New Jersey, Delaware, Ohio, and New York. Often, students begin a graduate degree program in combination with their employment.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List on the Drexel University Writing Center web page. Students scheduling their courses in Banner/DrexelOne can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

**Cooperative Education**

Drexel University has long been known for its co-operative education program, through which students combine periods of full-time, career-related employment with their studies. Internship employment is a requirement for all teacher education majors.

The BS degree is completed in four years. In addition to the Pennsylvania Department of Education’s (PDE) state mandated field experiences and 12 week student teaching, this program includes one six-month internship period of full-time employment related to the student’s initial area of teacher certification. The goal of the co-op program in teacher education is to provide real-world experiences for future teachers to use in their classrooms.

Students typically participate in co-ops during their fall and winter terms of their sophomore year and pursue varied positions geared directly to their area(s) of certification. Candidates are asked to pursue a position that would allow them to see other areas of education that reach beyond K-12 teaching. This caveat to the requirement allows candidates to understand the broadness and extensive nature of the field of education both nationally and internationally.

Students have interned in a variety of institutions or museums such as the Philadelphia School District, the Philadelphia’s Please Touch Museum, Drexel’s Academy of Natural Science (http://www.anssp.org) Museum (http://www.anssp.org), the Philadelphia Dream Academy, Children’s Hospital of Philadelphia, and the Franklin Institute Science Museum just to name a few.
While the BS/MS 5 year dual degree program offers both a co-op, PA state mandated field experiences and student teaching, the BS/MS 4 year dual degree program only requires the PA state mandated field experiences and student teaching, not a co-op experience.

**Facilities**

The Drexel Center for the Prevention of School-aged Violence is located within the School of Education at Drexel University, 3141 Chestnut Street, Philadelphia, PA 19104. The mission of the center is to create public awareness around the need for youth-focused, evidence-based efforts aimed at preventing youth violence from occurring in environments where youth grow, learn, and recreate.

Our vision is to help ensure that all youth possess the requisite social and cognitive skills to prevent violence on their own, which includes developing conflict resolution and mediation skills. We also strive to inform policy leaders and stakeholders of the various types of evidence-based activities that prevent school-aged violence.

The Math Forum is a leading center for mathematics and mathematics education on the Internet. Operating under Drexel's School of Education, our mission is to provide resources, materials, activities, person-to-person interactions, and educational products and services that enrich and support teaching and learning in an increasingly technological world.

For more information about these and other School of Education centers, visit the School of Education (http://www.drexel.edu/soe) website.

**Elementary Education**

**Major:** Elementary Education  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 180.0 - 188.5  
**Co-op Options:** One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 13.1202; 13.1311; 13.1316  
**Standard Occupational Classification (SOC) code:** 25-2022

**About the Program**

Elementary school teachers instruct classes of children in several subjects. Often they work as part of a team with other teachers who are jointly responsible for a group of students in at least one subject.

The BS in Elementary Education uses university-wide resources to prepare fully qualified teachers at the primary education levels. Students in the School of Education participate in one six-month cooperative education (co-op) experience in a professional position related to their area of certification.

Primary teacher certification options include:

- Pre-Kindergarten - Grade 4 (p. 403)
- Pre-Kindergarten - Grade 4 & Special Education (p. 406)
- Middle Level (grades 4-8) Mathematics and English (p. 410)
- Middle Level (grades 4-8) Science and English (p. 416)
- Middle Level (grades 4-8) Science and Mathematics (p. 413)

Students may acquire certification in more than one subject area.

The program requires that students have a B average (3.0 GPA) in content courses needed for teacher certification in addition to the grade of B or better in each EDUC course throughout their time in the program. These requirements must be satisfied in order for Drexel to recommend the student for teacher certification upon graduation and/or be considered to have completed the program.

A benchmark to assist students in meeting the GPA and B grade requirements is the formal review of each student’s content and pedagogy coursework at the end of the sophomore year. Students who meet these requirements, as well as pass the Pre-Professional Skills Test (PPST Reading, PPST Writing, PPST Mathematics) of the ETS Praxis Exams according to Pennsylvania standards at that time, are officially accepted into Drexel’s Teacher Preparation Program. Students who do not meet the requirements work with their academic advisor to develop a plan of action to work toward meeting the requirements, continue in the program to work toward the BS degree without being recommended for a teaching certificate, or explore another major.

Students participate in classroom observations and limited direct teaching experiences as a component of many of their pedagogy courses beginning in their freshman year. Students have the option of the following teacher certification/concentration tracks within their major which determines their individual program of study:

- **Elementary Education, Pre-Kindergarten through Grade 4:** Focused study to work with children in pre-kindergarten, kindergarten, and grades 1-4 across subject areas (ages 3-9). The competencies for this concentration include child development (birth through age 5), language development, early literacy and math foundations for preschool years, early intervention, integrating the arts for the developing child and family and community partnerships.

- **Elementary Education, Pre-Kindergarten through Grade 4 and Special Education:** Focused study to work with children in pre-kindergarten, kindergarten, and grades 1-4 across subject areas (ages 3-9) within the competencies listed previously as well as working with students with disabilities in pre-kindergarten, kindergarten and grades 1-8 (ages 3-14). The special education competencies emphasize the Response to Intervention process, working with students at risk for and with/without disabilities, progress monitoring techniques, research-based instructional practices and interventions.

- **Elementary Education, Middle Level:** Focused study to work with students in grades 4-6 across subjects and with students in grades 7-8 in two core academic subject(s) the teacher education candidate chooses to pursue:
  - Middle School Mathematics & English
  - Middle School Science & English
  - Middle School Science & Math

In the senior year, students who are officially accepted into the Teacher Preparation Program and maintain the GPA and grade requirements, enroll and complete the 12-week, full-time, student-teaching experience in their primary area of certification. Students must receive a grade of at least B in (and if applicable) and in all pedagogy (EDUC) coursework, as well as maintain an overall 3.0 GPA to be recommended for teacher certification.

Students who were not officially accepted into the Teacher Preparation Program and/or do not maintain the GPA and grade requirements but who are working towards the BS degree without being recommended for teacher certification take other courses as assigned by the Teacher...
Education Program Director and/or academic advisor to fulfill needed credits for the degree in lieu of student teaching.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study. For more information, contact the Program Coordinator for the School of Education at 215-895-6770.

Additional information is available at the School of Education’s (http://www.drexel.edu/soe) website.

Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Arouitis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy;
comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Elementary Education: PK-4

Major: Elementary Education

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: One Co-op (Four years)

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2021

About the Concentration

This certification option within the BS in Elementary Education (p. 401) enables teachers to work with children in pre-kindergarten, kindergarten, and grades 1 through 4 (ages 3-9) across subject areas. Required competencies are covered in areas such as child development, language development, early literacy and math foundations for preschool years, early intervention, integrating the arts for the developing child, and family and community partnerships.

Additional Information

### Education Faculty

**Jennifer Adams**, EdD *(Harvard University)*. Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

**Ayana Allen**, PhD *(Texas A&M University)*. Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

**Kristen Betts**, EdD *(George Washington University)*. Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

**W. Edward Bureau**, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Leadership, supervision, and capacity development.

**Jamie Callahan**, EdD *(George Washington University)*. Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

**Holly Carpenter**, PhD *(Arizona State University)*. Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

**José Luis Chávez**, EdD *(University of Southern California)*. Clinical Professor. Higher education leadership and administration.

**Rebecca Clothey**, PhD *(University of Pittsburgh)*. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

**James Connell**, PhD *(Louisiana State University)*. Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

**D. Brent Edwards**, PhD *(University of Maryland)*. Assistant Clinical Professor. Global and international education

---

**Salvatore V. Falletta**, EdD *(North Carolina State University)*. Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

**Aroutis N. Foster**, PhD *(Michigan State University)*. Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

**Kathy Geller**, PhD *(Fielding Graduate University)*. Assistant Clinical Professor. Educational leadership and management.

**Rajashi Ghosh**, PhD *(University of Louisville, Kentucky)*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

**Roger Geertz Gonzalez**, PhD *(Pennsylvania State University)*. Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

**John M. Gould**, PhD *(University of Pittsburgh)*. Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

**Mary Jo Grdina**, PhD *(Case Western Reserve University)*. Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

**Dominic F. Gullo**, PhD *(Indiana University)*. Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

**Penny Hammrich**, PhD *(University of Minnesota)*. Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

**Paul Harrington**, PhD *(University of Massachusetts, Boston)*. Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

**Elizabeth Haslam**, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

**Michael J. Haslip**, PhD *(Old Dominion University)*. Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

**Marlene Hilkowitz**, M.Ed *(Temple University)*. Assistant Clinical Professor. Science education; Curriculum development; Student engagement

**Deanna Hill**, JD, PhD *(University of Pittsburgh)*. Assistant Clinical Professor. Higher education, international education, education law, education policy
Elementary Education: PK-4 and Special Education

Major: Elementary Education
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 13.1202
Standard Occupational Classification (SOC) code: 25-2052

About the Concentration

This certification option within the BS in Elementary Education (p. 401) enables teachers to work with children in pre-kindergarten, kindergarten, and grades 1 through 4 (ages 3-9) across subject areas, with the addition of being specialized to work with students at risk for disabilities or with disabilities. As with the Elementary PK-4 certification, the program covers required competencies such as child development, language development, early literacy and math foundations for preschool years, early intervention, integration of the arts for the developing child, and family and community partnerships.

Improvements in the diagnosis of learning disabilities at earlier ages have resulted in an increase in the number of students requiring special
education. This program is designed to provide the information necessary to: understand the complexities of the disabled learner’s needs; modify a curriculum appropriately; provide remedial instruction; use technology to address the learner’s needs/progress; manage instruction for students with special needs in the inclusive classroom; as well as additional approaches to assessment and special education teaching techniques.

**Additional Information**

For more information about the program, visit the School of Education (http://drexel.edu/soe) website.

**Degree Requirements**

**General Education/Content Requirements**

- **BIO 100** Applied Cells, Genetics & Physiology 3.0

**Education Faculty**

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Arotis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.
Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early school leaving experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.
Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vondran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

**Elementary Education: Middle Level Math and English**

**Major: Elementary Education**
**Degree Awarded: Bachelor of Science (BS)**
**Calendar Type: Quarter**
**Total Credit Hours: 180.0**
**Co-op Options: One Co-op (Four years)**
**Classification of Instructional (CIP) code: 13.1202**
**Standard Occupational Classification (SOC) code: 25-2022**

**About the Concentration**
This certification option within the BS in Elementary Education (p. 401) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of mathematics and English.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training in how to effectively deliver standards-based math content, based on age-appropriate understanding, individual and groups needs; (2) courses devoted to teaching age-appropriate; reading skills, how to teach and assess writing effectively, as well as a specialized course in the genre of young adult fiction.

**Additional Information**
For more information about the program, visit the School of Education (http://drexel.edu/soe) website.

**Education Faculty**

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.
Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy.

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching
English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Northwestern University). Associate Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

About the Concentration

This certification option within the BS in Elementary Education (p. 401) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of science and mathematics.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training in how to effectively deliver standards-based academic math content, based on age-appropriate understanding, individual and groups needs; (2) training and methodology for teaching physical and life sciences (including using an inquiry-based model of learning, developing authentic assessments, drawing upon a variety of tools, creating and maintaining a safe laboratory) as well as other skills necessary to meet the needs of diverse learners in science education.

Additional Information

For more information about the program, visit the School of Education (http://drexel.edu/soe) website.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy;
comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

**Elementary Education: Middle Level Science and English**

**Major: Elementary Education**

**Degree Awarded: Bachelor of Science (BS)**

**Calendar Type:** Quarter

**Total Credit Hours:** 180.0

**Co-op Options:** One Co-op (Four years)

Classification of Instructional (CIP) code: 13.1202

Standard Occupational Classification (SOC) code: 25-2022

**About the Concentration**

This certification option within the BS in Elementary Education (p. 401) enables to teachers to work with students in grades 4-6 across subjects, and with students in grades 7-8 in the core academic subjects of science and English.

This program addresses the complexities of adolescent development, through discussion of theories. It explores the middle school environment, developmentally appropriate middle school programs, strategies for supporting students through the transition to middle school, and the impact of peer pressure on the middle school child.

In addition, this certification area provides: (1) training and methodology for teaching physical and life sciences (including using an inquiry-based model of learning, developing authentic assessments, drawing upon a variety of tools, creating and maintaining a safe laboratory) as well as other skills necessary to meet the needs of diverse learners in science education; (2) courses devoted to teaching age-appropriate reading skills, how to teach and assess writing effectively, as well as a specialized course in the genre of young adult fiction.
Additional Information
For more information about the program, visit the School of Education (http://drexel.edu/soe) website.

Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education.

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroulis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education;
Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Clinical Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilgkowitz, M.Ed (Temple University), Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Learning, Culture and Technology

Major: Learning, Culture, and Technology
About the Program

The Bachelor of Science major in Learning, Culture, and Technology (LCT) prepares students to build the next generation of information and computing technology for learning. Students learn interdisciplinary skills and knowledge necessary to design, develop, and implement technology-enhanced learning environments for a variety of settings.

Students in the major will be exposed to three major themes in their coursework:

1. **Cognition and Learning**: Cognitive/mental processes and representations underlying knowledge and skill acquisition
2. **Culture and Society**: Social, cultural, and organizational aspects of teaching and learning, in and outside of schools
3. **Design and Technology**: Design and evaluation techniques to enable the development of new and emerging technologies to support learning and teaching

Work across these themes is coordinated to facilitate the development of expertise on the design of learning technologies grounded in strong theories of learning for a wide range of educational contexts (e.g., classrooms, museum exhibits, after-school, summer camps, etc.), audiences (e.g., teachers, students, corporations, children, adults, etc.), and learning environments.

The curriculum combines knowledge of how people learn, learning technology design, and child/adolescent development from the School of Education with design courses in the Westphal College of Media Arts & Design and computational thinking courses in the College of Computing and Informatics. Co-op experiences may include work within Drexel University’s Innovation Neighborhood, Philadelphia schools, and software and design firms with a need for individuals with training in both learning theories and computational design.

Graduates of the program will have strong skills in applying theory to the creation of educational and learning environments. With hands-on courses focused on human learning and technology design, the Learning, Culture, and Technology major combines expertise in the foundations of education with design and technical expertise that is central for best practices of the application, development, and use of technologies throughout our lifetimes.

**Education Faculty**

Jennifer Adams, EdD *(Harvard University)*. Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD *(Texas A&M University)*. Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD *(George Washington University)*. Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD *(George Washington University)*. Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD *(Arizona State University)*. Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD *(University of Southern California)*. Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD *(University of Pittsburgh)*. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD *(Louisiana State University)* Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.
D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy.

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation.

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration.

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy.

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education,
learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Lori Severino, EdD *(Neumann University)*. Assistant Clinical Professor. Special education, differentiated instruction, reading, Wilson language, multi-sensory instruction, reading comprehension, assessment, adolescent literacy.

Jason Silverman, PhD *(Vanderbilt University)*. Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD *(Northwestern University)*. Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD *(University of Toledo)*. Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD *(University of California, Davis)* Dean, *School of Education*. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD *(University of Pennsylvania)*. Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD *(Saint Joseph’s University)*. Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD *(Temple University)*. Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD *(Louisiana State University)*. Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

**BS in Teacher Education**

**Major:** Teacher Education  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 180.0 - 191.5  
**Co-op Options:** One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 13.1205  
**Standard Occupational Classification (SOC) code:** 25-2031

**About the Program**

The Bachelor of Science in Teacher Education program uses university-wide resources to prepare fully qualified teachers at the secondary education levels in various subjects of certification. The program applies the microcomputer in teaching and learning, and it is the only such program in the country to incorporate a six-month paid internship in industry related to the student's area of certification (for example, a prospective chemistry teacher might co-op at a chemical company).

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study.

The BS in Teacher Education, is focused on secondary education, and provides graduates with the background to work with students in grades 7-12 in a specific subject area. Students may work with their academic advisor to satisfy teacher certification requirements for multiple areas if desired. Available certification areas include:

- Biology (p. 425)
- Chemistry (p. 428)
- Earth & Space Science (p. 431)
- English (p. 435)
- General Science (p. 438)
- Mathematics (p. 441)
- Physics (p. 444)
- Social Studies (p. 447)

The program requires that students have a B average (3.0 GPA) in content courses needed for teacher certification in addition to the grade of B or better in each EDUC course throughout their time in the program. These requirements must be satisfied in order for Drexel to recommend the student for teacher certification upon graduation and/or be considered to have completed the program.

A benchmark to assist students in meeting the GPA and B grade requirements is the formal review of each student’s content and pedagogy coursework at the end of the sophomore year. Students who meet these requirements, as well as pass the *Pre-Professional Skills Test* (PPST Reading, PPST Writing, PPST Mathematics) of the *ETS Praxis Exams* according to Pennsylvania standards at that time, are officially accepted into Drexel’s Teacher Preparation Program. Students who do not meet the requirements work with their academic advisor to develop a plan of action to work toward meeting the requirements, continue in the program to work toward the BS degree without being recommended for a teaching certificate, or explore another major.

Students participate in classroom observations and limited direct teaching experiences as a component of many of their pedagogy courses beginning in their freshman year. In the senior year, students who are officially accepted into the Teacher Preparation Program and maintain the GPA and grade requirements, enroll and complete the 12-week, full-time, student-teaching experience in their primary area of certification. Students must receive a grade of at least B in (and if applicable) and in all pedagogy (EDUC) coursework, as well as maintain an overall 3.0 GPA to be recommended for teacher certification.

Students who were not officially accepted into the Teacher Preparation Program and/or do not maintain the GPA and grade requirements but who are working towards the BS degree without being recommended for teacher certification take other courses as assigned by the Teacher Education Program Director and/or academic advisor to fulfill needed credits for the degree in lieu of student teaching.

Students pursuing the appropriate majors in the College of Arts and Sciences may also complete the requirements for certification within their area of study. For more information, contact the Program Coordinator for the School of Education at 215-895-6770.
Additional information is available at the School of Education’s (http://www.drexel.edu/soe) web site.

**Education Faculty**

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenious higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Teacher Education: Biology

Major: Teacher Education
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 13.1205
Standard Occupational Classification (SOC) code: 25-2031

About the Biology Concentration
Certification is for grades 7-12

This certification option within the BS in Teacher Education (p. 423) emphasizes coursework in the biological sciences, including genetics, morphology and physiology, biochemistry, microbiology, and ecology. Students may also choose to pursue a second certification in chemistry and/or environmental education.

Additional Information
For more information about the program, visit the School of Education (http://www.drexel.edu/soe) website.

**Education Faculty**

Jennifer Adams, EdD *(Harvard University)*. Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD *(Texas A&M University)*. Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD *(George Washington University)*. Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD *(George Washington University)*. Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD *(Arizona State University)*. Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD *(University of Southern California)*. Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD *(University of Pittsburgh)*. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD *(Louisiana State University)* Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD *(University of Maryland)*. Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD *(North Carolina State University)*. Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD *(Michigan State University)*. Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD *(Fielding Graduate University)*. Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD *(University of Louisville, Kentucky)*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD *(Pennsylvania State University)*. Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD *(University of Pittsburgh)* Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD *(Case Western Reserve University)*. Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD *(Indiana University)* Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD *(University of Minnesota)* Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD *(University of Massachusetts, Boston)* Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD *(Old Dominion University)*. Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed *(Temple University)*. Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD *(University of Pittsburgh)*. Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD *(University of California, Los Angeles)* Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.
Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecc DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Teacher Education: Chemistry

Major: Teacher Education
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 185.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 13.1205
Standard Occupational Classification (SOC) code: 25-2031

About the Concentration
Certification is for grades 7 - 12
This certification option within the BS in Teacher Education (p. 423) emphasizes coursework in such areas as organic chemistry, physical chemistry, biochemistry, analytical chemistry, and inorganic chemistry. Students may also choose to pursue a second certification in biology.

Additional Information
For more information about the program, visit the School of Education (http://www.drexel.edu/soe) website.

Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothier, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings: autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job
access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hikowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

## Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; Autism intervention; Widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; Organizational diagnostic models; Web-based employee and organizational survey methods, and computational modeling.

Arotis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor.
Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance
Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania), Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis.

**Teacher Education: English**

**Major:** Teacher Education  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 180.5  
**Co-op Options:** One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 13.1205  
**Standard Occupational Classification (SOC) code:** 25-2031

### About the Concentration

**Certification is for grades 7 - 12**

This certification option within the BS in Teacher Education (p. 423) emphasizes coursework in areas such as American and British Literature, young adult fiction, and techniques for effectively teaching reading and writing skills. Students may also choose to pursue a second certification in any of the other certification areas.

### Additional Information

For more information about the program, visit the School of Education (http://www.drexel.edu/soe) website.

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

James Connell, PhD (Louisiana State University). Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.
written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

**Teacher Education: General Science**

**Major:** Teacher Education

**Degree Awarded:** Bachelor of Science (BS)

**Calendar Type:** Quarter

**Total Credit Hours:** 181.5

**Co-op Options:**

Classification of Instructional Programs (CIP) code: 13.1205

Standard Occupational Classification (SOC) code: 25-2031

---

**About the Concentration**

*Certification is for grades 7 - 12*

This certification option within the BS in Teacher Education (p. 423) is a well-rounded program incorporating biology, chemistry, mathematics, and physics. Students may also choose to pursue a second certification in any of the other certification areas. A sample plan of study is available.

**Additional Information**

For more information about the program, visit the School of Education (http://www.drexel.edu/soe) website.

General Science Concentration: Plan of Study

4 YR UG Co-op Concentration

**Term 1**
- CHEM 101: General Chemistry I
- EDUC 101: Foundations in Education I: A Historical and Philosophical Perspective
- EDUC 105: Freshman Pedagogy Seminar
- ENGL 101: Composition and Rhetoric I: Inquiry and Exploratory Research
- MATH 121: Calculus I
- UNIV T101: The Drexel Experience

**Credits**: 15.5

**Term 2**
- CHEM 102: General Chemistry II
- CIVC 101: Introduction to Civic Engagement
- EDUC 105: Freshman Pedagogy Seminar
- EDUC 113: Organizational Structure of Secondary Schools
- ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing
- MATH 122: Calculus II

**Credits**: 16.5

**Term 3**
- CHEM 103: General Chemistry III
- EDEX 142: Special Education Foundations: Referral and Assessment
- EDUC 105: Freshman Pedagogy Seminar
- EDUC 123: Adolescent Development
- ENGL 103: Composition and Rhetoric III: Themes and Genres

**Credits**: 15.0

**Term 4**
- BIO 107: Cells, Genetics & Physiology
- BIO 108: Cells, Genetics and Physiology Laboratory
- EDEX 244: Inclusionary Practices for Exceptional Students
- EDUC 205: Sophomore Pedagogy Seminar
- MATH 123: Calculus III
- PHYS 101: Fundamentals of Physics I

**Credits**: 16.0

**Term 5**
- BIO 109: Biological Diversity, Ecology & Evolution
- BIO 110: Biological Diversity, Ecology and Evolution Laboratory
- COOP 101: Career Management and Professional Development
- EDUC 223: Teaching the Middle School Child
- EDUC 322: Evaluation of Instruction
- GEO 102: History of the Earth

**Credits**: 14.0

**Term 6**
- EDUC 258: Reading in the Content Areas
- EDUC 265: Instructing English Language Learners
- EDUC 306 [WI]: Junior Pedagogy Seminar
- ENVS 284: Physiological and Population Ecology
- PHYS 102: Fundamentals of Physics II
- PSY 101: General Psychology I

**Credits**: 14.0

**Term 7**
- EDUC 312: Educational Policy, Law & Advocacy
- ENVS 285 [WI]: Population Ecology Laboratory
- GEO 101: Physical Geology
- PHYS 131: Survey of the Universe

**Credits**: 17.0

**Term 8**
- EDUC 315: Secondary Science Teaching Methods
- ENVS 286: Community and Ecosystem Ecology
- HIST 289: History of Science: Enlightenment to Modernity
- PHEV 145: Weather I: Climate and Global Change
- PSY 320 [WI]: Educational Psychology

**Credits**: 15.0

**Term 9**
- EDEX 266 [WI]: Literacy and Content Skill Development 7-12
- EDUC 216: Diversity and Today's Teacher
- EDUC 324: Current Research in Curriculum & Instruction
- ENVS 390: Marine Ecology
- Science, Technology and Human Affairs elective (See program advisor)

**Credits**: 17.0

**Term 10**
- EDUC 308: Creating a Positive Classroom Climate
- EDUC 409: Student Teaching Seminar I

**Credits**: 9.0

**Term 11**
- EDUC 325: Multimedia in Instructional Design
- EDUC 410 [WI]: Student Teaching

**Credits**: 12.0

**Term 12**
- EDUC 316: Teaching in Urban Contexts
- EDUC 405: Senior Pedagogy Seminar
- PHILO 251: Ethics
- English (ENGL) course between 200-329
- Science, Technology and Human Affairs elective (See program advisor)
- Free Electives

**Credits**: 17.0

Total Credit: 181.0

**Education Faculty**

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.
W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Arotius N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children's achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslpl, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy.

Erin Horvat, PhD (University of California, Los Angeles) Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher's use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/ preservice teachers' emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.
William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lytle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers' ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vormdran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

**Teacher Education: Mathematics**

**Major: Teacher Education**

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 180.5

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 13.1205

Standard Occupational Classification (SOC) code: 25-2031

**About the Concentration**

Certification is for grades 7 - 12

This certification option within the BS in Teacher Education (p. 423) emphasizes coursework in such areas of mathematics as calculus, linear algebra, differential equations, probability and statistics, techniques of mathematical proof, and discrete mathematics. Students may also choose to pursue a second certification in physics or one of the other sciences.

**Additional Information**

For more information about the program, visit the School of Education (http://www.drexel.edu/soe) website.

**Education Faculty**

Jennifer Adams, EdD *(Harvard University)*. Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD *(Texas A&M University)*. Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD *(George Washington University)*. Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD *(University of Pennsylvania)*. Assistant Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD *(George Washington University)*. Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD *(Arizona State University)*. Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD *(University of Southern California)*. Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD *(University of Pittsburgh)*. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD *(Louisiana State University)*. Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD *(University of Maryland)*. Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD *(North Carolina State University)*. Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD *(Michigan State University)*. Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD *(Fielding Graduate University)*. Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD *(University of Louisville, Kentucky)*. Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD *(Pennsylvania State University)*. Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD *(University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD *(Case Western Reserve University)*. Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD *(Indiana University)*. Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD *(University of Minnesota)*. Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD *(University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD *(University of Pennsylvania)*. Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD *(Old Dominion University)*. Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed *(Temple University)*. Assistant Clinical Professor. Science education; Curriculum development; Student engagement

Deanna Hill, JD, PhD *(University of Pittsburgh)*. Assistant Clinical Professor. Higher education, international education, education law, education policy

Erin Horvat, PhD *(University of California, Los Angeles)*. Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.

Jennifer Katz-Buonincontro, PhD *(University of Oregon)*. Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD *(University of Wisconsin, Madison)*. Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD *(Amherst College)*. Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem
solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore in-service/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sonderged, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis) Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Teacher Education: Physics

Major: Teacher Education
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.5
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 13.1205
Standard Occupational Classification (SOC) code: 25-2031

About the Concentration
Certification is for grades 7-12
This certification option within the BS in Teacher Education (p. 423) emphasizes coursework in physics and atmospheric science, including such topics as classical mechanics, electromagnetic fields, quantum mechanics, and physics of high fidelity, and survey of the universe. Students may also choose to pursue a second certification in mathematics.

Additional Information
For more information about the program, visit the School of Education (http://drexel.edu/soe) website.

Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University). Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh). Assistant Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University). Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota). Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston). Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.

Elizabeth Haslam, PhD (University of Pennsylvania). Associate Clinical Professor. Educational field coordinator, instructional design, qualitative evaluation, writing across the curriculum.

Michael J. Haslip, PhD (Old Dominion University). Assistant Professor. Early childhood education, social and emotional learning, child guidance strategies, effects of public pre-school attendance.

Marlene Hilkowitz, M.Ed (Temple University). Assistant Clinical Professor. Science education; Curriculum development; Student engagement.

Deanna Hill, JD, PhD (University of Pittsburgh). Assistant Clinical Professor. Higher education, international education, education law, education policy.

Erin Horvat, PhD (University of California, Los Angeles). Associate Dean for Academic Affairs. Professor. Urban education, access and equity, high school dropout, parent involvement/family involvement, community engagement in research.
Jennifer Katz-Buonincontro, PhD (University of Oregon). Associate Professor. Educational administration, leadership development, survey & instrument design.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Valerie Klein, PhD (Amherst College). Assistant Clinical Professor. Mathematics learning and teaching; teacher’s use of formative assessment in mathematics; creating opportunities for rich problem solving in the classroom; examining teachers growth and change; qualitative research methods.

Vera Lee, EdD (University of Pennsylvania). Assistant Clinical Professor. Practitioner Research in online courses to explore inservice/preservice teachers’ emerging understandings about issues of diversity; the development of information/digital literacies of urban youth; English language learners.

Bruce Levine, JD (New York University). Assistant Clinical Professor. Educational policy, school law, public-private partnerships, intersection of business and education.

Kristine Lewis-Grant, PhD (Temple University). Associate Clinical Professor. Experiences of students of African descent at predominantly white colleges and universities, college access and college student development, youth civic engagement in urban school reform, qualitative research and evaluation.

William Lynch, PhD (University of Maryland). Professor. Curriculum and educational leadership, educational technology, distance learning policy development, higher and adult education.

Constance Lyttle, PhD, JD (University of Pittsburgh, Duquesne University). Associate Clinical Professor. Legal rights of gifted and talented children and children with disabilities; inclusive education of exceptional children; special education mediation; special education IEP/IFSP facilitation; resolution session facilitation

Kenneth Mawritz, PhD (University of Pittsburgh). Assistant Clinical Professor. Educational administration.

Joyce Pittman, PhD (Iowa State University of Science and Technology). Associate Clinical Professor. Curriculum and instruction K-16; teaching English as a foreign language (TEFL); instructional design business education and administration; industrial and career technology; oral and written communication; research methodology; instructional and assistive technology assessment; online learning pedagogy

Kathleen Provinzano, PhD (Marywood University). Associate Clinical Professor. Educational administration.

Fredricka K. Reisman, PhD (Syracuse University) Director of the Torrance Center for Creativity and Innovation. Professor. Mathematics education, learning mathematics, mathematics pedagogy, teacher education, heuristic diagnostic learning and teaching, theory and research in creativity and applied creativity.

Jason Silverman, PhD (Vanderbilt University). Associate Professor. Teaching and learning of advanced mathematical ideas (algebra and calculus); improving teachers’ ability to orchestrate and sustain inquiry-based and discussion-based instruction; technology in mathematics education.

Brian Smith, PhD (Northwestern University). Professor. Design of computer-based learning environments; Human-computer interaction; Design sciences.

Toni A. Sondergeld, PhD (University of Toledo). Associate Professor. Cognitive and affective assessment development; program/grant evaluation; high stakes testing measurement; STEM education; urban education

Nancy Butler Songer, PhD (University of California, Davis). Dean, School of Education. Distinguished Professor. STEM education, urban education, educational assistance

Mary Jean Tecce DeCarlo, EdD (University of Pennsylvania). Assistant Clinical Professor. Early literacy development, learning differences, knowledge construction, urban education.

Sarah P. Ulrich, EdD (Saint Joseph’s University). Associate Clinical Professor. Emphasis in cross-cultural, language and academic development.

Sheila Vaidya, PhD (Temple University). Professor. Educational psychology, school psychology, research design.

Christina Vorndran, PhD (Louisiana State University). Associate Clinical Professor. Behavior analysis, single subject research methods, functional analysis

Teacher Education: Social Studies

Major: Teacher Education

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 184.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 13.1205

Standard Occupational Classification (SOC) code: 25-2031

About the Concentration

Certification is for grades 7 - 12

This certification option within the BS in Teacher Education (p. 423) is designed to prepare students to teach social studies using appropriate pedagogy strategies. Topics include history, geography, civics, economics and psychology.

Education Faculty

Jennifer Adams, EdD (Harvard University). Associate Professor. Comparative and international education; Poverty and education; Child welfare; Educational policy.

Ayana Allen, PhD (Texas A&M University). Assistant Professor. Urban education; Identity construction in school contexts; Urban school transformation.

Kristen Betts, EdD (George Washington University). Clinical Professor. Higher education administration and governance, online blended education, instructional design and educational technology, program assessment and evaluation.

W. Edward Bureau, PhD (University of Pennsylvania). Associate Clinical Professor. Leadership, supervision, and capacity development.

Jamie Callahan, EdD (George Washington University). Clinical Professor. Leadership; Sociological explorations of emotions occurring in organizational contexts; Organizational development; Contextual issues confronting organizations, such as organizational leadership, organizational culture, and communities of practice.

Holly Carpenter, PhD (Arizona State University). Assistant Clinical Professor. Higher education policy development and implementation, community college/university articulation, and online education.

José Luis Chávez, EdD (University of Southern California). Clinical Professor. Higher education leadership and administration.

Rebecca Clothey, PhD (University of Pittsburgh). Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

James Connell, PhD (Louisiana State University) Clinical Director and Research Fellow, A.J. Drexel Autism Institute. Associate Professor. Identifying the variables that influence adult behavior change in community settings; autism intervention; widespread dissemination of evidence-based interventions in school and community settings.

D. Brent Edwards, PhD (University of Maryland). Assistant Clinical Professor. Global and international education

Salvatore V. Falletta, EdD (North Carolina State University). Associate Clinical Professor. Human Resource intelligence (i.e., HR research and analytics practices); HRD assessment, measurement, and evaluation models and taxonomies; organizational diagnostic models; web-based employee and organizational survey methods, and computational modeling.

Aroutis N. Foster, PhD (Michigan State University). Associate Professor. Educational psychology and educational technology, especially the following: Motivation; Technological Pedagogical Content Knowledge (TPACK); Immersive Interactive Digital Environments (simulation, games, virtual realities).

Kathy Geller, PhD (Fielding Graduate University). Assistant Clinical Professor. Educational leadership and management.

Rajashi Ghosh, PhD (University of Louisville, Kentucky). Associate Professor. Mentoring and leader development, workplace Incivility, workplace learning and development.

Roger Geertz Gonzalez, PhD (Pennsylvania State University). Associate Clinical Professor. Civic engagement, college student identity development, indigenous higher education, comparative higher education access policies.

John M. Gould, PhD (University of Pittsburgh) Harrisburg EdD Educational Leadership & Change Program. Associate Clinical Professor. Change leadership, curriculum re-design, the impact of technology on learning.

Mary Jo Grdina, PhD (Case Western Reserve University). Associate Clinical Professor. Undergraduate studies, science education, curriculum design.

Dominic F. Gullo, PhD (Indiana University) Associate Dean of Research. Professor. Studying the relative and long-range effects of early schooling experiences in prekindergarten and kindergarten on children’s achievement and social adaptation to school routine.

Penny Hammrich, PhD (University of Minnesota) Associate Dean for Graduate Studies. Professor. Urban education; science education; genetics; gender equity; science knowledge for conceptual teaching; sport science.

Paul Harrington, PhD (University of Massachusetts, Boston) Director, Center for Labor Markets and Policy. Professor. Teen and young adult job access; economic outlook, college labor market; workforce development, planning, and development; vocational rehabilitation and job market transition.
Minor in Education

The minor in education provides a structured academic opportunity for students who wish to add a fundamental understanding of the field of education as well as practical knowledge in the art and science of teaching and learning to their undergraduate experience.

Designed for students with a strong interest in education and training, the minor will not necessarily lead to the student being recommended for a state teaching certificate. However, should a student decide to also pursue a teaching certificate as a component of his or her major—
or in post-baccalaureate work—the courses required for the minor are applicable to Pennsylvania State certification.

**Minor in STEM Education**

This minor, which can be coupled with a variety of STEM majors and students pursuing the DragonsTeach program, will provide an opportunity for STEM majors to explore STEM Education, and to develop core knowledge and practices in secondary STEM Education. Successful STEM minor students may build upon the minor's course work to readily complete course work leading to recommendation for PA teaching certification as a secondary teacher (grades 7-12) in one or more STEM content areas. Additional course work is recommended for teacher certification includes Student Teaching and required special education and English language learner courses (an additional 3 courses + student teaching).

**Certificate Level:** Undergraduate  
**Admission Requirements:** High school diploma  
**Certificate Type:** Certificate  
**Number of Credits to Completion:** 18.0 - 20.0
The Dornsife School of Public Health

About the School

The Dornsife School of Public Health (http://drexel.edu/dornsife) at Drexel University provides education, conducts research, and partners with communities and organizations to improve the health of populations.

Founded on the principle of health as a human right, our school is especially committed to improving health in cities, eliminating health disparities, and promoting health in all policies.

Key to the school’s mission is active engagement with the world of public health practice, with communities, and with a range of policies and sectors within and outside the health care system relevant to health.

The Dornsife School of Public Health is the only fully accredited school of public health in the Philadelphia region.

Educational programs

School educational programs combine rigorous training with hands-on practical experiences. Students benefit from engagement with a broad set of community partnerships and research collaborations. Graduates acquire the knowledge, skills and perspective necessary to make a difference in the health of communities in the United States and worldwide.

Research

Dornsife School of Public Health faculty and students conduct research on the drivers of population health and the impact of a range of practices and policies on health. Areas of emphasis include urban health, health disparities, food policy and health, neighborhood and community interventions, behavior change, health consequences of environmental and occupational exposures, aging and chronic diseases, infectious disease, public health history and ethics, the health consequences of trauma and violence, the social determinants of health, and public health needs assessment and practice, among others.

Goals and Objectives

1. Illustrate the interdisciplinary nature of public health in disease prevention and health promotion on both individuals and populations.

2. Recognize the interconnectedness between physical and natural sciences and how each address population-based health challenges.

3. Illustrate the fundamental relationship between health and human rights and the role of social justice and ethics.

4. Highlight the important role that epidemiology and surveillance play in shaping and protecting the health of populations.

5. Recognize the importance of historical context regarding public health milestones as they shape policies and programs.

6. Obtain a greater understanding of the role of culture and values and how they influence relationships between social determinants of health and the built environment.

Public Health

Major: Public Health

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 51.2201
Standard Occupational Classification (SOC) code: 11-9111; 21-1091; 21-1094

About the Program

Public health is the science of protecting and improving the health and well-being of communities. Where clinical professionals such as doctors and nurses focus on treating individuals after they become sick or are injured, public health professionals are concerned with the health of entire populations, attempting to prevent problems from occurring or recurring through education, policy development, advocacy, service and research.

Reflecting the interdisciplinary approach of the Dornsife School of Public Health (http://publichealth.drexel.edu), students in the major will take courses originating from the various public health core disciplines, which include epidemiology, community health and prevention, environmental and occupational health, and health management and policy. The diversity in course offerings provides the students with the general foundations of each discipline within public health. Student learning is enhanced by faculty expertise from a wide array of backgrounds ranging from epidemiology, community health, global health, sociology, psychology, medicine, health policy, health economics, industrial hygiene and anthropology in addition to many more. As the students progress through the major, they will gain more breath and depth in the specific discipline of their choosing through the co-op experience as well as the capstone courses in their senior year.

The Dornsife School of Public Health is dedicated to the integration of social justice and human rights in academic public health and being a model for interdisciplinary collaboration and civic engagement. Additionally, a commitment to global engagement is core to the School’s mission. The Global Public Health Initiative was created to provide opportunities for all public health student to gain rich and meaningful experiences working on health issues that transcend national boundaries or that may be influenced by circumstances or experiences in other countries.

Upon completion of the degree, students will be better equipped to complete graduate education in public health or health sciences. Students will have acquired skills that could be translated into the workplace (city, state or local government, non for profit, etc.) or other post baccalaureate educational settings such as an MPH, JD or MD.

Majors

- Public Health (BS) (p. 452)

Minor

- Global Public Health (p. 457)
- Public Health (p. 457)
7. Identify and address population health challenges through the various public health concentrations.
8. Illustrate the overarching role that the social determinants of health have in promoting or hindering health.
9. Acquire a working knowledge of the US healthcare and healthcare delivery system.

Degree Requirements

General Education Requirements
CIVC 101 Introduction to Civic Engagement 1.0
COM 230 Techniques of Speaking 3.0
COM 320 [WI] Science Writing 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
PBHL 101 Public Health 101 3.0
UNIV PH101 The Drexel Experience 1.0

Students must select one of the following math sequences:

MATH 101 Introduction to Analysis I
& MATH 102 and Introduction to Analysis II
& MATH 239 and Mathematics for the Life Sciences

Or

MATH 121 Calculus I
& MATH 122 and Calculus II
& MATH 123 and Calculus III

Physical and Life Sciences Requirements 19.0

Students must select one of the following biology sequences:

BIO 107 Cells, Genetics & Physiology
& BIO 108 and Cells, Genetics and Physiology Laboratory
& BIO 109 and Biological Diversity, Ecology & Evolution
& BIO 110 and Biological Diversity, Ecology and Evolution Laboratory

Or

BIO 122 Cells and Genetics
& BIO 124 and Evolution & Organismal Diversity
& BIO 126 and Physiology and Ecology

*Please note that students who take the BIO 122, BIO 124, and BIO 126 sequence will be required to take fewer free electives.

Students must select one of the following chemistry sequences:

CHEM 111 General Chemistry I
& CHEM 112 and General Chemistry II

Or

CHEM 101 General Chemistry I
& CHEM 102 and General Chemistry II

Social Science Requirements
PSY 101 General Psychology I 3.0
SOC 101 Introduction to Sociology 3.0

Social Science Electives: 37.0

ANTH 240 Urban Anthropology
ANTH 250 Anthropology of Immigration
ANTH 370 Ethnographic Methods

Dornsife School of Public Health Faculty

Amy Auchincloss, PhD, MPH (University of Michigan). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants of health and the health effects of air pollution; contribution of resources in residential environments to health behaviors, obesity, diabetes and cardiovascular disease; the use of spatial analysis methods and agent-based mode.

Zekarias Berhane, PhD (University of Pittsburgh). Assistant Research Professor. Department of Epidemiology and Biostatistics. Modeling time-to-event data with single and multiple outcomes, mixed effect models and regression diagnostics.

Sandra Bloom, MD (Temple University School of Medicine). Associate Professor. Department of Health Management and Policy. Psychological trauma and organizational stress.

Darryl Brown, PhD (Johns Hopkins University). Assistant Professor. Department of Health Management and Policy. Health care research and planning; patient outcomes and applied health economic methods.

Robert J. Brulle, PhD (George Washington University). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Igor Burstyn, PhD (Utrecht University). Associate Professor. Department of Environmental and Occupational Health. Occupational and environmental epidemiology, industrial hygiene, endocrine disruptors, environmental exposures, biomarkers, air quality, gene-environmental interaction, maternal and child health, Bayesian statistics, statistical modeling, etiology of autism.

Amy Carroll-Scott, PhD, MPH (University of California at Los Angeles). Assistant Professor. Department of Community Health and Prevention. The social and contextual determinants of persistent health disparities and the application of social science and community-based participatory research methods to understanding and eliminating such disparities.

Esther Chernak, MD, MPH, FACP (UMDNJ-Robert Wood Johnson Medical School) Director of the Center for Public Health Readiness and Communication; Director of Joint Degree Programs. Associate Clinical Professor. Department of Environmental and Occupational Health. Adjunct Faculty, Drexel University College of Medicine; Public health
emergency preparedness, infectious diseases, public health practice, global health.

Mariana Chilton, PhD, MPH (University of Pennsylvania) Director, Center for Hunger-Free Communities. Associate Professor. Department of Health Management and Policy. Nutrition, housing and health; chronic diseases; human rights, chronic diseases, community health, human rights and hunger.

Theodore Corbin, MD, MPP (Drexel University) Joint Appointment between Dornsife School of Public Health and Drexel University College of Medicine. Assistant Professor. Department of Health Management and Policy. Health policy; design of care systems; high risk youth; violence; healthcare services; injury prevention.

Anneclaire De Roos, PhD, MPH (University of North Carolina at Chapel Hill). Associate Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, exposure assessment, pesticides, persistent organic pollutants, drinking water quality, air pollution, urban environments, chemical risk assessment.

Ana Diez Roux, MD, PhD, MPH (Johns Hopkins University) Dean, Dornsife School of Public Health. Distinguished Professor. Department of Epidemiology and Biostatistics. Social determinants of health; neighborhoods and health; psychosocial factors; air pollution, cardiovascular disease epidemiology; multilevel and systems methods; urban health and health in Latin America.

Mary Duden, MBA (Drexel University). Associate Teaching Professor. Department of Health Management and Policy. Health care for the underserved and health disparities.

Jerome Dugan, PhD (Rice University) Primary appointment in Health Economics at the Drexel College of Nursing and Health Professions. Assistant Professor. Department of Health Management and Policy. Insurance markets and healthcare regulation.

Nancy Epstein, MPH, MAHL (University of North Carolina at Chapel Hill). Associate Professor. Department of Community Health and Prevention. Community organizing and community engagement strategies; religion and health; health policy and advocacy; organizational and group dynamics; health promotion; behavioral health; oral health; evaluation of community health programs.

Alison A. Evans, ScD (Harvard University). Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of infectious diseases and cancer; cohort studies; minority and immigrant health; chronic viral infections; hepatitis b; elimination of viral hepatitis; immunization; perinatal transmission.

Jerry Fagiano, MPH, PhD (Johns Hopkins University) Chair, Department of Environmental and Occupational Health. Associate Clinical Professor. Children's health and environmental exposures; health impacts of climate change; inequities in environmental exposure and disease; risks from transportation of hazardous materials; spatial distribution and clustering of disease.

Arthur L. Frank, MD, PhD (City University of New York) Chair Emeritus. Professor. Department of Environmental and Occupational Health. Environmental and occupational health, agricultural safety and health, pneumoconiosis, occupational toxicology, environmental pollution.

Dennis Gallagher, MA, MPA (University of Pittsburgh). Assistant Teaching Professor. Department of Health Management and Policy. Health department structure and financing; health policy and law; Medicare/Medicaid and public health infrastructure.

Pamela Geller, PhD (Kent State University). Associate Professor. Stressful life events and physical and mental health outcomes, particularly in the area of women's reproductive health (e.g. pregnancy, pregnancy loss, infertility, medical education).

Edward J. Gracely, PhD (Temple University) Joint Appointment in Drexel University College of Medicine. Associate Professor. Department of Epidemiology and Biostatistics. Statistics, experimental design/research methods and statistical analysis, clinical trials.

Ghassan Hamra, PhD (University of North Carolina at Chapel Hill). Assistant Professor. Department of Environmental and Occupational Health. Environmental and occupational epidemiology, Bayesian statistics, exposure assessment.

William J. Hickey, PhD (Northwestern University). Associate Teaching Professor. Department of Health Management and policy. Health care administration and organizational culture.

Mary E. Hoinga, PhD, MPH (University of Michigan). Associate Professor. Department of Epidemiology and Biostatistics. Cancer, cognitive disabilities; PCBs and DDT, lead exposure; neurological disorders, environmental hazards, epidemiologic study design.

Ann Klassen, PhD (Johns Hopkins University). Professor. Department of Community Health and Prevention. HIV/AIDS, food safety, excess burden intervention, GIS-based and spatial analysis.

Jennifer Kolker, MPH (University of Michigan) Associate Dean for Public Health Practice; Director of Executive MPH Program. Assistant Teaching Professor. Department of Health Management and Policy. Maternal and child health; federally qualified health center program; urban health issues; health department structure and financing; health policy and law; legislative advocacy; Medicare/Medicaid; preterm birth; public health education and training; public health infrastructure; welfare economics; women's health.

Brent Langellier, PhD, MA (University of California, Los Angelos). Assistant Professor. Department of Health Management and Policy. Health and health care disparities, Latino health, complex systems, quantitative methods, GIS.

Stephen E. Lankenau, PhD (University of Maryland). Professor. Department of Community Health and Prevention. HIV/AIDS, overdose...
prevention, prescription drug misuse, medical marijuana, injection drug use, high risk youth, homelessness.

Felice Le-Scherban, PhD, MPH (University of Michigan). Assistant Professor. Department of Epidemiology and Biostatistics. Life course approaches to socioeconomic, racial, and ethnic health disparities; social determinants of health among immigrants; causal links between education and health; analytic methods in social epidemiology.

Brian K. Lee, PhD (Johns Hopkins University). Associate Professor. Department of Epidemiology and Biostatistics. Environmental determinants and epidemiology of autism spectrum disorders; perinatal epidemiology; child and material health; neuropsychiatric epidemiology, causal inference; machine learning.

Nora L. Lee, PhD (Johns Hopkins University). Assistant Research Professor. Department of Epidemiology and Biostatistics. Perinatal epidemiology; preterm birth; infant mortality; autism spectrum disorders; maternal and child health; racial and ethnic health disparities; secondhand smoke; tobacco control; environmental exposures.

Longjian Liu, MD, PhD, MSc, FAHA (The University of Hong Kong). Associate Professor. Department of Epidemiology and Biostatistics. Pharmacoepidemiology: cardiovascular disease and diabetes epidemiology; drug-lifestyle interaction; environmental and global health disparities; hospital electronic health records for cardiovascular and diabetes risk assessment and prediction.

Raymond K. Lum, MPhil, MS (University of Pennsylvania) Director of E-Learning. Associate Teaching Professor. Department of Health Management and Policy. Asian health; change management; e-health; health disparities; innovation diffusion; organization learning theory.

Shannon Marquez, MEng, PhD (University of North Carolina at Chapel Hill) Director, Office of Global Health. Associate Professor. Department of Environmental and Occupational Health. Global health; water sanitation and hygiene; health disparities; environmental health.

Ana Martinez-Donate, PhD (Universidad Autonoma de Madrid, Spain). Associate Professor. Department of Community Health and Prevention. HIV prevention; tobacco control; obesity prevention; access to health services; Latino immigrants and other disadvantaged populations; development and evaluation of community-based interventions.

Philip Massey, PhD, MPH (University of California, Los Angeles). Assistant Professor. Department of Community Health and Prevention. Health communication, health literacy, mHealth, social media and health, adolescent health, global health, program evaluation, quantitative methods.

Leslie McClure, PhD, MPH (University of Michigan) Chair, Department of Epidemiology and Biostatistics. Professor. Design, management and analysis of randomized clinical trials; issues of multiplicity in clinical trials; environmental risk factors for cardiovascular disease and stroke; geographic and racial disparities in cardiovascular disease and stroke.

Yvonne Michael, ScD (Harvard School of Public Health) Associate Dean for Academic and Faculty Affairs. Associate Professor. Department of Epidemiology and Biostatistics. Epidemiology of aging, social epidemiology, women's health, community-based participatory research; health disparities.

Jana M. Mossey, PhD, MPH, MSN (University of North Carolina at Chapel Hill). Professor. Department of Epidemiology and Biostatistics. Epidemiological methods; research design and methods including observational and clinical trials research; psychosocial aspects of health; epidemiology of aging and pain, psychiatric epidemiology including major depression; sub-threshold and minor depression.

Craig J. Newshaffer, PhD (Johns Hopkins University) Director, A.J. Drexel Autism Institute; Associate Dean for Research. Professor. Department of Epidemiology and Biostatistics. Environmental determinants of autism spectrum disorders; gene-environment interaction; neurological disorders.

Alex Ortega, PhD (University of Michigan) Chair, Department of Health Management and Policy; Director, Center for Population Health and Community Impact. Professor. Epidemiological methods in health services research; health needs of Latino children and families; health disparities intervention research; youth engagement in community interventions.

Genevieve Pham-Kanter, PhD (University of Chicago). Assistant Professor. Department of Health Management and Policy. Conflicts of interest in medicine; pharmaceutical and medical device policy; physician behavior; health economics; empirical ethics.

Jonathan Purtle, DRPH, MPH, MSC (Drexel University). Assistant Professor. Department of Health Management and Policy. Mental health policy and services research; policy dissemination and implementation research; traumatic stress in urban areas; trauma-informed system design; violence prevention; political institutions and health.

Lucy Robinson, PhD (Columbia University). Assistant Professor. Department of Epidemiology and Biostatistics. Statistics, modeling and analysis of neuroimaging and CT image data, network modeling, spatio-temporal data, computational statistics, and functional data analysis.

John Rossi, VMD, MBE (University of Pennsylvania). Assistant Professor. Department of Community Health and Prevention. Bioethics and public health ethics, including moral theory, research ethics, ethics of risk & health communication, pediatric ethics, animal ethics.

Alexis Roth, PhD, MPH (Indiana University). Assistant Professor. Department of Community Health and Prevention. HIV/AIDS; sexually transmitted infections; individual, dyadic, and structural determinants of health; technology and health; mixed methods research; community-engagement and participatory research.

Randall L. Sell, ScD (Harvard University). Associate Professor. Department of Community Health and Prevention. Demographic variables, defining and measuring sexual orientations, sampling sexual minorities for public health research.

Suruchi Sood, PhD (University of New Mexico). Associate Professor. Department of Community Health and Prevention. Human rights and health; nutrition; poverty; health disparities; innovation diffusion; HIV/
Minor in Global Public Health

About this Program

The Global Health minor is intended to complement any academic major offered at Drexel and to provide students with basic knowledge about global public health as well as the necessary skills and experience to begin to build their own unique global health career.

The minor will be open to all undergraduate students in all schools and colleges, and is designed around three specific educational objectives for students: to learn more about the problems of global public health in a classroom setting, to experience the issues in global health firsthand in a field setting, and to be exposed to the variety of careers available in global public health by working with faculty, professional staff, and graduate students who are currently engaged in the field.

Upon completion of the Global Health Minor, students are able to:

1. Analyze global health problems, issues and controversies using multiple disciplinary perspectives and conceptual frameworks.
2. Integrate knowledge from academic study and experiential learning toward being active and informed citizens in a global community.
3. Demonstrate the capacity to critically reflect on one's own values, ethics, assumptions and actions in the context of cultures, collaborations and institutions; and
4. Demonstrate the capacity to collaborate across differences (e.g. cultural, social, personal, economic, values, religious).

Requirements for admission

- Undergraduate students with at least 30 credits
- Undergraduate students in good academic standing

Please note: PBHL 101 is a prerequisite for all required PBHL courses in this minor.

It is strongly suggested that students in this minor participate in a field experience which can include an elective course or co-op.

Required courses:

<table>
<thead>
<tr>

Total Credits: 24.0

Minor in Public Health

About this Program

The Dornsife School of Public Health trains new leaders to tackle society's current and future health challenges. The Public Health minor is designed to provide students with a broad overview of the field’s diversity. Reflecting the interdisciplinary approach of the School, students are required to take courses originating from various public
health core disciplines, which include: epidemiology; community health and prevention; environmental and occupational health; and health management and policy.

This minor will be a relevant course of study for students pursuing pre-med, pre-law, biology and business curricula as well as students with an exposure to the breadth and depth of topics within public health, population-level challenges and solutions, as well as possible career options.

**Requirements**

Please note: PBHL 101 is a prerequisite for all required PBHL courses in this minor.

The Antoinette Westphal College of Media Arts & Design

The Antoinette Westphal College of Media Arts & Design curricula include general studies in liberal arts and science, and experiential learning in studio, lab, and classroom settings within the disciplines.

Mission Statement

The Antoinette Westphal College of Media Arts & Design (http://www.drexel.edu/westphal) (The Westphal College) is a community of learning within the areas of media, design, fine arts, performing arts, and the management of creative enterprise that values experiential and immersive education. Students are encouraged to give form to ideas by learning to recognize invention and innovation in a rapidly changing world through creative, critical, and collaborative approaches. The Westphal College’s diverse programs seek to foster innovation and leadership in progressively interconnected disciplines and areas of study.

The academic programs are rigorous, and provide the appropriate balance of a solid foundation with individual creative direction, cultural awareness, strong technical skills, and an understanding of management and professional practice. The College is committed to continual review of curricula, processes and outcomes in order make those improvements and refinements necessary to further enrich the students’ education, and to continue to foster independent thinkers, astute leaders, and creative problem solvers.

 Majors

- Animation & Visual Effects (BS) (p. 462)
- Architecture (BA) (p. 465)
- Art History (BA, BS) (p. 472)
- Dance (BS) (p. 480)
- Design & Merchandising (BS) (p. 485)
- Entertainment & Arts Management (BS) (p. 489)
- Fashion Design (BS) (p. 499)
- Film & Video (BS) (p. 506)
- Game Design & Production (BS) (p. 510)
- Graphic Design (BS) (p. 512)
- Interactive Digital Media (BS) (p. 515)
- Interior Design (BS) (p. 518)
- Music Industry (BS) (p. 522)
- Photography (BS) (p. 526)
- Product Design (BS) (p. 528)
- Screenwriting & Playwriting (BS) (p. 530)
- TV Production & Media Management (BS) (p. 537)
- Westphal Studies Program (BS) (p. 539)

Minors

- Animation & Visual Effects (p. 464)
- Architecture (p. 471)
- Art History (p. 472)
- Dance (p. 484)
- Digital Media (p. 540)
- Film Studies (p. 509)
- Fine Art (p. 540)
- Interactive Digital Media (p. 517)
- Interdisciplinary Smart Initiatives (p. 541)
- Jazz and African-American Music (p. 541)
- Music (p. 542)
- Music Performance (p. 542)
- Music Theory and Composition (p. 542)
- Performing Arts (p. 542)
- Photography (p. 527)
- Product Design (p. 530)
- Retail (p. 542)
- Screenwriting (p. 543)
- Somatics (p. 543)
- Sports Media Production (p. 543)
- Sustainability in the Built Environment (p. 543)
- Television Industry and Enterprise (p. 544)
- TV Production & Media Management (p. 546)
- Theatre (p. 546)
- Video Production (p. 509)

Certificates

- Dance Studies (p. 547)

Undergraduate Co-operative Education

Co-op is an essential component in defining the "Drexel Difference" in the Antoinette Westphal College of Media Arts & Design. Westphal College students spend a minimum of six months (two terms) applying classroom and studio skills in positions within their chosen professions. Often referred to as "The Ultimate Internship," a co-op is a valuable, direct way to learn about a career, work with other professionals, and gain skills and experience that set Drexel graduates apart from students who complete their professional education in more traditional academic settings.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Special Programs

The Westphal College offers a number of special programs including Study Abroad, Accelerated Dual Degree, Accelerated Summer Courses, Enrichment Programs and Dance for Professionals.

Study Abroad

Many students in the College participate in study abroad ranging from ten days to two terms. Some of the more popular programs are: Drexel in London, Fashion in London, Australia, Rome, France and Prague.

Students interested in study abroad should consult with their Program Director, Academic Advisor and the Study Abroad Office, 215-895-1704.
Enrichment Programs

The Department of Architecture & Interiors runs summer study tours abroad to Rome and Paris as elective course offerings in history and theory. These programs focus the travel portion into three-week periods to accommodate student work commitments.

Accelerated Dual Degree Programs

Dual degree programs enable academically qualified students to earn both a bachelor's and an advanced degree in five years.

The following Accelerated Degree Programs are available to qualified High School students entering their freshman year in the Westphal College:

- **BS Music Industry/MBA**: This program offers the highly motivated and musically focused student an opportunity to combine music theory and technology with the MBA degree. The program is available to qualified Music Industry majors.
- **BS Entertainment & Arts Management/MBA**: This program allows high-achieving students preparing for leadership roles in media companies and arts organizations the opportunity to earn their MBA degree. The program is available to qualified Entertainment & Arts management majors.
- **BS in Design & Merchandising/MBA**: This program combines study in the area of fashion retail merchandising with the MBA degree. The program is available to qualified Design and Merchandising majors.

The following Accelerated Degree Programs are available to qualified matriculated students in the Westphal College:

- **BA Art History/MS in Arts Administration**: This five-year program is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading and writing. Specialized University resources, such as the Leonard Pearlstein Gallery (http://www.drexel.edu/pearlsteingallery), the Drexel Collection (http://drexel.edu/DrexelCollection/about/galleries), and the Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) are available to directly support the student’s studies.
- **BA Art History/MS in Museum Leadership**: This five-year program is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading and writing, or gain competencies in various applied or technical areas. Specialized University resources, such as the Leonard Pearlstein Gallery (http://www.drexel.edu/pearlsteingallery), the Drexel Collection (http://drexel.edu/DrexelCollection), The Academy of Natural Sciences of Drexel University (http://www.ansp.org/visit/exhibits), and the Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) are available to students wishing to pursue careers in Museum work.
- **BS/MS in Digital Media Programs**: This program allows highly motivated students to complete both the BS (Animation & Visual Effects, Game Design & Production, Interactive Digital Media) and MS degrees in Digital Media programs in five years.
- **BS Interior Design/MS in Interior Architecture & Design**: This program combines the Interior Design undergraduate and the graduate Interior Architecture & Design degrees in an intensive five-year program that provides an opportunity for the student to focus on an area of specialization.
- **BS Dance/MS in Elementary Education**: This career focus, dance in education, prepares students for jobs as elementary school teachers (grades Pre-Kindergarten through 4) who may also serve as school dance specialists. Students choosing this option will earn a BS degree in Dance through the Department of Performing Arts and may elect to continue for a fifth year of study to earn an MS in the Teaching, Learning and Curriculum-Teacher Certification through the School of Education.
- **BS Entertainment & Arts Management/MS in Arts Administration**: While not an accelerated program, students who complete the EAM program may also choose to pursue a graduate degree at Drexel in Arts Administration. Students who apply for the graduate Arts Administration program and graduate with a 3.5 GPA in the last two years of the EAM degree program are automatically accepted into the program.

Accelerated Summer Courses

With departmental permission, students may enroll in Visual Studies accelerated courses over the summer. These typically include courses in Accelerated Design I, II, III, Introductory Drawing and Figure Drawing I. These courses primarily are offered so that new undergraduate transfer students and pre-graduate students can complete their future programs in an economical time frame. Students with some experience in studio coursework may be eligible to take accelerated courses. A portfolio review is required to determine eligibility.

Dance Part Time Professionals

The Part Time Professional Option of the Dance Major is designed for professional dancers interested in pursuing a BS degree in Dance while continuing their performance careers, or at the conclusion of their performing careers. This program grants "professional life experience" credits and an extended period of time to fulfill the remaining required courses.

Ensembles

Choral Ensembles

University Chorus (MUSC 101/001) Dr. Steven Powell, Director
As auditioned, 60-voice group which performs concert choir literature, both a cappella and with instrumental accompaniment.

Chamber Singers (MUSC 102/001) Dr. Steven Powell, Director
A select group of 18 singers chosen by audition from the University Chorus. They perform secular music from the Renaissance period (Madrigals).

Vocal Jazz Ensemble (MUSC 103/001) Dr. Steven Powell, Director
A select group of 16 singers chosen by audition from the University Chorus. They perform "anything that swings," doing a variety of pieces from the 20's to the 10's with a three-piece back-up band.

All College Choir (MUSC 104/001) Scott Bacon, Director
A large un-auditioned choir that performs a varied repertoire including light classics, spirituals, and popular music.

Gospel Choir (MUSC 115/001) Rev. Greg Ross, Director
The Gospel Choir is a group of approximately 60 singers that is open to all Drexel Students. This ensemble performs contemporary gospel music with its own backup band.
Instrumental Ensembles

Concert Band (MUSC 105/001) Dr. Wesley Broadnax, Director
Students who are proficient on woodwind, brass, or percussion instruments may become members of this large instrumental ensemble by auditioning for the director. Membership is based on the student's ability and the instrumental needs of the ensemble.

The Basketball Pep Band (MUSC 116/001) Dr. Wesley Broadnax, Director
This band is made up of brass players, saxophone players, and trap drummers drawn from the membership of the Concert Band.

Jazz Orchestra (MUSC 107/001) Dr. George Starks, Director
Performs music which is associated with and/or inspired by acknowledged masters of the jazz tradition such as Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Miles Davis, Charles Mingus, Thad Jones, and others.

University Orchestra (MUSC 109/001)
This is a full orchestra that performs concert repertoire of various periods from the 18th century to the present day. Wind, brass, and percussionists must be in the Concert Band in order to participate.

Fusion Band (MUSC 112/001) Lynn Riley, Director
A small combo utilizing a rhythm section and any varying combination of saxes and brass. The repertoire includes music of the styles of jazz, Latin, funk, and rock.

Percussion Ensemble (MUSC 113/001) Mark Beecher, Director
Students in this group will have the opportunity to play, improve and perform on many instruments of the percussion family including: snare drum, bass drum, xylophone, marimba, timpani- and even hands and feet.

Meditteranean Ensemble (MUSC 114/001) Bruce Kaminsky, Director
Students perform traditional music from Southeastern Europe, the Middle East and Northern Africa. All traditional and Western instruments are welcomed including oud, bouzouki and saz along with guitar, violin and sax. Percussionists can play Drexel's wide assortment of traditional drums including doumbeik, riq and djembe. Students will have the opportunity to perform 7/8 and 9/8 rhythms from Greece, 10/8 rhythms from Turkey, learn songs in Greek, Turkish, Arabic and Hebrew. The ensemble also has a dance component.

Guitar Ensemble II (MUSC 106/002) Greg Wright, Director
An auditioned group of approximately ten guitarists plus bass players and a drummer. Repertoire includes a wide range of styles utilizing music reading ability and improvisation skills.

Guitar Ensemble I (MUSC 106/001) Greg Wright, Director
An un-auditioned group of ten to fifteen guitarists who use repertoire to sharpen their musical and technical skills.

Keyboard Ensemble (MUSC 110) Wanda Canfield, Director
A group of twelve keyboardists who utilize acoustic and electronic pianos to play a variety of repertoire.

Rock Ensemble (MUSC 117) Lynn Riley, Director
A small combo of vocalists, guitarists, bassists, keyboardist, and drummers who perform repertoire ranging from classic rock to alternative.

Drexel University Dance Program

Dr. Miriam Giguere, Director, Dance Ensemble (DANC 131)
Elegant, exciting, sophisticated, sleek are all words commonly used to describe the Drexel Dance Ensemble. Performing ballet, jazz, tap and modern dance, the Drexel Dancers are both versatile and original.

The Drexel Dance Ensemble (DANC 131)
A professional caliber dance company presenting two fully-produced concerts in the Mandell Theater each year. Students participating in the 60 member ensemble are given the opportunity to explore their artistry through working with professional choreographers, both faculty and guests artists, as well as a selection of student choreographers. The diversity of choreographic talent promises a show with dimension and unique perspectives on contemporary and classical dance forms. Entrance into this company is open to any dancers beyond their freshman year by audition twice yearly.

The FreshDance Ensemble (DANC 131)
Dance company open exclusively to freshmen at Drexel. The 30 dancers in the ensemble perform two fully produced concerts at the Mandell Theater each year. Works by both professional and student choreographers are performed in a variety of genres including ballet, modern, jazz and hip-hop. Entrance into the company is open twice yearly by audition.

The Youth Performance Exchange Touring Ensemble (DANC 131)
This 8-10 member dance troupe performs assembly style lecture demonstration programs introducing student K-8 to the art of dance. Students learn the program each fall and perform for 15-20 elementary and middle school each Friday morning in winter and spring terms. Open by audition each fall term.

Drexel University Theatre Program

Mr. Nick Anselmo, Director of Theatre Programs

Introduction to Theater Production Practicum (THTR 130)
An introduction to the tools, basic skills and safety procedures that students must know in order to work on Theater Program shows.

Theatre Performance Practicum (THTR 131)
Students perform in Mainstage productions in the URBN Annex Black Box Theater or the Mandell Theater. An audition is required to participate in this ensemble.

Theatre Production Practicum (THTR 132)
Students serve as the stage crew for all theatrical productions at the URBN Annex Black Box Theater or the Mandell Theater and build all the sets, costumes, hang lights and run sound for all the shows.

Theatre Management Practicum (THTR 133)
Students work as stage managers, production managers, and in administrative positions of Drexel's Co-op Theater Company.

Open Mic Management Practicum (THTR 134)
Students manage and run all aspects of The Late Night Series, a free weekly open mic that strives to both champion and nurture performing artists with Philadelphia and the Drexel community.

Theatre Performance Ensemble (THTR 141)
The Theatre Performance Ensemble focuses on a specific area of performance training, creation, and research to supplement the standard theatre curriculum in performance.

Director's Lab Practicum (THTR 142)
Practical experience in acting for the stage through participation in a student directed one-act play in conjunction with the Play Directing Class. An audition is required to participate in this ensemble.

Musical Theatre Cabaret (THTR 143)
Practical experience preparing a song for performance with an emphasis on applying acting techniques to the delivery, it concludes with a public Cabaret performance.

New Works Festival Performance Practicum (THTR 144)
Practical experience in acting and dramaturgy for the stage through participation, development, and performance of student written plays in conjunction with the Page-to-Stage class.

Students participate in all aspects of theatre performance and production, including; acting, directing, design, costumes, lighting, sets, sound, publicity, and box office.

Facilities
Designed to be an incubator for tomorrow’s creative leaders, The URBN Center is the award-winning home for many of the programs in the Antoinette Westphal College of Media Arts & Design, providing students with rigorous, studio intensive instruction with the latest technological resources. Majors that share this space include Animation & Visual Effects, Architecture, Design & Merchandising, Entertainment & Arts Management, Fashion Design, Game Design & Production, Graphic Design, Interactive Digital Media, Interior Design, Music Industry and Product Design.

The URBN Center also provides a black box theater (http://drexel.edu/performingarts/about/facilities/URBN-center-black-box-theater) for our Theatre program, a 3,500 square foot Leonard Pearstein Gallery (http://www.drexel.edu/pearsteingallery), two MIDI labs (http://drexel.edu/westphal/academics/undergraduate/MIP/Facilities) and MAD Dragon Records Suite, a Motion Capture studio, a Hybrid Making Lab featuring Universal Laser Cutters and 3D printing and prototyping, the Robert and Penny Fox (http://www.drexel.edu/foxcollection) Historic Costume Collection (http://www.drexel.edu/foxcollection), the Charles Evans Fashion Design Library, a multi-use screening & lecture room, and offices for the College’s administrative functions.

The Paul Peck Problem Solving & Research Building is home to our Photography major and Department of Art & Art History. Within this facility, the Westphal College occupies a 10,000- square-foot photography lab, lighting studios, two digital imaging labs, as well as six lecture/ laboratory spaces for our Visual Studies courses.

In University Crossings, a 25,000 square foot space houses offices for Film & Video, Screenwriting & Playwriting and Television faculty. Also in this building are two state-of-the-art digital editing facilities, a shooting studio with special effects capability, two screening rooms, a digital audio post production studio, several multi-media classrooms, and a well-stocked equipment room.

MacAlister Hall serves students in the Westphal College with: digital audio labs and recording studios for Music Industry; The Mandell Theater (http://www.drexel.edu/performingarts/about/facilities/mandell-theater), a 420-seat proscenium theater with scene shop and dressing rooms; the Ellen Forman Memorial Dance Studio (http://drexel.edu/performingarts/about/facilities/ellen-forman-dance-studio); and a high-definition studio space for our college-operated television station, DUTV, which reaches over 400,000 households.

Animation and Visual Effects

Major: Animation and Visual Effects
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 10.0304
Standard Occupational Classification (SOC) code: 27-1014

About the Program
The Animation & Visual Effects major provides students with the artistic, technological, story-telling and design skills to succeed as animators and visual effects artists in the highly competitive entertainment, design and communications industries.

Animation and Visual Effects has grown beyond its traditional applications in entertainment, such as feature films, television and internet based programming. Today, these production techniques are widely used in feature films, medical research, engineering, virtual reality and augmented reality systems, immersive media, web content, the performing arts, interactive game systems, corporate communications and higher education. The depth and complexity of this field necessitates a rigorous course of study.

To best prepare students for the demands of careers in these cutting-edge disciplines, this program provides a foundational understanding of design and technology, with core courses in multiple aspects of digital media, completing a six month co-op and delving into rigorous coursework covering specialized aspects of digital animation, visual effects and immersive media. Students will learn the underlying principles of animation, along with advanced, industry-standard software and hardware technologies. The entire creative pipeline from storyboarding through modeling and animation is covered in depth, allowing students to experience all aspects of production.

Additional Information
To find out more about this major, visit the Westphal College’s Animation & Visual Effects Major (http://www.drexel.edu/westphal/academics/undergraduate/ANIM) web page.

- **DIGM 250**: Professional Practices, 3.0
- **DIGM 350 [WI]**: Digital Storytelling, 3.0
- **DIGM 451 [WI]**: Explorations in New Media, 3.0
- **DIGM 475 [WI]**: Seminar: The Future of Digital Media, 3.0
- **DIGM 490**: Digital Media Senior Project, 9.0
- **GMAP 260**: Overview of Digital Media, 3.0
- **ANIM 231**: Scripting for Animation and Visual Effects, 3.0
- **ANIM 140**: Computer Graphics Imagery I, 3.0
- **ANIM 141**: Computer Graphics Imagery II, 3.0
- **ANIM 152**: Multimedia Timeline Design, 3.0
- **ANIM 211**: Animation I, 3.0

### Animation Electives
Select two of the following:
- **ANIM 248**: Advanced Lighting, 6.0
- **ANIM 315**: Character Animation II, 3.0
- **ANIM 321**: Immersive Animation, 3.0
- **ANIM 388**: Spatial Data Capture, 3.0
- **ANIM 410**: Advanced Compositing, 3.0
- **ANIM 411**: Advanced Animation, 3.0

### Total Credits
186.0

### Course Descriptions
- **ANIM 410**: Computer Graphics Imagery I, 3.0
- **ANIM 102**: Computer Graphics Imagery II, 3.0
- **FMVD 110**: Basic Shooting and Lighting, 3.0
- **PHYS 122**: Physical Science for Design II, 4.0
- **UNIV A101**: The Drexel Experience, 1.0
- **ENGL 102**: Composition and Rhetoric I: Inquiry and Exploratory Research, 3.0
- **GMAP 260**: Overview of Computer Gaming, 3.0
- **DIGM 350 [WI]**: Digital Storytelling, 3.0
- **FMVD 206**: Audio Production and Post, 3.0
- **ANIM 211**: Animation I, 3.0
- **ANIM 215**: History of Animation, 3.0
- **ANIM 220**: Digital Compositing I, 3.0
- **ANIM 221**: Digital Compositing II, 3.0
- **ANIM 247**: Organic Modeling, 3.0
- **ANIM 314**: Character Animation I, 3.0
- **ANIM 248**: Advanced Lighting, 3.0
- **ANIM 315**: Character Animation II, 3.0
- **ANIM 321**: Immersive Animation, 3.0
- **ANIM 388**: Spatial Data Capture, 3.0
- **ANIM 410**: Advanced Compositing, 3.0
- **ANIM 411**: Advanced Animation, 3.0
- **ANIM 231**: Scripting for Animation and Visual Effects, 3.0
- **ANIM 314**: Character Animation I, 3.0
- **ANIM 388**: Spatial Data Capture, 3.0
- **FMVD 206**: Audio Production and Post, 3.0
- **ANIM 212**: Animation II, 3.0
- **ANIM 215**: History of Animation, 3.0
- **ANIM 220**: Digital Compositing I, 3.0
- **ANIM 221**: Digital Compositing II, 3.0
- **ANIM 247**: Organic Modeling, 3.0
- **ANIM 314**: Character Animation I, 3.0
- **ANIM 411**: Advanced Animation, 3.0
- **ENGL 102**: Composition and Rhetoric I: Inquiry and Exploratory Research, 3.0
- **FMVD 110**: Basic Shooting and Lighting, 3.0
- **PHYS 122**: Physical Science for Design II, 4.0
- **VSST 108**: Design I for Media, 3.0
- **UNIV A101**: The Drexel Experience, 1.0

### Term Credits
- **Term 1**: 15.0
- **Term 2**: 15.0
- **Term 3**: 15.0
- **Term 4**: 17.0
- **Term 5**: 15.0
- **Term 6**: 15.0
- **Term 7**: 15.0
- **Term 8**: 15.0
- **Term 9**: 15.0
- **Term 10**: 15.0
Minor in Animation and Visual Effects

The Animation and Visual Effects Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundation in the technological, story-telling and design skills used by animators and visual effects artists in the highly competitive entertainment and design worlds, with the opportunity for individualized tailoring according to the student's interests.

Facilities

Our facilities include more than 100 triple-boot MacPro and Boxx Technology workstations, a 16 camera Vicon motion capture studio, green screen room, a 2-ton motion platform theme park ride, FTIR multitouch displays, laser scanner, stereoscopic projector, eye tracker, fNIR and EEG brain interfaces, and 3D theater, recording studios, etc. Students use professional software including Unreal, Unity3D, Maya, 3D Studio Max, Houdini, Massive, etc.

More information can be found at Drexel RePlay Lab's Facilities (http://replay.drexel.edu/facilities.html) page.

Animation and Visual Effects Faculty

Theo Artz, BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

John Berton Assistant Professor. Visual effects, lighting and rendering Computer-Generated Imagery (CGI)

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Nick Jushchyshyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects. Assistant Teaching Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (Carnegie Mellon University). Associate Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Temple University). Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (Vienna University of Technology) Program Director, Digital Media. Associate Professor. Educational use of digital media and computer games.

Jichen Zhu, PhD (Georgia Institute of Technology). Assistant Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.
Architecture

Major: Architecture
Degree Awarded: Bachelor of Architecture Degree (BArch)
Calendar Type: Quarter
Total Credit Hours: 227.0
Classification of Instructional Programs (CIP) code: 04.0201
Standard Occupational Classification (SOC) code: 17-1011

About the Program

The practice of architecture requires a unique skill set—creative thinking and aesthetic sensitivity balanced with technical knowledge, cultural understanding, and social responsibility. Critical thinking and communication skills are needed. Drexel's Bachelor of Architecture program encompasses foundation courses in the applied and social sciences, the humanities, and a wide range of professional architecture courses to prepare students for careers in architecture and related fields. At the heart of the curriculum are the design studios where students are challenged to apply their knowledge acquired from the above disciplines to consequential design problems.

Drexel's work/study program is an experiential-based learning model that complements and provides an alternative to traditional full-time academic architecture programs. The Drexel model provides a practical, high-quality education to those students who seek early exposure to daily architectural practice as well as an affordable alternative to students who could not otherwise be able to enter the profession.

At Drexel there are two paths to an accredited Bachelor of Architecture degree, serving two distinct populations: the 2+4 option and the part-time evening option.

The Architecture Program's advising guidelines (http://www.drexel.edu/westphal/undergraduate/ARCH/Curriculum/#c3) include scheduling guidelines, studio advancement requirements, and general studio policies.

Accreditation

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (http://www.naab.org) (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Drexel University, Antoinette Westphal College of Media Arts & Design, Department of Architecture + Interiors offers the following NAAB-accredited degree program(s):

- **2+4 Option:** 6 year program (2 years full-time, 4 years part-time)
  - Bachelor of Architecture
  - 227.0 undergraduate quarter-term credits

- **Part-Time Evening Option:** 7 year part-time program
  - Bachelor of Architecture
  - 227.0 undergraduate quarter-term credits

Next accreditation visit for both tracks: 2018

About the 2+4 Option

The 2+4 option is an accelerated route designed for a small class of well-prepared students entering directly from high school. In this program, two years of full-time coursework address the basic principles of architectural design and satisfy fundamental University core requirements in the arts and sciences as well as those job-related skills that are needed for entry-level professional positions. A comprehensive review of performance will take place after each year to ensure that students are making sufficient progress in all areas. After successfully completing the minimum requirements of the full-time phase, students find full-time employment in the building industry, including architecture firms, while continuing their academic program part-time in the evening for four additional years.

About the Part-time Evening Program

The part-time evening option is one of only two part-time evening architectural programs in the United States, leading to an accredited Bachelor of Architecture degree. Designed for non-traditional and transfer students, this program offers all courses part-time in the evening, enabling students to work full-time. The evening program sequence is seven years, but transfer students with university-level design credits can reduce its length by meeting specific program requirements through transcript and portfolio review.

By combining work and study, all Drexel Architecture students may be able to simultaneously satisfy their required internship for licensure, now called the Architectural Experience Program (AXP) while completing their professional degree, thus qualifying for the registration exam on graduation in most jurisdictions.

Additional Information

For more information, visit the Architecture Program (http://www.drexel.edu/westphal/academics/undergraduate/ARCH) website. For advising and transfer information please review the Architecture Program's curriculum (http://www.drexel.edu/westphal/academics/undergraduate/ARCH/Curriculum) page.

In August of 2015, Drexel was approved by the National Council of Architectural Registration Boards (NCARB) (http://www.ncarb.org) for participation in the Integrated Path to Architectural Licensure (IPAL) (http://www.ncarb.org/Studying-Architecture/Overview-Of-Architectural-Education/Integrated-Path-to-Architectural-Licensure.aspx) Program. Students seeking access to this track will be reviewed by the Program Director and Faculty starting in the Spring of 2017.

Note: Architecture vs Architectural Engineering

Because Drexel University offers two programs with "architecture" in their titles, it is useful to point out the significant differences between them:

- **Architects** design buildings to meet people’s spatial, organizational, and aesthetic needs; they also coordinate the building design process. All states, the District of Columbia, and three U.S. territories (Guam, Puerto Rico, and the U.S. Virgin Islands) require individuals to be licensed (registered) before they may call themselves architects or contract to provide architectural services. Many architecture school graduates work in the field even though they are not licensed or while
they are in the process of becoming licensed. But they may not call themselves an architect.
A licensed architect is required to take legal responsibility for all work. Licensure requirements usually include:

- A professional degree in architecture;
- A period of practical training or internship; and
- Passage of all divisions of the Architect Registration Examination (ARE).

- **Architectural engineers** specialize in the design of engineering systems within buildings. Architectural engineers earn Bachelor of Science degrees and become professional engineers with the required experience and state examinations. Students whose interests are focused on the technological and engineering aspects of buildings should review Drexel’s major in Architectural Engineering ([http://catalog.drexel.edu/undergraduate/collegeofengineering/architecturalengineering](http://catalog.drexel.edu/undergraduate/collegeofengineering/architecturalengineering)) offered by the College of Engineering.

**Opportunities**

Drexel's work/study program is an experiential-based learning model that complements and provides an alternative to traditional full-time academic architecture programs. The Drexel model provides a practical, high-quality education to those students who seek early exposure to daily architectural practice as well as an affordable alternative to students who could not otherwise be able to enter the profession.

Ordinarily, Drexel's architecture graduates continue working for the firms that employed them during the work-study phase of their studies. In time, some architects reach positions of associate or partner in these offices, while others choose to launch their own firms. Urban design, historic preservation, interior design, and facilities management are some of
the related careers that architectural graduates also pursue with similar patterns of success.

Drexel is located in University City, a Philadelphia neighborhood that includes several centers of education and research. Philadelphia itself offers an unparalleled collection of landmark architecture and urban planning that spans 300 years of development. The region has always been home to architectural firms of national and international prominence. A rich and varied environment combined with an accomplished and supportive professional community make Philadelphia an ideal laboratory for the study of architecture. All of the faculty in the program are active in the Philadelphia architecture community, many in leadership positions at firms.

Students seeking support for resume and portfolio development may schedule an appointment with the Program Director by contacting the Architecture Program. Job listings exclusively for Drexel Architecture students can be found on the Architecture Opportunities site. Firms seeking Drexel interns may contact students directly by finding the Philadelphia architecture community, many in leadership positions at firms.

Minor in Architecture

A minor in architecture gives students majoring in other disciplines an opportunity to explore architecture through a coherent sequence of coursework. The minor in architecture can also be used for preparation towards professional graduate study in this field. Interested students should consult the Architecture Program Director for course selection and scheduling.

The minor requires design studio courses, courses in architectural history, and architectural elective courses. No more than 9.0 credits from a student's major can be used to fulfill the minor requirements.

- ARCH 115 Architecture Studio 1B
- ARCH 116 Architecture Studio 1C
- ARCH 231 Studio 3-1
- ARCH 232 Architecture Studio 3A
- ARCH 233 Architecture Studio 3B

Total Credits: 25.0-27.0

** Students who have successfully completed INTR 233 should enter the studio sequence at the second-year level (ARCH 183). Students who have successfully completed ARCH 192 should start the studio sequence with (ARCH 181).

*** Students without Design background will be required to take the following studios: ARCH 107, ARCH 108, ARCH 109 and ARCH 181

Facilities

The Department's offices, studios and teaching facilities are located on floors 3, 3A, 4 and 4A of the URBN Center at 3501 Market Street. The Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) on the first floor is open to all Westphal students and has state-of-the-art fabricating equipment, accessible to students after required training. The Westphal Print Center (http://www.drexel.edu/westphal/about/overview/making_spaces/WestphalPrintCenter) is a full-service, low-cost facility located on 3A and is accessible to students from on and off campus. A full wood working shop is located in the Visual Studies Arts Annex at 3220 Cherry Street.

Architecture & Interiors Faculty

David Ade, AIA, LEED A.P., NCARB, BArch (Drexel University). Adjunct Associate Professor. Principal, SMP Architects, sustainable design

Ulrike Altenmuller-Lewis, AIA, Dr.-Ing. (Bauhaus Universitat Weimar). Associate Professor. Research on educational environments; translations of architectural theory texts.

Jason Austin, LEED A.P., MLA Landscape Architecture (University of Pennsylvania). Assistant Teaching Professor. Principal, Austin + Mergold; architecture, research, landscape architecture, urban design.

Stephen Bonitatibus, AIA, MArch (University of Pennsylvania). Adjunct Professor. Principal, Bonitatibus Associates; traditional residential architecture.

Anthony Bracali, AIA, LEED A.P., BArch (Drexel University). Adjunct Associate Professor. President, Friday Architects; civic, non-profit and community-based architecture.

Mark Brack, PhD (University of California at Berkeley). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Daniel Chung, RA, PE, MArch, MSE (Yale University, Princeton University). Assistant Professor. Building performance and exterior envelope systems.

Jon Coddington, AIA, MArch (University of Pennsylvania). Professor. Architecture, urban design and planning.

Rena Cumby, BArch, MS (Drexel University) Department Head, Department of Architecture & Interiors. Associate Professor. Interior designer; foundation studies and design education.

John DeFazio, AIA, BArch (New York Institute of Technology). Adjunct Professor. Architecture in film.

Katherine Dowdell, AIA, BS Interior Design (Drexel University). Adjunct Assistant Professor. Principal, Farragut Street Architects; historic preservation.
Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Dyer Alfred "Lyndsay" Falck, RA, ARCUK, ARIBA, NCARB, M.URP (University of Capetown, South Africa). Adjunct Professor. Building technology

Jeff Fama, MArch (State University of New York at Buffalo). Adjunct Associate Professor. Retail, entertainment, and theater design.

Susan Feenan, BArch (Temple University). Adjunct Assistant Teaching Professor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (Pennsylvania State University). Adjunct Assistant Professor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Don Jones, FAIA, LEED DD+C, MArch (University of Pennsylvania). Adjunct Professor. Principal, Director of Sustainable Design, Ewing Cole; sports venues.

Tim Kearney, AIA, MArch (University of Pennsylvania). Adjunct Professor. Principal, CuetoKEARNEY design; sustainable design

Nicole Kollock, MArch (University of California) Director, Design Futures Lab. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Jeffrey Krieger, AIA, LEED AP, MArch (Carnegie Mellon University). Adjunct Associate Professor. President, Krieger and Associates Architects; residential design.

Karin Kuenstler, MS (Bank Street College of Education and Parsons) Associate Dean for Research and Graduate Studies. Associate Professor. Interior design for corporate and commercial facilities.

Maria Kuttruff, MS (Drexel University). Adjunct Assistant Professor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

Robert Nalls, AIA, NCARB, MArch (University of Pennsylvania). Adjunct Professor. Principal, Nalls Architecture Inc.; institutional and educational buildings.

Diana S. Nicholas, RA, AIA, NCARB, MFA (University of the Arts, Philadelphia) Associate Director of MS Interior Architecture and Design, Director, Sustainability in the Built Environment minor. Assistant Professor. Coordinator, Sustainability in the Built Environment

Jacklynn Niemiec, LEED BD+C, MArch (University of Pennsylvania). Assistant Teaching Professor. Graphic representation

Karen Pelzer, NCIDQ, BS Interior Design (Drexel University). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Marilynne L. Rose, NCIDQ, MS (Drexel University). Associate Teaching Professor. Residential and commercial design.

James Rowe, AIA, MArch (University of Pennsylvania). Adjunct Associate Professor. Principal, Studio Agoos Lovera; institutional, recreation, corporate, civic and residential design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ (Drexel University) Director of Interiors Programs. Associate Professor. Research on user participation and the design process.

Paul Salvaggin, AIA, LEED AP, NCARB, BArch, BS Arch (Pennsylvania State University). Adjunct Assistant Professor. Principal, Arcus Design Group; residential architecture.

Rachel Schade, AIA, MArch (University of Pennsylvania) Program, Architecture, Associate Director for Student Placement. Associate Teaching Professor. Principal, Rachel Simmons Schade Architect. Work-study placement; residential, graphic representation.

Harris Steinberg, FAIA, MArch (University of Pennsylvania) Executive Director, Lindy Institute for Urban Innovation. Distinguished Teaching Professor. Urban design and civic engagement.

Simon Tickell, AIA, MArch (University of Pennsylvania). Associate Teaching Professor. Principal, Simon J Tickell Architect; educational and museum buildings, residential design

Nancy Trainer, FAIA, AICP, LEED, AFAAR, MArch (University of Pennsylvania) Associate Vice President of Design & Planning at Drexel. Adjunct Teaching Professor. Planning, institutional design.

Ada Tremonte, NCIDQ, BS (Drexel University) Associate Director, BS Interior Design. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

Emeritus Faculty

Judith Bing, MArch (Yale University). Professor Emeritus. Research on traditional architecture of the Balkins and Anatolia

Sylvia Clark, MArch (University of Pennsylvania). Professor Emeritus.

Paul M. Hirshorn, FAIA, MArch, MCP, (University of Pennsylvania). Professor Emeritus.

Marjorie Kriebel, BArch (University of Pennsylvania). Professor Emeritus.

Art History

Major: Art History
Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0-184.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0701
Standard Occupational Classification (SOC) code: 25-4011; 25-4012; 25-4013

About the Program

The history of art explores the meanings, values, and purposes of the visual arts within the historical cultures that create them. Works of fine and applied arts are understood not merely as aesthetic forms, but as expressions of the social, economic, scientific, religious, and political contexts that gave rise to them. The study of art history thus effectively serves the high purposes of a liberal education by equipping students with an understanding of world cultures and their histories from multiple disciplinary perspectives, and by encouraging the development of critical thinking, reading, and writing skills.
The art history program has a uniquely flexible curricular design in that it permits students to pursue art history as either a Bachelor of Arts or a Bachelor of Science degree. The BA degree is intended for students wishing to become professional art historians or who wish to supplement the art history curriculum with other courses leading to a specific career path. The BS degree is designed to allow students to combine the art history major with another major or to tailor the curriculum to their specific interests and aspirations. Both the BA and BS degrees require a total of 180.0-184.0 credit hours.

Another feature of the this program is that it offers two accelerated, five-year degree tracks leading to MS degrees in either Museum Leadership or Arts Administration.

**Bachelor of Arts**

The BA degree requires 60.0 credit hours of art history, 71.0-75.0 credit hours of General Education courses, and 49.0 credit hours of Free Electives. The BA degree requires a strong component of Arts and Humanities courses in order to prepare students to enter the professional world of art historians by exposing them to critical reasoning, philosophy, anthropology, literature, world cultures, and foreign languages. The 49.0 credit hours of Free Electives can be used under faculty advisement to take additional art history courses, develop special competencies and areas of interest (e.g., race and gender studies; the histories of technology, science and philosophy; Asian or Africana studies; writing, literature, and criticism; design history; museum studies, etc.), or gain competencies in various applied or technical areas. This BA program requires two 3-month co-ops.

**Bachelor of Science**

The BS degree also requires 60.0 credit hours of art history, but it only requires 35.0-39.0 credit hours of General Education courses, thereby freeing up 85.0 credit hours of coursework to accommodate another major or to design a personalized curriculum. The 85.0 credit hours of free electives provided by the BS degree permits the student to simultaneously pursue a second major, one or more minors, or simply explore the life of the mind by taking courses, with faculty advisement, in diverse fields. This program does not require a co-op taken in addition to that which is required by the second major.

### Total Credit: 180.0-184.0

### Minor in Art History

The minor in art history provides a broad humanistic background not only for students planning to attend graduate and professional schools in the fields of applied, media and design arts, social and information sciences, education, business and medicine, but also for those entering a more general job market. The minor is designed to be flexible enough to appeal both to Antoinette Westphal College of Media Arts and Design majors and majors from the other colleges.

#### Required Courses

- ARTH 101 History of Art I: Ancient to Medieval 3.0
- ARTH 102 History of Art II: Renaissance to Romanticism 3.0
- ARTH 103 History of Art: Modern Art 3.0
- Select five of the following: * 15.0
  - Art History
    - ARTH 300 [WI] History of Modern Design
    - ARTH 301 Asian Art and Culture
    - ARTH 302 Art of India
    - ARTH 303 Art of China
    - ARTH 304 Art of Japan
    - ARTH 320 Art in the Age of Technology
    - ARTH 335 [WI] History of Costume I: Preclassical to Directoire
    - ARTH 336 [WI] History of Costume II: Directoire to World War I
    - ARTH 337 History of Costume: Post World War I to Present
    - ARTH 340 Women in Art
    - ARTH 399 Independent Study In Art His
    - ARTH 465 [WI] Special Topics in Art History
    - ARTH 477 Art History Seminar
  - History of Architecture
    - ARCH 141 Architecture and Society I
    - ARCH 142 Architecture and Society II
    - ARCH 143 Architecture and Society III
    - ARCH 341 [WI] Theories of Architecture I
    - ARCH 342 [WI] Theories of Architecture II
    - ARCH 343 Theories of Architecture III
    - ARCH 344 History of Modern Architecture I [WI]
    - ARCH 345 History of Modern Architecture II [WI]
    - ARCH 346 History of Philadelphia Architecture [WI]
    - ARCH 347 Architectural Study Tour
Art History BA / Arts Administration MS

This five-year, accelerated degree program leading to a Master of Science in Arts Administration, is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading, and writing. The MS in Arts Administration prepares students for careers in the administration of museums and the performing arts.

Specialized University resources, such as the Pearlstein Gallery, the Drexel Museum, and the Historic Costume Collection, are available to directly support student's studies.

Dual/Accelerated Degree

Art History BA/ Museum Leadership MS

This five-year, accelerated degree program leading to a Master of Science in Museum Leadership, is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world's museums and their practices. The degree prepares students for the opportunities and challenges of the evolving museum landscape. The innovative curriculum embraces planning and design, governance, financial management and resource development for museums. Graduates of this program
gain employment in museum marketing, development, education and administration.

Specialized University resources, such as the Pearlstein Gallery, the Drexel Museum, and the Historic Costume Collection, are available to students wishing to pursue careers in Museum work.

Co-op/Career Opportunities

Co-op Opportunities

Drexel's enviable geographical location in the northeast corridor of the United States provides a distinct advantage for an art history program because of the proximity of many important Museums, galleries, and auction houses. The Philadelphia Museum of Art, Pennsylvania Academy of Fine Arts, Barnes Foundation, Rodin Museum, Institute of Contemporary Art, and the Penn Museum of Archeology and Anthropology are all local and easily accessible. The Winterthur Museum, New Museum, Guggenheim, Metropolitan Museum of Art, Sotheby's, and Christie's, are all within a reasonable distance by train, bus, or car. These institutions will offer students an abundance of opportunities for first-hand study of the histories of art, architecture, and design. Proximity to these institutions can also provide for many choice opportunities for cooperative education experiences.

Some possibilities include:

- Barnes Foundation
- Philadelphia Museum of Art
- Pennsylvania Academy of Fine Arts
- American Philosophical Society
- Moderne Gallery (Old City)
- Calderwood Gallery (Center City)
- RagoArts Auction House, Lambertville, NJ
- Twelve Gates Gallery for Contemporary South Asian Art
- Newark Museum, NJ
- Metropolitan Museum of Art
- Brooklyn Museum
- Mural Arts Program
- Asia Society NY
- Christie's NY

Career Opportunities

A major in art history can prepare students for a wide variety of careers, as well as preparation for graduate school.

Possible career paths:

- Museum Administrator
- Gallery Director
- Curator
- Museum Registrar
- Museum Educator
- Art Consultant
- Art Librarian
- Editor
- Art Law
- Artist Representative
Non-profit and governmental organizations

As a particularly broad humanities discipline, art history serves as an outstanding pre-professional degree, providing excellent preparation for a wide variety of professions, such as law, medicine, education and library science.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdcc) page for more detailed information on co-op and post-graduate opportunities.

Art History Faculty

Jennifer Blazina, MFA (Cranbrook Academy of Art, Bloomfield Hills, MI). Associate Professor. Coordinator of printmaking, fine arts.

Mark Brack, PhD (University of California at Berkeley). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Pia Brancaccio, PhD (Istituto Universitario Orientale, Naples, Italy) Art History Program Co-Director. Associate Professor. South Asian art.

Lewis Colburn, MFA (Syracuse University) Sculpture Area Coordinator. Assistant Professor. Sculpture, 3D design.

Anda Dubinskins, MFA (University of Pennsylvania) Drawing Area Coordinator. Associate Teaching Professor. Drawing.

Joseph F. Gregory, PhD (SUNY at Binghamton). Associate Professor. Modern European art.

Lydia Hunn, MFA (University of Pennsylvania) Multimedia Area Coordinator. Professor. Installations, sculpture, painting and drawing.

Linda Kim, PhD (University of California, Berkeley). Assistant Professor. American art, African art.

Elizabeth Milroy Professor. History of cultural spaces, specifically public parks and historic sites in the city of Philadelphia.

Charles Morscheck, PhD (Bryn Mawr College) Art History Program Co-Director. Professor. Italian Renaissance art.

Orlando Pelliccia, MFA Director of the Leonard Perlstein Gallery; Materials Coordinator. Teaching Professor. Multimedia.

Bruce W. Pollock, M.F.A. (Tyler School of Art, Temple University) Painting Area Coordinator; Fine Arts minor advisor. Associate Professor. Abstract painting and drawing.

Danielle Rice, PhD (Yale University) Program Director, Museum Leadership. Teaching Professor. Arts education

Clare Sauro, MA (Fashion Institute of Technology) Curator, Historic Costume Collection. Associate Teaching Professor. Costume history.

Delia Solomons, PhD (Institute of Fine Arts, New York University). Assistant Professor. Contemporary art, Latin American art.

Sara Steinwachs, MFA (Yale University) Visual Studies Area Coordinator. Associate Professor. Drawing, painting and design.

Mark Stockton, MFA (Syracuse University) Design for Media Area Coordinator. Assistant Teaching Professor. Drawing, painting, and design.

Blaise J. Tobia, MFA (University of California, San Diego) Director of the Digital Media Program. Professor. Photo-based works, design, art theory.

Joshua Weiss, MFA (Yale University). Associate Teaching Professor. Drawing, painting and design.

Dance

Major: Dance
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 185.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Program (CIP) code: 50.0399
Standard Occupational Classification (SOC) code: 25-1071; 27-2031

About the Program

The dance program at Drexel University provides intensive exploration of dance in its physical, intellectual, creative and therapeutic aspects. The major is designed for students to focus on one of the following four tracks:

- Dance/Movement Therapy
- Dance in Education
- Physical Therapy
- Performance

The dance major at Drexel University has a unique curriculum design and focus. This program combines rigorous academic coursework with extensive stage and studio dance experiences to prepare students for four possible career paths within dance: dance/movement therapy, dance in education, physical therapy and performance. Students participating in this major will earn a BS degree in dance with an optional minor in psychology.

Students focused on dance/movement therapy will prepare for jobs as dance/movement therapists. These are psychological counselors working in a variety of settings including hospitals, out-patient clinics and residential treatment centers. Students pursuing this option will earn a BS degree in dance at the Westphal College, through the Department of Performing Arts, for the first four years of study. They will then have the option to continue on to two years of study in the College of Nursing and Health Professions to earn an MA in Creative Arts in Therapy and become a licensed dance therapist.

The second career focus, dance in education, prepares students for jobs as elementary school teachers (grades Pre-K through 4) who may also serve as school dance specialists. Students choosing this option will earn a BS degree in dance through the Department of Performing Arts and may elect to continue for a fifth year of study to earn an MS in the Science of Instruction through the School of Education. Students who successfully complete the five year BS/MS option in education will then be recommended to the State for a Pennsylvania Teaching Certificate in the area of Elementary Education for Pre-K to 4 certification, general education.

The third career focus, physical therapy, prepares students to work as physical therapists in a variety of settings, including hospitals, treatment centers, schools, and private practice. Students interested in the physical therapy option will complete the four-year BS degree in dance, along with a series of recommended electives in the physical sciences. After completion of the BS degree, students will continue their education for an
additional three years in the College of Nursing and Health Professions to earn a DPT and become a licensed physical therapist.

The fourth option, custom design, allows students to work closely with faculty to create a personalized career in dance. Many students in this focus select performance, which prepares them to work as performers and/or choreographers in a variety of settings. Students interested in the performance option will complete the four-year BS degree in dance, with an emphasis on collaborative and interdisciplinary work.

The student who enters the dance major at Drexel University is an academically achieving student who has a deep curiosity for non-traditional careers in the field of dance. He or she is looking for extensive experiences to improve as a dancer, choreographer and performer while being stimulated academically. This student wants to study dance—both physically and cognitively—in college while being offered the possibility of gainful employment after graduation.

For more information about this major, visit the Westphal College’s Dance (http://www.drexel.edu/westphal/academics/undergraduate/DANC) webpage.

Co-op/Career Opportunities

The dance major is designed for students to focus on one of four career options. Several of the tracks lead to graduate study at Drexel or may be completed at the end of four years. Each also includes a co-op experience that allows for extended interaction with professionals in dance therapy, physical therapy, education, and performance. Students wishing to change career focus throughout the course of the undergraduate curriculum will have the option to do so.

Students focusing on dance/movement therapy participate in a six month co-op experience during the spring and summer terms of their junior year. These students may participate in co-op with a practicing
dance/movement therapist, community dance artist, or mental health professional in a mental health, social service, rehabilitation, medical, special education or community arts setting.

Students focusing on physical therapy, will participate in a six month co-op in which they work in a setting with a physical therapist, such as a hospital, treatment center, school, or private practice. Co-op experiences where students are able to work with physical therapists working on dancers as clients will be encouraged.

Students focusing on dance in education participate in after school dance programs, artist in residence school partnerships and auditorium lecture demonstration programs as part of a touring dance company run by the dance program at Drexel, or other dance education focused activities in a school or studio setting, during the fall and winter of their junior year as their co-op experience.

Students focusing on custom design or performance may participate in a six month co-op including performance, administration, production, event planning and grant writing. Students interested in performance will work with professional choreographers to experience multiple aspects of creating a sustainable life in performance and/or choreography.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual-Degree Option

BS/MS Dance and Elementary Education

About the Accelerated Degree Program

Qualified students in Dance have the option of continuing on into the graduate Science of Instruction program to obtain a BS in Dance and MS in Science of Instruction with Elementary Education certification. This program would allow highly motivated students to graduate with both degrees in a total of 5 years. Students apply for this accelerated program when they complete 90.0 credits of coursework and before completing 120.0 credits.

BS in Dance

Incoming students, 2016/2017

Bachelor of Science Degree: 185.0 quarter credits

* Not available to those with prior teacher certification.

**Content Categories**

For students without prior teacher certification, 7 credits are required, selected from the following content categories. (A list of suggested courses is available from the department.) Students with prior certification or those seeking add-on certification select 19 credits from the content categories.

1. Mathematics and science
2. Technological pedagogy
3. Applied pedagogy

Evaluation of transcripts by a program advisor in relation to Pennsylvania state standards determines the required content courses for initial certification and add-on certification. To satisfy state certification requirements, undergraduate courses may be taken in instances where graduate courses are not appropriate. These undergraduate courses will not satisfy graduate degree requirements. However, they will satisfy certification requirements and may satisfy requirements for salary increments in certain school districts. For those with prior certification who do not wish add-on certification, but desire to further professional competence, a distribution of courses from areas A, B, and C is selected under advisement on an individual basis.

**Professional Electives**

Students with or without prior certification select 15 credits of professional electives. Professional electives are selected with the advice of a program advisor to strengthen mathematics and science knowledge, to refine and update pedagogy competence, to broaden general education, to gain knowledge about the nature of information and information materials, to develop and refine skills in integrating technology into instruction, and to ensure that certification standards are satisfied. Professional electives may be taken from the core courses or from any course in the content categories. Any graduate course offered in the University may serve as a professional elective if the student has adequate preparation to take the course and it is deemed appropriate by the program advisor. The 15.0 credits of professional electives may comprise a combination of up to three Performance Learning Systems (PLS) courses and/or approved transfer credits. PLS courses must be taken at Drexel to count toward the master's degree.

**Dance Faculty**

Lindsay Browning, BFA (Bradford University). Adjunct Professor. Yoga

Jim Bunting, BFA (University of the Arts, Philadelphia). Adjunct Instructor. Jazz dance.

Clyde Evans Adjunct Assistant Professor. Director of Chosen Dance Company; hip-hop.

Chris Farrell, MBA (Fordham University). Adjunct Instructor. Rhythmic studies; accompaniment.

Miriam Giguere, PhD (Temple University) Department Head, Performing Arts. Associate Professor. Professional modern dancer, choreographer and dance educator whose research centers on cognition during the creative process. She has published nationally and internationally and is a frequent presenter on the integration of dance and academics at national and international conferences.

Valerie Ifill, MFA (University of Oregon) Program Director, Dance; Director of the Youth Performance Exchange and Dornsife Dance. Assistant Teaching Professor. Intersections of dance and the community

Tania Isaac, MFA (Temple University). Assistant Teaching Professor. Caribbean-American dancer/choreographer; fusion of choreography with personal documentary and social commentary to grapple with identity, post-colonial issues, feminism and juxtapositions of European and African influences.

Lucinda Lea, BA (Indiana University). Adjunct Assistant Professor. Ballet.

Marcie Mamura, MFA (University of Oregon). Adjunct Assistant Professor. Assistant Director, FreshDance.

Jennifer Morley, MFA (Temple University). Assistant Teaching Professor. Master Pilates instructor and director of the Drexel Pilates Teaching Training program; modern dance, choreography.

Carl Paris, PhD (Temple University). Adjunct Associate Professor. Interdisciplinary approach to dance studies, cultural studies and issues around black dance and performance.

Olive Prince, MFA (Temple University). Adjunct Assistant Professor. Choreography, creative process and improvisation; Director of Olive Prince Dance.

Meredith Rainey Adjunct Assistant Professor. Former soloist with Pennsylvania Ballet and director of Carbon Dance Theater. Ballet, choreography.

Heather Smallley, BS (Drexel University). Adjunct Assistant Professor. Arts administration.

Leah Stein, BA (Wesleyan University). Adjunct Assistant Professor. Modern technique; improvisation.
Design & Merchandising

Major: Design and Merchandising
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0499
Standard Occupational Classification (SOC) code: 13-1022

About the Program

Students in the Design & Merchandising program develop an appreciation for style and product quality, learn to communicate verbally and visually about design across traditional and emerging media, and gain the business knowledge and skills required to promote an aesthetically grounded point of view in the global marketplace.

The Design & Merchandising program at Drexel University's Antoinette Westphal College of Media Arts & Design educates and prepares students to effect change via creative problem-solving in design and commerce. Through an interdisciplinary approach, we strive to graduate adaptable, creative, confident and passionate professionals who are technologically adept and globally aware.

Through the classroom, co-op experience and study abroad opportunities (http://www.drexel.edu/studyabroad), the program prepares students to create, merchandise, market, promote and distribute fashion product, based on a knowledge of visual/aesthetic and business considerations. Design & Merchandising students graduate with the knowledge and skills needed for success in traditional and emerging roles in the global marketplace, and as practical and responsible corporate citizens who will make the world a more compelling, beautiful place in which to live and work.

Design & Merchandising majors typically focus study in the areas of fashion and fashion-related retail merchandising, product development and product promotions. Elective credits may be used for a concentration in Retail Buying & Merchandising; Fashion Product Development; Fashion Promotion & Special Events; Merchandising Technologies; and Design Management for Design & Merchandising. Elective credits may also provide students with an option to minor in business administration, art history, product design, another discipline, or to pursue other specific educational goals.

For more information about this major, visit the College's Design & Merchandising (http://www.drexel.edu/westphal/academics/undergraduate/DSMR) page.

Degree Requirements

Students pursuing the Bachelor of Science in Design & Merchandising may complete a concentration in an area of study using free electives. Students may pursue more than one concentration or combine a concentration with a minor.

Concentration in Retail Buying & Merchandising
This concentration is designed to broaden students' practical and theoretical understanding of consumption as it relates to retail buying, management and merchandising. With the growth in cross-channel retail, students need to develop their skills not only for careers in traditional brick-and-mortar retailing establishments, but other retail models. These include: print and electronic based retailing (catalog, television, and Internet). In this concentration, students explore all major retail merchandising and marketing channels and their requirements for buying, staffing, technology, logistics, distribution, and organizational behavior.

Concentration in Fashion Product Development
This concentration analyzes the dominant forces shaping 21st century merchandising decisions, including global product sourcing, international retail development, and the increasingly important role of the consumer in product design. Students successfully completing this concentration develop practical applications to critical issues facing industry decision makers, understand supply chain management from the producer and retailer perspective, identify new markets for products and create strategies for entering those markets, implement merchandising strategies in sectors across the design industries and gain exposure to the latest technology and communication tools that support the industry.

Concentration in Fashion Promotion and Special Events
Through the Fashion Promotion and Special Events concentration students who are interested in a career in public relations, special events planning and marketing, creative and media direction within the design industries will have the opportunity to take classes inside and outside the AW College of Media Arts & Design. These partnerships will enhance the students' background in this area of specialization, and dramatically increase networking and employment opportunities.

Concentration in Merchandising Technologies
Merchandising utilizes technology on the front end for fashion product promotion and on the back end to research, design, source, produce and distribute fashion and home product. In this concentration, students will study topical issues in merchandising technologies through a variety of theory and "hands on" based courses. Upon completion of this concentration students will be familiar with the current technologies in play, analyze the appropriate uses of available technology and be familiar with emerging trends.

Concentration in Design Management in Design & Merchandising
Design management is a relatively new area of study for the design and merchandising student. This concentration is specifically designed to prepare the student to pursue Design Management at the graduate level.

Co-op/Career Opportunities

Opportunities

An education in Design & Merchandising prepares individuals for a wide variety of career paths. Graduates often pursue opportunities in retail operations and buying, fashion and home product development, fashion product promotion. More recently, graduates select careers in merchandising technologies, or design management. Each of these areas is offered as a concentration, or the student may elect to choose a minor opening up an unlimited number of options.

Co-Op Experiences

Some past co-op employments of design and merchandising students include:

- Wholesale Co-op, Alexander McQueen, New York, NY
- Assistant Buyer, Urban Outfitters/Anthropology, Philadelphia, PA
- Product Development Assistant, Charming Shops, Bensalem, PA
- Design and Merchandising Assistant, Jones New York, New York, NY
- Public Relations Assistant, QVC, West Chester, PA
- Assistant Fashion Coordinator, Special Events Department, Saks Fifth Avenue
- Fashion Showroom Co-op, BCBG Max Azria, New York, NY
- Public Relations Assistant, Neiman Marcus, King of Prussia, PA
- Design/Market Co-op, Charlotte Ronson, New York, NY
- Design Assistant, Calvin Klein, New York, NY
- Retail/Manufacturing/Merchandising Asst., Nicole Miller, Philadelphia PA

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdcc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree Program

Only available to Design & Merchandising majors (4-year with co-op), this dual degree program combines study in the areas of fashion retail merchandising and product development with the MBA degree. The program is designed to allow students to complete both the bachelor’s degree and the Master of Business Administration degree in five years.

Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

Degree Requirements

The degree requirements for each program are located on the following pages:

- BS in Design & Merchandising Requirements (p. 485)
- MBA Requirements (http://catalog.drexel.edu/graduate/businessadministration/#degreerequirementstext)

Additional requirements for the dual degree program

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student’s third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Students should visit the Westphal College of Media Arts and Design (http://www.drexel.edu/westphal) for more information.

Fashion, Product Design & Merchandising Faculty

Kristen Ainscoe, BS (Drexel University). Assistant Teaching Professor. Visual merchandiser; merchandise management.

Catherine Byers, MA (American University). Assistant Teaching Professor. Journalism; marketing and communications.

Nick Cassway, BFA (Tyler School of Art). Assistant Teaching Professor. Curating; experimental portraiture; computer design.

Anne C. Cecil, MA (University of the Arts). Assistant Teaching Professor. Web designer, product designer, merchandising and artist.

Michael Glaser, MFA (Ohio State University) Program Director for Product Design. Associate Professor. Quantifying the designer’s intuition; the interplay between digital and physical forms; human desire to shape our surroundings.

Joseph H. Hancock, II, PhD (Ohio State University). Professor. Apparel merchandising, textiles and clothing, culture and marketing strategies.

Beth Phillips, MS (Georgetown University). Associate Teaching Professor. Business and international marketing, linguist, analysis of products.

Entertainment and Arts Management

Major: Entertainment and Arts Management

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 185.0 - 187.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Program (CIP) code: 51.1001
Standard Occupational Classification (SOC) code: 13-1011

About the Program

The Entertainment and Arts Management (EAM) program at Drexel University is an international leader in teaching the business of show business. Our unique program is a business degree, yet one that is based
in the entertainment and arts sectors. Students in the Entertainment and Arts Management major choose an area of concentration from media, performing arts, or visual arts management disciplines. The curriculum is designed to prepare students to lead and manage in both commercial and non-profit areas of the field. Concentrations are available in: Cinema and Television, Performing Arts; Dance; Theatre; Visual Arts, Digital Media; and Sports Entertainment. Coursework in the EAM program includes general education, core requirements and features a built-in business minor. Students also enjoy a wide selection of specialized coursework within their chosen area of concentration.

Unlike other undergraduate programs in this field, students are not required to choose commercial or nonprofit. Our philosophy is to prepare students for leadership careers in the vast world of arts and entertainment. This gives EAM students increased flexibility when choosing their career paths, and a distinct professional advantage in today’s ever-changing arts and entertainment industries.

Our Goal

Our overall goal in the EAM program is to prepare students for leadership careers in the entertainment and arts fields by giving them:

- a broad understanding of the business of entertainment & the arts, from for-profit commercial entertainment companies to non-profit arts & culture organizations;
- real world work experience;
- skills development in the creative discipline that interests them, and
- expert advice and insight from practicing professionals.

BS/MS Option

Students who complete the Entertainment and Arts Management program may also choose to pursue a graduate degree at Drexel University in arts administration or museum leadership. Students who graduate with a 3.5 GPA in the last two years of the program who apply to the MS in Arts Administration (http://catalog.drexel.edu/graduate/collegeofmediaartsanddesign/artsadministration) are automatically accepted into the MS program. Other graduate degrees within the college are available to students as well.

Dual Degree MBA Option

EXCLUSIVE to students majoring in Entertainment and Arts Management (4-year with co-op) is the BS Entertainment and Arts Management/MBA dual degree option. This highly attractive program option combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor’s degree and the MBA in five years.

Applying to the Dual Degree MBA Option

Freshman applicants to the Entertainment and Arts Management program with a combined Math and Critical Reading SAT score of 1300 and a 3.5 GPA may apply for the BS/MBA program at the time of their initial application to Drexel University. Students who accept into the accelerated program must maintain a 3.2 GPA as an EAM undergraduate, and must submit 2 letters of recommendation and meet minimum GMAT requirements at the time of the application to the MBA program.

For more information about this major, visit the College’s Entertainment and Arts Management (http://www.drexel.edu/westphal/academics/undergraduate/eam) page.

Degree Requirements

Coursework in the EAM program includes general education and core requirements as well as specialized coursework within the student’s chosen area of concentration and, if applicable, within a specific arts or media discipline. For instance, within the media management concentration, students choose coursework in one of two disciplines: film, video, and screenwriting or digital media. In the performing arts management concentration, students choose coursework in a dance, performing arts, or theatre discipline.

The core requirements provide an overview of the student’s future career field and its required key skills and abilities. The core requirements build a foundation for further advanced and specialized courses, taught in the student’s area of concentration. At the end of their freshman year, students select one of the following concentrations:

- (A) Visual Arts Management Concentration
- (B) Performing Arts Management
  a. Dance Concentration
  b. Performing Arts Concentration
  c. Theatre Concentration
- (C) Media Management
  a. Digital Media Concentration
  b. Cinema and Television Concentration
- (D) Sports Entertainment Concentration

A. Visual Arts Management Concentration

Concentration Requirements

Total Credits 185.0-187.0

Select one of the following:

- ACCT 116 Managerial Accounting Foundations
- BUSN 301 Accounting and Finance for Nonfinancial Professionals
- MKTG 356 Consumer Behavior

Select two of the following:

- ECON 202 Principles of Macroeconomics
- FIN 301 Introduction to Finance
- MIS 200 Management Information Systems
- OPM 200 Operations Management
- STAT 201 Introduction to Business Statistics
- STAT 202 Business Statistics II

Concentration Requirements 55.0-60.0

* Minimum number of free electives depends on chosen concentration.

** EAM 491 is a 1.0 credit course, taken 3 times during the senior year, for a total of 3.0 credits.

*** BS/MBA students should take STAT 201 and FIN 301. Students who take STAT 201 and FIN 301 should not take BUSN 301.

Visual Arts students select 24 additional credits from the following:

- ARTH 101 History of Art I: Ancient to Medieval 3.0
- ARTH 102 History of Art II: Renaissance to Romanticism 3.0
- ARTH 103 History of Art: Modern Art 3.0
- EAM 270 Audience Development for Arts 3.0
- EAM 301 Gallery and Collection Management 3.0
- EAM 302 Exhibition Design 3.0
- EAM 312 Introduction to Fund Development for the Arts 3.0
- EAM 350 Arts, Culture and Society 3.0
- EAM 401 Writing for Arts Managers 3.0
- EAM 471 Fine Arts Market Development 3.0
- EAM 472 Trends in Visual Arts 3.0

Total Credits 57.0

B. Performing Arts Management

1. Dance Concentration

DANC 140 Ballet Technique I 2.0
DANC 150 Modern Dance Technique I 2.0
DANC 160 Jazz Dance Technique I 2.0
or DANC 170 Hip-Hop Dance Technique I 2.0
DANC 201 [WI] Dance Appreciation 3.0
DANC 210 Introduction to Dance 3.0
DANC 240 Dance Composition I 3.0
DANC 325 [WI] Twentieth Century Dance 3.0
DANC 355 Rhythmic Study for Dance 3.0
EAM 270 Audience Development for Arts 3.0
EAM 312 Introduction to Fund Development for the Arts 3.0
EAM 313 Volunteer and Board Management 3.0
EAM 321 Box Office and Venue Management 3.0
EAM 322 Performing Arts Touring and Promotion 3.0
EAM 340 Artist Representation and Management 3.0
EAM 350 Arts, Culture and Society 3.0
EAM 401 Writing for Arts Managers 3.0
MUSC 130 Introduction to Music 3.0
THTR 240 Theatre Production I 3.0
DANC Electives 6.0

Six terms of Dance ensembles (DANC 131-132) 3.0

Total Credits 60.0

2. Performing Arts Concentration

DANC 201 [WI] Dance Appreciation 3.0
DANC 210 Introduction to Dance 3.0
DANC 325 [WI] Twentieth Century Dance 3.0
EAM 270 Audience Development for Arts 3.0
EAM 312 Introduction to Fund Development for the Arts 3.0
EAM 313 Volunteer and Board Management 3.0
EAM 321 Box Office and Venue Management 3.0
EAM 322 Performing Arts Touring and Promotion 3.0
EAM 340 Artist Representation and Management 3.0
EAM 350 Arts, Culture and Society 3.0
EAM 401 Writing for Arts Managers 3.0
MUSC 130 Introduction to Music 3.0
MUSC 331 World Musics 3.0
MUSC 333 Afro-American Music USA 3.0
MUSC 338 [WI] American Popular Music 3.0
THTR 115 Theatrical Experience 3.0
THTR 210 Acting: Fundamentals 3.0
THTR 240 Theatre Production I 3.0
THTR Theatre Elective 3.0

Six terms of Performing Arts ensembles (3 classes must be taken for 1 credit each. One must be THTR 130) 3.0

Total Credits 60.0

3. Theatre Concentration

EAM 270 Audience Development for Arts 3.0
EAM 312 Introduction to Fund Development for the Arts 3.0
EAM 313 Volunteer and Board Management 3.0
EAM 321 Box Office and Venue Management 3.0
EAM 322 Performing Arts Touring and Promotion 3.0
EAM 340 Artist Representation and Management 3.0
EAM 350 Arts, Culture and Society 3.0
EAM 401 Writing for Arts Managers 3.0
THTR 121 [WI] Dramatic Analysis 3.0
THTR 210 Acting: Fundamentals 3.0
THTR 211 Acting: Scene Study 2.0
THTR 221 [WI] Theatre History I 3.0
THTR 222 [WI] Theatre History II 3.0
THTR 240 Theatre Production I 3.0
THTR 260 Production Design 3.0
THTR 320 Play Direction 3.0
Two Theatre (THTR) electives 6.0
Six terms of Theatre Practicum Courses 4.0
Total Credits 57.0

* THTR 130, THTR 131, THTR 132

C. Media Management

1. Digital Media Concentration

ANIM 140 Computer Graphics Imagery I 3.0
COM 111 Principles of Communication 3.0
COM 150 Mass Media and Society 3.0
COM 240 New Technologies in Communication 3.0
COM 270 [WI] Business Communication 3.0
COM 335 Electronic Publishing 3.0
DIGM 100 Digital Design Tools 3.0
DIGM 105 Overview of Digital Media 3.0
EAM 340 Artist Representation and Management 3.0
EAM 365 Media and Entertainment Business 3.0
FMVD 110 Basic Shooting and Lighting 3.0
GMAP 260 Overview of Computer Gaming 3.0
IDM 211 User Interface Design I 3.0
IDM 221 Web Design I 3.0
MKTG 322 Advertising & Integrated Marketing Communications 4.0
VSST 110 Introductory Drawing 3.0
One Digital Media (ANIM, GMAP, WBDV) elective 3.0
Digital Media track students also select one course from the following: 3.0
- ANIM 220 Digital Compositing I
- DIGM 350 [WI] Digital Storytelling
- DIGM 451 [WI] Explorations in New Media
- IDM 222 Web Design II
Total Credits 58.0

2. Cinema and Television Concentration

COM 111 Principles of Communication 3.0
COM 150 Mass Media and Society 3.0
COM 240 New Technologies in Communication 3.0
COM 270 [WI] Business Communication 3.0
COM 335 Electronic Publishing 3.0
EAM 340 Artist Representation and Management 3.0
EAM 365 Media and Entertainment Business 3.0
FMVD 110 Basic Shooting and Lighting 3.0
FMVD 115 Basic Editing 3.0
FMVD 120 Basic Sound 3.0
MKTG 322 Advertising & Integrated Marketing Communications 4.0
SCRP 270 [WI] Screenwriting I 3.0
TVIE 285 Media Law and Ethics 3.0
TVIE 290 Introduction to Money and the Media 3.0
TVPR 212 TV Commercials and Promos 3.0
Select three from the following: 9.0
- FMVD 210 Documentary Video Production
- FMVD 215 Narrative Video Production
- FMVD 220 Experimental Video Production
- FMVD 235 Intermediate Lighting
- FMVD 237 Intermediate Editing
- FMVD 286 Producing for Features
- FMVD 305 Special Effects Make-up
- FMVD 365 Special Topics in Production
- SCRP 241 Writing TV Comedy
- SCRP 242 Writing TV Drama
- SCRP 275 Screenwriting II
- SCRP 280 [WI] Writing the Short Film
- SCRP 310 Literature for Screenwriters
- SCRP 370 Screenplay Story Development
- SCRP 380 Screenwriting Workshop I
- SCRP 381 Screenwriting Workshop II
- TVE 280 Research, Sales and Programming
- TVPR 100 TV Studio: Basic Operations
- TVPR 200 TV Studio: Live Directing
- TVPR 230 Scripted TV Production
- TVPR 232 TV Field: Industrials
- TVPR 236 Reality TV Production
- TVPR 240 Producing for Television
Total Credits 60.0

D. Sports Entertainment

COM 111 Principles of Communication 3.0
COM 150 Mass Media and Society 3.0
COM 240 New Technologies in Communication 3.0
COM 270 [WI] Business Communication 3.0
COM 335 Electronic Publishing 3.0
EAM 340 Artist Representation and Management 3.0
EAM 365 Media and Entertainment Business 3.0
FMVD 110 Basic Shooting and Lighting 3.0
FMVD 115 Basic Editing 3.0
FMVD 120 Basic Sound 3.0
SMT 110 The Business of Sport 4.0
SMT 201 Sports Marketing, Promotion, and Public Relations 4.0
SMT 205 Sport Media Relations 4.0
SMT 215 Sports Ticket Sales & Operations 3.0
TVPR 100 TV Studio: Basic Operations 3.0
TVPR 240 Producing for Television 3.0
TVPR 340 Remote TV Production 3.0
Sport Entertainment Concentration students also select any two of the following courses: 6.0
- SMT 200 Introduction to Sport Facility and Event Management
- SMT 225 Sports Budgeting
- SMT 230 Sports and the Law
- SMT 240 Olympic Games
- SMT 260 Sports Agents & Labor Relations
- SMT 305 Fundraising in Sports
- SMT 307 Corporate Sponsorship in Sports
- SMT 309 Capital Campaigns in Athletics
- SMT 310 Sports Contracts
- SMT 315 Sports Publications & Graphics
- SMT 320 Sport Economics
- SMT 337 Risk Management in Sports
- SMT 345 Fan Experience Management
- SMT 347 Sport Tourism
- TVPR 200 TV Studio: Live Directing
- TVST 260 History of Television
Total Credits 66.0
Recommended Plans of Study

At the end of their freshman year, students select one of the following concentrations. Each concentration has its own unique Plan of Study:

- Term Credits 18.0
Entertainment and Arts Management prepares students for a variety of careers in both commercial and nonprofit organizations - from creative, hands-on positions to administrative and management roles.

The career possibilities in this field are extensive and include the following positions:

- Artistic or creative director
- Concert and live events manager
- Gallery owner
- Grant writer
- Marketing coordinator
- Production and development executive
- Promoter
- Publicist
- Talent agent

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

### About the Accelerated Degree Program (BS/MBA)

Only available to students majoring in entertainment and arts management (4-year with co-op), this dual degree program combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.
Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

**Degree requirements**

BS in Entertainment and Arts Management (p. 490)

MBA Requirements ([http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext](http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext))

BS/MBA students may be waived from three MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing ([http://www.lebow.drexel.edu/PDF/Docs/Grad/CurriculumStanding.pdf](http://www.lebow.drexel.edu/PDF/Docs/Grad/CurriculumStanding.pdf)) on the LeBow College’s website for additional information. Students who complete MIS 200 in their undergraduate program will, in addition, be waived from a fourth MBA course (MIS 611).

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

**Additional requirements for the dual degree program**

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student’s third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Students should visit the Westphal College of Media Arts and Design ([http://www.drexel.edu/undergrad/academics/colleges-schools/westphal](http://www.drexel.edu/undergrad/academics/colleges-schools/westphal)) for more information.

**College of Media Arts and Design Facilities**

Our college offers high-quality facilities and resources to its students including a state-of-the-art black-box theatre, HD film screening rooms, rehearsal studios, event venues, and more. The following are some links for more information about some of our facilities.

- Robert and Penny Fox Historic Costume Collection ([http://www.drexel.edu/westphal/resources/FHCC](http://www.drexel.edu/westphal/resources/FHCC))
- Design and Imaging Studios ([http://www.drexel.edu/westphal/student-resources/technology](http://www.drexel.edu/westphal/student-resources/technology))
- DUTV ([http://www.dutv.org](http://www.dutv.org)), (Paul F. Harron Studios) student-run cable television station
- MAD Dragon Media Group ([http://maddragonrecords.com](http://maddragonrecords.com))
- Mandell Theater ([http://www.drexel.edu/performingarts/about/facilities/mandell-theater](http://www.drexel.edu/performingarts/about/facilities/mandell-theater))
- Rudman Institute for Entertainment Industry Studies ([http://www.drexel.edu/westphal/resources/Rudman](http://www.drexel.edu/westphal/resources/Rudman))
- WKDU ([http://www.wkdu.org](http://www.wkdu.org)), Drexel’s student-run radio station

**Entertainment and Arts Management Faculty**

Rick Dorfman Adjunct Instructor. Artist representation.

Lawrence Epstein, MBA (Cornell University) Interim Department Head, Arts & Entertainment Enterprise. Teaching Professor. Media Finance, Station Group Management Media Analytics, Financial, Technical and Strategic Planning. Technology Assessment and Management, New Venture Management

Julie Hawkins, MFA (Temple University) Program Director, MS in Arts Administration. Assistant Professor. Cultural policy, political activism in the arts, changes in economic and social policy, arts sector changes.

Brian Moore, MS, MFA (Drexel University; Louisiana State University) Program Director, BS in Entertainment and Arts Management. Assistant Teaching Professor. Commercial entertainment: film, theatre, television. Nonprofit organizations: theatre, general fund development; strategic planning; communications and marketing; executive management.

Amy Scheidwegger, MS (Drexel University). Adjunct Instructor. Working artist teaching audience development, advocacy and strategic management. Creator of the <em>Artistic Rebuttal Book Project</em>

Scott Schwartz, JD (University of Buffalo). Adjunct Professor. General counsel at Dansko, LLC; teaches Copyright & Trademarks.

Neville Vakharia, MS (Drexel University) Research Director. Assistant Professor. Technology in the arts, strategic planning and evaluation, management and leadership, innovation and entrepreneurship.

David Weiss Adjunct Instructor. VP at Freeman’s Auction House, Host of &em;Antiques Roadshow&em; on PBC; Teaches Fine Art Market Development

Brannon Wiles, JD (Columbia University School of Law). Assistant Professor. Producing for commercial theatre, law and the arts, contract negotiation, labor relations, budgeting and company management.

Justin Wineburgh, JD (Widener University). Adjunct Professor. Teaching Law for Entertainment and Arts Management. CEO of Alkemy-X production company.

**Fashion Design**

Major: Fashion Design

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 183.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 50.0407

Standard Occupational Classification (SOC) code: 27-1022

**About the Program**

The Fashion Design Program at Drexel University’s Antoinette Westphal College ([http://www.drexel.edu/westphal/undergraduate/FASH](http://www.drexel.edu/westphal/undergraduate/FASH)) of Media Arts & Design educates and trains visionary designers to use an integrated approach toward the creation of contemporary fashion within the context of an expanding, yet converging global economy and society. The fusion of art, design, science and technology serves as a springboard for the production of unique apparel for the 21st century, and represents a trans-disciplinary approach that requires flexibility and focus. Over the
past two decades, Drexel’s Fashion Design program has developed a
stellar, international reputation and is ranked in the top five nationally
and 16th worldwide. That is due in part, to a passionate and experienced
faculty, novel approaches to pedagogy, and participation in national and
international competitions. Faculty and alumni connections to industry
leaders strongly augment and catalyze the program, the strength of which
is closely linked to the philosophy that each student has a distinct vision
and a unique aesthetic that must be cultivated on an individual basis.

Within the beautiful new studios and specialized labs in the URBN Center,
students learn to master skills and push the boundaries using those skills.
Students can engage in collaborative University wide research through the
use of the exCiTe Center (http://drexel.edu/excitex) located next door
and the Hybrid Making Lab (http://www.drexel.edu/westphal/resources/
making_spaces/HybridMakingLab) located on the URBN Center’s first
floor. They acquire detailed knowledge about industrial productions,
advanced technologies in design, collaborative design, materials
and processes, and the marketing and merchandising of clothing.

Accordingly, our future fashion designers, both undergraduates and
graduates alike, develop an intuitive and practical understanding of design
through a fine arts foundation, while studying the psychological, social
and historical contexts of fashion through the world-renowned Robert
and Penny Fox Historic Costume Collection (http://www.drexel.edu/
foxcollection) (FHCC). Importantly, the students are provided with
commercial studio/ atelier training that goes hand-in-hand with classroom
instruction through the University’s cooperative education program
(http://www.drexel.edu/westphal/forStudents/co-op). Cooperative
education offers invaluable opportunities for students to observe and
participate in the fashion industry at the ground level. Critiques by
visiting professionals are included in all upper level courses
and provide valuable “real world” input, as well as future career
connections. A large percentage of students spend a term studying
abroad (http://www.drexel.edu/studyabroad) in the world’s great fashion
capitals, including London (https://www.drexel.edu/index.cfm?
FuseAction=Programs.ViewProgram&Program_ID=10070&Type=O&sType=O)
England and Florence (https://www.drexel.edu/index.cfm?
FuseAction=Programs.ViewProgram&Program_ID=40220), Italy. Upon
graduation, students show their collections (http://www.drexel.edu/
westphal/creative/fash) in the annual fashion show.

For more information about this major, visit the College’s Fashion Design
(http://drexel.edu/westphal/academics/undergraduate/FASH) page.

### Co-op/Career Opportunities

Drexel Co-op is a renowned collegiate program. Students spend a minimum of 6 months either in the US (http://www.drexel.edu/westphal/academics/co-op) or abroad (http://www.drexel.edu/scdc/co-op/international) where they can apply their skills in the challenging and exciting fashion industry. Areas of opportunity include garment design, concept design, product development, production, textile design, costume design, technical design, CAD, publishing, curatorial work, promotion and marketing. During the cooperative education program students apply their industry knowledge and gain experience in the diverse, fast paced global world of fashion. Students forge long lasting relationships with alumni and other industry professionals.

### Co-op Experiences

Some past co-op employers of fashion design students include:

- A Wish Come True, Greater Philadelphia Area
- Abercrombie & Fitch, Ohio
- Althea Harper, New York
- Amsale, New York
- Austin Scarlett, New York
- Australian Internships - Bec & Bridge
- Beijing Yu Wen Hua Apparel Company
- BCBG Max Azria, California
- Bioko Biodiversity Protection Program, Equatorial Guinea
- Blazina International, Philadelphia
- Calvin Klein, New York
- Carole Hochman Design Group, New York
- Charlotte Ronson, New York
- Dennis Basso/Stallion Inc., New York
- Derek Lam, New York
- Destination Maternity Corporation, Philadelphia, PA
- DYLANLEX, Philadelphia, PA
- Elite Sportswear, L.P., Reading, PA
- Elie Tahari, New York
- Elixir Fashion Apparel & Alicia Lee Designs, China
- Gelmart International, New York
- Hanky Panky, LTD, New York
- Haute Hippie, New York
- Jill Stuart International, New York
- Joe Fresh, New York
- Jordache Enterprises, New York
- Junko Yoshioka, New York
- Lilly Pulitzer, Greater Philadelphia Area
- Lori Coulter, LLC, St. Louis, MO
- Maggie Norris Couture, New York
- Marios Schwab Ltd., London, UK
- Michael Kors, New York
- Milly LLC, New York
- Naeem Khan LTD, New York
- Nanette Lepore, New York
- Ohne Titel, New York
- PARIGI Group, Greater Philadelphia Area
- Parker, New York
- Peter Pilotto, London, UK
- Priscilla Costa, Greater Philadelphia Area
- Sally Lapointe, New York
- Shehu, Philadelphia, PA
- Shima Seiki USA, Inc., South New Jersey
- SOTU Productions, New York
- Thakoon, New York
- The Tailory, Philadelphia, PA
- Timo Weiland, New York
- Top Hat Formal Wear, Puerto Rico
- Urban Outfitters, Philadelphia, PA
- Veda, New York
- VF Sportswear, New York
- Yes Master for IMAGO Creations, Ltd, Middlesex, UK
- Zac Posen, New York

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

### Facilities

Drexel University’s Antoinette Westphal College of Media Arts & Design is located in the new URBN Center at 3501 Market Street in Philadelphia. The URBN Center is a 140,000 square foot state-of-the-art facility where the Fashion Design studios are located on the 3rd floor. Classes are held in fully equipped studios for design and construction, pattern drafting, CAD design, and textile design including a dedicated...
senior and graduate design studio. Other studios on the 3rd floor include a specialty equipment lab, computer lab, knitwear studio, a fabric dying and research lab, fashion drawing studio, and the Charles Evans Library. The R (http://www.drexel.edu/westphal/resources/FHCC) jobert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) (FHCC), currently estimated to hold more than 12,000 objects, is located on the first floor and is an invaluable library, archive and educational tool for our students as well as scholars, historians, artists and designers in the national and international community. Also located on the first floor is the Hybrid Making Lab (http://www.drexel.edu/westphal/about/overview/ making_spaces/HybridMakingLab). This lab provides collaborative design and research opportunities both within Westphal College and University wide. The exCiTe Center (http://drexel.edu/excite) (Expressive and Creative Interaction Technologies), located next door at 3401 Market Street, welcomes students and faculty from across the University as well as the community.

The open environment of the URBN Center provides opportunity for collaboration with all of the programs at the Westphal College. Design & Merchandising is on the first floor, opposite the main lobby where work from all of College’s students is regularly displayed. Digital Media, Animation & Visual Effects, Game Art & Production, Web Development & Interaction Design, Product Design, Graphic Design, Interiors, and Architecture’s studios and labs are also located in the URBN Center. The Center encourages anyone interested to schedule a visit (http://www.drexel.edu/westphal/about/contact) to experience the creativity, technology, innovation and resulting excitement.

Fashion Design Faculty

Renee Weiss Chase, MS (Drexel University). Professor. Fashion designer; computer-aided design systems for the fashion curriculum.

Anita Dennis, AST (Art Institute of Philadelphia) Fashion Laboratory Technician. Assistant Teaching Professor. Fashion designer and technician; construction skills.

Genevieve Dion, MFA (University of the Arts) Director, Shima Seiki Haute Technology Lab, exCiTe Center. Associate Professor. Industrial designer, wearable artist, new materials technology research.

Cynthia Golembuski, MS (Drexel University) Associate Program Director, Fashion Design. Associate Teaching Professor. Fashion designer, illustrator, computer aided design.

Roberta Gruber, MS (Drexel University) Head of the Department of Design. Associate Professor. Fashion designer and illustrator; wearable artist, merchandiser, special events.

Lisa L. Hayes, BFA (Syracuse University) Program Director, Fashion Design. Associate Professor. Fashion designer, product designer, pattern design.

Jaeyoon Jeong, MS (Drexel University). Assistant Teaching Professor. Owner/Designer Jaeyoon Jeong Collection

Jan Marshall, BA (Long Island University). Assistant Teaching Professor. Fashion designer, knitwear, product development, fashion analysis.

Kathi Martin, MSIS (Drexel University) Associate Director of the Graduate Program in Fashion Design. Associate Professor. Fashion and textile designer; textile artist; computer-aided design, best practices online databases and graphic interfaces for fashion and historic costume, virtual characters for fashion design.

Alphonso McClendon, MS (Drexel University) Program Director, Design & Merchandising. Associate Professor. Fashion designer, product and business development, computer aided planning and design.

Clare Sauro, MA (Fashion Institute of Technology) Curator, Historic Costume Collection. Associate Teaching Professor. Costume history.

Courses

FASH 201 Survey of the Fashion Industry 3.0 Credits
Introduces the materials and methods used to design, develop, and market the fashion product, including current vocabulary and foundation of knowledge about industry practices and career opportunities.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FASH 210 Presentation Techniques in Fashion 3.0 Credits
Introduces the presentation techniques and skills used for communication in the fashion industry.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: (VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]) and FASH 201 [Min Grade: D]

FASH 211 Fashion Drawing I 3.0 Credits
Examines the fashion figure, fabrication, and conceptual design through the use of black, white, and gray media. Includes classroom drawing from a live model and weekly critiques.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: VSST 111 [Min Grade: D]

FASH 212 Fashion Drawing II 3.0 Credits
Examines fashion forms, fabrication, and conceptual design through the use of color and mixed media. Works toward the development of a personal "fashion look" and an understanding of drawing as it relates to the fashion industry. Includes live model.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 211 [Min Grade: D]

FASH 220 Textile Design 3.0 Credits
Introduces the student in both traditional and digital techniques of textile design. Investigates layout, repeats, and coordinated fabric groups.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]

FASH 230 Textiles for Fashion Design 3.0 Credits
Examines the textile manufacturing industry and the fundamental processes involved in producing fabrics made of natural or manufactured fibers. Includes basic textile terminology and production processes as well as selection and evaluation of fabrics based on aesthetics, performance and care characteristics.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH.
FASH 241 Construction Skills 4.0 Credits
Develops a proficiency in basic garment construction. Emphasizes facility with industrial equipment. Introduces production techniques and an overall awareness of standards of quality.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FASH 251 Fashion Design I 4.0 Credits
Poses fashion problems to be solved, with an emphasis on elements of design. Explores use of half-scale experimentation and development of "studies" as an aid in developing design ideas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 210 [Min Grade: D]

FASH 252 Fashion Design II 4.0 Credits
Explores sources of inspiration and requires students to translate and develop source material into creative garments. Stresses the extension and elaboration of ideas within a specific market.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 251 [Min Grade: D]

FASH 241 Construction Skills 4.0 Credits
FASH 311 Textile Design 3.0 Credits
Instructs the student in both traditional and digital techniques of textile design. Investigates layout, repeats, and coordinated fabric groups.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]

FASH 313 Flat Pattern Design 4.0 Credits
FASH 315 Computer Aided Design for Patternmaking 3.0 Credits
Covers garment development by the draping method. Advances skills of FASH 313.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Junior or Senior.
Prerequisites: FASH 241 [Min Grade: D] and FASH 313.

FASH 314 Fashion Presentation Drawing 3.0 Credits
Requires the creation of a portfolio of original designs executed in a medium of choice. Explores various market segments of the industry and includes project reviews by critics who are specialists in these areas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: FASH 342 [Min Grade: D]
FASH 349 Fashion Design I 4.0 Credits
Poses fashion problems to be solved, with an emphasis on elements of design. Explores use of half-scale experimentation and development of "studies" as an aid in developing design ideas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 204 [Min Grade: D] or VSST 304 [Min Grade: D]

FASH 350 Fashion Design II 4.0 Credits
Explores sources of inspiration and requires students to translate and develop source material into creative garments. Stresses the extension and elaboration of ideas within a specific market.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 251 [Min Grade: D] or FASH 349 [Min Grade: D]

FASH 351 Fashion Design III 4.0 Credits
Requires development of original designs and execution incorporating draping, drafting, and flat-pattern techniques. Facilitates the development of a realistic approach to garment design in terms of industrial restrictions, and market segmentations. Includes professional critiques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 252 [Min Grade: D] and FASH 343 [Min Grade: D]

FASH 352 Fashion Design IV 4.0 Credits
Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 351 [Min Grade: D]

FASH 359 Independent Study in Fashion Design 0.5-12.0 Credits
Provides individualized study in fashion design in a specialized area of study. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 363 Couture Techniques 3.0 Credits
Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 351 [Min Grade: D]

FASH 450 Machine Knitting 3.0 Credits
Machine Knitting is an introduction to knitwear design specialization. Students learn to style and draw knit garments to develop a professional portfolio. Technical information regarding yarn analysis, stitch construction, pattern and garment construction are the focus of this class.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 9 credits
Restrictions: Can enroll if major is FASH.
Prerequisites: FASH 241 [Min Grade: D] and VSST 112 [Min Grade: D]

FASH 451 Accessory Design 3.0 Credits
This course provides students with concepts and skills to design traditional and contemporary fashion accessories with emphasis in embroidery; applique; hand painting; and clay, plastic and ceramic work.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 452 Millinery Design 3.0 Credits
Familiarizes students with the techniques and processes involved in hat making. Emphasis will be placed on historical perspectives and materials.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 453 Intimate Apparel Design 3.0 Credits
This course will offer an introduction to the foundations and sleepwear marketplace. Primary focus will be on the design and execution of two pieces for this market. Students will learn how to construct a bra (molded cups) and how to incorporate these details into their final looks for this market. In addition, students will learn the safe operation of the specialty sewing machines for knit construction.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 454 Advanced Fashion Drawing 3.0 Credits
Through in-class creative assignments with experimental techniques, students learn to respond rapidly, originally, and with increased focus to resolve drawing and design problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 212 [Min Grade: D]

FASH 464 Professional Portfolio 3.0 Credits
This course will involve preparation and execution of a finished designer portfolio for couture, 7th Avenue or the boutique American market. Included in the preparation is research of their chosen entry into the marketplace. May be repeated for credit if topics vary. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is FASH and classification is Senior.
Prerequisites: FASH 314 [Min Grade: D]

FASH 465 [WI] Special Topics in Fashion Design 0.5-12.0 Credits
Provides study in fashion design on a special topic or on an experimental basis. May be repeated for credit if topics vary. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.
FASH 466 Business of Fashion 3.0 Credits
Presents the following topics in seminar fashion merchandising, retail distribution, interpreting consumer demand, merchandise assortment planning, unit and inventory control and pricing, fashion marketing and manufacturing, including the marketing process, components of the fashion industry, market evaluation, demographic and psychological factors, manufacturing components and processes, and case studies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH and classification is Senior.

FASH 467 Style and the Media 3.0 Credits
Fashion Journalism is reading and writing about all aspects of fashion, including reporting, criticism and commentary about photography related to fashion published in newspapers or magazines, displayed on websites, aired on radio and/or TV. The style of the writers and also the aspects of dress they found significant is examined.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FASH 477 Fashion Design Seminar 3.0 Credits
Provides reading and discussion of pertinent topics of current concern in the professional area of fashion design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 491 Collection I 4.0 Credits
The second of a three-part series in which the student develops the senior collection. Requires the student to demonstrate the synthesis of a personal aesthetic and technical acumen.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: FASH 352 [Min Grade: D]

FASH 492 Collection II 3.0 Credits
Requires completion of senior collection and presentation in student fashion show.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 491 [Min Grade: D]

FASH 499 Independent Study in Fashion Design 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH I299 Independent Study in Fashion Design 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH I399 Independent Study in Fashion Design 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH T180 Special Topics in Fashion Design 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH T280 Special Topics in Fashion Design 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH T480 Special Topics in Fashion Design 0.5-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Film & Video
Major: Film & Video
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Program (CIP) code: 27-4031
Standard Occupational Classification (SOC) code: 27-2012; 27-4031; 27-4032

About the Program
The film and video major offers a balance of technical craft and artistic vision that prepares students to pursue professional careers in the film industry. The program is hands-on with ample production opportunities from the first year of study supported by a strong emphasis in the liberal arts and foundations of design. There is also substantial coursework in screenwriting and film studies.

This highly competitive program, with only sixty-four freshmen accepted annually, features smaller classes that foster student-faculty interaction and mentoring, as well as ample access to excellent equipment. The unique Drexel co-op and Los Angeles Summer Program enhance education by providing students with professional employment experience.

The Film and Video program also offers minors in Film Studies and Video Production.
Additional Information
For more information about this program, contact the program director:

Tom Quinn
Film & Video
Department of Cinema and Television
Antoinette Westphal College of Media Arts and Design
teq23@drexel.edu

For more details, visit the College's Film and Video (http://www.drexel.edu/westphal/academics/undergraduate/FMVD) page.

Degree Requirements

General Education Requirements
CIVC 101 Introduction to Civic Engagement 1.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
MATH 119 Mathematical Foundations for Design 4.0
UNIV A101 The Drexel Experience 2.0

Required Arts and Humanities students select a minimum of 12 credits
Required Natural Science students select a minimum of 8 credits
Required Social Science students select a minimum of 9 credits
Electives 24.0

Co-operative education (two terms) 0.0

AWCOMAD Requirements
ARTH 102 History of Art II: Renaissance to Romanticism 3.0
ARTH 103 History of Art: Modern Art 3.0
IDM 100 Introduction to Web Development 3.0
PHTO 110 Photography 3.0
VSST 108 Design I for Media 3.0
VSST 109 Design II for Media 3.0

Film and Video Core Courses
FMST 101 Film History I: Emergence 3.0
FMST 102 Film History II: New Waves 3.0
FMST 103 Film History III: Trends 3.0
FMST 250 The Documentary Tradition 3.0
FMST 304 Film Voice and Style 3.0
FMVD 110 Basic Shooting and Lighting 3.0
FMVD 115 Basic Editing 3.0
FMVD 120 Basic Sound 3.0
FMVD 200 Acting for the Screen 3.0
FMVD 202 Directing for the Screen 3.0
FMVD 210 Documentary Video Production 3.0
FMVD 215 Narrative Video Production 3.0
FMVD 218 Intermediate Sound 3.0
FMVD 220 Experimental Video Production 3.0
FMVD 226 Intermediate Sound 3.0
FMVD 228 Visual Storytelling 3.0
FMVD 235 Intermediate Lighting 3.0
FMVD 237 Intermediate Editing 3.0
FMVD 286 Producing for Features 3.0
FMVD 322 Production Workshop I 3.0
FMVD 323 Production Workshop II 3.0
FMVD 495 Senior Project in Film and Video (3 semesters at 3.0 credits) 9.0
SCRP 270 [WI] Screenwriting I 3.0
SCRP 280 [WI] Writing the Short Film 3.0
SCRP 370 Screenplay Story Development 3.0
TVPR 100 TV Studio: Basic Operations 3.0

Four Advanced Production Choice Courses 12.0

Sample Plans of Study

Co-op Cycle A

(See below this plan for Co-op Cycle B)

Term 1 Credits
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
FMST 101 Film History I: Emergence 3.0
FMVD 110 Basic Shooting and Lighting 3.0
IDM 100 Introduction to Web Development 3.0
UNIV A101 The Drexel Experience 1.0
VSST 108 Design I for Media 3.0

Total Credits 18.0

Term 2 Credits
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
FMST 102 Film History II: New Waves 3.0
FMVD 120 Basic Sound 3.0
SCRP 270 [WI] Screenwriting I 3.0
UNIV A101 The Drexel Experience 1.0
VSST 109 Design II for Media 3.0

Total Credits 18.0

Term 3 Credits
ARTH 102 History of Art II: Renaissance to Romanticism 3.0
CIVC 101 Introduction to Civic Engagement 1.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
FMVD 115 Basic Editing 3.0
MATH 119 Mathematical Foundations for Design 4.0
TVPR 100 TV Studio: Basic Operations 3.0

Total Credits 17.0

Term 4 Credits
ARTH 103 History of Art: Modern Art 3.0
FMST 250 The Documentary Tradition 3.0
FMVD 200 Acting for the Screen 3.0
FMVD 210 Documentary Video Production 3.0
FMVD 218 Intermediate Cinematography 3.0
FMVD 228 Visual Storytelling 3.0

Total Credits 18.0

Term 5 Credits
COOP 101 Career Management and Professional Development 0.0
FMVD 202 Directing for the Screen 3.0
FMVD 226 Intermediate Sound 3.0
FMVD 237 Intermediate Editing 3.0
PHTO 110 Photography 3.0
SCRP 280 [WI] Writing the Short Film 3.0

Total Credits 15.0

Term 6 Credits
FMST 103 Film History III: Trends 3.0
FMVD 215 Narrative Video Production 3.0
FMVD 235 Intermediate Lighting 3.0
FMVD 286 Producing for Features 3.0
Natural science elective 4.0

Total Credits 16.0

Term 7 Credits

Co-Op/Career Opportunities

Opportunities

Students who study film and video can move on to careers as film or video directors, producers, video or film editors, directors of photography (film), camerawork, as well as grips and special effects coordinators.

Co-Op Experiences

Some past co-op employers of film and video students include:

- USA Network, New York
- Comcast, Philadelphia
- Bad Robot, Los Angeles
- ICM, Los Angeles
- Focus Features, New York
- Law & Order, New York
- NFL Films, Mount Laurel, New Jersey
- Tribeca Film Center, New York
- National Geographic Television, Washington DC
- NBC, New York
- Paramount Studios, Los Angeles
- MTV, New York

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

Film and Video facilities include a shooting studio with green screen; two screening rooms; a fully equipped HD television studio; post-production labs for editing, color correction and audio recording & mixing; specially outfitted multimedia rooms; state of the art film production equipment including cameras, steadicams, lighting and audio equipment.

Additionally, the college operates DUTV (http://www.dutv.org), a HD cable television station reaching over 350,000 households.

Minor in Film Studies

The Minor in Film Studies comprises courses that cover the major artistic and institutional developments in cinema from its late-nineteenth-century origins to the present. As these courses cover a variety of critical topics that are essential to any film studies curriculum - such as the study of major genres and auteurs, the technologies and techniques contributing to the development of the medium, as well as the historical circumstances that influenced the cinema’s evolution since its inception - they will establish a sound critical foundation for students to choose and to flourish in the subsequent courses required for the minor.

The Minor in Film Studies is open to all University students.

Minor in Video Production

The Minor in Video Production provides a thorough foundation in filmmaking craft. Once core required courses are completed, students have the opportunity to apply newly acquired skills in their choice of several advanced film production courses or to explore television studio production.

The Minor in Video Production is open to all University students.

Film & Video Faculty

John Avarase, BS (Drexel University). Assistant Teaching Professor. Composer, film and video scores, mixing and sound design.

Alison Bagnall, BA (Yale University). Visiting Professor. Filmmaker

David Culver, AS (Graham Junior College) Manager of the Paul F. Harron Studios/DUTV. Associate Teaching Professor. Film, Video, Station Management, Emerging Media Technology

David Deneen, BFA (Philadelphia College of Art). Assistant Teaching Professor. Film & video.
Gerard M. Hooper, MFA (Temple University). Associate Teaching Professor. Film and video; European and non-western cinema.

D. B. Jones, PhD (Stanford University). Professor. Film and video; cinema studies.

Matthew Kaufhold, MA (University of North Carolina) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Karin P. Kelly, MFA (New York University) Department Head, Cinema and Television. Associate Professor. Film and video; filmmaker and author.

Yvonne D. Leach, MFA (Temple University). Associate Professor. Television studies.

Thomas Quinn, MFA (Temple University) Program Director, Film & Video. Assistant Professor. Writer, Director, filmmaker.

Philip W. Salas, BS (Temple University). Assistant Teaching Professor. Utilization of advanced set top box data to measure fragmented viewing behavior. Impact of new television distribution technologies on traditional broadcasters and multichannel program providers.

David A. Schwartz, BA (Rider University). Associate Teaching Professor. Steadicam operator; cameraman.

Andrew Susskind, BA (Harvard University) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Jocelyn Tarquini-Motter, MFA (American Film Institute). Assistant Teaching Professor. Editing.

Albert S. Tedesco, MA (University of Pennsylvania) Director of the Paul F. Harron Graduate Program in Television Management. Teaching Professor. Media Management, Organizational Structure, Research Methods, Media Ethics, Media Law, The Regulatory Environment, Technology Assessment, Media Theory, Media Analytics

Gregory S. Womart, MFA (University of Pennsylvania). Assistant Professor. Cinema studies; film history.

Game Design and Production

Major: Game Design and Production
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 36.0113
Standard Occupational Classification (SOC) code: 15-1131

About the Program

Drexel's nationally-ranked Game Design and Production program combines a strong comprehension of animation and interactivity, along with an understanding of design, programming, production and team work.

The major mirrors a sector that has seen an explosion in gaming, not just in homes, but throughout industry and the corporate world. The gaming industry has grown from just a source of entertainment to one that also encompasses the use of serious gaming, where gaming technologies are used in education and training.

Fully immersive games now use new methods of interaction, such as multi-touch displays, motion control and haptic devices. To best prepare themselves for the demands of careers in these cutting-edge disciplines, students pursue a foundation of design and technology, taking core courses in all aspects of digital media, completing a six month co-op and delving into rigorous coursework in many areas of specialization.

To complement the creative focus of the new Game Design & Production major, a sister concentration in game programming and development (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/gameprogramminganddevelopment) is offered as part of Drexel's major in computer science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience).

Additional Information

To find out more about this major, visit the Westphal College's Game Design and Production Major (http://www.drexel.edu/westphal/undergraduate/GDAP) page.

Co-op/Career Opportunities

Drexel students have broad training in all areas of game design and production, and our students have career opportunities in both entertainment gaming and the broader simulation/training industries.
Co-op Experiences
In an industry where the process of building a career often begins with a few key contacts, the co-op program gives Drexel students the chance to begin meeting people and networking. A recent co-op student at Microsoft Studios worked with producers on several different titles and was offered a job in his junior year that was waiting for him after he completed his senior year.

In addition to the large entertainment companies, students have opportunities to explore how game design is applicable to many local industries ranging from pharmaceuticals to aircraft.

Career Experiences
Our students work in leading entertainment companies including Microsoft Studios, Disney, EA Games, Blizzard, Zynga, 343 Industries, Midway, and NCsoft. Other students chose smaller studios or launch their own companies. Many students chose to work outside of the leading studios by applying their game production skills to more serious endeavors for companies including Lockheed, Comcast, Vanguard, and The Ride Works.

Jobs titles range from Technical Artist, Lead Cinematic Animator, Program Manager, Associate Producer, Marketing Manager, Animator, Facial Capture Artist, Motion Capture Associate, Simulation Developer, etc.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities, or Drexel’s RePlay Lab careers (http://www.replay.drexel.edu/careers.html) page.

Dual Accelerated Degrees
BS/MS in Digital Media
The accelerated degree programs enable academically qualified students to earn both a bachelor’s and a master’s degree in five years instead of six — graduating sooner than they would in traditional programs. In addition, the graduate-level courses students take in their junior and senior years are included in their undergraduate tuition, which saves almost a year’s worth of their MS tuition.

Current Drexel students may apply for the an accelerated degree programs through the Graduate College of Drexel University (http://drexel.edu/graduatecollege) after completing 90.0 credits, but no more than 120.0 credits. Many of our accelerated students have gone on to careers at leading companies including Pixar, Microsoft Studios, Dreamworks, NCSoft, and Disney.

Game Design and Production Faculty
Theo Artz, BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Troy Finamore, MS (Drexel University) Program Director, Interactive Digital Media. Assistant Teaching Professor. Advertising, design and interactivity.

Nick Jushchyshyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects. Assistant Teaching Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (Carnegie Mellon University). Associate Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Temple University). Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Jichen Zhu, PhD (Georgia Institute of Technology). Assistant Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

Graphic Design
Major: Graphic Design
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0409
Standard Occupational Classification (SOC) code: 27-1024

About the Program
Westphal College’s Graphic Design curriculum provides a balance of traditional and technical artistic studies enhanced by general education coursework in the humanities and the physical and social sciences. Students develop a sophisticated approach to creative problem solving and hone skills in typography, image generation, corporate identity, web design, information graphics, three-dimensional design, and motion graphics. Working in both two and three-dimensional projects, students utilize the latest electronic applications and emerging technologies to stay current with the industry.

Graphic Design students can also pursue advanced elective coursework in web & motion graphic design, environmental graphic design (wayfinding systems, exhibition design, identity graphics), experimental publication design and other interdisciplinary special topics projects.

Additional Information
For more information about the major, visit the Graphic Design (http://www.drexel.edu/westphal/academics/undergraduate/VSCM) program web page.

- 4.0 Credits
- Term Credits: 18.0

---

**Drexel University**
See degree requirements (p. 512) for list of Graphic Design electives.
* Visual Studies (VSST) elective: choose from any upper-level VSST course.

### Co-op/Career Opportunities

Potential employers include advertising agencies, publishers, printers, independent and in-house design studios, museums and galleries, magazines and newspapers, and television. Training in visual communication prepares an individual for careers in many fields because the problem-solving methods and organizational skills it builds are widely applicable.

### Co-op Experiences

Some past co-op employers of graphic design students include:

- The Franklin Institute
- Philadelphia Museum of Art
- Quirk Books
- Esquire
- Intuitive Company
- Electronic Ink
- Razorfish
- WebLinc
- Happy Cog
- Philadelphia Union
- Hasbro
- Comcast
- National Constitution Center

### Career Opportunities

Our Graphic Design alumni go on to successful careers in a range of positions including Lead Designer, Creative Director, Art Director, Interaction Designer, and Owner or Partner of firms. Some of the companies where our alumni can be found include:

- Facebook
- Ann Taylor Inc
- ESPN
- America’s Test Kitchen
- Apple
- ex;it
- Comcast Corporation
- Intuitive Company
- Blue Cadet
- Time Inc.
- Hasbro
- Michael Graves Design Group
- Brooks Brothers
- Philadelphia Museum of Art
- Longwood Gardens
- Under Armour
- AgileCat
- Marvel Entertainment
- eCity Interactive
- Sesame Workshop
- National Constitution Center
- Bloomberg
- Saatchi & Saatchi
- Vera Bradley
- Kikkerland
- The Franklin Institute
- QVC

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

### Facilities

The Graphic Design studios are located on the fourth floor of the URBN Center in the Antoinette Westphal College of Media Arts and Design. There are five dedicated studios equipped with up-to-date electronic and traditional tools. Studios have work surfaces for traditional practices that will accommodate 15 students, and wall surfaces for critiques or posting examples of printed work. In addition, students have access to a dedicated, non-scheduled Graphic Design “Open Lab” equipped with all necessary technology and work surfaces.

### Graphic Design Faculty

Jack Cliggett, MFA (Syracuse University). Associate Professor. Graphic design; logo design, corporate identity, Chinese propaganda, and thesis.

Joshua Gdovin, BS (Drexel University). Visiting Teaching Professor. Graphic design; web graphics; motion graphics, and thesis.

Jody Graff, BS (Drexel University) Program Director, Graphic Design. Associate Professor. Graphic design; publication design, annual report design, three-dimensional graphics and packaging, environmental graphic design (exhibition and wayfinding), and thesis.

Eric Karnes, MFA (Virginia Commonwealth University). Assistant Professor. Graphic design; logo design, corporate identity, typography, advanced typography, publication design, book design, professional portfolio, thesis.

David Raizman, PhD (University of Pittsburgh). Professor. Graphic design; History of Modern Design, Graphic Design; 20th Century & Beyond
William Rees, BS (Drexel University) Associate Program Director, Graphic Design. Associate Teaching Professor. Graphic design; logo design, corporate identity, publication design, electronic imaging, print production, professional portfolio, and thesis.

Sandra Stewart, BFA (Tyler School of Art, Temple University) Academic Associate Dean, Antoinette Westphal College of Media Arts and Design. Associate Professor. Graphic design; logo design, corporate identity, publication design, three-dimensional graphics and packaging, and thesis.

Mark Willie, MFA (Boston Museum School of Fine Arts), Teaching Professor. Graphic design; typography, logo design, corporate identity, publication design, book design, professional portfolio, and thesis.

Shushi Yoshinaga, BFA (Philadelphia College of the Arts). Associate Professor. Graphic design; letterform, typography, and thesis.

Interactive Digital Media

Major: Interactive Digital Media
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0801
Standard Occupational Classification (SOC) code: 15-1134; 27-1014

About the Major

We design for people, not screens. We are the evangelists of interactivity. We focus on humans and their behavior; on verbs, not nouns. We are empathetic. We care about the user experience. Great content and great design are the tip of the iceberg when it comes to interactive products that engage the mind, heart and body. We aim for design that engages and delights. We are passionate. We create digital products that promote and inspire human activity, and which adapt to individual choice and deliver personalized content. Our products and processes are agile. They can change gracefully over time and still retain their own unique identity. We are future-proof.

Here, we understand that the past is just as important as the future. We learn the core principles to define and stay ahead of the curve. We are flexible and versatile. We know that in an industry of constant change our work is never done and our education never stops. We prepare for this change by building upon a solid foundation in order to discover the trends of tomorrow. To us, work and play have the same definition. We are curious.

We believe that discoveries are made through experimentation and that magical things happen through collaboration. Desktops, laptops, mobile devices, glasses and watches are all the beginning. We know that anything that can be connected will be connected. We are adaptable. While others focus on technology, we choose to focus on creativity. We believe that design and code are inseparable. They are the tools that we use to render the intent of our imagination.

Additional Information

To find out more, visit the Westphal College’s Interactive Digital Media major (http://www.drexel.edu/westphal/academics/undergraduate/WBDV) web page.

- **Term Credits**: 15.0

**Term 8**
- ARTH 300 [WI]: History of Modern Design 3.0
- DIGM 451 [WI]: Explorations in New Media 3.0
- IDM 361: Interactive App Design I 3.0
- IDM 371: Interactive Digital Media Workshop I 3.0
- Arts and Humanities elective 3.0
- **Term Credits**: 15.0

**Term 9**
- DIGM 350 [WI]: Digital Storytelling 3.0
- IDM 372: Interactive Digital Media Workshop II 3.0
- Free elective 3.0
- History (HIST) Elective 3.0
- IDM Elective 3.0
- **Term Credits**: 15.0

**Term 10**
- DIGM 490: Digital Media Senior Project 3.0
- DIGM 491: Digital Media Senior Project Studio 1.0
- **Term Credits**: 16.0

**Term 11**
- DIGM 490: Digital Media Senior Project 3.0
- DIGM 491: Digital Media Senior Project Studio 1.0
- Free Electives 9.0
- Social Science Elective 3.0
- **Term Credits**: 16.0

**Total Credit**: 186.0

### Co-op/Career Opportunities

Students who study interactive digital media can move on to careers as web designers, graphic designers, digital media designers, user research & experience specialists, multimedia artists, interactive designers, web programmers, and web user interface designers.

### Co-op Experiences

Some past co-op employers of film and video students include:

- Brownstein Group
- Comcast
- Digitas Health
- eCity Interactive
- Electronic Ink
- Happy Cog

Visit the Drexel Steinbright Career Development Center (http://drexel.edu/scdc) web page for more detailed information on co-op and post-graduate opportunities.

### Dual Accelerated Degree

The accelerated degree program enables academically qualified students to earn both their bachelor's degree and a master's degree in digital media — graduating sooner than they would in traditional programs.

Current Drexel digital media students may apply for the accelerated BS/MS degree through the Graduate College after completing 90.0 credits,
but no more than 120.0 credits. Contact the Graduate College (http://www.drexel.edu/graduatecollege) for further information.

### Minor in Interactive Digital Media

The Interactive Digital Media Minor requires the completion of eight courses (minimum 24 credits). The minor provides basic foundations in interactivity, including: design and development of websites and mobile applications with the opportunity for individualized tailoring according to the student’s interests. It is open to all University students and is administered and advised by the Digital Media program.

### Facilities

Digital media program facilities include a motion capture and green screen studio, a screening room, DSLR digital still cameras, HD video cameras and lighting equipment, triple boot PowerMac stations (Mac / Windows / Unix) with dual monitors, wacom tablets, game consoles, mobile devices, and 2 undergraduate open labs with 24/7 access.

Additionally, the program houses the RePlay Lab (http://replay.drexel.edu/facilities.html) in the URBN Center which is a collaborative effort between the Digital Media program and the Computer Science department (in the College of Computing & Informatics). At Drexel University, game development does not "live" in solely one department, and so mirrors the architecture and best practices.

### Interactive Digital Media Faculty

Theo Artz, BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

Kurt Aspland, BFA (Art Center College of Design). Adjunct Instructor. Illustrator, graphic designer and creative director

John Berton Assistant Professor. Visual effects, lighting and rendering Computer-Generated Imagery (CGI)

Chester Cunan, BS (Drexel University). Adjunct Instructor.

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Christopher Fernandez, BS (Drexel University). Adjunct Instructor. Designer and illustrator in the world of interactive design creating innovative, exciting digital campaigns and solutions

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Troy Finamore, MS (Drexel University) Program Director, Interactive Digital Media. Assistant Teaching Professor. Advertising, design and interactivity.

Bernard Flakoff, BS (Temple University). Adjunct Instructor. Creative content and strategic analytics for innovative and advanced technology platforms

Kevin Gross, MS (Drexel University). Adjunct Instructor.

Nick Jushchysyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects. Assistant Teaching Professor. Visual effects, digital media and animation.

Jason Kirk, MS (Drexel University). Adjunct Instructor.

Frank J. Lee, PhD (Carnegie Mellon University). Associate Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Temple University). Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Kenneth Oum, MS (Drexel University). Professor. Computer interface gaming, web development, video production.

Mark Petrovich, MS (Drexel University). Adjunct Instructor.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Ryan Reed, BS (Drexel University). Adjunct Instructor.

Patrick Richardson, MS (Drexel University). Professor. Applied physics, electronics, software scripting, and physical computing.

Philip Sinatra, BS (Drexel University). Professor. Website/application programming.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (Vienna University of Technology) Program Director, Digital Media. Associate Professor. Educational use of digital media and computer games.

Ed Yakovich, MS (Philadelphia University). Professor. HTML/CSS/JS architecture and best practices.
Kenneth Yanoviak, BA (Temple University). Adjunct Instructor. Digital photographer

Diane Zatz Adjunct Instructor.

Jichen Zhu, PhD (Georgia Institute of Technology). Assistant Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

**Interior Design**

**Program Philosophy and Mission**

The interior design program at the Antoinette Westphal College of Media Arts & Design is committed to developing the leaders of tomorrow. We believe that combining a studio-based, sequential interior design curriculum, with broad liberal arts study and the experiential learning of a well-established co-op program develops skillful designers, creative thinkers and potential leaders. We offer each student the opportunity for intellectual and personal growth through a hands-on approach to teaching, advising and collaborating. Developing skilled designers, creative thinkers, responsible citizens and professional leaders through academic, experiential and professional learning is the mission of the interior design program. We seek to cultivate students who acknowledge their responsibilities to the safety and well-being of the public and the stewardship of the environment and who can lead in a multifaceted profession and ever-changing world.

For more information about this major, visit the College's Interior Design (http://www.drexel.edu/westphal/academics/undergraduate/INTR) page.

**About the Program**

The undergraduate interior design program explores the behavioral, technological, environmental and aesthetic aspects of interior design within the context of increasingly more complex design projects. Combined with art and art history and general education requirements, a core of interior design courses creates a unique education at the forefront of design. Through academics grounded in problem-solving design studios, cooperative employment, and a dedicated faculty, the Interior Design program prepares students for leadership positions in the industry. The Interior Design program is ranked in the Top10 by DesignIntelligence, America's Best Architecture & Design Programs.

The BS interior design program is CIDA (Council for Interior Design Accreditation) and NASAD (National Association of Schools of Art & Design) accredited.

### Co-op/Career Opportunities

Interior design is a multi-faceted field and includes careers with interior design firms, architectural firms, and facilities management organizations; in governmental agencies; and in the furniture and textile industries. Full-time paid employment in the profession is an integral component of the program at Drexel. The six-month co-operative education, undertaken in the junior year, provides project-based experience as well as the daily operation of a design firm. Students may opt to do their co-op in Philadelphia or in another location of their choosing. Through a required course and career advisement services offered by the Steinbright Career Development Center, students develop the ability to market themselves and obtain jobs in leading firms, worldwide.

#### Co-op Experiences

Some past co-op employers of interior design students include:

- Children’s Hospital of Philadelphia Facilities
- Daroff Design
- DAS
- Disney
- Eberlein Design Consultants
- Ewing Cole
- Floss Barber Inc.
- Gensler
- Hillier Lewis
- Herman Miller
- HOK
- Jacobs Associates
- Knoll International
- L2 Partridge
- Marguerite Rogers
- Nelson
- Perkins Eastman
- RJMJ
- Stantec
- University of Pennsylvania
- West Chester University

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

### About the Accelerated Degree Program

Qualified students in Interior Design have the option of continuing into the graduate Interior Architecture + Design program to obtain a dual BS/MS degree. This program allows highly motivated students to graduate with both degrees in a total of five years. Students apply for this accelerated program when they complete 90.0 credits of coursework, and before completing 120.0 credits.

**Additional requirements for acceptance into the Dual Degree Program:**

1. Overall GPA of undergraduate coursework – 3.2 minimum
2. Overall GPA of interior design studio coursework – 3.5 minimum
3. Portfolio Review: interior studio work and foundation visual work
4. Essay: reason for application, professional goals and leadership qualities you possess
5. Two letters of recommendation speaking to your work ethic and leadership skills

**Evaluation Process**

A committee of interiors faculty reviews the applications and discusses the merits of the student to undergo the intensity and rigor of the final two years of the program. The Committee consists of no less than three members – Director of the Interiors programs, Associate Director BS Interior Design program and the Associate Director MS Interior Architecture & Design program.

Students should visit the Westphal College of Media Arts and Design (http://www.drexel.edu/westphal) for more information.
Facilities

The interior design program is housed in the URBN Center, a state of the art design and arts facility on Drexel’s campus. The URBN Center officially opened in September 2012. A hub for creative minds to gather, share ideas and work together to bring those ideas from the mind to the page, and into the world of tomorrow, interiors students benefit from a wide-range of resources including interior design studios, the interior design resource library, a hybrid making lab, wood shop and computer laboratories. The Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) is open to all Westphal students and has state-of-the-art fabricating equipment including 3-d printers, laser cutters and CNC Router. The Westphal Print Center (http://drexel.edu/westphal/about/overview/making_spaces/WestphalPrintCenter) is a full-service, low-cost facility and is accessible to students from on and off campus.

The URBN Annex houses a black box theater, screening room and the Leonard Pearstein Gallery (http://www.drexel.edu/pearsteinegallery). Additional studio and classroom space in the Peck Problem Solving and Research Center and the Design Arts Annex accommodate photography, basic design, painting, sculpture and a full woodworking shop with industrial-quality equipment.

Philadelphia, one of the nation's major design centers, gives interior design students the vitality of the contemporary arts at local galleries; easy access to many museums, libraries, renowned buildings, as well as design centers located in Philadelphia, New York City and Washington, D.C.

Architecture & Interiors Faculty

David Ade, AIA, LEED A.P., NCARB, BArch (Drexel University). Adjunct Associate Professor. Principal, SMP Architects, sustainable design

Ulrike Altenmuller-Lewis, AIA, Dr.-Ing. (Bauhaus Universität Weimar). Associate Professor. Research on educational environments; translations of architectural theory texts.

Jason Austin, LEED A.P., MLA Landscape Architecture (University of Pennsylvania). Assistant Teaching Professor. Principal, Austin + Mergold; landscape architecture, urban design.

Stephen Bonitatibus, AIA, MArch (University of Pennsylvania). Adjunct Professor. Principal, Bonitatibus Associates; traditional residential architecture.

Anthony Bracali, AIA, LEED A.P., BArch (Drexel University). Adjunct Associate Professor. President, Friday Architects; civic, non-profit and community-based architecture.

Mark Brack, PhD (University of California at Berkeley). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Daniel Chung, RA, PE, MArch, MSE (Yale University, Princeton University). Assistant Professor. Building performance and exterior envelope systems.

Jon Coddington, AIA, MArch (University of Pennsylvania). Professor. Architecture, urban design and planning.

Rena Cumby, BArch, MS (Drexel University) Department Head, Department of Architecture & Interiors. Associate Professor. Interior designer; foundation studies and design education.

John DeFazio, AIA, BArch (New York Institute of Technology). Adjunct Professor. Architecture in film.

Katherine Dowdell, AIA, BS Interior Design (Drexel University). Adjunct Assistant Professor. Principal, Farragut Street Architects; historic preservation.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Dyer Alfred “Lyndsay” Falck, RA, ARCUK, ARIBA, NCARB, M.URP (University of Capetown, South Africa). Adjunct Professor. Building technology.

Jeff Fama, MArch (State University of New York at Buffalo). Adjunct Associate Professor. Retail, entertainment, and theater design.

Susan Feenan, BArch (Temple University). Adjunct Assistant Teaching Professor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (Pennsylvania State University). Adjunct Assistant Professor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Don Jones, FAIA, LEED DD+C, MArch (University of Pennsylvania). Adjunct Professor. Principal, Director of Sustainable Design, Ewing Cole; sports venues.

Tim Kearney, AIA, MArch (University of Pennsylvania). Adjunct Professor. Principal, CuoetoKEARNEY design; sustainable design.

Nicole Kollick, MArch (University of California) Director, Design Futures Lab. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Jeffrey Krieger, AIA, LEED AP, MArch (Carnegie Mellon University). Adjunct Associate Professor. President, Krieger and Associates Architects; residential design.

Karim Kuentler, MS (Bank Street College of Education and Parsons) Associate Dean for Research and Graduate Studies. Associate Professor. Interior design for corporate and commercial facilities.

Maria Kutruff, MS (Drexel University). Adjunct Assistant Professor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

Robert Nalls, AIA, NCARB, MArch (University of Pennsylvania). Adjunct Professor. Principal, Nalls Architecture Inc.; institutional and educational buildings.

Diana S. Nicholas, RA, AIA, NCARB, MFA (University of the Arts, Philadelphia) Associate Director of MS Interior Architecture and Design, Director, Sustainability in the Built Environment minor. Assistant Professor. Coordinator, Sustainability in the Built Environment.
Jacklynn Niemiec, LEED BD+C, MArch (University of Pennsylvania). Assistant Teaching Professor. Graphic representation

Karen Pelzer, NCIDQ, BS Interior Design (Drexel University). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Marilynne L. Rose, NCIDQ, MS (Drexel University). Associate Teaching Professor. Residential and commercial design.

James Rowe, AIA, MArch (University of Pennsylvania). Adjunct Associate Professor. Principal, Studio Agoos Lovera; institutional, recreation, corporate, civic and residential design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ (Drexel University) Director of Interior Programs. Associate Professor. Research on user participation and the design process.

Paul Salvaggio, AIA, LEED AP, NCARB, BArch, BS Arch (Pennsylvania State University). Adjunct Assistant Professor. Principal, Arcus Design Group; residential architecture.

Rachel Schade, AIA, MArch (University of Pennsylvania) Program, Architecture, Associate Director for Student Placement. Associate Teaching Professor. Principal, Rachel Simmons Schade Architect. Work-study placement; residential, graphic representation.

Harris Steinberg, FAIA, MArch (University of Pennsylvania) Executive Director, Lindy Institute for Urban Innovation. Distinguished Teaching Professor. Urban design and civic engagement.

Simon Tickell, AIA, MArch (University of Pennsylvania). Associate Teaching Professor. Principal, Simon J Tickell Architect; educational and museum buildings, residential design.

Nancy Trainer, FAIA, AICP, LEED, AFAAR, MArch (University of Pennsylvania) Associate Vice President of Design & Planning at Drexel. Adjunct Teaching Professor. Planning, institutional design.

Ada Tremonte, NCIDQ, BS (Drexel University) Associate Director, BS Interior Design. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

Emeritus Faculty

Judith Bing, MArch (Yale University). Professor Emeritus. Research on traditional architecture of the Balkins and Anatolia

Sylvia Clark, MArch (University of Pennsylvania). Professor Emeritus.

Paul M. Hirshorn, FAIA, MArch, MCP, (University of Pennsylvania). Professor Emeritus.

Marjorie Kriebel, BArch (University of Pennsylvania). Professor Emeritus.

Music Industry

Major: Music Industry
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 187.0 - 188.0
Co-op Options: Two Co-ops (Four years)
Classification of Instructional Programs (CIP) code: 50.1003
Standard Occupational Classification (SOC) code: 27-2041

About the Program

The degree in music industry offers the highly motivated student a program of study that combines education in music, music industry practices, and music technology with career preparation. Two concentrations are offered—Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP)—providing hands-on experience and a strong academic foundation in relevant areas of this rapidly changing industry. The music industry curriculum is divided into four areas which are combined with cooperative experience: general education, music core, music industry core, and concentration requirements.

In an industry where the process of career building often begins with a few key contacts, the cooperative education program provides Drexel students the opportunity to meet industry professionals and network. The program prepares students for careers in the music industry in such diverse positions as recording engineer, music producer, sound designer, music lawyer, business manager or music publisher. The co-op experience during the sophomore and junior year summer terms involves full-time career-related employment, during which students gain valuable insight into how the entertainment industry works.

About the Concentrations

The major offers two concentrations: Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP):

- The Music Industry Business (MIBU) concentration provides a rigorous academic foundation complemented by a real-world hands-on, highly-intensive business experience. This mission is realized through the students' participation in the MAD Dragon Music Group, a group of student-run enterprises including: MAD Dragon Records, DraKO Booking Agency, MAD Dragon Publishing, MADKo Concert Promotions and a BANTIC media.

- The Recording Arts and Music Production (RAMP) concentration focuses on the techniques and technologies of music and audio production. As well as providing the technology-oriented student with the necessary skills to perform as an audio engineer or record producer, the concentration teaches students a full range of industry functions including post-production audio, live sound engineering, and music and audio freelancing skills. The concentration encourages the technology student to interact with the students in the business concentration by recording, mixing and mastering the music for MAD Dragon Music Group projects, and engaging in live performance production.

All Music Industry students qualify to apply for a minor in business administration after completing their music industry core requirements. This emphasis on business courses as part of the core requirements is one of the foundations of the program.

Special Admissions Considerations

Students wishing to be admitted to the music industry major must meet or exceed the general requirements for admission to the University and the College of Media Arts and Design.

The program no longer accepts hard-copy portfolios. However, when applying to the Music Industry program, applicants are encouraged to use the portfolio portal provided on the Admissions Instructions webpage to upload electronic examples of pertinent activities (music and/or business
and entrepreneurial), as well as a resume of music industry related experience.

In their major-specific essays, applicants should address their reasons for selecting the music industry major at Drexel and share their passion for this unique area of study.

For more information about this major, visit the College's Music Industry (http://www.drexel.edu/westphal/academics/undergraduate/MIP) page.

**Degree Requirements**

All students take the same general education, music industry core and business courses. Students choose their concentration at the time of admission; however it is possible to switch as late as the beginning of junior year.

**Concentrations:**

- Music Industry: Business (MiBU) Concentration
- Music Industry: Recording Arts & Music Production (RAMP) Concentration

Students are also able to take courses in any other concentration as long as they fulfill the prerequisite requirement(s) and there is room in the class to accommodate the student.

About the Accelerated Degree Program

The BS in Music Industry/MBA program offers students a program that combines an undergraduate degree in music business and technology with an MBA degree awarded by the Drexel LeBow College of Business. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

The program is offered to qualified students who apply for this option prior to the end of freshmen year or prior to the completion of 90 credits. All students who apply for this option must take the GMAT entrance exam.

Students selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have scored 570 prior to the end of the tenth term in order to continue throughout the entire undergraduate portion of this program or the student will not be able continue on to the MBA.

BS/MBA students may be waived from two MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing on the LeBow College's website for additional information.

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

Additional requirements for the dual degree program:

- A minimum of 3.2 cumulative GPA must be maintained throughout the entire undergraduate portion of this program or the student will not be able continue on to the MBA.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0605
Standard Occupational Classification (SOC) code: 27-4021

About the Program
The Drexel University Photography program teaches students how to develop a unique photographic vision using a combination of aesthetics and technology. Using both applied and theoretical teaching methods and blending traditional processes with current digital technologies, the photography curriculum provides aspiring photographers with the breadth of experience and knowledge required to succeed in today's marketplace.

The photography foundation courses are the same for each student until their third year, at which point they design a custom path of study that culminates in their senior thesis portfolio. Our alumni's achievements reflect the diversity built into our program. They own successful photography studios, teach in high school and college programs, serve as curators, work as magazine photo editors and operate their own digital illustration firms.

The College's extensive photographic facilities (http://www.drexel.edu/westphal/undergraduate/PHTO/Facilities) are available to every photography major at Drexel.

Additional Information
For more information about this major, visit the College's Photography (http://www.drexel.edu/westphal/undergraduate/PHTO) website.

Co-op/Career Opportunities

Photographers pursue careers in a wide variety of fields. Primary choices among Drexel graduates include journalism, illustration, fashion and advertising, and fine arts.

Recent co-op placements have included:

- Micheal Creagh, New York City
- The Edywnn Houk Gallery, New York City
- Jonathan Pushnik, Advertising Photographer, Philadelphia, PA
- Philadelphia Magazine, Philadelphia, PA
- Jason Varney, Editorial Photographer, Philadelphia
- Saturday Night Live, New York City

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Photography

The minor in photography gives students a thorough understanding of photographic practices using a combination of aesthetics and technology. This flexible minor has been developed to accommodate both Antoinette
Westphal College of Media Arts and Design majors as well as majors from any other college. It is an excellent choice for students who are majoring in marketing, communications and journalism. Many employers in these fields are now routinely request that candidates have a good working knowledge of Photoshop and photographic practices.

Photography Faculty

Calip Capodici, BA (Montclair State University). Adjunct Instructor. Advertising portfolio development; photography production and photography & business.

Joanne Carrick, M.Ed (Tyler School of Art, Temple University). Adjunct Instructor. Photography and intermediate photography

Julia Cybularz, MFA (The School of Visual Arts). Adjunct Instructor. Photography; color photography, junior project in photography, advanced DSLR.

Trevor Dixon, BFA (University of the Arts). Adjunct Instructor. Advanced studio photography.

Michael Froio, BS (Drexel University). Adjunct Instructor. Photography; intermediate photography and fine black and white printing.

Niko Kallianiotis, MFA (School of Visual Arts). Adjunct Instructor. Photography; intermediate photography and photojournalism.

George McCordale, BS (Drexel University). Adjunct Instructor. Digital Photography III

Andrea Modica, MFA (Yale University). Professor. Photography; portraiture, photojournalism, palladium printing, and thesis.

Benjamin Riley, BS (Drexel University). Adjunct Instructor. Photography; intermediate photography and studio photography.

Diana Rossi, M.Ed (Arcadia University). Adjunct Instructor. Photography and intermediate photography.

Paul Runyon, BFA (The University of New Mexico) Program Director, Photography, Associate Professor. Studio photography, view-camera photography, studio lighting, business aspects of photography.

Ashley Smith, MFA (School of Visual Arts). Adjunct Instructor. Photography

Amanda Tinker, MFA (Temple University). Assistant Teaching Professor. Photography, history of photography, historical and alternative processes, and intermediate photography.

Jason Varmey, BS (Drexel University). Adjunct Instructor. Studio photography

L. Kylie Wright, BA (University of Virginia). Assistant Teaching Professor. Photography; digital photography, and master printing.

Product Design

Major: Product Design

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 187.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 50.0404

Standard Occupational Classification (SOC) code: 27-1021

About the Program

Product design combines the fields of art, business, and engineering to design the products people use every day. The program in product design focuses creativity and intellect, and prepares students for careers in a range of product design fields including corporate product design, design consulting, entrepreneurial endeavors, sustainable product development, and global design initiatives.

The major in product design is centered on teaching students the skills to develop and design products for a vast array of industries, specializing in multidisciplinary design research focused on product development and commercialization. It will also encourage collaboration in green design, sustainability and innovation in product development, facilitating and combining the fields of art, business, engineering and technology.

Students have the opportunity to create products ranging from furniture and toys to medical devices and consumer electronics in design competitions and charrettes. Students learn in state-of-the-art facilities that include a modeling shop and studio, laser cutters, 3D printers, rapid prototypers and molding clays and tools. The modeling shop and studio are large design-centered spaces, built to promote and sustain the studio culture students will enter upon graduation.

Students enrolled in the product design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

For more information about this major, visit the College’s Product Design (http://www.drexel.edu/westphal/academics/undergraduate/PROD) page.

Degree Requirements

In addition to the following requirements for graduation, students enrolled in the Product Design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

Co-op/Career Opportunities

Product designers have careers in a wide range of industries including consumer electronics, houseswares, furniture, fashion accessories, medical devices, toys, automotive and transportation. The work of product designers improves the usefulness and appearance of countless products that contribute to the quality of our work and personal lives.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Product Design

Students in this minor—through a combination of three studio courses and four applied lecture courses—learn to combine skills in creative problem solving with a visual product design process. Students develop product concepts and collaborate on the development of product ideas, including the creation and integration of new technologies, sustainability, health-care and socially responsible design, all of which are beneficial for design professionals.

The minor is specifically created to offer students a unique multidisciplinary studio experience. Students will develop skills in the rapid visualization of ideas, creative problem solving, transformative design thinking and an understanding of the product development process in a collaborative setting. This minor is offered to all students having an interest in developing product ideas, including students from the College of Engineering, the LeBow College of Business, and the School of Biomedical Engineering as well as College of Media Arts and Design students who would like to add a product focus to their design degree.

Academic requirements

To be eligible for the minor in product design, a student must have completed a minimum of 30.0 undergraduate credits, have declared a major, and have a minimum GPA of 2.7. No pre-requisite courses are required. Students may be encouraged to augment or prepare for this minor. Only upon review by the faculty advisor for the minor will students with design credits from other institutions or departments be allowed to apply these to the requirements.

Product Design Faculty

Michael Glaser, MFA (Ohio State University) Program Director for Product Design. Associate Professor. Westphal College of Media Arts & Design. Quantifying the designer’s intuition; the interplay between digital and physical forms; human desire to shape our surroundings.

Josh Longo, BA (Pratt Institute) Fabrication Shop Manager, Department of Design.

Erik Sundquist, MA (Florida International University) Hybrid Making Lab Director. Assistant Teaching Professor. Product design

Screenwriting and Playwriting

Major: Screenwriting and Playwriting
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0504
Standard Occupational Classification (SOC) code: 27-3043

About the Program

The Westphal College Screenwriting & Playwriting program guides students in their pursuit of a career writing for the stage or screen. The program emphasizes the principles of dramatic writing through a practical hands-on approach to instruction. Our graduates take away the skills, experience, and confidence to gain an edge in a rewarding and competitive field.

Students first acquire the essential skills of dramatic story telling, then apply those abilities to the creation of scripts that conform to professional standards. Drexel's pioneering co-op affords hands-on experience in the field, working alongside professional artists. Drexel marks the beginning of the life-long process of developing a writer's eye that sees the world from a different angle and allows writers to tell their own uniquely compelling stories.

For more information about this major, visit the College's Screenwriting & Playwriting (http://www.drexel.edu/westphal/academics/undergraduate/SCRP) page, or contact the Program Director, Matthew J. Kaufhold (http://drexel.edu/westphal/about/directory/KaufholdMatthew).

Term 4 Credits
- FMVD 115 Basic Editing 3.0
- SCRP 225 Playwriting II 3.0
- ENGL 203 [WI] Post-Colonial Literature I or 204 Post-Colonial Literature II 3.0
- Literature (ENGL) elective 3.0
- Free elective 3.0

Term Credits 15.0

Term 5 Credits
- COOP 101 Career Management and Professional Development 0.0
- ENGL 216 [WI] Readings in Drama 3.0
- SCRP 275 [WI] Screenwriting II 3.0
- THTR 210 Acting: Fundamentals 3.0
- Elective 3.0

Term Credits 12.0

Term 6 Credits
- FMVD 120 Basic Sound 3.0
- SCRP 370 Screenplay Story Development 3.0
- THTR 211 Acting: Scene Study 2.0
- ENGL 200 [WI], 201, 202 [WI] Renaissance to the Enlightenment or Romanticism to Modernism 3.0

Term Credits 7.0
Natural Science elective
Elective

Term Credits: 18.0

**Term 7**
DIGM 220 Digital Still Imaging I
SCR 280 [WI] Writing the Short Film
SCR 310 Literature for Screenwriters
Film Studies/Television Studies elective
Free elective

Term Credits: 15.0

**Term 8**
ENGL 315 [WI] Shakespeare
THTR 240 Theatre Production I
THTR 320 Play Direction
Arts and Humanities elective (excluding ENGL courses)
SCRP 380 Screenwriting Workshop I
or 382 Playwriting Workshop I

Term Credits: 15.0

**Term 9**
SCRP 381 Screenwriting Workshop II
or 383 Playwriting Workshop II
Writing choice
Arts and Humanities elective (excluding ENGL courses)
Literature (ENGL) elective
Social science elective

Term Credits: 15.0

**Term 10**
FMVD 215 Narrative Video Production
SCRP 495 Senior Project in Dramatic Writing I
WRIT 225 [WI] Creative Writing
Free elective
Social science elective

Term Credits: 15.0

### Co-op/Career Opportunities

Dramatic writing is writing for production — work intended for performance on the stage or screen. These days, “screen” can mean movie, TV, or computer, and the work can be anything from full stage plays to 15-second commercials to video game scripts. As the entertainment industry changes, so do the outlets for our students and graduates.

#### Co-op Experiences

By working for film and television production companies, theater organizations, entertainment management companies, magazines, advertising and public relations firms, and other professional writers, Screenwriting & Playwriting students gain valuable insights into how the entertainment industry works. In an industry where the process of building a career often begins with a few key contacts, the co-op program gives Drexel students the chance to begin shaping their own professional networks.
Screenwriting and Playwriting students secured Co-op or post-graduation positions with:

- Disney Video Animation
- Marvel Comics
- Lionsgate Films
- Skyless Games
- Arden Theater Company
- Campbell’s Soup
- Marvel Studios
- SyFy Network
- Nickelodeon
- Dynamite Entertainment
- prominent Hollywood talent managers
- The Playwright’s Center
- Valiant Entertainment
- Sciencefiction.com
- Major League Baseball Productions
- Panels.net
- Voice of America
- Fantagraphics
- the editor and publisher of a screenwriters’ magazine
- the production office of “Star Trek: Enterprise”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Screenwriting and Playwriting Faculty

Bruce Graham, BA (Indiana University of Pennsylvania). Associate Teaching Professor. Playwright.

Matthew Kaufhold, MA (University of North Carolina) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Matthew Quinn, MFA (Temple University) Program Director, Film & Video. Assistant Professor. Writer, Director, filmmaker.

Andrew Susskind, BA (Harvard University) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Courses

SCRP 220 Playwriting I 3.0 Credits
Introduces the basic tenets of playwriting and applies their use towards the writing of a 10-minute play.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

SCRP 225 Playwriting II 3.0 Credits
Builds on the writing tenets learned in Playwriting I. Requires students to write a one-act play.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 220 [Min Grade: D]

SCRP 230 Page to Stage 3.0 Credits
Students will write a short play and then go through the rewrite process while working with a director and student actors. The final scenes will be performed in front of an audience.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 2 times for 9 credits
Prerequisites: SCRP 225 [Min Grade: C]

SCRP 241 Writing TV Comedy 3.0 Credits
Teaches the essentials of situation comedy writing for TV. Students will be expected to conceive and write their own thirty-minute pilot script plus a ‘bible’ for their show.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: D]

SCRP 242 Writing TV Drama 3.0 Credits
Teaches the essentials of writing the one-hour television drama. Students will be expected to conceive and write their own thirty-minute pilot script plus a ‘bible’ for their show.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: D]

SCRP 250 Creating Stand-up Comedy 3.0 Credits
Deals with the conception, writing and performance of a stand-up comedy routine. Includes exploration of creating a comic persona, structuring an act, construction of jokes, and aspects relating to performance. "Final exam" will be given before a live audience at a public venue.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

SCRP 260 Writing Comics 3.0 Credits
This course will introduce the student to the history, theory, language and disciplines of writing the American comic book and graphic novel. Students will learn about comic script-writing formats, the collaborative relationship between writer and artist, and techniques to strengthen both their writing and critiquing abilities.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: C]

SCRP 263 Comic Book Editing 3.0 Credits
Students will write original work and serve as editors for other students on their creative project -- all while learning the histories of the creative disciplines that facilitate the creation of a modern comic book.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 260 [Min Grade: C]
SCRP 266 Graphic Novel Art and Industry 3.0 Credits
This course serves as an comprehensive look at the medium of graphic novels: their history, how they’re made, their diversity, how they are designed, sold and marketed. The course will mix reading and analysis of select titles, lecture and discussions with industry experts, including an artist, author, agent, editor, publisher, retailer, and designer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 260 [Min Grade: C]

SCRP 270 [WI] Screenwriting I 3.0 Credits
Workshop course that covers the fundamentals of writing scripts for film and television. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: HUM 106 [Min Grade: D] or ENGL 101 [Min Grade: D] or ENGL 105 [Min Grade: D]

SCRP 275 [WI] Screenwriting II 3.0 Credits
Workshop course that builds on the fundamentals of screenwriting learned in Screenwriting I. Each student develops and completes a short dramatic screenplay. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: SCRP 270 [Min Grade: D]

SCRP 280 [WI] Writing the Short Film 3.0 Credits
This course will focus on creating scripts for films under thirty minutes in length. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: D]

SCRP 290 Game: Universe & Story 3.0 Credits
A non-technical course which examines the differences between film & TV works vs. games and interactive fiction forms, and the creative changes inherent in translating one to the other. Emphasis given to the creation of a vibrant, seductive, logically consistent game world. Course culminates in the design of a game based on an existing work of fiction.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: C]

SCRP 295 Future of Narrative Games 3.0 Credits
Encourages students to use their knowledge of the current state of the art in gaming, and their technical and writing interests and expertise, to imagine games that go beyond those currently available. Of particular interest are ways to create branching narratives that deliver the story satisfaction and character development expected from traditional media.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: C]

SCRP 300 Literature for Screenwriters 3.0 Credits
This course provides exposure to literary traditions from the classics to pop culture, analyzing how the selected books have affected the film industry, both in terms of direct adaptations and by influencing generations of filmmakers and screenwriters.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: D] or FMVD 270 [Min Grade: D]

SCRP 350 TV Comedy Practicum 3.0 Credits
Students will write episodes of an ongoing TV comedy series produced at Drexel. Following the network primetime model and working in collaboration, students will work under budget, production and deadline constraints similar to those in the real world.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Prerequisites: SCRP 241 [Min Grade: C]

SCRP 353 TV Drama Practicum 3.0 Credits
Students will write episodes of an ongoing TV drama series to be produced at Drexel. Following the network primetime model and working in collaboration, students will work under budget, production and deadline constraints similar to those in the real world.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Prerequisites: SCRP 242 [Min Grade: C]

SCRP 370 Screenplay Story Development 3.0 Credits
This course provides a thorough understanding of methods used to develop story ideas from initial concept to complete screen story, including pitching, structuring, and creating treatments. Students pitch and develop several stories which can then be used to create full-length scripts in advanced workshops.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 270 [Min Grade: D]

SCRP 377 Game Writing Workshop I 3.0 Credits
This course embeds Screenwriting students on a team developing a computer game from concept to design document and through production. Screenwriting majors will be expected to contribute heavily to the narrative, character and other non-technical aspects of game creation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 290 [Min Grade: C] and SCRP 295 [Min Grade: C]

SCRP 378 Game Writing Workshop II 3.0 Credits
This course embeds Screenwriting students on a team developing a computer game from concept to design document and through production. Screenwriting majors will be expected to contribute heavily to the narrative, character and other non-technical aspects of game creation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: SCRP 377 [Min Grade: C]
SCRP 380 Screenwriting Workshop I 3.0 Credits
The first of a two-course sequence in which students write a feature film script, telefilm, or television pilot.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated 1 times for 6 credits
**Restrictions:** Cannot enroll if classification is Freshman
**Prerequisites:** SCRP 275 [Min Grade: D]

SCRP 381 Screenwriting Workshop II 3.0 Credits
The second of a two-course sequence in which students write a feature film script, telefilm, or television pilot.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated 1 times for 6 credits
**Restrictions:** Cannot enroll if classification is Freshman
**Prerequisites:** SCRP 380 [Min Grade: D]

SCRP 382 Playwriting Workshop I 3.0 Credits
The first of a two-course sequence in which students write a 90-minute, two-act play.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated 1 times for 6 credits
**Restrictions:** Cannot enroll if classification is Freshman
**Prerequisites:** SCRP 225 [Min Grade: D]

SCRP 383 Playwriting Workshop II 3.0 Credits
The second of a two-course sequence in which students write a 90-minute, two-act play.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated 1 times for 6 credits
**Prerequisites:** SCRP 382 [Min Grade: D]

SCRP 384 Comic/Graphic Novel Writing Workshop I 3.0 Credits
This two-term workshop will lead you through the process of developing and writing at least one draft of the script for either several issues of an original comic or a complete graphic novel. The finished script will be expected to conform to professional standards in everything from length to plot structure to formatting. You will be expected to utilize skills taught in the prerequisite course, SCRP 260 (Comic Book Writing), as well as narrative skills learned in SCRP 270 (Screenwriting I), including, but not limited to, thinking visually, establishing characters through behavior, writing effective dialogue, the basics of story structure, and related topics.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** SCRP 266 [Min Grade: C]

SCRP 385 Comic/Graphic Novel Writing Workshop II 3.0 Credits
This two-term workshop will lead you through the process of developing and writing at least one draft of the script for either several issues of an original comic or a complete graphic novel. The finished script will be expected to conform to professional standards in everything from length to plot structure to formatting. You will be expected to utilize skills taught in the prerequisite course, SCRP 260 (Comic Book Writing), as well as narrative skills learned in SCRP 270 (Screenwriting I), including, but not limited to, thinking visually, establishing characters through behavior, writing effective dialogue, the basics of story structure, and related topics.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** SCRP 384 [Min Grade: C]

SCRP 389 Independent Study in SCRP 0.5-12.0 Credits
Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. Department permission required.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

SCRP 465 Special Topics in SCRP 3.0 Credits
Examines a particular genre in dramatic writing (comedy, the thriller, etc.) or issues of particular interest to students interested in writing for the stage or screen (e.g., Literature for Screenwriters). The course, but not the same topics, may be repeated for credit.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
**Restrictions:** Cannot enroll if classification is Freshman

SCRP 495 Senior Project in Dramatic Writing I 3.0 Credits
The first of a three-course sequence in which students write a feature film script, telefilm, full-length stage play, television pilot, at least two spec episodes of an existing one-hour TV drama or four of an existing TV comedy.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** SCRP 381 [Min Grade: D] or SCRP 383 [Min Grade: D]

SCRP 496 Senior Project in Dramatic Writing II 3.0 Credits
The second of a three-course sequence in which students write a feature film script, telefilm, television pilot, at least two spec episodes of an existing one-hour TV drama or four of an existing TV comedy.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** SCRP 495 [Min Grade: D]

SCRP 497 Senior Project in Dramatic Writing III 3.0 Credits
The third of a three-course sequence in which students write a feature film script, telefilm, full-length stage play, television pilot, at least two spec episodes of an existing one-hour TV drama or four of an existing TV comedy.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** SCRP 496 [Min Grade: D]

SCRP I199 Independent Study in Screenwriting & Playwriting 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

SCRP I299 Independent Study in Screenwriting & Playwriting 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
SCRP I399 Independent Study in Screenwriting & Playwriting
0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

SCRP I499 Independent Study in Screenwriting & Playwriting 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

SCRP T180 Special Topics in Screenwriting & Playwriting 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

SCRP T280 Special Topics in Screenwriting & Playwriting 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

SCRP T380 Special Topics in Screenwriting & Playwriting 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

SCRP T480 Special Topics in Screenwriting & Playwriting 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

TV Production & Media Management

Major: TV Production and Media Management
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 10.0202
Standard Occupational Classification (SOC) code: 27-102

About the Program

The TV Production and Media Management program educates students to conceive, produce, and market entertainment through current and evolving television platforms. The program addresses the creative aspects, the craft, and the business of producing fictional and nonfictional content, and prepares students to work in all distribution formats.

The TV Production and Media Management program combines the resources of DUTV, Drexel’s fully-equipped, high-definition television station, with a comprehensive academic program to provide students with foundational experiences in the development, writing, production, editing, programming, multi-platform distribution, management, and promotion of television and internet content.

The major offers a course of study of 186.0 credits distributed over courses focused on development, production and post-production, business, and history. Students are taught by and work with a faculty of notable industry professionals whose experience, passion, and contacts help prepare them to enter and navigate the competitive world of television.

The major is designed as a four year, co-op program. For more information about this major, visit the College’s TV Production and Media Management (http://www.drexel.edu/westphal/academics/undergraduate/TELE) page.

Degree Requirements

All TV Production & Media Management majors take the same core courses for the first five terms (through the winter term of their sophomore year). These core courses encompass production fundamentals, digital media fundamentals, an introduction to television industry and enterprise, and beginning screenwriting. Finally, there is an introductory TV studio course, TV field course, and television studies course. The core requirements build a foundation for further advanced and specialized courses, taught in the student's area of concentration.

By the spring term their sophomore year, students select one of the following concentrations:

- **TV Comedy & Drama**: Students who choose this track gain an education in fictional programming. They will further hone their production skills in lighting and editing; they will be introduced to acting so they can better understand directing actors.

- **TV Industry & Enterprise**: Students choosing this track gain an education in the business of television, completing three courses in the LeBow College of Business: business law, entrepreneurship, and marketing. They learn about the financial aspects of television and are introduced to managing the IT area as it relates to television.

- **TV News & Non-Fiction Production**: Students who choose this track gain an education in documentary, news and nonfiction programming. They will hone their production skills in lighting and editing; they will learn how to direct TV studio programs and remote programs using multiple cameras.

Co-op/Career Opportunities

As the fourth largest television market and home of Comcast, one of the most rapidly expanding cable companies in the United States, Philadelphia is a major national television center. The TV Production & Media Management program takes advantage of this in numerous ways, including adjunct faculty, guest speakers, scholarship possibilities, internships, co-op experiences, and joint ventures. The major interacts with the Paul F. Harron TV Studios, which houses DUTV (http://dutv.drexel.edu/television/Main.html)’s fully HD studio, where students produce projects as part of their course work.

TV majors have done internships and Co-ops in New York, Philadelphia, and Los Angeles, working for production companies, talent and casting agencies, and television stations.

Drexel also offers a graduate level program in Television Management, and some students in the undergraduate major may wish to apply to the graduate program.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Television Facilities

DUTV, an educational access channel operated by Drexel University, provides a laboratory for students majoring in Television. The Paul F. Harron TV Studios houses DUTV and its fully-HD shooting studio, providing students with work space as well as hands-on technical and management experience that is so essential to the program. Film and video facilities include a shooting studio with a green screen, large and small screening rooms, a fully equipped television studio; digital editing facilities; specially outfitted multimedia rooms for all courses; digital video camcorders; 16mm film cameras, and lighting and audio equipment.

TV Production & Media Management Faculty

Andrew Altrichter, MBA (Drexel University) Program Manager, Drexel University’s television station (DUTV). Videography, editing, production.

Jackie Borock, LLB ( Widener University). Adjunct Instructor. Media law, intellectual property, first amendment

David Culver, AS ( Graham Junior College) Manager of the Paul F. Harron Studios/DUTV. Associate Teaching Professor. Film, Video, Station Management, Emerging Media Technology

Karen Curry, BA (Fordham University) Executive Director, Kai and Lucille Rudman Institute for Entertainment Industry Studies. Global media, news production and management.

Yvonne D. Leach, MFA (Temple University). Associate Professor. Television studies.

Joe Marsini, BS, CPA (University of Delaware). Adjunct Professor. Media finance, strategic planning, financial reporting, contract negotiations, collective bargaining agreements.

Philip W. Salas, BS (Temple University). Assistant Teaching Professor. Utilization of advanced set top box data to measure fragmented viewing behavior. Impact of new television distribution technologies on traditional broadcasters and multichannel program providers.

Andrew Susskind, BA (Harvard University) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Albert S. Tedesco, MA (University of Pennsylvania) Director of the Paul F. Harron Graduate Program in Television Management. Teaching Professor. Media Management, Organizational Structure, Research Methods, Media Ethics, Media Law, The Regulatory Environment, Technology Assessment, Media Theory, Media Analytics

Martin (Marty) Zied, BA (Penn State). Adjunct Instructor. Speech Communications, Producer/Director Television and Film

Westphal Studies Program

Major: Westphal Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 50.0101
Standard Occupational Classification (SOC) code: 27-1019
About the Program

The Westphal Studies program provides an individualized course of study initiated by a student. The student must have completed two terms of the junior year in an Antoinette Westphal College of Media Arts and Design major to be eligible for admission into this major.

A small number of students in the Antoinette Westphal College of Media Arts and Design decide that their goals lie at the periphery of the major or the intersection between several majors and would be served by more latitude than offered in the highly specified courses in their major. For these students, the Westphal Studies program major broadens future career goals and allows exploration combined with a focused exposure to a second field. It acknowledges the specialization that is characteristic of the majors in the College and the expectations of the professional fields for which our students are being prepared. Simultaneously, it recognizes the breadth and rapidly changing nature of many disciplines and permits a student who has acquired a basic working knowledge of a specific aspect of media arts and design to investigate a clearly defined alternative.

Admission to the program is limited to currently matriculated College of Media Arts and Design students who have completed the major-intensive sophomore year and experienced a co-op placement or completed their junior-year courses. The following items are required as part of the application:

- A student-generated, individualized plan of study, developed with and signed by a member of the Westphal Studies Program Advisors Committee
- A statement in writing of the student’s goals in applying to the major and the rationale of how the proposed plan of study addresses those goals
- A definition of appropriate co-operative education placement if the student has not completed a six-month employment in the field of his or her major
- A letter from the student’s current program director

Approval by the Westphal Studies Program Advisors Committee is required for admission to the major; it is not automatic upon request. The committee must be convinced by the validity of the applicant’s reasons for applying, the proposed study plan, and accompanying documentation. Details about the application procedure may be obtained from the director of Westphal Studies Program.

Recommended Plan of Study

This program requires an individualized plan of study. Students sign off on this agreed-upon plan with the Director of the Studies of the Westphal Studies program. A student must have completed two terms of junior year in a College of Media Arts and Design major to be eligible for admission into this major.

The student, in consultation with her/his advisor and the director of the program, devises a personalized interdisciplinary study plan. The approved plan of study provides a rationale for the concentration and how the elective credits are to be used. This plan of study must be completed and approved before admission into the major.

Minor in Digital Media

The Digital Media Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundations in digital media, including; 3D animation, game art, and interactivity with the opportunity for individualized tailoring according to the student’s interests.

The Digital Media Minor is open to all University students.

Required Courses:

- DIGM 100 Digital Design Tools 3.0
- DIGM 105 Overview of Digital Media 3.0
- ANIM 140 Computer Graphics Imagery I 3.0
- GMAP 260 Overview of Computer Gaming 3.0
- IDM 100 Introduction to Web Development 3.0

Select any three courses in ANIM, DIGM, GMAP or WBDV 9.0

Total Credits 24.0

Minor in Fine Art

To be eligible for the minor in fine art, a student must have completed 30.0 undergraduate credits, have a declared major, and have a minimum GPA of 2.7. The academic credit requirements for the minor must be completed at or before the time of graduation.

Basic design pre-requisite courses are required for most visual studies courses, and some of these may have already been taken for a student’s major. However, only nine credits of major-related coursework can be applied to the credits required for the minor in fine arts. Students with design credits from other schools or departments may be allowed to apply
them to their pre-requisite requirements only upon review by the fine art minor faculty advisor.

### Minor in Interdisciplinary Smart Initiatives

The Interdisciplinary Smart Initiatives Minor provides students across the University an experience of both breadth and depth through multidisciplinary practices and learning. Students will develop skills and knowledge in the topics associated with problem solving, innovative technology, leadership and immersive participatory experiences. Skills and knowledge will be delivered through collaborative teaching and coursework, skill building, experimentation, experiential learning, and engaging research initiatives.

This minor provides the opportunities to engage in a variety of University venues and initiatives that places students on the leading edge of their chosen paths. The Interdisciplinary Smart Initiatives Minor is intended to build on experiential learning that is the foundation of a Drexel education.

**Admission Requirements**

The Interdisciplinary Smart Initiatives Minor is open to all University students that meet the criteria for acceptance. Because of the nature of the minor, success is dependent upon students showing self-discipline, being highly motivated and self-reliant. All applications for the minor will be submitted to the director of the minor.

Please contact Dr. Ulrike Altenmüller-Lewis at ua27@drexel.edu with questions concerning the INSI Minor.

The following are the requirements that students must meet to be considered:

- **Required Essay**: Student statement of interest and desired goals
- **Required Recommendation**: Two letters of recommendation from faculty that speaks to the student’s ability to be collegial and collaborative, exhibit initiative and resourcefulness and ability to work independently.

Choose 9 credits from the following subject areas:

- Antoinette Westphal College of Media Arts & Design
- INTR 310 Sustainability: History, Theory and Critic
- PROD 215 Design Thinking in Product Design
- College of Engineering
- CAEE 202 Introduction to Civil, Architectural & Environmental Engineering
- CAEE 240 [WI] Engineering Economic Analysis
- College of Computing & Informatics
- INFO 101 Introduction to Information Technology
- INFO 105 Introduction to Informatics
- LeBow College of Business
- BUSN 103 Advanced First Year Business Seminar
- MGMT 260 Introduction to Entrepreneurship
- MGMT 364 Technology Management
- MIS 200 Management Information Systems
- College of Arts and Sciences
- BIO 264 Ethnobotany
- COM 111 Principles of Communication
- COM 220 Qualitative Research Methods
- COM 317 [WI] Environmental Communication
- ENVS 260 Environmental Science and Society
- PSY 352 Environmental Psychology
- SOC 341 Environmental Movements in America
- School of Biomedical Engineering, Science and Health Systems
- BMES 130 Problem Solving in Biomedical Engineering

**Total Credits** 25.0

* Other courses may be substituted with the approval of the minor director.

---

### Minor in Jazz and African-American Music

The minor in jazz and African-American music takes advantage of Drexel faculty expertise in those areas. This minor can include course work in jazz history, African-American music, jazz theory, private study in jazz performance, and ensemble work in several ensembles devoted to jazz.

Minor in Performance Arts

The retail minor, administered by the Design & Merchandising Program, provides basic foundations in retail operations, buying and merchandise planning and e-commerce. The curriculum allows the opportunity for individualized tailoring according to a student's interests. The minor is open to all Drexel University students, and requires the completion of eight or nine courses for a minimum of 24.0 credits.

* All courses are currently open to all DSMR students. DSMR 231 and DSMR 232 are required for all students enrolled in DSMR and the retail minor. The three elective courses can be delivered during other quarters as required. All courses will be restricted to appropriately include the students enrolled in the retail minor. As the industry and curriculum change, courses will be added and adapted accordingly.
Screenwriting

Minor in Screenwriting

The minor in screenwriting is intended to guide the student from the acquisition of basic screenwriting skills through the completion of a full-length feature screenplay. Fifteen of the credits are directly craft-oriented, teaching the student what she needs to know to translate her ideas into a format suitable for production; the other nine credits are dedicated to background knowledge intended to inform her creative thinking.

Film & video majors should note that they will be taking half of the courses in the screenwriting minor as part of their degree requirements, making this minor a relatively simple addition to their education.

Minor in Somatics

An understanding of movement and body language has become increasingly important across many fields: in communication, corporate training, movement therapy, education, performance, rehabilitation, sport and fitness. Physical health, clear communication and effective leadership all rely on an awareness of how we carry our bodies through our lives.

The Somatics Minor provides an in-depth study of the body, building from an understanding of its functional/structural basis, to its patterns and habits. We focus on how to interpret, analyze, and articulate somatic concepts and develop strategies for application.

Admission requirements

Admission on consultation with Somatics Coordinator:

Jennifer Morley

Minor in Sports Media Production

About the Program

The Sports Media Production Minor is a gateway for students committed to pursuing a career and a meaningful introduction for those who are intrigued but uncertain about sports media as a profession. Students are required to take the same foundational shooting & lighting, editing, sound, and studio operations courses as the TV Production and Media Management and Film and Video majors and minors. They are also required to take a TVIE sports media strategy course as well as SMT digital and sports media history courses that will provide a greater academic and contextual understanding of the profession. With additional courses in actual physical production, on-air performance, and technology courses.

Total Credits 27.0

Minor in Sustainability in the Built Environment

The intent of this minor is to prepare students to engage and analyze future design challenges from a sustainability perspective. Students completing this program will be able to approach these challenges in a resourceful and insightful way, with a solid foundation of sustainability principles. The emphasis on collaboration and trans-disciplinary teamwork will allow students to serve as agile leaders in their future careers and be active participants in the critical discourse of their field.

In addition to the 15.0 credits of core courses, students select 9.0 credits of electives. The list below will be updated as new courses in sustainability become available. Students having a question about the inclusion of a course not currently listed as a possible elective should check with the coordinator for this minor.
Additional Information

For additional information about this program, visit the College's Sustainability in the Built Environment web page. Or contact the program's advisor:

Diana Nicholas  
URBN Center, Suite 410  
Phone: 215.571.4432

Total Credits 24.0

* The elective list will be updated as new courses in sustainability become available. If a student has questions regarding inclusion of a course not on this list, he or she should see the Advisor for the Sustainability in the Built Environment Minor Program.

Minor in Television Industry and Enterprise

Students with a 3.0 or higher G.P.A. may apply for the TV Industry & Enterprise minor program. Once accepted, they take 21.0 credits of required courses that provide a basic foundation in the historical, financial, and programming elements of the television industry. The remaining 6.0 credits of study provide students the opportunity to have more hands-on production experience and/or to delve more deeply into the academic study of a specific area of interest.

Courses

TVIE 180 TV Industry Overview 3.0 Credits
The TV industry (broadcast, cable, satellite and internet) is explored. Topics examined include station and network relations, production, support systems, sales and promotion, revenue streams (advertiser, subscriber and hybrid), financial and legal systems that control TV, and program formats including TV content distributed by Internet, WiFi and mobile.
College/Department: Antoinette Westphal College of Media Arts Design Repeat Status: Not repeatable for credit

TVIE 250 TV Sports Program Strategies 3.0 Credits
The course will analyze the “big 4” major sports franchises (NFL, MLB, NBA, NHL) by looking at the rights holders, the marketing, the ratings, and the coverage. We will also examine the creation and growth of Regional and National Sports Networks, and study the innovators and their contributions to the business of sports on television. We will examine how sports teams generate revenue with television, how advertising and sponsor-ships are bought and sold, and how television rights are negotiated and awarded.
College/Department: Antoinette Westphal College of Media Arts Design Repeat Status: Not repeatable for credit

TVIE 280 Research, Sales and Programming 3.0 Credits
Research, sales and programming are the core of the TV industry. Students examine the selling environment; the research process; the meaning of “audience”; metrics; the sales process; market analysis; program promotion; and broadcast, cable, radio, and interactive media sales. Formats, day parts, scheduling, linkages and promotions are also explored.
College/Department: Antoinette Westphal College of Media Arts Design Repeat Status: Not repeatable for credit
TVIE 285 Media Law and Ethics 3.0 Credits
This course studies the intersection of media law and ethics. Included are: current legal issues in old and new media industries, the First Amendment, Congress and the FCC, licensing and regulation of media businesses, intellectual property and rights acquisition, and the foundation for ethical actions that result from multiple cross-pressures.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: TVIE 180 [Min Grade: D] or EAM 130 [Min Grade: D]

TVIE 290 Introduction to Money and the Media 3.0 Credits
This course focuses on the economics of various segments of the media business, with an emphasis on television through its past, present and future incarnations. Instruction will focus on the business models for various media, and case studies of financial decisions faced by media companies.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

TVIE 365 Special Topics: TVIE 1.0-3.0 Credit
This is a Special Topic course in the TV Industry & Enterprise Track that will have rotating topics that address current interests in the field.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 6 times for 21 credits

TVIE 390 Practicum: Promotions 3.0 Credits
Students learn the art of promotions through industry placements, including DUTV. Students will produce promos for TV shows, create on-air branding elements for stations, design promotion materials, and complete other tasks related to promotions.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 6 times for 18 credits
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and TVIE 180 [Min Grade: D] and TVIE 280 [Min Grade: D]

TVIE 391 Practicum: Programming 3.0 Credits
Students learn the art of programming a television station through industry placements, including DUTV. Students will aid in programming negotiation and acquisition, log and systems preparation, and other programming related duties.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 6 times for 18 credits
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and TVIE 180 [Min Grade: D] and TVIE 280 [Min Grade: D]

TVIE 392 Practicum: New Media Management 3.0 Credits
Students learn the operation of new media enterprises through industry placements, including DUTV. Students will develop ways to develop, promote, and disseminate new media content related to the television industry.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 6 times for 18 credits
Prerequisites: DIGM 100 [Min Grade: D] and DIGM 240 [Min Grade: D] and FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and TVIE 180 [Min Grade: D] and TVIE 280 [Min Grade: D]

TVIE 399 Independent Project in TV Industry and Enterprise 0.5-12.0 Credits
This course offers students the opportunity to do an Independent Project in TV Industry & Enterprise.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

TVIE 480 TV Professions and Business 3.0 Credits
An exploration of professions and opportunities for entrepreneurship in the TV industry through readings and guest lectures. After student assess their research, skills, and talents, they will research professional and business opportunities that match their future aspirations.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

TVIE 495 Senior Project: TV Enterprise I 3.0 Credits
This is the first course in a 3 course sequence for senior project in the TV Industry & Enterprise Track. Students will survey market opportunities, look at the competition and design a plan for new product development.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is TELE and classification is Senior.

TVIE 496 Senior Project: TV Enterprise II 3.0 Credits
This is the second course in a 3 course sequence for senior project in the TV Industry & Enterprise Track. Students will survey market opportunities, look at the competition and design a plan for new product development.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is TELE and classification is Senior.

TVIE 497 Senior Project: TV Enterprise III 3.0 Credits
This is the third course in a 3 course sequence for senior project in the TV Industry & Enterprise Track. Students will survey market opportunities, look at the competition and design a plan for new product development.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is TELE and classification is Senior.

TVIE I199 Independent Study in TV Industry & Enterprise 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

TVIE I299 Independent Study in TV Industry & Enterprise 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

TVIE I399 Independent Study in TV Industry & Enterprise 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 6 times for 18 credits
Minor in TV Production & Media Management

Students with a 3.0 or higher G.P.A. may apply for the TV Production & Media Management minor program. Once accepted, they take 21.0 credits of required courses that provide a basic foundation in the technical, historical, and creative elements of television production. The remaining 6.0 credits of study provide students the opportunity to have more hands-on production experience and/or to delve more deeply into the academic study of a specific area of interest.

Dance Studies

Professional Dance Certificate Program

Certificate Level: Undergraduate
Admission Requirements: High school diploma or GED equivalency
Certificate Type: Certificate
Number of Credits of Completion: 18.0
Instructional Delivery: Campus
Calendar Type: Quarter
Maximum Time Frame: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 50.0399
Standard Occupational Classification (SOC) Code: 27-2031

The certificate in dance studies is a 1-year option for any qualified professional dancer to assess whether they have the interest and aptitude for entering an undergraduate dance program. The certificate program has no entrance requirement beyond possession of a high school diploma or GED equivalency. All credits earned in the certificate of study in dance will be transferable into the part-time or full time BS degree in Dance (p. 480).

Undergraduate

Antoinette Westphal College of Media Arts & Design (A)

Advertising Design (ADGD) (p. 551)
Animation (ANIM) (p. 554)
Architecture (ARCH) (p. 561)
Art History (ARTH) (p. 598)
Dance (DANC) (p. 680)
Design & Merchandising (DSMR) (p. 683)
Digital Media (DIGM) (p. 687)
Entertainment & Arts Management (EAM) (p. 725)
Environmental Graphic Design (EVGD) (p. 732)
Fashion Design (FASH) (p. 742)
Film & Video (FMVD) (p. 745)
Film Studies (FMST) (p. 749)
Game Art and Production (GMAP) (p. 758)
General Design Arts (CDA) (p. 761)
Graphic Design (VSCM) (p. 770)
Interactive Digital Media (IDM) (p. 804)
Interior Design (INTR) (p. 806)
Music (MUSC) (p. 850)
Music Industry Program (MIP) (p. 854)
Performing Arts (PRFA) (p. 875)
Photography (PHOTO) (p. 881)
Printing Technology Management (PTM) (p. 897)
Product Design (PROD) (p. 897)
Retail Leadership (RETL) (p. 914)
Screenwriting & Playwriting (SCRW) (p. 917)
Study Abroad-Performing Arts (SAPA) (p. 936)
TV Industry & Enterprise (TVIE) (p. 936)
TV Information & Technology (TVIT) (p. 938)
TV Production (TVPR) (p. 939)
TV Studies (TVST) (p. 942)
Theatre (THTR) (p. 950)
Visual Studies (VSST) (p. 954)
Web & Motion Graphic Design (WMGD) (p. 958)
Web Development (WBDV) (p. 959)
Westphal Studies (WEST) (p. 957)

College of Arts and Sciences (AS)

Africana Studies (AFAS) (p. 552)
Anthropology (ANTH) (p. 556)
Arabic (ARBC) (p. 559)
Arts & Sciences-Interdisp Stud (AS-I) (p. 602)
Bioscience & Biotechnology (BIO) (p. 615)
Chemical Engineering Chemistry (CHEC) (p. 634)
Chemistry (CHEM) (p. 634)
Chinese (CHIN) (p. 640)
Communication (COM) (p. 646)
Criminal Justice (CJ) (p. 670)
Criminology and Justice Studies (CJS) (p. 670)
English (ENGL) (p. 716)
English as a Second Language (ESL) (p. 720)
Environmental Science (ENVS) (p. 733)
Environmental Studies & Sustainability (ENSS) (p. 741)
French (FREN) (p. 755)
Geoscience (GEO) (p. 764)
German (GER) (p. 766)
Global Studies (GST) (p. 769)
Greek (GREC) (p. 773)
Hebrew (HBRW) (p. 782)
History (HIST) (p. 783)
Humanities, General (HUM) (p. 796)

LeBow College of Business (B)

Accounting (ACCT) (p. 550)
Business Statistics (STAT) (p. 626)
Economics (ECON) (p. 689)
Finance (FIN) (p. 752)
General Business (BUSN) (p. 760)
Human Resource Management (HRMT) (p. 795)
International Business (INTB) (p. 809)
Legal Studies (BLAW) (p. 819)
Management (MGMT) (p. 821)
Management Information Systems (MIS) (p. 823)
Marketing (MKTG) (p. 827)
Operations Management (OPM) (p. 872)
Operations Research (OPR) (p. 874)
Close School of Entrepreneurship (C)
Entrepreneurship and Innovation (ENTP) (p. 727)

College of Computing and Informatics (CI)
Computer Science (CS) (p. 654)
Computing Technology (CT) (p. 659)
Computing and Informatics (CI) (p. 665)
EMS (EMS) (p. 711)
Emergency Management (EMER) (p. 711)
Homeland Security Management (HSM) (p. 789)
Information Science & Systems (INFO) (p. 799)
Software Engineering (SE) (p. 924)

Center for Civic Engagement (CV)
Civic Engagement (CIVC) (p. 641)

College of Engineering (E)
Architectural Engineering (AE) (p. 560)
Biomedical Engineering Tech (BET) (p. 614)
Chemical Engineering (CHE) (p. 629)
Chemical Engineering Chemistry (CHEC) (p. 634)
Civil & Architectural Engineering (CAE) (p. 642)
Civil Engineering (CVE) (p. 642)
Civil, Architectural & Environmental Engr (CAEE) (p. 645)
Construction Management (CMGT) (p. 665)
Elec & Comp Engr-Computers (ECEC) (p. 698)
Elec & Computer Engr-Electroph (ECEE) (p. 702)
Elec & Computer Engr-Power Eng (ECEP) (p. 695)
Elec & Computer Engr-Systems (ECES) (p. 703)
Electrical & Computer Engr (ECE) (p. 693)
Electrical Engineering Lab (ECEL) (p. 706)
Electrical Engr Technology (EET) (p. 708)
Engineering Management (EGMT) (p. 712)
Engineering, General (ENGR) (p. 712)
Environmental Engineering (ENVE) (p. 730)
Industrial Engineering (INDE) (p. 798)
Manufacturing Engr Technology (MET) (p. 825)
Materials Engineering (MATE) (p. 829)
Mechanical Engr & Mechanics (MEM) (p. 838)
Mechanical Engr Technology (MHT) (p. 845)
Project Management (PROJ) (p. 901)
Property Management (PRMT) (p. 902)
Real Estate (REAL) (p. 913)
Systems Engineering (SYSE) (p. 936)

Goodwin College of Professional Studies (GC)
Communications & Applied Tech (CAT) (p. 652)
Customer Operations (CUST) (p. 680)
General Studies (GSTD) (p. 762)
Professional Studies (PRST) (p. 899)

College of Nursing & Health Professions (NH)
Anatomy (ANAT) (p. 553)

Behavioral & Addictions Couns (BACS) (p. 602)
Cardiovascular Perfusion (CVPT) (p. 627)
Complementary & Integrative Therapy (CIT) (p. 653)
Health Sciences (HSCI) (p. 776)
Health Services Administration (HSAD) (p. 778)
Health and Society (HLSO) (p. 774)
Invasive Cardiovascular Tech (ICVT) (p. 811)
Medical Billing and Coding (MBC) (p. 847)
Neuroscience (NEUR) (p. 861)
Nursing (NURS) (p. 861)
Nutrition & Food Science (NFS) (p. 869)
Physiology (PHGY) (p. 891)
Statistics (STS) (p. 935)

Pennoni Honors College (PE)
Custom-Designed Minor (CSDN) (p. 679)
Honors Program (HNRS) (p. 789)
Leadership (LEAD) (p. 818)

School of Public Health (PH)
Public Health (PBHL) (p. 909)

School of Biomedical Engineering, Science & Health Systems (R)
Biomedical Engineering & Sci (BMES) (p. 605)

Center for Hospitality and Sport Management (SH)
Culinary Arts (CULA) (p. 675)
Food Science (FDSC) (p. 753)
Hotel & Restaurant Management (HRM) (p. 790)
Sport Coaching Leadership (SCL) (p. 930)
Sport Management (SMT) (p. 931)

School of Education (T)
Creativity Studies (CRTV) (p. 669)
Education Human Resource Devel (EHRD) (p. 692)
Education Learning Techniques (EDLT) (p. 692)
Geography Education (EDGE) (p. 763)
Mathematics Education (MTED) (p. 838)
STEM Teacher Education (ESTM) (p. 916)
Special Education (EDEX) (p. 928)
Teacher Education (EDEU) (p. 943)

University Courses (X)
Common Exams (EXAM) (p. 646)
Cooperative Education (COOP) (p. 669)
Military Science (MLSC) (p. 848)
Naval Science (NSC) (p. 860)
Accounting

Courses

ACCT 110 Accounting for Professionals 4.0 Credits
The course is open only to non-business students. A nontechnical introduction to the principles of financial and managerial accounting with emphasis on the use and interpretation of financial reports, managerial planning and control. The course would also provide an overview of business entities and taxation for businesses and individuals. The course is for the individual who seeks a basic knowledge of accounting and its uses. It is designed for the user of accounting information rather than the preparer. This course cannot be substituted for ACCT 115 or 116. Students graduating with a major in the School of Business cannot receive credit for this course.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is BAE or major is BUSN or major is ECON

ACCT 115 Financial Accounting Foundations 4.0 Credits
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

ACCT 116 Managerial Accounting Foundations 4.0 Credits
Introduces the managerial accounting tools and models available for planning, controlling, and decision-making. Covers budgeting, product costing, and analysis of financial statements for internal purposes.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ACCT 115 [Min Grade: D] or ACCT 110 [Min Grade: D]

ACCT 120 Accounting Essentials for New Ventures 4.0 Credits
The course covers essential accounting topics specific to new entrepreneurial ventures. Topics include: Financial Statement, cash flow issues, cost accounting, tax calculations, and choice of business entity.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

ACCT 121 Financial Reporting I 4.0 Credits
Provides intensive review of current accounting practice in light of authoritative pronouncements and critical study of theory and practice relating to preparing financial statements.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ACCT 115 [Min Grade: C]

ACCT 122 Financial Reporting II 4.0 Credits
Continues critical study of accounting theory and practice relating to financial statement items and selected accounting topics.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ACCT 321 [Min Grade: C]

ACCT 123 Financial Reporting III 4.0 Credits
Provides a detailed analysis of higher level financial accounting topics, connects topics learned in all financial reporting classes, and requires successful completion of a senior project on financial reporting.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ACCT 322 [Min Grade: C]

ACCT 129 Advanced Accounting 4.0 Credits
Study of theory and practice related to advanced accounting topics.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ACCT 323 [Min Grade: C]

ACCT 331 Cost Accounting 4.0 Credits
Continues ACCT 116. Emphasizes the use of accounting information in business decisions.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ACCT 116 [Min Grade: C]

ACCT 334 Principles of Auditing 4.0 Credits
Covers auditing standards and professional ethics, auditing theory and concepts, audit evidence and procedures, and auditors' reports.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ACCT 322 [Min Grade: C]

ACCT 344 Internal Auditing 4.0 Credits
Internal Auditing brings a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes. It is designed to add value and improve an organization's operations. Topics covered include: The Institute of Internal Auditors' International Professional Practices Framework; risk assessment, including internal control system evaluation; and the relationship of management and employee fraud to the internal audit process. Outside speakers and case studies will be used to demonstrate the application of internal auditing practices in the real world.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

ACCT I199 Independent Study in ACCT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit
Advertising Design

Courses

ADGD 200 Introduction to Advertising 4.0 Credits
Examines effective targets advertising and the working relationships between art direction and copywriting. Art direction and graphic design techniques for creative strategies are explored.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D]

ADGD 210 Print Advertising I 4.0 Credits
This course examines the creative process and research for creating innovative advertising. Students design and create a series of ads in market segments that include retail, trade, corporate identity, non-profit, and public service.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: VSCM 240 [Min Grade: D] and VSCM 242 [Min Grade: D]

ADGD 310 Television and Web Advertising 4.0 Credits
A concept-focused exploration of the creative process essential to creating effective ads for TV and new media.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: ADGD 210 [Min Grade: D] or WMGD 210 [Min Grade: D]

ADGD 320 Print Advertising II 4.0 Credits
Advanced advertising design class instruction that will result in a portfolio of design work that demonstrates innovative solutions and visual systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: ADGD 210 [Min Grade: D] and VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D]

ADGD 496 Senior Thesis in Advertising Design 3.0 Credits
Students will meet with faculty advisors to create a comprehensive self-described project. Proposals must be approved by faculty.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: ADGD 310 [Min Grade: D]

ADGD I199 Independent Study in ADGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ADGD I299 Independent Study in ADGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ADGD I399 Independent Study in ADGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ADGD I499 Independent Study in ADGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
AFAS 101 Introduction to Africana Studies 3.0 Credits
Provides an overview of the experience, culture, and political practices of African descendants in the Americas and the Caribbean. The course uses a multidisciplinary approach to introduce students to the history, art, music, and literature of the African Diaspora.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

AFAS 201 Cross Currents in Africana Studies 3.0 Credits
With a temporal focus on the 20th century, this course critically explores and analyzes the cultural, political and intellectual practices of blacks in North, Central, and South America as well as in the Caribbean.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

AFAS 250 African American Herstories 3.0 Credits
Students gain insights into three distinct historical periods of African American (American) History and a cross section of African American life through the reading, analysis, and discussion of selected African American women's autobiographies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

AFAS 255 Gender & Black Popular Culture 3.0 Credits
This course critically examines the media’s role in the social construction of “Blackness.” Paying particular attention to images of race, culture and gender, this course examines representations of Black women and men in “popular culture” (film, television, music, advertising, etc.).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

AFAS 260 Race, Politics and Religion 3.0 Credits
An examination of race and religion as in liberal tradition. How has liberal theory purported the state will confront issues of race and religion? Have the political realities of race and religion in the modern state lived up to the promises laid out by liberalism?
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

AFAS 301 Politics of Hip Hop 3.0 Credits
This class in an interdisciplinary, socio-historical introduction to rap music and hip hop culture. Several themes will be explored including the origins of rap music as well as the role of urban youth and their notions of race and gender. Record industry practices will also be investigated together with the impact of commercialism on hip hop. We will also consider sexism, misogyny, and violence in both the music and culture.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

AFAS 310 Women, Crime, & History 3.0 Credits
This class will examine gender, race and crime in US history. Specifically, we will explore the experience of female criminals from the colonial period to the present. We will conduct primary research into this subject at the Philadelphia City Archive (PCA), located at 3101 Market Street. Students will be responsible for a final research paper based on their research findings.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

AFAS 385 Rum, Rice and Revolution: Caribbean History 3.0 Credits
Course provides a broad, interdisciplinary and socio-historical introduction to the Caribbean. Several themes are covered including empire and the making of the Caribbean; slavery and emancipation; labor formation and race; revolution and resistance; gender oppression and women's experiences; and cultural expressions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

AFAS 401 Urban Social Justice Practicum I 3.0 Credits
The Urban Social Justice Practicum offers Drexel students an exciting opportunity to work on-site at a variety of community based organizations that address issues relevant to the African Diaspora. Students can work as mentors, teaching assistants, and interns and inner-city schools, governmental agencies, judicial offices and health care facilities. Working 5 hours per week at a site of their choosing, students also participate in weekly seminars, maintain journals, and complete a final paper. Course runs over two quarters.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
AFAS 402 Urban Social Justice Practicum II 3.0 Credits
The Urban Social Justice Practicum offers Drexel students an exciting opportunity to work on-site at a variety of community based organizations that address issues relevant to the African Diaspora. Students can work as mentors, teaching assistants, and interns and inner-city schools, governmental agencies, judicial offices and health care facilities. Working 5 hours per week at a site of their choosing, students also participate in weekly seminars, maintain journals, and complete a final paper. Course runs over two quarters.
 College/Department: College of Arts and Sciences
 Repeat Status: Not repeatable for credit
 Prerequisites: AFAS 401 [Min Grade: CR]

AFAS I199 Independent Study in AFAS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS I299 Independent Study in AFAS 0.5-3.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated 2 times for 6 credits

AFAS I399 Independent Study in AFAS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS I499 Independent Study in AFAS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS T180 Special Topics in Africana Studies 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS T280 Special Topics in Africana Studies 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS T380 Special Topics in Africana Studies 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

AFAS T480 Special Topics in Africana Studies 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
 College/Department: College of Arts and Sciences
 Repeat Status: Can be repeated multiple times for credit

Anatomy

Courses

ANAT 101 Anatomy & Physiology I 5.0 Credits
This course is a general study of the structures and physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lecture and lab material. The lecture portion deals with the general principles. In the lab, the student participates with practical examination of microscopic sections, tissues and organs, and the anatomical layout of human cadavers. The cell, tissues and musculoskeletal system will be covered in this course, as well as muscle and nerve physiology.
 College/Department: College of Nursing Health Professions
 Repeat Status: Not repeatable for credit

ANAT 102 Anatomy & Physiology II 5.0 Credits
This course is a continuation of ANAT 101. This course is a general study of the structures & physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lab and lecture material. The lecture deals with the general principles. In the lab, the student participates with practical examination of microscopic sections, tissues and organs, and the anatomical layout of various animal cadavers. The nervous, endocrine and digestive system will be covered in this course.
 College/Department: College of Nursing Health Professions
 Repeat Status: Not repeatable for credit
 Prerequisites: ANAT 101 [Min Grade: D]

ANAT 103 Anatomy & Physiology III 5.0 Credits
This course is a continuation of ANAT 101 & 102. This course is a general study of the structures and physiology of the human body. Fundamental concepts of microscopic tissue structure, gross structures of organs and body system organization are taught. The course consists of both lab and lecture material. The lecture deals with the general principles. While in the lab, the student participates with practical examination of microscopic sections, tissues, organs and the anatomical layout of various animal cadavers. The cardiovascular, lymphatic, respiratory, urinary and reproductive systems will be covered.
 College/Department: College of Nursing Health Professions
 Repeat Status: Not repeatable for credit
 Prerequisites: ANAT 101 [Min Grade: D]

ANAT 202 Sectional Anatomy 3.0 Credits
This course is designed to bridge the gap between Anatomy & Physiology and Advanced Anatomy. Anatomy of the head, neck, thorax, abdomen and pelvis is reviewed. Relationships of surface and internal structures from different bodily systems are emphasized. The analysis is supported by illustrations, CT scans, and MRI images.
 College/Department: College of Nursing Health Professions
 Repeat Status: Not repeatable for credit
 Prerequisites: ANAT 103 [Min Grade: D]
ANAT 420 Advanced Anatomy I 4.0 Credits
This course introduces the fundamentals of gross anatomy. Emphasis is placed on the regional study of the head, neck, back and upper extremity. Special attention is directed to study of the brain and spinal cord. Laboratory materials include human cadavers, models, radiographs, CT scans, MRI images and relevant web sites.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: ANAT 103 [Min Grade: D]

ANAT 421 Advanced Anatomy II 4.0 Credits
This course is a continuation of ANAT 420. Emphasis is placed on the regional study of the thorax, abdomen, pelvis and lower extremity. Laboratory material include human cadavers, models, radiographs, CT scans, MRI images and relevant web sites.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: ANAT 420 [Min Grade: D]

Animation
Courses

ANIM 140 Computer Graphics Imagery I 3.0 Credits
Students learn to represent 3D objects and spaces in 2D media using a variety of drawing and computer graphic techniques. This course lays important foundations for subsequent courses in 3D computer modeling and animation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 100 [Min Grade: D] or VSST 200 [Min Grade: D]

ANIM 141 Computer Graphics Imagery II 3.0 Credits
This course will introduce students to the principles and techniques of 3D virtual scene building for animation, visualization and game development.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 110 [Min Grade: D] or ANIM 140 [Min Grade: D]

ANIM 152 Multimedia Timeline Design 3.0 Credits
Introduces basic design concepts and tools to create time based 2D and 3D multimedia. Addresses issues from pre-production planning, through, post-production and delivery; emphasis on time-based multimedia.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 100 [Min Grade: D] or ANIM 140 [Min Grade: D]

ANIM 211 Animation I 3.0 Credits
Explores computer animation with an introduction to concepts of 3D animation. Includes narrative structure, storyboarding, and development. Emphasizes aesthetic, technical and conceptual issues. Requires students to create shorty animations in timeline based software.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 140 [Min Grade: D] and ANIM 152 [Min Grade: D]

ANIM 212 Animation II 3.0 Credits
Builds on topics introduced in ANIM 211 Animation I, incorporating advanced animation techniques such as inverse kinematics and dynamics. Requires students to propose, design, and produce a short animation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 211 [Min Grade: D] or DIGM 211 [Min Grade: D]

ANIM 215 History of Animation 3.0 Credits
Students learn the pre-cursors to modern animation and the evolution of the art since the beginning of the 20th century. Concepts in both 2D and 3D animation will be covered.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 211 [Min Grade: D] and ANIM 220 [Min Grade: D]

ANIM 220 Digital Compositing I 3.0 Credits
Examines digital compositing possibilities through the manipulation and recombination of acquired and produced digital imagery, including study of digital image and video formats, color space, live action digital matte painting, Greenscreen/Bluescreen compositing, roto scope masking and 2D tracking.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (DIGM 100 [Min Grade: D] or VSST 108 [Min Grade: D]) and FMVD 110 [Min Grade: D]

ANIM 221 Digital Compositing II 3.0 Credits
Examines 2D and 3D digital compositing possibilities through the manipulation and recombination of acquired and produced digital imagery, including 2D/3D Integration, 3D Matchmoving, and High Dynamic Range Imagery.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ANIM 211 [Min Grade: D] and ANIM 220 [Min Grade: D]

ANIM 231 Scripting for Animation and Visual Effects 3.0 Credits
This course explores modern scripting languages utilized in Animation and Visual Effects operating systems and software tools that are integral to artist productivity and production pipeline scalability.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: CS 140 [Min Grade: D] or CS 171 [Min Grade: D]

ANIM 247 Organic Modeling 3.0 Credits
This course will be an intensive exploration of organic modeling. Students will learn the best approaches to modeling organic forms and why these approaches are relevant. There will be considerable emphasis on anatomical forms.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 141 [Min Grade: D] or DIGM 141 [Min Grade: D]
ANIM 248 Advanced Lighting 3.0 Credits
Students will learn to integrate production-oriented lighting techniques into animation. Techniques utilizing both point-based and raytraced global illumination will be covered, and how to optimize pipelines for animation. Basic shader development will also be covered.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 141 [Min Grade: D] or DIGM 141 [Min Grade: D]

ANIM 314 Character Animation I 3.0 Credits
Examines issues and processed of 3D character development. Addresses various modes of 3D data wrangling for highly detailed, articulated character controls.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 212 [Min Grade: D] or DIGM 212 [Min Grade: D]

ANIM 315 Character Animation II 3.0 Credits
Covers advanced techniques of inverse and forward kinematics, full-character skeletal setup, development of animation, and puppeteer controls. Explores levels of reality, and world interaction within scope of character.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 314 [Min Grade: D] or DIGM 314 [Min Grade: D]

ANIM 321 Immersive Animation 3.0 Credits
Students will explore and experiment with non-planar multi-perspective projection to develop a unique and powerful immersive animation experience. Focus will be on the production of animations for both irregular architectural surfaces and conventional projection environments such as fulldome.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ANIM 212 [Min Grade: D] or DIGM 212 [Min Grade: D]

ANIM 388 Spatial Data Capture 3.0 Credits
Students learn about the tools available to integrate components from the physical environment into computer animations and games. Aspects covered will be 3D scanning, motion capture and imaging techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 212 [Min Grade: D] or ANIM 212 [Min Grade: D]

ANIM 399 Independent Project in Animation 0.5-12.0 Credits
Supervised planning and execution of a project in the area of Animation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ANIM 401 Advanced Compositing 3.0 Credits
Students learn to create detailed visual effects, and the best methods to integrate them into live-action plates. Drawing on existing compositing and animation knowledge, students will work in groups to produce short visual effects sequences.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: (ANIM 219 [Min Grade: D] or ANIM 221 [Min Grade: D]) and ANIM 212 [Min Grade: D]

ANIM 411 Advanced Animation 3.0 Credits
This course explores a wide range of visual effects assets, both practical and synthetic. Projects focus on the creation of a comprehensive short animation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: ANIM 410 [Min Grade: D] or DIGM 302 [Min Grade: D] or ANIM 219 [Min Grade: D]

ANIM 435 Technical Directing for Animation 3.0 Credits
Students learn the necessary toolsets for technical direction of animated films and visual effects. The topics covered include Python scripting, pipeline development and integration and creation of custom shaders to streamline production processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: ANIM 219 [Min Grade: D] or DIGM 302 [Min Grade: D]

ANIM 465 Special Topics in Animation 3.0 Credits
Addresses current topics in Animation. May be repeated for credit if topics vary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ANIM I199 Independent Study in Animation 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ANIM I299 Independent Study in Animation 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ANIM I399 Independent Study in Animation 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ANIM I499 Independent Study in Animation 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
ANTH 120 Biblical Archaeology: The Archaeology of Israel and Jordan 3.0 Credits
Examines the archaeology of Israel and Jordan from the earliest human occupation until the Persian Conquest in 535 B.C. Discusses many places described in the Old Testament in an archaeological context.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 210 [WI] Worldview: Science, Religion and Magic 3.0 Credits
Examines anthropological and archaeological evidence of the worldviews of non-literate people, as shown in the practice of ceremony, magic, sorcery, and witchcraft, and the role of shamans and priests. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 212 [WI] Topics in World Ethnography 3.0 Credits
Examines the peoples and cultures of the selected cultural areas. Emphasizes indigenous cultures and the effects of modernization on these cultures.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH 215 Anthropology of Gender 3.0 Credits
This course takes an ethnographic approach to the study of gender socializations and gender roles. We will address issues of sex roles, the cultural construction of gender categories, the forms of gender inequality, and the ways cultures engage in gender based power relationships. While these issues will be dealt with in specific and local ethnographic contexts, students will be encouraged to make comparisons across the contexts and to compare these works with their own experience.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 220 Aging In Cross-Cultural Perspective 3.0 Credits
Examines the status, roles, and treatments of elderly people in various societies throughout the world and among minority groups in the United States.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 225 Anthropology of Youth 3.0 Credits
What is youth? Is it a universal, biological phase of human life somewhere between childhood and adulthood, or a cultural category, socially constructed and historically contingent? Does it mean the same thing to be young today in the US, Samoa, Indonesia, Nepal, or Japan, or do place, culture, history, media, and politics dramatically influence the feeling and experience of being young? This course addresses these and other questions raised by anthropologists about the culture and nature of “youth.” We will be analyzing youth as an idea, an identity, a moral panic, a branding distinction, and an obsession.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Anthropology

Courses

ANTH 101 Introduction to Cultural Diversity 3.0 Credits
Examines the diversity that exists in human culture. Uses lectures, films, and discussions to examine and illustrate the relationship between humans and their social/cultural systems.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 110 Human Past: Anthropology and Prehistoric Archeology 3.0 Credits
Examines human origins from the australopithecines to the present, including both the physiological and archaeological records. Discusses new finds and new interpretations of evolution.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 111 Introduction to Biological Anthropology 3.0 Credits
Anthropology is the holistic study of the human condition. Biological anthropology is a subfield of the larger discipline that studies humankind as a zoological species. As biological anthropology is firmly rooted in evolutionary theory, the evolutionary biology of humans is the central focus of the course. Basic concepts of genetics, geology, paleontology, comparative anatomy, primate biology and material culture provide the foundation for understanding humanity’s place in nature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 112 Language, Culture & Cognition 3.0 Credits
This course is an introductory survey of three ways language is understood as a central element that glues together human culture; language around categories and taxonomies as shared perception; language origins and evolution; and language as socialization. An additional fourth unit on fieldwork methods in cross-cultural understanding and language starts to prepare you for future qualitative research.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
ANTH 240 Urban Anthropology 3.0 Credits
This course will give students the opportunity to familiarize themselves with the major themes in urban anthropology and how they relate to other areas of research in anthropology and the social sciences in general. Students will focus on the research methods used by urban anthropologists as well as read different ethnographic cases of urban life.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 245 Reflecting on Work Identity 3.0 Credits
Reflecting on Work Identity is an online course developed for students to take during their first co-op cycle. The first phase of the course will focus on the “self”; the student will participate in self-categorization and evaluation of personal expectations in regard to their co-op and future professional life. The second phase will consist of an analysis of power dynamics at the workplace, focusing on the “other” rather than the “self.” The final phase is a synthesis of the “self” and the “other,” in which the student will combine knowledge acquired from the readings and personal experiences in order to address issues facing the modern workplace, as well as reflect on their individual work identity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 250 Anthropology of Immigration 3.0 Credits
By examination of key ethnographical texts, the course covers basic theoretical and topical approaches to the anthropology of immigration, including: immigration and emigration; transnationalism and globalization; reception contexts; ethnic economies, enclaves and ethnic businesses; global economic strategies for migrant households; refugees, the state and immigration; culture, identity, and adaptation and assimilation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 255 Psychological Anthropology 3.0 Credits
The course is an overview of the field of Psychological Anthropology. It examines issues live nature vs. nurture; personality and “madness”; ethnopsychologies; and cognition. The attempt is to always recognize the salience and significance of culture when considering these issues.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 265 Health & Healing Practices in Cross-Cultural Perspective 3.0 Credits
This course examines the key concepts and research methodologies of medical anthropology. It will explore the various metaphors about health, and their meanings, that can be found across a range of cultural contexts. Students will learn that the distinctive feature of the anthropological approach to the study of health, disease and healthcare is the use of ethnography.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 300 Societies In Transition: The Impact of Modernization and the Third World 3.0 Credits
Looks at the impact of 20th-century technology on traditional societies. Uses area studies from Africa, Asia, and elsewhere to explore institutions such as the family, the polity, the economy, and religion.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 312 Approaches to Intercultural Behavior 3.0 Credits
Examines theory and case studies related to working and living outside the United States. Includes topics such as culture shock, cultural relativity, and ethnocentrism. Selects specific geographic culture areas for case studies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 325 DIY Culture 3.0 Credits
Home-recorded albums, self-published books, personal style blogs, and YouTube cat videos. These are just a small portion of the do-it-yourself cultural products we encounter — and perhaps even make ourselves — everyday. This course is a survey of DIY culture in the digital age, from cutting and pasting, to photoshopping, digital video posting, and blogging. Using critical theory, poststructuralist critique, and recent anthropological work in the studies of media production, we will be analyzing the cultural, historical, and political significance of DIY movements and cultures, as well as assessing the theoretical frameworks put forward by social theorists to make sense of them.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 330 Media Anthropology 3.0 Credits
This course will introduce students to the anthropological study of media including traditional forms of mass media as well as new media such as the Internet. Students will be exposed to the theories and methodologies of media study from an anthropological perspective. Students will also engage in their own ethnographic studies of media to gain first hand experience with the methods of anthropology.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 335 Anthropology of Education 3.0 Credits
This course will look at key works of anthropologists as they look at educational institutions from a cultural perspective. The course will consider some of the more critical issues of the field, such as issues of class, race and gender relations in schooling by focusing on some more contemporary ethnographies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 340 Crete Through The Looking Glass 3.0 Credits
Students are guided through the techniques of fieldwork and participant observation to attend several customs and practices through various fieldtrips. Traveling is a course requirement used toward the completion of a research project. While “at home”, students reflect on their experiences through a looking-glass process.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
ANTH 345 Visual Anthropology 3.0 Credits
Introduces students to the subdiscipline of visual anthropology through an overview of visual theory and a survey of ethnographic photography and film. Students will learn to evaluate ethnographic visual representation as well as develop their own skills as visual anthropologists through documenting and representing cultural phenomena.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ANTH 101 [Min Grade: D]

ANTH 350 Anthropology of Language 3.0 Credits
Explores how humans organize cultural activities though language and vice versa. After covering a short history of linguistic anthropological study and method, materials include ethnographic study of language and socialization, verbal art and linguistic performance, language and cultural categories, writing and literacy, and language ideologies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 355 Anthropology of Cyberspace 3.0 Credits
This course will focus on how the internet and new media have changed the way we think about space and time, the ways we works and engage in leisure activities. We will bring the approach of anthropology to the study of these new media in order to ask key questions about social life.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 360 Culture and the Environment 3.0 Credits
This course explores the interplay between culture and the environment by examining both ethnographic accounts from around the world and archeological materials from the last 14,000 years. Special attention is paid to the changing cultural view of the environment over the last two centuries.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 363 Sacred Traditions of the East 3.0 Credits
This course introduces the student to sacred traditions of Asia: Hinduism, Buddhism and Confucianism. It will attempt a historical-comparative investigation of these traditions. It will emphasize the practice and philosophical underpinnings of these traditions, as well as the interplay between integration of the folk or popular aspects and the abstracts or esoteric.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 365 Family and Kinship 3.0 Credits
The course investigates the concepts of family and kinship from an anthropological perspective. It looks at the family as a critical and contradictory location at the intersection of global and transnational forces. Using anthropological concepts such as status and role, it will explore changing gender relationships, sexual expression, parenting and aging.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 370 Ethnographic Methods 3.0 Credits
The course introduces students to ethnographic research methods through eight hands-on assignments: 1) selecting a site; 2) establishing rapport; 3) operationalizing hypotheses; 4) using qualitative and quantitative data gathering techniques; 5) taking field notes; 6) analyzing data collected; 7) synthesizing these data; and 8) writing an ethnographic report.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ANTH 375 Digital Ethnography 3.0 Credits
This course is the second part in the ethnographic methods series. It introduces students to the research methodologies employed by anthropologists to study online environments, digital communities, and virtual worlds. Students will gain practical, firsthand experience carrying out digital ethnographies and learn to evaluate the quality of digital ethnographic research.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 380 Special Topics in Anthropology 3.0 Credits
This course will explore current issues and debates in Anthropology. It will be conducted as a seminar. The topic will vary each term.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH 385 Community Engaged Anthropology 3.0 Credits
Community engaged anthropology is a form of anthropology that employs participatory action research. As such, it is less research done on a community, as research done with the community as an equal partner. This course introduces students to that technic and approach, its philosophical underpinnings and principles. It is a writing intensive course involving the development and assessment of anthropological fieldnotes.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH 390 Seminar in Ethnography 2.0 Credits
The Seminar in Ethnography is a course for anthropology majors. This is a peer-mentoring practicum where students are given the opportunity to present their own ethnographic fieldwork and get feedback from other students in the seminar. All anthropology majors will be in the seminar together. Juniors and seniors will be presenting mature research as well as mentoring the freshmen and sophomores.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 8 credits
Restrictions: Can enroll if major is ANTH.

ANTH 410 Cultural Theory I 3.0 Credits
The course is the first of a two part core cultural theory sequence. It tracks the development of anthropological theory beginning in the mid-19th century until the 1980s. Students are expected to understand the foundational role played by cultural evolution, historical particularism, structural functionalism, structuralism and cultural ecology within the discipline.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
ANTH 411 Cultural Theory II 3.0 Credits
This course is the second part of a two-part core in cultural theory that begins with Anthropology 410. It tracks the major theoretical streams of anthropological thought from the early 1980s to the present and challenges students to begin to place their own thinking within, and in opposition, to these streams of thought. Theoretical frameworks covered in this course include practice theory, post-structural theory, feminist theory, neo-Marxism, affect theory, and critiques of globalization and neoliberalism.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ANTH I199 Independent Study in ANTH 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH I299 Independent Study in ANTH 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH I399 Independent Study in ANTH 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH T180 Special Topics in Anthropology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH T280 Special Topics in Anthropology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH T380 Special Topics in Anthropology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ANTH T480 Special Topics in Anthropology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Arabic
Courses
ARBC 101 Arabic I 4.0 Credits
Introductory Arabic includes listening, speaking, reading and writing. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ARBC 102 Arabic II 4.0 Credits
Continues ARBC 101. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 101 [Min Grade: C]

ARBC 103 Arabic III 4.0 Credits
Continues ARBC 102. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 102 [Min Grade: C]

ARBC 201 Arabic IV 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Arabic 103.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 103 [Min Grade: C]

ARBC 202 Arabic V 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Arabic 201.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 201 [Min Grade: C]

ARBC 203 Arabic VI 3.0 Credits
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on Arabic 202.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 202 [Min Grade: C]

ARBC 301 Arabic VII 3.0 Credits
Advanced Arabic. Includes reading, writing, and extensive conversational practice.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 203 [Min Grade: C]

ARBC 302 Arabic VIII 3.0 Credits
Continues ARBC 301. Provides advanced practice in translation, comprehension, and written and oral conversation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 301 [Min Grade: C]
ARBC 303 Arabic IX 3.0 Credits
Continues ARBC 302. Provides advanced practice in translation, comprehension, and written and oral conversation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ARBC 302 [Min Grade: C]

ARBC 411 Arabic - Introduction to Arabic Stylistics 3.0 Credits
Fourth year of Arabic -- provides advanced practice in translation, comprehension, and written and oral communication.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ARBC 303 [Min Grade: C]

ARBC 471 Arabic Civilization 3.0 Credits
ARBC 471 presents an integrated approach in Arabic to the civilization, culture, history, and literature specific to the areas in which the language is spoken, with emphasis on the development and evaluation of cultural values.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: ARBC 303 [Min Grade: C]

ARBC 480 Arabic Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ARBC I199 Independent Study in ARBC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC I299 Independent Study in ARBC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC I399 Independent Study in ARBC 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC I499 Independent Study in ARBC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC T180 Special Topics in Arabic 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC T280 Special Topics in Arabic 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC T380 Special Topics in Arabic 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ARBC T480 Special Topics in Arabic 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Architectural Engineering Courses

AE 220 Introduction to HVAC 3.5 Credits
This course includes a review of thermodynamics, moist air properties and processes, basic heat transfer, solar radiation, heating and cooling losses and load calculation, types of air conditioning systems, infiltration and ventilation, air motion and distribution.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CAEE 201 [Min Grade: D] and (ENGR 210 [Min Grade: D] or TDEC 202 [Min Grade: D])

AE 340 Architectural Illumination and Electrical Systems 3.0 Credits
This course covers building electrical systems, including power demand, distribution and control; building illumination techniques, including lighting demand, layout and energy analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CAEE 201 [Min Grade: D] and (PHYS 102 [Min Grade: D] or TDEC 115 [Min Grade: D])

AE 390 Architectural Engineering Design I 4.0 Credits
Establishes a base of building systems design concepts, knowledge and performance criteria, with emphasis on the thermal, electrical, illumination and structural aspects of buildings.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: AE 220 [Min Grade: D] and AE 340 [Min Grade: D] and ARCH 192 [Min Grade: D] and MEM 202 [Min Grade: D]

AE 391 Architectural Engineering Design II 4.0 Credits
Emphasizes the development of insight into the solution of building system design problems, development of in-depth understanding of building systems design synthesis, and integration in a single building of modest scale and complexity.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: AE 390 [Min Grade: D]
Restrictions:
Cannot enroll if classification is Freshman

Repeat Status:
Can be repeated multiple times for credit

College/Department:
College of Engineering

AE T480 Special Topics in AE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Architecture

Courses

ARCH 101 Studio 1-A 4.0 Credits
2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 102 Studio 1-B 4.0 Credits
2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

ARCH 103 Studio 2-A 4.5 Credits
2+4 Option Architecture Majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 102 [Min Grade: C-] and ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-]

ARCH 104 Studio 2-B 4.5 Credits
2+4 Option Architecture Majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])
Corequisite: ARCH 161
ARCH 105 Studio 3-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 104 [Min Grade: C-] or ARCH 161 [Min Grade: C-]
Corequisite: ARCH 134

ARCH 106 Studio 3-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 105 [Min Grade: C-] or ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]

ARCH 107 Foundation Design I 2.0 Credits
Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 107 [Min Grade: C]

ARCH 108 Foundation Design II 2.0 Credits
Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 108 [Min Grade: C] and (ARCH 143 [Min Grade: C-] or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

ARCH 109 Foundation Design III 2.0 Credits
Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 109 [Min Grade: C]

ARCH 111 Studio 1-1 4.0 Credits
Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

ARCH 112 Studio 1-2 4.0 Credits
Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

ARCH 113 Studio 1-3 4.0 Credits
Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

ARCH 121 Studio 2-1 3.0 Credits
Stresses the impact of function, materials, and the issue of building image on the design process. Fall.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]
Corequisite: ARCH 141

ARCH 122 Studio 2-2 3.0 Credits
Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 121 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]
Corequisite: ARCH 142

ARCH 123 Studio 2-3 3.0 Credits
Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 122 [Min Grade: C-]
Corequisite: ARCH 143

ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits
Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
ARCH 132 Architectural Representation II-Drawing 3.0 Credits
Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

ARCH 133 Architectural Representation III-Digital 4.0 Credits
Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits
Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits
Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

ARCH 141 Architecture and Society I 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 142 Architecture and Society II 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 141 [Min Grade: D]

ARCH 143 Architecture and Society III 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 142 [Min Grade: D]

ARCH 144 Architecture and Society IV 3.0 Credits
Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C through the mid-20th C.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: D]

ARCH 161 Architectural Construction 3.0 Credits
Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

ARCH 170 Architectural Technology I 3.0 Credits
Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 213 [Min Grade: C]

ARCH 172 Architectural Technology II 3.0 Credits
Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 170 [Min Grade: C]
ARCH 173 Architectural Technology III 3.0 Credits
Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 172 [Min Grade: C]

ARCH 181 Architecture Studio 1A 4.0 Credits
Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 182 Architecture Studio 1B 4.0 Credits
Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 183 Architecture Studio 1C 4.0 Credits
Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 181 Studio 1-AE 3.0 Credits
Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is AE.

ARCH 192 Studio 2-AE 3.0 Credits
Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is AE.

ARCH 211 Architectural Representation I 2.0 Credits
Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 212 Architectural Representation II 2.0 Credits
Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 213 Architectural Representation III 2.0 Credits
Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital presentations and online media.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 224 Architectural Representation IV 2.0 Credits
Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 225 Architectural Representation V 2.0 Credits
Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital presentations and online media.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 226 Architectural Representation VI 2.0 Credits
Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
ARCH 231 Studio 3-1 3.0 Credits
Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

ARCH 232 Studio 3-2 3.0 Credits
Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 231 [Min Grade: C-]

ARCH 233 Studio 3-3 3.0 Credits
Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 232 [Min Grade: C-]

ARCH 241 Studio 4-1 4.0 Credits
Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

ARCH 242 Studio 4-2 4.0 Credits
Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

ARCH 243 Studio 4-3 4.0 Credits
Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]
**Corequisite:** CIVE 263

ARCH 244 Architectural Technology IV 3.0 Credits
Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 173 [Min Grade: C]

ARCH 261 Environmental Systems I 3.0 Credits
Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 262 Environmental Systems II 3.0 Credits
Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 263 Environmental Systems III 3.0 Credits
Covers application of electrical systems and lighting to architectural design and construction. Spring.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 271 Materials & Structural Behavior I 3.0 Credits
Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

ARCH 272 Materials & Structural Behavior II 3.0 Credits
Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

ARCH 273 Materials & Structural Behavior III 3.0 Credits
Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

ARCH 274 Architectural Technology IV 3.0 Credits
Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 173 [Min Grade: C]
ARCH 275 Architectural Technology V 3.0 Credits
Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 274 [Min Grade: C]

ARCH 276 Architectural Technology VI 3.0 Credits
Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 275 [Min Grade: C]

ARCH 281 Architecture Studio 2A 4.0 Credits
Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 183 [Min Grade: C] and ARCH 213 [Min Grade: C])

ARCH 282 Architecture Studio 2B 4.0 Credits
Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 281 [Min Grade: C] and ARCH 224 [Min Grade: C] and ARCH 170 [Min Grade: C]

ARCH 283 Architecture Studio 2C 4.0 Credits
Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 282 [Min Grade: C] and ARCH 225 [Min Grade: C] and ARCH 272 [Min Grade: C]

ARCH 315 Sustainable Built Environment I 3.0 Credits
Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ARCH 320 Sustainable Built Environment II 3.0 Credits
Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARCH 315 [Min Grade: C-]

ARCH 333 Professional Practice I 3.0 Credits
This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 243 [Min Grade: C-] or ARCH 333 [Min Grade: C]

ARCH 336 Professional Practice II 3.0 Credits
This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 335 [Min Grade: C]

ARCH 340 American Architecture & Urbanism 3.0 Credits
Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 143 [Min Grade: C-])

ARCH 341 [WI] Theories of Architecture I 3.0 Credits
Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 342 [WI] Theories of Architecture II 3.0 Credits
Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]
ARCH 343 Theories of Architecture III 3.0 Credits
Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 344 [WI] History of Modern Architecture I 3.0 Credits
Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth century continuing through the mid-20th century. History/theory elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 345 [WI] History of Modern Architecture II 3.0 Credits
Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th century to the present. History/theory elective. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits
Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit
An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits
A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 350 Contemporary Architecture 3.0 Credits
Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 351 Studio 5-1 4.0 Credits
Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]

ARCH 352 Studio 5-2 4.0 Credits
Continues ARCH 351. Emphasizes the strengthening of students’ ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

ARCH 353 Studio 5-3 4.0 Credits
Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

ARCH 361 Studio 5-1 4.0 Credits
Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]
Corequisite: ARCH 355

ARCH 362 Studio 5-2 4.0 Credits
Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 361 [Min Grade: C] and ARCH 263 [Min Grade: C-]
Corequisite: ARCH 336

ARCH 363 Studio 6-1 4.0 Credits
Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 362 [Min Grade: D]
Corequisite: PHIL 317
ARCH 377 Architectural Technology VII 3.0 Credits
Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 276 [Min Grade: C]

ARCH 378 Architectural Technology VIII 3.0 Credits
Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 377 [Min Grade: C]

ARCH 379 Architectural Technology IX 3.0 Credits
Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 378 [Min Grade: C]

ARCH 381 Architecture Studio 3A 4.0 Credits
Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 283 [Min Grade: C] and ARCH 226 [Min Grade: C] and ARCH 173 [Min Grade: C]

ARCH 382 Architecture Studio 3B 4.0 Credits
Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 381 [Min Grade: C] and ARCH 274 [Min Grade: C]

ARCH 383 Architecture Studio 3C 4.0 Credits
Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 382 [Min Grade: C] and ARCH 275 [Min Grade: C]

ARCH 389 Independent Study in Architecture 0.5-12.0 Credits
Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits
Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 431 [WI] Architectural Programming 3.0 Credits
Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]

ARCH 432 The Development Process 3.0 Credits
Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 441 Urban Design Seminar 3.0 Credits
Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 451 Advanced Drawing 3.0 Credits
Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C] or INTR 341 [Min Grade: C]

ARCH 455 Computer Applications in Architecture I 3.0 Credits
Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]
ARCH 456 Computer Applications in Architecture II 3.0 Credits
Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 463 Emerging Architectural Technology 3.0 Credits
A holistic study of design and construction technology of significant buildings by leading architects.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 464 Building Enclosure Design 3.0 Credits
Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 465 Energy and Architecture 3.0 Credits
Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 468 Architecture Studio 5A 4.0 Credits
Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 483 [Min Grade: C] and ARCH 379 [Min Grade: C]

ARCH 481 Architecture Studio 4A 4.0 Credits
Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 483 [Min Grade: C] and ARCH 276 [Min Grade: C]

ARCH 482 Architecture Studio 4B 4.0 Credits
Furthers the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 481 [Min Grade: C] and ARCH 377 [Min Grade: C]

ARCH 483 Architecture Studio 4C 4.0 Credits
Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 482 [Min Grade: C] and ARCH 378 [Min Grade: C]

ARCH 487 Architecture Studio 5A 4.0 Credits
Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 483 [Min Grade: C] and ARCH 379 [Min Grade: C]

ARCH 488 Architecture Studio 5B 4.0 Credits
Emphasizes complex architectural problems while demonstrating understanding and appropriate application.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 487 [Min Grade: C]

ARCH 491 Advanced Topics in Architecture 1.0-6.0 Credit
Covers advanced topics in architectural design, practice, technology or history and theory that satisfy professional or historical/theory elective requirements.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
**Prerequisites:** ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 493 Senior Project I 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]
**Corequisite:** ARCH 431

ARCH 494 Senior Project II 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 493 [Min Grade: C]
ARCH 495 Senior Project III 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 494 [Min Grade: C]

ARCH 496 Thesis I 8.0 Credits
An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

ARCH 497 Thesis II 8.0 Credits
Continues ARCH 496. Winter.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 496 [Min Grade: C-]

ARCH 498 Thesis III 8.0 Credits
Continues ARCH 497. Spring.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 497 [Min Grade: C-]

ARCH 499 [WI] Special Topics in Architecture 3.0 Credits
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements and university writing intensive requirements. Course may be repeated for credit when different topics are offered. Fall, Winter, Spring, Summer. This is a writing intensive course.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
**Prerequisites:** ARCH 143 [Min Grade: C-]

ARCH H199 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH I299 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH I399 Independent Study in Architecture 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH I499 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
**Prerequisites:** ARCH 143 [Min Grade: C]

ARCH T180 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH T280 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH T380 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit

ARCH T480 Special Topics in Architecture 1.0-6.0 Credit
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Can be repeated multiple times for credit
**Prerequisites:** ARCH 143 [Min Grade: C]

**Courses**

ARCH 101 Studio 1-A 4.0 Credits
2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two-and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

ARCH 102 Studio 1-B 4.0 Credits
2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.

**Prerequisites:** ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]
ARCH 103 Studio 2-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 102 [Min Grade: C-] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])
Corequisite: ARCH 161

ARCH 104 Studio 2-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])
Corequisite: ARCH 161

ARCH 105 Studio 3-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]
Corequisite: ARCH 134

ARCH 106 Studio 3-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])
Corequisite: ARCH 134

ARCH 107 Foundation Design I 2.0 Credits
Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 108 Foundation Design II 2.0 Credits
Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 107 [Min Grade: C]

ARCH 109 Foundation Design III 2.0 Credits
Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 108 [Min Grade: C]

ARCH 111 Studio 1-1 4.0 Credits
Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

ARCH 112 Studio 1-2 4.0 Credits
Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

ARCH 113 Studio 1-3 4.0 Credits
Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

ARCH 121 Studio 2-1 3.0 Credits
Stresses the impact of function, materials, and the issue of building image on the design process. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]
Corequisite: ARCH 141

ARCH 122 Studio 2-2 3.0 Credits
Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 121 [Min Grade: C]
Corequisite: ARCH 142
ARCH 123 Studio 2-3 3.0 Credits
Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 122 [Min Grade: C-]
Corequisite: ARCH 143

ARCH 131 Architectural Representation I-Drawing 3.0 Credits
Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 132 Architectural Representation II-Drawing 3.0 Credits
Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

ARCH 133 Architectural Representation III-Digital 4.0 Credits
Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits
Continues ARCH 133. Further investigates and demonstrates the computer's capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits
Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

ARCH 141 Architecture and Society I 3.0 Credits
Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 142 Architecture and Society II 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the “Dark Ages” through the development and spread of Renaissance architecture across Europe and Latin America.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 141 [Min Grade: D]

ARCH 143 Architecture and Society III 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 142 [Min Grade: D]

ARCH 144 Architecture and Society IV 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: D]
ARCH 161 Architectural Construction 3.0 Credits
Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

ARCH 170 Architectural Technology I 3.0 Credits
Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 213 [Min Grade: C]

ARCH 172 Architectural Technology II 3.0 Credits
Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 170 [Min Grade: C]

ARCH 173 Architectural Technology III 3.0 Credits
Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 172 [Min Grade: C]

ARCH 181 Architecture Studio 1A 4.0 Credits
Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 182 Architecture Studio 1B 4.0 Credits
Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 181 [Min Grade: C] and ARCH 211 [Min Grade: C])

ARCH 183 Architecture Studio 1C 4.0 Credits
Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 182 [Min Grade: C] and ARCH 212 [Min Grade: C])

ARCH 191 Studio 1-AE 3.0 Credits
Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE.

ARCH 192 Studio 2-AE 3.0 Credits
Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE.
Prerequisites: ARCH 191 [Min Grade: D]

ARCH 211 Architectural Representation I 2.0 Credits
Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 212 Architectural Representation II 2.0 Credits
Emphasis on craft and composition in the architectural representation of the built environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 211 [Min Grade: C]

ARCH 213 Architectural Representation III 2.0 Credits
Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 212 [Min Grade: C]
ARCH 224 Architectural Representation IV 2.0 Credits
Emphasizes the communication of design through perspective, viewmaking and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 213 [Min Grade: C-]

ARCH 225 Architectural Representation V 2.0 Credits
Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital presentations and online media.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 224 [Min Grade: C]

ARCH 226 Architectural Representation VI 2.0 Credits
Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 225 [Min Grade: C]

ARCH 231 Studio 3-1 3.0 Credits
Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

ARCH 232 Studio 3-2 3.0 Credits
Continues ARCH 231. Design projects expand students' vocabulary and understanding of the process of creating solutions to the problems of architecture.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 231 [Min Grade: C-]

ARCH 233 Studio 3-3 3.0 Credits
Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 232 [Min Grade: C-]

ARCH 241 Studio 4-1 4.0 Credits
Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-])

ARCH 242 Studio 4-2 4.0 Credits
Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

ARCH 243 Studio 4-3 4.0 Credits
Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]
**Corequisite:** CIVE 263

ARCH 261 Environmental Systems I 3.0 Credits
Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 262 Environmental Systems II 3.0 Credits
Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 263 Environmental Systems III 3.0 Credits
Covers application of electrical systems and lighting to architectural design and construction. Spring.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 271 Materials & Structural Behavior I 3.0 Credits
Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.

**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]
ARCH 272 Materials & Structural Behavior II 3.0 Credits
Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

ARCH 273 Materials & Structural Behavior III 3.0 Credits
Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

ARCH 274 Architectural Technology IV 3.0 Credits
Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 273 [Min Grade: C]

ARCH 275 Architectural Technology V 3.0 Credits
Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 274 [Min Grade: C]

ARCH 276 Architectural Technology VI 3.0 Credits
Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 275 [Min Grade: C]

ARCH 281 Architecture Studio 2A 4.0 Credits
Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 183 [Min Grade: C] and ARCH 213 [Min Grade: C])

ARCH 282 Architecture Studio 2B 4.0 Credits
Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 281 [Min Grade: C] and ARCH 224 [Min Grade: C] and ARCH 170 [Min Grade: C]

ARCH 283 Architecture Studio 2C 4.0 Credits
Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 282 [Min Grade: C] and ARCH 225 [Min Grade: C] and ARCH 272 [Min Grade: C]

ARCH 315 Sustainable Built Environment I 3.0 Credits
Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARCH 315 [Min Grade: C]

ARCH 320 Sustainable Built Environment II 3.0 Credits
Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARCH 315 [Min Grade: C]

ARCH 335 Professional Practice I 3.0 Credits
This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today's society. It addresses the following issues: Community and Social Responsibility, Leadership, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 243 [Min Grade: C] or ARCH 333 [Min Grade: C]
ARCH 336 Professional Practice II 3.0 Credits
This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 335 [Min Grade: C]

ARCH 340 American Architecture & Urbanism 3.0 Credits
Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 143 [Min Grade: C] or ARTH 103 [Min Grade: C] or INTR 200 [Min Grade: C] or CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C])

ARCH 341 [WI] Theories of Architecture I 3.0 Credits
Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 342 [WI] Theories of Architecture II 3.0 Credits
Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 343 Theories of Architecture III 3.0 Credits
Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 344 [WI] History of Modern Architecture I 3.0 Credits
Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 345 [WI] History of Modern Architecture II 3.0 Credits
Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits
Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit
An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C] or INTR 200 [Min Grade: C] or ARTH 103 [Min Grade: C]

ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits
A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 350 Contemporary Architecture 3.0 Credits
Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 351 Studio 5-1 4.0 Credits
Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (CIVE 263 [Min Grade: D] or ARCH 273 [Min Grade: C]) and ARCH 243 [Min Grade: C]
ARCH 352 Studio 5-2 4.0 Credits
Continues ARCH 351. Emphasizes the strengthening of students’ ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

ARCH 353 Studio 5-3 4.0 Credits
Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

ARCH 361 Studio 6-1 4.0 Credits
Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]
Corequisite: ARCH 335

ARCH 362 Studio 6-2 4.0 Credits
Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 361 [Min Grade: D]
Corequisite: ARCH 336

ARCH 363 Studio 6-3 4.0 Credits
Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 362 [Min Grade: D]
Corequisite: PHIL 317

ARCH 377 Architectural Technology VII 3.0 Credits
Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 276 [Min Grade: C]

ARCH 378 Architectural Technology VIII 3.0 Credits
Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 377 [Min Grade: C]

ARCH 379 Architectural Technology IX 3.0 Credits
Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 283 [Min Grade: C] and ARCH 226 [Min Grade: C] and ARCH 173 [Min Grade: C]

ARCH 381 Architecture Studio 3A 4.0 Credits
Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 283 [Min Grade: C] and ARCH 226 [Min Grade: C] and ARCH 173 [Min Grade: C]

ARCH 382 Architecture Studio 3B 4.0 Credits
Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 381 [Min Grade: C] and ARCH 274 [Min Grade: C]

ARCH 383 Architecture Studio 3C 4.0 Credits
Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 382 [Min Grade: C] and ARCH 275 [Min Grade: C]

ARCH 399 Independent Study in Architecture 0.5-12.0 Credits
Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits
Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 431 [WI] Architectural Programming 3.0 Credits
Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]

ARCH 432 The Development Process 3.0 Credits
Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 441 Urban Design Seminar 3.0 Credits
Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C] or ARCH 236 [Min Grade: C] or INTR 341 [Min Grade: C]

ARCH 451 Advanced Drawing 3.0 Credits
Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C] or ARCH 477 [Min Grade: C]

ARCH 452 Computer Applications in Architecture I 3.0 Credits
Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 453 Computer Applications in Architecture II 3.0 Credits
Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 454 Emerging Architectural Technology 3.0 Credits
A holistic study of design and construction technology of significant buildings by leading architects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 455 Building Enclosure Design 3.0 Credits
Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 456 Energy and Architecture 3.0 Credits
Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 457 Architecture Studio 4A 4.0 Credits
Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 383 [Min Grade: C] and ARCH 276 [Min Grade: C]

ARCH 458 Architecture Studio 4B 4.0 Credits
Furthers the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 481 [Min Grade: C] and ARCH 377 [Min Grade: C]

ARCH 459 Architecture Studio 4C 4.0 Credits
Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 482 [Min Grade: C] and ARCH 378 [Min Grade: C]

ARCH 460 Architecture Studio 5A 4.0 Credits
Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 483 [Min Grade: C] and ARCH 379 [Min Grade: C]
ARCH 488 Architecture Studio 5B 4.0 Credits
Emphasizes complex architectural problems while demonstrating understanding and appropriate application.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 487 [Min Grade: C]

ARCH 489 Architecture Studio 5C 4.0 Credits
Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 488 [Min Grade: C]

ARCH 491 Advanced Topics in Architecture 1.0-6.0 Credit
Covers advanced topics in architectural design, practice, technology or history and theory that satisfy professional or historical/theory elective requirements.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit  
**Prerequisites:** ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 493 Senior Project I 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]  
**Corequisite:** ARCH 431

ARCH 494 Senior Project II 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 493 [Min Grade: C]

ARCH 495 Senior Project III 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 494 [Min Grade: C]

ARCH 496 Thesis I 8.0 Credits
An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 363 [Min Grade: D] and ARCH 143 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

ARCH 497 Thesis II 8.0 Credits
Continues ARCH 496. Winter.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 496 [Min Grade: C-]

ARCH 498 Thesis III 8.0 Credits
Continues ARCH 497. Spring.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 497 [Min Grade: C-]

ARCH 499 [WI] Special Topics in Architecture 3.0 Credits
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements and university writing intensive requirements. Course may be repeated for credit when different topics are offered. Fall, Winter, Spring, Summer. This is a writing intensive course.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit  
**Prerequisites:** ARCH 143 [Min Grade: C-]

ARCH I199 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

ARCH I299 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

ARCH I399 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit

ARCH I499 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit  
**Prerequisites:** ARCH 143 [Min Grade: C]
ARCH T180 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARCH T280 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARCH T380 Special Topics in Architecture 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARCH T480 Special Topics in Architecture 1.0-6.0 Credit
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C]

Courses
ARCH 101 Studio 1-A 4.0 Credits
2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two-and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 102 Studio 1-B 4.0 Credits
2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

ARCH 103 Studio 2-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 102 [Min Grade: C+] and (ARCH 132 [Min Grade: C+] or ARCH 152 [Min Grade: C+])

ARCH 104 Studio 2-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 103 [Min Grade: C+] and (ARCH 133 [Min Grade: C+] or ARCH 150 [Min Grade: C+])
Corequisite: ARCH 161

ARCH 105 Studio 3-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems that present full range of challenges in the areas of organization, context, and expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 104 [Min Grade: C+] and ARCH 161 [Min Grade: C+]
Corequisite: ARCH 134

ARCH 106 Studio 3-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present full range of challenges in the areas of organization, context, and expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 105 [Min Grade: C+] and (ARCH 134 [Min Grade: C+] or ARCH 153 [Min Grade: C+])

ARCH 107 Foundation Design I 2.0 Credits
Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 108 Foundation Design II 2.0 Credits
Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 107 [Min Grade: C]

ARCH 109 Foundation Design III 2.0 Credits
Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 108 [Min Grade: C]
ARCH 111 Studio 1-1 4.0 Credits
Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

ARCH 112 Studio 1-2 4.0 Credits
Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** (ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C]) and ARCH 131 [Min Grade: C]

ARCH 113 Studio 1-3 4.0 Credits
Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** (ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C]) or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

ARCH 112 Studio 2-1 3.0 Credits
Stresses the impact of function, materials, and the issue of building image on the design process. Fall.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** ARCH 113 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]) and ARCH 161 [Min Grade: C-]
**Corequisite:** ARCH 141

ARCH 122 Studio 2-2 3.0 Credits
Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 121 [Min Grade: C-]
**Corequisite:** ARCH 142

ARCH 123 Studio 2-3 3.0 Credits
Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Prerequisites:** ARCH 122 [Min Grade: C-]
**Corequisite:** ARCH 143

ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits
Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 101 [Min Grade: C] or ARCH 111 [Min Grade: C-]) and ARCH 131 [Min Grade: C-]

ARCH 132 Architectural Representation II-Drawing 3.0 Credits
Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

ARCH 133 Architectural Representation III-Digital 4.0 Credits
Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs. May also introduce digital fabrication techniques.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and ARCH 132 [Min Grade: C-]

ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits
Continues ARCH 133. Further investigates and demonstrates the computer’s capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-]) and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])

ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits
Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.
**College/Department:** Antoinette Westphal College of Media Arts Design
**Repeat Status:** Not repeatable for credit
**Restrictions:** Can enroll if major is ARCH.
**Prerequisites:** (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])
ARCH 141 Architecture and Society I 3.0 Credits
Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 170 [Min Grade: C] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-])

ARCH 142 Architecture and Society II 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the “Dark Ages” through the development and spread of Renaissance architecture across Europe and Latin America.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 141 [Min Grade: D]

ARCH 143 Architecture and Society III 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 142 [Min Grade: D]

ARCH 144 Architecture and Society IV 3.0 Credits
Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: D]

ARCH 161 Architectural Construction 3.0 Credits
Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

ARCH 170 Architectural Technology I 3.0 Credits
Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 213 [Min Grade: C]

ARCH 172 Architectural Technology II 3.0 Credits
Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 170 [Min Grade: C]

ARCH 173 Architectural Technology III 3.0 Credits
Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 172 [Min Grade: C]

ARCH 181 Architecture Studio 1A 4.0 Credits
Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 181 [Min Grade: C] and ARCH 211 [Min Grade: C])

ARCH 182 Architecture Studio 1B 4.0 Credits
Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 181 [Min Grade: C] and ARCH 211 [Min Grade: C])

ARCH 183 Architecture Studio 1C 4.0 Credits
Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 182 [Min Grade: C] and ARCH 212 [Min Grade: C])

ARCH 191 Studio 1-AE 3.0 Credits
Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE.
ARCH 191 Studio AE 1.0 Credits
Architectural engineering majors only. Continues ARCH 190. Addressing the development of design communication skills, the course provides practice in the use of digital and traditional media to communicate ideas and solutions. Corequisite: CIVE 263

ARCH 211 Architectural Representation I 2.0 Credits
Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

ARCH 212 Architectural Representation II 2.0 Credits
Emphasis on craft and composition in the architectural representation of the built environment.

ARCH 213 Architectural Representation III 2.0 Credits
Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

ARCH 214 Architectural Representation IV 2.0 Credits
Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

ARCH 215 Architectural Representation V 2.0 Credits
Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital presentations and online media.

ARCH 216 Architectural Representation VI 2.0 Credits
Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

ARCH 231 Studio 3-1 3.0 Credits
Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

ARCH 232 Studio 3-2 3.0 Credits
Continues ARCH 231. Design projects expand students’ vocabulary and understanding of the process of creating solutions to the problems of architecture.

ARCH 233 Studio 3-3 3.0 Credits
Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

ARCH 241 Studio 4-1 4.0 Credits
Continues ARCH 240. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

ARCH 242 Studio 4-2 4.0 Credits
Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.

ARCH 243 Studio 4-3 4.0 Credits
Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.
ARCH 261 Environmental Systems I 3.0 Credits  
Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]  

ARCH 262 Environmental Systems II 3.0 Credits  
Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]  

ARCH 263 Environmental Systems III 3.0 Credits  
Covers application of electrical systems and lighting to architectural design and construction. Spring.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]  

ARCH 271 Materials & Structural Behavior I 3.0 Credits  
Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]  

ARCH 272 Materials & Structural Behavior II 3.0 Credits  
Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]  

ARCH 273 Materials & Structural Behavior III 3.0 Credits  
Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]  

ARCH 274 Architectural Technology IV 3.0 Credits  
Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** ARCH 173 [Min Grade: C]  

ARCH 275 Architectural Technology V 3.0 Credits  
Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 274 [Min Grade: C]  

ARCH 276 Architectural Technology VI 3.0 Credits  
Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 275 [Min Grade: C]  

ARCH 281 Architecture Studio 2A 4.0 Credits  
Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** (ARCH 183 [Min Grade: C] and ARCH 213 [Min Grade: C])  

ARCH 282 Architecture Studio 2B 4.0 Credits  
Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 281 [Min Grade: C] and ARCH 224 [Min Grade: C] and ARCH 170 [Min Grade: C]  

ARCH 283 Architecture Studio 2C 4.0 Credits  
Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems and formal expression.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ARCH.  
**Prerequisites:** ARCH 282 [Min Grade: C] and ARCH 225 [Min Grade: C] and ARCH 272 [Min Grade: C]  

ARCH 315 Sustainable Built Environment I 3.0 Credits  
Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.  
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman
ARCH 320 Sustainable Built Environment II 3.0 Credits
Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARCH 315 [Min Grade: C-]

ARCH 335 Professional Practice I 3.0 Credits
This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment, Client Role in Architecture, Basic Principles of Architectural Practice.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 243 [Min Grade: C-] or ARCH 333 [Min Grade: C]

ARCH 336 Professional Practice II 3.0 Credits
This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 335 [Min Grade: C]

ARCH 340 American Architecture & Urbanism 3.0 Credits
Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 341 [WI] Theories of Architecture I 3.0 Credits
Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 342 [WI] Theories of Architecture II 3.0 Credits
Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 343 Theories of Architecture III 3.0 Credits
Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 344 [WI] History of Modern Architecture I 3.0 Credits
Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 345 [WI] History of Modern Architecture II 3.0 Credits
Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits
Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit
An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits
A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 350 Contemporary Architecture 3.0 Credits
Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C-]
ARCH 351 Studio 5-1 4.0 Credits
Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

ARCH 352 Studio 5-2 4.0 Credits
Continues ARCH 351. Emphasizes the strengthening of students' ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

ARCH 353 Studio 5-3 4.0 Credits
Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

ARCH 361 Studio 6-1 4.0 Credits
Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]
Corequisite: ARCH 335

ARCH 362 Studio 6-2 4.0 Credits
Continues ARCH 361. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 361 [Min Grade: D]
Corequisite: ARCH 336

ARCH 363 Studio 6-3 4.0 Credits
Continues ARCH 362. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 382 [Min Grade: D]
Corequisite: PHIL 317

ARCH 377 Architectural Technology VII 3.0 Credits
Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 376 [Min Grade: C]

ARCH 381 Architecture Studio 3A 4.0 Credits
Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 283 [Min Grade: C] and ARCH 226 [Min Grade: C] and ARCH 173 [Min Grade: C]

ARCH 382 Architecture Studio 3B 4.0 Credits
Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 381 [Min Grade: C] and ARCH 274 [Min Grade: C]

ARCH 383 Architecture Studio 3C 4.0 Credits
Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 382 [Min Grade: C] and ARCH 275 [Min Grade: C]
ARCH 399 Independent Study in Architecture 0.5-12.0 Credits
Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits
Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 431 [WI] Architectural Programming 3.0 Credits
Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]

ARCH 432 The Development Process 3.0 Credits
Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 441 Urban Design Seminar 3.0 Credits
Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 451 Advanced Drawing 3.0 Credits
Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C] or INTR 341 [Min Grade: C]

ARCH 455 Computer Applications in Architecture I 3.0 Credits
Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 456 Computer Applications in Architecture II 3.0 Credits
Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 463 Emerging Architectural Technology 3.0 Credits
A holistic study of design and construction technology of significant buildings by leading architects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 464 Building Enclosure Design 3.0 Credits
Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 465 Energy and Architecture 3.0 Credits
Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 481 Architecture Studio 4A 4.0 Credits
Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 383 [Min Grade: C] and ARCH 276 [Min Grade: C]

ARCH 482 Architecture Studio 4B 4.0 Credits
Furthers the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 481 [Min Grade: C] and ARCH 377 [Min Grade: C]

ARCH 483 Architecture Studio 4C 4.0 Credits
Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 482 [Min Grade: C] and ARCH 378 [Min Grade: C]
ARCH 487 Architecture Studio 5A 4.0 Credits
Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 483 [Min Grade: C] and ARCH 379 [Min Grade: C]

ARCH 489 Architecture Studio 5C 4.0 Credits
Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 488 [Min Grade: C]

ARCH 491 Advanced Topics in Architecture 1.0-6.0 Credit
Covers advanced topics in architectural design, practice, technology or history and theory that satisfy professional or historical/theory elective requirements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 493 Senior Project I 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 363 [Min Grade: C] and ARCH 473 [Min Grade: C]
Corequisite: ARCH 431

ARCH 494 Senior Project II 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 493 [Min Grade: C]

ARCH 495 Senior Project III 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 494 [Min Grade: C]

ARCH 496 Thesis I 8.0 Credits
Continues ARCH 495. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 496 [Min Grade: C]

ARCH 497 Thesis II 8.0 Credits
Continues ARCH 496. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 496 [Min Grade: C]

ARCH 498 Thesis III 8.0 Credits
Continues ARCH 497. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can be repeated multiple times for credit
Prerequisites: ARCH 497 [Min Grade: C]

ARCH 499 [WI] Special Topics in Architecture 3.0 Credits
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements and university writing intensive requirements. Course may be repeated for credit when different topics are offered. Fall, Winter, Spring, Summer. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 499 [WI] Special Topics in Architecture 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARCH 529 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARCH 539 Independent Study in Architecture 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Courses

ARCH 101 Studio 1-A 4.0 Credits
2+4 Option Architecture Majors only. Introduces basic architectural design principles. Elementary concepts of space, surface, and form will be explored in two- and three-dimensional abstract exercises. Incorporates observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 102 Studio 1-B 4.0 Credits
2+4 Option Architecture Majors only. Transitions from abstract principles to simple architectural exercises, considering function, scale, user and ordering strategies in relationship to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 101 [Min Grade: C] and ARCH 131 [Min Grade: C]

ARCH 103 Studio 2-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 102. Introductory architectural design studio in which simple architectural problems develop issues of context and the use of materials with issues of space and human activity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 102 [Min Grade: C] and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-])

ARCH 104 Studio 2-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 103. Introductory architectural design studio in which issues of architectural form are balanced with site and programmatic concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 103 [Min Grade: C-] and (ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-])
Corequisite: ARCH 161

ARCH 105 Studio 3-A 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 104. Covers intermediate architectural design problems of increasing complexity that emphasize the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 104 [Min Grade: C-] and ARCH 161 [Min Grade: C-]
Corequisite: ARCH 134

ARCH 106 Studio 3-B 4.5 Credits
2+4 Option architecture majors only. Continues ARCH 105. Continues exploration of intermediate architectural design problems that present a full range of challenges in the areas of organization, context, and expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 105 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

ARCH 107 Foundation Design I 2.0 Credits
Introduces basic design principles through investigation of abstract and applied design projects using two-dimensional media. Exercises heighten observation and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 108 Foundation Design II 2.0 Credits
Investigates basic design principles through abstract and applied design projects in two-dimensional and three-dimensional media. Design exercises will advance understanding of the design process by exploring conceptual ideas through graphic and oral communication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 107 [Min Grade: C]
ARCH 109 Foundation Design III 2.0 Credits
Investigates basic design principles that emphasize the inter-relationship between the scale of the human body and its movement within three-dimensional space. More in-depth design exercises will address the design process, development of a conceptual idea and a higher-level graphic and oral presentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 108 [Min Grade: C]

ARCH 111 Studio 1-1 4.0 Credits
Introduces basic architectural design principles and concepts of space, surface and form explored in two and three-dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills while developing architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 109 [Min Grade: C] or ARCH 192 [Min Grade: C]

ARCH 112 Studio 1-2 4.0 Credits
Emphasizes the nature of function, structure, and material and their impact on the design process, and therefore their solutions to architectural problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 111 [Min Grade: C] or INTR 233 [Min Grade: C] and ARCH 131 [Min Grade: C]

ARCH 113 Studio 1-3 4.0 Credits
Investigates the interrelationships of scale, context, and building elements and the nature of materials and structure and their impact on the process of creating spaces for human activity through simple architectural problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 112 [Min Grade: C] and ARCH 132 [Min Grade: C] or (INTR 233 [Min Grade: C] and INTR 220 [Min Grade: C])

ARCH 121 Studio 2-1 3.0 Credits
Stresses the impact of function, materials, and the issue of building image on the design process. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 113 [Min Grade: C] and (ARCH 133 [Min Grade: C] or ARCH 150 [Min Grade: C]) and ARCH 161 [Min Grade: C]
Corequisite: ARCH 141

ARCH 122 Studio 2-2 3.0 Credits
Continues ARCH 121. Investigates projects of greater programmatic complexity and more stringent site constraints. Projects begin to deal with buildings in an urban context. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 121 [Min Grade: C-
Corequisite: ARCH 142

ARCH 123 Studio 2-3 3.0 Credits
Continues ARCH 122. Poses design problems of increased complexity to enable students to explore in greater detail the issues presented in the previous term. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 122 [Min Grade: C-]
Corequisite: ARCH 143

ARCH 131 Architectural Representation I-Drawing Basics 3.0 Credits
Introduces the basic skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces techniques of digital documentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-] and ARCH 131 [Min Grade: C-]

ARCH 132 Architectural Representation II-Drawing 3.0 Credits
Continues ARCH 131 Architectural Representation I. Introduces advanced skills of architectural representation through drawing, including drafted and freehand techniques in a variety of media. Also introduces advanced techniques of digital documentation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 101 [Min Grade: C-] or ARCH 111 [Min Grade: C-] and ARCH 131 [Min Grade: C-]

ARCH 133 Architectural Representation III-Digital 4.0 Credits
Continues ARCH 132 Architectural Representation II. Introduces basic digital representation skills in 2D and 3D, the creation and manipulation of three-dimensional architectural models and the resultant two-dimensional drawings as well as renderings using various computer techniques and software programs.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 102 [Min Grade: C-] or ARCH 113 [Min Grade: C-] and ARCH 132 [Min Grade: C-]

ARCH 134 Architectural Representation IV-3D Modeling 4.0 Credits
Continues ARCH 133. Further investigates and demonstrates the computer’s capabilities in architectural design, 3D modeling and representation using various computer techniques and software programs. May also introduce digital fabrication techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 104 [Min Grade: C-] or ARCH 113 [Min Grade: C-] and ARCH 133 [Min Grade: C-] or ARCH 150 [Min Grade: C-]
ARCH 135 Architectural Representation V-Advanced Methods 3.0 Credits
Continues ARCH 134. Examines advanced techniques of architectural representation and visual communications for use in the architectural design process. Emphasizes presentation methods to describe design concepts. Content may vary. Contact Architecture program for details. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 106 [Min Grade: C-] or ARCH 233 [Min Grade: C-]) and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-])

ARCH 141 Architecture and Society I 3.0 Credits
Examines the evolution of Western architectural thought, form, space, and structures in light of changing human values and institutions. Covers Western architecture from the prehistoric era through the Romanesque, and contemporary architecture in Asia and Central America as well as Islamic architecture in the Middle East and Spain.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARCH 142 Architecture and Society II 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Course covers early monumental architecture of the Western Hemisphere and then considers the evolution of Western architecture from the "Dark Ages" through the development and spread of Renaissance architecture across Europe and Latin America.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 141 [Min Grade: D]

ARCH 143 Architecture and Society III 3.0 Credits
Examines the evolution of Western architectural thought, form, space and structures in light of changing human values and institutions. Covers Western architecture and urbanism from the 16th C through the early 20th C. Also considered is the architecture of the Aztec and Inca empires, Islamic architecture and architecture and landscape designs of 16th C and 17th C Japan.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 142 [Min Grade: D]

ARCH 144 Architecture and Society IV 3.0 Credits
Examines the evolution of architectural thought, form, space and structures in light of changing human values and institutions. Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late 19th C. through the mid-20th C.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: D]

ARCH 161 Architectural Construction 3.0 Credits
Architecture majors only. Covers basic construction principles and the use of materials in developing architectural assemblies, providing a conceptual framework to integrate construction and design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 103 [Min Grade: C-] or ARCH 112 [Min Grade: C-]) and (ARCH 132 [Min Grade: C-] or ARCH 152 [Min Grade: C-] or ARCH 156 [Min Grade: C-])

ARCH 170 Architectural Technology I 3.0 Credits
Introduction to the fundamental aspects of building technology with exposure to materials, structure and building systems that are frequently used in building construction. Provides a framework for the exploration of construction in the context of design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 213 [Min Grade: C]

ARCH 172 Architectural Technology II 3.0 Credits
Further exploration of materials, structure and building systems and their influence on passive systems and sustainable design principles. Begins the development of systematic thinking regarding architectural technology.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 170 [Min Grade: C]

ARCH 173 Architectural Technology III 3.0 Credits
Introduction to the technical building analysis including the organizing principles for materials, structure and systems. Includes envelope assembly, thermal comfort, structural and passive building systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 172 [Min Grade: C]

ARCH 181 Architecture Studio 1A 4.0 Credits
Introduces basic architectural design principles. Elementary concepts of space, surface and form will be explored in two and three dimensional abstract exercises. Exercises incorporate observational analysis and graphic skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 182 Architecture Studio 1B 4.0 Credits
Transitions from abstract design principles to simple architectural exercises, considering function, scale, user and ordering strategies in relation to form-making in three-dimensional space. Exercises heighten observation and graphic skills while developing an architectural vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 181 [Min Grade: C] and ARCH 211 [Min Grade: C])
ARCH 183 Architecture Studio 1C 4.0 Credits
Focuses on a series of basic architectural problems developed around issues of context and material use in relationship to the organization of space and human activity. Design exercises will cultivate the design process through developing a conceptual idea through graphic and oral communication.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ARCH 182 [Min Grade: C] and ARCH 212 [Min Grade: C])

ARCH 191 Studio 1-AE 3.0 Credits
Architectural engineering majors only. Covers basic design principles using three-dimensional abstract and applied projects. Exercises heighten observation skills.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE.
Prerequisites: ARCH 191 [Min Grade: D]

ARCH 192 Studio 2-AE 3.0 Credits
Architectural engineering majors only. Continues ARCH 191. Uses design exercises to emphasize the nature of function, structure, and material and their impact on the design process.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE.
Prerequisites: ARCH 191 [Min Grade: D]

ARCH 211 Architectural Representation I 2.0 Credits
Introductory course that will provide a survey of drawing types with an emphasis on process and visual literacy.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.

ARCH 212 Architectural Representation II 2.0 Credits
Emphasis on craft and composition in the architectural representation of the built environment.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 211 [Min Grade: C]

ARCH 213 Architectural Representation III 2.0 Credits
Exploration of digital representation with an emphasis on making combining process drawing, digital fabrication and analog craft to develop three-dimensional representation skills.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 212 [Min Grade: C]

ARCH 224 Architectural Representation IV 2.0 Credits
Emphasizes the communication of design through perspective, view-making and rendering. Through the use of digital and analog techniques, the ability to select the proper media to visually convey a design concept will be developed.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 213 [Min Grade: C]

ARCH 225 Architectural Representation V 2.0 Credits
Emphasizes the tools to complete a final quality architectural presentation in a variety of venues including portfolios, digital presentations and online media.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 224 [Min Grade: C]

ARCH 226 Architectural Representation VI 2.0 Credits
Explores parametric thinking and the iterative design process while reinforcing critical skills in detailing and design development through various software programs.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 225 [Min Grade: C]

ARCH 231 Studio 3-1 3.0 Credits
Investigates specific building types to help students reach a basic level of competence in the language of architecture, problem-solving, and the means of communicating design solutions.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 123 [Min Grade: C-] and ARCH 143 [Min Grade: C-] and ARCH 161 [Min Grade: C-] and ARCH 134 [Min Grade: C-]

ARCH 232 Studio 3-2 3.0 Credits
Continues ARCH 231. Design projects expand students’ vocabulary and understanding of the process of creating solutions to the problems of architecture.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 231 [Min Grade: C-]

ARCH 233 Studio 3-3 3.0 Credits
Continues ARCH 232. Addresses the interaction and coordination between the language of architecture and the languages of the other disciplines that influence the process of design. More complex programs are assigned.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 232 [Min Grade: C-]
ARCH 241 Studio 4-1 4.0 Credits
Investigates the design relationship between the man-made and the natural environment in a study of large-scale site design and building development in relation to natural forces. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 242 Studio 4-2 4.0 Credits
Continues ARCH 241. Studies the relationship between building and site. A series of smaller-scale problems in site design investigates the architecture of the exterior. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 241 [Min Grade: D] and CIVE 261 [Min Grade: C-]

ARCH 243 Studio 4-3 4.0 Credits
Addresses architectural problems with specific environmental and site restraints and criteria. Issues of sustainable design will also be explored. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 242 [Min Grade: D] and CIVE 262 [Min Grade: C-]
Corequisite: CIVE 263

ARCH 261 Environmental Systems I 3.0 Credits
Introduces heating, ventilation, and air conditioning systems and site utility planning. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 262 Environmental Systems II 3.0 Credits
Introduces plumbing systems, including site distribution, water distribution, and waste systems. Fire protection is also covered. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 263 Environmental Systems III 3.0 Credits
Covers application of electrical systems and lighting to architectural design and construction. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: C-] or PHYS 184 [Min Grade: C-]

ARCH 271 Materials & Structural Behavior I 3.0 Credits
Introduces the basics of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 184 [Min Grade: D] or PHYS 104 [Min Grade: D]

ARCH 272 Materials & Structural Behavior II 3.0 Credits
Second part of a three course sequence that introduces students to building structures and materials. The course will introduce structural design methodologies and students will learn how to design wood floor systems, beams, columns, steel beams and tension elements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 271 [Min Grade: C] or CIVE 261 [Min Grade: D]

ARCH 273 Materials & Structural Behavior III 3.0 Credits
Third part of a three course sequence that introduces students to building structures and materials. The course will introduce masonry and foundation design. Students will learn how to design concrete beams and columns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 272 [Min Grade: C] or CIVE 262 [Min Grade: D]

ARCH 274 Architectural Technology IV 3.0 Credits
Intermediate development of architectural technology with a focus on application of analysis of primary materials, structure and systems. Depth and range of analytical tools are addressed.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 173 [Min Grade: C]

ARCH 275 Architectural Technology V 3.0 Credits
Further development of analytical skills for building technology. Case studies and real world precedents examine materials, structure and systems in the support of larger architectural objectives.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 274 [Min Grade: C]

ARCH 276 Architectural Technology VI 3.0 Credits
Examination of technical analysis and design in support of iterative architectural concepts. Materials, structure and systems are utilized to develop strong design synergies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 275 [Min Grade: C]

ARCH 281 Architecture Studio 2A 4.0 Credits
Introduces issues of architectural form, site and programmatic concerns. Design exercises will explore simple issues of structure, building and material systems and sustainability.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: (ARCH 183 [Min Grade: C] and ARCH 213 [Min Grade: C])
ARCH 282 Architecture Studio 2B 4.0 Credits
Covers architectural design problems of incremental complexity that emphasizes the nature of function, structure, and material and their impact on the design process.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 281 [Min Grade: C] and ARCH 224 [Min Grade: C] and ARCH 170 [Min Grade: C]

ARCH 283 Architecture Studio 2C 4.0 Credits
Explores architectural design problems that introduce the full range of challenges in the areas of organization, program, context, systems, and formal expression.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 282 [Min Grade: C] and ARCH 225 [Min Grade: C] and ARCH 272 [Min Grade: C]

ARCH 315 Sustainable Built Environment I 3.0 Credits
Provides an overview of contemporary sustainable design principles and systems involved to posit novel solutions to various design challenges. Combining theoretical knowledge, field trips and case studies enabling students to critically assess sustainability as it relates to the built environment through five key subsystems: materials, air, water, energy and life.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ARCH 320 Sustainable Built Environment II 3.0 Credits
Students will examine the work of scientists, designers, authors, artists, architects, engineers, planners, etc to gain a deeper conceptual understanding of current and emerging strategies in sustainability and the complex and integrated systems approach to the built environment in the present and near future.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARCH 315 [Min Grade: C-]

ARCH 335 Professional Practice I 3.0 Credits
This seminar is the first of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 243 [Min Grade: C-] or ARCH 333 [Min Grade: C]

ARCH 336 Professional Practice II 3.0 Credits
This seminar is the second of a two-course sequence that introduces students to varying topics related to architectural practice in today’s society. It addresses the following issues: Practice Management, Project Management, Financial Considerations, Legal Responsibilities, Ethics & Professional Judgment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH or major is INTR.
Prerequisites: ARCH 335 [Min Grade: C]

ARCH 340 American Architecture & Urbanism 3.0 Credits
Surveys the development of American architecture and urbanism from its Native American origins through the arrival of early Modernism in the 1930s and 1940s. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 341 [WI] Theories of Architecture I 3.0 Credits
Seminar that examines theories and principles of Western architecture before 1700. History/theory elective. Fall. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 342 [WI] Theories of Architecture II 3.0 Credits
Continues ARCH 341. Seminar that examines theories and principles of Western architecture from the Baroque era of the 17th century to the beginning of Modernism in the 20th century. History/theory elective. Winter. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 343 Theories of Architecture III 3.0 Credits
Seminar that examines 20th-century theories of architecture, including analysis and discussion of current theoretical positions. History/theory elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 344 [WI] History of Modern Architecture I 3.0 Credits
Surveys the crucial buildings and thematic development of modern architecture and urbanism beginning in the late nineteenth Century continuing through the mid-20th Century. History/theory elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]
ARCH 345 [WI] History of Modern Architecture II 3.0 Credits
Continuation of ARCH 344. Surveys the crucial buildings and thematic development of modern architecture and urbanism from the mid-20th Century to the present. History/theory elective. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 346 [WI] History of Philadelphia Architecture 3.0 Credits
Covers the architecture of the city of Philadelphia from 1682, examining its architects, styles, and sources through lectures, walking tours, and student reports. History/theory elective. Fall. Alternate years. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-] or INTR 200 [Min Grade: C-] or ARTH 103 [Min Grade: C-]

ARCH 347 [WI] Architectural Study Tour 1.0-6.0 Credit
An intensive study tour of selected domestic and foreign destinations focusing on architecture and related design disciplines. Combines lecture, site visits, sketching and individual research. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-] or ARCH 263 [Min Grade: D] or PHIL 317

ARCH 348 [WI] Studies in Vernacular Architecture 3.0 Credits
A topical survey of world traditions of vernacular architecture, with emphasis on houses and dwelling environments. The survey topics include basics of shelter, construction methods, response to climate, patterns of settlement, social and economic organization, cultural expression, and methods of research and analysis.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 350 Contemporary Architecture 3.0 Credits
Survey and analysis of significant developments in architecture and urbanism over the past 50+ years. Writing Intensive.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 351 Studio 5-1 4.0 Credits
Poses problems that address the relationship of form, site, program, and theory within the constraints of the basic systems (structural, mechanical, etc.).
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: CIVE 283 [Min Grade: D] or ARCH 273 [Min Grade: C] and ARCH 243 [Min Grade: C]

ARCH 352 Studio 5-2 4.0 Credits
Continues ARCH 351. Emphasizes the strengthening of students’ ability to solve complex problems in architecture. Expects students to demonstrate understanding and control of basic architectural systems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 351 [Min Grade: C] and ARCH 261 [Min Grade: C-]

ARCH 353 Studio 5-3 4.0 Credits
Continues ARCH 352. Stresses the coordination of all architectural criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 352 [Min Grade: C] and ARCH 262 [Min Grade: C-]

ARCH 354 Studio 6-1 4.0 Credits
Introduces problems of urban design. Case studies demonstrate the relationship between the manmade environment and the natural environment as well as the relationship between many buildings and other manmade environments and the natural environment. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 353 [Min Grade: D] and ARCH 263 [Min Grade: C-]
Corequisite: ARCH 335

ARCH 355 Studio 6-2 4.0 Credits
Continues ARCH 354. A large urban-design project is undertaken to learn the design process required to solve problems of such magnitude. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 355 [Min Grade: D]
Corequisite: ARCH 336

ARCH 356 Studio 6-3 4.0 Credits
Continues ARCH 355. Requires students to develop architectural solutions for a portion of the problem addressed in Studio 6-2, demonstrating an understanding of the relationship between buildings and the exterior environment established in the previous course. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 362 [Min Grade: D]
Corequisite: PHIL 317

ARCH 357 Architectural Technology VII 3.0 Credits
Advanced building technology concepts are explored through case studies and focused design examples. Materials, construction, methods, structure, systems and envelope are studied as integrated aspect of larger iterative design processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 276 [Min Grade: C]
ARCH 378 Architectural Technology VIII 3.0 Credits
Building technology and analysis are explored through design precedents and sketch problems to develop integrated design and analytical skills. Focuses on large and small scale elements that can become generative and performative aspects of major design decisions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 377 [Min Grade: C]

ARCH 379 Architectural Technology IX 3.0 Credits
Advanced building technology design and analysis is utilized in iterative and integrated design methods to support comprehensive design processes. Materials, structure and systems are developed qualitatively and quantitatively through design and analysis exercises.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 378 [Min Grade: C]

ARCH 381 Architecture Studio 3A 4.0 Credits
Investigates the design relationship between man-made and the natural environment. Cultivates advanced analysis methods and the development of informed and resolved design solutions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 283 [Min Grade: C] and ARCH 226 [Min Grade: C] and ARCH 173 [Min Grade: C]

ARCH 382 Architecture Studio 3B 4.0 Credits
Studies the relationship between building, site and context. Architectural design problems emphasize concept development that translates careful analysis into the building ideas with a progressing understanding of architectural concerns.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 381 [Min Grade: C] and ARCH 274 [Min Grade: C]

ARCH 383 Architecture Studio 3C 4.0 Credits
Focuses on architectural problems with intermediate complexity. Integrates issues of context, site, program, function, and architectural systems into advanced design proposals.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 382 [Min Grade: C] and ARCH 275 [Min Grade: C]

ARCH 399 Independent Study in Architecture 0.5-12.0 Credits
Independent study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ARCH 421 [WI] Environmental Psychology and Design Theory 3.0 Credits
Examines the relationship between human behavior and architecture from the perspective of environmental psychology. Topics include aesthetics, environmental experience, social interaction, social organization, and culture. This is a writing intensive course. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 431 [WI] Architectural Programming 3.0 Credits
Introduces current techniques of building programming and their relationship to building design. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]

ARCH 432 The Development Process 3.0 Credits
Introduces the process of land development. Explores traditional and emerging development models (the architect as the equity participant and developer) in relation to new construction and rehabilitation. Covers various methods of initiating building projects and financing and tax issues. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 441 Urban Design Seminar 3.0 Credits
Expands the concept of architecture to urban design scale and presents the principles of city planning through a series of case studies. History/Theory Elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C]

ARCH 451 Advanced Drawing 3.0 Credits
Covers advanced architectural rendering, concentrating on the effects of light, shade, and color using the techniques of water-color rendering. Professional elective. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C] or INTR 341 [Min Grade: C]

ARCH 455 Computer Applications in Architecture I 3.0 Credits
Covers two-dimensional and three-dimensional computer representations and applications. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]

ARCH 456 Computer Applications in Architecture II 3.0 Credits
Further investigates and demonstrates the computer's capabilities in architectural design and representation. Professional elective.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 134 [Min Grade: C] or ARCH 236 [Min Grade: C]
ARCH 463 Emerging Architectural Technology 3.0 Credits
A holistic study of design and construction technology of significant buildings by leading architects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 464 Building Enclosure Design 3.0 Credits
Examines the integrations of aesthetics, building science, and technology in the design of building enclosures. Professional Elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 465 Energy and Architecture 3.0 Credits
Creates an awareness of the availability of energy resources and their effect on the built environment. Discusses alternative sources of energy. Professional elective. Summer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 161 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 481 Architecture Studio 4A 4.0 Credits
Focuses on more complex architectural challenges through analysis of case studies that address the relationship between the man-made built environment and the natural environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 383 [Min Grade: C] and ARCH 276 [Min Grade: C]

ARCH 482 Architecture Studio 4B 4.0 Credits
Furthers the understanding of context and design and the application of solutions and strategies surrounding more complex architectural and environmental problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 481 [Min Grade: C] and ARCH 377 [Min Grade: C]

ARCH 483 Architecture Studio 4C 4.0 Credits
Challenges to develop and refine architectural solutions through an advanced understanding of the relationship between buildings and environment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 482 [Min Grade: C] and ARCH 378 [Min Grade: C]

ARCH 487 Architecture Studio 5A 4.0 Credits
Addresses the complex relationship through analysis and synthesis of form, site, program, building technology and theory within specific building context.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 483 [Min Grade: C] and ARCH 379 [Min Grade: C]

ARCH 488 Architecture Studio 5B 4.0 Credits
Emphasizes complex architectural problems while demonstrating understanding and appropriate application.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 487 [Min Grade: C]

ARCH 489 Architecture Studio 5C 4.0 Credits
Integrates in-depth application and coordination of all architectural building criteria in a large scale and complex architectural problem.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 488 [Min Grade: C]

ARCH 491 Advanced Topics in Architecture 1.0-6.0 Credit
Covers advanced topics in architectural design, practice, technology or history and theory that satisfy professional or historical/theory elective requirements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 363 [Min Grade: C] or ARCH 473 [Min Grade: C]
Corequisite: ARCH 431

ARCH 493 Senior Project I 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part one of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 481 [Min Grade: C] or ARCH 173 [Min Grade: C]

ARCH 494 Senior Project II 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part two of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 493 [Min Grade: C]

ARCH 495 Senior Project III 4.0 Credits
Students develop a three-term capstone design project to pursue and explore architectural concepts in depth. Students take a project from concept, research, programming to complete design development. Part three of three.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ARCH.
Prerequisites: ARCH 494 [Min Grade: C]
ARCH 496 Thesis I 8.0 Credits
An individually structured year-long design problem that enables students to work independently and explore complex issues in depth. Periodic individual review sessions are scheduled with faculty adviser. Fall.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 143 [Min Grade: C-] and CIVE 263 [Min Grade: C-] and (ARCH 134 [Min Grade: C-] or ARCH 153 [Min Grade: C-]) and ARCH 263 [Min Grade: C-] and CIVE 263 [Min Grade: C-]

ARCH 497 Thesis II 8.0 Credits
Continues ARCH 496. Winter.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 496 [Min Grade: C-]

ARCH 498 Thesis III 8.0 Credits
Continues ARCH 497. Spring.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARCH 497 [Min Grade: C-]

ARCH 499 [WI] Special Topics in Architecture 3.0 Credits
Covers special topics in architectural history, theory, or technology that satisfy history/theory or professional elective requirements and university writing intensive requirements. Course may be repeated for credit when different topics are offered. Fall, Winter, Spring, Summer. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 599 Independent Study in Architecture 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C-]

ARCH 599 Independent Study in Architecture 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ARCH 143 [Min Grade: C]
ARTh 150 Art History Research Methods 3.0 Credits
This course introduces students to research methods that guide the physical, contextual and interpretive analysis of objects categorized by design and/or use as “works of art.” Students will learn how to identify materials and media, as well as how to conduct archival and library research. From these foundations, students will explore the circumstances of artifact production and function as well as histories of excavation and/or preservation, documentation, display and interpretation. The course includes mandatory on-campus and off-campus field trips. Students will gain valuable skills that may be required for co-ops in museums or galleries as well as to honing their skills for writing research papers.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: ARTH 101 [Min Grade: B-], ARTH 102 [Min Grade: B-], ARTH 103 [Min Grade: B-] (Can be taken Concurrently)

ARTh 200 Principles and Methods of Art History 3.0 Credits
This course will critically examine the interpretive principles and methods that have been used in the discourse of art history from the Renaissance to the present day.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 300 [WI] History of Modern Design 3.0 Credits
Examines the products of applied design during the past 150 years, including examples of furnishings, industrial design, fashion, and graphic design, in relation to demand, technology and production, standards, fine art, social reform, and the dynamics of consumption. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ARTh 301 Asian Art and Culture 3.0 Credits
Explores the diverse visual languages and cultures of Asia including the Buddhist and Hindu traditions from India and Southeast Asia, the imperial art of China with its refined taste for ceramics and painting, and the Japanese.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 302 Art of India 3.0 Credits
This course explores the diverse artistic traditions of the Indian subcontinent from ancient times to the modern period, focusing on the art of the Buddhist, Hindu and Islamic communities. The survey ends with an examination of the colonial, post-colonial and contemporary art scene.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 303 Art of China 3.0 Credits
From the first empires to modern times, this course explores the art of painting ceramics, as well as the sculptural and architectural traditions of China.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 304 Art of Japan 3.0 Credits
This course examines the art of Japan from the Shinto traditional forms to the creation of a Buddhist Japanese idiom, from the courtly and military art to the Zen aesthetics and the establishment of a modern urban culture.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 310 Early American Art 3.0 Credits
This course will survey paintings, sculpture, graphic arts, and material culture of North America from the moment of Columbus’s “discovery” to the mid-nineteenth century. It will trace a wide range of artistic and visual works from the Colonial, Federal and Antebellum periods, including some works that were made during and after the Civil War. Along with the study of art emerging out of a European tradition, we will simultaneously be studying the art and culture of the indigenous peoples of Latin and North America, paying special attention to the interactions between indigenous and immigrant visual cultures.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 311 Twentieth-Century American Art 3.0 Credits
This course tracks the development of select artistic movements and the careers of notable American artists, from 1900-1939. This course will study the impact of immigration, WWI, industrialization and mechanization, urbanization, economic crisis, and radical politics on American art, and also how American art contributed to the production of specific racial, classed, and gendered American subjects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 312 Early Modernism (1850-1900) 3.0 Credits
This course is an introduction to European art of the late nineteenth century, from roughly 1850 to 1900—the decades when modernism exploded. Beginning with a close look at the Realist and Impressionist movements in Paris, we will study the artistic styles, techniques, and materials characteristic of the modern era, as well as the changing social, historical and political circumstances that helped shaped artistic production.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 313 20th Century Modernism (1900-1955) 3.0 Credits
This course will critically examine the development of Modernism in Western art during the first half of the 20th century in light of socioeconomic and political factors, philosophical and scientific ideas, technological developments, stylistic movements, and art theories.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTh 314 Contemporary Art 3.0 Credits
This course will survey current global art production in light of socioeconomic and political factors, philosophical and scientific theories, and new approaches to media and technology.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
ARTH 315 History of African-American Art 3.0 Credits
This course traces the history of African American art, beginning with the African-inspired material culture of slaves, and, later, encompassing the works of formally-trained as well as self-taught painters, sculptors, photographers, and artists working in multimedia up to the present. These works will be situated within the contexts of critical race theory, social and political movements, collectors and patrons, early critics and theorists of the black avant garde, influential exhibitions, and the opposition between elite and popular cultures.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 316 African Art 3.0 Credits
This course will explore historical and contemporary African sculpture, textiles, painting, drawing, photography and mixed media in relationship to particular themes such as religion, trade, political power and healing. With emphasis on select objects from West and Central Africa, the course will also consider the visual arts in relationship to ideas of improvisation, aesthetics, identity and self-representation.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 317 Modern Art Theory and Criticism 3.0 Credits
This course will critically examine the development of art theory and criticism in the discourse of Western art from the early 20th century to the present day. Specific theories will be analyzed in relation to stylistic developments as well as the socio-economic, political, scientific, and technological developments that have determined these changes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 318 Art in the Age of Technology 3.0 Credits
An inquiry into the ideas, concerns, and values that constitute the worldview of modern Western science and technology and the impact that this view, as well as specific technologies, have had upon the visual arts.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 319 Ancient Greek and Roman Art 3.0 Credits
This course will survey the art produced by the ancient cultures of Greece and Rome, from the archaic period to the fall of the Roman Empire. The art will be considered as an expression of the social, political, economic and intellectual histories of these two civilizations.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 320 Medieval Art 3.0 Credits
This course is a survey of Medieval Art between the 3rd and 14th centuries C.E.. Architecture, mural painting, stained glass, sculpture, illuminated manuscripts, enamel, tapestry and other objects of ceremonial and everyday use will be studied as expressions of the political, social, and religious contexts of the time. Emphasis will be placed upon Christian art, but Islamic, Jewish, and secular traditions in the arts will also be examined.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 321 Northern Renaissance 3.0 Credits
This course will survey paintings, sculpture, architecture and graphic art from Northern Europe during the 15th and 16th centuries. Artworks will be analyzed not only in terms of their formal characteristics, but also as expressions of concurrent social, political, economic, religious, and philosophical developments.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 322 Italian Renaissance Art 3.0 Credits
This course will survey paintings, sculpture, architecture and graphic art from Italy during the 15th and 16th centuries. Artworks will be analyzed not only in terms of their formal characteristics, but also as expressions of concurrent social, political, economic, religious, and philosophical developments.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 323 Art of the 17th and 18th Centuries 3.0 Credits
This course will examine the history of European art and architecture from the late 1500s to approximately 1800—a period that bridges the gap from the Renaissance to the earliest days of the Modern era. Beginning with the Baroque in Counter-Reformation Italy and concluding with Neoclassicism in the late 18th century, the course will trace the stylistic developments in Europe and America through a variety of religious, political, and philosophical movements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 324 History of Interior Space and Furnishings 3.0 Credits
Examines social and architectural influences from preclassical through Classic Revival, including materials, workmanship, resulting forms, and design influence on subsequent periods.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARTH 101 [Min Grade: D] or ARTH 102 [Min Grade: D]

ARTH 325 History of Costume I: Preclassical to Directoire 3.0 Credits
Examines costumes of the ancient world and Western civilization through the Directoire period, including political, economic, and social influence on aesthetic development in dress. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARTH 101 [Min Grade: D] or ARTH 102 [Min Grade: D]

ARTH 326 History of Costume II: Directoire to World War I 3.0 Credits
Examines political, social, and economic influences on costume. Uses the Drexel Historic Costume collection as primary source material. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARTH 335 [Min Grade: D]
ARTH 337 History of Costume: Post World War I to Present 3.0 Credits
Examines major trends in mid-to-late 20th-century fashionable apparel in their sociocultural, political, and economic contexts. Also examines counter-fashion movements and explores current media and marketing influences.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ARTH 103 [Min Grade: D]

ARTH 340 Women in Art 3.0 Credits
A historical survey of the art created by women in Western civilization, with a special focus upon the art created since the women's movement of the 1970s. Images are analyzed in relation to the sociopolitical and psychological context of Western, patriarchal culture.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 350 History of the Art Museum in America 3.0 Credits
American art museums have an interesting and unique history from Charles Wilson Peale's first museum to the current boom in "starchitecture" buildings. This course introduces students to the history and theory of museums and museum practices, administration, exhibition planning, education, and museum careers. Students will examine how museum functions have changed over time and consider the trends that have impacted how museums are structured and how they view their roles and responsibilities. Several visits to area museums will be included in the course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 352 Careers in Museums 3.0 Credits
This course will examine roles in museums including curators, conservators, registrars, educators, programmers, audience development, fundraising, volunteers, etc. Individual roles will be studied as well as the interactions within internal systems in museums. Students will also learn how to develop and manage their own museum careers.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 354 Technology in the Museum 3.0 Credits
The question of how and when to use technology is one that all museums face in the 21st century. What is a productive use of technology? How much is too much? What is the cost to the museum object? This course will consider these questions through readings, trips to local museums, and case studies of several museums around the country.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 356 Understanding Museum Audiences 3.0 Credits
This course will introduce students to the variety of ways that museums think about their diverse audiences and the programs that they develop to meet audience needs. Our society is changing. Learning is no longer confined to the classroom and museums have become an important resource for this lifelong, self-directed learning. This course will introduce students to educational theory, research and practice in museums. Students will experience different techniques for teaching with and interpreting art in the museum setting.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 399 Independent Study In Art His 0.5-12.0 Credits
Provides individualized study in art history in a specialized area. May be repeated for credit.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ARTH 400 Art History Senior Thesis 3.0 Credits
A scholarly research project, at least 15-20 pages in length, to be written during the Spring term of the senior year under the advisement of a thesis director chosen from among the art history faculty. The thesis student will meet at least once every three weeks with their advisor to determine a suitable topic for their thesis, provide direction for their research by helping them to identify appropriate scholarly resources, discuss interpretive strategies, determine the expository structure of the paper, and provide clarity on specific requirements for bibliography, illustrations, and a citation system.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

ARTH 465 [WI] Special Topics in Art History 3.0 Credits
Provides study in art history on a special topic or on an experimental basis. May be repeated for credit. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ARTH 477 Art History Seminar 3.0 Credits
Provides reading, discussion, and research on pertinent topics in art history.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.

ARTH 479 Independent Study in Art History 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTH 499 Independent Study in Art History 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
ARTh I399 Independent Study in Art History 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTh I499 Independent Study in Art History 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTh T180 Special Topics in Art History 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTh T280 Special Topics in Art History 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTh T380 Special Topics in Art History 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

ARTh T480 Special Topics in Art History 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Behavorial & Addictions Couns

Courses

BACS 100 Life Span Human Development 3.0 Credits
This course introduces students to the physical, cognitive and psychological aspects of human development from birth through advanced old age. Topics include: environmental influences, perception, gender roles and sexuality, spirituality, motivation, life styles, and psychiatric disorders.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 200 Foundation of Behavioral Health Care 3.0 Credits
This course introduces the students to the historical and current contexts of program components that comprise community-based behavioral health systems. Topics include: work-force roles; regulatory policies and program practices; federal, state, and county program organizations; advocacy issues; and managed care systems issues.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 205 Strategies for Academic Success 1.0 Credit
This course helps students to explore the learning process, to gain essential skills needed to achieve academic success and to develop the ability to make effective use of university resources. Discussion, personal reflection, and relevant electronic resources are used to foster students’ development as self-directed learners. Specific attention will be given to the following topics: study skills, learning strategies, time management, academic planning, test-taking techniques, and goal-setting. The goal of this course is to help improve students’ efficacy in the areas of academic self-management, self-direction, and resource utilization.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 210 Behavioral Disorders 3.0 Credits
Clinical characteristics and diagnostic features of major psychiatric disorders are reviewed within the contexts of community-based treatment approaches. Topics include: etiological models; differential symptoms, diagnostic/functional assessment and treatment interventions.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
BACS 220 Counseling Theory and Practice 3.0 Credits
Surveys major counseling theories with emphasis upon study and practice of basic counseling competencies. Topics include: relationship building, effective communication and helping skills, common stages in counseling process, and helping skills with special populations.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 230 Genetics and Mental Health 3.0 Credits
This course explores genetic concepts and principles as they pertain to human variation in behavioral and general health disorders. Students obtain a firm grounding in the basic science and the tools used by researchers to explore the contribution of the genes (and their essential counterpart, the environment) to behavior.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 232 Ethics and Professional Responsibility 3.0 Credits
This course discusses the philosophical, legal and moral responsibilities of professionals in behavioral health and human services setting with a strong emphasis on counseling relationships. A wide array of ethical issues are presented and discussed. Moral dilemmas comprised of competing moral obligations are examined.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 234 Introduction to Addictive Disorders 3.0 Credits
This course introduces the nature of addictions and the impairment in individuals who suffer from addictions. It includes a review of theories on substance disorders and approaches to identification, prevention and treatment. Topics include: historical perspectives, diagnosis, types of addictive behaviors, treatment, and current research.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 236 Psychiatric Rehabilitation Principles and Practices 3.0 Credits
This is an introductory survey courses which acquaints the student with the principles and practices of Psychiatric (or Psychosocial) Rehabilitation. It provides the student with an understanding of the manner in which Psychiatric Rehabilitation approaches, understands and assists the person with serious and persistent mental illness.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 250 Behavioral Health Informatics 3.0 Credits
This course introduces students to the uses and importance of computer technologies in transforming behavioral health care practice. Course sections cover both the science and practice applications of emerging technologies from psychotherapies, to medication management, and to quality care management.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 255 Multicultural Counseling 3.0 Credits
This course provides didactic information for use in the development of awareness and skills necessary for effective therapeutic relationships with clients of diverse cultural backgrounds.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 301 Group Counseling I 3.0 Credits
This course is an introduction to the theoretical base and skills used in conducting group counseling. Included are theories of group work, facilitation techniques, types and styles of groups and models of group functioning. Students participate in a group as a group member and to act as a group co-leader in order to practice leadership skills.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 304 Cognitive and Behavioral Counseling I 3.0 Credits
This course familiarizes the student with key cognitive-behavioral models used in therapy today. Differences and similarities are explored. Students are exposed to the philosophical models and the related techniques stemming from these models. Skills on how to conceptualize and work with a client are taught.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 310 Recovery and Relapse Prevention 3.0 Credits
The goal of recovery and relapse prevention is the development personal strategies that will help the person restructure their life in a way that will prevent a return to active addiction. This course helps define the role of professional counselor in understanding the dynamic of recovery from a clinical perspective.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 312 Case Management Methods 3.0 Credits
This course is an in-depth explorations of the definitions and methodologies of case management services. The course is designed to provide students with the most up to date research and clinical applications of services management in the practice of addictions counseling.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 320 Crisis and Brief Intervention 3.0 Credits
This course introduces student to the fundamental concepts, theories, strategies, and skills needed to understand and conduct effective crisis and brief intervention counseling. Particular attention is given to several types of crises commonly encountered in working within settings serving people who have long-term disabling psychiatric disorders.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 325 Psychopharmacology for Counselors 3.0 Credits
This course focuses on the mechanisms of action of psychiatric medications, and uses and limitations of psychopharmacology in the overall management of serious mental illness. The student will learn to work collaboratively with the consumer, and others, and the importance of integrating the use of medications with psychiatric rehabilitation approaches.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
BACS 345 Careers in Behavioral Health 3.0 Credits
There are numerous career choices available within the field of Behavioral Health. In order to help you prepare for the future, this course explores the roles, responsibilities, and healthcare settings associated with careers such as counselor, psychiatric rehabilitation practitioner, social worker, therapist, psychologist, psychiatrist, advocate, and others. We explore opportunities to work with children, adults, and seniors in hospital and community treatments settings as well as in schools and in the community at large. We also examine the educational requirements of different fields of professional practice and review graduate schools options. Students explore their strengths and preferences related to future employment and begin to formulate personal plans for academic and professional success.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 350 Child Psychopathology 3.0 Credits
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 360 Preventing Substance Abuse 3.0 Credits
This course provides a comprehensive overview of prevention theories and prevention programming applications as regards substance use disorders. Course topics include: theories and models basic to prevention, science-based prevention strategies and model programs, strategic planning and outcome evaluation.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 367 Advanced Counseling Intervention 3.0 Credits
This course introduces students to current best practices when counseling clients with behavioral health disorders. Students are provided with training in the advanced counseling skills of Motivational Interviewing and Solution-Focused Therapy as well as introduced to experimental approaches to counseling this population.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: BACS 220 [Min Grade: C]

BACS 368 Addictions Counseling with Special Populations 3.0 Credits
This course involves the student in examinations of challenges for addictions counselors in working with frequently underserved populations represented by adolescents and elderly persons. Effective approaches to assessing and treating both youthful and older adult individuals with addiction disorders are explored and defined.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 370 Problem Gambling Interventions 3.0 Credits
This course covers basic areas of treatment knowledge and counseling skills necessary to effectively diagnose and assess the pathological gambler and define the necessary components for effective counseling interventions with problem gamblers.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 375  Problem Gambling Interventions 3.0 Credits
This course covers basic areas of treatment knowledge and counseling skills necessary to effectively diagnose and assess the pathological gambler and define the necessary components for effective counseling interventions with problem gamblers.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 380 Trauma-Informed Care 3.0 Credits
This is an introduction to the psychophysiology of complex trauma in children and adolescents, and an overview of assessment and treatment modalities in both youth and adults. The course focuses on neurobiology and how trauma impairs brain development and the life domains of children, adolescents, and adults. It also covers various issues of assessment, diagnosis, and treatment. The stages of stabilization, reprocessing and reintegration, and the multiple models helpers utilize when working with survivors of trauma are explored. Course work will culminate with students reviewing and presenting case studies of assessment and treatment interventions for children and adolescents experiencing traumatic effects.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 390 Special Topics in Mental Health 3.0 Credits
This course covers topics of particular interest to students in health sciences. In different terms, a variety of topics will be presented to the students. May be repeated twice for credit.
College/Department: College of Nursing Health Professions
Repeat Status: Can be repeated 2 times for 6 credits

BACS 401 Assessment and Treatment Planning 3.0 Credits
The focus of this course is learning the systematic, multi-disciplinary approach for gathering, interpreting, applying and recording data regarding clients in addictions and other behavioral health treatment settings. The most current screening, assessment, treatment planning and documentation approaches are covered.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 404 Cognitive and Behavioral Counseling II 3.0 Credits
This course extends BACS 304 by deepening the exploration of cognitive-behavioral therapy theory and methods. More emphasis and developing skills in conceptualization and treatment. Some focus on how clients can manage anger better and how therapists can take care of themselves appropriately.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: BACS 304 [Min Grade: C]

BACS 405 Family-Focused Interventions 3.0 Credits
This course gives students the knowledge, skills and attitudes to: identify and overcome the barriers that prevent family members from being full partners in the mental health treatment of their family member; define family from a culturally competent perspective; and provide mental health intervention in full partnership with families.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 410 Child and Adolescent Support 3.0 Credits
This course is based on the principles of Child and Adolescent Service System Program (CASSP). The course gives students the knowledge, skills important to implementing a comprehensive care system for families and their children endorsed by the Commonwealth of Pennsylvania.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
BACS 411 Forensic Behavior Health Service 3.0 Credits
The intersection between law and behavioral health services in the focus of this course. Topics include: the criminal justice system, criminal thinking, community and ethical barriers, biopsychosocial models that are specific to the forensic client and the growing base of knowledge about community corrections.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 412 Group Counseling II 3.0 Credits
This is an advanced course in the facilitation of group processes, with an emphasis on group counseling. The course provide skills in group facilitation including application of theory, tracking process and initiating interventions, working with special populations, incident management, treatment planning processes, and recording progress.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 414 Co-Occurring Disorders 3.0 Credits
This course introduces an integrated treatment approach for working with individuals who have both mental illness and substance use disorders. Topics include: assessment and treatment planning, strategies for coordinating dual interventions.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 420 Psychiatric Rehabilitation Competencies 3.0 Credits
The purpose of this advanced course is to help students develop the competencies necessary to implement the principles and practices of Psychiatric Rehabilitation. This is accomplished by engaging the student in an in-depth analysis of the tools and processes used to bring about outcomes related to community integration and the life quality.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 430 Behavioral Health and Aging 3.0 Credits
Students will explore concepts, issues, and research pertaining to the psycho-social and behavioral health aspects of working with older adults. Students will learn about and practice interventions, competencies, and strategies designed to improve the quality of life of older adults.
College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

BACS 490 Senior Research Project 3.0 Credits
The students, with faculty supervision, plan and execute a term project that will integrate the academic and practical knowledge the students have acquired in their curriculum. The students develop objectives relevant to the project, critique the literature, present a plan for implementation, and complete the term project. May be repeated twice for credit.
College/Department: College of Nursing Health Professions
Repeat Status: Can be repeated 2 times for 6 credits

BACS 499 Readings in Behavioral Health 1.0-6.0 Credit
This course is designed to allow upper-class students to pursue specialized interest in specific topics in behavioral health science. May be repeated three times for credit.
College/Department: College of Nursing Health Professions
Repeat Status: Can be repeated 3 times for 9 credits

Biomedical Engineering & Sci Courses

BMES 124 Biomedical Engineering Freshman Seminar I 1.0 Credit
This course is intended to introduce freshman biomedical engineering students in the School of biomedical Engineering, Science and Health Systems at Drexel University to academic programs and opportunities, ongoing research projects and University resources to ensure a successful educational experience at Drexel and beyond. Through class discussions and guest lecture presentations, the students are provided with information and contacts necessary to begin a plan of academic study.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit

BMES 125 Foundations of Biomedical Engineering 2.0 Credits
This course is intended to introduce new transfer biomedical engineering students in the School of biomedical Engineering, Science and Health Systems at Drexel University academic programs and opportunities, ongoing research projects and University resources to ensure a successful educational experience at Drexel and beyond. Through class discussions and guest lecture presentations, the students are provided with information and contact necessary to begin a plan of academic study.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit

BMES 126 Biomedical Engineering Freshman Seminar II 1.0 Credit
This course is intended to introduce freshman biomedical engineering students to the career embodied by the School’s current concentration areas. Each area will be discussed in terms of the current state of the art, research possibilities and career opportunities. The curricula for each concentration will be discussed in detail so as to facilitate students’ knowledge of how each curriculum relates to the research and employment opportunities in that field.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit

BMES 130 Problem Solving in Biomedical Engineering 2.0 Credits
This course integrates fundamental principles of biology, chemistry, engineering, mathematics and physics into a framework for the study of biomedical engineering. In this course, students will use both engineering and scientific approaches to problem-solving. They will learn about the differences between engineering design and biological evolution. They will also learn to apply basic principles of chemistry, physics and mathematics to specific biological and physiological problems.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
BMES 201 Programming and Modeling for Biomedical Engineers I 3.0 Credits
This course aims to introduce students with some fundamental concepts about programming in MATLAB to give the ability to solve basic bioengineering problems. The course introduces the basics of programming using Matlab, including programming environment and tools. Fundamental programming techniques and concepts such as loops, switches and logical operators, functions and file handling are covered. Applications in bioengineering for basic numerical problem solving are discussed.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: MATH 200 [Min Grade: D] and PHYS 102 [Min Grade: D] and BIO 122 [Min Grade: D]

BMES 202 Programming and Modeling for Biomedical Engineers II 3.0 Credits
The course aims to introduce students to advanced programming concepts and tools to solve numerical problems in bioengineering. It provides the foundation for biosimulation and bio-computation classes. This course introduces advanced programming methods and computational tools for numerical analysis, model design and graphics. Higher level functionality in Matlab such as SIMULINK, symbolic processing and CAD related tools are discussed.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 201 [Min Grade: D]

BMES 212 The Body Synthetic 3.0 Credits
The Body Synthetic introduces concepts underlying biological and engineering principles involved in the design and construction of prosthetic devices used to replace various parts of the human body.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D]

BMES 235 Living Systems Engineering 4.0 Credits
This course introduces the biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on evolution, adaptation, energy, thermodynamics, fluid dynamics and control systems in living organisms.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] and CHEM 102 [Min Grade: D] and MATH 200 [Min Grade: D] and PHYS 102 [Min Grade: D] and BIO 201 [Min Grade: D]

BMES 301 Laboratory I: Experimental Biomechanics 2.0 Credits
This course deals with experimental aspects of biomechanics, specifically with the testing mechanical properties of biological tissues.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: MATH 200 [Min Grade: D] and PHYS 201 [Min Grade: D] and (MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D]) and MEM 202 [Min Grade: D]

BMES 302 Laboratory II: Biomeasurements 2.0 Credits
This course introduces students to the measurement of physiological/biological/functional signals. Four specific signals will be collected and analyzed. Students are expected to analyze type of signal to be collected, possible measurement techniques and potential data analysis and then collect and analyze each signal.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: ECE 201 [Min Grade: D] (Can be taken Concurrently) (BMES 222 [Min Grade: D] or BIO 201 [Min Grade: D]) and (TDEC 231 [Min Grade: D] or ENGR 103 [Min Grade: D])

BMES 303 Laboratory III: Biomedical Electronics 2.0 Credits
This course introduces students to the widespread application of electronics and electronic devices in biomedical engineering. The course reinforces concepts learned in ECE 201 with hands-on experimentation related to biomedical applications such as telemedicine and medical devices.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: ECE 201 [Min Grade: D] and (ENGR 232 [Min Grade: D]

BMES 304 Laboratory IV: Ultrasound Images 2.0 Credits
This course introduces students to the engineering principles of acoustical measurements by combining hands-on laboratory experiences with lectures. Students will learn the engineering/physical principles of measuring sound velocity in different materials, attenuation, and directivity of a circular transducer.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: Cannot enroll if classification is Freshman
Prerequisites: BIO 201 [Min Grade: D] or BMES 235 [Min Grade: D] and ECE 201 [Min Grade: D] and (TDEC 231 [Min Grade: D] or ENGR 103 [Min Grade: D])
BMES 305 Laboratory V: Musculoskeletal Anatomy for Biomedical Engineers 2.0 Credits
This course provides an opportunity for students to study the anatomy and biomechanics of select articulations of the human body. While the main emphasis will be on the musculoskeletal structures associated with each articulation, major neural and vascular structures will be studied as well.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: (BIO 201 [Min Grade: D] or BMES 235 [Min Grade: D]) and MEM 202 [Min Grade: D]

BMES 310 Biomedical Statistics 4.0 Credits
This course is designed to introduce biomedical engineering students to the fundamentals of biostatistics necessary for medical research. Topics covered include measurements, sampling, basic hypothesis testing, analysis of variance and regression. Medical applications are emphasized.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 231 [Min Grade: D] or MATH 261 [Min Grade: D]

BMES 315 Experimental Design in Biomedical Research 4.0 Credits
This course is designed to introduce students to the fundamental principles of experimental design and statistical analysis as applied to biomedical research with animals and humans. Topics to be covered include experimental design, clinical design, and protocol submission and review.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 310 [Min Grade: D]

BMES 325 Principles of Biomedical Engineering I 3.0 Credits
This course is the first part of a two-term sequence which introduces biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on bioethical questions, biomechanics, human performance engineering, biomaterials and tissue engineering.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: MEM 202 [Min Grade: D] (Can be taken Concurrently) BIO 122 [Min Grade: D] and CHEM 102 [Min Grade: D] and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

BMES 326 Principles of Biomedical Engineering II 3.0 Credits
This course is the second part of a two-term sequence which introduces biomedical engineering students to engineering principles applied to biological and physiological systems. This course focuses on bioinformatics, neuroengineering, bio signal processing, biosensors, and medical imaging.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: ECE 201 [Min Grade: D] (Can be taken Concurrently) BMES 325 [Min Grade: D]

BMES 330 Biological Rhythm in Pharmacology and Toxicology 3.0 Credits
This course covers the fundamentals of biological rhythms with particular emphasis on the influence these cycles have on the susceptibility of organism to physical, chemical, and/or toxic agents.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]

BMES 331 Computers in Health Systems I 3.0 Credits
Introduces the allied health professional to basic computer applications on personal computers. Includes word processing, spreadsheets, databases, and networking (e.g., e-mail and information search and retrieval) in a primarily Windows environment. Designed for individuals with little or no computer background. Students are encouraged to bring in their own work-related problems or projects to provide immediate application of knowledge learned to the student's professional healthcare environment.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

BMES 332 Computers in Health Systems II 3.0 Credits
Continues the general overview of computers for people in the allied health professions, using specific examples from health care. Offers further study of and practice with special scientific (e.g., statistics, graphing) and medical clinical decision-support software. Introduces algorithms and formal programming methods.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

BMES 333 Biomedical Informatics I 3.0 Credits
Introduces information and information handling systems for people in the allied health professions, with specific examples drawn from health care. Covers locating, manipulating, and displaying information in the health system setting.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

BMES 335 Biomedical Informatics II: Hospital and Patient Information 3.0 Credits
Continues BMES 335. Emphasizes medical records and hospital patient information handling. Examines the problems of patient information flow within the health care system. Introduces conventional and proposed patient and hospital information systems.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

BMES 336 Biomedical Informatics II: Hospital and Patient Information 3.0 Credits
Continues BMES 335. Emphasizes medical records and hospital patient information handling. Examines the problems of patient information flow within the health care system. Introduces conventional and proposed patient and hospital information systems.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 335 [Min Grade: D]
**BMES 338 Biomedical Ethics and Law 3.0 Credits**
Introduces the wide spectrum of ethical, regulatory, and legal issues facing health care practitioners and health-related research workers. Helps students become aware of the ethical and legal issues involved in their work. Helps students understand how legal and ethical decisions should be made in health-related matters, as well as what sources of help and guidance are available.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman

**BMES 340 Health Care Administration 3.0 Credits**
This course provides students with an analysis of health care administration process, including: planning, organizing, designing, decision-making, leading, and controlling. Presents methods and techniques that can contribute to the effective performance of administrative duties.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman

**BMES 345 Mechanics of Biological Systems 3.0 Credits**
This course introduces the fundamentals of mechanics of deformable bodies as they relevant to biological tissues and biomaterials. Major topics include stress and strain, mechanical properties of biological tissues and biomaterials, axial loading, torsion, bending, and viscoelasticity. These concepts will be applied to biological examples such as long bones, the heart, blood vessels, and orthopaedic implants.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** MEM 202 [Min Grade: D] and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D])

**BMES 350 Med & Bio Effects Of Light 3.0 Credits**
Examines the role of environmental lighting in human physiological and psychological processes. Topics include vitamin D synthesis and calcium regulation; light effects on bilirubin in newborns; photoactivation and DNA in skin; effects of nonionizing radiation on the immune systems; environmental lighting and human vision; light effects on biological rhythms and sleep; photosensitivity diseases related to interior lighting; the therapeutic uses of light; and light and the aging eye.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]

**BMES 363 Robotics in Medicine I 3.0 Credits**
This course provides an introduction to the use of haptics (the use of somatoaesthnesy) in the design of robotic devices in surgery. Topics covered include actuators, sensors, nonportable feedback, portable force feedback, tactile feedback interfaces, haptic sensing and control systems.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** MEM 238 [Min Grade: D]

**BMES 365 Robotics in Medicine II 3.0 Credits**
This course covers the use of robots in surgery and included aspects of safety, robot kinematics, analysis of surgical performance using robotic devices, inverse kinematics, velocity analysis and acceleration analysis. Various types of surgeries in which robotic devices are or could be used are presented on a case study basis.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BMES 363 [Min Grade: D]

**BMES 372 Biosimulation 3.0 Credits**
This course provides the foundation for the mathematical analysis of biomedical engineering systems. It focuses on the essential mathematical methods necessary for further development of modeling and simulation skills in other courses (materials, mechanics, fluids/transport, signals/ control system, etc). The course applies calculus, differential equations and linear algebra to developing analytical techniques for biomedical applications.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]) and BMES 202 [Min Grade: D]

**BMES 375 Computational Bioengineering 4.0 Credits**
This course introduces undergraduate students to the mathematical and computational analysis of biological systems. The systems analyzed include the genome, protein and gene networks, cell division cycles, and cellular level disease. Mathematical tools include matrix algebra, differential equations, cellular automata, cluster analysis, etc.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if classification is Junior or Senior.  
**Prerequisites:** (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and BMES 325 [Min Grade: D] and BMES 372 [Min Grade: D] and (MATH 262 [Min Grade: D] or ENGR 232 [Min Grade: D])

**BMES 381 Junior Design Seminar I 2.0 Credits**
This is the first course in a two-course sequence intended to present the basics of engineering design, project management, product development and translational research. This first course focuses on engineering design and product development. A case-study approach is used to illustrate best practices and common mistakes in engineering design.
**College/Department:** School of Biomedical Engineering, Science Health Systems  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
BMES 382 Junior Design Seminar II 2.0 Credits
This is the second course in a two-course sequence intended to present the basics of engineering design, project management, product development and translational research. This second course focuses on project management and quality control. A case-study approach is used to illustrate best practices and common mistakes in management and evaluation of engineering projects.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: BMES 381 [Min Grade: D]

BMES 391 Biomedical Instrumentation I 3.0 Credits
This course introduces the student to the medical instrumentation and provides background on the physical, chemical, electronic and computational fundamentals by which medical instrumentation operates. It is an analytical course exploring the design, operation, safety aspects and calibration of primary electronic instruments.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECE 201 [Min Grade: D] and ENGR 210 [Min Grade: D] and (MATH 262 [Min Grade: D] or ENGR 232 [Min Grade: D]) and (BMES 235 [Min Grade: D] or BIO 203 [Min Grade: D])

BMES 392 Biomedical Instrumentation II 3.0 Credits
Continues BMES 391. Explores the operation, safety aspects, and calibration of primarily optical and acoustical instruments, as well as those involving ionizing radiation. Also examines instrumentation primarily intended for particular departments and areas, such as anesthesia and infusion.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: BMES 391 [Min Grade: D]

BMES 401 Biosensors I 4.0 Credits
Introduces the general topic of microsensors, discusses basic sensing mechanisms for microsensors, and presents various types of conductometric, acoustic, silicon, and optical microsensors. Uses two case studies that include an acoustic immunosensor and silicon glucose sensor to provide students with in-depth knowledge and hands-on experience. Provides additional experience through three laboratory sessions that support the lectures and familiarize students with practical aspects of microsensors. Also discusses applications of microsensors in the medical, chemical, pharmaceutical, environmental, aeronautical, and automotive industries.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BMES 326 [Min Grade: D] and ENGR 210 [Min Grade: D] and ECE 201 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

BMES 402 Biosensors II 4.0 Credits
Investigates modern biosensor design methods and addresses the challenges associated with fabrication technologies and instrumentation techniques. Topics include theory and modeling of biosensors, biosensor fabrication steps, and electronic and clinical testing methods. Discusses local and distant sensor data acquisition techniques. Students will design, fabricate and test a biosensor. Essential stages of biosensor manufacturing processes will be outlined. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BMES 401 [Min Grade: D] (Can be taken Concurrently)

BMES 403 Biosensors III 4.0 Credits
Covers recent advances in biosensor technology and applications, business aspects, and technology transfer issues. Topics include new sensing mechanisms, new technologies, new biomedical applications, the starting of small sensor companies, and the introduction of new sensor technologies into industrial settings. Requires students to develop a technical proposal in the area of biosensors and to review proposals written by their peers. Presentations by regular faculty and industrial and government researchers form an integral part of the course.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BMES 402 [Min Grade: D]

BMES 405 Physiological Control Systems 3.0 Credits
Introduces the basic concepts of feedback and feed forward controls systems, including characterizations in terms of prescribed constraints, study of input and output relationships for various types of physiological systems, and stability and time-delay problems. Covers mathematical models of physiological systems, with emphasis on non-linear and adaptive systems study.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BIO 201 [Min Grade: D] and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and ECES 356 [Min Grade: D] and BMES 372 [Min Grade: D]

BMES 409 Entrepreneurship for BMES 3.0 Credits
This course serves as the foundation course in entrepreneurship and is designed to provide students with a complete working knowledge of the modern entrepreneurial and business planning process.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
BMES 411 Chronoengineering I: Biological Rhythms in Health and Performance 3.0 Credits
Introduces students to the concepts of biological, and especially circadian, rhythmicity. Advances students' knowledge of biological time-keeping and adaptive functions of biological clocks. Topics include biochemical and physiological models of biological clocks, adjustment to environmental cycles, rhythms in behavior and physiological functions, sleep-wake cyclicity, adaptability of circadian systems, and influences of rhythms on human physiology and behavior. Designed to give students a thorough understanding of the role rhythms play in animal and human behavior, physiology, and medicine.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (BMES 222 [Min Grade: D] or BMES 326 [Min Grade: D])

BMES 412 Chronoengineering II: Sleep Functions in Health and Performance 3.0 Credits
Continues BMES 411. Enhances students' education in the concepts of biological, and especially circadian, rhythmicity. Focuses on sleep patterns, rhythms, evolution, neurology, psychology, and overall function.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: BMES 411 [Min Grade: D]

BMES 421 Biomedical Imaging Systems I: Images 4.0 Credits
Provides an overview of the field of medical imaging. Covers aspects of light imaging; systems theory, convolutions, and transforms; photometry, lenses, and depth of field; image perception and roc theory; three-dimensional imaging; image acquisition and display; and image processing operations, including scanning and segmentation.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: (ECES 302 [Min Grade: D] or ECES 303 [Min Grade: D]) and BMES 326 [Min Grade: D] and PHYS 201 [Min Grade: D] and (MATH 311 [Min Grade: D] or BMES 310 [Min Grade: D])

BMES 422 Biomedical Imaging Systems II: Ultrasonat 4.0 Credits
Intended for students who would like to gain an adequate understanding of diagnostic ultrasound imaging principles and become familiar with developments in this rapidly expanding field. Introduces medical visualization techniques based on ultrasound propagation in biological tissues. Topics include generation and reception of ultrasound, imaging techniques (A-mode, B-mode, M-mode, and Doppler), typical and emerging diagnostic applications, elements of ultrasound exposimetry, and safety aspects from the clinical point of view.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 421 [Min Grade: D]

BMES 423 Biomedical Imaging Systems III 4.0 Credits
Covers volumetric and functional imaging systems. Discusses the principles and algorithms of projection tomography, XCAT, SPECT, PET; the principles of MRI: Bloch equation, slice selection, K-space scanning, volumetric MRI; biochemical imaging; chemical equilibrium equations and Scatterth plots, specific and nonspecific labeling; autoradiography; and flow and dynamical systems: Doppler, mass transport, and phase (MRI) measurement of flow.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 422 [Min Grade: D]

BMES 430 Neural Aspects of Posture and Locomotion 3.0 Credits
Students will study the physiology of sensory/motor systems, with emphasis on modeling of neural systems and biomechanical aspects of functional tasks. Combines information on basic nerve cell activities, synaptic communication and structure/function relationships of skeletal muscle with basic mechanics to study spinal, vestibular and ocular reflexes. Culminates with the study of the control of motor systems with respect to bipedal motion.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BIO 201 [Min Grade: D] and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (BMES 201 [Min Grade: D] and BMES 202 [Min Grade: D]) or (ENGR 201 [Min Grade: D] and ENGR 202 [Min Grade: D]) and MEM 202 [Min Grade: D]

BMES 432 Biomedical Systems and Signals 3.0 Credits
Introduces various aspects of biomedical signals, systems, and signal processing. Covers topics in the origin and acquisition of biomedical signals: discrete-time signals and linear systems; frequency analysis of discrete-time signals, spectral estimation, data records and digital filters; and compression of biomedical signals through time-domain and frequency-domain coding.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: ECES 302 [Min Grade: D] and ECES 304 [Min Grade: D]

BMES 440 Introduction to Biodynamics 3.0 Credits
The objective of the course is to prepare students for biomechanical modeling, modeling methods, formulation of equations of motion and methods of determination of strength will be applied to human body dynamics. Particular emphasis is placed on the use of Rigid Body and Multi-Body Dynamics.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: MEM 202 [Min Grade: D] and (MEM 230 [Min Grade: D] or BMES 345 [Min Grade: D]) and MEM 238 [Min Grade: D] and (BMES 235 [Min Grade: D] or BIO 203 [Min Grade: D])
BMES 441 Biomechanics I: Introduction to Biomechanics 4.0 Credits
Teaches students to use mechanical tools to get an introductory appreciation for solving biomechanical problems. Models human performance by using static, quasi-static, and dynamic approaches. Assesses overall loading of the musculoskeletal system during functional activities. Demonstrates introductory methods of estimation of forces in the joints and muscles and evaluates the endurance of the human tissues under traumatic loading conditions. Builds on existing knowledge in mechanics to illustrate the practical application of mechanical tools in the determination of human systems performance.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 440

BMES 442 Biomechanics II: Musculoskeletal Modeling and Human Performance 4.0 Credits
Teaches students to think biomechanically. Reviews and categorizes the various functional components (tissues) of the musculoskeletal system. Considers constraints of the joints and action of the soft and hard tissues, along with corresponding models. Computes joint and muscle forces. Discusses some aspect of postural stability of the whole musculoskeletal structure and reviews various methods of task performance.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 441 [Min Grade: D]

BMES 443 Biomechanics III: Mechanics of Biological Tissues, Implant Technology and Prosthetics 4.0 Credits
Provides more advanced knowledge of mechanics of materials and offers a general description of mechanical behavior of the variety of the soft and hard tissues of the human body. Considers some prosthetic replacements of tissues as well as entire bone, joint, soft tissue, and system prosthetics. Reviews some specific orthopedic appliances and covers limb prosthetics if time permits. Students plan design projects.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 442 [Min Grade: D]

BMES 444 Biofluid Mechanics 3.0 Credits
This course introduces flow-related anatomy and pathophysiology, and biomedical flow devices and their design challenges. Analysis methods to solve biological fluid mechanics design problems will be introduced and several interdisciplinary team projects will be assigned to apply fluid mechanics to practical biological or medical problems.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 451 [Min Grade: D]

BMES 451 Transport Phenomena in Living Systems 4.0 Credits
Introduces students to applications of chemical engineering concepts in biological systems. Shows that chemical engineering approaches to problem solving are ideally suited to investigation of biology. Approaches include material and energy balances, transport phenomena, and kinetics.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: PHYS 201 [Min Grade: D] and BMES 326 [Min Grade: D] and (BIO 203 [Min Grade: D] or BMES 236 [Min Grade: D]) and CHEM 210 [Min Grade: D] and (ENG 232 [Min Grade: D] or MATH 262 [Min Grade: D])

BMES 452 Transport Phenomena in Living Systems II 3.0 Credits
Continues BMES 451. Advances students' understanding of the engineering principles of membrane transport and its consequences at the subcellular (mitochondria), cellular (neuron), and organ (kidney) level. Introduces concepts associated with pharmacokinetics. Provides students with a kinetic approach to analysis of receptors, including the kinetics of ligand-receptor binding, rate constants, and signal transduction.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: BMES 451 [Min Grade: D]

BMES 460 Biomaterials I 4.0 Credits
First course in a three-quarter sequence designed to acquaint students with the behavior of materials used in biomedical application under load (i.e., mechanical properties), their modes of failure and as a function of their environment. This course provides students with the fundamentals needed to proceed with Biomaterials II.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: (MEM 202 [Min Grade: D] or MEM 230 [Min Grade: D]) and CHEM 242 [Min Grade: D]

BMES 461 Biomaterials II 4.0 Credits
Second course in a three-quarter sequence in biomaterials. The goal of this course is with an understanding of, and ability to select, appropriate materials for specific applications taking into account mechanical, thermal, and rheological properties taught in Biomaterials I and combining them with the biocompatibility issues covered in the present course.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 460 [Min Grade: D]
BMES 466 Robotics in Medicine III 3.0 Credits
This course covers topics in the design of medical robotic systems, including force and movement analysis for robotic arms, dynamics, computer vision and vision-based control. Thus use of haptics, vision systems and robot dynamics are examined in a cohesive framework.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Prerequisites: BMES 365 [Min Grade: D]

BMES 471 Cellular and Molecular Foundations of Tissue Engineering 4.0 Credits
Course is designed to familiarize students with the advanced concepts of cellular and molecular biology and physiology relevant to tissue engineering. The initial part of a two-quarter sequence combining material from cellular/molecular biology, evolutionary/developmental biology with engineering design and biomaterials to educate students in the principles, methods, and technology of tissue engineering.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BIO 218 [Min Grade: D] and BIO 122 [Min Grade: D] and BIO 219 [Min Grade: D] and CHEM 242 [Min Grade: D] and (MEM 230 [Min Grade: D] or BMES 345 [Min Grade: D])

BMES 472 Developmental and Evolutionary Foundations of Tissue Engineering 4.0 Credits
Familiarizes students with advanced concepts of developmental and evolutionary biology relevant to tissue engineering. This second part of the two-quarter sequence combines material from cellular/molecular biology and evolutionary design and biomaterials to educate students in the principles, methods, and technology of tissue engineering.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 471 [Min Grade: D]

BMES 475 Biomaterials and Tissue Engineering III 4.0 Credits
This course provides students with in-depth knowledge of factor-mediated tissue engineering and regenerative medicine. Students learn about fundamental repair and regenerative processes and gain an understanding of specific biomaterials being used to mimic and/or enhance such processes. Students also learn about the delivery methods of agents which promote the proper functional development of specialized tissues.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 460 [Min Grade: D] and BMES 461 [Min Grade: D] and BMES 471 [Min Grade: D] and BMES 472 [Min Grade: D]

BMES 477 Neuroengineering I: Neural Signals 3.0 Credits
Introduces the theory of neural signaling. Students will learn the fundamental theory of cellular potentials and chemical signaling, the Hodgkin Huxley description of action potential generation, circuit representations of neurons and be able to derive and integrate equations describing the circuit as well as design computer models.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECES 302 [Min Grade: D] and ECES 304 [Min Grade: D] and ECES 356 [Min Grade: D] and BIO 203 [Min Grade: D] and BMES 405 [Min Grade: D] and BMES 430 [Min Grade: D]

BMES 478 Neuroengineering II: Principles of Neuroengineering 3.0 Credits
This course investigates cutting edge technologies in neuroengineering in a seminar-style format with faculty from the School of Biomedical Engineering and College of Medicine. Three modules cover topics, which vary from year to year. Students are expected to submit written and oral presentations covering each topic.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 477 [Min Grade: D]

BMES 483 Quantitative Systems Biology 4.0 Credits
This course uses a data-driven systems engineering approach to provide a foundation in systems biology. Topics covered include the organization of robust networks of genes and proteins; intercellular communication; and cells as basic units of life.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: (TDEC 222 [Min Grade: D] or ENGR 232 [Min Grade: D]) and (BIO 203 [Min Grade: D] or BMES 235 [Min Grade: D]) and (BMES 202 [Min Grade: D] or ENGR 202 [Min Grade: D]) and BMES 372 [Min Grade: D] and BMES 375 [Min Grade: D] and CS 172 [Min Grade: D]

BMES 484 Genome Information Engineering 4.0 Credits
This course is designed to provide students with hands-on experience in the application of genomic, proteomic, and other large-scale information to biomedical engineering. The underlying goal is to develop an understanding of high-throughput technologies, biological challenges, and key mathematical and computational methods relevant to biomedical engineering.

College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: BMES 375 [Min Grade: D] and BIO 218 [Min Grade: D]
BMES 488 Medical Device Development 3.0 Credits
Medical device product development must take into account a diverse set of disciplines to achieve a safe and successful product. This course exposes the student to several of these disciplines with the objective of raising the student’s awareness of safety throughout the product development life cycle. Students will learn to appreciate the complex engineering decisions that support development of a safe medical device through an examination of risk management, regulatory processes, human factors and clinical studies.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

BMES 491 [WI] Senior Design Project I 3.0 Credits
This is the first course in a three-quarter capstone design experience for senior biomedical engineering students.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

BMES 492 Senior Design Project II 2.0 Credits
Continues senior design activities begun in BMES 491.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

BMES 493 Senior Design Project III 3.0 Credits
Continues the design project begun in BMES 491 and continued through BMES 492.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

BMES 494 Clinical Practicum I 3.0 Credits
This course provides biomedical engineering students with an extensive exposure to live clinical cardiology procedures, including cardiac catheterization, electrophysiology, echocardiography and nuclear stress testing. Emphasis is placed on identifying important interfaces between engineering and clinical medicine, particularly in areas where clinical needs may be addressed by advances in biomedical engineering.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BME.

BMES 495 Clinical Practicum II 3.0 Credits
This course provides biomedical engineering students with an extensive exposure to live operations in an emergency department and intensive care unit. The students are expected to analyze specific operations within these environments and develop a solution to a process problem within one of these environments. System analysis, design and evaluation are emphasized.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BME.

BMES 496 Clinical Practicum III 3.0 Credits
This course provides biomedical engineering students with an opportunity to observe basic operative and postoperative procedures with the idea of both learning about such procedures and identifying the role of biomedical engineering in these clinical settings.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BME.

BMES I199 Independent Study in BMES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Can be repeated multiple times for credit

BMES I299 Independent Study in BMES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Can be repeated multiple times for credit

BMES I399 Independent Study in BMES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Can be repeated multiple times for credit

BMES I499 Independent Study in BMES 0.5-6.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: School of Biomedical Engineering, Science Health Systems
Repeat Status: Can be repeated multiple times for credit

BMES T180 Special Topics in BMES 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: School of Biomedical Engineering, Science Health Systems

Biomedical Engineering Tech

Courses

BET 301 Healthcare Technology 3.0 Credits
An overview of medical equipment used in hospitals and other medical environments to diagnose and treat patients. Sensors and physiological signals will be explained. Equipment found in various hospital departments and medical specialties will also be discussed. Patient safety and regulations will be emphasized.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

BET 302 Biomedical Electronics 4.0 Credits
This course is an introduction to the fundamentals of analog electronics with an emphasis on biomedical applications. Students will be introduced to solid state devices including diodes, transistors, operational amplifiers, oscillators, and mixers and their use in power supplies, amplifiers and active filters.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

BET 303 Medical Imaging Systems 3.0 Credits
The fundamentals of medical imaging equipment will be explored. The principles of x-ray, computed tomography, ultrasonic, and magnetic resonance imaging systems will be discussed. Focus will be on principles of operation, applications, safety, and quality.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: BET 301 [Min Grade: D]

BET 305 Clinical Laboratory Equipment 3.0 Credits
Clinical laboratory instrumentation and automation is described with emphasis on the demands of clinicians for diagnostic information. Special attention is given to reliability, ease of training, and cost effectiveness.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D] and EET 202 [Min Grade: D] and BET 301 [Min Grade: D]

BET 307 Applied Biomedical Instrumentation 3.0 Credits
The course introduces students to the engineering design process and provides design experience through hands-on design and implementation of biomedical instruments. Using a generalized step-by-step approach that consists of (1) understanding the physiological sources, (2) selecting appropriate transducers, (3) designing analog processing electronics, and (4) implementing digital signal processing, student will gain extensible knowledge and skills to design and implement various biomedical instruments.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D] and EET 202 [Min Grade: D] and BET 301 [Min Grade: D] and BMES 391 [Min Grade: D]

BET I199 Independent Study in BET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET I299 Independent Study in BET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET I399 Independent Study in BET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET I499 Independent Study in BET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET T180 Special Topics in BET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET T280 Special Topics in BET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET T380 Special Topics in BET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

BET T480 Special Topics in BET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Bioscience & Biotechnology

Courses

**BIO 100 Applied Cells, Genetics & Physiology 3.0 Credits**
This course is designed to provide a topical and interactive introduction to biology for non-majors. Students will learn how trillions of tiny cells of our bodies work together in organ systems to use food for energy, to keep us alive, moving and healthy, and how information passes to subsequent generations. This course is identical to BIO 107.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisite:** EXAM 080

**BIO 101 Applied Biological Diversity, Ecology & Evolution 3.0 Credits**
An interactive course for the non-major that discusses the variety of living things and how we ended up with them and what makes them unique. This course also explores how living things affect each other and the world as well as the impacts that humans have on the living world. This course is identical to BIO 109.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisite:** EXAM 080

**BIO 107 Cells, Genetics & Physiology 3.0 Credits**
This course is designed to provide a topical and interactive introduction to biology for non-majors. Students will learn how trillions of tiny cells of our bodies work together in organ systems to use food for energy, to keep us alive, moving and healthy, and how information passes to subsequent generations. This course is identical to BIO 100.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisites:** BIO 108, EXAM 080

**BIO 108 Cells, Genetics and Physiology Laboratory 1.0 Credit**
This course is designed to be a companion course to the BIO 107 lecture. Labs are focused on providing students with a hands-on approach to science. Topics include how cells generate energy from food, how certain characteristics are genetically encoded and the physiology of human systems and diseases.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisite:** BIO 107

**BIO 109 Biological Diversity, Ecology & Evolution 3.0 Credits**
An interactive course for the non-major that discusses the variety of living things and how we ended up with them and what makes them unique. This course also explores how living things affect each other and the world as well as the impacts that humans have on the living world. This course is identical to BIO 101.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisites:** BIO 110, EXAM 080

**BIO 110 Biological Diversity, Ecology and Evolution Laboratory 1.0 Credit**
A companion course to BIO 109 that provides a hands on exploration of the diversity of life including microbes, plants and animals as well as the processes that give rise to this diversity. The labs also provide practical exploration of the impacts of human beings on the planet.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO
**Corequisite:** BIO 109

**BIO 112 Biotechnology for Society 3.0 Credits**
In Biotechnology for Society, students will become familiar with the fundamentals of genomic and cellular-based biotechnologies to begin to understand the roles that biotechnology is currently playing and is poised to play in society. Students will appreciate the complexity of those roles by investigating both the intended consequences and the potential and inadvertent ethical, legal and social implications of these technologies. This course is intended for non-science majors.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO or major is BME or major is CHEM or major is ENVS or major is HSCI

**BIO 116 How Your Body Works-Or Not 3.0 Credits**
How Your Body Works-or Not is geared for non-major students hoping to explore the workings of their bodies. Students will explore why we evolved to have various organ systems, and how some systems accomplish their roles. We will explore how these systems can malfunction or fail, resulting in disease.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO or major is BME or major is CHEM or major is ENVS or major is HSCI

**BIO 118 Basics of Cancer 3.0 Credits**
This course provides an opportunity for students with little or no biology background to learn about cancer. Students can expect to learn what cancer is from a biological perspective, and how it is caused and treated. Students will also gain a basic understanding of how tumors form, and metastasize.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if major is BIO or major is BME

**BIO 122 Cells and Genetics 4.5 Credits**
An introduction to the concepts of cell and function, cell reproduction, cell communication, genetic inheritance, and population genetics. The relevance of genetics to society and ethical issues are included.

**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Corequisite:** EXAM 080
**BIO 124 Evolution & Organismal Diversity 4.5 Credits**

Students will learn about the theory of evolution and the mechanisms of how organisms change. Using this knowledge, students will explore the diversity of organisms on Earth that is a hallmark of biology and the result of evolution by examining the representative members from the five major kingdoms of life. This course has a lecture, lab and recitation component.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Corequisite:** EXAM 080

**BIO 126 Physiology and Ecology 4.5 Credits**

The first half of the course will survey physiological systems, including the respiratory, circulatory, homeostatic, excretory, and digestive systems in animals. The second half of the course will emphasize the relationships between organisms and the environment, including how humans impact ecosystems and the biosphere. This course has a lecture, lab and recitation component.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit

**BIO 141 Essential Biology 4.5 Credits**

Introduces essential biological concepts to engineering students. Content covers five core topics: cells, genetics, evolution, ecology and physiology with application to societal concerns about biotechnology, health, conservation biodiversity and bioethics. Evolution will be woven throughout the course as a unifying theme in understanding all aspects of biology.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 161 [Min Grade: D]  
**Corequisite:** EXAM 080

**BIO 161 General Biology I 3.0 Credits**

Covers structure and function of the cell and the organ-system plan of organization of the human body.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if major is CS  
**Prerequisites:** CHEM 102 [Min Grade: D]  
**Corequisite:** EXAM 080

**BIO 162 General Biology II 3.0 Credits**

Continues BIO 161. Covers the mechanics of heredity, including growth, differentiation, and development. Winter.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman

**BIO 163 General Biology III 3.0 Credits**

Continues BIO 162. Covers the plant and animal kingdoms, radiobiology, evolution, and ecology. Spring.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 162 [Min Grade: D]

**BIO 164 General Biology Laboratory I 1.0 Credit**

In this course students will perform computer simulations of laboratory exercises related to photosynthesis, enzyme activity and kinetics, the cardiovascular, muscle and bone systems, regulation of human organ systems as well as plant growth and development.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Corequisite:** BIO 161

**BIO 165 General Biology Laboratory II 1.0 Credit**

In this course students will perform computer simulations of laboratory exercises related to cell division, mendelian genetics, DNA replication, translation and mutations. They will work with simulated microscopes to observe viral and microbial specimens. Additionally, students will learn and simulate biotechnology techniques such as DNA fingerprinting.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 161 [Min Grade: D]  
**Corequisite:** BIO 162

**BIO 166 General Biology Laboratory III 1.0 Credit**

Involves experiments demonstrating the key principles in ecology and evolution including: population parameters, food webs, species interactions, succession, eutrophication, natural selection, sexual selection and evolutionary trees.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 162 [Min Grade: D]  
**Corequisite:** BIO 163

**BIO 200 Connections in Biology 3.0 Credits**

Connections in Biology is an open enrollment course which will give students the opportunity to make exactly that: connections. Building upon a new theme in biology each week, students will connect that material to their current Philadelphia community as well as to their future professional and personal pursuits. The course is designed on the Community Based Learning platform (CBL) and is scheduled to meet twice a week: one meeting will be a formal lecture on campus and one meeting will be at a partnered middle school with the instructor and Drexel students leading an 9 week after school science club. Students will gain volunteer hours, get an introduction to civic engagement, benefit from community based learning practices and connect their Drexel course material to the bigger picture in their lives.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Can be repeated multiple times for credit

**BIO 201 Human Physiology I 4.0 Credits**

Intensive survey of the basic physiological mechanisms of cellular and human electrophysiology and the physiology of the muscular, cardiovascular, respiratory, renal, and gastrointestinal systems.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 141 [Min Grade: D] or BIO 122 [Min Grade: D]
BIO 202 Human Physiology Laboratory 2.0 Credits  
Laboratory course in human physiology. Designed to accompany BIO 201 and 203 Human Physiology I and II. Uses simulation, experimenters and data acquisition techniques to provide practical experience in the design and execution of physiological experiments and analysis of physiological data. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 201 [Min Grade: D] (Can be taken Concurrently)

BIO 203 Human Physiology II 4.0 Credits  
Intensive survey of the control mechanisms of cellular and human physiology including introductions to control theory, neurophysiology, endocrine control, and control mechanisms in locomotion, cardiovascular, respiratory, renal, acid/base, gastrointestinal, and reproductive physiology. 
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 201 [Min Grade: D]

BIO 207 Applications in Biology I 1.0 Credit  
The aim of this course is to allow students to apply knowledge from biology courses to understand important articles from the frontiers of biology research, in order to develop critical thinking and problem solving skills. Students will learn to read primary research, to think critically about research and interpret data. 
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 122 [Min Grade: D]

BIO 208 Applications in Biology II 1.0 Credit  
In this course, students will further develop and practice skills introduced in the Applications in Biology I course by reading and interpreting research from primary articles. This will include historical experiments and controversial research. This will help students develop critical thinking, scientific reasoning and problem solving skills.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 207 [Min Grade: D]

BIO 209 Cell, Molecular & Developmental Biology I 4.0 Credits  
In this course, students will cover essential topics in cell, molecular, and developmental biology. Topics, such as protein structure function relationships, enzymes, structural & functional properties of nucleic acids, transcription & translation, regulation of gene expression, eukaryotic cell structure, cell membranes and membrane transport. Commonly used techniques in biochemistry, molecular & cellular biology will be discussed. 
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 122 [Min Grade: D]

BIO 211 Cell, Molecular & Developmental Biology II 4.0 Credits  
In this course, students will learn about molecular, cellular and developmental biology at a higher level than in introductory coursework. This second course in the sequence will focus on cell biological processes such as: vesicular trafficking, signaling, cytoskeletal dynamics, cell cycle, cell death, tissue organization, stem cells and development. At the end of this course, students should have a strong foundation in cell and developmental biology.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 209 [Min Grade: D]

BIO 212 Biotechnology 3.0 Credits  
Covers the use of recombinant DNA techniques in biotechnology. Explores the many uses of biotechnology in the biological, agricultural and medical field. Also covers the social, ethical and environmental issues involved in this discipline.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 122 [Min Grade: D]

BIO 213 Drosophila Neural Research 3.0 Credits  
In this course, you will be introduced to the basics of performing directed research in Drosophila genetics and neurobiology. This research will be informed by its relevance to disease. You will be working on one of a variety of diseases that is related to neurodevelopmental and/or neurodegenerative diseases. Diseases include (but are not limited to) CHARGE syndrome, Alzheimer’s disease, Pitt-Hopkins disease, and schizophrenia. In this course, you will be testing for potential genetic modifiers and/or drugs that modify disease phenotypes associated with an established models of these diseases.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: BIO 122 [Min Grade: D]

BIO 214 Principles of Cell Biology 3.0 Credits  
The course familiarizes students with the basic fundamentals and principles of cell biology. Topics include protein and enzymes as metabolic facilitators, the source and function of cellular energy, cell structure and function, cellular protein transport, cell communication, cell cycle control, apoptosis, and cell differentiation.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if major is BIO  
Prerequisites: BIO 104 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 215 [WI] Techniques in Cell Biology 3.0 Credits  
A course designed to introduce students to the lab techniques used by cell biologists. The lab is project-based focusing on various assays to assess cell viability/survival and fluorescence microscopy is used for cell structure and their organelles, apoptosis, cytoskeletal structure, muscle contraction and cell motility. Other topics include protein separation and quantification, and gel electrophoresis. Analytical thinking and data analysis are emphasized to help foster the development of a project built on multiple experiments. This is a writing intensive course.  
College/Department: College of Arts and Sciences  
Repeat Status: Not repeatable for credit  
Prerequisites: or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]
BIO 218 Principles of Molecular Biology 4.0 Credits
The course is designed to familiarize students with the details and concepts revolving around molecular biology’s “central dogma.” Specifically the chemical nature of DNA and RNA, the molecular structure of DNA and chromosomes, the definition of a gene, how DNA is replicated, and how genes are expresses and regulated.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 219 [WI] Techniques in Molecular Biology 3.0 Credits
Designed to familiarize student with laboratory techniques utilized in molecular biology, specifically DNA isolation, characterization, and manipulation. Students work in teams to collect and analyze data and explain results in laboratory reports. Weekly recitations preview and review theory and techniques used in the lab. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 220 Essential Microbiology 3.0 Credits
Covers morphological, physiological, and biochemical characteristics of bacteria, fungi, algae, and protozoa, and viruses. Introduces the principles of microbial genetics, disease, and control of microorganisms. This course is identical to BIO 221.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is BIO
Prerequisites: BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 221 Microbiology 3.0 Credits
Covers morphological, physiological, and biochemical characteristics of bacteria, fungi, algae, protozoa, and viruses. Introduces the principles of microbial genetics, disease, and control of microorganisms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]
Corequisite: BIO 222

BIO 222 Microbiology Laboratory 2.0 Credits
An introduction to microbiological techniques, and culture of prokaryotic and eukaryotic organisms. Includes sterile techniques, and use of specialized microscopic techniques. Classical and molecular techniques of microbial identification are also covered.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]
Corequisite: BIO 221

BIO 223 Parasitology 3.0 Credits
Parasitology explores the most predominant lifestyle on earth, parasitism. Students will learn how parasites invade and exploit their hosts, the resultant damage to the hosts, and the mechanisms by which hosts defend and protect themselves from these invaders.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 122 [Min Grade: D] or BIO 124 [Min Grade: D]

BIO 224 Form, Function & Evolution of Vertebrates 4.0 Credits
This course is an introduction to principles of organismal biology from the perspective of form, function and evolution of fish, amphibians, reptiles, mammals and birds. Many biological principles are well known in this group of animals. Data from areas as diverse as paleontology, ecology and molecular biology will be presented.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 121 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 124 [Min Grade: D] or BIO 126 [Min Grade: D]

BIO 225 Vertebrate Biology and Evolution Laboratory 2.0 Credits
A hands-on laboratory course that complements BIO 224: Form, Function & Evolution of Vertebrates. Students use the comparative approach to learn about the anatomy, physiology and evolution of vertebrates. Laboratory work will be on campus and in the field trips to observe vertebrates in nature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 224 [Min Grade: D] (Can be taken Concurrently)

BIO 226 Microbiology for Health Professionals 5.0 Credits
An introduction to microbiology for students in the health professions. Covers the diversity of microorganisms, their growth and how to control them. An introduction to the principles of disease and pathogenicity, host interaction and immunological response. Laboratories focus on the basic techniques to culture and student microorganisms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

BIO 227 Exploring Parasites 2.0 Credits
Exploring Parasites Laboratory will safely introduce students to hands-on experiences with a vast diversity of human parasites to understand their evolutionary adaptations. Students will learn to culture Giardia lamblia, an enteric parasite, and design a term-long research project to study an aspect of Giardia biology of student interest.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 223 [Min Grade: C] (Can be taken Concurrently)
BIO 228 Evolutionary Biology & Human Health 3.0 Credits
This course illustrates the importance and utility of evolutionary perspectives on various topics related to human health. In addition to the "how" questions, this course also introduces the "why" questions. Various evolutionary hypotheses are examined. Arguments for and counter-arguments against each hypothesis are presented to foster understanding of each topic. Selected topics include infectious diseases, pathogen virulence, allergies/asthma, mental health/addiction, genetic disorders, diseases of civilization, sex, pregnancy, aging, and public health concerns.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D] and BIO 124 [Min Grade: D]

BIO 229 Dictyostelium Research 3.0 Credits
We will be developing and progressing molecular and cellular projects to study cellular function in Dictyostelium discoideum as a model to investigate human cellular dysfunction. This exploratory and experimental course is designed to provide opportunities for students to experience authentic laboratory investigation in the context of a course which runs like a research group. Projects progress from term to term so students are welcome to continue in subsequent terms to further progress their projects or switch to other ongoing projects.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: BIO 209 [Min Grade: C], BIO 219 [Min Grade: C] (Can be taken Concurrently)

BIO 231 Cell Physiology 3.0 Credits
Molecular biology of the cell, including regulation of function, genetic mechanisms, chemistry and structure of cellular components, and cell-to-cell interactions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 232 Discovering Antibiotics 3.0 Credits
The focus of this course is the process of research and inquiry that leads to the isolation, characterization and identification of potential antibiotic producing microbial strains and species from soil. Students will work in small groups to collaboratively design and carry out their own experiments that will isolate these microorganisms. During this course, you will learn about the structure, metabolism, nutrition, and diversity of soil microorganisms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 122 [Min Grade: D]

BIO 244 Genetics I 3.0 Credits
Surveys Mendelian, microbial, molecular, and population genetics. Discusses model systems and analytical methods used by geneticists to understand gene functions at cellular, organismal, and population levels.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 122 [Min Grade: D]

BIO 256 Vertebrate Morphology and Physiology 3.0 Credits
Provides comparative study of the major vertebrate groups, relationships between physiology and organismal structure, evolutionary history, comparative anatomy, and development.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 224 [Min Grade: D]
Corequisite: BIO 257

BIO 257 Vertebrate Morphology & Physiology Lab 2.0 Credits
A hands-on laboratory course that complements BIO 256: Vertebrate Morphology and Physiology. Students will use comparative dissections of representative vertebrates to understand the anatomy and evolution of major vertebrate groups.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 224 [Min Grade: D]
Corequisite: BIO 256

BIO 264 Ethnobotany 3.0 Credits
This course explores the relation between ancient/cultural botanical knowledge and its current application in modern pharmacology and alternative forms of medicine. It provides an interdisciplinary approach to the study of plants for food, medicine, stimulation, religious rituals and death.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

BIO 270 Development Biology 3.0 Credits
Covers molecular, cellular and physiological mechanisms underlying development of animals from gametes to adults. Covers the major stages and selected aspects of vertebrate development in importance animal model systems. Particular focus in on the importance of differential gene expression and its regulation in development.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]

BIO 271 Developmental Biology Laboratory 2.0 Credits
Includes observations into development processes in a diverse group of organisms including developmental principles in simple multicellular protests, gametogenesis in diverse animal, fertilization in sea urchins, embryonic development of vertebrates, regeneration of planarians, and the role of gene regulation in fruit fly development. Some or all prerequisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 270 [Min Grade: D] (Can be taken Concurrently)
BIO 284 Biology of Stress 3.0 Credits
This course focuses on the biological responses to the physical and psychological stress, discussing in turn stress responses in various organ systems. Emphasis is given to the analysis and evaluation of conflicting biological evidence on stress effects.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 285 Forensic Biology 3.0 Credits
This course will introduce students to the fascinating subject of forensic science, and specifically the role that biology can play in solving crimes. Topics being covered will include examining a crime scene, and the analysis of biological materials such as fingerprints, blood, plant material and human remains. During the course students will have to play the role of a forensic scientist, applying the knowledge that they will learn each week to see if they can determine who committed the crime. Case studies from real crimes will also be used to illustrate the points being made.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 122 [Min Grade: D]

BIO 286 Forensic Toxicology 3.0 Credits
In this online course students will study forensic toxicology, the study of chemicals - drugs, alcohol and poisons (to name a few), in relation to legal cases. These cases may involve identification of a powder, or examination of an envelope for traces of poisons, or the analysis of a blood sample to identify and quantify the presence of a substance which may have results in intoxication or even death.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 285 [Min Grade: D]

BIO 287 Biochemistry Laboratory 2.0 Credits
Covers biochemical techniques ranging from basic laboratory preparatory work such as making solutions to the measurement of enzyme kinetics and substrate specificity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D]

BIO 310 Comparative Physiology 3.0 Credits
Provides comparative study of the physiology of vertebrate and invertebrate animals. Examines physiological principles by studying cardiovascular adaptations, water balance, respiratory adaptations, and other homeostatic mechanisms in model systems, including fish, amphibians, mammals, birds, and invertebrates.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 201 [Min Grade: D] or BIO 224 [Min Grade: D] or ENVS 284 [Min Grade: D]

BIO 311 Biochemistry 4.0 Credits
Covers bioenergetics and metabolism; enzymes, substrates, products, coenzymes, transporters, pathways (catabolic and anabolic for carbohydrates, lipids, amino acids, and nucleotides). Intracellular regulation, intercellular regulation, and how all this serves to meet the need of the cell and organism.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D]

BIO 312 Genetically Modified Foods 2.0 Credits
Covers the application of recombinant DNA techniques in the creation of genetically modified foods. Explores the many uses of these foods. Also covers the social, ethical and environmental issues involved in the use of genetically modified foods.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 100 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 122 [Min Grade: D] or BIO 141 [Min Grade: D]

BIO 313 Comparative Physiology Laboratory 2.0 Credits
Computational laboratory examining quantitative facets of vertebrate physiology through simulation experiments. Complements BIO 310 Comparative Physiology. Example systems examined include gas and solute exchangers, open vs closed circulations, and thermoregulatory controllers. Some or all pre-requisites may be taken as either a pre-require or co-require. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 310 [Min Grade: D] (Can be taken Concurrently)

BIO 314 Pharmacology 3.0 Credits
In this course, students will apply their studies of chemistry and biology to understand how drugs: are designed, affect the body, and are affected by the body. Students can expect to learn the fundamentals of pharmacology, and to discuss current topics and novel approaches being used to design new therapeutics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 318 Biology of Cancer 3.0 Credits
In this course, students will apply their studies of cell and molecular biology to understand cancer pathology. Starting with a fundamental knowledge of normal cellular processes, students will learn how normal processes go awry in tumor development and metastasis, and the current approaches being used to develop new cancer therapeutics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]
**BIO 320 Microbial Pathogenesis 3.0 Credits**
Covers mechanisms of pathogenesis in microbial disease: transmission, prevention, public health. Also covers molecular basis of microbial pathogenesis.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 221 [Min Grade: D]

**BIO 322 Mycology 4.5 Credits**
Covers morphology, taxonomy, and physiology of yeasts and molds, with emphasis on species of economic importance; plant and animal pathogens; industrial fermentations; toxin production; decomposition of organic materials; and fungal morphogenesis.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 221 [Min Grade: D]

**BIO 331 Bioinformatics I 3.0 Credits**
This course uses a combination of lecture and hands-on exercises to develop computational, algorithmic, and database navigation skills used in the analysis of genes and genomes. Topics include genomic databases, genome assembly and annotation, sequence alignment, phylogenetics, and comparative genomics.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 221 [Min Grade: D] or BIO 141 [Min Grade: D]

**BIO 332 Bioinformatics II 3.0 Credits**
This course uses a combination of lecture and hands-on exercises to develop programming and software skills used in the study of functional genomics. Topics include genetics, transcriptomics, proteomics, and metabolomics.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 331 [Min Grade: D]

**BIO 333 Bioinformatics Laboratory 2.0 Credits**
In this course, students develop and apply computational skills in bioinformatics to address a quarter-long research project. Topics generally focus on the ecology and evolution of microbes, which have become much easier to study thanks to the advent of molecular tools and software for the analysis of DNA sequences.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 122 [Min Grade: D] (Can be taken Concurrently) or BIO 141 [Min Grade: D]

**BIO 346 Stem Cell Research 3.0 Credits**
This course will focus on recent and important topics relevant to stem cell research and development. Topics will include nuclear reprogramming and epigenetics, environmental influences on stem cell differentiation, stem cells and cancer, stem-cell-based therapies for heart and neurodegenerative disorders, stem cells and ageing, and politics of stem cell research.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 348 Neuroscience: From Cells to Circuits 3.0 Credits**
This course provides an introduction to the biological basis of human and animal behavior. This course will emphasize fundamental aspects of neuroscience including how individual neurons respond to stimuli, how these neurons connect to form circuits during development, and how ensembles of neurons work together to mediate simple tasks.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 122 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 349 Behavioral Neuroscience 3.0 Credits**
This course provides an introduction to the biological basis of human and animal behavior. This course will emphasize fundamental aspects of neuroscience including how individual neurons respond to stimuli, how these neurons connect to form circuits during development, and how ensembles of neurons work together to mediate simple tasks.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 122 [Min Grade: D] or BIO 107 [Min Grade: D]

**BIO 368 Embryology 4.0 Credits**
This course surveys general features of developing systems, and focuses on the developmental history of adult structures and functions in humans. Human developmental defects are also discussed.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** BIO 214 [Min Grade: D] or BIO 224 [Min Grade: D] or BIO 211 [Min Grade: D]

**BIO 370 Teratology 3.0 Credits**
This course will expand on the concepts of developmental biology by examining the agents that interfere with normal development. We will explore these agents through presentations and discussion of current peer reviewed literature. The focus will be on an understanding of mechanisms of action and how they are influenced by dose pharmacology and genetics.

**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Cannot enroll if classification is Freshman  
**Prerequisites:** BIO 270 [Min Grade: D] or BIO 368 [Min Grade: D]
BIO 372 Histology 4.0 Credits
This course is designed to give students an understanding of the established fundamentals and principles of histology. Histology lies at the interface between cell biology and physiology; here we examine how cells work together as tissues and organs to create a functional pump (the heart), filters (the kidneys), and bellows (the lungs). While considerable focus will be on the structural details of select systems, there are recurring patterns that emerge in tissue construction. These patterns reflect regional variations in the functional role of the assembled tissue; studying these principles offers us a view of how small differences in cell number, type, and interaction can lead to the wide variety of tissue/organ properties seen in the human body.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 386 Gross Anatomy I 2.0 Credits
This course is to give students an understanding of Human Anatomy in a clinical format. Anatomy will be studied in a regional manner with an emphasis placed on landmarks and relationships of structure within a region. Regions covered to include the head, upper limb, thorax, and abdomen.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]
Corequisite: BIO 387

BIO 387 Gross Anatomy I Laboratory 2.0 Credits
This course is to accompany the Gross Anatomy lecture course and complements the students study of human anatomy by allowing the student to hone their dissection skills through dissection of a preserved mammalian specimen.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: (BIO 214 [Min Grade: D] and BIO 218 [Min Grade: D]) or BIO 211 [Min Grade: D]
Corequisite: BIO 386

BIO 388 Gross Anatomy II 2.0 Credits
This course is a continuation of the clinically focused study of Human Anatomy begun in BIO 386 (Gross Anatomy I). Anatomy will be studied in a regional fashion, with a focus on the pelvis, lower limb, head, and neck.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: (BIO 386 [Min Grade: D])
Corequisite: BIO 389

BIO 389 Gross Anatomy II Lab 2.0 Credits
This course is to accompany the Gross Anatomy lecture course and complements the students study of human anatomy by allowing the student to hone their dissection skills through dissection of a preserved mammalian specimen. This course is a direct continuation of BIO 387 (Gross Anatomy I Lab).

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 387 [Min Grade: D]
Corequisite: BIO 388

BIO 404 Structure and Function of Biomolecules 4.0 Credits
Covers the weak interactions which govern structure and function of biomolecules, including amino acids, proteins (structural organization, isolation, and methods of analysis), Enzymes (structure, catalytic mechanisms, kinetics), lipids and biomembranes, and DNA and RNA folding.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D]

BIO 406 Computational Biochemistry Laboratory 2.0 Credits
This course uses kinetic analysis of biochemical data to increase the computational and numerical sophistication used to build sound models of the underlying biological processes. Students start with Excel as the analytical tool. MATLAB is then used as the complexity of the problems demands it.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D]

BIO 410 Advanced Molecular Biology 3.0 Credits
This course will provide students the opportunity to learn about molecular mechanisms of gene expression and control, genome analysis and manipulation, and the use of advanced tools and techniques in molecular biology. The principles of molecular biology and techniques will be discussed in the context of model organisms commonly used for molecular biology research. The course will have a strong focus on experimental approaches, problem solving and on understanding literature in the field. At the conclusion of the course, students should have the background to design experiments, and read and discuss papers from the primary literature regarding different aspects of molecular biology.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 211 [Min Grade: D]

BIO 412 Biology of Aging 3.0 Credits
Discusses ageing at the organismal, organ, cellular, and molecular levels. Discussions include chronological verses biological aging, normal and abnormal human physiology of aging, current theories of aging, the effect of caloric restriction on aging, and the molecular mechanisms that underlie normal and abnormal aging.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 413 Genomics 3.0 Credits
This course aims to elucidate current technologies, theory, and applications of genomic research. Though a large emphasis will be placed on the use of genomic tools to study human health, we will also study the genomes, transcriptomes, and proteomes of bacteria, fungi, plants, and other animals.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]
BIO 414 Behavioral Genetics 3.0 Credits
This course explores the role of genetics in determining variation in animal (including human) behavior, and the role of gene expression in regulating behavioral development. The course surveys techniques for quantifying and analyzing genetic variation, behavioral effects, and gene expression.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BIO 122 [Min Grade: D] or BIO 107 [Min Grade: D]

BIO 415 Proteins 3.0 Credits
Discusses protein structure, function, and isolation. Emphasizes biochemical, biophysical, and molecular biological techniques.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 416 Biochemistry of Major Diseases 3.0 Credits
This course focuses on the biochemical bases of several selected human disorders including neoplasm, cardiovascular disorders, diabetes and obesity. Biochemical changes and their regulation by signaling pathways under the disease conditions will be examined. The relevance of diagnosis and treatment will be discussed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 203 [Min Grade: C] or BIO 311 [Min Grade: C]

BIO 420 Virology 3.0 Credits
Discusses the major viral groups, including biochemistry and molecular genetics of viral replication, structure, gene expression, latency, and role in disease.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 421 Biomembranes 3.0 Credits
The experimental and theoretical basis for the structure and function of biological membranes will be surveyed. Topics include membrane self assembly, bilayer phase behavior and dynamics, membrane protein structure, passive and active transport, membrane fusion and trafficking.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 424 Microbial Physiology 3.0 Credits
Covers physiology and metabolism of microorganisms with emphasis on aspects unique to prokaryotes, including envelope structure, transport systems, modes of nutrition, biosynthesis, growth, and mechanisms of action of antibiotics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 221 [Min Grade: D]

BIO 426 Immunology 3.0 Credits
Covers the fundamental concepts of innate and adaptive immunity, including the molecular and cellular mechanisms that generate responses to a broad spectrum of infectious threats, self-non-self recognition, immune regulation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 427 Immunology Laboratory 2.0 Credits
Students will gain a more thorough understanding of the complexities of the mammalian immune system and will receive hands on experience with common models used in immunology labs. This course complements the Immunology lecture course (BIO 426). Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 426 [Min Grade: D] (Can be taken Concurrently)

BIO 430 Cell Biology of Disease 3.0 Credits
An introduction to the pathobiology of human disease as it relates to principles of cytoskeleton and membrane biology. The course reviews basic intracellular mechanisms and examines how they go awry in respiratory, heart and kidney diseases, diabetes, cancer, neurodegeneration and during viral and microbial infections.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 433 Advanced Cell Biology 3.0 Credits
Course covers chemical composition and cellular function of organelles and other cellular structures, intra- and inter- cellular regulatory processes, intercellular communication, genetic mechanisms and analytical techniques.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO.
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 434 [WI] Advanced Cell Biology Laboratory 2.0 Credits
Course covers fundamentals of growth, division and homeostasis of mammalian cells grown in culture. Students perform experiments on cells to monitor cellular morphology, including subcellular structures and specific regulatory proteins. Techniques include fluorescent microscopy, cell transfection and subcellular fractionation. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO and classification is Senior.
Prerequisites: BIO 433 [Min Grade: D] (Can be taken Concurrently)
BIO 435 Immunobiology of Disease 3.0 Credits
This course will expand on the concepts of molecular immunology focusing on emerging concepts in immunology research, immunopathologies, failure of host defense and current clinical concepts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 426 [Min Grade: D]

BIO 436 Human Population Genetics 4.0 Credits
This course surveys population genetics theory as applied to studies of micro-evolutionary changes. We will examine the forces of evolution—mutation, selection, inbreeding, gene flow, genetic drift—and how they can (and cannot) change allele frequencies in populations over time. We will apply the theory that you have learned by also examining current primary literature on human evolutionary history, population genetics and patterns of adaptation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 122 [Min Grade: D] and BIO 124 [Min Grade: D] and (BIO 211 [Min Grade: D] or BIO 217 [Min Grade: D] or BIO 218 [Min Grade: D]) or ENVS 212 [Min Grade: D]

BIO 442 Modeling Methods in Biology I 3.0 Credits
Offers practical experience in the modeling of simple biological systems, including the applications of linear, trigonometric, and exponential functions in biology and the use of differential and integral calculus, simple differential equations, and the Eulerian approach to simulation. Emphasizes practical computational use of such tools in biological problems. Offered in alternate years.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

BIO 443 Modeling Methods in Biology II 3.0 Credits
Offers a practical introduction to the modeling of dynamic biological processes, including deterministic and stochastic processes. Emphasizes the development and construction of working models and the interpretation of results. Discusses both mechanistic and empirical/predictive models. Students develop their own model of a real-world biological process. Offered in alternate years.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 442 [Min Grade: D]

BIO 444 Human Genetics 3.0 Credits
Covers the fundamentals and principles of genetics with an emphasis on their relevance to human genetics and disease. Topics include human genetic disorders, pedigree analysis and genetic testing, cytogenetics, epigenetics, genetics of cancer, gene therapy, stem cell research, human genomics and biotechnology.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 445 Microbial Genetics 3.0 Credits
Covers genetic organization and regulation in bacteriophage and bacteria, techniques of genetic manipulation of microbial genomes, genetic interactions of microbes under natural conditions and the use of microbial genome modification in industry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 221 [Min Grade: D]

BIO 447 Advanced Genetics and Molecular Biology 3.0 Credits
Covers classical prokaryotic and eukaryotic genetics; DNA/RNA structure; DNA replication, transcription, translation and regulation of these processes. Also covers major molecular techniques used for characterizing prokaryotic and eukaryotic genes, tools for analysis of genomes, and applications of molecular genetics research.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO. Cannot enroll if classification is Freshman
Prerequisites: (BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]) and BIO 244 [Min Grade: D]

BIO 449 Recombinant DNA Laboratory 5.0 Credits
Covers procedures of DNA isolation and purification, insertion of DNA sequences into plasmid cloning vectors, introduction of plasmids into appropriate host cells, and methods of recovering and analyzing cloned DNA.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 451 Genetic Reg Development 3.0 Credits
Covers molecular and genetic control of morphogenesis and cellular differentiation. Focuses on differential gene function and the interaction between the nucleus and the cytoplasm.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 270 [Min Grade: D]

BIO 453 Protein Dysfunction in Disease 3.0 Credits
Proteins are essential for the function and health of the cell. Misfolded and damaged proteins are at the root of numerous human diseases, known collectively as conformational diseases. In this course we will examine cellular mechanisms involved in biosynthesis, folding and maintenance of proteins, and discuss how the failure of these mechanisms contributes to disease.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 455 Immunobiology of Disease 3.0 Credits
This course will expand on the concepts of molecular immunology focusing on emerging concepts in immunology research, immunopathologies, failure of host defense and current clinical concepts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 426 [Min Grade: D]
BIO 461 Neurobiology of Autism Disorders 3.0 Credits
Autism disorders arise from changes in neurodevelopment that deeply affect how individuals interact with the world around them. As study of autism has increased over the past several decades, it has become clear that autism actually comprises a large, heterogeneous set of similar disorders, most of which are genetic in origin. In this class, we will study how neuronal cell biology is disrupted in known forms of autism, and how distinct forms of autism can arise from alterations in common cellular pathways. Further, we will discuss how these discoveries may lead to eventual treatments or cures.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

BIO 462 Biology of Neuron Function 3.0 Credits
Covers molecular and cellular mechanisms underlying neuron function. Topics include: molecular and cellular biology of neurons and neural development; molecular biology and physiology of sensory and motor neurons; molecular biology of muscle function; molecular and cellular basis of learning and memory in model organisms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 201 [Min Grade: D] or BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 349 [Min Grade: D] or BIO 349 [Min Grade: D]

BIO 463 Molecular Mechanisms of Neurodegeneration 3.0 Credits
This is an advanced course on the current, primary literature in the area of neurodegeneration. Students are expected to be conversant in areas of Genetics, Cell Biology, Molecular Biology, Biochemistry, and Neurobiology. This is a discussion course based on reading current manuscripts from the primary literature. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

BIO 465 Neurobiology of Disease 3.0 Credits
The objective of the course is to provide a basic understanding of molecular and cellular biology of disorders of the human nervous system. Advances developed form experimental models that have armed clinicians and basic scientists with new tools for diagnosis and treatment of disease and injury will be presented.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 462 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 348 [Min Grade: D] or BIO 349 [Min Grade: D]

BIO 466 Endocrinology 4.0 Credits
Describes the classical hormones, their regulation and major clinical abnormalities. New directions in endocrinology, such as cellular regulation and cellular mediators of hormonal action are also considered. The major focus of the course will be on mammals, although some examples involving other vertebrates are included.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 468 Pathophysiology 4.0 Credits
This course is designed to give students an appreciation of the many ways to think about the diseased organism, with an emphasis on the cellular- and systems-level malfunctions that contribute to the disease state. Having established an understanding of the normal physiology of the system in question, we will investigate the underlying cause, origin, and symptoms of the pathophysiology, as well as exploring the successes and limitations of available treatment options. Considerable emphasis will be placed on the importance of model systems that mimic aspects of the diseased state, as well as the role epidemiological data plays in helping to clarify the genetic and environmental contributors.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 214 [Min Grade: D] or BIO 211 [Min Grade: D] and BIO 201 [Min Grade: D]

BIO 471 Seminar in Biological Sciences 2.0 Credits
Discusses and evaluates selected current topics in bioscience and biotechnology. Includes presentations by outside speakers.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO and classification is Senior.
Prerequisites: BIO 218 [Min Grade: D] or BIO 211 [Min Grade: D]

BIO 472 Seminar in Biological Sciences 2.0 Credits
In the second term of senior seminar, we will continue to host professional seminars with speakers presenting current research in the various biological disciplines. Professional development sessions will be available that will be helpful to the student's maturation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO and classification is Senior.
Prerequisites: BIO 471 [Min Grade: D]

BIO 473 [WI] Seminar in Biological Sciences 2.0 Credits
This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO and classification is Senior.
Prerequisites: BIO 472 [Min Grade: D]

BIO 474 Thesis in Biology 2.0 Credits
Through this course, research-active students will engage in activities intended to help them develop a written thesis, and learn how to present their research effectively in both written and oral formats. Students will be encouraged to improve their skills in reading and analyzing the literature and their own data. Students will communicate their ideas through the development of a formal thesis, an in-class oral presentation, and a poster presentation. Seminar attendance will be a part of this course. Students must complete BIO 471 and 473 before registering for this course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BIO and classification is Senior.
Prerequisites: BIO 473 [Min Grade: D] (Can be taken Concurrently)
BIO 497 Research 0.5-12.0 Credits
Provides guided research in biology, molecular biology, microbiology, cell or human physiology, genetics, biochemistry, or biotechnology.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

BIO I199 Independent Study in BIO 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

BIO I299 Independent Study in BIO 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

BIO I399 Independent Study in BIO 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

BIO I499 Independent Study in BIO 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

BIO T180 Special Topics in Bioscience & Biotechnology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

BIO T280 Special Topics in Bioscience & Biotechnology 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences

Business Statistics

Courses

STAT 201 Introduction to Business Statistics 4.0 Credits
This introductory first course in business statistics focuses on applications of data analysis and statistics in business and economics. Topics covered include descriptive statistics and graphical presentation, probability, statistical inference, and simple regression analysis.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 102 [Min Grade: D] or MATH 121 [Min Grade: D] or MATH 183 [Min Grade: D]

STAT 202 Business Statistics II 4.0 Credits
This second course in business statistics focuses on widely used data analysis techniques in business and economics. Topics include two sample procedures, categorical data analysis, analysis of variance, regression analysis and other statistical applications as time permits. Applications are covered through practical data analysis examples.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: STAT 201 [Min Grade: C]

STAT 205 Statistical Inference I 4.0 Credits
Commerce and Engineering students only. Covers descriptive statistics, elementary probability theory, discrete and continuous random variables and probability distributions, joint distribution functions, expected values, statistical measures, sampling distributions, and point and interval estimation.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: STAT 201 [Min Grade: C]

STAT 206 Statistical Inference II 4.0 Credits
Commerce and Engineering students only. Topics include hypothesis testing, two sample procedures, analysis of variance models, regression analysis, use of computer statistical programs and other statistical applications as time permits.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: STAT 205 [Min Grade: D]

STAT 261 Statistics I 3.0 Credits
Studies methods for organizing and summarizing data, elementary probability concepts, and important probability distributions and sampling distributions. Introduces confidence interval estimation. Fall, Winter.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 183 [Min Grade: D]
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 262</td>
<td>Statistics II</td>
<td>3.0</td>
<td>Studies the principles and techniques of interval estimation and hypotheses testing, and testing for means and proportions. Winter, Spring.</td>
</tr>
<tr>
<td>STAT 263</td>
<td>Statistics III</td>
<td>3.0</td>
<td>Covers linear regression and correlation models, ANOVA, statistical quality control, non-parametric statistics, and applications of the chi-square distribution. Fall, Spring.</td>
</tr>
<tr>
<td>STAT 265</td>
<td>Six-Sigma Quality Implementation</td>
<td>4.0</td>
<td>Focuses on current theory and practice in Six-Sigma implementation for quality monitoring and improvement. Topics include the dynamic nature of quality, Six-Sigma implementation, and the roles of management in planning and guiding quality efforts. The fundamentals of managerial and statistical methods for quality monitoring and improvements are covered.</td>
</tr>
<tr>
<td>STAT 331</td>
<td>Introduction to Data Mining for Business</td>
<td>4.0</td>
<td>This course introduces students to the fundamental ideas of data mining methods, including dimension reduction, cluster, classification and regression trees, and logistic regression. The emphasis is understanding the application of methods rather than on mathematical and computational foundations. All applications are business-oriented.</td>
</tr>
<tr>
<td>STAT 335</td>
<td>Introduction to Experimental Design</td>
<td>4.0</td>
<td>The purpose of this course is to introduce the student to the fundamentals of experimental design, including the planning, conducting, and analysis of statistically designed experiments. Randomized, factorial, fractional and Plackett-Burnam designs are covered with an emphasis on business applications.</td>
</tr>
<tr>
<td>STAT E313</td>
<td>Quantitative Analysis III</td>
<td>3.0</td>
<td>Covers descriptive statistics, elementary probability theory, discrete and continuous random variables and probability distributions, central limit theorem, expected value, statistical estimations, hypothesis testing, and linear regression and correlation analysis. All terms.</td>
</tr>
<tr>
<td>CVPT 101</td>
<td>Perfusion Technology I</td>
<td>3.0</td>
<td>In Perfusion Technology I, the student is introduced to the various components that comprise the perfusion hardware, such as perfusion pumps, oxygenators, tubing packs and ancillary equipment used in CPB circuits. In this course, students receive extensive wet-lab experience and should be able to demonstrate a pump set-up.</td>

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
CVPT 289 Cardiac Anatomy and Physiology 4.0 Credits
Cardiac Anatomy and Physiology expands knowledge learned in basic anatomy and physiology coursework. Explores the structure and mechanisms by which the cardiovascular system functions in relation to other organ systems, with an emphasis on how cardiopulmonary bypass alters normal function.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CVPT 293 Basic Surgery and Monitoring 3.0 Credits
Basic Surgery and Monitoring introduces basic surgical aspects, including sterile and aseptic techniques, interrelationships of various personnel in the operating room and various surgical techniques as they relate to perfusion. Explores all facets of patient monitoring, with an emphasis on changes associated with the conduct of perfusion.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CVPT 295 Clinical Practicum I 4.0 Credits
Clinical Practicum I exposes students to the operating room, where their primary responsibilities are observing and assisting senior students and staff perfusionists. Provides experience including pump set-up, handling case records, gathering lab data, and limited perfusion management.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CVPT 300 Clinical Practicum II 6.0 Credits
Clinical Practicum II is a course focused entirely on clinical perfusion. Includes responsibility for pump set-up and cardiopulmonary bypass case management. Includes close supervision for each individual case.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 295 [Min Grade: D]

CVPT 305 Pediatric Clinical Practicum 2.0 Credits
Pediatric Clinical Practicum examines the differences among adult, infant and neonate perfusion methods during a one-month rotation to Children's Hospital of Philadelphia. Emphasizes circuit preparation, priming volumes, flow rates and hemodynamic changes, pharmacological agents, direct visualization of various congenital anomalies and surgical corrections.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 307 [Min Grade: D] and CVPT 330 [Min Grade: D]

CVPT 307 Clinical Practicum III 6.0 Credits
Clinical Practicum III provides clinical work aimed at increasing the level of proficiency in the conduct of patient perfusion. Under supervision, students are responsible for all aspects of clinical perfusion and are exposed to specialized techniques and adjunctive technology used for cardiopulmonary bypass.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 300 [Min Grade: D]

CVPT 310 Perfusion Technology II 4.0 Credits
Perfusion Technology II reinforces the operating room techniques observed in CVPT 295 in a classroom setting. Examines ancillary and perfusion support systems, including ventricular-assist devices, extracorporeal membrane oxygenation, CPS, intra-aorta Balloon pumps and others.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 101 [Min Grade: D]

CVPT 320 Physiologic Management of Bypass 4.0 Credits
Physiologic Management of Bypass provides an understanding of the many physiologic changes that occur during bypass and a method for safely and effectively addressing these changes. Emphasis is placed on hemodynamics, fluid balance, blood coagulation and electrocardiographic activity as they apply to perfusion.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CVPT 330 Cardiovascular Pathology 4.0 Credits
Cardiovascular Pathology provides an understanding of pathological conditions that exist in all organ systems, with special emphasis on the cardiovascular system. Discusses both acquired and congenital defects, with attention given to pathological conditions requiring cardiopulmonary bypass.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 320 [Min Grade: D]

CVPT 340 Cardiovascular Pharmacology 4.0 Credits
Cardiovascular Pharmacology details the various pharmacologic interventions used for cardiovascular patients, highlighting their classification, dosage, site of action, duration of action, interactions with other drugs, precautions and side effects.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 289 [Min Grade: D]

CVPT 350 Clinical Practicum IV 12.0 Credits
Clinical Practicum IV is designed to complete the students’ clinical experience. Expects students, under staff supervision at all times, to act as though unsupervised in all routine cardiovascular procedures. Allows the operation of complex devices as well as student participation in emergency procedures.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 307 [Min Grade: D]

CVPT 360 Cardiac Surgical Practicum 2.0 Credits
A multi-faceted course incorporating many of the disciplines found in an acute care setting. Rotations include the following observational areas: catheterization lab, recovery room, anesthesia, intra-aortic balloon pumps, surgical assisting and ventricular assist devices.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit
Prerequisites: CVPT 365 [Min Grade: D]
CHE 206 Basic Chemical Engineering Thermodynamics 3.0 Credits
First and second laws of thermodynamics, use of state functions to solve macroscopic problems, distinction between solving ideal gas and real fluid problems. An introduction to phase equilibrium and mixtures. Concepts of fugacity and activity as measures of nonideality.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHE.
Prerequisites: CHE 201 [Min Grade: D] and MATH 200 [Min Grade: D]
Corequisite: CHE 202

CHE 211 Material and Energy Balances I 4.0 Credits
Covers elementary principles of chemical engineering, use of stoichiometry and material and energy balances to analyze chemical processing operations, and application to specific commercial processes.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D]
Corequisite: CHE 220

CHE 212 Material and Energy Balances II 4.0 Credits
Covers application of material and energy balances to analyze chemical processing operations, with application to both small-scale and commercial processes. Emphasis is on simultaneous solution of material and energy balances and on time-dependent analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]
Corequisite: CHE 230

CHE 220 Computational Methods in Chemical Engineering I 3.0 Credits
Introduces computational approaches and software applied to solve problems in chemical engineering. Software includes spreadsheet programs (Excel), high level computing languages (MATLAB), and chemical process simulation tools (Aspen, HYSYS).
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 122 [Min Grade: D]
Corequisite: CHE 211

CHE 230 Chemical Engineering Thermodynamics I 4.0 Credits
First and second laws of thermodynamics, use of state functions to solve macroscopic problems, distinction between solving ideal gas and real fluid problems. An introduction to phase equilibrium and mixtures. Concepts of fugacity and activity as measures of nonideality.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 200 [Min Grade: D] and CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]
Corequisite: CHE 212

CHE 250 Chemical Engineering Process Principles 3.0 Credits
Applies heuristics to the art process synthesis and analysis. Identify key parameters in reaction and separation in processes. Examine common and divergent elements of major chemical processes.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 201 [Min Grade: D]
Corequisite: CHE 202
CHE 301 Process Thermodynamics 3.0 Credits
Covers mixture thermodynamics, multi-component, multi-phase equilibrium calculations, and chemical equilibrium calculations for real fluids.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D]) and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 302 Process Fluid Mechanics 4.0 Credits
Within the context of processes previously introduced, introduces fluid flow of gases, liquids, and particulates; momentum transport; skin friction; drag; piping networks; filtration; and fluidization.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 302 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 303 Process Heat Transfer 3.0 Credits
Covers, within the context of processes previously introduced, transfer of energy by conduction, convection, and radiation; continuation of transport phenomena; design of heat exchangers; and applications in industry and in nature.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 302 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 304 Process Mass Transfer 4.0 Credits
Covers, within the context of processes previously introduced, mass transfer in mixtures; diffusion, convection, and continuation of transport phenomena; component separation in continuous contractors; gas absorption; liquid-liquid extraction; and simultaneous heat and mass transfer.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 303 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 305 Process Separations 4.0 Credits
Covers, within the context of processes previously introduced, the application of thermodynamics and equilibrium stage concepts to the unit operations involved in chemical processing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 301 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 306 Process Separations II 4.0 Credits
Covers, within the context of processes previously introduced, the application of thermodynamics and equilibrium stage concepts to the unit operations involved in chemical processing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 305 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 307 Process Modeling I 4.0 Credits
Models simple chemical and biochemical processes such as heating, cooling, and separation systems. Covers analytical and numerical methods for solving algebraic and ordinary differential equations.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D] and (ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D])

CHE 308 Process Modeling II 4.0 Credits
Covers mathematical modeling of chemical and biochemical processes such as chemical and biochemical reactors and heating and cooling systems, analytical methods for solving algebraic and ordinary-differential equations.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 305 [Min Grade: D] and CHE 307 [Min Grade: D]
Corequisite: CHE 304

CHE 309 Chemical Engineering Thermodynamics II 4.0 Credits
Non-chemical engineering students only. Examines mass, momentum, and energy transport in processes applied to electrical and materials engineering.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is CHE or classification is Freshman
Prerequisites: TDEC 202 [Min Grade: D] or MEM 210 [Min Grade: D] or ENGR 210 [Min Grade: D]

CHE 310 Transport Phenomena 4.0 Credits
Non-chemical engineering students only. Examines fluid flow and heat and mass transfer in processes associated with civil, environmental, and materials engineering disciplines.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is CHE or classification is Freshman
Prerequisites: TDEC 202 [Min Grade: D] or MEM 210 [Min Grade: D] or ENGR 210 [Min Grade: D]

CHE 311 Fluid Flow and Transport 3.0 Credits
Non-chemical engineering students only. Examines fluid flow and heat and mass transfer in processes associated with civil, environmental, and materials engineering disciplines.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is CHE or classification is Freshman
Prerequisites: TDEC 202 [Min Grade: D] or MEM 210 [Min Grade: D]

CHE 320 Computational Methods in Chemical Engineering II 3.0 Credits
This course introduces computational approaches and software applied to solve problems in chemical engineering. The course includes finite element software for solving differential equations (COMSOL Multiphysics) and computer programming.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is CHE or classification is Freshman
Prerequisites: CHE 341 [Min Grade: D]

CHE 330 Chemical Engineering Thermodynamics II 4.0 Credits
Covers mixture thermodynamics, multi-component, multi-phase equilibrium calculations, and chemical equilibrium calculations for real fluids.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 230 [Min Grade: D]
CHE 331 Separation Processes 3.0 Credits
Covers application of thermodynamics and equilibrium stage concepts to separation unit operations in chemical processing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 330 [Min Grade: D] and CHE 343 [Min Grade: D]

CHE 332 [WI] Chemical Engineering Laboratory 2.0 Credits
Requires students to perform experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 302 [Min Grade: D] (Can be taken Concurrently)

CHE 333 [WI] Chemical Engineering Laboratory II 2.0 Credits
Offers laboratory experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 303 [Min Grade: D] (Can be taken Concurrently)

CHE 334 [WI] Chemical Engineering Laboratory III 2.0 Credits
Offers laboratory experiments illustrating the fundamentals of chemical engineering process analysis. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 304 [Min Grade: D] (Can be taken Concurrently)

CHE 335 Statistics and Design of Experiments 3.0 Credits
Provides statistical treatment of engineering data, including application of statistical techniques to process model formulation, statistical designs of engineering experiments, and analysis of probabilistic systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 210 [Min Grade: D] or MATH 262 [Min Grade: D] or ENGR 232 [Min Grade: D]

CHE 341 Fluid Mechanics 4.0 Credits
Introduces, within the context of processes, transport phenomena, fluid flow, momentum transport, skin friction, drag, and piping networks.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 212 [Min Grade: D] and CHE 230 [Min Grade: D] and MATH 210 [Min Grade: D]

CHE 342 Heat Transfer 4.0 Credits
Covers, as a continuation of transport phenomena and within the context of processes, transfer of energy by conduction, convection, and radiation and design of heat exchangers.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 341 [Min Grade: D]
Corequisite: CHE 343

CHE 343 Mass Transfer 4.0 Credits
Covers, within the context of processes previously introduced, mass transfer in mixtures; diffusion, convection, and continuation of transport phenomena; component separation in continuous contactors; gas absorption; liquid-liquid extraction; and simultaneous heat and mass transfer.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 341 [Min Grade: D]
Corequisite: CHE 342

CHE 344 Transport Phenomena in Bioengineering Processes 3.0 Credits
Covers gas-liquid mass transfer in microbial systems, mass transfer in cells and biofilms, membrane transport, fluid mechanics of fermentation broth, power consumption in agitated vessels, heat transfer, and scale-up of mass transfer equipment.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (CHE 343 [Min Grade: D] or CHE 304 [Min Grade: D]) and (CHE 341 [Min Grade: D] or CHE 302 [Min Grade: D])

CHE 350 Statistics and Design of Experiments 3.0 Credits
Provides statistical treatment of engineering data including application of statistical techniques to process model formulation, statistical designs of engineering experiments, and analysis of probabilistic systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 210 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D]

CHE 351 Chemical Engineering Laboratory I 2.5 Credits
Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 341 [Min Grade: D] and CHE 330 [Min Grade: D]

CHE 352 Chemical Engineering Laboratory II 2.5 Credits
Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 343 [Min Grade: D] and CHE 331 [Min Grade: D]

CHE 360 Bioprocess Principles 3.0 Credits
This course is concerned with manufacturing processes involving biological substances. Students gain detailed knowledge in the design and operation of bioreactors and learn about biomolecules produces therein. Specific topics covered include: Cells (type, organization, function and growth); Protein and Enzymes; Bioreactor Process Principles (active vs. passive immobilization, fermentation and scale-up, recovery and purification); Special consideration for animal and plant cell cultures.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 250 [Min Grade: D] and BIO 214 [Min Grade: D] and BIO 215 [Min Grade: D]
CHE 362 Chemical Kinetics and Reactor Design 4.0 Credits
Covers isothermal and non-isothermal reactor design, series and parallel reactions, and heterogeneous catalysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 330 [Min Grade: D] and CHE 342 [Min Grade: D] and CHE 343 [Min Grade: D]

CHE 364 Bioprocess Unit Operations 3.0 Credits
Covers separation processes applicable to bio-systems, including liquid-liquid extractions, membrane separations, chromatographic separations, filtration, and centrifugation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 305 [Min Grade: D] or CHE 331 [Min Grade: D]

CHE 371 Engineering Economics and Professional Practice 3.0 Credits
Provides techniques for making engineering project decisions. Topics include the time value of money, key decision criteria, risk analysis, and ethical considerations and consequences of business decisions.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 211 [Min Grade: D] and CHE 220 [Min Grade: D]

CHE 372 Integrated Case Studies in Chemical Engineering 3.0 Credits
This course reviews selected cases (market, processes, equipment sets and incidents) from chemical engineering practice whose analysis requires integration of concepts from previous Chemical Engineering courses such as mass and energy transport, thermodynamics, separations and reaction engineering.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 342 [Min Grade: D] and CHE 343 [Min Grade: D]

CHE 379 Special Problems in Chemical Engineering 1.0-12.0 Credit
Covers individual research problems of a non-routine nature. Requires report.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

CHE 420 Process Systems Engineering 3.0 Credits
Covers the application of automatic control theory to chemical processes within the context of processes previously introduced.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D] and CHE 303 [Min Grade: D]

CHE 424 Chemical Kinetics and Reactor Design 4.0 Credits
Covers isothermal and non-isothermal reactor design, series and parallel reactions, and heterogeneous catalysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 304 [Min Grade: D] and CHE 201 [Min Grade: D] and CHE 202 [Min Grade: D]

CHE 429 Chemical Engineering Laboratory I 2.5 Credits
Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 362 [Min Grade: D], CHE 464 [Min Grade: D] (Can be taken Concurrently)

CHE 430 Introduction to Sustainable Engineering 3.0 Credits
This course introduces students to sustainability in an engineering context. Sustainable engineering encompasses the relationships between technology, society, the environment, and economic prosperity. A variety of systematic approaches will be used for multivariable design and analysis of the sustainability of engineering systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

CHE 431 Fundamentals of Solar Cells 3.0 Credits
This course focuses on the fundamentals of solar cells. It will cover semiconductor materials, basic semiconductor physics, optical and electronic phenomena, and case studies of crystalline silicon, thin film, and nanostructured photovoltaics.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 200 [Min Grade: D] and CHEM 102 [Min Grade: D] and PHYS 201 [Min Grade: D]

CHE 450 Chemical Process Industries 3.0 Credits
Chemical engineering juniors and seniors. Combines process heuristics and design strategies with case studies of the industrial manufacture of a variety of materials, including petrochemicals, polymers, and ammonia. Discusses operational and design problems as well as the interactions of process principles.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CHE 451 Safety Engineering 3.0 Credits
Covers selected topics such as safeguarding systems, fault trees, risk analysis, explosions, fires, and building safety.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CHE 482 [Min Grade: D]

CHE 452 Polymer Process Technology 3.0 Credits
Covers chemistry of chain and stepwise polymerization, industrial reactor systems, polymer melt rheology, processing of thermoplastic resins, and plastics properties.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

CHE 453 Chemical Engineering Laboratory II 2.5 Credits
Offers laboratory experience in chemical engineering processes, requiring both experimental design and analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 362 [Min Grade: D], CHE 464 [Min Grade: D] (Can be taken Concurrently)
CHE 460 Biochemical Engineering 3.0 Credits
Introduces underlying biological and engineering principles in an integrative fashion for biopharmaceutical production systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is BME or major is CHE and classification is Junior or Senior.

CHE 461 Principles of Colloid Science 3.0 Credits
This course focuses on fundamental principles of colloid science from a biological perspective. It will cover surface active agents, thermodynamics of self-assembly of surfactants, surface chemistry and physics of monolayers and bilayers, microstructures and phase behavior, specific biological colloids (micelles, liposomes, and lipoproteins), and colloidal stability.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BIO 141 [Min Grade: C] or BIO 122 [Min Grade: C]

CHE 464 Process Dynamics and Control 3.0 Credits
Covers the application of automatic control theory to chemical processes within the context of processes.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 210 [Min Grade: D] and CHE 212 [Min Grade: D]

CHE 466 Chemical Process Safety 3.0 Credits
Covers selected topics such as safeguarding systems, fault trees, risk analysis, explosions, fires, and process safety.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 472 [Min Grade: D]

CHE 471 Process Design I 4.0 Credits
Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 331 [Min Grade: D], CHE 362 [Min Grade: D] (Can be taken Concurrently)CHE 371 [Min Grade: D] and CHE 372 [Min Grade: D]

CHE 472 Process Design II 3.0 Credits
Within the context of previously introduced processes, covers execution of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 471 [Min Grade: D]

CHE 473 Process Design III 3.0 Credits
Within the context of previously introduced processes, covers completion of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHE 472 [Min Grade: D]

CHE 472 Process Design III 3.0 Credits
Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHE and classification is Senior.
Prerequisites: CHE 304 [Min Grade: D] and CHE 308 [Min Grade: D]
Corequisite: CHE 424

CHE 481 Process Design I 3.0 Credits
Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHE and classification is Senior.
Prerequisites: CHE 304 [Min Grade: D] and CHE 308 [Min Grade: D]
Corequisite: CHE 424

CHE 482 [WI] Process Design II 3.0 Credits
Within the context of previously introduced processes, covers execution of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CHE 481 [Min Grade: D]

CHE 483 [WI] Process Design III 3.0 Credits
Within the context of previously introduced processes, covers completion of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CHE 482 [Min Grade: D]

CHE 481 Process Design I 3.0 Credits
Within the context of previously introduced processes, covers economic feasibility of projects and optimization of equipment and production in the design of process plants.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHE and classification is Senior.
Prerequisites: CHE 304 [Min Grade: D] and CHE 308 [Min Grade: D]
Corequisite: CHE 424

CHE 482 [WI] Process Design II 3.0 Credits
Within the context of previously introduced processes, covers execution of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CHE 481 [Min Grade: D]

CHE 483 [WI] Process Design III 3.0 Credits
Within the context of previously introduced processes, covers completion of feasibility study and preliminary design of process plants. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CHE 482 [Min Grade: D]

CHE 1199 Independent Study in CHE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE 1299 Independent Study in CHE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE 1399 Independent Study in CHE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE 1499 Independent Study in CHE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE T180 Special Topics in CHE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
CHE T280 Special Topics in CHE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE T380 Special Topics in CHE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CHE T480 Special Topics in CHE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

Chemical Engineering Chemistry

Courses
CHEC 352 Physical Chemistry and Applications II 4.0 Credits
Equilibrium electrochemistry and transport; Covers electrochemical cells, Nernst equation, fuel cells, batteries, electrolytic solutions, transfer processes, Fick's laws, diffusion, ion transport, introduction to simple quantum mechanical systems.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 201 [Min Grade: D] and (CHE 206 [Min Grade: D] or ENGR 210 [Min Grade: D] or CHEM 253 [Min Grade: D])

CHEC 353 Physical Chemistry and Applications III 4.0 Credits
Kinetics and spectroscopy; Covers reaction kinetics, steady state approximation, chain reactions and unimolecular reactions, optical spectroscopy; Beer's Law, atomic spectra/simple atomic models, rotational and vibrational spectra, Raman spectra, term symbols and selection rules, lasers, molecular statistics, partition functions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 201 [Min Grade: D] and (CHE 206 [Min Grade: D] or ENGR 210 [Min Grade: D])

CHEC I499 Independent Study in CHEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHEC I399 Independent Study in CHEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHEM 100 Chemistry 2.0 Credits
Chemistry and its significance to industry and life, with discussions revolving around synthesis and use of polymers and biologically significant molecules.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 101 General Chemistry I 3.5 Credits
Covers fundamental principles of chemistry, stoichiometry, atomic and molecular structure, chemical bonding, states of matter, thermochemistry, and periodicity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: APCH 12 or CHEM 111 [Min Grade: D] or CHEM 050 [Min Grade: D]
Corequisite: EXAM 080

CHEC T180 Special Topics in Chemical Engineering Chemistry 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHEC T280 Special Topics in Chemical Engineering Chemistry 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHEC T380 Special Topics in Chemical Engineering Chemistry 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHEC T480 Special Topics in Chemical Engineering Chemistry 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Chemistry

Courses
CHEM 050 Preparatory Chemistry 0.0 Credits
This online course covered general chemical principles, such as stoichiometry, atomic and molecular structure, and characterization of chemical reactions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 100 Chemistry 2.0 Credits
Chemistry and its significance to industry and life, with discussions revolving around synthesis and use of polymers and biologically significant molecules.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 101 General Chemistry I 3.5 Credits
Covers fundamental principles of chemistry, stoichiometry, atomic and molecular structure, chemical bonding, states of matter, thermochemistry, and periodicity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: APCH 12 or CHEM 111 [Min Grade: D] or CHEM 050 [Min Grade: D]
Corequisite: EXAM 080
CHEM 102 General Chemistry II 4.5 Credits
Covers chemical equilibrium, including acid-base equilibria in solution; electrochemistry; organic chemistry; polymers; and petroleum.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 111 [Min Grade: D] or CHEM 121 [Min Grade: D] or CHEM 161 [Min Grade: D]
Corequisite: EXAM 080

CHEM 103 General Chemistry III 5.0 Credits
Covers organic functional groups, biochemistry, inorganic and coordination compounds, chemical kinetics, thermodynamics, and nuclear chemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])
Corequisite: EXAM 080

CHEM 108 Health Chemistry I 3.0 Credits
Covers physical and chemical properties of substances used in medical areas and related principles: atomic structure, bonding, gases, solutions, acids and bases, oxidation-reduction and the chemistry of hydrocarbon compounds and polymers. Examples are taken from pharmacology, nutrition and other allied health fields.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Corequisite: EXAM 080

CHEM 110 Environmental Chemistry 2.0 Credits
Chemistry of the environment; the ecological aspects. Discussion of problems related to the pollution of the atmosphere, natural waters, and soil from a chemist's point of view.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 111 General Chemistry I 4.0 Credits
Not open to engineering or science majors. Introduces the principles of general chemistry. Covers SI units, unit factor calculations, states of matter, elements and compounds, energy, atoms, electronic configurations, ionic and covalent bonds, Lewis dot structures, shapes of molecules, chemical equations, stoichiometry, molarity, gas laws, nuclear chemistry, equilibrium between different states of matter, and some colligative properties of solutions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Corequisite: EXAM 080

CHEM 112 General Chemistry II 4.0 Credits
Introduces organic chemistry. Covers some classes of organic compounds from alkanes to amines, basic reactions of important functional groups, uses of some compounds, stereochemistry, synthetic and natural polymers (carbohydrates, protein, DNA), and briefly acids and bases.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 111 [Min Grade: D]

CHEM 113 General Chemistry I Laboratory 1.5 Credit
Covers chemical and physical properties and techniques for inorganic, organic, and polymeric compounds, including distillation, crystallization, chromatography, separation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 111 [Min Grade: D] (Can be taken Concurrently)

CHEM 114 General Chemistry II Laboratory 1.5 Credit
Continuation of CHEM 113.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 111 [Min Grade: D] (Can be taken Concurrently)

CHEM 121 Majors Chemistry I 5.0 Credits
Part I in an introductory sequence for chemistry majors. Covers fundamental principles of atomic and molecular nature of matter, electronic structure, physico-chemical properties, periodicity, chemical reactions, stoichiometry, thermochemistry, chemical bonding, properties of gases, and nuclear chemistry. Course includes weekly lab experiments.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: APCH 12 or CHEM 111 [Min Grade: D] or CHEM 050 [Min Grade: D]

CHEM 122 Majors Chemistry II 5.0 Credits
Part II in an introductory sequence for chemistry majors. Covers physical properties of liquids and solids, kinetics, equilibrium, solutions, acids and bases, thermodynamics, and electrochemistry. Course includes weekly lab experiments.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: CHEM 101 [Min Grade: C-] or CHEM 121 [Min Grade: C-]

CHEM 123 Majors Chemistry III 5.5 Credits
Part III in an introductory sequence for chemistry majors. Course covers physical and chemical properties of substances used in consumer products through an introduction to fundamental structures, nomenclature and properties of hydrocarbons, organize functional groups, polymers and biomolecules. Course includes weekly lab experiments.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: CHEM 101 [Min Grade: C-] or CHEM 121 [Min Grade: C-]

CHEM 151 Applied Chemistry 3.0 Credits
For business majors. Covers physical and chemical properties of substances used in consumer products. Provides qualitative introduction to required principles, including atomic structure and the elements, bonding and compounds, and the chemistry of carbon compounds and polymers. Uses examples from the areas of food and nutrition, pharmacology, and the petrochemical industry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Corequisite: EXAM 080
CHEM 161 General Chemistry I 3.0 Credits
Covers atomic structure, stoichiometry, gases, valence theory, and thermochemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: MATH 003 [Min Grade: D] or (MATH 001 [Min Grade: D] and MATH 002 [Min Grade: D])

CHEM 162 General Chemistry II 3.0 Credits
Covers solutions, colligative properties, chemical equilibrium, and electrochemistry. Introduces organic chemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 161 [Min Grade: D] or CHEM 101 [Min Grade: D]

CHEM 163 General Chemistry III 3.0 Credits
Continues organic chemistry. Introduces thermodynamics, molecular biology, inorganic chemistry, chemical kinetics, and nuclear chemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 161 [Min Grade: D] or CHEM 101 [Min Grade: D] and CHEM 162 [Min Grade: D]

CHEM 164 General Chemistry Laboratory I 2.0 Credits
Involves experiments demonstrating the principles of gas behavior, thermochemistry, colligative properties, chemical equilibrium, and electrochemistry. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D]

CHEM 165 General Chemistry Laboratory II 2.5 Credits
Involves experiments illustrating the principles of organic separations, transition metal chemistry, complex ions, chemical kinetics, and qualitative analysis. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 163 [Min Grade: D] (Can be taken Concurrently)

CHEM 201 Why Things Work: Everyday Chemistry 3.0 Credits
Course will cover chemical explanations of everyday materials and phenomena. The focus will be conceptual understanding, as opposed to a detailed quantitative treatment.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 230 Quantitative Analysis 4.0 Credits
Covers chemical analysis and data treatment, including chemical equilibrium, acid-base and redox reactions, and applications to gravimetric and titrimetric methods.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

CHEM 231 [WI] Quantitative Analysis Laboratory 2.0 Credits
Provides laboratory studies in quantitative analysis. This is a writing intensive course. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 230 [Min Grade: D] (Can be taken Concurrently)

CHEM 241 Organic Chemistry I 4.0 Credits
Covers structure, reactions, and stereochemistry of organic compounds, especially alkanes, cycloalkanes, haloalkanes, and alkenes. Also covers SN1, SN2, E1, and E2 compound.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

CHEM 242 Organic Chemistry II 4.0 Credits
Covers structure, reactivity, and stereochemistry of organic compounds, especially alkanes, alkenes, ethers, dienes, and aromatic compounds. IR, MS, and NMR spectral techniques are introduced and applied to the identification of organic compounds.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 241 [Min Grade: D]

CHEM 243 Organic Chemistry III 3.0 Credits
Covers structure, preparation, reactivity, and stereochemistry of organic compounds, especially substituted aromatics, aldehydes, ketones, carboxylic acids, carboxylic acid halides, anhydrides, amides, polyesters, esters, amines, phenols, and carbohydrates.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D]

CHEM 244 Organic Chemistry Laboratory I 3.0 Credits
Introduces simple recrystallization, distillation, extraction, and chromatography techniques and applies them to several organic reactions illustrative of topics covered in CHEM 241. Provides opportunity to take and interpret IR and GC spectra.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 241 [Min Grade: D]

CHEM 245 Organic Chemistry Laboratory II 3.0 Credits
Provides experiments illustrating a number of organic reactions covered in CHEM 242 as well as more advanced organic techniques. Provides opportunity to take and interpret IR and GC scans. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 242 [Min Grade: D] (Can be taken Concurrently)
CHEM 244 [Min Grade: D]
CHEM 246 Organic Chemistry for Majors I 6.5 Credits
This course offers a basic foundation for modern organic chemistry. Lecture topics include: the chemistry of alkanes, cycloalkanes, alkyl halides, alkenes, cycloalkenes, and alkynes, free radical substitution, nucleophilic substitution, elimination, ionic addition, and free radical addition reactions. Lab topics include recrystallization, distillation, chromatography, liquid-liquid extraction, and simple chemical reactions, including an elimination reaction to prepare an alkene and several substitution reactions to prepare alkyl halides. Introduction to the use of IR and 1-H NMR as structure identification tools.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: CHEM 103 [Min Grade: D] or CHEM 123 [Min Grade: D]

CHEM 248 Organic Chemistry for Majors II 6.5 Credits
This course continues developing the basic foundation of modern organic chemistry started in CHEM 246. Lecture topics include the chemistry of alcohols, ethers, conjugated systems, aromatic compounds and thiols. The principles of IR, MS, 1-H and 13-C NMR will be taught in lecture and put to use in identifying products in the lab. Other lab topics include the preparation of alcohols, a Grignard synthesis, an alkene addition reaction, an aromatic nitration, a Friedel-Crafts reaction, the preparation of ferrocene, and how to safely handle water-sensitive chemicals.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: CHEM 246 [Min Grade: D] or (CHEM 241 [Min Grade: D] and CHEM 244 [Min Grade: D])

CHEM 249 Organic Chemistry for Majors III 7.0 Credits
This course completes development of the basic foundation of modern organic chemistry started in CHEM 246. Lecture topics include the chemistry of aldehydes, ketones, amines, carboxylic acids & their derivatives, carbohydrates, organometallic compounds, and multi-step organic synthesis. Asymmetric synthesis and C,C-bond forming reactions will also be covered. Lab topics include the multi-step syntheses of benzocaine and DEET, stereochemical inversion, diazonium coupling, aldol condensation, sequential Diels-Alder and lactonization reactions, and the principles of functional group protection.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CHEM.
Prerequisites: CHEM 248 [Min Grade: D] or (CHEM 241 [Min Grade: D] and CHEM 245 [Min Grade: D])

CHEM 251 Physical Chemistry I 3.0 Credits
Introduces physical chemistry. Topics include quantum chemistry, operators, the uncertainty principle, deBroglie wavelength, particle in a box, hydrogen-like atoms, aufbau principle, commutators, normalization, LCAO-MO, variation principle, diatomic molecules, Hecke approximation, harmonic oscillator, conjugated systems, electronic and vibrational spectroscopy, and selection rules.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: (CHEM 102 [Min Grade: D] and MATH 200 [Min Grade: D]) or TDEC 121 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

CHEM 253 Thermodynamics and Kinetics 4.0 Credits
Covers gas properties, gas laws, state functions, first, second, and third laws of thermodynamics, phase transformations, phase diagrams, chemical equilibrium, spontaneous reactions, Gibbs free energy, molecular motion, diffusion, rates of chemical reactions, rate laws, molecular reaction dynamics, transition states, electron transfer.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D]) and MATH 200 [Min Grade: D]

CHEM 256 Physical Chemistry for Biological Sciences 4.5 Credits
Covers elementary chemical thermodynamics and homogeneous reaction kinetics as bases for experiment and phenomenology in biology and biochemistry, including properties of molecules in solution.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] or (CHEM 162 [Min Grade: D] and CHEM 164 [Min Grade: D])

CHEM 270 Software Skills for Chemists 3.0 Credits
Course covers mathematical, computational, and professionals skills useful to chemists. Representation of chemical problems in mathematical language; use of software to: solve mathematical problems that arise in chemistry; process, analyze and present data; visualize and analyze molecular structures. Also covers the American Chemical Society guidelines for professionalism in chemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D] and (PHYS 201 [Min Grade: D] or PHYS 211 [Min Grade: D])

CHEM 256 Qualitative Organic Chemistry 5.5 Credits
Covers identification of pure organic compounds, physical constants, solubilities by semi-micro techniques, infrared and nuclear magnetic resonance spectroscopy, and separation and identification of mixtures.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 243 [Min Grade: D] and CHEM 245 [Min Grade: D]

CHEM 355 Physical Chemistry IV 3.0 Credits
Computational methods of modeling molecules; Covers potential energy functions and surfaces, molecular conformations, failures of classical physics, the quantum hypothesis, the classical wave equation and the origins of the Schrodinger equation, particle-in-a-box, linear variation functions, molecular orbitals from linear combinations of atomic orbitals, Pauli principle, molecular calculations and their interpretation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D]) and (CHEM 270 [Min Grade: D] or PHYS 160 [Min Grade: D]) and (MATH 201 [Min Grade: D] or MATH 210 [Min Grade: D]) and CHEC 352 [Min Grade: D]
CHEM 356 Physical Chemistry Laboratory 2.0 Credits
Provides experiments in physical chemistry for engineering students. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 241 [Min Grade: D] (Can be taken Concurrently)

CHEM 357 [WI] Physical Chemistry Laboratory I 2.5 Credits
Provides experiments illustrative of topics included in CHEM 251 and CHEC 352. This is a writing intensive course. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D]) and (PHYS 211 [Min Grade: D] or PHYS 201 [Min Grade: D]) or CHEC 352 [Min Grade: D]

CHEM 358 Physical Chemistry Laboratory II 2.5 Credits
Continues CHEM 357.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 357 [Min Grade: D] and (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D] or CHEC 352 [Min Grade: D])

CHEM 359 Atomic and Molecular Spectroscopy 3.0 Credits
Emission and absorption of light, laser principles, optical spectrometers, atomic spectroscopy, LS-coupling, Zeeman effect, magnetic resonance spectroscopy, EPR, NMR, ENDOR, molecular spectroscopy of diatomic and polyatomic molecules, rotational, vibrational and electronic, fluorescence spectroscopy, two-photon spectroscopy, time resolved spectroscopy, photo-electron spectroscopy.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 355 [Min Grade: D]

CHEM 360 Advanced Organic Chemistry Laboratory 2.5 Credits
Emphasizes experimental design, data collection, and interpretation in such areas as reaction mechanism and molecular structure determination. Not offered every year.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 243 [Min Grade: D] and CHEM 245 [Min Grade: D]

CHEM 364 Spectroscopic Analysis 3.0 Credits
Covers interpretation of spectra for the determination of structure of organic molecules. Stresses use of infrared, nuclear magnetic resonance, and mass spectrometry. Fall. Not offered every year.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 243 [Min Grade: D]

CHEM 367 Chemical Information Retrieval 3.0 Credits
This course examines methods for retrieving literature information, via standard tabulations, journals, and abstracts, using both hard-copy and electronic sources. Includes techniques for online searching of databases such as Chemical Abstracts, Beilstein, and crystallographic depositories.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHEM 371 Chemistry of Biomolecules 3.0 Credits
This course is a chemistry-based approach to understanding the basic structure, chemical reactivity, and biological function of biomolecules – including amino acids, peptides, proteins, carbohydrates, nucleic acids, and lipids. A special emphasis will be given to topics in the frontiers of biomolecular research at the interface between chemistry and biology.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 243 [Min Grade: D]

CHEM 420 Molecular Symmetry and Group Theory Applied Chemistry 3.0 Credits
Applies the principles of simple group theory to molecular structure and to electronic and motional properties of molecules, including crystal field and molecular orbital methods.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 421 [Min Grade: D]

CHEM 421 Inorganic Chemistry I 3.0 Credits
Covers crystal, atomic, and molecular structure; modern chemical bonding; and magnetic properties of inorganic systems.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 253 [Min Grade: D] (Can be taken Concurrently)CHEM 252 [Min Grade: D] or ENGR 210 [Min Grade: D]

CHEM 422 Inorganic Chemistry II 3.0 Credits
Covers organometallic and coordination compounds, substitution mechanisms, and bio-inorganic chemistry.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 420 [Min Grade: D]

CHEM 424 Special Chemistry Problems 0.5-12.0 Credits
Allows theoretical and laboratory investigations of a particular problem of interest to the individual student. A written report may be required.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
CHEM 425 Inorganic Chemistry Laboratory 4.0 Credits
Covers synthesis of properties of inorganic compounds, magnetic measurements, spectroscopic properties, and interpretations of complex ion structure. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 422 [Min Grade: D] (Can be taken Concurrently)

CHEM 430 Analytical Chemistry I 3.0 Credits
Provides an introduction to statistics (particularly the development and use of analytic calibration curves), basic electronics, and the principles of spectroscopic methods of analysis, including the interaction of light with matter and basic instrument design.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 425 [Min Grade: D] (Can be taken Concurrently) (CHEM 230 [Min Grade: D] and CHEM 242 [Min Grade: D]) or CHEC 352 [Min Grade: D]

CHEM 431 [WI] Analytical Chemistry II 4.0 Credits
Continues CHEM 430. Covers principles of chromatographic methods of analysis. Lab includes experiments on atomic absorption, fluorescence, infrared absorption, UV/visible absorption, gas chromatography, high performance liquid chromatography, basic electronics, and potentiometry/coulometry. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 430 [Min Grade: D] or ENGR 210 [Min Grade: D]

CHEM 465 Synthetic Polymer Chemistry 3.0 Credits
Explores scope of polymer science; structure-property relations; step, free radical, cationic, group-transfer, metathesis, coordination, and ring-opening polymerizations; and stereochemistry of polymerizations and reactions of polymers.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 430 [Min Grade: D] or CHEC 352 [Min Grade: D]

CHEM 466 Physical Chemistry of Polymers 3.0 Credits
Covers kinetics and thermodynamics of polymerizations; control of polymerization processes; gelation theory; copolymerization; and determination of polymer molecular weight and distribution by membrane osmometry, light-scattering, solution viscosity, and other techniques.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 424 [Min Grade: D] and (CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D])

CHEM 467 Polymer Chemistry III 3.0 Credits
Covers spectroscopy of polymers; rubber elasticity; morphology; viscoelasticity; thermal analysis; computational methods; testing, fabrication, and processing; and magnetic and mechanical properties of polymers.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHEM 252 [Min Grade: D] or CHEM 253 [Min Grade: D] or CHEC 352 [Min Grade: D] or ENGR 210 [Min Grade: D]

CHEM 493 Senior Research Project 0.5-12.0 Credits
Provides individualized research with a faculty member in any number of chemical disciplines. Requires written report. May be repeated three times for credit.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 12 credits
Restrictions: Can enroll if major is CHEM and classification is Junior or Senior.

CHEM 497 Research 0.5-12.0 Credits
Covers research problems in several areas of chemistry. Requires written report.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CHEM.

CHEM I199 Independent Study in CHEM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CHEM.

CHEM I299 Independent Study in CHEM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CHEM.

CHEM I399 Independent Study in CHEM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CHEM.

CHEM I499 Independent Study in CHEM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CHEM.

CHEM T180 Special Topics in Chemistry 5.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 15 credits

CHEM T280 Special Topics in Chemistry 5.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 15 credits
CHEM T380 Special Topics in Chemistry 5.0 Credits
Topics decided upon by faculty will vary within the area of study.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 3 times for 15 credits

CHEM T480 Special Topics in Chemistry 5.0 Credits
Topics decided upon by faculty will vary within the area of study.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Can be repeated 3 times for 15 credits

### Chinese Courses

**CHIN 101 Chinese I 4.0 Credits**
Introductory Mandarin Chinese. Includes listening, speaking, and reading, with individual audiolingual practice. Offered all terms.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit

**CHIN 102 Chinese II 4.0 Credits**
Continues CHIN 101. Offered all terms.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 101 [Min Grade: C]

**CHIN 103 Chinese III 4.0 Credits**
Continues CHIN 102. Offered all terms.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 102 [Min Grade: C]

**CHIN 104 Chinese Speaking, Level II (Pinyin Only Track Option) 4.0 Credits**
Chinese Speaking, Level II (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. In this class, more emphasis will be given to the training of standard pronunciation and listening comprehension as well as some basic grammar and vocabulary usage. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 101 [Min Grade: C]

**CHIN 105 Chinese Speaking, Level III (Pinyin Only Track Option) 4.0 Credits**
Chinese Speaking, Level III (Pinyin Only Track Option) includes listening, speaking, reading, and some writing solely using the Chinese phonetic system: pinyin. This course will continue to introduce standard (Mandarin) Chinese to students who have had little or no previous knowledge of the language. The course is designed to help students to continue acquiring the rudimentary knowledge of Chinese and develop basic skills in listening and speaking in the language. Students will be expected to work solely in recognizing and writing pinyin, placing a much heavier emphasis on learning Chinese as a spoken language. This course is specifically designed for spoken language acquisition. Students who take Chinese Speaking, Level III will not be able to continue on to Chinese 201.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 104 [Min Grade: C]

**CHIN 201 Chinese IV 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 103.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 103 [Min Grade: C]

**CHIN 202 Chinese V 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 201.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 201 [Min Grade: C]

**CHIN 203 Chinese VI 3.0 Credits**
This course includes listening, speaking, reading, and writing practice, with a focus on cultural competency and conversational skills. Builds on CHIN 202.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 202 [Min Grade: C]

**CHIN 301 Chinese VII 3.0 Credits**
Advanced Chinese. Includes reading, writing, and extensive conversational practice. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 203 [Min Grade: C]

**CHIN 302 Chinese VIII 3.0 Credits**
Continues CHIN 301. Covers techniques of translation and communication. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** CHIN 301 [Min Grade: C]
CHIN 303 Chinese IX 3.0 Credits
Continues CHIN 302. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHIN 302 [Min Grade: C]

CHIN 411 Introduction to Chinese Stylistics 3.0 Credits
Fourth year of Chinese. Provides advanced practice in translation, comprehension, and written and oral communication. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 431 Introduction to Chinese Literature 3.0 Credits
Provides intensive reading, writing, and conversational practice in Chinese, based on selected texts in Chinese literature. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 451 Introduction to Business and Professional Chinese 3.0 Credits
Fourth year of Chinese. Provides intensive oral practice and written work in business, professional, and commercial Chinese. Offered as needed.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 8 times for 24 credits
Prerequisites: CHIN 303 [Min Grade: C]

CHIN 480 Chinese Minor Thesis Course 0.5-4.0 Credits
Independent research study on a topic selected by the student. Independent study is supervised by a faculty member and guided by a plan of study. At the end of the course, the student is required to produce a paper and oral defense on the topic of his paper.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CHIN I199 Independent Study in CHIN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN I299 Independent Study in CHIN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN I399 Independent Study in CHIN 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN I499 Independent Study in CHIN 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T180 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T280 Special Topics in Chinese 12.0 Credits
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T380 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CHIN T480 Special Topics in Chinese 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Civic Engagement

Courses

CIVC 100 Foundations of Civic Engagement 3.0 Credits
This course is designed to help students develop skills as active participants in a pluralistic democratic society through direct service, education, and reflection opportunities. It will cover key concepts and frameworks for understanding civic engagement, including: models of civic life through American history; critiques of philanthropy, volunteerism, community service, public service, and political activism; and university-community relations.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit

CIVC 101 Introduction to Civic Engagement 1.0 Credit
This course is designed to help students develop skills as active participants in a pluralistic, democratic society through direct service, education and reflection opportunities.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit

CIVC 200 Active Citizenship and Community-Based Learning 3.0 Credits
By exploring the conceptions of active citizenship and taking part in civic engagement activities, this course will examine issues regarding community-based learning experiences for today’s university students.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit
Prerequisites: CIVC 100 [Min Grade: D]

CIVC 201 Civic Engagement Leadership 3.0 Credits
This course provides experiential learning in community settings as students observe, define, analyze, and practice leadership skills.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit
Prerequisites: CIVC 100 [Min Grade: D]
CIVC 202 University-Community Partnerships 3.0 Credits
This course will examine the university as a social institution and community actor.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit
Prerequisites: CIVC 100 [Min Grade: D]

CIVC 490 Capstone Project in Civic Engagement 3.0 Credits
Under faculty supervision, students plan and execute a term project that integrates the academic and community-based knowledge acquired in their curriculum. Students define an issue and set learning objectives relevant to the project, develop a plan for implementation, and complete the term project.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC I199 Independent Study in CIVC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC I299 Independent Study in CIVC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC I399 Independent Study in CIVC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC I499 Independent Study in CIVC 1.0-3.0 Credit
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Center for Civic Engagement
Repeat Status: Not repeatable for credit

CIVC T180 Special Topics in CIVC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC T280 Special Topics in CIVC 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated 2 times for 6 credits

CIVC T380 Special Topics in CIVC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

CIVC T480 Special Topics in CIVC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Center for Civic Engagement
Repeat Status: Can be repeated multiple times for credit

Civil & Arch Engineering

Courses
CAE 491 [WI] Senior Design Project I 3.0 Credits
Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CIVE 330 [Min Grade: D] and (CIVE 301 [Min Grade: D] or CIVE 371 [Min Grade: D]) and (AE 391 [Min Grade: D] or CIVE 310 [Min Grade: D])

CAE 492 [WI] Senior Design Project II 3.0 Credits
Continues CAE 491. Requires written and oral progress reports. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CAE 491 [Min Grade: D]

CAE 493 [WI] Senior Design Project III 3.0 Credits
Continues CAE 492. Requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CAE 492 [Min Grade: D]

Civil Engineering

Courses
CIVE 240 [WI] Engineering Economic Analysis 3.0 Credits
Techniques for project decisions: benefit cost and present worth analysis, rate of return, capital budgeting, risk analysis, environmental impact, and depreciation. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CIVE 250 Construction Materials 4.0 Credits
Construction Materials:
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MEM 202 [Min Grade: D]

CIVE 251 Engineering Surveying 3.0 Credits
Covers the theory and use of surveying instruments and principles of plane and topographic surveying. Introduces computer programs for surveying computations and plotting.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
CIVE 261 Materials and Structural Behavior I 3.0 Credits
Introduces the basic materials of construction (timber, masonry, steel, and concrete). Covers their behavior as ingredients of the structural system. Required for architecture and construction management students. Fall.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE or classification is Freshman
Prerequisites: PHYS 182 [Min Grade: D]

CIVE 262 Materials and Structural Behavior II 3.0 Credits
Continues CIVE 261. Required for architecture and construction management students. Winter.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE or classification is Freshman
Prerequisites: CIVE 261 [Min Grade: D]

CIVE 263 Materials and Structural Behavior III 3.0 Credits
Continues CIVE 262. Required for architecture and construction management students. Spring.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE or classification is Freshman
Prerequisites: CIVE 262 [Min Grade: D]

CIVE 300 Structural Analysis I 4.0 Credits
Covers analysis of statically determinate structures: equilibrium, compatibility, boundary conditions, complimentary and virtual work, energy theorems, reactions, member forces and deflection of trusses, beams and frames, and influence lines. The laboratory portion will make use of structural analysis computer programs to construct analytical models of various structural systems. Calculate reactions and deflections of statically determinate and indeterminate structures and check reliability of results.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 250 [Min Grade: D] and MEM 230 [Min Grade: D]

CIVE 301 Structural Design I 3.0 Credits
This course will provide a general overview of engineering design (20%) and then a specific treatment of the structural design process (80%). The key topics to be covered include the determination of system-level loads/demands, the estimation of element-level demands and demand envelopes, and the sizing of beams and columns constructed of both reinforced concrete and structural steel.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 300 [Min Grade: D]

CIVE 302 Structural Analysis I 4.0 Credits
Covers analysis of statically determinate structures: equilibrium, compatibility, boundary conditions, complimentary and virtual work, energy theorems, reactions, member forces and deflection of trusses, beams and frames, and influence lines. The laboratory portion will make use of structural analysis computer programs to construct analytical models of various structural systems. Calculate reactions and deflections of statically determinate and indeterminate structures and check reliability of results.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 250 [Min Grade: D] and MEM 230 [Min Grade: D]

CIVE 303 Structural Design I 3.0 Credits
This course will provide a general overview of engineering design (20%) and then a specific treatment of the structural design process (80%). The key topics to be covered include the determination of system-level loads/demands, the estimation of element-level demands and demand envelopes, and the sizing of beams and columns constructed of both reinforced concrete and structural steel.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 302 [Min Grade: D]

CIVE 304 Soil Mechanics I 4.0 Credits
Gives an overview of types of problems encountered in geotechnical engineering: index, mechanical, hydraulic and environmental properties of soils; earth mass stability, deformation, and groundwater seepage; laboratory measurements.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: (EGEO 220 [Min Grade: D] or CAEE 211 [Min Grade: D]) and CIVE 250 [Min Grade: D]

CIVE 305 Introduction to Fluid Flow 3.0 Credits
Covers fundamentals of fluid flow, fluid properties, hydrostatic forces, kinematics of flow, the Bernoulli equation, linear momentum, dimensional analysis, Froude and Reynolds similarity and hydraulic models and an introduction to pipe flows and friction.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: TDEC 202 [Min Grade: D] or ENGR 210 [Min Grade: D]

CIVE 310 Hydraulics 4.0 Credits
Covers pipe flow, friction losses, multiple pipe systems, water demand and distribution network design, pumps and pumping systems, air flow in ducts and fans, open channel flows, hydraulic jumps and energy dissipation, gravity pipe networks and the design of storm and sanitary sewer systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CIVE 320 [Min Grade: D]
CIVE 370 Introduction to Structural Analysis 3.0 Credits
Covers equilibrium, virtual work, reactions, and member forces in trusses, beams, and frames. Introduces analysis of statically indeterminate structures and the stiffness matrix method of analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MEM 230 [Min Grade: D] and CIVE 250 [Min Grade: D]

CIVE 371 Introduction to Structural Design 3.0 Credits
Covers the design process, with topics including structural systems, loads and load path, structural safety, and design methods. Offers introduction to steel, reinforced concrete, wood, and masonry design.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 370 [Min Grade: D]

CIVE 372 Structural Laboratory 1.0 Credit
Course use of structural analysis computer programs to construct analytical models of various structural systems. Calculate reactions and deflections of statically determinate and indeterminate structures and check reliability of results.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Corequisite: CIVE 371

CIVE 375 Structural Material Behavior 3.0 Credits
Study of deformation, fracture and fatigue of structural materials used in infrastructure. Includes basic failure modes, yielding and plasticity, and fracture mechanics. Emphasis on analytical and predictive methods that designers use to avoid failure. Metals, ceramic and composites are considered, as is time-dependent behavior.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MEM 230 [Min Grade: D] and CIVE 250 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

CIVE 400 First Principles of Structural Design 3.0 Credits
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CIVE 303 [Min Grade: C]

CIVE 401 Structural Design II 3.0 Credits
Covers principles of design of reinforced concrete structural systems, including beams, slabs, columns, and footings.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 400 [Min Grade: D]

CIVE 402 Structural Design III 3.0 Credits
Covers elastic and plastic design of structural steel members, including beams, columns, tension members, beam columns, and plate girders; design of welded and high-strength bolted connections; and design of steel trusses, bridges, and buildings.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 401 [Min Grade: D]

CIVE 410 Foundation Engineering 3.0 Credits
Covers shear strength, bearing capacity, and lateral earth pressure; design of shallow foundations (footings, mats) and deep foundations (piles, drilled shafts); and excavation and slope stability.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CIVE 310 [Min Grade: D]

CIVE 420 Water and Waste Treatment I 3.0 Credits
Covers water supply chemistry, including corrosion in water distribution systems, microbiology of water and wastes, biodegradation of toxic materials, and growth and metabolism in wastewater treatment processes.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CIVE 330 [Min Grade: D] and CIVE 340 [Min Grade: D]

CIVE 430 Hydrology 3.0 Credits
Covers the relationship between precipitation and runoff, unit hydrographs, flood routing, and water supply principles and applications.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CAEE 211 [Min Grade: D]

CIVE 431 Hydrology-Ground Water 3.0 Credits
Covers geologic and hydrologic occurrence of groundwater, underground flow, and groundwater supply. Winter.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 330 [Min Grade: D]

CIVE 432 Water Resources Design 3.0 Credits
Covers planning and design of basin and developments for requirements of various water use purposes. Spring.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 430 [Min Grade: D]

CIVE 477 [WI] Seminar 2.0 Credits
Covers professional development and ethics.Requires preparation of a technical paper. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
CIVE 478 [WI] Seminar 1.0 Credit
Requires preparation and presentation of a technical paper. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

CIVE I499 Independent Study in CIVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CIVE I399 Independent Study in CIVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CIVE I299 Independent Study in CIVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CAEE I199 Independent Study in CAEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 220 [Min Grade: D] and CAEE 202 [Min Grade: D] and (ENGR 231 [Min Grade: D] or MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D])

Civil, Arch & Envr Engr

Courses

CAEE 202 Introduction to Civil, Architectural & Environmental Engineering 3.0 Credits
This course introduces the planning, design, construction, operation, maintenance and documentation of engineering projects that are in unique social, topographic, environmental and geologic settings. The scope and principles of Civil, Architectural and Environmental engineering practice are each presented as well as the relationships between the three disciplines. The concepts are illustrated through laboratory projects, case studies, field trips and field measurement exercises. The course also addresses professional ethics, practice and licensure.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CAEE 203 System Balances and Design in CAEE 3.0 Credits
Based on fundamental science and mathematics preparation, this course for students in Civil, Architectural and Environmental Engineering covers delineation of system boundaries, analysis of mass, energy and force balances that support system integration; life cycle and uncertainty analysis; and formulation of problem solutions using these balances.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CAEE 212 Geologic Principles for Infrastructure & Environmental Engineering 4.0 Credits
This course focuses on geological principles and their relationships to engineering properties and behavior of soil and rock materials. Topics include formation of minerals, igneous, sedimentary, and metamorphic rocks, plate tectonics, structural geology, rock mechanics, landforms and geological hazards. Labs focus on mineral and rock identification, map skills, and rock mechanics.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CAEE 202 System Balances and Design in CAEE 3.0 Credits
Based on fundamental science and mathematics preparation, this course for students in Civil, Architectural and Environmental Engineering covers delineation of system boundaries, analysis of mass, energy and force balances that support system integration; life cycle and uncertainty analysis; and formulation of problem solutions using these balances.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CAEE 361 Statistical Analysis of Engineering Systems 3.0 Credits
This class covers probability and statistics with applications to civil, architectural, and environmental engineering. Students will learn probability theory, distributions of random variables, and statistical hypothesis testing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CAEE I199 Independent Study in CAEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CAEE I299 Independent Study in CAEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Communication

Courses

COM 101 Human Communication 3.0 Credits
This course explores the elements of basic human communication - what does it mean to communicate? What makes communication good or bad? What is the nature of verbal and non-verbal messages? What does it mean to communicate in a group? How does culture affect communication?
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 111 Principles of Communication 3.0 Credits
Explores the importance of communication in organizational settings. Includes assessment of appropriate modes of communication, including written, spoken, and electronic.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 150 Mass Media and Society 3.0 Credits
Provides an overview of the history, economic structure, regulation, and impact of the mass media in the United States.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 160 Introduction to Journalism 3.0 Credits
This course is designed to acquaint students with various forms of basic newswriting and interview techniques. Students will learn how to write leads and short articles under deadline pressure. This is a writing-intensive course. Although writing is the main emphasis of this class, students also will learn newsroom organization, ethics and press law.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 181 Public Relations Principles and Theory 3.0 Credits
This course focuses on the principles of public relations. It introduces students to the theory and practice of PR taught in the context of real life material and situations. The course also covers main public relations techniques, tools, and types of publics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 102 [Min Grade: D] or ENGL 105 [Min Grade: D]

COM 200 Current Events in Media and Communication 3.0 Credits
Media are not only the channels through which we learn about current events—they are also, often, event makers themselves. This course will explore the collaborative relationships between media and current events, while exploring the topics of contemporary interest from the last 2-3 months.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
COM 210 Theory and Models of Communication 3.0 Credits
Surveys historical and contemporary attempts to understand the process of human communication, using examples from the literature of interpersonal, group, organizational, and mass communication.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 211 Children and Media 3.0 Credits
This course examines the effects of media on the well-being and development of children and adolescents from a number of perspectives, including: emotional, intellectual, and physical. Through research, discussion and writing, students consider the effects of not only the “legacy” media (television, radio, music and print), but also those of “new” media, including social media.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 220 Qualitative Research Methods 3.0 Credits
This course provides a detailed investigation of the nature, application, analysis and write up of qualitative research in communication and the social sciences, including such topics as ethnography, in-depth interviews, focus groups, participant observation, and narrative analysis.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 221 Quantitative Research Methods in Communication 3.0 Credits
This course introduces students to quantitative methods used in the study of communication. The course will help student develop techniques to understand research problems in communication settings. Students will consider applications, including survey research, content analysis, usability testing, and experimental design, and will discuss procedures for developing, operationalizing, and testing questions within communication environments.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 230 Techniques of Speaking 3.0 Credits
A workshop course in improving public speaking skills. Provides experience in speeches of explanation, persuasion, and argument.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** HUM 102 [Min Grade: D] or HUM 105 [Min Grade: D] or HUM 107 [Min Grade: D] or ENGL 102 [Min Grade: D] or ENGL 105 [Min Grade: D]

COM 240 New Technologies In Communication 3.0 Credits
Provides an overview and survey of the changes taking place in the technologies of information production, distribution, storage, and display, including the interaction of these changes with legal, social, cultural, and communications systems.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 246 Media and Identity 3.0 Credits
This course focuses on the central role that identity plays in popular culture, exploring how media reflect diverse identities and how, in turn, we use media to construct our own identities.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman

COM 251 Advanced Journalism 3.0 Credits
This course is designed for students interested in advancing their knowledge of news reporting and writing. Students will learn how to cover meetings, speeches, public affairs, such as courts, and to write for digital media. In addition, students will learn how to write human-interest stories, called features.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** COM 160 [Min Grade: D]

COM 255 Audio Journalism 3.0 Credits
This course will familiarize students with the creation of audio news and editorial content that is used not only in traditional radio broadcasting, but also in web-delivered programming such as podcasts and streamed audio. Students will learn the unique characteristics of audio journalism, practice “writing for the ear” and will record and edit digital audio.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** COM 160 [Min Grade: D] or COM 260 [Min Grade: D]

COM 266 Copy Editing for the Media 3.0 Credits
This course is designed to acquaint students with the necessary skills to prepare written materials for the media. It will cover traditional print media, magazines and online media, such as websites and blogs. The importance of accuracy, consistency, and credibility in handling written copy will be emphasized. Skills to write captivating headlines, captions and other accompaniments to visuals will be a large focus of this class.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** COM 160 [Min Grade: D]

COM 270 [WI] Business Communication 3.0 Credits
Covers the writing of business letters, resumes, memos, proposals, and reports. This is a writing intensive course.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Restrictions:** Cannot enroll if classification is Freshman
**Prerequisites:** HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 282 [WI] Public Relations Writing 3.0 Credits
In this writing-intensive course, students will develop the professional-level writing skills expected of public relations practitioners. The objectives include building an understanding of PR writing styles and genres as a persuasive influence and learning how to use basic information in different PR media kits, memos, letter, and other external and internal communications.
**College/Department:** College of Arts and Sciences
**Repeat Status:** Not repeatable for credit
**Prerequisites:** COM 181 [Min Grade: D] or COM 280 [Min Grade: D]
COM 284 Public Relations Research, Measurement and Evaluation 3.0 Credits
Public Relations research is the first essential element in the process of Public Relations. The purpose of this course is to introduce students to the methods of quantitative and qualitative research most widely used to assess an organization’s public relations efforts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 181 [Min Grade: D] or COM 280 [Min Grade: D]

COM 286 Public Relations Strategies and Tactics 3.0 Credits
This course helps students better understand the advanced concepts, strategies, and tactics practiced in public relations today. It combines real-life case studies with core theoretical ideas to help students relate theory to the actual practice of the profession. This intermediate-level course connects scholarship with time-honored real-life PR strategies and tactics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 282 [Min Grade: D]

COM 290 Sports and the Mass Media 3.0 Credits
To explore the interrelationships between professional and college sports and the mass media. Students will look at how news media coverage has changed sports, the conventions found in sports journalism, promotion and marketing of sports teams and leagues, and how sponsorship of sporting events changes the nature of these events.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 107 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 305 Sports Journalism 3.0 Credits
To gain a deeper appreciation for and understanding of the meaning-making power of sports journalism. We will explore the history of sports journalism, review and critique examples of historically significant sports writing and write game stories and columns based on actual coverage of local and on-campus sporting events.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 260 [Min Grade: D] or COM 160 [Min Grade: D]

COM 310 [WI] Technical Communication 3.0 Credits
Develops skills in communicating technical information. Focuses on writing letters, resumes, proposals, reports, and instructions. Offers extensive writing practice along with exercises and presentations. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 311 Dynamics of Interpersonal Communication 3.0 Credits
This course provides the student with a more thorough understanding of the communication dynamics between individuals. By reviewing scholarly writing on the subject and performing direct observations and analyses, students will acquire an appreciation of the complexities of interpersonal communication and enhanced communication skills.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 210 [Min Grade: D]

COM 315 Investigative Journalism 3.0 Credits
Mastery of investigative reporting tactics and strategies enables student to explore and write about issues of great importance to the community.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 260 [Min Grade: D] or COM 261 [Min Grade: D]

COM 316 Campaigns for Health & Environment 3.0 Credits
This seminar-style course explores theories and practical aspects of environmental and health campaigns and community-based social marketing campaigns. This course has a strong applied component.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

COM 317 [WI] Environmental Communication 3.0 Credits
This reading and writing intensive course will explore communication about environmental issues. Topics can include advocacy campaigns, social marketing, environmental journalism, media coverage of environmental issues, green marketing, the environment in popular culture, risk communication, and public participation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 318 Film, Celebrity and the Environmental Movement 3.0 Credits
Using the framework of mass media and behavioral change theories, we will look at the environmental movement through the lens of “eco celebrities” and mainstream environmental films and will discuss how Hollywood shapes our perceptions of the environment and whether this has helped or hurt the environmental movement.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 319 Campaigns for Health & Environment 3.0 Credits
This reading and writing intensive course will explore communication about environmental issues. Topics can include advocacy campaigns, social marketing, environmental journalism, media coverage of environmental issues, green marketing, the environment in popular culture, risk communication, and public participation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 320 [WI] Science Writing 3.0 Credits
A workshop course in writing on scientific subjects. Includes analysis of the current market for science writing; examination of exemplary pieces of science writing; instruction in finding article ideas, interviewing, and working with editors; and production of feature-length articles. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]
COM 325 The Cultural Significance of Fame 3.0 Credits
We will explore why fame is so important to us. Why do so many of us want it so badly? Why do we envy those who have it? What does the pursuit of fame say about us and about society? You will explore your own perception of fame, dissect your fame-related experiences, and analyze how the mass media keep us thinking and talking about fame.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 150 [Min Grade: D]

COM 330 Professional Presentations 3.0 Credits
A workshop course in the theory and practice of making effective professional presentations for the technical and business professional. Provides a systems approach to the planning, production, and presentation of visual/aural programs.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: COM 230 [Min Grade: D]

COM 335 Electronic Publishing 3.0 Credits
Electronic Publishing gives students applied and theoretical knowledge of professional electronic publishing. Students will focus on issues relating to writing and integrating text and graphics to create websites and on-line publications. Students will also consider how issues in document design and usability can be used to evaluate websites.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D] or HUM 103 [Min Grade: D] or HUM 105 [Min Grade: D] or HUM 108 [Min Grade: D]

COM 340 Desktop Publishing 3.0 Credits
Covers production of publications using desktop publishing software, including planning, writing, designing, and budgeting of institutional magazines, newsletters, manuals, and brochures. Requires students to design several pieces (letterheads and flyers).

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 342 English Worldwide 3.0 Credits
This course provides an overview of the spread of English globally, by examining English as a language of trade, diplomacy, and education, as well as its status as an aesthetic and market force. For a final project, students research how English is utilized for social, economic, and political purposes in a single area of the world.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 345 Intercultural Communication 3.0 Credits
This course introduces students to the theory and practice of intercultural communication. Drawing from traditions in anthropology and communication, intercultural communication is the study of the effect of differing cultural norms and beliefs upon communication between speakers. Through a wide range of readings, journal writing assignments, and participative and experiential activities, students will develop both their understanding of and skills in inter-cultural communication. A final project and presentation draws together participative experiences and the readings and class discussions.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

COM 350 [WI] Document Design and Evaluation 3.0 Credits
Introduces the principles and practice of designing documents and measuring their effectiveness with audiences. This is a writing intensive course.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

COM 351 Computer Mediated Communication 3.0 Credits
We focus on practices and affordances of Computer Mediated Communication (CMC). We consider how computer technology is used in social interaction and its practical consequences. We focus on social practices and uses of technology. We use qualitative methods of analysis to understand the practices of CMC.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: COM 220 [Min Grade: D]

COM 352 Social Media and Communication 3.0 Credits
Social Media provide a communication system for connecting, collaborating and building community. We will examine how these functions may be applied in personal, professional and political contexts. Activities will include readings, case studies and discussions. Students will create a strategic plan for using social media for personal, organizational or political purposes.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

COM 355 Ethnography of Communication 3.0 Credits
Examines theories and methods of qualitative language and communication studies. Topics include story telling, greetings, gossip, self-presentation in talk, language of ritual and religion, men and women's roles in communication, and communicative events and competence. Case student in literature will be analyzed and will form a basis for the students' own ethnographic fieldwork.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]
COM 360 International Communication 3.0 Credits
Examines the political, cultural, technological, and economic processes and effects of international communication flow.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman or Sophomore

COM 361 International Public Relations 3.0 Credits
The course is designed to give students a comprehensive overview of international issues in PR including such areas as: history and evolution of the field of international PR; image-formation and image-changes process; PR in war and conflict; as well as effect of different political and legal systems on the field of public relations.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Prerequisites: HUM 103 [Min Grade: D] or HUM 105 [Min Grade: A] or HUM 108 [Min Grade: D] or ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

COM 362 International Negotiations 3.0 Credits
This course is designed to give students a comprehensive overview of the field including different theoretical points of view on the process of international negotiations; the role of perceptions in this process; the role of internal politics and cultural variables in the process of international negotiations.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.

COM 363 Event Planning 3.0 Credits
This course will provide the student with the theoretical and practical fundamentals in understanding the complexities of producing Special Events across all major industries. Special Events addresses all elements of the communication process.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 365 Journalists, the Courts, and the Law 3.0 Credits
Students explore and apply techniques for covering the court system, and explore case law and recent key legal developments that have reshaped how journalists do their jobs.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Prerequisites: COM 260 [Min Grade: D] or COM 160 [Min Grade: D]

COM 375 [WI] Grant Writing 3.0 Credits
Students explore the grant writing process, from the development of an idea and researching appropriate contributors, to writing a fully realized grant proposal, complete with budget. Course topics also include surveying the political and social climate before developing an idea, assessing an organization's capabilities to handle a project, and performing through literature reviews. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman

Prerequisites: COM 270 [Min Grade: D] or COM 310 [Min Grade: D] or SOC 260 [Min Grade: D]

COM 376 Nonprofit Communication 3.0 Credits
All nonprofit organizations must develop and maintain effective communication strategies in order to survive in a competitive economy. Nonprofits have unique needs and limitations in their longterm goals and short-term operations that relate to communication. This course introduces students to the ways nonprofits communicate with both their constituents and their benefactors and the ways researchers have examined these practices. Students will explore these two perspectives on nonprofit communication through a combination of scholarly readings, dialogues with local representatives in the nonprofit sector, and direct contact and work for a local nonprofit organization (as coordinated by the Drexel Center for the Support of Nonprofit Communication).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman

COM 377 Communication for Civic Engagement 3.0 Credits
Extremist rhetoric and divisive politics seem to go hand-in-hand in today's public deliberations. The media so often pair the word rhetoric itself with the pejorative adjectives mere, empty, and deceptive, that anything rhetorical becomes vilified. This course draws from the ancient accounts of rhetoric and the contemporary studies on rhetoric to rehabilitate it as a way to inform our efforts towards a more civil public discourse. This course also will host guest speakers from local civic and political organizations who engage in rhetorical practices in the service of civic engagement, which includes the discourse both of people who exercise political power and of citizens who debate over public policies and cultural identity.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman

COM 378 Public Service Campaigns 3.0 Credits
Public communication campaigns are a familiar and essential part of American civic culture. Campaign topics range from personal issues, such as health, to social issues, such as equal opportunity, energy conservation, and environmental protection. Campaigns are regarded as public service programs if their goals are widely supported by the public and policymakers. If their goals are controversial, however, then they are regarded as advocacy strategies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman

COM 379 Public Service Campaigns 3.0 Credits
Public communication campaigns are a familiar and essential part of American civic culture. Campaign topics range from personal issues, such as health, to social issues, such as equal opportunity, energy conservation, and environmental protection. Campaigns are regarded as public service programs if their goals are widely supported by the public and policymakers. If their goals are controversial, however, then they are regarded as advocacy strategies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

Restrictions: Cannot enroll if classification is Freshman

COM 380 Special Topics in Communication Theory 1.0-5.0 Credit
Provides advanced communication studies covering various subjects in interpersonal, group, organizational, and mass communication. May be taken for credit twice.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Restrictions: Cannot enroll if classification is Freshman
COM 384 Free Speech & Censorship 3.0 Credits
In this course, students will explore the various forms --some obvious, some not-- that censorship takes. Also explored will be what those who hold dissenting views endure as they try to contribute to the national dialogue. Historical and legal perspective on censorship will also be considered.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore

COM 385 Media Effects 3.0 Credits
Some people believe that the mass media rule our lives, making us fat, violent, sexist, etc. Some think that media are irrelevant. Of course these arguments are extreme and simplifications. In this course, we ask: What are the facts regarding media effects research?
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

COM 386 Public Relations Campaign Planning 3.0 Credits
This capstone course will focus on the advanced aspects of public relations: how to analyze, plan, conduct, and implement successful public relations campaigns systematically and scientifically. Students will create full-scale PR campaigns, including budget, media materials, and social media tools, for their real-world "clients," and implement key activities.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: COM 284 and COM 286

COM 390 [WI] Global Journalism 3.0 Credits
Explores the issues facing journalists covering foreign affairs. Students will research and write news stories on issues of global import and will examine the work of foreign correspondents from historical and critical perspectives. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: COM 260 [Min Grade: D] or COM 261 [Min Grade: D]

COM 391 Critiques of Journalism and News Media 3.0 Credits
This course examines the role of journalism and news media in the social construction of our world. Focusing on key topics like framing and agenda setting in media research, we will critically consider how stories are routinely emphasized, excluded, organized, made sense of, and accumulate, plus more. We will discuss such topics in regard to various media (from newspapers to new media), various methods (qualitative and quantitative), and various public issues (including politics, music, sports, and representation of race/gender/sexuality/etc.).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: COM 150 [Min Grade: D]

COM 400 Seminar in Communication 3.0 Credits
This is an upper-level seminar in various topics in Communication, including but not limited to Rhetoric. Students will undertake an in-depth examination of critical texts or themes in Communication. The course is intended for upper-level majors in Communication and can be repeated for credit with a different topic.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 4 times for 12 credits
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: COM 210 [Min Grade: D]

COM 410 [WI] Advanced Technical Writing 3.0 Credits
Continues COM 310. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: COM 310 [Min Grade: D]

COM 420 Technical and Science Editing 3.0 Credits
Introduces the theory and practice of technical editing, including project and copy editing.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: COM 270 [Min Grade: D] or COM 310 [Min Grade: D] or COM 375 [Min Grade: D] or COM 410 [Min Grade: D]

COM 491 Senior Project in Communication I 3.0 Credits
Covers planning and execution of a professional project that integrates the academic and practical knowledge the student has acquired in his or her major.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Junior or Senior.
Prerequisites: COM 210 [Min Grade: D] and (COM 220 [Min Grade: D] or SOC 250 [Min Grade: D])

COM 492 Senior Project in Communication II 3.0 Credits
Requires completion and evaluation of the project begun in COM 491.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is COMM and classification is Senior.
Prerequisites: COM 491 [Min Grade: D]

COM I199 Independent Study in COM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

COM I299 Independent Study in COM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
COM I399 Independent Study in COM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

COM I499 Independent Study in COM 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

COM T180 Special Topics in Communication Theory 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

COM T280 Special Topics in Communication Theory 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

COM T380 Special Topics in Communication Theory 1.0-5.0 Credit
Provides advanced communication studies covering various subjects in interpersonal, group, organizational, and mass communication. May be taken for credit twice.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

COM T480 Special Topics in Communication Theory 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

Communications & Applied Tech

Courses

CAT 200 Strategies for Lifelong Learning 3.0 Credits
Strategies for Lifelong Learning. This course introduces students to the skills necessary for successful lifelong learning. Theoretical and practical aspects of learning are explored. Emphasis is placed on critical thinking, study skills, analytical reading, effective writing, reasoning, problem-solving, time management and strategies for management necessary to support learning in a college environment.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit

CAT 201 [WI] Interpersonal Communication 3.0 Credits
Interpersonal Communication. Interpersonal communication will be studies from the perspective of emotional intelligence. Particular emphasis will be placed on emotional intelligence in the workplace and in leadership. The main objective is to make students aware that intelligence and technological expertise are not enough to be successful in the workplace. This is a writing intensive course.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit

CAT 215 Emerging Trends of Video Games 3.0 Credits
Course examines the importance of the video game industry in today's world including an overview of current video game industry, the motivation for playing video games and the associated consequences. The role of video games from an international perspective also is examined.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit

CAT 302 Customer Service Theory and Practice 3.0 Credits
Customer Service Theory and Practice. This course focuses on the theory of customer service and the practices that "best in class" companies apply to differentiate themselves from the competition. The course includes practical information and activities designed to teach students how to respond to customers, resolve problems, and provide quality customer service.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CAT 303 Client Relations Management 3.0 Credits
Client Relations Management. This course introduces the skills that facilitate and enhance client relations management. Topics covered include building a trusting relationship, evaluating and managing expectations and needs, managing conflict, understanding the client's perspective, customer life cycle, consulting, serving public sector versus private sector clients, managing client relations managers, and ethical issues.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CAT 315 Expressive Power of Video Games 3.0 Credits
Course focuses on the effects of video games from a multidisciplinary perspective including how video games have transformed social interactions. Emphasis placed on the importance of video games as a persuasive communication medium.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CAT 360 Applied Organizational Research 3.0 Credits
Applied Organizational Research. This course presents a systematic approach to managerial methods of conducting organizational research and analysis. Students will undergo the managerial research process of specifying the problem; translating the problem into specific research questions; designing the data collection and methodology; collecting, analyzing, and interpreting data; and reporting research results and recommendations.
College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
CAT 491 Senior Project in Communications and Applied Technology
3.0 Credits
Senior Project CAT I. Covers planning and execution of a professional project that integrates the academic and practical knowledge the student has acquired in his or her major. Requires a formal written report and a formal oral presentation. This is part one of a two-course sequence.

College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: (CAT 301 [Min Grade: D] or PROJ 301 [Min Grade: D]) and CAT 360 [Min Grade: D] and COM 230 [Min Grade: D] and COM 270 [Min Grade: D] and ORGB 300 [Min Grade: D]

CAT 492 Senior Project in Communications and Applied Technology
3.0 Credits
Senior Project CAT II. Covers planning and execution of a professional project that integrates the academic and practical knowledge the student has acquired in his or her major. Requires a formal written report and a formal oral presentation. This is part two of a two-course sequence.

College/Department: Goodwin College of Professional Studies
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CAT 491 [Min Grade: C]

CAT I999 Independent Study in CAT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT I299 Independent Study in CAT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT I399 Independent Study in CAT 0.5-6.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated 3 times for 18 credits

CAT I499 Independent Study in CAT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT T180 Special Topics in CAT 1.0-4.0 Credit
Topics decided upon by faculty will vary within the area of study.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT T280 Special Topics in CAT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT T380 Special Topics in CAT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CAT T480 Special Topics in CAT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

Complementary and Integrative Therapies

Courses

CIT 336 Introduction to Complementary & Integrative Therapies 3.0 Credits
This course provides the underpinning philosophy and practice of complementary and integrative therapies (CIT). It presents an overview of the major categories including herbal medicine, clinical aromatherapy, mind-body interventions and the role of spirituality in health and healing. In addition, students explore effective relaxation techniques that help to integrate the mind-body-spirit connection, which support health and well-being.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CIT 345 Holistic Self-Care 3.0 Credits
Holistic Self-Care provides students with an A-Z approach to “living” a holistic, balanced life, complete with step-by-step guidelines necessary to incorporate dietary and lifestyle changes and effective stress reduction and stress management techniques to assist in navigating through the common challenges associated with student life and beyond. Students will be required to purchase a “Holistic Student Stress Reduction Kit”, complete with specific essential oils, Meditation DVD, and guided stress reduction techniques.

College/Department: College of Nursing Health Professions
Repeat Status: Not repeatable for credit

CIT 480 Special Topics in Complementary and Integrative Therapies 3.0 Credits
This course consists of content that faculty or students have requested to meet undergraduate special needs or interests. Content is variable and is offered on a one-time, infrequent, or trial basis. Actual course description will be determined by the course director. May be repeated for credit if the topics vary.

College/Department: College of Nursing Health Professions
Repeat Status: Can be repeated 2 times for 9 credits
Computer Science

Courses

CS 140 Introduction to Multimedia Programming 3.0 Credits
Introduction to structured computer programming in a language designed for working with media (images, sound, video), e.g. Python/Jython. Topics include: variables, input and output, expressions, assignment statements, conditionals and branching, files, repetition, functions and parameter passing, one-dimensional and two-dimensional arrays, and media manipulation. Stresses good programming style, documentation, debugging, and testing.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CS 143 Computer Programming Fundamentals 3.0 Credits
Introduction to structured computer programming in the language of instruction (e.g. C++). Topics include: variables, input and output, expressions, assignment statements, conditionals and branching, files, repetition, functions and parameter passing, arrays, and string manipulation. Stresses good programming style, documentation, debugging and testing.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CS 161 Introduction to Computing 3.0 Credits
Introduction to the computer as a tool for productivity and communications. Provides fluency in the use of industry-standard software for professional communications and presentations, data analysis, and telecommunication. Introduce automation and programming to enhance the effective use of computers and computer applications.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Corequisite: EXAM 080

CS 164 Introduction to Computer Science 3.0 Credits
An introduction to the field of computer science. Exposure to core areas (selected from algorithms, artificial intelligence, computer architecture, databases, graphics, human-computer interaction, programming languages, scientific computation, software engineering) while introducing and reinforcing the importance of programming.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CS or major is MATH or major is SE.
Corequisite: EXAM 080

CS 171 Computer Programming I 3.0 Credits
Introduces fundamental concepts of computing including memory, instructions, function calls, and activation records. Covers fundamentals of structured computer programming in the language of instruction: variables, input and output, expressions, assignment statements, conditionals and branching, subprograms, parameter passing, repetition, arrays, top-down design, testing, and debugging.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Corequisite: EXAM 080

CS 172 Computer Programming II 3.0 Credits
Covers object-oriented design, inheritance hierarchies, information hiding principles, string processing, recursion, good programming style, documentation, debugging, and testing.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 171 [Min Grade: C] or CS 132 [Min Grade: C] or CS 175 [Min Grade: C]
Corequisite: EXAM 080

CS 175 Advanced Computer Programming I 3.0 Credits
Advanced programming in language of instruction at an accelerated pace: introduces fundamental concepts of computing including memory, instructions, function calls, and activation records. Covers fundamentals of structured computer programming in the language of instruction: conditionals and branching, subprograms, parameter passing, repetition, arrays, top-down design, testing, and debugging. Supplements basic topics with deeper presentation of advanced techniques for those with some incoming programming experience.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CS 172 Advanced Computer Programming II 3.0 Credits
Enhanced presentation of object-oriented design, inheritance hierarchies, information hiding principles, string processing, recursion, good programming style, documentation, debugging and testing. Includes special focus on language facilities and use of libraries.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 171 [Min Grade: C] or CS 175 [Min Grade: C]

CS 176 Advanced Computer Programming II 3.0 Credits
Enhanced presentation of object-oriented design, inheritance hierarchies, information hiding principles, string processing, recursion, good programming style, documentation, debugging and testing. Includes special focus on language facilities and use of libraries.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 171 [Min Grade: C] or CS 175 [Min Grade: C]

CS 190 Selected Computer Language 3.0 Credits
Focuses on programming in a selected language of interest. Course content, language, and prerequisites may vary according to instructor, with emphasis on applications for which the language is designed. May be repeated for credit.

College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

CS 260 Data Structures 3.0 Credits
Covers stacks, queues, linked allocation, binary trees, internal searching and sorting, hashing, and applications.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 265 [Min Grade: D]

CS 265 Advanced Programming Tools and Techniques 3.0 Credits
Introduction to the basic principles of programming practice: testing, debugging, portability, performance, design alternatives, and style. Application in a variety of programming languages, programming environments, and operating systems. Introduction to tools used in the software development process for improving program functionality, performance, and robustness.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or CS 133 [Min Grade: D] or SE 103 [Min Grade: D] or ECEC 301 [Min Grade: D]
CS 200 Mathematical Foundations of Computer Science 3.0 Credits
Introduces formal logic and its connections to Computer Science. Students learn to translate statements about the behavior of computer programs into logical claims and to prove such assertions using both traditional techniques and automated tools. Considers approaches to proving termination, correctness, and safety for programs. Discusses propositional and predicate logic, logical inference, recursion and recursively defined sets, mathematical induction, and structural induction.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or CS 265 [Min Grade: D] or SE 103 [Min Grade: D] or ECEC 301 [Min Grade: D]

CS 275 Web and Mobile App Development 3.0 Credits
This course introduces students to web-based and mobile development technologies and practices, including tiered application development, Service-Oriented Architectures and associated exchange protocols, and web-database programming. This course explores development and integration of web services from well-known providers as well as services created by the student, using a mobile platform as a vehicle for interactions with the services.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 265 [Min Grade: D]

CS 281 Systems Architecture 4.0 Credits
Covers internal function and organization of digital computers, including instruction sets, addressing methods, input-output architectures, central processor organization, machine language, and assembly language.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: (CS 270 [Min Grade: D] or ECE 200 [Min Grade: D]) and (CS 172 [Min Grade: D] or CS 176 [Min Grade: D] or SE 103 [Min Grade: D])

CS 283 Systems Programming 3.0 Credits
This course introduces computer systems, including interaction of hardware and software through the operating system, from the programmer's perspective. Three fundamental abstractions are emphasized: processes, virtual memory, and files. These abstractions provide programmers a common interface to a wide variety of hardware devices. Topics covered include linking, system level I/O, concurrent programming, and network programming.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 265 [Min Grade: D]

CS 300 Applied Symbolic Computation 3.0 Credits
This course covers the fundamentals of symbolic mathematical methods as embodied in symbolic mathematics software systems, including: fundamental techniques, simplification of expressions, solution of applications problems, intermediate expressions swell, basic economics of symbolic manipulation, efficient solution methods for large problems, hybrid symbolic/numeric techniques.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 270 [Min Grade: D] and MATH 200 [Min Grade: D] and MATH 201 [Min Grade: D]

CS 303 Algorithmic Number Theory and Cryptography 3.0 Credits
Covers fundamental algorithms for integer arithmetic, greatest common divisor calculation, modular arithmetic, and other number theoretic computations. Algorithms are derived, implemented and analyzed for primality testing and integer factorization. Applications to cryptography are explored including symmetric and public-key cryptosystems. A cryptosystem will be implemented and methods of attack investigated.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and MATH 221 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

CS 338 Graphical User Interfaces 3.0 Credits
This course covers the design and implementation of graphical user interfaces. Topics include: event-driven programming, application programmer interfaces, widgets, callback functions, windowing systems and desktops, rapid prototyping languages, multithreaded GUI’s. A term project involving implementation of a complex application will be undertaken.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 350 [Min Grade: D] or SE 310 [Min Grade: D]

CS 345 Computer Game Design and Development 3.0 Credits
This course introduces students to the computer game design process. Students also learn how the individual skills of modeling, animation, scripting, interface design and story telling are coordinated to produce interactive media experiences for various markets, devices and purposes.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: (DIGM 260 [Min Grade: D] or GMAP 260 [Min Grade: D]) and (CS 265 [Min Grade: D] or DIGM 141 [Min Grade: D])

CS 347 Experimental Game Development 3.0 Credits
The goal of this course is to develop new ideas and innovations in games through the design, development, and implementation of games using short development cycles and creative thematic constraints.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 345 [Min Grade: D], GMAP 345 [Min Grade: D] (Can be taken Concurrently)

CS 348 Serious Game Development 3.0 Credits
The goal of this course is to learn more about serious games, that is games used in a non-entertainment context, such as games for health, education, and persuasion, through readings and through the design, development, and implementation of serious games.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 345 [Min Grade: D], GMAP 345 [Min Grade: D] (Can be taken Concurrently)
CS 350 [WI] Software Design 3.0 Credits
Covers software design methods and implementation. Good design and implementation approaches will be motivated through software examples and reinforced through programming projects. Topics include architectural styles, code reuse, modularity and information hiding principles, object-oriented design patterns, design specification and formal methods, good coding and documentation practices. This is a writing intensive course.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: CS 260 [Min Grade: D] and CS 380 [Min Grade: D]

CS 352 Processor Architecture & Analysis 3.0 Credits
This course covers performance evaluation and benchmarking, pipelining, superscalar processors, multiprocessors, and interfacing processors and peripherals. The memory hierarchy, including cache and virtual memory, are also explored from a programmer's perspective with high-performance computing techniques in mind.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 281 [Min Grade: D] or ECEC 355 [Min Grade: D]

CS 360 Programming Language Concepts 3.0 Credits
Introduces the design and implementation of modern programming languages: formal theory underlying language implementation; concerns in naming, binding, storage allocation and typing; semantics of expressions and operators, control flow, and subprograms; procedural and data abstraction; functional, logic, and object-oriented languages. Students will construct an interpreter for a nontrivial language.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 265 [Min Grade: D] and CS 270 [Min Grade: D]

CS 361 Concurrent Programming 3.0 Credits
Covers programming of concurrent, cooperating sequential processes. Studies race conditions, critical sections, mutual exclusion, process synchronization, semaphores, monitors, message passing, the rendezvous, deadlock, and starvation.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 260 [Min Grade: D] and CS 281 [Min Grade: D]

CS 365 System Administration 3.0 Credits
Fundamentals of system administration featuring hands-on practice with an industry standard operating system. Focus on installation, maintenance and management of several systems for multi-user environments.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 265 [Min Grade: D]

CS 370 Operating Systems 3.0 Credits
Explores the internal algorithms and structures of operating systems: CPU scheduling, memory management, file systems, and device management. Considers the operating system as a collection of cooperating sequential processes (servers) providing an extended or virtual machine that is easier to program than the underlying hardware. Topics include virtual memory, input/output devices, disk request scheduling, deadlocks, file allocation, and security and protection.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 283 [Min Grade: D]

CS 377 Software Security 3.0 Credits
Examines ways to avoid and correct programming flaws that lead to software security vulnerabilities in web applications, code implementation, user interfaces, use of cryptography, concurrency and exception handing. It also exposes students to testing processes that are specifically targeted to uncovering security flaws.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 283 [Min Grade: D]

CS 380 Artificial Intelligence 3.0 Credits
Explores the foundations of artificial intelligence: production systems, heuristic programming, knowledge representation, and search algorithms. Also covers programming in an AI language. Additional topics chosen from game theory, decision support systems, pattern matching and recognition, image understanding, natural language, fuzzy and non-monotonic logic, machine learning, theorem proving, and common sense reasoning.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 260 [Min Grade: D] and CS 270 [Min Grade: D]

CS 383 Machine Learning 3.0 Credits
This course covers the fundamentals of modern statistical machine learning. Lectures will cover the theoretical foundation and algorithmic details of representative topics including probabilities and decision theory, regression, classification, graphical models, mixture models, clustering, expectation maximization, hidden Markov models, and weak learning.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 380 [Min Grade: D]

CS 385 Evolutionary Computing 3.0 Credits
This course covers computational intelligence approaches to problem solving for classification, adaptation, optimization, and automated control. Methods covered will include evolutionary programming/genetic algorithms, genetic programming, neural networks, swarm optimization, and fuzzy logic.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 380 [Min Grade: D]
CS 387 Game AI Development 3.0 Credits
This course focuses on artificial intelligence (AI) techniques for computer games. Students will learn both basic and advanced AI techniques that are used in a variety of game genres including first-person shooters, driving games, strategy games, platoformers, etc. The course will emphasize the difference between traditional AI and game AI, the latter having a strong design component, focusing on creating games that are “fun to play.” Topics include path-finding, decision-making, strategy and machine learning in games.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 380 [Min Grade: D]

CS 430 Computer Graphics 3.0 Credits
The course presents the fundamental geometric representations and drawing algorithms of computer graphics through lectures and programming assignments. The representations include lines, curves, splines, polygons, meshes, parametric surfaces and solids. The algorithms include line drawing, curve and surface evaluation, polygon filling, clipping, 3D-to-2D projection and hidden surface removal.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

CS 431 Advanced Rendering Techniques 3.0 Credits
The creation of realistic images from 3D models is central to the development of computer graphics. The ray tracing algorithm has become one of the most popular and powerful techniques for creating photorealistic images. This class explores the algorithmic components of ray tracing. Students implement many of these components in their class programming projects.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 430 [Min Grade: D] or CS 432 [Min Grade: D]

CS 432 Interactive Computer Graphics 3.0 Credits
This is a project-oriented class that covers the concepts and programming details of interactive computer graphics. These include graphics primitives, display lists, picking, shading, rendering buffers and transformations. Students will learn an industry-standard graphics system by implementing weekly programming assignments. The course culminates with a student-defined project.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

CS 435 Computational Photography 3.0 Credits
Fundamentals of computational photography, an interdisciplinary field at the intersection of computer vision, graphics, and photography. Covered topics include fundamentals of cameras, novel camera designs, image manipulation, single-view modeling, and image-based rendering with an emphasis on learning the computational methods and their underlying mathematical concepts through hands-on assignments.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and (MATH 201 [Min Grade: D] or MATH 261 [Min Grade: D] or ENGR 231 [Min Grade: D])

CS 440 Theory of Computation 3.0 Credits
Finite automata, regular sets, and regular expressions; pushdown automata, context-free languages, and normal forms for grammars; Turing machines and recursively enumerable sets; Chomsky hierarchy; computability theory.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: CS 270 [Min Grade: D] and MATH 221 [Min Grade: D]

CS 441 Compiler Workshop I 3.0 Credits
Design and implementation of compiler for specified language. Practical application and in-depth study of parsing, scanning, run-time storage management, type analysis, code generation, and error recovery.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: CS 270 [Min Grade: D] and CS 283 [Min Grade: D] and CS 360 [Min Grade: D] and CS 440 [Min Grade: D]

CS 442 Compiler Workshop II 3.0 Credits
Continuation of CS 441. Advanced topics in compilation, code generation, and optimization for various programming languages and paradigms.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: CS 441 [Min Grade: D]

CS 445 Topics in Computer Gaming 3.0 Credits
Contemporary topics in the design and implementation of computer games. Topics may include game genres, psychological and sociological aspects of games, software tools and game development engines, character and behavior modeling, physical models and realism, virtual reality, graphics and animation, network-based games, performance analysis and efficiency.

College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 3 times for 9 credits
Prerequisites: CS 345 [Min Grade: D] or DIGM 345 [Min Grade: D]

CS 451 Software Engineering 3.0 Credits
Covers requirements specification, system modeling, formal methods, architectural design, object-oriented design, programming for reliability, user interface design, functional and structural testing, software reuse, and configuration management.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 270 [Min Grade: D] and MATH 221 [Min Grade: D] and (CS 350 [Min Grade: D] or SE 310 [Min Grade: D])

CS 457 Data Structures and Algorithms I 3.0 Credits
This course covers techniques for analyzing algorithms, including: elementary combinatorics, recurrence relations, and asymptotic analysis; data structures such as hash tables, red-black trees, binomial and Fibonacci heaps, union-find trees; sorting algorithms and elementary graph algorithms.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 260 [Min Grade: D] and CS 270 [Min Grade: D] and MATH 221 [Min Grade: D]
CS 458 Data Structures and Algorithms II 3.0 Credits
This course presents algorithm design techniques such as dynamic programming, greedy methods, divide and conquer, amortized algorithms; more graph algorithms for minimum spanning trees, shortest paths, and network flows; string matching algorithms; algorithms for finding the convex hull of a discrete set of points; NP-Completeness and approximation algorithms.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 457 [Min Grade: D]

CS 461 Database Systems 3.0 Credits
Covers topics including structure and function of database systems, normal form theory, data models (relational, network, and hierarchical), query processing (ISBL), relational algebra and calculus, and file structures. Includes programming project using DBMS.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 260 [Min Grade: D]

CS 465 Privacy and Trust 3.0 Credits
This course will motivate the need for privacy protection and introduce basic privacy properties such as anonymity, unlinkability or unobservability. We will then discuss how these properties can be formalized, modeled and measured. The course will provide a broad overview of the state-of-the-art in privacy technologies, explain the main issues that these technologies address, what the current solutions are able to achieve, and the remaining open problems.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 303 [Min Grade: D]

CS 467 Security and Human Behavior 3.0 Credits
Humans are usually the weakest link in information security. Technical measures are easily thwarted by end-user decisions. How are end user decisions made? This course examines security decisions online from the distinct perspective of economics, psychology, anthropology, evolutionary biology, and criminology. We will address topics such as System I vs. System II, mental models, risk perceptions, safety engineering, groups behaviors in primates.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: (INFO 110 [Min Grade: D] or INFO 310 [Min Grade: D]) and PSY 101 [Min Grade: D] and ECON 201 [Min Grade: D]

CS 470 Operating Systems Workshop 3.0 Credits
Studies a modern multitasking operating system in detail, including device drivers, CPU scheduling, memory management, and file systems. Includes programming assignments that modify or enhance the operating system.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 370 [Min Grade: D]

CS 472 Computer Networks: Theory, Applications and Programming 3.0 Credits
Introduction to computer networking theory, applications and programming, focusing on large heterogeneous networks. Broad topdown introductions to computer networking concepts including distributed applications, socket programming, operation system and router support, router algorithms, and sending bits over congested, noisy and unreliable communication links.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 361 [Min Grade: D] or CS 283 [Min Grade: D]

CS 475 Computer and Network Security 3.0 Credits
The key objective of this course is to provide a thorough understanding of technologies and methodologies with which computer networks can be protected. Topics that are covered include: key management and credentials, steganography and watermarking, networking security (VPNs, firewalls, intrusion detection) and system security policies.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 472 [Min Grade: D] or CS 283 [Min Grade: D]

CS 476 High Performance Computing 3.0 Credits
This course is an introduction to high performance computing, including concepts and applications. Course contents will include discussions of different types of high performance computer architectures (multicore/multi-threaded processors, parallel computers, etc), the design, implementation, optimization and analysis of efficient algorithms for uniprocessors, multi-threaded processors, parallel computers, and high performance programming.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: (CS 281 [Min Grade: D] and CS 283 [Min Grade: D]) or (ECEC 353 [Min Grade: D] and ECEC 355 [Min Grade: D])

CS 479 Advanced Network Security 3.0 Credits
A study of what it takes to make a network secure, starting with an analysis of the sometimes conflicting goals (e.g. anonymity vs. traceability) through the mechanisms that can be used to achieve these goals. Covers in depth both the design options available and the design decisions made in various deployed systems, including Kerberos, IPsec, SSL, and X.509.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 475 [Min Grade: D]

CS 481 Advanced Artificial Intelligence 3.0 Credits
This course covers topics in representation, reasoning, and decision-making under uncertainty; learning; solving problems with time-varying properties. Assignments applying AI techniques toward building intelligent machines that interact with dynamic, uncertain worlds will be given.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 380 [Min Grade: D] and (MATH 311 [Min Grade: D] or MATH 410 [Min Grade: D])
Computing Technology

Courses

CT 100 Microcomputer Hardware 3.0 Credits
This course imparts to the student knowledge of microcomputer hardware by providing instruction on system configuration, installation, upgrades, diagnosis, repair, preventive maintenance, and safety.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 120 Microcomputer Operating System 3.0 Credits
Prepares students for DOS/Windows with a brief introduction to networking. Students learn installation procedures and how to deal with current and legacy systems, create and use emergency boot systems, and manage printers and other devices. Students install Windows operating systems, manage window devices and configuration utilities, use the FDISK utility, perform backups, manage system files, configure network and internet access, and troubleshoot operating system errors.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 100 [Min Grade: D]

CT 200 Server I 3.0 Credits
Topics include advanced PC hardware and server issues, including RAID, SCSI, troubleshooting and problem determination, upgrading, configuration, and disaster recovery. The second part of this course is an introduction to Apache Server concepts. Topics include: installations, configuration and administration in environments such as Windows and Linux.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 100 [Min Grade: D] or INFO 101 [Min Grade: D]

CT 210 Open Server I 3.0 Credits
Introduces students to the principles and practices of administering a Linux server. Students will: install, verify, and modify software packages, access resources on other servers, configure NFS, integrate Linux servers with other platforms, setup DNS, configure network interfaces, examine system scripts, examine boot options and Graphical User Interfaces.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 212 Computer Forensics I: Fundamentals 3.0 Credits
This course presents the theory, methodology and hands-on labs necessary for students to become competent in the basics of computer forensics. Topics covered include: understanding computer investigations, the investigators, laboratory, current forensics tools, digital evidence controls and processing crime.

College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
CT 214 Computer Forensics II: Forensics and Investigations 3.0 Credits
Students will learn what computer forensics and investigation is as a profession and gain an understanding of the overall investigative process. Disk structures and operating system architectures are analyzed. Topics include the importance of the digital evidence control process and how to process crime and corporate scenes, data acquisition of single and RAID systems, computer forensics analysis, e-mail investigations, investigative report writing and expert witness requirements.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 212 [Min Grade: D]

CT 215 Computer Forensics III: Advanced Computer Forensics 3.0 Credits
This course provides a solid foundation and advanced topics for students who will soon be in the field conducting computer forensic investigations, public or private. This course will introduce computer forensics to non-traditional devices such as smart phones and other non-traditional devices. Advanced topics include live memory analysis, anti-forensic techniques and portable media analysis including iPhones, Blackberrys and other smart phones. This course will use current open source and commercial tools.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 214 [Min Grade: D]

CT 220 Database I 3.0 Credits
Extensive introduction to data server technology, concepts of relational databases and SQL. Best engineering practices utilizing DFD, ERD, CRUD, TIC charts. Data-dictionary utilization, use of primary keys, and the first three forms of normalization. Students are expected to create and maintain database objects and to store, retrieve, and manipulate data.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 222 Security and Information Warfare 3.0 Credits
This course presents the theory and methodology of Information Warfare and Security. Topics covered include: intellectual property crimes; computer fraud; harassment; embezzlement; eavesdropping; sabotage; surveillance; identity theft; incident handling; terrorism; and the protection of critical infrastructure. The course requires critical thinking and analysis of topics.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 225 Data Mining Technology for Security 3.0 Credits
The course focuses on data mining technology used to combat crime. Students learn the theory of various searching techniques and criminal detection tactics and acquire fundamental knowledge of investigative data mining techniques.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 230 Web Development I 3.0 Credits
This course begins with an overview of the history of the internet. We examine how the Internet has changed modern society. Using XHTML, students acquire the skills needed to develop, design and create web pages. This course develops functional knowledge of microcomputer use beyond computer literacy, and examines fundamental networking concepts like TCP/IP, HTTP, FTP, SMTP, IMAP, etc.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 240 Web Development II 3.0 Credits
This course will focus on building an understanding of JavaScript and Cascading Style Sheets. Students will learn the basics of each language and apply them to the development of interactive and versatile page designs. The class culminates in a website that integrates the use of both technologies that offers two different layouts, one 'standard' and one 'accessible' with JavaScript used to control which is displayed in the browser window. The course also has an overview of the foundations and theory of XML and XLST.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 230 [Min Grade: D]

CT 290 Client Side Programming 3.0 Credits
This course emphasizes becoming productive quickly as an Object-Oriented client-side programmer. Students learn how to create real-world Object-Oriented GUI applications using Java or Visual BASIC.Net. Topics include: Programming Environment; Fundamental Programming Structures; Objects and Classes; Inheritance; Interface Components; Event Handling; Applets; Debugging; and Graphics Programming.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 295 Public Key Infrastructure Technology 3.0 Credits
Practical knowledge of public key infrastructure. Topics include: symmetric & asymmetric cryptography, hashes, digital signatures and certificates, PKI basics & services, key and certificate life cycles, PKIX, protocols and formatting standards, trust models, authentication methods and deployment.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CT 320 [Min Grade: D]

CT 300 Security Technology Models and Architecture I 3.0 Credits
Presents theory and techniques utilized by IT Security professionals to secure a wide range of diversified platforms. Focuses on solutions for securing web servers, code, communications, applications, and databases.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CT 380 [Min Grade: D]

CT 320 Security Technology Models and Architecture II 3.0 Credits
This course focuses on operational and physical security. Topics include: computer security, law, policy determination, system architecture, incident response, and disaster recovery.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CT 380 [Min Grade: D]
CT 310 Open Server II 3.0 Credits
Presents an in depth study of server administration utilizing the Linux Operating System. Topics covered include: shell environments, shell program structures, executions, variables, positional parameters, special shell variables, and shell programming statements. In addition the course will examine shell conditional statements, looping constructs, interrupt handling, and debugging tools.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 210 [Min Grade: D]

CT 312 Access Control and Intrusion Detection Technology 3.0 Credits
Fundamental theory and methodology of intrusion detection systems. Using intrusion detection systems to secure corporate and personal networks against attacks. Hands-on laboratory experience using an in-depth, open-source network intrusion detection system.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 315 Security Management Practice 3.0 Credits
Managerial issues involved in the daily operations of an IT Security department. Topics include staffing, budgets, job descriptions, long term planning, resource allocation, training of security personnel, motivational techniques, interaction with other departments including upper management.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CT 320 Server II 3.0 Credits
This course is designed to introduce the Microsoft Windows Server Operating System. Upon successful completion of the course, the student will be able to implement, administer and troubleshoot in a network environment. The course will cover installation, administration of resources, monitoring and optimizing system performance, implementing, managing and troubleshooting hardware device drivers, managing data storage, setting up and configuring users, groups, policies and resources.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 200 [Min Grade: D]

CT 325 Operating System Security Architecture I 3.0 Credits
This course provides requisite knowledge to perform network security within a Windows based computing environment. Topics include: how Assets are Attacked and Secured, Trusted Computing Bases, Cryptography, Protecting Web Servers, Security for Web Browsers, Database Security, Protecting DNS, Security Policies and Procedures.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CT 326 Operating System Security Architecture II 3.0 Credits
Provides students with the knowledge necessary to design a security framework for small, medium and enterprise networks utilizing Windows based computing technologies. Design and implementation of an effective network security plan based on an organization's business needs. Topics include: GPO's, AD, and Auditing.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CT 320 [Min Grade: D] and CT 325 [Min Grade: D]

CT 330 Network Administration II 3.0 Credits
Course covers both theoretical knowledge and hands-on exercises for networking using CISCO hardware. Topics include: Extending Switched Networks with VLANS; Determining IP Traffic with Access Lists; Establishing Point-to-Point Connections; and Establishing Frame Relay Connections.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 140 [Min Grade: D]

CT 335 Mobile Applications 3.0 Credits
Provides students with an understanding of mobile technologies and the components for building and testing mobile applications. Topics covered include: mobile frameworks, plugins, mobile device storage, visual design and user interfaces for mobile applications, device sensors, and compression.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 230 [Min Grade: D] or INFO 152 [Min Grade: D] or CS 265 [Min Grade: D]

CT 336 Internet Protocol Security and Virtual Private Network Technology 3.0 Credits
Technological components of IP Security and underlying architecture. Theory of symmetric-key cryptographic algorithms, including AES, CAST, Blowfish, IDEA, RC2, RC5, and Skipjack. Understanding of PKI infrastructure and the managed certificate protocol. Implementing VPN solutions in a variety of scenarios.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 140 [Min Grade: D] and CT 420 [Min Grade: D]

CT 339 Computing and Security Technology Practicum 3.0 Credits
This course provides an opportunity to gain professional experience in the CST field.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CT.

CT 340 Operating Systems Architecture I 3.0 Credits
Students learn to set up and support MS Windows Operating System. Students gain experience in installing, administering, implementing and troubleshooting this TCP/IP Protocol. Explain data system security through group policy and encryption of files system.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
CT 350 Network Administration III 3.0 Credits
This class gives successful student important knowledge and skills necessary to select, connect, configure, and troubleshoot the various CISCO networking devices. Topics include: Extending Switched Networks with VLANS; Determining IP Routes; Managing IP Traffic with Access Lists; Establishing Point-to-Point Connections; and Establishing Frame Relay Connections.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 330 [Min Grade: D]

CT 355 Wireless Network Security Technology 3.0 Credits
Theory, methodology and hands-on labs relating to the unique security issues of Wireless Networks. Limitations and risks of Wireless Networks. Use of audit and exploit tools to discover security flaws. Protocol and signal vulnerabilities. Methods to secure such vulnerabilities.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 360 Operating Systems Architecture II 3.0 Credits
The knowledge base and skill sets presented in this course are foundations for support professional who are new to the Microsoft Windows O/S architecture and/or who will be responsible for installing, configuring, managing, and supporting a network infrastructure that uses the Microsoft Windows Server products.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 320 [Min Grade: D] and CT 340 [Min Grade: D]

CT 362 Network Auditing Tools 3.0 Credits
Theory, methodology and hands-on labs relating to Network Auditing. The course relies on advanced multi-functional network auditing tools to uncover Network Security problems, with the purpose of eliminating these vulnerabilities.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 370 Object Oriented Systems Analysis 3.0 Credits
This course is designed to increase knowledge of the software development process with a focus on requirements gathering and documentation. UML notation is used. In addition to object-oriented analysis, techniques include the use of conceptual object models, use cases, and business process modeling.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 375 Database II 3.0 Credits
This course examines inserting, updating and deleting data. Subqueries are explored in detail along with the use of many Oracle intrinsic single row and group functions. Joints, merge, views, foreign keys, and compound primary keys are all studied in depth.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 220 [Min Grade: D]

CT 380 Operating Systems Architecture III 3.0 Credits
Students learn network administration skills including: how to configure and troubleshoot client computers; network printing; Active Directory; file sharing; Internet connection and services; remote access; and network security.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 360 [Min Grade: D]

CT 382 Applied Cryptography 3.0 Credits
This course presents the theory, methods, strengths, weaknesses, and effective strategies necessary for students to acquire a fundamental knowledge of Cryptography and Stenography. This is a hands-on course utilizing several tools and software programs. Emphasis is placed on formulating effective strategies, such as when and how to protect computer data.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 385 Web Development III 3.0 Credits
Students will acquire skills to develop, design and produce Web pages using Dreamweaver and Flash. Using software, students will construct a multimedia website, incorporating Flash movie elements, interactivity, and sounds.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 240 [Min Grade: D]

CT 388 Topics in Computing Technology I 3.0 Credits
This course will cover special topics of interest to students in the Computing Technology Major. May be repeated for credit.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 4 times for 12 credits

CT 389 Topics in Computing Technology II 3.0 Credits
This course will cover special topics of interest to students in the Computing Technology Major. May be repeated for credit.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 4 times for 12 credits

CT 390 Server Side Programming 3.0 Credits
This class is designed to provide students with intensive hands-on experience in using server-side technology to develop Web applications. Server-side programming, sometimes called servlets, is a powerful hybrid of the Common Gateway Interface (CGI) and lower-level server APU programming such as NSAPI from Netscape and ISAPI from Microsoft.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 290 [Min Grade: D]

CT 392 Web Development IV 3.0 Credits
Students will acquire skills to develop, design, and produce a functional dynamic Web site on ASP. An e-commerce web site is developed in the classroom to apply dynamic theory and practice. In addition, exploration of intellectual property, copyright, trademark, and privacy issues as they relate to web development are included.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 1 times for 6 credits
Prerequisites: CT 385 [Min Grade: D]
CT 393 Information Technology Security Risk Assessment 3.0 Credits
This course addresses risk management methodology, the specific procedures for determining assets valuation, vulnerabilities, and threats. Risk migration methods that security professional use to protect valuable IT assets will also be studies. Issues, designed to foster critical thinking, are explored, as well as the standardized approaches to risk management.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 395 Information Technology Security I 3.0 Credits
This class is a hands-on introduction of key security concepts such as authentication, malware and attacks, security in transmissions (including wireless). Cryptography, PKI and security analysis and planning (including risk management). Security policy, law on computer security violations.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 400 Network Security 3.0 Credits
This class focuses on the security aspects of networks. Topics covered: intrusion detection, VPN, and Firewalls. This course is designed to provide students with the necessary skills and information aligned with Securing Networks.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 330 [Min Grade: D]

CT 402 Network Security II 3.0 Credits
Theory, methodology of Security firewalls, Topics include: firewall models, user interfaces, feature sets, interfaces, routing, IP addressing services, IP multicast support, monitoring with SNMP, authentication, authorization, and accounting, address translation, traffic content filtering, application inspection, traffic shunning, and firewall failover.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Sophomore
Prerequisites: CT 400 [Min Grade: D]

CT 405 Enterprise Programming 3.0 Credits
This course covers the main aspects of Enterprise Component Architecture to build reliable, scalable and portable enterprise-wide distributed application. All architecture discussions, exercises are described according to Object-oriented Analysis & Design (OOAD) principles and using the Unified Modeling Language (UML) notation OOAD and UML are briefly introduced, too.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 390 [Min Grade: D]

CT 407 Network Security III 3.0 Credits
In-depth coverage of VPN technology, using different encryption schemes, certificates (PKI Theory, certificate creation and implementation), integration with routers, router management, advanced techniques in encryption and virtual private networking, user defined tracking, load balancing and firewall synchronization.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 402 [Min Grade: D]

CT 410 Linux III 3.0 Credits
All the key core elements of the Linux operating system: network configurations, recovery planning. TCP/IP, DHCP, DNS, Apache, Security, and email. These are the typical day-to-day administrative and maintenance issues and tasks commonly faced by Linux system administrators.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 310 [Min Grade: D]

CT 412 Information Technology Security Policies 3.0 Credits
This course presents the theory and legal issues necessary for students to acquire fundamental knowledge of Computer Policies for information security. Topics covered include: E-mail, Employee Privacy, Labor Organization Activities (Fair Use), Avoiding Discrimination and Harassment, Copyright, Defamation, Smashing, Trade Secrets & Confidential Information, Attorney-Client communication via E-mail, Computer Security, Preventing Waste of a Computer Resources, Essentials for Good Policy, and Ensuring Compliance.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 415 Disaster Recovery and Continuity Planning 3.0 Credits
Disaster Recovery & Continuity Planning specific to Emergency Recovery Procedures. Techniques for development of disaster recovery plans, procedures and testing methods. Strategies used by businesses to assure that sensitive data will not be lost in the event of a disaster. Techniques used to manage potential risk within multiple environments.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CT 420 Information Technology Security II 3.0 Credits
This course focuses on network security. Students will gain hands-on experience in the areas of Internet vulnerabilities, analyzing intrusion signatures, risk analysis, designing and configuring firewall systems, router security, Attack and Defense Techniques, IP and Packet structure and analysis, creating a security policy, operating system security for Windows and Linux.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 395 [Min Grade: D]

CT 422 Incident Response Best Practices 3.0 Credits
Theory and legal issues necessary for students to acquire fundamental knowledge of how to design an effective Incident Response Policy. Topics include forming and Incident Response Team, types of responses, legal issues, training employees, selecting tools, honey pots, computer attacks, and the cost of an incident.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 395 [Min Grade: D]

CT 425 Database III 3.0 Credits
This course is an introduction to Oracle® PL/SQL programming language. Anonymous blocks, PL/SQL constructs, stored procedures and functions are examined in depth.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 375 [Min Grade: D]
CT 427 E-Commerce and Web Security Technology 3.0 Credits
In-depth understanding of security problems and risks specific to e-Commerce on web servers. Implementation of advanced security technologies specific to e-Commerce. Design of secure Web Sites, mobile commerce applications, electronic payment systems, address communication security. Web- and Java-related security issues.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 430 Database IV 3.0 Credits
This course introduces packages along with program unit dependencies. Triggers and Oracle-supplied packages are examined in detail. Time is also allocated for performance tuning specifically utilizing the Oracle tables.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 425 [Min Grade: D]

CT 431 Project Management 3.0 Credits
This course teaches how to develop project management plans; develop an understanding of the risks inherent in project development; and be able to evolve coping strategies to deal effectively with projects that go off track. Areas covered include: Project Definition, Project Risk, Project Planning, Risk Assessment, Critical Path, and Cost Management.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

CT 432 Information Technology Security Systems Audits 3.0 Credits
This course presents the theory, methodology, procedures and hands-on labs necessary for students to acquire a fundamental working knowledge of IT System Audits. Students learn how to discover system vulnerabilities with proper audit procedures, and how to document their findings properly for upper management.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 435 Database V 3.0 Credits
Students with a foundation in the Oracle database continue their student of the application and how to insure its functionality. Topics in this course include: backup and recovery analysis and options, recovery structures and processes, backup configuration, manual backup, automated backup, archiving, utilities, Recovery Manager catalog design and maintenance, RMAN, standby databases, Alert and Trace files, dynamic performance, cache, logs, I/O, shared pool, blocks, rollbacks, optimizing sort operations and multithreaded server tuning.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 430 [Min Grade: D]

CT 438 Database VI 3.0 Credits
This course provides instruction in the operations of the Oracle database. It presents the day-to-day duties of the database administration, from initialization parameters and table space storage, to data integrity, constraints, and user profiles.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 435 [Min Grade: C]

CT 472 Security Defense Countermeasures 3.0 Credits
Theory, methodology and hands-on labs relating to Defense Countermeasures. Understanding the reasons that lead to system vulnerabilities and how criminals exploit those vulnerabilities. Labs that utilize security software to conduct penetration testing, audits, and system vulnerability tests will be taught.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CT 420 [Min Grade: D]

CT 491 Senior Project I 3.0 Credits
This course is an independent project which small student teams determines and scopes an appropriate computing technology project that can be completed within the constraints of time and resources under faculty guidance. The objective of the course is to provide specifications and requirements for the team project.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CT 491 [Min Grade: D]

CT 496 Senior Project II 3.0 Credits
This course is a continuation of Senior Project I. In this course, student-teams are required to implement theirs project specifications and requirements developed in the previous course.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: CT 491 [Min Grade: D]

CT I199 Independent Study in CST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

CT I299 Independent Study in CST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

CT I399 Independent Study in CST 0.5-9.0 Credits
Provides individual study or research in computing and security technology with faculty supervision. This course may be repeated for credit.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 2 times for 6 credits

CT I499 Independent Study in CST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit
Computing and Informatics

Courses

CI 101 Computing and Informatics Design I 2.0 Credits
Introduces computing and informatics through a combination of lectures and hands-on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CI 102 Computing and Informatics Design II 2.0 Credits
Introduces computing and informatics through a combination of lectures and hands-on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CI 103 Computing and Informatics Design III 2.0 Credits
Follows CI 102 in the Computing & Informatics design sequence. Introduces computing and informatics through a combination of lectures and hands-on laboratory exercises. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CI 102 [Min Grade: D]

CI 106 Computing & Informatics Design Project 4.0 Credits
Introduces computing and informatics through a term-long design project. Lectures emphasize an integrated view of topic areas and systems, spanning low-level software and implementation issues to high-level use and acceptance by individuals and communities. Lab exercises allow students to explore familiar systems in unique and novel ways to better understand how these systems are designed and used.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CI 120 CCI Transfer Student Seminar 2.0 Credits
Introduces students to the academic and co-curricular aspects of university life. Includes academic functions such as reflection papers, reading, and study skills, as well as co-curricular functions such as campus resources, activities, and social programs. Aids in the transition to student life at Drexel and is designed to help each student achieve academic and personal success through academic and career exploration.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

CI 491 [WI] Senior Project I 3.0 Credits
Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CS 451 [Min Grade: D] or INFO 324 [Min Grade: D] or INFO 420 [Min Grade: D]

CI 492 [WI] Senior Project II 3.0 Credits
Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CI 491 [Min Grade: D]

CI 493 [WI] Senior Project III 3.0 Credits
Part of a multi-term capstone experience involving in-depth study and application of computing and informatics. Students work in teams to develop a significant product. Requires use of a development process that includes planning, specification, design, implementation, evaluation, and documentation. This course is writing intensive.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Prerequisites: CI 492 [Min Grade: D]

Construction Management

Courses

CMGT 101 Introduction to Construction Management 3.0 Credits
This course will introduce the basic history and management concepts of the construction industry to students with the expectation that upon completion students will have an overview of the industry. Career choices, industry firms, and key players in the Construction Management process will be explored.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Junior or Senior

CMGT 161 Building Materials and Construction Methods I 3.0 Credits
This course is designed to explore the range of building materials in use today and their interrelationships in a construction project. Topics will include a study of the major components of construction materials, the selection process, specification, alternatives, procurement, placement and quality management for the building systems covered. Foundations, excavations, wood framing and steel construction and the role these materials play in the success of a project once chosen will be considered and evaluated.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE
CMGT 162 Building Materials and Construction Methods II 3.0 Credits
Continues CMGT 161. Covers concrete, reinforced concrete, site cast and pre-cast concrete, brick and concrete masonry, reinforced masonry, and properties of these materials and construction methods associated with them.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE
Prerequisites: CMGT 161 [Min Grade: D]

CMGT 163 Building Materials and Construction Methods III 3.0 Credits
Continues CMGT 162. Covers roofing systems, glass, glazing, windows, doors, cladding systems, interior finishes, the properties of these materials and construction methods associated with each of them.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE or major is CIVE
Prerequisites: CMGT 162 [Min Grade: D]

CMGT 240 [WI] Economic Planning for Construction 3.0 Credits
Covers techniques for economic decision making for building and infrastructure construction topics. Topics include cash flow, present worth analysis, equivalent annual worth, rate of return, risk analysis, and benefit/cost analysis.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE
Prerequisites: MATH 121 [Min Grade: D]

CMGT 251 Construction Surveying 3.0 Credits
Covers the theory and use of surveying instruments and principles of plane and topographic surveying. Introduces satellite positioning, geomatics, and other modern surveying techniques related to construction.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE
Prerequisites: MATH 121 [Min Grade: D]

CMGT 261 Construction Safety 3.0 Credits
Covers OSHA liability, general safety, hazard communication, fire, material handling, tools, welding, electricity, scaffolding, fall protection, cranes, heavy equipment, excavation, concrete, ladders and stairways, confined space entry, personal protective equipment, and health hazards. Course approved by the osha Training Institute.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is EE.
Cannot enroll if classification is Freshman

CMGT 262 Building Codes 3.0 Credits
Familiarizes students with the content of the boca International Building Code (emphasizing the non-structural provisions), the purpose and intent of code requirements, and how to apply the code to structures and occupancies. Examines how the code is used as a tool in design and construction and prepares students for the advent of a single model building code planned for the nation.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is AE or major is ARCH or major is CIVE or major is CMGT or major is EE.
Cannot enroll if classification is Freshman

CMGT 263 Understanding Construction Drawings 3.0 Credits
This course examines a variety of construction documents, including drawings, details, graphic standards, sections, and quantities for competitive bidding and execution of projects. Both residential and commercial construction documents will be examined.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is AE
Prerequisites: CMGT 161 [Min Grade: D] and CMGT 162 [Min Grade: D]

CMGT 265 Information Technologies in Construction 3.0 Credits
The objective of this course is to expose students to a large variety of information technologies in construction and will discuss the impact of these technologies on work environments, processes, and work quality. Students will investigate a variety of issues surrounding IT in construction including implementation, standards, integration, knowledge management and the underlying technology.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CMGT 266 Building Systems I 3.0 Credits
This course covers construction management and design concepts relating to heating, ventilation, and air conditioning systems and the integration of these systems into the building design and construction process.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: PHYS 182 [Min Grade: D]

CMGT 267 Building Systems II 3.0 Credits
Continues CMGT 266. This course covers construction management concepts relating to electrical systems, wiring, lighting, signal and data systems, and transportation systems and the integration of these into the building design and construction process.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CMGT 266 [Min Grade: D]
CMGT 355 Introduction to Sustainability in Construction 3.0 Credits
An overview of the design and construction of high performance buildings. Students will gain topical familiarity with the wide range of issues related to sustainable design and construction. The USGBC's green building certification program will be covered in detail. Both historical and contemporary case studies will be utilized.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CMGT 361 Contracts And Specifications I 3.0 Credits
Analyzes construction contracts, specifications, and practices with regard to business law and liability. Required for construction management students. Elective for others. Fall.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CMGT 362 Contracts and Specifications II 3.0 Credits
Continues CMGT 361. Examines contractor, architect, and engineer responsibilities through case studies and class discussions. Winter.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CMGT 361 [Min Grade: D]

CMGT 363 Estimating I 3.0 Credits
Covers discussion of the estimating function and review and applications of material quantity survey techniques used in estimating costs of construction projects. Includes types of approximate and precise methods of estimating and their uses, and computer applications. Required for construction management students.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 110 [Min Grade: D] and CMGT 263 [Min Grade: D]

CMGT 364 Estimating II 3.0 Credits
Covers pricing and bidding of construction work including cost factors, labor and equipment, productivity factors, prices databases, job direct and indirect costs, methods of estimating time, materials, equipment, subcontractors' work, general expenses, and profit, bid preparations and submission, and computer applications.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CMGT 363 [Min Grade: D]

CMGT 365 Soil Mechanics in Construction 4.0 Credits
Gives an overview of the types of problems encountered in geotechnical construction. Subjects covered will be composition, groundwater fundamentals, settlement and consolidation, stability of earth slopes, types of foundations and behavior of difficult soils.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: CMGT 161 [Min Grade: D] and MATH 121 [Min Grade: D] and PHYS 182 [Min Grade: D]

CMGT 366 Construction Accounting and Financial Management 3.0 Credits
This course brings together all of the key principles from general business accounting, financial management, and engineering economics needed by construction managers vis-a-vis the unique characteristics of the construction industry, and addresses how these principles are specifically applied in the construction industry, and how they should interact effectively to ensure the efficient and profitable management of construction projects and companies.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ACCT 116 [Min Grade: D] and CMGT 364 [Min Grade: D] and CIVE 240 [Min Grade: D]

CMGT 371 Structural Aspects in Construction I 3.0 Credits
The first of two course series designed specifically for construction management majors. The sequence addresses the interactions of different kinds of loads with common structural elements and design considerations for typical construction materials. This course places emphasis on the design of wood framed construction.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: CMGT 161 [Min Grade: D] and MATH 121 [Min Grade: D] and PHYS 182 [Min Grade: D]

CMGT 372 Structural Aspects in Construction II 3.0 Credits
The second part in a two-course sequence for Construction Management majors. The course places emphasis on the design and analysis of concrete and steel frame construction.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CMGT 373 Building Information Modeling in Construction 3.0 Credits
This course is intended to provide students with a hands-on introduction to Building Information Modeling (BIM) in Construction. Emphasis will be placed on the use of BIM to support current construction activities such as design review, coordination, scheduling, logistics, estimating, and project close-out. Topics will include an introduction to 3D BIM modeling, 3D coordination and clash detection, 4D visual scheduling and logistics, 5D estimating, and BIM for Facility Management. Students will learn the fundamentals of the most widely used software applications in the construction industry: SketchUp, Revit and Navisworks.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CMGT 375 Construction Management of Field Operations 3.0 Credits
This course is intended to equip students with knowledge and skills required to successfully manage and support construction field operations. Knowledge areas include contract administration, project engineering, site superintendence, and other topics critical to field operations.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: CMGT 101 [Min Grade: D] and CMGT 163 [Min Grade: D] and CMGT 263 [Min Grade: D]

CMGT 376 Building Information Modeling in Construction 3.0 Credits
CMGT 451 Heavy Construction Principles & Practices 3.0 Credits
This course is intended to provide students an introduction to the principles and practices employed in heavy construction. The course content is presented from a practical perspective focusing on actual field applications.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 461 Construction Management 3.0 Credits
Covers construction management concepts and practices, the management system, construction planning and programming, project control, environmental management, total quality management, and ethics in construction management. Winter.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 463 Value Engineering 3.0 Credits
Covers the value concept, value engineering job plan, and techniques of project selection.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 465 Marketing Construction Services 3.0 Credits
Applies marketing principles to the construction industry. Includes understanding the roles of market research, business development planning, and networking techniques. Students will acquire the skills and techniques to prepare a winning presentation.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 466 Real Estate 3.0 Credits
Overview of the development process including site selection, residential densities, market analysis and cash flow analysis.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CMGT 467 Techniques of Project Control 4.0 Credits
This course covers construction planning, scheduling, network systems, and communications required for project control, diagram logic, and Earned Value Analysis.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 468 Construction Seminar: Contemporary Issues 3.0 Credits
This course is intended to prepare students for professional practice through a survey of the current and future state of the industry.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore

CMGT 469 Productivity in Construction 3.0 Credits
Explores the evaluation of construction management’s effectiveness. Overview of techniques required for improvement of construction field efficiency including quality management, productivity measurements, method improvement, human factors, and communications.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit

CMGT I199 Independent Study in CMGT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT I299 Independent Study in CMGT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT I399 Independent Study in CMGT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT I499 Independent Study in CMGT 4.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT T180 Special Topics in CMGT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT T280 Special Topics in CMGT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

CMGT T380 Special Topics in CMGT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.

College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Restrictions: Cannot enroll if classification is Freshman
CMGT T480 Special Topics in CMGT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Cooperative Education

Courses

COOP 001 Co-op Essentials 0.0 Credits
Co-op Essentials is an accelerated version of the required course for co-op students, COOP 101. It is designed for non-traditional students with significant work history. The course covers all of the essential job development topics including, introduction to the SCDC and SCDConline, resumes, interviewing, and workplace issues. The emphasis of Co-op Essentials is on integrating and adapting the student’s previous experience to a co-op environment.
College/Department: University Courses
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if concentration is 4COP or concentration is 4TOP or concentration is 5COP or concentration is 5TOP.

COOP 101 Career Management and Professional Development 0.0 Credits
Prepares new students to achieve success, personally and academically, in their first co-operative education experience. Topics covered include career exploration, resume skills, interview techniques, professional conduct in the job search, contemporary workplace issues, and job searching and the Internet.
College/Department: University Courses
Repeat Status: Not repeatable for credit

COOP 201 Co-op Experience 16.0 Credits
College/Department: University Courses
Repeat Status: Can be repeated 6 times for 96 credits

COOP 250 Professional Skills Enrichment 0.0 Credits
Professional Skills Enrichment is designed to enable the student to hone their job search skills. Taught as a series of workshops, each class focuses on a different career-related topic including Networking, Utilizing Social Networking Sites, and Mastering the Interview. Students are required to attend a mock interview and participate in a mock networking event.
College/Department: University Courses
Repeat Status: Not repeatable for credit

COOP 301 Co-op/Internship Experience 16.0 Credits
College/Department: University Courses
Repeat Status: Can be repeated 2 times for 34 credits

Creativity Studies

Courses

CRTV 301 Foundations in Creativity 3.0 Credits
This course provides a foundation in creativity including leading creativity theorists and their ideas, and introduction to creativity in many fields. Students will explore basic creative characteristics including originality, fluency, flexibility, elaboration, resistance to premature closure, and tolerance of ambiguity. Sets the foundation for acquiring tools and applying creativity.
College/Department: School of Education
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CRTV 302 Tools and Techniques in Creativity 3.0 Credits
This hands-on course provides tools for enhancing creative strengths including role-play, simulation, brainstorming together with synectics, and creative problem solving. A second focus is the role of inspiration in how creativity, personal maturity, and spirituality inter-relate and how this interaction expands our repertoire of tools and techniques in creativity.
College/Department: School of Education
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CRTV 303 Creativity in the Workplace 3.0 Credits
This course focuses on how creative ideas happen and how they become innovations to reveal a set of principles for infusing creativity into every aspect of an organization. Examples from a wide range of settings demonstrate how to build systemic creativity at the individual, team, and leadership levels.
College/Department: School of Education
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CRTV T180 Special topics in CRTV 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: School of Education
Repeat Status: Can be repeated multiple times for credit

CRTV T280 Special topics in CRTV 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: School of Education
Repeat Status: Can be repeated multiple times for credit

CRTV T380 Special topics in CRTV 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: School of Education
Repeat Status: Can be repeated multiple times for credit

CRTV T480 Special topics in CRTV 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: School of Education
Repeat Status: Can be repeated multiple times for credit
Criminal Justice

Courses

CJ 290 Crime and Public Policy 3.0 Credits
This course focuses on criminal justice and non-criminal justice policies used to combat crime. Students will use the most recent crime data and explanatory theories on crime to evaluate current policy. A multi-disciplinary approach will be used to develop new policies designed to have a long-lasting impact on crime.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJ 400 [WI] Critical Issues in Criminal Justice 3.0 Credits
The capstone course will be open only to Criminal Justice Seniors. It will serve as an opportunity for them to demonstrate their cumulative learning to the major by looking at the most challenging issues in the field. Students, divided into groups, will research the topics, draft a report and present and defend it before an audience of Criminal Justice students. The knowledge and skills obtained through four years as a Criminal Justice major will be reflected in their work. This course will be a writing intensive course as multiple drafts of their thesis will be reviewed and critiqued before the final report is written and accepted. (Topic will reflect contemporary issues and one subject to choose.).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CJ and classification is Senior.

CJ T180 Special Topics in Criminal Justice 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJ T280 Special Topics in Criminal Justice 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJ T380 Special Topics in Criminal Justice 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJ T480 Special Topics in Criminal Justice 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

Criminology & Justice Studies

Courses

CJS 101 Introduction to Criminal Justice 3.0 Credits
This course provides a survey of the criminal justice system with the primary goal of conveying an understanding of America's formal response to crime. We confront the long-standing struggle to balance due process with crime control through the lenses of the police, courts and corrections -- the core elements of the Criminal Justice system. We also examine major crime control paradigms (historic and current), and the tenuous relationship between race and justice. The course offers a variety of educational approaches in an effort to match (as much as is reasonable) students' individual learning styles and needs.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 200 Criminology 3.0 Credits
This course examines the myriad factors that explain crime and criminal behavior. The course describes prevalences of different crime types across various populations and geographic areas to help students understand how and why crime often clusters within certain settings. The Course reviews major theories of crime developed over the past two hundred years to help explain crime and the labeling of criminal offenders. The course will draw on references from popular culture to help provide a context for crime and crime causation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 210 Race, Crime, and Justice 3.0 Credits
This course considers how race affects the behaviors of the major institutions of the justice process, as well as how the justice process affects social perceptions of race and crime. The course also describes the relationships among race, criminal offending, and victimization; and it explores how justice--related outcomes are often influenced by the quality and behaviors of local schools, access to housing, economic investment in majority--minority communities, crime control strategies, and the perceived fairness of the justice process itself.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 220 Crime and the City 3.0 Credits
This course reviews the nature of crime and disorder in cities from the urban industrial revolution through the so-called "Crime Drop" of the early 2000s. The course opens with an overview of urbanization, contrasting the "best" with the "worst" aspects of the industrial revolution on human life. It then examines urban drug markets, violence, and policing before moving into a discussion of the crime "peak" of 1992. The course then follows the ensuing crime drop, examining demographic, economic, and cultural factors that may explain the national crime decline. The course then focuses on violence as a public health issue and on how crime, incarceration, health, housing, and education are all tied to urban crime policy.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
CJS 250 Research Methods & Analytics I 3.0 Credits
This is the first of three integrated methods and analysis courses for CJS students that introduces them to the fundamentals of research design, the benchmarks of scientific quality, sampling, modes of observation, and units of measurement. The course also introduces students to the most relevant analytical procedures often used at each stage in the methodological process, such as developing a data set, performing descriptive (univariate) analyses, examining bivariate relationships, and testing hypotheses using both parametric and non-parametric statistical tests. The course culminates with students writing a research proposal that includes the major components of most grant applications: Statement of the Problem, Literature Review, Research Questions, and Research Methodology/Analytical Procedures.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 260 Justice in Our Community 4.0 Credits
This course is a seminar style community-based learning course that will begin with an introduction to justice in urban communities and examine problems unique to cities. The will include class lectures and on-site work with our community partners at UConnect. The synthesis of scholarship and community classroom experience will provide a holistic lens in which to explore issues in our urban community. Topics include urban economies, access to education and health care, digital divides and crime. Students who take this course will also register for one recitation section of CJS 260.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 261 Prison, Society and You 3.0 Credits
This course utilizes the Inside-Out Prison Exchange Program to explore the relationship between individuals and the prison system. The Inside-Out Exchange Program is an evolving set of projects that creates opportunities for dialogue between those on the inside and those on the inside of the nation’s correctional facilities. The program demonstrates the potential for dynamic collaborations between institutions of higher education and correctional institutions. Most importantly, through this unique exchange, Inside-Out, this course seeks to deepen the conversation and transform ways of thinking about crime and justice (Crabbe, Pompa, 2004).
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 265 Criminal Investigation 3.0 Credits
This course introduces students to the broad field of criminal investigations. It examines the elements of an effective investigation, the equipment, technology and procedures used to complete successful investigations. It also covers note taking, crime scene photography and sketching, searching the crime scene, identifying and collecting physical evidence, and arresting and searching suspects.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 266 Crime Prevention Planning 3.0 Credits
The course will explore the role of places and environments on criminal opportunities. By analyzing residential and business layouts, street networks, and routine activities of individuals, the course will seek ways in which situational crime prevention methods may then be applied for preventing criminal behavior in both the public and private settings.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 267 Introduction to Security Studies 3.0 Credits
This course examines the private security industry. Substantive topics of interest include the historical development of the industry; its linkage to public forms of security (law enforcement and the regulatory state); its legal underpinnings; management issues; and the nature of internal and external threats faced by facilities and organizations. The philosophical and analytic paradigm for security -- risk analysis and prevention -- offers a framework for the study of problem solving models used in the field. This framework, along with the analytic models utilized by security professionals will be explored in depth.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 273 Surveillance, Technology, and the Law 3.0 Credits
This course will examine current surveillance technologies used by criminal justice agencies and private sector organizations and the laws that regulate government surveillance and protect privacy.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 274 Sex, Violence, & Crime on the Internet 3.0 Credits
This course explores how offenders are adopting computers to commit traditional crimes in a high-tech manner. Specific attention will be paid to the following types of crime: cyberstalking, online harassment, cyberbullying, sexting, and computer-facilitated sexual exploitation of children. Related legislation and current law enforcement practices to address these crimes will be examined.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 275 Issues in Domestic Violence 3.0 Credits
Domestic Violence is a familiar phrase, but what does it really mean? How often does it occur? Is it a new phenomenon? Do other countries view domestic abuse as a problem? In our class we will examine these questions using broad conceptual frameworks. It will then explore the definitional aspects of domestic violence, common characteristics of victims and offenders, as well as the historic, current, and emerging criminal justice responses to domestic violence.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 276 Introduction to Computer Crime 3.0 Credits
This course provides an overview of computer crime. Emphasis will be placed on the legislative responses and policy issues related to computer intrusions and cyberfraud. Issues encountered when informing laws in cyberspace and the public/private sector initiatives for dealing with computer crime will also be explored.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
CJS 277 Introduction to Correctional Practices 3.0 Credits
This course provides insight into the Correctional component of the Criminal Justice System. Students will learn and understand correctional theory, over view of correctional facilities management and practice and contemporary issues in the field of corrections, including re-entry and alternatives to incarceration. Emphasis will be placed on actual real world experiences based upon the Philadelphia Prison System. Course material will be presented through the required textbook, court opinions from legal cases, handouts, classroom lecture and discussion, on-site visits and tours of the various Philadelphia Prison System facilities and guest lectures and demonstrations.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 278 Introduction to Law Enforcement 3.0 Credits
This course examines the implications of maintaining an armed police force in a democratic society whose mandate requires it to enforce laws under the tacit threat of coercion. The course explores different styles of policing that are commonly found in urban, rural, and suburban locations; and it examines the rise and consequences of historic crime control paradigms, such as the War on Drugs, and the War on Terrorism. It offers an overview of Supreme Court decisions that have most affected police functions and authority. And it will highlight the police use of technology for the purposes of coercion, surveillance, and communication.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 280 Communities and Crime 3.0 Credits
This course introduces students to the ecological study of crime. Crime varies in time, space, and populations as it reflects neighborhood structures and the routine social interactions that occur in daily life. Concentrations of crime can be found among locations, with antisocial activities like assaults and theft occurring at higher rates because of the demographic make-up of people (e.g., adolescents) or conflicts (e.g., competing gangs), for reasons examined by ecological criminology. We examine variations in socio-demographic structures (age, education ratios, and the concentration of poverty) and the physical environment (housing segregation, density of bars, street lighting) predicts variations between neighborhoods in the level of crime and disorder.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 289 Terrorism 3.0 Credits
This course offers a detailed examination of several major theories of crime. Whereas CJS204-Criminology represents a survey of many criminological theories, this advanced course focuses on three major perspectives in criminology: Life-course, genetics/bio-social, social disorganization (and specifically, subculture of violence) theories. The course also helps students understand how different criminological theories might integrate with each other to offer broad perspectives the causes of crime.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 290 Crime and Public Policy 3.0 Credits
This course focuses on criminal justice and non-criminal justice policies used to combat crime. Students will use the most recent crime data and explanatory theories on crime to evaluate current policy. A multi-disciplinary approach will be used to develop new policies designed to have a long-lasting impact on crime.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 295 International Field Experience 1.0-3.0 Credit
This course provides students the opportunity to process and contextualize their recent Intensive Course Abroad (taken through Drexel's Study Abroad Office). By keeping an extensive travel journal, participating in all activities while abroad, and through a series of written reflection assignments, students will link their travel experiences with assigned academic materials to help them make meaning from their observations while on tour in the relevant host countries.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJS 300 Research Methods and Analytics II 3.0 Credits
This course builds on (and reviews) the fundamentals of research design introduced in Methods and Analysis I with the specific aim of teaching students how to construct, and analyze data generated from, surveys. Students will learn the “mechanics” of survey design, such as where to place demographic questions, as well as how to identify and include validated scales on the instrument, and how to avoid misleading or debilitative items (e.g., “double-barreled” questions, biased/leading questions, non-mutually exclusive or exhaustive response categories. Students will also learn the process (and importance) of pre-testing the survey prior to implementing it; and they will be trained to analyze survey results using SPSS and other software packages as needed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 250 [Min Grade: C]

CJS 301 Methods and Analytics III 3.0 Credits
This course focuses on the development of a community needs assessment as a platform for giving students the opportunity to work as part of a research team in the field, creating a data collection instrument, collecting and analyzing data, and reporting the findings. The course integrates the community needs assessment methodology with the urban disorder literature to educate students in the modes of observation required to reliably measure crime, disorder, surveillance gaps, and other sources of community risk. Students will map community demographic features, develop an assessment tool, make field observations, and analyze the findings as part of their culminating experience.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 300 [Min Grade: C]

CJS 302 Advanced Criminological Theorizing 3.0 Credits
This course offers a detailed examination of several major theories of crime. Whereas CJS204-Criminology represents a survey of many criminological theories, this advanced course focuses on three major perspectives in criminology: Life-course, genetics/bio-social, social disorganization (and specifically, subculture of violence) theories. The course also helps students understand how different criminological theories might integrate with each other to offer broad perspectives the causes of crime.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 204 [Min Grade: C] or CJ 204 [Min Grade: C]
CJS 320 Comparative Justice Systems 3.0 Credits
This course offers students a transnational perspective on crime and justice institutions. As the world increasingly globalizes, it becomes increasingly important to understand how countries outside the United States undertake the processes of detecting crime, labeling people “criminal,” and adjudicating criminal offenders. Is there a common threshold in other countries for determining guilt? Is there a universal standard that governs the presumption or guilt or innocence at the onset of the criminal justice process? How many other countries still use the death penalty? These are questions the course will address in addition to others related to policing, courts, and corrections.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 101 [Min Grade: C] or CJ 206 [Min Grade: C]

CJS 330 Crime Mapping Using Geographic Information Systems 3.0 Credits
This is primarily a lab course that trains students in the fundamentals of crime mapping using geospatial software. The course opens with a history of crime mapping, then moves to an examination of several place-based theories of criminology that help explain why crime events often cluster in time and space. The course then uses scenario-based exercises to train students how to work with and manage geospatial data, conduct select spatial analyses, interpret the results of such analyses within the contexts of different criminological theories, and create maps that illustrate spatial patterns and relationships across different units of geography.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 335 Intelligence-Led Decision-Making 3.0 Credits
This course examines the processes of (1) identifying crime and security threats across different risk terrains, turning raw information from non-crime sources into intelligence data that can help forecast crime/security problems, and (2) developing a strategic plan to guide the deployment of crime control resources for solving a crime problem or reducing a security threat. The course also introduces students to the importance of developing multi-organizational collaborations that create data streams from key social agencies (e.g., schools, hospitals, local commercial enterprises, tourism offices, etc.) that could help predict crime problems or threats to public safety before they become apparent. Students will develop a Strategic Plan designed to reduce a crime problem or security threat in a local setting.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 330 [Min Grade: C]

CJS 360 Juvenile Justice 3.0 Credits
Students will learn about the history, development and current status of the juvenile justice system. Philosophical, sociological, psychological, legal and political factors contributing to the changes in the manner in which society processes children and youth who violate social norms will be explored in research articles, legal decision, and theoretical analyses.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 362 Gender, Crime, and Justice 3.0 Credits
This term will explore the historical roots of crime and how we study crime specifically; we will critically analyze female crime trends and statistics, gender and the law, and female offending. After laying a strong foundation, we will connect gender and crime by exploring rape, pornography, and domestic violence, sex trafficking and female gangs.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 364 Community Corrections 3.0 Credits
This course is a comprehensive, up-to-date, coverage of evidence-based practices and research for probation, release from prisons and other community-based alternatives in their historical, philosophical, social and legal contexts illustrated with real life examples.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 365 Computer Investigations and the Law 3.0 Credits
This course will examine the techniques used to investigate Internet crimes and extract evidence from digital storage devices. Specific attention will be paid to the procedural laws that govern digital forensic techniques and investigations involving electronic evidence.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 366 Technology and the Justice System 3.0 Credits
This course will examine past and current technologies adopted in the field of criminal justice to assess their usefulness in identifying and preventing crime and advancing justice. We will also discuss technologies on the horizon that are likely to be adopted by criminal justice agencies. Additionally, methods for evaluating technology use will be examined.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 369 Forensic Science Survey Course 3.0 Credits
This survey course introduces some principles and techniques of forensic science as they pertain to crime scene investigation and crime laboratory analysis. The course is designed to be accessible to those without a science background, but at the same time will provide a well-rounded introduction to some topics for those considering further studies in the field.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 372 Death Penalty - An American Dilemma 3.0 Credits
Capital punishment is one of the most complex issues in Criminal Justice and one of the most controversial facing America. Everyone has an opinion about the death penalty but rarely is it grounded in hard evidence. This course will examine the history of the use of capital punishment in America by reviewing the relevant case law in this area and will explore in-depth the issues which rise from the use of the Death Penalty in this country. Is it ethical? Is it fairly administered? Is it effective? Should it be reformed? Can it be reformed?
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
CJS 373 Environmental Crime 3.0 Credits
The objective of this course is to provide students with an introduction to and overview of the federal criminal enforcement program concerning the criminal prosecution of certain types of violations of federal environmental laws and regulations. Although the focus of the course will be on the federal government's environmental crimes program that is administered by the United States Environmental Protection Agency, general concepts concerning criminal law and procedure will also be discussed. More specifically, topics to be covered will include, among other things: the history of the federal environmental crimes program; the role of EPA-CID Special Agents and federal prosecutors in the investigation and prosecution of environmental crimes; environmental offenses under the federal Federal Acts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 374 Restorative Justice 3.0 Credits
Restorative justice is a paradigm shift in criminal justice in response to the failure of the traditional retributive model to meet the needs of victims, offenders and the community. This course offers an overview of Restorative Justice, including its definitions, history, theoretical and legal basis, principles and practices, controversial issues, and evaluative research as to its efficacy and reducing crime and restoring victims and communities.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 375 Criminal Procedure 3.0 Credits
A solid understanding of constitutional criminal procedure is essential to any career in the law or law enforcement. Further, as America seeks to protect itself from terrorism, every citizen should understand the constitutional protections that Americans have historically enjoyed which have been and continue to be diminished by the courts and the legislature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 376 Sentencing 3.0 Credits
We explore the theoretical basis for sentencing, including the purposes of sentencing, and determination of the just sentence, including the consideration of the crime, as well as the offender's background and criminal history. We cover contemporary issues like prosecutorial misconduct, plea bargaining, sentencing guidelines, mandatory minimums, truth in sentencing and the impact of racial and gender disparities. We also spend time investigating special issues within the field such as the sentencing of juveniles and capital sentencing procedures.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 377 Intellectual Property Theft in the Digital Age 3.0 Credits
This seminar focuses on the changing nature of intellectual property theft, piracy, and copyright infringement in the Digital Age. Attention will be paid to legislative and technical solutions for protecting copyrighted goods (including music, movies, and software) and the challenges faced when investigating the theft of intellectual property. Additionally, theoretical explanations to account for intellectual property theft will be explored.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 378 Science of Forensic Science 3.0 Credits
Forensics is the application of science or other disciplines to the Legal System. Students will study the science of science in application of ethics and scientific method to evidence analysis and presentation of data to Court. Students will learn to recognize and deal with context, observer, expectancy, and experiimenter effects. Data from actual cases will be discussed.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 379 Forensic DNA Analysis 3.0 Credits
An introduction to DNA analysis methods in current forensic testing. Genetics, inheritance, DNA biochemistry are applied to a fluorescent detection technology to produce results using one or more manufactured DNA testing kits. Students will be exposed to actual casework data and as a virtual analyst present results to juries and judges.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

CJS 400 Capstone in Criminology and Justice Policy 3.0 Credits
The capstone course will be open only to Criminology and Justice Policy Seniors. This course serves as an opportunity for students to apply their cumulative knowledge in the Criminology and Justice Policy concentration to an identified crime, policy, and/or criminal justice deployment problem facing the field today. This may be a more global problem, such as mass incarceration across the United States, or a highly localized problem, such drug markets in an urban setting. Students will work in consultation with the professor and their class peers to identify a problem, and then develop an evidence-based solution to address the problem. The course culminates with students presenting their evidence-based solutions to the class at the end of the quarter.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CJS and classification is Senior.

CJS 401 Program Evaluation 3.0 Credits
This course will examine research designs and statistical methods often used when evaluating criminal justice programs or policies. The course will focus mostly on the conceptual, rather than the applied, giving students an opportunity to begin to synthesize the methods and techniques to which they were exposed in the previous methods and analytics courses. During the course, students will develop a proposal to conduct an evaluation of a policy and/or program, using a research design that meets the benchmarks of scientific quality; and they will incorporate several research and analytics strategies they learned in previous courses.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CJS 250 [Min Grade: C] and CJS 300 [Min Grade: C] and CJS 330 [Min Grade: C]
CJS 402 Capstone in Justice Informatics 3.0 Credits
The Capstone in Justice Informatics course calls upon students to integrate the concepts covered in the informatics, computing, analytical, and methodological courses in their major to develop a informatics-driven plan that addresses a problem pertaining to crime, criminality, or criminal justice. The course will culminate with students making a professional presentation of their plan/project to the class.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CJ and classification is Senior.

CJS I499 Independent Study in CJS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJS I299 Independent Study in CJS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CJS I399 Independent Study in CJS 0.5-12.0 Credits
Provides a course of independent study in Criminology and Justice Studies. Topics for study must be approved in advance of registration by the advisor and the instructor involved.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

CUL 120 Techniques and Traditions I 3.0 Credits
In this foundation culinary course, students will learn the fundamentals of a professional kitchen through lecture, demonstration and production. Classical and contemporary techniques are emphasized for development of cooking methods, knife skills, and food and kitchen safety and sanitation.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 120 [Min Grade: D]

CULA 125 Culinary Fundamentals 3.0 Credits
Introduces culinary principles and procedures used in commercial food preparation and practical application of classical culinary techniques.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit

CULA 216 A la Carte 3.0 Credits
This course will introduce students to the foundations needed to work in a pastry kitchen. This hands-on lab class will help build students sense of timing and a delicate touch needed to produce classic bakery items such as pies, cookies, muffins, biscuits, pastry cream, and basic breads.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 120 [Min Grade: D] (Can be taken Concurrently)

CULA 220 Patisserie I 3.0 Credits
Students will be introduced to a variety of techniques that are the foundations to creating restaurant quality desserts, including mousses, sorbets, custards, ice creams, and frozen desserts. Along with learning techniques, applications, and utilization of products dessert plating will be part of the students development.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CULA 125 [Min Grade: D]

CULA 221 A la Carte 3.0 Credits
This is a sophomore level course in dining operations designed around a weekly restaurant operation, which is marketed and delivered to the Drexel Community and general public.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 121 [Min Grade: D]
CULA 225 Patisserie II 3.0 Credits
This course will further develop students’ sense of creativity, flavor, texture, color, and presentation skills. Building on knowledge and techniques already learned in previous courses, this course will provide students with knowledge and touch to produce professional quality desserts of all sizes from amuse bouche, petit fours, and sophisticated desserts.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CULA 220 [Min Grade: D]

CULA 226 Patisserie III 2.0 Credits
This advanced pastry course is the third in a series of related topics. Culinary students will have the opportunity to work with techniques in cake decorating, sugar and chocolate work, and candy making. Attention to detail in pastry arts will be emphasized in this course.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 225 [Min Grade: D]

CULA 227 Wheat and Grains: Artisan Breads 3.0 Credits
This course will introduce students to proper techniques in producing a variety of artisan breads. The course will allow students to create professional style breads and allow for fully developed yeast fermentation. Students will learn the skills, terminology, and calculations to produce artisan breads in volume.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 125 [Min Grade: D]

CULA 228 Design, Presentation, and Decorating in Pastry 3.0 Credits
This course will give students the foundation to create a variety of cakes for many special occasions. Students will learn to produce and utilize different types of icings, fondant, and cake styles to build numerous flavor and texture combinations. Along with the skills learned in garnishing student will create a variety of professional quality cakes.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 125 [Min Grade: D]

CULA 229 Confectionery 3.0 Credits
This course will give students an excellent foundation in understanding, taste, and usage of chocolate and its many forms. Students will learn to properly temper chocolate and then utilize it for creating garnishes and artisan candies. In addition the proper technique for sugar cookery will be learned and then applied for a variety of confections.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 125 [Min Grade: D]

CULA 235 Professional Dining Room Management 3.0 Credits
Students will manage front-of-the house operations in a professional dining room setting with fine dining service to the public. Table side preparations and cookery will be strongly emphasized with weekly executions.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 121 [Min Grade: D]

CULA 240 Fundamentals of Chinese Cuisine 3.0 Credits
Students will explore traditional regional preparations with Chinese ingredients, such as beef, fowl, lamb, vegetables and various fish and seafood.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

CULA 290 Culinary Arts Practicum I 3.0 Credits
Students will gain work experience in culinary production while under faculty supervision. Students obtain industry jobs, work a minimum of 60 hours, log their experiences, and write a final analysis. The networking opportunities often lead to rewarding co-op, part time, or full time employment opportunities. Students take CULA 290 or CULA 291.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CLSC or major is CULA.
Prerequisites: CULA 120 [Min Grade: D]

CULA 291 Culinary Arts Practicum II 6.0 Credits
Students will gain work experience in culinary production while under faculty supervision. Students obtain industry jobs, work a minimum of 120 hours, log their experiences, and write a final analysis. The networking opportunities often lead to rewarding co-op, part time, or full time employment opportunities. Students take either CULA 290 or CULA 291.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CLSC or major is CULA.
Prerequisites: CULA 120 [Min Grade: D]

CULA 300 Fundamentals of Vegetarian Cuisine 3.0 Credits
Vegetarian cooking is explored by examining ethnic specific global cuisines. Vegetable based diets are a result of geography, economics, politics, culture, religion and choice. By understanding and appreciating diverse peoples and their foods, the student will expand not only his or her culinary repertoire, but also achieve a greater global and cultural awareness.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

CULA 303 Global Cuisine Studio 3.0 Credits
This course will serve as the foundation for a variety of ethnic cuisine options including French, Italian, Chinese, Korean, Indian, Caribbean and Island Cuisine.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Can be repeated 4 times for 15 credits

CULA 305 Fundamentals of Italian Cuisine 3.0 Credits
Students will be presented with the philosophy of traditional Italian cooking as it is articulated in the culture of Italy. There will be a strong emphasis on regional ingredients and recipes. Topics include: basic menu language, terminology, preparation of various antipasti, pasta, and risotto.
College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]
**CULA 306 Advanced Italian Cuisine 3.0 Credits**
A continuation of CULA 305. Utilizing regional Italian products, students will produce classical and traditional recipes with opportunity to further develop personal style and creativity. Proper seasoning, handling of product, and family style and plated presentations will be emphasized.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 305 [Min Grade: D]

---

**CULA 310 Fundamentals of French Cuisine 3.0 Credits**
The course explores the history, culture and persistent influence of the French 'methode' and its relevancy to the contemporary kitchen. The major French regional classic dishes and techniques will be studied and produced; each week visiting a different geographic locality from Provençe to Alsace.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

---

**CULA 311 Advanced French Technique 3.0 Credits**
A continuation of CULA 310. This course more deeply explores the history, persistent influence of the French 'methode' and its relevancy to the contemporary kitchen. Each week will examine on a single food category; Potages, Poisson, veau, volaille, Gibier. Patisserie, etc., as well as a significant figures in gastronomic history from Taillevant to Paul Bocuse and beyond — from the earliest origins of Haute Cuisine to Modernist and applications to evolving contemporary cuisine. Related topics of French art, culture and music will be included.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 310 [Min Grade: D]

---

**CULA 315 Fundamentals of American Cuisine 3.0 Credits**
The course provides a foundation in American regional cuisine by examining the history, diverse cultures and culinary traditions of the evolving United States from native Americans and first settlers to the present day. Students follow a culinary cultural journey through time and geography, preparing a variety of dishes from influential cuisines, in search of a definition for American Cuisine.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

---

**CULA 316 Butchery Laboratory 2.0 Credits**
In this culinary lab course students will execute the fabrication of meat, fish and poultry products, skills necessary in any professional kitchen operation. Students will perform yield tests and calculate portion cost of fabricated items.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

---

**CULA 320 Advanced Culinary Studio 3.0 Credits**
Under the direction of culinary industry leaders and program faculty students will prepare and produce finished plates using a variety of previously learned skills. Finished products will reflect the style of a chosen culinary industry leader executed with the judgment and professionalism of the student.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

---

**CULA 325 Garde Manger Laboratory 3.0 Credits**
Introduces techniques used in the fabrication, selection and preparation of cold buffet production. Items include cold appetizers, canapes, garnishes, hors d’oeuvres, salads, and sandwiches. Additional focus on decoration, form, and presentation of cold food items.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

---

**CULA 328 Brasserie Applied Baking 3.0 Credits**
This course will develop students ability to cross utilize the mediums of culinary arts and pastry arts. In almost every food service operation the techniques and products made by both the savory and sweet kitchen are seamlessly combined to create the menu. Students will focus on combining both of these disciplines to create contemporary and classic dishes.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 125 [Min Grade: D] and CULA 320 [Min Grade: D] and CULA 325 [Min Grade: D] and CULA 227 [Min Grade: D]

---

**CULA 330 Charcuterie 3.0 Credits**
Students learn about the chemistry and techniques of curing, brining, and smoking. Items covered include classic and modern, forcemeats, pates, galantines, terrines, and sausages (fresh and dry).

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

---

**CULA 335 Fundamentals of Indian Cuisine 3.0 Credits**
This course introduces students to the diverse cooking and cultures of India. Explores India’s unique cooking methods and the varied use of herbs, spices, and condiments.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 120 [Min Grade: D] or CULA 115 [Min Grade: D]

---

**CULA 400 Directed Studies with a Master Chef 3.0 Credits**
Structured program that allows students the opportunity to practice the skills and competencies learned in coursework with an acknowledged culinarian in a qualified foodservice operation. Students are monitored by their direct supervisor, by Culinary Arts faculty, and by evaluation of written reports, workbooks, journals, and portfolios prepared during the course.

**Repeat Status:** Not repeatable for credit

**Prerequisites:** CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]
CULA 310 [Min Grade: D] and CULA 315 [Min Grade: D]

Prerequisites:
Can enroll if classification is Senior.

Restrictions:
Not repeatable for credit

Center for Hospitality and Sport Management
will be on the incorporation of skills, technologies and techniques learned
them to prepare for the Culinary Arts Program annual show. Emphasis
CULA 420  Senior Design Project  3.0 Credits

Prerequisites:
CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

Not repeatable for credit

Repeat Status:
Center for Hospitality and Sport Management

CULA 410 Culture and Gastronomy II 3.0 Credits
The second of two courses devoted to the study of food and culture. The
course comprises a survey of contemporary food studies topics and
an examination of food choices in contemporary society. Reading,
research and course study focuses on food sources, individual and
gender identity, the global food chain, sustainability, inherent "costs" of
contemporary consumables, and the future of food in an ever-expanding
global economy. Classes are divided between lecture and cooking labs. This is a reading and writing intensive course.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 405 [Min Grade: D]

CULA 412 Food Writing 3.0 Credits
A practical introduction to food journalism. Explores through regular
writing and reading assignments the broad range of topics typically
encountered in a newspaper or magazine environment, from ingredient
features and trend stories, to profiles, first person essays, restaurant
criticism, "live" deadline assignments, and long-form magazine projects.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

CULA 415 Food Styling and Photography 3.0 Credits
The course deals with the basics of composition, color theory, basic digital
photography, food styling techniques, and what constitutes a professional
photographic image. An art historical approach is used to facilitate the
development of aesthetic judgment. Students prepare a variety of dishes,
utilizing and amplifying cooking skills, prop, style, and photograph a
variety of themed food and drink employing new skills in a new and
exciting manner.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 115 [Min Grade: D] or CULA 120 [Min Grade: D]

CULA 420 Senior Design Project I 3.0 Credits
Students will undertake individual creative research which will enable
them to prepare for the Culinary Arts Program annual show. Emphasis
will be on the incorporation of skills, technologies and techniques learned
from prior coursework and experience.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit

CULA 421 Senior Design Project I 2.0 Credits
Students will undertake individual creative research which will enable
them to prepare for the Culinary Arts Program annual show. Emphasis
will be on the incorporation of skills, technologies and techniques learned
from prior coursework and experience.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 421 [Min Grade: D] and CULA 422 [Min Grade: D]

CULA 423 Senior Design Project III 2.0 Credits
Students will undertake individual creative research which will enable
them to prepare for the Culinary Arts Program annual show. Emphasis
will be on the incorporation of skills, technologies and techniques learned
from prior coursework and experience.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit
Prerequisites: CULA 421 [Min Grade: D] and CULA 422 [Min Grade: D]

CULA 425 The Kitchen Garden 3.0 Credits
This course familiarizes students with the preparation and planting of
a raised-bed culinary garden using organic techniques. Students will
practice indoor and outdoor seed sowing; learn to promote soil health
and study the relationships between the kitchen and the garden. The
harvested spring produce is used for various culinary applications.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit

CULA 426 The Kitchen Garden: Summer 3.0 Credits
This course familiarizes students with the dynamics of the contemporary
kitchen garden as a food source, and a platform for environmental
stewardship. Students will study the importance of plant nutrition; and
take part in community garden outreach activities. The harvested summer
produce is used in summer term Culinary Arts classes.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit

CULA 427 The Kitchen Garden: Fall 3.0 Credits
This course familiarizes students with the complex relationships between
food sources, conventional vs. sustainable farming practices; and the
ethics of food access and waste analysis. Preservation of the harvest is
explored; and the fall produce is used in various culinary applications.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Not repeatable for credit

CULA 440 Food in the Arts 3.0 Credits
Provides an overview of food in artistic settings. Course offerings will be
rotated to include food in literature, food in painting, and food in film.

College/Department: Center for Hospitality and Sport Management
Repeat Status: Can be repeated 2 times for 9 credits
Prerequisites: CULA 121 [Min Grade: D]
Custom-Designed Major

Courses

CSDN 101 [WI] Introduction to Multi-Disciplinary Methods 1.0 Credit
Teaches Custom-Designed Major students about the many different methods of scholarly analysis practiced across the university. Students will be introduced to the methods practiced in the social sciences and humanities, creative arts, science and engineering, and business.

College/Department: Pennoni Honors College
Repeat Status: Not repeatable for credit
Prerequisites: CSDN 101 [Min Grade: D]
Customer Operations

Courses

CUST 401 Customer Service Practicum I 4.0 Credits
First of a three-course series. Combines classroom theory with practical application at the student's worksite, completing the learning experience. Requires students to demonstrate the ability to apply classroom learning to situations benefiting a corporation. Includes proposals, reports on work in progress, contributions to team efforts and methods of measurement identified by the faculty or mentor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST 402 Customer Service Practicum II 4.0 Credits
Second of a three-course series. Combines classroom theory with practical application at the student's worksite, completing the learning experience. Requires students to demonstrate the ability to apply classroom learning to situations benefiting a corporation. Includes proposals, reports on work in progress, contributions to team efforts and methods of measurement identified by the faculty or mentor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST 403 Customer Service Practicum III 4.0 Credits
Third of a three-course series. Combines classroom theory with practical application at the student's worksite, completing the learning experience. Requires students to demonstrate the ability to apply classroom learning to situations benefiting a corporation. Includes proposals, reports on work in progress, contributions to team efforts and methods of measurement identified by the faculty, or mentor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST I199 Independent Study in CUST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST I299 Independent Study in CUST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST I399 Independent Study in CUST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST I499 Independent Study in CUST 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor. Requires students to demonstrate the ability to apply classroom learning to situations benefiting a corporation. Includes proposals, reports on work in progress, contributions to team efforts and methods of measurement identified by the faculty or mentor.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST T180 Special Topics in CUST 1.0-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Goodwin College of Professional Studies
Repeat Status: Can be repeated multiple times for credit

CUST T280 Special Topics in CUST 1.0-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Pennoni Honors College
Repeat Status: Can be repeated multiple times for credit

CUST T380 Special Topics in CUST 1.0-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Pennoni Honors College
Repeat Status: Can be repeated multiple times for credit

CUST T480 Special Topics in CUST 1.0-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Pennoni Honors College
Repeat Status: Can be repeated multiple times for credit

Dance

Courses

DANC 100 Survey of Dance Studies 3.0 Credits
This course will include lecture, reading assignments, writing assignments and self-reflection activities to introduce students to academic dance coursework in higher education.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
DANC 101 Introduction to Dance Studies 3.0 Credits
This course will include lecture, reading assignments, writing assignments and self-reflection activities to introduce potential part-time professional dance program participants to coursework in higher education.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 110 Movement for Actors 3.0 Credits
Employs specific exercises designed to increase the actor's ability to move freely and with expression and to appreciate the role of movement in the making of theater.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 120 Yoga 3.0 Credits
The physical and intellectual study of the ancient practice of yoga. Includes both physical practice and readings related to the discipline, as well as a survey of a variety of forms of the practice.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 12 credits

DANC 131 Dance Practicum in Performance 1.0 Credit
Provides practical experience as a dancer in a Department of Performing Arts dance production. Includes helping with preperformance production, attending all rehearsals, and performing in the concerts. May be repeated for credit.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC 132 Dance Practicum in Production 1.0 Credit
Provides practical experience in dance production, including participation in publicity, costume construction, lighting design, box office, and program production for a Drexel University Dance Ensemble concert. May be repeated for credit.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC 133 Dance Practicum in Choreography 1.0 Credit
Covers the process of developing an idea into a finished dance through close work with the artistic director, including selecting dancers and music; teaching the movement; planning costumes, lighting, and sets; polishing the work; and presenting it to an audience during a Drexel University Dance Ensemble concert. May be repeated for credit.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC 140 Ballet Technique I 2.0 Credits
Introduces ballet dance vocabulary including alignment, stretching and strengthening, line, flexibility and movement phrases.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 14 credits

DANC 141 Ballet Technique II 2.0 Credits
Studio course in intermediate level ballet technique. Further develops students' alignment, line, muscular stamina, flexibility and movement vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 14 credits
Prerequisites: DANC 140 [Min Grade: D]

DANC 142 Ballet Dance Technique III 2.0 Credits
Studio course in advanced level ballet technique. Further develops students' alignment, line, muscular stamina, flexibility and movement vocabulary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 16 credits
Prerequisites: DANC 141 [Min Grade: D]

DANC 150 Modern Dance Technique I 2.0 Credits
Introduces modern dance vocabulary, including stretching and strengthening exercises, alignment, movement phrases, and basic locomotor skills. Includes performances and discussion.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 14 credits

DANC 151 Modern Dance Technique II 2.0 Credits
Covers advanced modern dance vocabulary, including stretching and strengthening exercises, alignment, movement phrases and basic locomotor skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 14 credits
Prerequisites: DANC 150 [Min Grade: D]

DANC 152 Modern Dance Technique III 2.0 Credits
This course covers advanced modern dance vocabulary, including stretching and strengthening exercises, alignment principles, movement phrases and increasingly complex locomotor skills.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 16 credits
Prerequisites: DANC 151 [Min Grade: D]

DANC 160 Jazz Dance Technique I 2.0 Credits
Introduces jazz dance style, concentrating on body isolations, movement vocabulary and the development of movement phrases.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 6 credits

DANC 161 Jazz Dance Technique II 2.0 Credits
Covers advanced jazz dance style, concentrating on body isolations, movement vocabulary, and the development of movement phrases, syncopation and flexibility.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 6 credits
Prerequisites: DANC 160 [Min Grade: D]

DANC 162 Jazz Dance Technique III 2.0 Credits
This course covers advanced jazz dance styles for highly experienced students, concentrating on body isolations, movement vocabulary and the development of movement phrases, syncopation and flexibility.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 7 times for 16 credits
Prerequisites: DANC 161 [Min Grade: D]

DANC 170 Hip-Hop Dance Technique I 2.0 Credits
Introduces hip-hop dance technique, vocabulary, movement principles, muscle control, and body alignment. Includes appreciation for funk and hip-hop with historical and cultural contexts.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 6 credits
DANC 171 Hip-Hop Dance Technique II 2.0 Credits
Advanced hip-hop dance technique, vocabulary, movement principles, muscle control, and body alignment. Includes appreciation for funk and hip-hop with historical and cultural contexts.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 8 credits
Prerequisites: DANC 170 [Min Grade: D]

DANC 180 Dance Improvisation 2.0 Credits
A studio course in creative movement. Uses contact and structured improvisational problems, interaction between dances and the elements of time, space and force.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 6 credits

DANC 181 Dance Improvisation II 2.0 Credits
A studio course in advanced creative movement. Uses improvisational problems and improvisational dance making to study momentum, speed, alignment, contact, sound, group work, and dramatic intention.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DANC 180 [Min Grade: D]

DANC 190 African Dance Technique I 2.0 Credits
This studio course is designed to explore the aesthetic, movement, music and rituals found in African Dance forms.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 6 credits

DANC 191 African Dance Technique II 2.0 Credits
This studio course is an advanced exploration of the aesthetic, movement, music and rituals found in African Dance forms. It builds on principles of African I and introduces more complex and physically demanding repertory.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 8 credits
Prerequisites: DANC 190 [Min Grade: D]

DANC 201 [WI] Dance Appreciation 3.0 Credits
Teaches students to look at dance as an art form, emphasizing the ability to analyze and understand various dance styles. Includes films, readings, performances, and discussion. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 210 Introduction to Dance 3.0 Credits
A studio and classroom course. Examines the elements of dance through study and participation in classical, theatrical, and social forms. Includes readings, films, and discussion.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 220 History of Dance 3.0 Credits
Broadly surveys dance from ancient times to the present, including development of the European aesthetic. Examines the cultural significance of dance through the ages. Includes films, performances, and discussion.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 225 Dance Repertory 4.0 Credits
This course allows dancers to synthesize their technical abilities with their knowledge of dance history as they learn the works of major historical choreographers.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 2 times for 6 credits

DANC 230 Survey of Dance and Movement Therapy 3.0 Credits
This course investigates the use of dance as a diagnostic and therapeutic tool for psychological health and recovery.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 240 Dance Composition I 3.0 Credits
Explores the basic traditional forms of solo and group composition through improvisation, manipulation of movement phrases and critique.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 241 Dance Composition II 3.0 Credits
This course explores the advanced forms of solo or group choreography including narrative, abstract and musical interactions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 2 times for 6 credits
Prerequisites: DANC 240 [Min Grade: D]

DANC 250 Dance Composition III 3.0 Credits
This course explores the advanced forms of solo and group composition. It is particularly targeted to dancers who use their bodies intensively. Techniques for injury prevention and recovery are emphasized.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 260 Injury Prevention for Dance 3.0 Credits
This course uses physical and intellectual exploration to create individual flexibility and injury prevention plans that meet the student's goals. It is particularly targeted to dancers who use their bodies intensively.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 261 Foundations of Somatic Theory and Practice 3.0 Credits
This course, for beginner through advanced, teaches you to maximize your potential for dance, sports, yoga, martial arts or any movement practice, through readings, exercises and assignments that build core strength, flexibility and efficient action.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 262 Dance and Fitness 3.0 Credits
This course explores areas of health and fitness that impact peak physical performance for dance and related activities. Topics will be covered through a combination of kinesthetic and academic approaches.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 263 Survey of Somatic Practices 3.0 Credits
This course investigates a range of integrative mind/body practices for physical well-being and optimal performance.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DANC 261 [Min Grade: D]
DANC 310 [WI] Dance Aesthetics and Criticism 3.0 Credits
This course is designed to introduce students to the concepts of aesthetics which affect the ways in which dance in created, performed and viewed. Issues of dance criticism and how this pertains to aesthetic judgment will also be addressed. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 325 [WI] Twentieth Century Dance 3.0 Credits
Covers the history of Western theatrical dance from the beginning of the century to contemporary times. Emphasizes the development of modern dance in the United States. Includes films, performances, and discussion. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 330 Introduction to Laban Movement Analysis 3.0 Credits
This course introduces the principles of movement analysis by Rudolph Von Laban including an exploration of effort - shape, space and body as introduced by physical therapist Irmgard Bartenieff.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 340 Dance Pedagogy 3.0 Credits
This course explores the social and physical development of children as it relates to the teaching of dance. Develops a repertoire of techniques for teaching children and adults.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 355 Rhythmic Study for Dance 3.0 Credits
Covers rhythmic structures that can accompany dance, including sight reading and eurhythmics.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 360 Dance Kinesiology 3.0 Credits
This course will provide an introduction to the musculoskeletal system and basic health information. Students will gain an understanding of anatomy and kinesiology and will explore how these topics are related to dance, normal daily activities, injury prevention, and healthy lifestyle choices. The kinesiological concepts presented in this course will be applied using the context of dance movement.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DANC 380 Special Topics in Dance 0.5-3.0 Credits
Covers selected topics in dance. May be repeated for credit if topics vary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC 495 Directed Studies in Dance 0.5-12.0 Credits
Offers supervised individual study of special subjects in dance. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC I199 Independent Study in DANC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC I299 Independent Study in DANC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC I399 Independent Study in DANC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC T180 Special Topics in Dance 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC T280 Special Topics in Dance 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC T380 Special Topics in Dance 0.5-3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DANC T480 Special Topics in Dance 0.5-3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Design & Merchandising

Courses
DSMR 100 Computer Imaging I 3.0 Credits
The course explores the fundamentals of computer design software including Adobe Photoshop, Illustrator and InDesign. Projects include graphics creation and manipulation; image acquisition, text creation and manipulation; typography; input and output options and control; hardware/software/system fundamentals; and troubleshooting as they relate to the creative industries.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DSMR or major is EAM.
DSMR 201 Analysis of Product 3.0 Credits
This course examines the methods by which non-apparel products are conceived, designed and brought to market. Students learn to recognize the importance of design integrity in the areas of home furnishing, cosmetics, accessories, paper products, footwear, and industrial design.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit

DSMR 205 eFashion Promotion 3.0 Credits
Utilizing current and commonly available technologies, students develop a communication plan to disseminate current trend and style information to end use customers. Students explore past, analyze and participate in the present and consider the future uses of new technologies in merchandising fashion apparel, accessories and home products.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman

DSMR 210 Presentation Techniques Design and Merchandising 3.0 Credits
This course explores the various types of presentation/storyboard formats used within the industry in merchandising product. The student learns to create an array of presentations used for visual communication among all facets of the workplace as well as market research specific to the design industry.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Prerequisites: (VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]) and (VSCM 100 [Min Grade: D] or DSMR 100 [Min Grade: D])

DSMR 211 Computer Design for Design and Merchandising 3.0 Credits
This course addresses the use of computer design as a merchandising and design tool for branding and promotion of a business or organization. The student is introduced to the branding process from a visual point of view and will create brand identity materials through the use of computer software programs including Adobe Photoshop, Illustrator and InDesign.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Prerequisites: VSCM 100 [Min Grade: D] or DSMR 100 [Min Grade: D]

DSMR 212 Visualization Techniques for Design & Merchandising 3.0 Credits
Visual Presentation for Design and Merchandising explores hand drawn and 3D computer software tools to accurately express design intentions for store and window displays, branded fixture plans as well as other design related projects. This course focuses on analog and digital techniques including diagrammatic sketching, 1-point perspective, visual note-taking and mind-mapping skills, hand coloring techniques, concept boards and SketchUp.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman  
Prerequisites: VSST 111 [Min Grade: D]

DSMR 230 Textiles for Design and Merchandising 3.0 Credits
Examines the textile manufacturing industry and the fundamental processes involved in producing natural and man-made fabrics as they relate to Design & Merchandising. Includes basic terminology and production processes as well as selection and evaluation of fabrics based on aesthetics, performance and care characteristics.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Can enroll if major is DSMR. Cannot enroll if classification is Freshman

DSMR 231 Retail Principles 3.0 Credits
Examines retail philosophies within a marketing context, including understanding of how consumer behavior, present and future, determines retailers’ marketing strategies; knowledge of product mix and product assortment; and understanding of operating retail ventures in the global marketplace.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman

DSMR 232 Retail Merchandise Planning 4.0 Credits
Provides a working knowledge of merchandise planning, flow, and distribution in the retail setting. Covers profitable merchandise and assortment planning and control in both conceptual and technical formats. Final project incorporates six-month financial, classification, and assortment planning.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Prerequisites: ACCT 115 [Min Grade: D] or ECON 201 [Min Grade: D] or DSMR 231 [Min Grade: D] or ACCT 110 [Min Grade: D]

DSMR 233 [WI] Retail Image Analysis 3.0 Credits
Examines retail philosophies within a marketing context, including understanding of how consumer behavior, present and future, determines retailers’ marketing strategies; knowledge of product mix and product assortment; and understanding of operating retail ventures in the global marketplace.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman

DSMR 235 Retail Data and Forecasting 3.0 Credits
Examines retail philosophies within a marketing context, including understanding of how consumer behavior, present and future, determines retailers’ marketing strategies; knowledge of product mix and product assortment; and understanding of operating retail ventures in the global marketplace.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman

DSMR 305 eTailing 3.0 Credits
Students explore and analyze past, current and future trends in ecommerce technologies that primarily support the back end inventory, logistics and front end operations of the fashion apparel, accessory and home products industries.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Restrictions: Cannot enroll if classification is Freshman

DSMR 307 Color and Trend Forecasting 3.0 Credits
This course provides an overview of the fashion forecasting function in Fashion, Design & Merchandising. Students investigate color and trend forecasting, design research and concepts, and fabric direction. Students apply their knowledge in "hands on" color cards and development of a trend book.  
College/Department: Antoinette Westphal College of Media Arts Design  
Repeat Status: Not repeatable for credit  
Prerequisites: DSMR 210 [Min Grade: D] or FASH 210 [Min Grade: D]
DSMR 310 Computer Integrated Merchandising Management 3.0 Credits
This course will focus on the Apparel Management functions that exist between the merchandising, design, production and promotion elements of the apparel supply chain. The student will be a member of a team that must bring a fully merchandised collection from item selection through production to retail in an ideal Vertical Merchandising System. Forecasting, collection development, production and revisions, allocation of inventory, coordinated visual presentation packaging and problem solving of anomalies in the supply chain are integrated into this course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DSMR 211 [Min Grade: D] and DSMR 232 [Min Grade: D]

DSMR 311 Visual Merchandising 4.0 Credits
Visual Merchandising combines design skills, consumer psychology and marketing principles to create window displays, floor merchandising and plan-o-grams in a retail environment that entices consumers to buy. Students will investigate related areas of store planning and design, point-of-purchase display, fixture design, and topics on trend in the industry. Students will apply the principles and elements of design in merchandise presentation, analysis and experimentation and field research. Methods of promoting and selling merchandise, analyzing leading retail firms, employing basic methods of displaying merchandise, and developing a basic understanding of the use of special materials and lighting will be integrated into experiential projects outside of the classroom.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (VSST 103 [Min Grade: D] or VSST 106 [Min Grade: D]) and DSMR 211 [Min Grade: D]

DSMR 312 Visual Merchandising II 3.0 Credits
Visual merchandising II is an in-depth look at exhibit design, where students explore the traditions, expectations and norms of exhibit design. Technological advances in exhibit design will be introduced and utilized to produce a visual outcome/presentation for exhibition purpose.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (VSST 103 [Min Grade: D] or VSST 106 [Min Grade: D]) and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D]

DSMR 313 International Fashion Merchandising 3.0 Credits
Introduces students already familiar with U.S. retail merchandising to global retail merchandising. Develops a framework for the international merchandising process and discusses effects of globalization.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DSMR 231 [Min Grade: D]

DSMR 314 Visual Merchandising III 4.0 Credits
Assuming the role of the Visual Merchandiser students apply Visual Merchandising principles to the area of store planning and design, analyze leading retailers and trends, develop an understanding of the use of materials and lighting "in store," and learn to use industry software. This course is inter-disciplinary with Interior Design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DSMR or major is INTR and classification is Junior or Senior.
Prerequisites: DSMR 311 [Min Grade: D]

DSMR 315 [WI] Media Merchandising I 3.0 Credits
Media Merchandising I explores the process of creating, designing and publishing the annual D & M Magazine and accompanying media. The students develop all content organized around theses of school, city, fashion, product and technology, their various intersections as it relates to design and merchandising. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: VSST 103 [Min Grade: D] and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D] and ENGL 103 [Min Grade: D]

DSMR 316 Media Merchandising II 3.0 Credits
Media Merchandising II is a continuation of Media Merchandising I, where critical decisions with regard to informational articles, interviews, photography, graphic design, interactive media and paid advertisement are completed. The end result is the D & M Magazine, a distributable product with actual marketing potential.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: DSMR 315 [Min Grade: D]

DSMR 317 Media Merchandising III 3.0 Credits
Students work in interdisciplinary groups to develop and produce episode based style programming for delivery on DUTV and through other media broadcast media outlets. Students will develop a promotional package for the overall program series.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DSMR or major is FMVD and classification is Junior or Senior.

DSMR 318 Music Merchandising 3.0 Credits
Students work in interdisciplinary groups with Music Industry Program artists to create a comprehensive merchandise extension program including product selection, production, distribution and promotion within the context of the artists' overall brand package.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DSMR or major is EAM or major is MUSI and classification is Junior or Senior.
DSMR 320 Merchandising and Design Directions 3.0 Credits
Merchandising and Design Directions addresses the production of prototypes for a small collection of accessories or home products. The necessary collateral promotional materials for marketing these designs to a specific target market and retail outlet will also be created.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Prerequisites: VSST 103 [Min Grade: D] and DSMR 210 [Min Grade: D] and DSMR 211 [Min Grade: D]

DSMR 321 [WI] Fashion Show Production I 2.0 Credits
Limited enrollment. This course is an examination of the Fashion Show as a sales and marketing tool and as a historically important event in the evolution of the fashion industry. An understanding of all behind-the-scenes aspects of a professional fashion show will be discussed. This course introduces a hands-on experience in addition to academic course work. Especially for students interested in event planning, public relations and marketing, this course provides experience that will be valuable as students enter the workplace.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for 6 credits
Restrictions: Can enroll if classification is Junior or Senior.

DSMR 322 Fashion Show Production II 2.0 Credits
DSMR 322, Fashion Show Production II, is a continuation of DSMR 321. Whereas DSMR 321 examined the business of the fashion show using an academic approach (lecture, projects, video), DSMR 322 is a hands-on experience, which culminates in the production of Drexel’s annual fashion show each year in June. The purpose of the course is to give students experience producing one of the College and University’s most important public relations events. Students are an integral part of the team that plans, manages and executes all phases of the Fashion Show.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: DSMR 321 [Min Grade: D]

DSMR 324 Retail Intersections: Social & Cultural Issues 3.0 Credits
Those who participate in the business of fashion such as retailers, merchants, designers, manufacturers and stylists must evolve in order to sell to customers. Throughout their lives, students are exposed to retailing, merchandising, buying, design, sales, branding, promotions, manufacturing and other such fields. For those interested in the study of retailing, fashion and merchandising, it is essential to understand landmark research and theoretical concepts behind the influences of this field and how social change, innovations and with the evolution of a multicultural marketplace, shifts have occurred over generations, and into the 21st century. This conceptual and theoretical course will expose students to a diverse range of clients and consumers.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DSMR 231 [Min Grade: D]

DSMR 325 Retail Buying and Assortment Strategies 4.0 Credits
Advanced buying strategies focuses on in-season merchant operations of the merchant organization. Students develop assortment and promotional plans and learn to react to changes in their plans as the season unfolds. Students perform "hands on" tasks in conjunction with the D & M retail outlets.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DSMR 232 [Min Grade: D]

DSMR 326 Fashion Product Promotion 4.0 Credits
This course examines aspects of Fashion Product Promotion in Design & Merchandising. Students will study a “host” city which will become integral in their retail promotional strategy. Students will conduct demographic, geographic, logistics, marketing and media through a variety of research methods. This course is offered as part of London Study Abroad and online with a Hong Kong partner school.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 8 credits

DSMR 327 Retailing & Merchandising 3.0 Credits
Provides an overview of both knitted and woven apparel. Covers the procedures and processes involved in apparel product development, particularly as related to retail merchandising and marketing. Considers styling as a reflection and a reinterpretation of current trends in specific markets.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 201 [Min Grade: D]

DSMR 328 Fashion Show Production III 3.0 Credits
Students work on a variety of hands on projects surrounding our retail laboratory, supporting the d&m popup and online retail outlets. Tasks may include: Product development, buying, visual merchandising, photography, operations, data collection, analysis and promotion.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 4 times for 15 credits

DSMR 329 D&M Practicum 3.0 Credits
Students work on a variety of special projects for ongoing D&M Program administration and special project requests from Industry and Community Partners that vary each term. The Industry and Community Partners and the D&M program are seen as clients, and these special projects are integral to their business. Examples include: developing content for the D&M program Social Media, developing and implementing mannequin display throughout the D&M program space, providing event planning support for community or industry partner events.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 8 credits

DSMR 333 Fashion Product Development 3.0 Credits
This course examines aspects of Fashion Product Promotion in Design & Merchandising. Students will study a “host” city which will become integral in their retail promotional strategy. Students will conduct demographic, geographic, logistics, marketing and media through a variety of research methods. This course is offered as part of London Study Abroad and online with a Hong Kong partner school.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 201 [Min Grade: D]

DSMR 337 Retail Practicum 3.0 Credits
Students work on a variety of hands on projects surrounding our retail laboratory, supporting the d&m popup and online retail outlets. Tasks may include: Product development, buying, visual merchandising, photography, operations, data collection, analysis and promotion.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 4 times for 15 credits

DSMR 398 D&M Practicum 0.5-4.0 Credits
Students work on a variety of special projects for ongoing D&M Program administration and special project requests from Industry and Community Partners that vary each term. The Industry and Community Partners and the D&M program are seen as clients, and these special projects are integral to their business. Examples include: developing content for the D&M program Social Media, developing and implementing mannequin display throughout the D&M program space, providing event planning support for community or industry partner events.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.
DSMR 410 Career Strategies for Design and Merchandising 3.0 Credits
Course develops skills that enable the student to put into place an effective job search strategy. Specifically geared to the D&M professions, students develop comprehensive area of expertise including networking, industry research, and industry hiring trends.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

DSMR 411 Design and Merchandising Portfolio Design 3.0 Credits
Students will prepare a complete visual showcase of their marketability and skills. Accepted industry standards, targeting visual elements to specific job goals and self-promotion will be emphasized.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DSMR 434 Fashion Product Sourcing 3.0 Credits
This course explores the history and growth of sourcing. Students consider the consumer benefits in terms of lower prices and quality. Sourcing is analyzed from the retail/product development point of view and will examine challenges they face in the global arena.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DSMR 333 [Min Grade: D]

DSMR 465 Special Topics in Design and Merchandising 0.5-12.0 Credits
Provides study in design and merchandising on a special topic or on an experimental basis. May be repeated for credit if topics vary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

DSMR 477 [WI] Design and Merchandising Seminar 3.0 Credits
Provides reading and discussion of pertinent topics of current concern in the professional area of design and merchandising. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DSMR.
Cannot enroll if classification is Freshman

DSMR 496 [WI] Senior Problem in Design and Merchandising 3.0 Credits
Provides an opportunity for the student to research, independently or within a group, an idea within the field of design-merchandising, synthesizing material and developing a presentation of that concept. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

DSMR I499 Independent Study in Design & Merchandising 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DSMR I399 Independent Study in Design & Merchandising 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DSMR I299 Independent Study in Design & Merchandising 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Digital Media

Courses

DIGM 100 Digital Design Tools 3.0 Credits
Students learn the basics of visual design within the digital realm. Software tools such as Adobe Photoshop and Illustrator are utilized.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DIGM 105 Overview of Digital Media 3.0 Credits
Surveys the history, theory, practice, technologies, and related social issues associated with the growth of digital media.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
DIGM 110 Digital Spatial Visualization 3.0 Credits
Students learn to represent 3D objects and spaces in 2D media using a variety of drawing and computer graphic techniques. This course lays important foundations for subsequent courses in 3D computer modeling and animation.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 100 [Min Grade: D] and VSST 110 [Min Grade: D]

DIGM 220 Digital Still Imaging I 3.0 Credits
Introduces the still image for majors in screen-based visual media. Covers the making, appreciation, and critical analysis of images produced by still cameras using both film and digital capture. Screen-based presentation is primary, but a number of print-based projects are included.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 100 [Min Grade: D] and VSST 101 [Min Grade: D] or VSST 108 [Min Grade: D]

DIGM 221 Digital Still Imaging II 3.0 Credits

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 220 [Min Grade: D]

DIGM 223 Creative Concept Design 3.0 Credits
This course explores methods to develop design concepts on demand. Topics to be considered include recognizing one’s imaginative potential, expanding fanciful memory, and maintaining a creative ecology of mind.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

DIGM 250 Professional Practices 3.0 Credits
Provides a professional orientation to the field through an exploration of a variety of digital media projects. In addition to lecture and discussions, allows students to take active part in role plays and presentations to achieve an understanding of the importance of team building, team work, and team management in all phases of digital media production from proposal to product delivery.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: DIGM 242 [Min Grade: D]

DIGM 252 Multimedia Timeline Design 3.0 Credits
Introduces basic design concepts and tools to create time based 2D and 3D multimedia. Addresses issues from pre-production planning, through, post-production and delivery; emphasis on time-based multimedia.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 100 [Min Grade: D]

DIGM 281 Interactive TV DVD-ROM 3.0 Credits
Students work to develop strategies for meaningful retrieval of mass amounts of media (video, still images, sounds, and text) for television DVD-ROM players. This course will cover basic forms of digital information storage and retrieval to and from TV DVD-ROM media.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DIGM or major is EAM or major is FMVD
Prerequisites: DIGM 100 [Min Grade: D]

DIGM 291 Internship in Digital Media 0.5-12.0 Credits
Provides an internship in the field of digital media, with a minimum of 100 hours for 3 credits in a ten-week term. Requires students to provide an initial informational sheet on the internship and submit a final paper on the experience. Department permission required.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

DIGM 305 [WI] Digital Storytelling 3.0 Credits
By surfing the internet and playing computer games, by lectures, assigned readings, class screening, and research projects, this class explores the impact of digital media on art, design and daily living. This is a writing intensive course.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

DIGM 399 Independent Project-Digital Media 2.0-12.0 Credits
Supervised planning and execution of a project in the area of digital media. Department permission required.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

DIGM 451 [WI] Explorations in New Media 3.0 Credits
Through class presentations, field trips, discussions, readings, screenings and guest speakers; this class bridges artistic and technical aspects of new media in theory and practice. This is a writing intensive course.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

DIGM 465 Special Topics-Digital Media 3.0 Credits
Addresses current topics in a rapidly changing field. Possible offerings include multimedia databases, virtual reality modeling language (VRML), real-time 3-D graphics, open GL programming, interactive art in virtual space, and multithreaded narrative. May be repeated for credit if topics vary.

College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
DIMG 475 [WI] Seminar: The Future of Digital Media 3.0 Credits
Focuses on current and anticipated issues in digital media. Involves reading and discussion of news, product announcements, articles, and predictions related to digital media. Provides a comprehensive and up-to-date understanding of digital media, including its likely directions in the immediate future and long-term possibilities. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: DIGM 492 [Min Grade: D]

DIMG 490 Digital Media Senior Project 3.0 Credits
In this course students produce professional-level media assets for a team based senior project in a simulated real-world production environment. It requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the overall field as well as in one or more specializations. Students will refine their understanding of the production, delivery and presentation of quality digital media production through implementation of professional best practices, and practice and perfect written, oral, and visual presentation skills through the power of collaboration, teamwork and shared missions.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 2 times for 9 credits
Prerequisites: (ANIM 312 [Min Grade: D] or GMAP 377 [Min Grade: D] or IDM 372 [Min Grade: D]) and DIGM 451 [Min Grade: D]

DIMG 491 Digital Media Senior Project Studio 1.0 Credit
In this course Digital Media senior project teams will meet with an appointed advisor on the technical details of their specific project requirements.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 2 times for 3 credits

DIMG 492 Senior Project in Digital Media I 3.0 Credits
The first of a two-course sequence. Requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the overall field as well as in one or more specializations.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

DIMG 493 Senior Project in Digital Media II 3.0 Credits
The second of a two-course sequence.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DIGM and classification is Senior.
Prerequisites: DIGM 492 [Min Grade: D]

DIMG 494 Senior Project in Digital Media III 3.0 Credits
The third of a three-course sequence. Requires a project that demonstrates the integration of the academic and practical knowledge the student has acquired in the over all field as well as in one or more specializations.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DIGM and classification is Senior.
Prerequisites: DIGM 493 [Min Grade: D]

DIMG 499 Independent Study in Digital Media 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG I299 Independent Study in Digital Media 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG I399 Independent Study in Digital Media 2.0-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG I499 Independent Study in Digital Media 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG T180 Special Topics in Digital Media 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG T280 Special Topics in Digital Media 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG T380 Special Topics in Digital Media 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

DIMG T480 Special Topics in Digital Media 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Economics

Courses

ECON 201 Principles of Microeconomics 4.0 Credits
Examines allocation of resources within an economy. Major topics include interaction of supply and demand in markets, consumer choice, cost structure of firms, and profit maximization for competitive forms as well as firms with market power.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
ECON 202 Principles of Macroeconomics 4.0 Credits
Examines measurement, growth, and fluctuation of aggregate economic activity. Includes national income accounting and explains determination of output, employment, and price level. Also provides an introduction to international economics, money and banking, and economic policy. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 201 [Min Grade: D] (Can be taken Concurrently)

ECON 203 Survey of Economic Policy 4.0 Credits
This course will introduce students to the application of economic principles for a variety of policy-relevant topics covered in more advanced economics classes. Examples of applications may include the analysis of financial and economic crises, mergers, free trade agreements, social security, and unemployment.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 202 [Min Grade: D] (Can be taken Concurrently) ECON 201 [Min Grade: D]

ECON 240 Economics of Health Care Systems 4.0 Credits
Examine the health care industry from an economic perspective, including demand, cost-benefit analysis, insurance, supply constraints, and the role of the government.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

ECON 250 Game Theory and Applications 4.0 Credits
Introduces the basic ideas of game theory with a minimum of mathematics; and discusses applications to economics, politics, business, behavioral science, philosophy, population biology and engineering.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: STAT 201 [Min Grade: C] or STAT 205 [Min Grade: C] or MATH 107 [Min Grade: C]

ECON 260 Economics of Small Business 4.0 Credits
Discusses economic topics relevant to the role and varieties of small businesses in industrialized economies, and to government policy with respect to small business.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 201 [Min Grade: C]

ECON 301 Microeconomics 4.0 Credits
Examines theory of the firm and theory of the consumer in a rigorous fashion. Also covers risk and uncertainty, price determination, market failures, and analysis of various government policies.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

ECON 302 Principles of Macroeconomics 4.0 Credits
Provides an in-depth introduction to dominant theories behind short-run economic fluctuations and long-run economic growth. Employs both mathematical and graphical tools to discuss determination of output, employment, and price level in the aggregate economy. Also covers effectiveness of monetary and fiscal policies in dealing with unemployment and inflation.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit

ECON 305 Managerial Economics 4.0 Credits
Covers applied economics relevant for decision-making processes. Emphasizes profit management, demand and cost analysis, pricing, and government policy.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

ECON 310 International Macroeconomics 4.0 Credits
This course covers fundamental issues in open economy macroeconomics. We will learn about how fiscal and monetary policy work when the economy is open to international trade in goods and services and to international capital flows. We will also study the effects of these policies on the current account and the exchange rate. The course treatment will be mainly theoretical. However, we will frequently refer to features of the international financial markets data, and we will use examples, case studies, readings, videos and policy applications to illustrate the findings of the theory and/or to try to bridge the gap between the predictions of theoretical models and real world developments.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]
ECON 334 Public Finance 4.0 Credits
This course explores the role of government in the economy. Students will analyze the rationales for government policies as well as their implications for equity and efficiency. Much of the course will center on current policy issues related to the national debt, Social Security, education, environmental protection and taxation. Both theoretical applications and empirical findings will be discussed.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

ECON 336 Labor Economics 4.0 Credits
Develops an understanding of how labor institutions operate to determine wages and employment. Examines alternative policy questions involving unemployment and inflation, collective bargaining, investment in education and training, and other labor-related questions. Requires students to apply theoretical and empirical abilities to research a labor-related issue and improve the ability to think clearly and communicate effectively.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

ECON 338 Industrial Organization 4.0 Credits
Examines observational studies of industries with respect to competitive or non-competitive structure, conduct, and performance. Considers implications of profitability, technological innovation, antitrust policy, and competitiveness in trade. Reviews problems of measurement and sources of data.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

ECON 342 Economic Development 4.0 Credits
Covers topics including driving forces of economic growth, economic planning, income distribution and poverty, labor migration, capital markets and saving, international debt problems and global economic crisis. Emphasizes underlying theories and realities of economic growth and development of less developed economies and emerging economies.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

ECON 344 Comparative Economic Systems 4.0 Credits
Covers theory and contemporary practices of capitalism, socialism, fascism, and the welfare state as economic systems.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

ECON 348 Mathematical Economics 4.0 Credits
Discusses the application of mathematics in economic models, with extensive discussion of economic applications of linear algebra and calculus. Considers implications of the assumptions of maximization of profits and utility. Stresses mathematical models and techniques useful in statistical applications of economics.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and (MATH 102 [Min Grade: C] or MATH 121 [Min Grade: C])

ECON 350 [WI] Applied Econometrics 4.0 Credits
Applies statistics to economics, with emphasis on the special problems of statistical analysis of economic data, sources of data, and examples of applications and models. Covers forecasting the impacts of changing economic policy and of developments in industrial markets using economic-statistical models. This is a writing intensive course.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C] and STAT 201 [Min Grade: C]

ECON 351 Resource and Environmental Economics 4.0 Credits
Examines the microeconomic and quantitative aspects of markets for both renewable and exhaustible resources, and the interaction between the energy and resource sectors of the economy and between the productive sectors of the economy and the natural environment, with evaluation of major public policy initiatives and issues in these areas.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: C] and ECON 202 [Min Grade: C]

ECON 360 Time Series Econometrics 4.0 Credits
Introduce time-series econometric models and provide tools for empirical analysis using time-series economic and financial data, with specific emphasis on application and forecasting.
College/Department: LeBow College of Business
Repeat Status: Not repeatable for credit
Prerequisites: ECON 201 [Min Grade: D] and ECON 202 [Min Grade: D] and ECON 350 [Min Grade: D]

ECON I199 Independent Study in ECON 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON I299 Independent Study in ECON 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit
ECON I399 Independent Study in ECON 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON I499 Independent Study in ECON 0.5-5.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON T180 Special Topics in ECON 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON T280 Special Topics in ECON 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON T380 Special Topics in ECON 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

ECON T480 Special Topics in ECON 0.5-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: LeBow College of Business
Repeat Status: Can be repeated multiple times for credit

Education Human Resource Development

Courses

EHRD 205 Organizational Learning & Strategy 3.0 Credits
The purpose of this course is to help learning professionals understand how to align learning functions with strategic goals of the organization in order to support leadership functions. Students will develop an understanding of learning in, by, and across organizations, explore barriers to change, and discuss and apply specific tools and processes to facilitate and sustain change and tighten the alignment of organizational learning and strategy.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 101 Learning, Culture & Technology Workshop I 3.0 Credits
The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 103 Foundation in Education III: Learning Sciences 3.0 Credits
This foundations course introduces students to the Learning Sciences, an interdisciplinary field that draws on multiple theoretical perspectives and research paradigms with the goal of advancing and applying knowledge about human learning and development. Its purpose is to introduce students to basic concepts and findings relevant to theory, design, and research in the Learning Sciences, with specific focus on how those concepts and findings apply to learning environments and experiences. Students will learn the rich history about learning and acquire a deep understanding of how the notion of learning has evolved over time. Students will collaborate to design learning environments from different theoretical perspectives on learning.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 201 Learning, Culture and Technology Workshop II 3.0 Credits
The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 238 New Media Literacies 3.0 Credits
This course provides an in-depth exploration of new media literacies including the practices and concepts of fan fiction writing, online social networking, video gaming, appropriation and remixing, tinkering and making, transmedia navigation, multitasking, performance, distributed cognition, and collective intelligence. It examines literacy as a sophisticated set of meaning-making activities situated in specific social spaces. Students will learn how new media are changing the dimensions of school literacies and challenge traditional ways of learning and communicating.
College/Department: School of Education
Repeat Status: Not repeatable for credit
EDLT 250 Sociocultural Perspectives on Learning 3.0 Credits
This course will focus on knowing and learning from sociocultural perspectives and will include emphasis on both recent research and seminal literature. The course will begin with an introduction to sociocultural research and then explore how these theories can be used to understand how learning occurs in various disciplines.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 301 Learning, Culture & Technology Workshop III 3.0 Credits
The Workshops (EDLT 101, 201, 301) are comprised of a set of three project-based courses that will provide innovative, rigorous, and immersive educational experiences in diverse learning environments that focus on emerging technologies, authentic and situated learning and contextual factors. Students will observe, document, analyze, and describe complex learning situations, develop different learning designs, and an e-portfolio, and explore social and cultural perspectives on learning.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 339 Future Pedagogies 3.0 Credits
This course introduces learners to learning and designing experiences for complex domains. Students explore current pedagogies and how to assess the progress of learning. Students learn how to think about and design learning environments to facilitate different types of knowledge to support novice to expert learners.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 353 Play and Learning in Participatory Cultures 3.0 Credits
In this course, students examine the role of play along the developmental continuum and in immersive and interactive learning spaces. Students also examine how play impacts learning in the context of participatory cultures. Students focus on play, its role in learning in social spaces, and the current research around these practices. Students study the issues relating to how schools, organizations, and society are responding to the challenges of emerging technologies through the design of participatory spaces.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 354 Learning In and Out of Schools 3.0 Credits
The term “informal learning environments” (ILEs) is often used to describe places and activities where learning occurs outside of more formal settings such as schools, universities, etc. Examples of ILEs include after school activities, museums, zoos, and so on. This course is an introduction to ILEs and theories related to understanding how learning occurs within them. The course will also consider similarities and differences between learning in and out of schools.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 491 Senior Project I 3.0 Credits
The Senior Project courses (EDLT 491, 492, 493) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students’ integrating materials from other courses in service of better learning environments.
College/Department: School of Education
Repeat Status: Not repeatable for credit

EDLT 492 Senior Project II 3.0 Credits
The Senior Project courses (EDLT 491, 492, 493) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students’ integrating materials from other courses in service of better learning environments.
College/Department: School of Education
Repeat Status: Not repeatable for credit

Prerequisites: EDLT 491 [Min Grade: D]

EDLT 493 Senior Project III 3.0 Credits
The Senior Project courses (EDLT 491, 492, 493) are a set of three courses intended to immerse student teams in the design, implementation, and evaluation of a substantial project. Most educational design research involves teams in their creation, so it is essential to develop those skills. Students collaborate on an extended project to better understand project and time management issues related to large design projects. The courses also facilitate students’ integrating materials from other courses in service of better learning environments.
College/Department: School of Education
Repeat Status: Not repeatable for credit

Prerequisites: EDLT 491 [Min Grade: D] and EDLT 492 [Min Grade: D]

Electrical & Computer Engineering

Courses
ECE 101 Electrical and Computer Engineering in the Real World 1.0 Credit
This seminar introduces students to highly visible and compelling applications of ECE through the use of familiar real-world applications. The course will highlight some of the high-impact advances of ECE and the importance of ECE in our daily lives. Fundamental concepts, such as electricity, light, computing, networking, and signal processing will be introduced in this context and explained at an introductory level. This course is intended to inspire students to pursue ECE and will lead them directly into ECE 102.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
ECE 102 Applications of Electrical and Computer Engineering 2.0 Credits
Introduces the basic fundamentals of ECE through the use of real-world applications. The course will introduce Signals and Systems, Analog electronic basics, as well as Digital numbers and systems. The course will introduce students to basic ECE material, preparing the students for ECE 200 and ECE 201.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECE 121 Introduction to Entertainment Engineering 3.0 Credits
This introductory survey course will focus on the four prevailing entertainment media: music, images, video, and games. We will explore how each medium is represented digitally and reveal the technologies used to capture, manipulate and display such content. Technical standards used in everyday entertainment devices (mp3, H.264, JPEG 1080p, HDMI) will be explained in layman’s terms. The goal is to provide students with technical literacy for using digital media.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECE 200 Digital Logic Design 4.0 Credits
Number systems and representation, two's complement arithmetic, digital logic devices, switching algebra, truth tables, minimization of Boolean functions, combinatorial logic design and analysis, sequential circuit analysis and design.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 171 [Min Grade: D] or ENGR 103 [Min Grade: D] or ENGR 104 [Min Grade: D]

ECE 201 Foundations of Electric Circuits 4.0 Credits
Covers basic electric circuit concepts and laws; circuit theorems; mesh and node methods; analysis of first- and second-order electric circuits; force and natural response; sinusoidal steady state analysis; complex frequency.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is CAE or classification is Freshman
Prerequisites: PHYS 211 [Min Grade: D] or PHYS 281 [Min Grade: D] or PHYS 102 [Min Grade: D]

ECE 203 Programming for Engineers 3.0 Credits
Fundamentals of computer organization; rudiments of programming including data types, arithmetic and logical expressions, conditional statements, control structures; problem solving techniques for engineers using programming; object-oriented programming; arrays; simulation of engineering systems; principles of good programming practice.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ECE 211 Electrical Engineering Principles 3.0 Credits
Not open to electrical or mechanical engineering students. Covers basic techniques of electric circuit analysis, electronic devices, amplifiers, operational amplifier, and fundamentals of instrumentation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is EE or major is MECH or classification is Freshman
Prerequisites: (MATH 201 [Min Grade: D] or ENGR 231 [Min Grade: D] or MATH 261 [Min Grade: D]) and (PHYS 211 [Min Grade: D] or PHYS 281 [Min Grade: D] or PHYS 102 [Min Grade: D])
Corequisite: ECE 212

ECE 212 Electrical Engineering Principles Laboratory 1.0 Credit
Not open to electrical or mechanical engineering students. Includes experiments involving concepts discussed in ECE 211.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is EE or major is MECH or classification is Freshman
Corequisite: ECE 211

ECE 222 Digital Signal Processing 4.0 Credits
Covers discrete-time, linear, time-invariant systems and their mathematical models, the z-transform, the discrete Fourier transform, spectral estimation, and linear prediction.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is EE or major is MECH or classification is Freshman
Prerequisites: ECE 200 and ECE 201.
Corequisite: ECE 212

ECE 231 Signals and Systems 3.0 Credits
This course will cover topics related to probability and statistics. Probability topics include sample space and probability, discrete and continuous random variables, expectation, variance, covariance, correlation, conditional expectation, conditional variance, the weak and strong law of large numbers and the central limit theorem. Statistics topics include properties of a random sample, principles of data reduction, and point estimation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 203 [Min Grade: D]

ECE 241 Theory of Electric Circuits 4.0 Credits
Covers basic electric circuit concepts and laws; circuit theorems; mesh and node methods; analysis of first- and second-order electric circuits; force and natural response; sinusoidal steady state analysis; complex frequency.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is EE or major is MECH or classification is Freshman
Prerequisites: ENGR 202 [Min Grade: D] and (ENGR 231 [Min Grade: D] or MATH 261 [Min Grade: D])

ECE 261 Probability for Engineers 4.0 Credits
This course will cover topics related to probability and statistics. Probability topics include sample space and probability, discrete and continuous random variables, expectation, variance, covariance, correlation, conditional expectation, conditional variance, the weak and strong law of large numbers and the central limit theorem. Statistics topics include properties of a random sample, principles of data reduction, and point estimation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 203 [Min Grade: D]

ECE 262 Engineering Statistics 3.0 Credits
This course will cover topics related to statistics and probability. Probability topics include sample space and probability; discrete and continuous random variables, expectation, variance, the law of large numbers and the central limit theorem. Statistics topics include properties of a random sample, principles of data reduction, point estimation, hypothesis testing, interval estimation, and linear regression.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ENGR 202 [Min Grade: D] and ENGR 231 [Min Grade: D]) or (ENGR 202 [Min Grade: D] and MATH 261 [Min Grade: D])
ECE 391 Introduction to Engineering Design Methods 1.0 Credit
Introduces the design process, including information retrieval, problem
definition, proposal writing, patents, and design notebooks. Includes
presentations on problem areas by experts from industry, government,
and education.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

ECE 491 [WI] Senior Design Project I 2.0 Credits
Introduces the design process, including information retrieval, problem
definition, proposal writing, patents, and design notebooks. Includes
presentations on problem areas by experts from industry, government,
and education. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECE 391 [Min Grade: D] and ECE 361 [Min Grade: D]

ECE 492 [WI] Senior Design Project II 2.0 Credits
Continues ECE 491. Requires written and oral progress reports. This is a
writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECE 491 [Min Grade: D]

ECE 493 Senior Design Project III 4.0 Credits
Continues ECE 492. Requires written and oral final reports, including oral
presentations by each design team at a formal Design Conference open
to the public and conducted in the style of a professional conference.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECE 492 [Min Grade: D]

ECE I999 Independent Study in ECE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation
with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE I299 Independent Study in ECE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation
with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE I399 Independent Study in ECE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation
with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE I499 Independent Study in ECE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation
with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE T180 Special Topics in ECE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE T280 Special Topics in ECE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE T380 Special Topics in ECE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE T480 Special Topics in ECE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Electrical & Computer Engineering - Power Engineering

Courses

ECEP 352 Electric Motor Control Principles 4.0 Credits
Introduces machinery principles, magnetic circuits, three-phase circuits,
the electrical and economic structure of the power industry, ac and
dc machine fundamentals, and power electronic converters and their
interfaces with electric motors. Some or all pre-requisites may be taken as
either a pre-requisite or co-requisite. Please see the department for more
information.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: Cannot enroll if classification is Freshman
Restrictions: ECEE 302 [Min Grade: D] (Can be taken Concurrently)
(ECE 201 [Min Grade: D] or ECES 211 [Min Grade: D])

ECEP 354 Energy Management Principles 4.0 Credits
Covers principles of power engineering, including the electrical and
economic structure of the power industry (distribution, subtransmission,
and bulk transmission levels; environmental issues; the electrical system
analysis; the thermal system analysis; links between electromechanics
and thermodynamics; and safety issues). Some or all pre-requisites
may be taken as either a pre-requisite or co-requisite. Please see the
department for more information.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 302 [Min Grade: D] (Can be taken Concurrently)
(ECE 201 [Min Grade: D] or ECES 211 [Min Grade: D])
ECEP 371 Introduction to Nuclear Engineering 2.0 Credits
This course introduces the student to the fundamental topic of nuclear engineering. This course should be the first course for students interested in the nuclear engineering minor, as all of the topics will be discussed in greater detail in other courses. Topics include atomic and nuclear structure, binding energy, reaction kinetics and energetics, and radioactive decay.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 201 [Min Grade: C]

ECEP 372 Radiation Detection and Measurement 3.0 Credits
Introduces students to the fundamentals of radiation detection, and applications of radiation detection equipment.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEP 371 [Min Grade: D] or ECEP 404 [Min Grade: D] or MEM 371 [Min Grade: D]

ECEP 380 Introduction to Renewable Energy 3.0 Credits
Introduction to Renewable Energy is an undergraduate survey course for engineers, scientists and others interested in energy systems and applications. The course introduces students to the mix of current major electric power sources and the pressures that are forcing a transition to renewable sources. Wind and solar energy will be studied in detail, with others as time allows. Course culminates with an integrating off-grid energy system design.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 122 [Min Grade: D] and (PHYS 102 [Min Grade: D] or PHYS 115 [Min Grade: D] or PHYS 154 [Min Grade: D])

ECEP 402 Theory of Nuclear Reactors 4.0 Credits
Introduces students to atomic and nuclear physics, radiation interaction with matter, components of nuclear reactors, neutron diffusion and moderation, nuclear reactor theory, and heat removal from nuclear reactors.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 210 [Min Grade: D]

ECEP 403 Nuclear Power Plant Design & Operation 3.0 Credits
Introduces students to the design of nuclear power plants. Topics covered include electrical transmission, non-nuclear related equipment, fluid flow, heat transfer, thermodynamics, heat exchangers, pump, valves, piping and nuclear reactor design. Course includes a final project which is the design of a nuclear power plant.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECEP 404 Introduction to Nuclear Engineering 2.0 Credits
Introduces the fundamental scientific, technical, social and ethical issues in nuclear engineering; nuclear reactions and radiation, radiation protection and control, nuclear energy production and utilization, nuclear fuel cycle, nuclear fuel cycle, nuclear materials, controlled fusion and thermonuclear plasma systems, basics of plasma physics and plasma chemistry, nuclear waste management, nuclear reactor safety, analysis of severe nuclear accidents, risk assessment and related issues of engineering ethics.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 201 [Min Grade: D] and (ENGR 210 [Min Grade: D] or CHE 206 [Min Grade: D])

ECEP 406 Introduction to Radiation Health Principles 3.0 Credits
This course is intended to impart radiation safety knowledge to the nuclear engineering student. A fundamental knowledge of radiation safety is critical for all nuclear engineers.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MEM 371 [Min Grade: D] or ECEP 404 [Min Grade: D]

ECEP 411 Power Systems I 3.0 Credits
Covers steady state generator, transformer and transmission line modeling used for balanced steady state power system analysis including three-phase to single-phase model conversion, per-unit analysis, generator and line loadability, transformer and transmission line voltage regulation and reactive compensation.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 352 [Min Grade: D]

ECEP 412 Power Systems II 4.0 Credits
Covers y-bus based analysis of power systems including steady-state power-flow models and algorithms, economic dispatch of power generation, load-frequency control and introduction to transient stability analysis including time-domain simulation and equal area criterion.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 411 [Min Grade: D]

ECEP 413 Power Systems III 3.0 Credits
Covers Z-bus-based analysis of power systems including symmetrical component networks of generators, transformers, transmission lines and loads, symmetrical and unbalanced three-phase bus and line faults, and an introduction to power system protection.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 412 [Min Grade: D]
ECEP 421 Modeling and Analysis of Electric Power Distribution Systems 3.0 Credits
Introduction to power distribution systems; balanced and unbalanced systems, component and load modeling, radial and weekly meshed topologies; algorithms for unbalanced power studies including radial and general structure solver.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 352 [Min Grade: C]
Corequisite: ECEP 411

ECEP 422 Power Distribution Automation and Control 3.0 Credits
Focuses on distribution management systems and their application: including optimizing network operation - capacitor placement and control, network reconfiguration, service restoration. Modern solution technologies are addressed.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 421 [Min Grade: C]

ECEP 423 Service and Power Quality Distribution Systems 3.0 Credits
Focus on power distribution systems: service and power quality assessment including stat estimation, voltage quality, trouble call analysis, service restoration, component and system reliability assessment.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 422 [Min Grade: C]

ECEP 431 Advanced Electromagnetic Energy Conversion I 4.0 Credits
Covers theory and operation of alternating current machinery, with emphasis on design alternatives and the effects of design on performance. Includes construction of machine models from laboratory measurements.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 352 [Min Grade: D]

ECEP 432 Advanced Electromagnetic Energy Conversion II 4.0 Credits
Covers dynamic behavior and transient phenomena of rotating machines and the mathematical models used to describe them, generalized machine theory, measurement of parameters for the mathematical models, and measurement of dynamic and transient behavior.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 431 [Min Grade: D]

ECEP 441 Protective Relaying 3.0 Credits
Covers operating principles of electromechanical and static relays, fault clearance, and protection of individual parts of a power system. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 411 [Min Grade: D] (Can be taken Concurrently) ECEP 352 [Min Grade: D]

ECEP 451 Power Electronic Converter Fundamentals 3.0 Credits
Fundamentals of power electronics that include waveforms, basic power switch properties and magnetic circuits. Introduction to basic power electronic converter circuits: diode and phase-controlled rectifiers and inverters; switch-mode converters. Applications to DC and AC power supply systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 352 [Min Grade: D]

ECEP 452 Experimental Study of Power Electronic Converters 3.0 Credits
Experimental study of common power electronic converters: diode rectifiers, phase-controlled rectifies, switch-mode inverters. Both hardware and software studies. Additional lectures on: Study of DC-DC switch-mode converters.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 451 [Min Grade: D]

ECEP 453 Applications of Power Electronic Converters 3.0 Credits
Provides a first look at various power electronic applications in residential, commercial and industrial sites. Examples include utility application such as static var compensators (SVC), thyristor switch capacitors (TSC), high voltage direct-current (HVDC) transmission systems among others. In addition, fundamentals of motor drives and their controls are covered. Examples include induction, DC synchronous and specialized motors.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 451 [Min Grade: D]

ECEP 461 High Voltage Laboratory 1.0 Credit
Requires students to perform four basic experiments to become familiar with high-voltage techniques and then do a high-voltage design project of their own choosing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEP 352 [Min Grade: D]

ECEP 471 Power Seminar I 0.5 Credits
Discusses current developments in power system operation and research, concentrating on current and future energy sources.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
ECEP 472 Power Seminar II 0.5 Credits
Discusses current developments in power system operation and research, concentrating on generating stations, transmission lines, and substations.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ECEP 473 Power Seminar III 0.5 Credits
Discusses current developments in power system operation and research, concentrating on distribution, security, and economics.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ECEP 480 Solar Energy Engineering 3.0 Credits
Covers design of grid-connected and battery backup grid-connected photovoltaic systems. Both electrical and mechanical aspects are included. Topics include system components (solar cells, charge controllers, maximum power point trackers, inverters, etc.), system economics, computer and web-based design aids, electrical codes and standards, externalities of PV systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: ECEE 302 [Min Grade: D] or ECEE 352 [Min Grade: D] or CHE 431 [Min Grade: D] or ECEP 380 [Min Grade: D]

ECEP 497 Research in Power Systems 0.5-12.0 Credits
Requires independent study in a topic approved by the faculty.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP I199 Independent Study in ECEP 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP I299 Independent Study in ECEP 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP I399 Independent Study in ECEP 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP I499 Independent Study in ECEP 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ECEP T180 Special Topics in ECEP 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP T280 Special Topics in ECEP 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECEP T380 Special Topics in ECEP 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEP T480 Special Topics in ECEP 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

Electrical & Computer Engineering - Computers

Courses

ECEC 301 Advanced Programming for Engineers 3.0 Credits
An advanced introduction to classes and objects; inheritance and polymorphism; abstract classes and interfaces; exception handling; files and streams; garbage collection and dynamic memory allocation; recursion; using linked lists, stacks, queues, and trees; search and sorting algorithms; generic methods and classes; a comparative introduction to dominant programming languages; engineering examples.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 203 [Min Grade: D] or CS 203 [Min Grade: D]

ECEC 302 Digital Systems Projects 4.0 Credits
Studies the theory of digital system design and the topdown design methodology using hardware description language and software tools for simulation, synthesis and Field Programmable Gate Array (FPGA) implementation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CS 171 [Min Grade: D] (Can be taken Concurrently) or ECE 203 [Min Grade: D] and ECE 200 [Min Grade: D]

ECEC 304 Design with Microcontrollers 4.0 Credits
Offers hands-on experience in the design of controllers that incorporate microcontrollers as an embedded component in a larger system. The microcomputer topics to be studied will include architecture, software, programming and interfaces.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECE 200 [Min Grade: D] and (CS 171 [Min Grade: D] or ECE 203 [Min Grade: D] or CS 203 [Min Grade: D])
ECEC 352 Secure Computer Systems: Design Concepts 4.0 Credits
Covers concepts of secure computation, including economics vs. faults, errors, and hidden messages; mathematical foundations of secure computing; design issues in fault-tolerant computing; and testability and cryptography.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 302 [Min Grade: D] and MATH 221 [Min Grade: D]

ECEC 353 Systems Programming 3.0 Credits
This course introduces computer systems, including interaction of hardware and software through the operating system, from the programmer's perspective. Three fundamental abstractions are emphasized: processes, virtual memory, and files. These abstractions provide programmers a common interface to a wide variety of hardware devices. Topics covered include linking, system level I/O, concurrent programming, and network programming.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 302 [Min Grade: D]

ECEC 355 Computer Organization & Architecture 4.0 Credits
This course will cover the principles of designing microprocessors using solid engineering fundamentals and quantitative cost/performance trade-offs. Topics will cover instruction set architectures, arithmetic for computers, assessing and understanding processor performance, processor datapath and control, pipelining, cache design, and virtual-memory design.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 302 [Min Grade: D] or CS 260 [Min Grade: D]

ECEC 356 Embedded Systems 4.0 Credits
Lectures will cover theoretical concepts of embedded and cyberphysical systems including discrete and continuous dynamics, hybrid systems, state machines, concurrent computation, embedded systems architecture and scheduling. Lab involves programming embedded applications for the decentralized software services architecture using C# and the Microsoft Robotics Software Development Kit (SDK) together with the hardware image processing and tracking capabilities of the Kinect sensor.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 304 [Min Grade: D]

ECEC 357 Introduction to Computer Networks 4.0 Credits
History of the Internet; introduction to packet switching, circuit switching and virtual circuit switching; statistical multiplexing; protocol layering; metrics of network performance including bandwidth, delay and loss; medium access protocols and Ethernet; routing algorithms; end-to-end issues; flow and congestion control; an overview of application layer protocols.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 203 [Min Grade: D] or CS 171 [Min Grade: D]

ECEC 402 Digital System Projects Embedded Design 3.0 Credits
A project-based course on real-time applications using Field Programmable Gate Array (FPGA), embedded processors (software), IP (Intellectual Property) cores library and custom IP cores.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 302 [Min Grade: D] and ECEC 304 [Min Grade: D]

ECEC 411 Computer Hardware 3.0 Credits
Covers the design and performance of computer hardware devices, including direct memory access, priority arbitration, double buffering, and bus standards. Fall.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECEC 355 [Min Grade: D]

ECEC 412 Modern Processor Design 3.0 Credits
This course introduces modern processor design in a systematic manner. It discusses dynamically scheduled superscalar techniques including multi-issue, dynamic instruction scheduling, speculative execution, and branch prediction; advanced cache designs, and new techniques including SMT and VLIW. The course provides a comprehensive coverage of modern processor architectures.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 355 [Min Grade: D] or CS 281 [Min Grade: D]

ECEC 413 Introduction to Parallel Computer Architecture 3.0 Credits
This course provides an introduction to the fundamental principles and engineering trade-offs involved in designing modern parallel computers (multi-processors). Topics covered include, but are not limited to, shared-memory and message-passing programming, cache-coherence, synchronization, scalable distributed memory multi-processors, and interconnection techniques.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 355 [Min Grade: D] or CS 281 [Min Grade: D]

ECEC 414 High Performance Computing 3.0 Credits
This course is an introduction to high performance computing, including both concepts and applications. Course contents will include discussions of different types of high performance computer architectures (multi-core/multi-threaded processors, parallel computers, etc.), the design, implementation, optimization and analysis of efficient algorithms for uniprocessors, multi-threaded processors, and parallel computers, and high performance programming.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 355 [Min Grade: D] or CS 281 [Min Grade: D] and CS 282 [Min Grade: D]

ECEC 421 Introduction to Operating Systems I 3.0 Credits
Covers basic concepts of computer operating systems, including multiprocessing and multiprogramming systems, lock operations, synchronization, and file structures. Winter.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECEC 355 [Min Grade: D] and CS 260 [Min Grade: D]
ECEC 422 Introduction to Operating Systems I 3.0 Credits
Further develops the topics of ECEC 421. Spring.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEC 421 [Min Grade: D]

ECEC 431 Introduction to Computer Networks 3.0 Credits
Covers topics in computer and telecommunications network design.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECE 200 [Min Grade: D] and CS 260 [Min Grade: D]

ECEC 432 Internet Architecture and Protocols 3.0 Credits
Covers architecture, protocols, and services of the Internet with an analytical approach focused on design principles; Internet architecture and topology; architecture of web and mail servers; router architectures; routing protocols; multicasting; multimedia over IP and associated protocols; Quality-of-Service issues in the Internet.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 357 [Min Grade: D] or CS 472 [Min Grade: D]

ECEC 433 Network Programming 3.0 Credits
Covers application layer protocol and how applications use the transport layer; principles and practice of network programming; the client-server model; concurrent processing; introduction to sockets and related functions client and server software design with examples; principles, issues and challenges in e-mail and web application protocols; security protocols; and network life system concepts.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 357 [Min Grade: D]

ECEC 441 Robotic Computer Interface & Control I 3.0 Credits
Covers fundamentals of robotics systems, including mechanics, actuators, sensors, kinematics, and inverse kinematics. Fall.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECES 303 [Min Grade: D] and MATH 221 [Min Grade: D] and ECEC 355 [Min Grade: D]

ECEC 442 Robotic Computer Interface & Control II 3.0 Credits
Covers robot dynamics, Lagrangian and Newton Euler methods, linear control of robots, path planning, and computer implementation. Winter.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEC 441 [Min Grade: D]

ECEC 443 Robotic Computer Interface & Control III 3.0 Credits
Covers robot-computer interface methods, including redundancy, optimal control, robustness, nonlinear control, adaptive control, and multiprocessor control. Spring.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEC 442 [Min Grade: D]

ECEC 451 Computer Arithmetic 3.0 Credits
This course provides an introduction to number representations used in computer arithmetic, issues of complexity in arithmetic operations, fixed point arithmetic, floating point arithmetic, and residue number systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECEC 355 [Min Grade: D]

ECEC 453 Image Processing Architecture 3.0 Credits
This course covers applications of computing techniques and hardware in image (still and video) processing. Methods of compression (lossless, lossy), video compression, JPEG standards, MPEG standards, processing requirements, and implementations for multimedia.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECES 303 [Min Grade: D]

ECEC 454 Intelligent System Architectures 3.0 Credits
This course outlines the principles of designing the architectures for intelligent systems. Methods of knowledge representation are compared for a variety of engineering problems. Methods of sensing and behavior generation are demonstrated for applications in large engineering and information systems including autonomous robots. Principles of goal-oriented computers are discussed, and modules of intelligent systems architectures are described. Theoretical fundamentals and practical techniques for learning are also covered.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: MATH 221 [Min Grade: D] and ECEC 355 [Min Grade: D]

ECEC 455 Security in Computing 3.0 Credits
The course introduces ideas from Cryptography and Fault Tolerant Computing. Cryptography studies how to artificially create distortions that being intertwined with computations mask them from eavesdropping. Fault Tolerance studies techniques of suppressing effects of natural noises that operate in computation channels. The course deals with both some introductory issues in Public Key Cryptography and some important aspects of designing Fault Tolerant Systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 421 [Min Grade: D]

ECEC 456 Security in Computing 3.0 Credits
The course introduces ideas from Cryptography and Fault Tolerant Computing. Cryptography studies how to artificially create distortions that being intertwined with computations mask them from eavesdropping. Fault Tolerance studies techniques of suppressing effects of natural noises that operate in computation channels. The course deals with both some introductory issues in Public Key Cryptography and some important aspects of designing Fault Tolerant Systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 421 [Min Grade: D]

ECEC 459 Testing of Hardware 3.0 Credits
This course provides an introduction to number representations used in computer arithmetic, issues of complexity in arithmetic operations, fixed point arithmetic, floating point arithmetic, and residue number systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 421 [Min Grade: D]

ECEC 475 Security in Computing 3.0 Credits
This course covers applications of computing techniques and hardware in image (still and video) processing. Methods of compression (lossless, lossy), video compression, JPEG standards, MPEG standards, processing requirements, and implementations for multimedia.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECES 303 [Min Grade: D]

ECEC 479 Testing of Hardware 3.0 Credits
This course provides an introduction to number representations used in computer arithmetic, issues of complexity in arithmetic operations, fixed point arithmetic, floating point arithmetic, and residue number systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 421 [Min Grade: D]
ECEC 471 Introduction to VLSI Design 3.0 Credits
This is an introductory course where systematic understanding, design and analysis of digital VLSI integrated circuits will be covered. The course will begin with a review of CMOS transistor operation and semiconductor processes. Logic design with CMOS transistor and circuit families will be described. Specifically, layout, design rules, and circuit simulation will be addressed. Performance metrics will be analyzed in design and simulation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECE 200 [Min Grade: D] or CS 270 [Min Grade: D]) and (ECE 301 [Min Grade: D] and ECE 302 [Min Grade: D])

ECEC 472 Custom VLSI Design & Analysis I 3.0 Credits
This is the first of two courses offered on Custom Very Large Scale Integration (VLSI) circuit and systems design and analysis. An understanding of VLSI integrated circuits is achieved through circuit design and analysis. This course focuses exclusively on high performance digital CMOS VLSI circuit and systems design, although some topics on mixed-signal circuits are also addressed.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 471 [Min Grade: D]

ECEC 473 Modern VLSI IC Design 3.0 Credits
This is a project-oriented course where a high-complexity VLSI design project will be assigned to student teams. Team-work, task assignment and team communication will be mediated in an industry setting. Design tasks will cover the entire IC design flow range, from system specification to TRL description to timing and power analysis.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 472 [Min Grade: D]

ECEC 474 ASIC Design I 3.0 Credits
This course will focus exclusively on digital CMOS Application Specific Integrated Circuit (ASIC) systems design and automation. The ASIC physical design flow, including logic synthesis, floorplanning, placement, clock tree synthesis, routing and verification will be presented. These back-end physical design flow tasks will also be covered through hands-on practice using industrial VLSI CAD tools. Contemporary design practices will be reviewed and presented in experiments.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECE 355 [Min Grade: D]

ECEC 475 ASIC Design II 3.0 Credits
Design and analysis of Application Specific Integrated Circuits (ASICs) will be covered from a systems design perspective. System timing, arithmetic building block and memory block design processes will be presented. Design tasks in a quarter-long, small-complexity processor design project will cover the back-end of the IC design flow range, from RTL synthesis to timing and power analysis. Projects will be performed in a hierarchical group, similar to an industrial setting, with other graduate and undergraduate students.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEC 474 [Min Grade: D]

ECEC 497 Research In Computer Engineering 0.5-12.0 Credits
Computer engineering students only. Requires independent research in a field approved by the faculty.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is CE.

ECEC I199 Independent Study in ECEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC I299 Independent Study in ECEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC I399 Independent Study in ECEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC I499 Independent Study in ECEC 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC T180 Special Topics in ECEC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC T280 Special Topics in ECEC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC T380 Special Topics in ECEC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEC T480 Special Topics in ECEC 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Restrictions: Cannot enroll if classification is Freshman or Sophomore
Electrical & Computer Engineering - Electroph

Courses

ECEE 302 Electronic Devices 4.0 Credits
Covers principles of operation of semiconductor devices, including PN diodes, bipolar transistors, and field effect transistors (JFET, MOSFET, MESFET). Applications of PN junctions, including solar cells, led, laser diodes. Laboratories reinforce lecture material by allowing students to build, measure and analyze data from simple devices.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: TDEC 211 [Min Grade: D] or ENGR 220 [Min Grade: D]

ECEE 304 Electromagnetic Fields & Waves 4.0 Credits

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 291 [Min Grade: D]

ECEE 352 Analog Electronics 4.0 Credits
Teaches the fundamentals of electronic circuit analysis and design by means of practical projects, such as a dc power supply and an audio amplifier. Covers design with discrete components as well as integrated circuit design.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 302 [Min Grade: D] and ECES 301 [Min Grade: D]

ECEE 354 Wireless and Optical Electronics 4.0 Credits
Covers propagation of waves in various media as it relates to wireless communications: reflection, transmission, polarization, wave packets, dispersion, radiation and antennas, microwave electronic devices, optical wave guides, and fiber optics.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 302 [Min Grade: D] and ECEE 303 [Min Grade: D]

ECEE 422 Advanced Electronic Circuits I 3.0 Credits
Application-and design-focused course. Covers analysis and design of communication circuits and non-linear active circuits; oscillators, mixers, IF and RF amplifiers; and AM and FM modulators.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 421 [Min Grade: D]

ECEE 423 Advanced Electronics Circuits II 3.0 Credits
Application-and design-focused course. Covers non-linear circuits; function and wave form generators; log-amp, multipliers, dividers, power amp, and phase-lock loops; and design of electronics needed to implement different logic circuit families.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 421 [Min Grade: D]

ECEE 424 Digital Electronics 4.0 Credits
Covers basic digital integrated circuit building blocks (inverters, nor and nand logic), CMOS logic gates (dc and transient behavior), drivers, and digital circuits and systems (PLA, gate array, memory). Experiments in semiconductor material characterization, device characterization, circuit and device simulations.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 302 [Min Grade: D]

ECEE 421 Advanced Electronic Circuits I 4.0 Credits
Application-and design-focused course. Analyzes feedback in electronic circuits such as operational amplifiers. Covers design and applications of active filters and other typical electronic circuitry. Includes experiments in the design of multistage transistor circuits, feedback loops, operational amplifiers, and active filters.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEE 352 [Min Grade: D]
ECEE 451 Electroacoustics 3.0 Credits
Applications-oriented course. Covers fundamentals of vibrating systems; equations of motion; acoustical, electrical, and mechanical analogs; properties of waves in fluids; acoustic impedance and plane wave transmission; application to design of transducers; and application of acoustic waves in medical imaging, non-destructive testing, and the biomedical field.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore

ECEE 471 RF Components and Techniques 4.0 Credits
This course covers microwave networks (Z, Y, S, T ABCD Parameters), signal flowgraph, impedance matching techniques (lumped and distributed, quarter wave transformers), circulators and isolators, directional couplers (branch line, Wilkinson, Lange, slot waveguide), and filters (lowpass, bandpass, bandstop, highpass). CAD laboratory and design projects are an integral part of this course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEE 354 [Min Grade: D]

ECEE 472 RF Electronics 4.0 Credits
This course covers static and dynamic characteristics of transistors, unipolar (MOSFET, MESFET, HEMT), bipolar (BJT, HBT), LNA design and realization, power amplifiers, distributed amplifiers, switches, limiters, phase shifters, detectors, mixers, oscillators (Colpitts, YIG tuned, reflection, transmission, DRO). CAD laboratory and design projects are an integral part of this course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEE 471 [Min Grade: D]

ECEE 473 Antennas and Radiating Systems 4.0 Credits
This course covers short and magnetic dipole, radiation pattern, radiation resistance, directivity and gain, line antennas (dipoles, monopoles, V and inverted V antennas), helix, Yagi-Uda, log-periodic, aperture antennas (slot, horn and reflector), printed circuit antennas (patch and spiral), and phased antennas. CAD laboratory and design projects are an integral part of this course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEE 471 [Min Grade: D]

ECEE 477 Research in Electrophysics 0.5-12.0 Credits
Requires independent research in a topic approved by the faculty.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE I299 Independent Study in ECEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE I399 Independent Study in ECEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE I499 Independent Study in ECEE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE T180 Special Topics in ECEE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE T280 Special Topics in ECEE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE T380 Special Topics in ECEE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECEE T480 Special Topics in ECEE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Restrictions: Cannot enroll if classification is Freshman

Electrical & Computer Engineering - Systems

Courses

ECES 201 Introduction to Audio-Visual Signals 4.0 Credits
This introductory engineering course will focus on the digital signal representations commonly used in prevailing entertainment media: audio, images, and video. It will explore how each medium is represented digitally and convey the signal processing concepts used in storing, manipulating, transmitting, and rendering such content. The goal of the course is to provide non-engineering students with a fundamental understanding of core digital signal processing methods.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: MATH 122 [Min Grade: D]
ECES 301 Transform Methods and Filtering 4.0 Credits
This course covers the engineering related concepts of signals and systems, their modeling and analysis. We discuss the problem of formulation of physical systems, plus mathematical solution of models (equations). Continuous-time signals and systems, discrete-time signals and systems, linear time-invariant systems, convolution integrals and sums, Fourier series, Fourier, Laplace and Z-transforms, and system functions will be studied.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 301 [Min Grade: D] or ECES 302 [Min Grade: D]

ECES 302 Transform Methods and Filtering 4.0 Credits
Covers the Fourier series and the Fourier transform, sinusoidal steady-state analysis and filtering, discrete-time systems and the Z-transform, discrete Fourier transform, network functions and stability, magnitude, phase, poles and zeroes, Nyquist criterion, the Nyquist plot and root loci, stability of one-ports, sensitivity, worst-case design and failure-tolerance.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: TDEC 221 [Min Grade: D] or ENGR 232 [Min Grade: D] or MATH 262 [Min Grade: D] or MATH 210 [Min Grade: D] and ECE 201 [Min Grade: D]

ECES 303 Transform Methods II 3.0 Credits
This course covers the engineering related concepts of signals and systems, their modeling and analysis. We discuss the problem of formulation of physical systems, plus mathematical solution of models (equations). Continuous-time signals and systems, discrete-time signals and systems, linear time-invariant systems, convolution integrals and sums, Fourier series, Fourier, Laplace and Z-transforms, and system functions will be studied.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 301 [Min Grade: D] or ECES 302 [Min Grade: D]

ECES 304 Dynamic Systems and Stability 4.0 Credits
Covers linear time-invariant circuits and systems; two-and multi-terminal resistors, operational-amplifier circuits, first-order circuits, linear and nonlinear second-order systems, state equation and state variables, eigenvalues and eigenvectors, zero-input response, qualitative behavior of x'=Ax (stability and equilibria), qualitative behavior of x'=f(x), phase portraits, equilibrium states.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 303 [Min Grade: D]

ECES 306 Analog & Digital Communication 4.0 Credits
Covers signal sampling and reconstruction; modulation, angle modulation; digital communications systems, digital transmission.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 301 [Min Grade: D] or ECES 302 [Min Grade: D]

ECES 305 Introduction to Digital Signal Process 4.0 Credits
Covers discrete-time signals, analog-digital conversion, time and frequency domain analysis of discrete-time systems, analysis using Z-transform, introduction to digital filters, discrete-time Fourier transform, Fourier Transform (DFT), and Fast Fourier Transform (FFT).

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D]

ECES 352 Wireless, Mobile & Cellular Communications 4.0 Credits
Covers concepts of wireless systems; propagation effects, including loss, dispersion, fading, transmission, and reception; mobile systems, including design of base units and mobile units; micro cells and pico cells; cell division, including frequency use and reuse; concepts of FDMA, TDMA, and CDMA; error rates and outage probability; and circuits and components for wireless and mobile systems.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 306 [Min Grade: D]

ECES 354 Theory of Control 4.0 Credits
Covers the foundations of control theory. Includes experiments and demonstrations during lectures and labs that may be jointly held, taking advantage of multimedia and computer-controlled apparatus.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 304 [Min Grade: D]

ECES 356 Computer Control Systems 4.0 Credits
Reviews principles of applications of computer control systems to a variety of industries and technologies, including manufacturing processes, robotic cells, machine cells, chemical processes, network control, investment portfolio control, and real-time expert and learning systems for diagnostics and quality control.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 356 [Min Grade: D]

ECES 358 Convex Optimization in Engineering Systems 3.0 Credits
Covers fundamental of convex optimization including convex sets, convex functions, linear and nonlinear constraints, complementary slackness, Lagrange multipliers, Lagrangian duality, and quadratic programming. Focuses on applications (e.g., signal processing, communications, computer networking, and portfolio management). Focuses on use of Matlab or equivalent software.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])
ECES 422 Simulation of Stochastic Engineering Systems 3.0 Credits
Covers algorithms for generation of pseudo-random numbers, generation of random variates using the inverse transform, acceptance rejection techniques, Monte Carlo simulation, basics of point and interval estimation and hypothesis testing. Coverage of Markov chains, Markov chain Monte Carlo, Metropolis algorithm, simulated annealing, as time permits. Applications include computer networks, statistical physics, derivative pricing. Focus on use of Matlab or equivalent software.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])

ECES 423 Strategies for Repeated Games 3.0 Credits
Covers the gambler’s ruin problem, optimality of bold play for subfair games, the Martingale betting system, Kelly betting and the maximum growth rate in superfair games, the multi-armed bandit and it generalizations, Parrondo’s paradox for coupled subfair games, basics of auction theory. Focus on use of Matlab or equivalent software.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D] and (ENGR 361 [Min Grade: D] or ECE 361 [Min Grade: D])

ECES 421 Communications I 3.0 Credits
Covers analog communications, including linear modulation methods (AM, DSB, SSB), exponential modulation (FM, PM), and noise effects on analog communication systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 306 [Min Grade: D]

ECES 422 Communications II 3.0 Credits
Covers analog (PAM, PPM) and digital (PCM, DM) pulse modulation systems, entropy, source coding, and channel coding.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 421 [Min Grade: D]

ECES 423 Communications III 3.0 Credits
Covers digital transmission systems, baseband and passband, spread-spectrum communications, and basics of wireless and mobile systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECES 422 [Min Grade: D]

ECES 424 Systems and Control I 4.0 Credits
This course reviews classical control: analysis and design, state space approach to systems analysis and control; Eigenvalue/Eigenvector analysis, model decomposition, state space solutions and Cayley-Hamilton technique and applications.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 356 [Min Grade: D]
ECES 445 Systems and Control II 4.0 Credits
This course covers Eigenvector single-value decomposition and modal decomposition; controllability, observability and Kalman canonical forms; state controllers and observers and the separation principle.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 444 [Min Grade: D]

ECES 446 Systems and Control III 4.0 Credits
This course covers linear quadratic control, non-linear stability and analysis. Current topics in control include Robust, H-infinity, and Fuzzy Control concepts.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 445 [Min Grade: D]

ECES 462 Medical Robotics II 3.0 Credits
This course will review the emerging, multidisciplinary field of Medical Robotics. The course includes multiple site/field visits to observe Medical Robot systems demonstrations and interaction with the medical team and system manufacturers.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECES 461 [Min Grade: D]

ECES 486 Cell and Tissue Image Analysis 3.0 Credits
Theory of supervised and unsupervised pattern recognition techniques, with practical programming projects.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECES 487 Pattern Recognition 3.0 Credits
Theory of supervised and unsupervised pattern recognition, presented through practical programming techniques.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ECES 497 Research in Systems Engineering 0.5-12.0 Credits
Electrical engineering students only. Requires independent research in a topic approved by the faculty.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ECES 499 Supervised Study in Systems Engineering 0.5-20.0 Credits
Requires independent study in a topic approved by the faculty.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ECES I299 Independent Study in ECES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES I399 Independent Study in ECES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES I499 Independent Study in ECES 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES T180 Special Topics in ECES 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES T280 Special Topics in ECES 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES T380 Special Topics in ECES 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECES T480 Special Topics in ECES 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering

Restrictions: Cannot enroll if classification is Freshman

---

**Electrical Engineering Lab**

**Courses**

**ECEL 301 [WI] Electrical Engineering Laboratory 2.0 Credits**

- Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications.
- Each lab consists of a stand-alone module containing: lecture material providing basic theory, references, and laboratory experiments. This is a writing intensive course.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECE 201 [Min Grade: D] and (TDEC 132 [Min Grade: D] or TDEC 133 [Min Grade: D] or ENGR 104 [Min Grade: D] or ENGR 103 [Min Grade: D])
ECEL 302 ECE Laboratory II 2.0 Credits
Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications. Each lab consists of a stand-alone module containing lecture material providing basic theory, references, and laboratory experiments. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEL 301 [Min Grade: D]

ECEL 303 ECE Laboratory III 2.0 Credits
Offers laboratory experiences in each of the five ECE tracks: computers, controls/robotics, electronics, power and energy, and telecommunications. Each lab consists of a stand-alone module containing lecture material providing basic theory, references, and laboratory experiments.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECEL 303 [Min Grade: D]

ECEL 304 ECE Laboratory IV 2.0 Credits
This course offers laboratory experience, using both modeling software and digital and analog hardware relevant to both electrical and computer engineers. Multi-week design projects and design teams are used to prepare students for Senior Design work.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEL 304 [Min Grade: D]

ECEL 311 ECE Laboratory Methods I 3.0 Credits
Introduces students to MATLAB and PSpice, industry standard CAD software for electronics (analog and digital) and systems engineers. Solve DC bias, DC sweep, AC sweep, and transient problems in PSpice and MATLAB. Build and design simple digital circuits.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECE 200 [Min Grade: D] and ECE 201 [Min Grade: D] and ENGR 103 [Min Grade: D]

ECEL 312 ECE Laboratory Methods II 3.0 Credits
Covers introduction to transistor circuits, PSpice simulations of active devices, transfer function analysis, Bode analysis, active filter analysis and design. Programming and use of Microprocessors and/or FPGA. Perform measurements on devices and circuits.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ECEL 301 [Min Grade: D] or ECEL 311 [Min Grade: D]

ECEL 402 Nano-Photonics Laboratory 3.0 Credits
Teaches a fundamental knowledge of nanophotonic materials, devices, and applications in a hands-on laboratory setting. Introduces students to photonic bandgaps, photonic crystals, optical sensing methods, holography methods and materials, concepts of surface plasmons and Plasmon resonance.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEE 304 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECEC 304 [Min Grade: D])

ECEL 403 Bio-Photonics Laboratory 3.0 Credits
Teaches the fundamentals of the interaction of light with matter. Introduces students to different types of optical detection for biomedical applications. Quantized states of matter, Energy levels of atoms and molecules, Absorption, Scattering, Fluorescence, Imaging of cells and molecules, Spectroscopy, and Cancer precursors.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEE 304 [Min Grade: D]) or (ECEL 311 [Min Grade: D] or ECEL 312 [Min Grade: D] or ECEC 304 [Min Grade: D])

ECEL 404 Software Defined Radio Laboratory 3.0 Credits
This course introduces students to the concept of software defined radio using the USRP hardware platform and GNU Radio software. Functional blocks of wireless communications systems will be discussed, programmed in Python, and tested on hardware.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEE 304 [Min Grade: D]) or (ECEL 311 [Min Grade: D] or ECEL 312 [Min Grade: D] or ECEC 301 [Min Grade: D] or ECEC 303 [Min Grade: D])

ECEL 405 Digital Systems Laboratory 3.0 Credits
Students will gain practical knowledge of digital systems and signal processing by designing, simulating, constructing, testing and refining a digital audio recording system.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECES 301 [Min Grade: D] and ECES 303 [Min Grade: D]) or (ECEL 301 [Min Grade: D] or ECEC 301 [Min Grade: D] and ECEC 303 [Min Grade: D])

ECEL 407 General Purpose GPU Programming 3.0 Credits
This course will teach students how to develop parallel algorithms for the GPU and implement them using the CUDA programming interface.

College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: (ECEL 301 [Min Grade: D] and ECEL 302 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECEC 305 [Min Grade: D]) or (ECEL 311 [Min Grade: D] and ECEL 312 [Min Grade: D] and ECEC 301 [Min Grade: D] and ECEC 305 [Min Grade: D])
ECE L199 Independent Study in ECE L 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L299 Independent Study in ECE L 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L399 Independent Study in ECE L 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L499 Independent Study in ECE L 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L T180 Special Topics in ECE L 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L T280 Special Topics in ECE L 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L T380 Special Topics in ECE L 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ECE L T480 Special Topics in ECE L 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET 201 Circuit Analysis I 4.0 Credits
Introduction to the key electrical terms, basic laws and theorems of electric circuits by concentrating on Direct Current (DC) circuit analysis, power, and energy.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: D] and MATH 110 [Min Grade: D]

EET 202 Circuit Analysis II 4.0 Credits
Introduction to time domain (transient) analysis of R, L, C elements and energy storage in L and C circuits. The response of source-free RL, RC, and RLC circuits are developed followed by response to constant voltage and current sources.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D]

EET 204 Introduction to Nanotechnology 3.0 Credits
The course provides an introduction to scientific notation, size relationships between nanometers and other metric measures, self assembly, molecular recognition, the history of nanotechnology, and the role and influence of nanotechnology in other technologies.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 111 [Min Grade: D] and CHEM 113 [Min Grade: D]

EET 205 Digital Electronics 4.0 Credits
The objective of this course is to introduce AET students to fundamentals of digital electronics starting with the binary number system and proceeding to logic gates, Boolean algebra, combinational logic circuits, and the basic arithmetic units used in digital computers such as adders, counters and shift registers.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D]

EET 206 Analog Electronics I 4.0 Credits
Students are introduced to linear circuit analysis of passive and active semiconductor components, modeling of non-linear circuit elements, light and heat-dependent semiconductor devices, biasing of three-terminal devices, and semiconductor small-signal models.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 201 [Min Grade: D] and EET 202 [Min Grade: D]

EET 207 Introduction to Laboratory and Process Control 3.0 Credits
This course introduces students to programming techniques used to control laboratory experiments and industrial processes. The emphasis is on applications of LabView and C in real-world measurements and embedded systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

EET 208 Introduction to Programming for Embedded Systems 3.0 Credits
This course introduces students to programming techniques used in embedded systems. The emphasis is on applications of C in real-world measurements, analysis, and embedded systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

Electrical Engineering Technology Courses

EET 102 Introduction to Engineering Technology 3.0 Credits
The main objective of this course is to introduce the basic concepts and the fundamentals of Engineering Technology (ET). Students are introduced to the four tracks (electrical, mechanical, industrial, and biomedical) in ET and work on the selected topics designed to enhance the problem solving techniques.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
**EET 209 Fundamentals of Virtual Instrumentation 3.0 Credits**
This course introduces students to programming techniques used to monitor and control laboratory experiments and industrial processes. The emphasis is on applications of LabVIEW in real-world measurements and embedded systems, as well as on the practical aspects of interfacing a computer to various instruments including timing issues, real-time data acquisition and instrument control, instrument status, and acquisition speed.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit

**EET 307 Basic Power Systems I 3.0 Credits**
Fundamentals of single-phase and three-phase power systems; introduction to symmetrical components and sequence impedances; power transfer modeling; the per-unit system; power transmission line impedance and admittances.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if classification is Junior or Senior.  
**Prerequisites:** EET 104 [Min Grade: D]

---

**EET 310 Industrial Application of Nanotechnology 3.0 Credits**
This course introduces students to nanotechnology materials, devices, and processes from the perspective of product development and process engineering, manufacturing scale-up, quality assurance, and reliability. Laboratory projects provide students with hands-on experience in fabricating and characterizing nanomaterials and nanodevices, and their applications for renewable energy, solid-state lighting, novel functional materials, and biomedical engineering.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** CHEM 111 [Min Grade: D] and CHEM 113 [Min Grade: D]

**EET 311 Modeling of Engineering Systems 4.0 Credits**
Course introduces students to development and application of ordinary differential equations to systems analysis with emphasis on electrical systems. Particular attention is paid to the derivation of differential equations from given practical circuits used in industrial applications.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** MATH 122 [Min Grade: D] and EET 201 [Min Grade: D]

**EET 313 Signals and Systems I 4.0 Credits**
Course introduces students to applications of the systems analysis to the design of useful circuits and devices used in industrial applications. Covers time and frequency domain circuit analysis (transfer function, convolution) to determine response of the system to the arbitrary input.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 311 [Min Grade: D]

**EET 317 Analog Electronics II 4.0 Credits**
Students are introduced to four-layer diodes, power amplifiers, differential amplifiers, linear and non-linear operational amplifiers, feedbacks, oscillators, and active filters. Class discussions include practical circuits, troubleshooting, and case studies.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 206 [Min Grade: D]

---

**EET 319 PLC Fundamentals 4.0 Credits**
Introduces the fundamentals of programmable logic controllers, and PLC application in process control. The course includes both lecture and laboratory aimed at applying fundamental principles to practical projects. The emphasis is on the basics of ladder logic, including timers, counters, and program control.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 205 [Min Grade: D]

**EET 320 Renewable Energy Systems 3.0 Credits**
This course provides an introduction to energy systems and renewable energy resources, with a scientific examination of the energy field and an emphasis on alternate energy sources and their technology and applications. The class explores society's present needs and future energy demands, examines conventional energy sources and systems, including fossil fuels and then focuses on alternate, renewable energy sources such as solar, wind power, geothermal and fuel cells.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** PHYS 103 [Min Grade: D] and PHYS 104 [Min Grade: D]

**EET 322 Energy Conversion 4.0 Credits**
The course covers the fundamentals and the principles of electrical machines and transformers, with an emphasis on their application and installation. The course covers transformer, dc, ac and special machines. Novel energy conversion techniques such as Fuel Cell and Batteries are also discussed.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 202 [Min Grade: D]

**EET 323 Electrical Systems Design 3.0 Credits**
This course covers the basics of industrial systems, including safety, grounding, protection, lighting, distribution, commonly found in residential, commercial and industrial environment. The course formulates the application of standards and codes such as NEC, NEMA and IEEE.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 202 [Min Grade: D]

**EET 324 Power Electronics 4.0 Credits**
The course covers the basics of the industrial and power electronics over a spectrum of applications and provides an introduction to the emerging technologies in these fields. The course is accompanied by laboratory using hardware and software simulation tools.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 202 [Min Grade: D]

**EET 325 Microprocessors 3.0 Credits**
Introduces student to fundamentals of microprocessing using an application-oriented approach. Includes fundamental principles and system requirements supplemented with specific implementation examples and practical circuits with detailed design considerations.

**College/Department:** College of Engineering  
**Repeat Status:** Not repeatable for credit  
**Prerequisites:** EET 205 [Min Grade: D]
EET 333 [WI] Non-Destructive Evaluation of Materials 4.0 Credits
The course presents principles of ultrasound nondestructive evaluation of materials combining projects and hands-on experience with lectures. Students learn the physical principles of measurements of sound velocity in different materials, attenuation coefficients, directivity pattern of transducers and location and dimensions of heterogeneities in materials, such as flaws and cavities. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 103 [Min Grade: D] and PHYS 104 [Min Grade: D]

EET 335 Acoustic Emission 4.0 Credits
The course presents principles of acoustic emission using practical applications in various industries. Physical principles of acoustic emission generation, propagation and detection in engineering materials and structures are presented. This includes principles of stress and strain and the underlying materials science of material deformation, crack growth and failure. Students learn how these principles are utilized to build technical applications of acoustic emission considered as an NDE method.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 103 [Min Grade: D] and PHYS 104 [Min Grade: D]

EET 401 Applied Microcontrollers 4.0 Credits
The course is an introduction to microcontroller hardware and software with an emphasis on embedded control applications. Topics covered include microcontroller architectures, programming, analog and digital input/output, timing, debugging and PC-based software development tools.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 205 [Min Grade: D]

EET 402 Control Engineering 3.0 Credits
The course covers fundamental of control theory and their applications, including, linear systems and feedback, linear system operation and stability, standard methods applicable to the linear systems and basic for designs and applications.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 311 [Min Grade: D] and EET 313 [Min Grade: D]

EET 404 Signals and Systems II 3.0 Credits
Introduces the analysis of electric circuits under steady sinusoidal conditions, applications of Laplace transformation and complex frequency analysis, and Fourier analysis for representing an arbitrary time function as a sum of sinusoidal functions.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 313 [Min Grade: D] and EET 311 [Min Grade: D]

EET 406 Communication Systems 3.0 Credits
This course introduces AET student to fundamentals of Communication Systems using an integrated approach to analog and digital communications. Design and applications of contemporary communication systems are emphasized via the reduction theory to practice.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 311 [Min Grade: D] and EET 313 [Min Grade: D]

EET 407 Power Systems Fundamentals 3.0 Credits
The course covers the basic principles of the power systems, electric grid, methods to analyze electric grid systems and basic power system protection and stability.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: EET 202 [Min Grade: D] and EET 322 [Min Grade: D]

EET 409 Optical System Design 3.0 Credits
This course introduces ET students to fundamentals of optics and optical systems using an application-oriented approach. Special attention is given to fundamental principles of optical systems and their requirements supplemented with specific applications-based examples.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: PHYS 104 [Min Grade: D]

EET I199 Independent Study in EET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET I299 Independent Study in EET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET I399 Independent Study in EET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET I499 Independent Study in EET 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET T180 Special Topics in EET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EET T280 Special Topics in EET 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
EMER 245 Search and Rescue 3.0 Credits
This course will focus on the fundamentals of Search and Rescue (SAR) skills and training. Students will be taught the proper use of equipment and how to assist people in distress by using SAR systems to provide responses to lost, injured, or overdue people who may be in harm's way in varied environments.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

EMER 380 Special Topics in Emergency Management 0.5-12.0 Credits
Special Topics of interest in emergency management. This course may be repeated for credit.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated 4 times for 12 credits

EMER 1299 Independent Study in EMER 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

EMER 1399 Independent Study in EMER 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

EMER 1499 Independent Study in EMER 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Computing and Informatics
Repeat Status: Can be repeated multiple times for credit

Emergency Medical Services

EMS 307 Critical Incident Stress Management 3.0 Credits
This course explores the theories of cause, effect, and mitigation of stress in public safety personnel. The student examines personal, administrative, and employee concerns, including critical incident and stress-management services and resources. A further understanding of stress and stress management is gained through self research.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit

EMS 445 Organizing Community Response in Disasters 3.0 Credits
This course will cover community preparation, planning, education, and integration of community response agencies into mass events.
College/Department: College of Computing and Informatics
Repeat Status: Not repeatable for credit
Engineering Management

Courses

EGMT 350 Conflict Management for Engineers 3.0 Credits
As the pace of science and technology innovation increases, so too does the role of engineers in solving some of the world’s toughest challenges. The prevention of violent conflict and the pursuit of a sustainable peace is just such a challenge. Developed in partnership with professional peacebuilders from the PeaceTech Lab and the US Institute of Peace’s Academy for International Conflict Management and Peacebuilding in Washington DC, this course introduces engineering students to the concepts and skills they will need in order to use technology expertise in service of conflict-affected communities. This course provides students with an introduction to the theory and practice of conflict analysis, strategic peacebuilding, and negotiation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

EGMT 404 [WI] Introduction to Engineering Management Communications 3.0 Credits
Excellence in design is as important to managerial communications as it is for any engineering endeavor. By applying this concept to the challenges that new engineering managers face, the course encourages engineers to aspire to professional competence in writing and speaking as they prepare for management. This helps them in both marketing their job skills and publishing and promoting innovative ideas and solutions. Students learn the rhetoric of managerial communication to affect workplace behavior on multiple levels, effect profitable technological and business outcomes, and promote the success of new products and systems. The basic skills of composition and grammar are also stressed: developing and organizing content, building effective reporting formats, and editing to achieve style and correctness.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

EGMT 462 Introduction to Engineering Management 3.0 Credits
Introduces the general theory of management, including the processes of planning, organizing, assembling resources, supervising, and controlling. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

EGMT 465 Introduction to Systems Engineering 3.0 Credits
Determining technical requirements for engineering systems and planning technical product design and requirements. Analyzing the functionality, interoperability, and sustainability of new engineering systems. Integrating disparate engineering components for overall system optimization. Planning for testing and evaluation of engineering systems to evaluate conformance with technical requirements. Planning optimized organizational structure for execution of complex engineering programs.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

EGMT I199 Independent Study in EGMT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT I299 Independent Study in EGMT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT I399 Independent Study in EGMT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT I499 Independent Study in EGMT 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT T180 Special Topics in EGMT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT T280 Special Topics in EGMT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT T380 Special Topics in EGMT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

EGMT T480 Special Topics in EGMT 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Engineering, General

Courses

ENGR 081 Engr Common Mtng Time: Frosh 0.0 Credits
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
ENGR 100 Beginning Computer Aided Drafting for Design 1.0 Credit
Introduces students to computer-aided graphics techniques and the use of a state-of-the-art, computer-aided design/drafting package. Students will learn 2-D and 3-D modeling techniques to support the design process. All students will be required to take a competency quiz on 4 of 6 available AutoCAD labs.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 101 Engineering Design Laboratory I 2.0 Credits
This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the first part of the three term freshman design experience.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 102 Engineering Design Laboratory II 2.0 Credits
This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the second part of the three term freshman design experience.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 103 Engineering Design Laboratory III 2.0 Credits
This course introduces students to engineering design and practice. Emphasis is placed on the synthesis of knowledge, skills and the methodologies that are the heart of the profession. The course is designed to integrate core scientific foundations into an engineering perspective through the use of team-based projects, computer tools and technical writing. This is the third part of the three term freshman design experience.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 104 Engineering Design Laboratory for Transfers 4.0 Credits
Individualized course specially designed for transfer students. Provides selected educational experiences in engineering design, experimental techniques, and computer skills to round out the student’s previous course of study.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 121 Computation Lab I 2.0 Credits
Introduces computation and programming through the use of a mathematical computation system, such as MATLAB. Programming techniques and algorithmic problem solving are introduced in the context of data analytics, basic calculus, modeling, simulation, and visualization. The course also illustrates the strengths and limitations of the scientific software in solving mathematical, engineering and scientific problems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 122 Computation Lab II 1.0 Credit
Introduces physics-based simulations through the use of a mathematical computation system, such as MATLAB. Mathematical modeling and simulation of physical processes (static and dynamic) are used as a platform for numerical integration and differentiation.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 121 [Min Grade: D]

ENGR 124 Computational Problem-Solving 3.0 Credits
This course sequence introduces computation and programming through the use of a mathematical computation system. Programming techniques and algorithmic problem solving are introduced in the context of data analytics, basic calculus, visualization, physics based modeling and simulations. The course also illustrates the strengths and limitations of the scientific software in solving mathematical, engineering and scientific problems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 120 Computational Problem-Solving 3.0 Credits
This course sequence introduces computation and programming through the use of a mathematical computation system. Programming techniques and algorithmic problem solving are introduced in the context of data analytics, basic calculus, visualization, physics based modeling and simulations. The course also illustrates the strengths and limitations of the scientific software in solving mathematical, engineering and scientific problems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 170 Pre-Calculus Practicum 1.0 Credit
The Pre-calculus Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.
College/Department: College of Engineering
Repeat Status: Can be repeated 1 times for 2 credits
Restrictions: Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

ENGR 171 Calculus I Practicum 1.0 Credit
The Calculus I Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.
College/Department: College of Engineering
Repeat Status: Can be repeated 1 times for 2 credits
Restrictions: Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior
ENGR 172 Calculus II Practicum 1.0 Credit
The Calculus II Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.
College/Department: College of Engineering
Repeat Status: Can be repeated 1 times for 2 credits
Restrictions: Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

ENGR 173 Multivariate Calculus Practicum 1.0 Credit
The Multivariate Calculus Practicum for Engineers is designed to promote excellence in mathematics, team-based approaches to working and learning, and an appreciation for how mathematics is connected with the discipline. Since mathematics is the language of engineering, it is important to master its core concepts at an early stage and to develop the habits of mind required for effective problem solving. Through individual drills, small-group problem sets, and in-class discussion we will reinforce concepts taught in the freshman mathematics sequence and improve fluency with the approaches and strategies linked to a culture of excellence within the discipline.
College/Department: College of Engineering
Repeat Status: Can be repeated 1 times for 2 credits
Restrictions: Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

ENGR 199 Preparation for the Engineering Studies 6.0 Credits
Preparation for the Engineering Core Curriculum through intensive, coordinated work in three areas: pre-calculus mathematics, effective study methods, and career evaluation and selection. Topics include: algebra, trigonometry, geometry, note-taking, exam preparation, time management, evaluation of engineering and other career paths. (This course does not count toward graduation requirements).
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Junior or Pre-Junior or Sophomore or Senior

ENGR 201 Evaluation & Presentation of Experimental Data I 3.0 Credits
Provide a comprehensive introduction to analysis, presentation, and communication of data collected by the engineer. Requires students to conduct experiments on engineering systems, then process and evaluate the collected data. Required presentation of research, results, conclusions, and conjectures from a technical and ethical viewpoint.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D] and ENGR 103 [Min Grade: D]
Corequisite: EXAM 081

ENGR 202 Evaluation & Presentation of Experimental Data II 3.0 Credits
A continuation of ENGR 201.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGR 201 [Min Grade: D]
Corequisite: EXAM 081

ENGR 210 Introduction to Thermodynamics 3.0 Credits
Introduces thermodynamics from a classical point of view. Covers work, heat, entropy, thermodynamic properties, equations of state, and first and second law analysis of closed systems, control volumes, and selected thermodynamic cycles.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D]
Corequisite: EXAM 081

ENGR 220 Fundamentals of Materials 4.0 Credits
Introduces materials and their properties; atomic view and architecture of solids; atomic motion in solids, mechanical, magnetic, electrical and optical properties of materials. Corrosion and degradation of solids.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 102 [Min Grade: D] and MATH 122 [Min Grade: D] and PHYS 101 [Min Grade: D]
Corequisite: EXAM 081

ENGR 231 Linear Engineering Systems 3.0 Credits
Provides an overview of systems and modeling; specifically using linear algebra as the model. Specific emphasis will be placed on developing models of engineering systems and the use of computational tools for solutions of the problems. The focus of the lab will be the use of MATLAB for solution of contemporary engineering problems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: BMES 201 [Min Grade: D] (Can be taken Concurrently) MATH 122 [Min Grade: D] and (ENGR 121 [Min Grade: D]
Corequisite: EXAM 081

ENGR 232 Dynamic Engineering Systems 3.0 Credits
Provides an overview of dynamic systems and modeling; specifically using differential equations as a model. Specific emphasis will be placed on developing models of dynamic systems and the use of computational tools for solutions of the problems. The focus of the lab will be the use of MATLAB for solution of contemporary engineering problems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENGR 231 [Min Grade: D] and (ENGR 121 [Min Grade: D] or BMES 201 [Min Grade: D])
Corequisite: EXAM 081
ENGR 280 Introduction to Global Engineering 2.0 Credits
Introduces students to a broad range of contemporary issues (economic, political, and cultural) engineers face in meeting the challenges of globalization. In addition to responding to weekly presentations, students will engage in and report on an in-depth case study.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 295 Paul Peck Scholars: Survey of Mentorship 1.0 Credit
Mentorship is the first course in the leadership development course sequence required by the Drexel Engineering Paul Peck Scholars Program. This course sequence is designed to develop and enhance the leadership skills among engineering students, emphasizing communication among peer groups and other undergraduate students. This first course in the sequence, is focused on the mentor-mentee relationship as it relates to leadership development. Only students who have been accepted into the Paul Peck Scholars Program are eligible.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Pre-Junior or Sophomore.

ENGR 361 Statistical Analysis of Engineering Systems 3.0 Credits
Probability, random variables, reliability, quality control, design of experiments, regression/correlation, ANOVA and related topics, hypothesis testing.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 380 Paul Peck Scholars: Capstone 2.0 Credits
This is the final course of the Paul Peck Scholars Program, which aims to improve students' leadership, problem solving, and communication skills through mentorship, scholarship, and civic engagement. This course requires students to utilize the skills developed through their degree and Peck Scholars curricula to solve a problem in the local community. Students will then present their solution to the relevant parties at the end of the term. Students must be accepted into the Paul Peck Scholars Program in order to be eligible.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENGR.

ENGR 491 Senior Project Design I 2.0 Credits
Introduces the design process, including information retrieval, problem definition, proposal writing, patents, and design notebooks. Includes presentations on problem areas by experts from industry, government, and education.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENGR 492 Senior Project Design II 2.0 Credits
Continues ENGR 491. Requires written and oral progress reports.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CIVE 491 [Min Grade: D]

ENGR 493 Senior Project Design III 4.0 Credits
Continues ENGR 492. Requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR 499 Independent Study in ENGR 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR I299 Independent Study in ENGR 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR I399 Independent Study in ENGR 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR I499 Independent Study in ENGR 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR T180 Special Topics in ENGR 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR T280 Special Topics in ENGR 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit
ENGR T380 Special Topics in ENGR 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENGR T480 Special Topics in ENGR 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

English

Courses

ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0 Credits
Develops students’ abilities to use writing as a tool for inquiry. Introduces genre theory, writing as a process, revision, and strategies of primary and secondary research. Reviews grammar, style, and documentation conventions. Engages students in reflection and promotes positive attitudes toward writing.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0 Credits
Advances students’ development in the writing processes. Promotes a critical evaluation and integration of information into their own writing as they research complex and open-ended issues. Identifies the relationships between rhetorical situations, the status of claims, and the need for evidence and warrants. Continues review of grammar, style, and documentation conventions. Encourages collaboration and effective search strategies of the Internet and library resources. Promotes students’ reflective analysis and a positive attitude toward writing.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 101 [Min Grade: D]

ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0 Credits
Advances students’ development in the writing and research processes and their understanding of how genres of writing shape meaning. Some courses may focus on the student’s academic and discipline-specific experiences; Others may be based on literary or social themes. Promotes a critical reading of texts, reflective analysis, and a positive attitude toward writing.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 102 [Min Grade: D]

ENGL 105 Honors Freshman English 3.0 Credits
Develops students’ abilities to read and write expository and persuasive academic discourse. Teaches students the components of the writing process and strategies to think and read critically and to present a written argument. Requires students to write expository and persuasive essays and research papers and to keep a journal to express their responses to the material read and studied in the course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is HONR.

ENGL 195 English Freshman Seminar 3.0 Credits
This course introduces freshman majors to the practice and study of the English major. It is a foundation for further study as well as a course about how we learn. It prepares the student to be successful in upper-division courses and to become familiar with the basic tools of the discipline. It encourages the creative and critical thinking that is a hallmark of the English major.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENGL 200 [WI] Classical to Medieval Literature 3.0 Credits
A survey of Greek and Roman literature (Homer, Aeschylus, Euripides, Virgil and Cicero), up to and including the Medieval period (Aquinas, Cavalcanti, Chaucer, and Dante). This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 201 Renaissance to the Enlightenment 3.0 Credits
A survey of Western literature from the Renaissance to the Enlightenment, focusing on works by Cervantes, Erasmus, Rabelais, Petrarch, Voltaire, Rousseau, Swift and Pope.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 202 [WI] Romanticism to Modernism 3.0 Credits
A survey of Western literature of the 19th and 20th centuries focusing on the major periods of Romanticism (Blake, Coleridge and Keats), Realism (Balzac and Ibsen), and Modernism (Kafka, Borges and Woolf). This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 203 [WI] Post-Colonial Literature I 3.0 Credits
A survey of nonwestern literatures produced before the modern era in Asia, Africa, and the Middle East, representing the more important periods and genres. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 204 Post-Colonial Literature II 3.0 Credits
A survey of nonwestern literatures written in the 20th century by writers from Asia, Africa, and the Middle East, and focusing on the effects of social, aesthetic and contemporary events on artistic creation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]
ENGL 205 [WI] American Literature I 3.0 Credits
A survey of American literature from Colonial times through the Civil War, including works by such writers as Anne Bradstreet, Emily Dickinson, Frederick Douglass, Cotton Mather, Ralph Waldo Emerson, Nathaniel Hawthorne, Herman Melville, Henry David Thoreau and Walt Whitman. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 206 [WI] American Literature II 3.0 Credits
A survey of American literature from the Civil War through the 21st century, including works by such writers as Kate Chopin, W.E.B. Du Bois, T.S. Eliot, William Faulkner, F. Scott Fitzgerald, Henry James, Philip Roth, Mark Twain and John Updike. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 207 [WI] African American Literature 3.0 Credits
Introduces students to African-American Literature, from the mid-18th century to the present. Provides a basic understanding of social, political and cultural influences and an awareness of the African-American literary tradition. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 211 [WI] British Literature I 3.0 Credits
A historical survey of British literature from its beginning to the end of the eighteenth century. Students will read texts selected to represent major authors, forms and thematic material that illustrates the development of English literature through the medieval and Renaissance periods and seventeenth and eighteenth centuries. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 212 British Literature II 3.0 Credits
A historical survey of British literature from the turn of the nineteenth century to the present; students will read texts selected to represent major authors, forms and thematic material of the Romantic, Victorian and modern periods.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 214 Readings in Fiction 3.0 Credits
A basic course, which focuses on fiction as a genre through the study of a variety of short stories and fiction, organized by theme, period or form. One of three genre courses.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 215 [WI] Readings in Poetry 3.0 Credits
A basic course which focuses on poetry as a genre through the study of a variety of poems organized by theme, period or form. One of three genre courses. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 216 [WI] Readings in Drama 3.0 Credits
A basic course which focuses on drama as a genre through the study of a variety of plays organized by theme, period or form. One of three genre courses. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 300 [WI] Literature & Science 3.0 Credits
This course studies the impact of scientific and technological change on works of literature and art produced in various historical periods. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 302 Environmental Literature 3.0 Credits
This course explores the relatively recent discipline of Ecocriticism and considers the literary relationship between human beings and the natural environment—both altered and unaltered by human activity. The approach is interdisciplinary in its investigation of the relationships among science, culture, and personal observation. Students will read a selection of seminal texts of American environmental literature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 303 Science Fiction 3.0 Credits
Provides reading and discussion of works illustrating the development of modern science fiction.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 304 Young Adult Fiction 3.0 Credits
This course introduces students to young adult (YA) fiction and to secondary sources useful for the appreciation of it. Topics discussed include: young adults as an audience, the genres of YA fiction, keeping up with YA fiction, literary and psychological theory applied to YA fiction.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 305 [WI] The Mystery Story 3.0 Credits
A study of the mystery story, from its inception as a genre in the 19th century to the present, through short stories and novels. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]
ENGL 306 Literature of Baseball 3.0 Credits
An examination of novels, short stories, and poetry about our “national pastime” that illuminate American ideals and values, history and culture from 1845 to the present. A study of how the game’s symbols and rituals, its history and mythology help us understand American belief systems and ideologies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 307 Literature of the Holocausts 3.0 Credits
To underline the fact that more than one Holocaust has occurred, the course offers different points of view about the systematic slaughter of several religious and ethnic groups, pre-and post-World War II, through fiction, children’s literature and films.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 308 [WI] The Literature of Business 3.0 Credits
In this advanced reading course, students read literary works about business and work and write analytically about these works, grounding that analysis in nonfiction readings from business publications. Course writing assignments ask students to respond to problems and issues raised in the texts. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: (ENGL 101 [Min Grade: D] and ENGL 102 [Min Grade: D] and ENGL 103 [Min Grade: D]) or ENGL 105 [Min Grade: A]

ENGL 310 [WI] Period Studies 3.0 Credits
This is a variable topics course, focusing on the literature of a particular period (i.e., Classical Literature; Victorian Literature; the Harlem Renaissance). May be repeated for credit. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 312 Research Project Development 1.0-3.0 Credit
A seminar-style course in which students work on a research or creative project of their own choosing. They acquire knowledge and skills related to the development of researchable original ideas in the domains of humanities areas like literature and philosophy, or social science areas like communication, history or psychology, or a creative work or portfolio.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 12 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D]

ENGL 315 [WI] Shakespeare 3.0 Credits
This course focuses on Shakespeare’s major plays and sonnets, providing the historical and cultural contexts that gave rise to his work. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 320 [WI] Major Authors 3.0 Credits
A course focused on intensive study of one or more authors, for example: Jane Austen; Joseph Conrad; Hemingway, Faulkner and Fitzgerald; Writers of the Harlem Renaissance; Carlos Fuentes and Gabriel Garcia Marquez. May be repeated for credit. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 323 Literature and Other Arts 3.0 Credits
A variable topics course which studies relationships between literature and one or more of the visual arts, theater or music (i.e., Surrealism; Memoir and Documentary Film; The Faust Legend). May be repeated for credit.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D]

ENGL 325 Topics in World Literature 3.0 Credits
A variable topics course which focuses on a particular national or regional literature within its cultural, historical and political contexts (i.e., African Literature; French Literature; Latin American Literature). May be repeated for credit.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 330 The Bible as Literature 3.0 Credits
This course provides a close reading of selected books of the Old and New Testaments alongside selected literary works to discover both the literary qualities of these texts and their influence on literature.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 335 Mythology 3.0 Credits
This course investigates the specific forms mythological stories have taken in the literature, art and ritual of some or all of the following: Greece, Rome, Iceland, Mesopotamia and Native American and European cultures in the United States.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 340 [WI] Classical Rhetoric 3.0 Credits
A study in the theory and practical application of Greek and Roman rhetorical strategies in composition. Focuses on influential figures, terminology, the five canons, and the ancient composition processes known as “progymnasmata” to look at historical texts, the rhetoric of popular media, and the students’ writing. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 101 [Min Grade: D] and ENGL 102 [Min Grade: D]
ENGL 345 American Ethnic Literature 3.0 Credits
A variable topics course which studies the literature of one or more of the United States ethnic populations within their historical and cultural contexts. May be repeated for credit.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 350 Jewish Literature and Civilization 3.0 Credits
Focuses on the Jewish Bible, a classic literary document of Western civilization, deemed by many people of the world as fundamental to their religion; stresses aspects of cultural diversity and awareness.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 355 [WI] Women and Literature 3.0 Credits
This course focuses on literature written by, and/or about women and considers issues relating to women's place in literary history. May be repeated for credit. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 360 [WI] Literature and Society 3.0 Credits
This course examines the relationship between literature and the society it reflects and helps shape. May be repeated for credit. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 365 Topics in African American Literature 3.0 Credits
A variable topics course designed to further develop the ideas first presented in the African American Literature survey by exploring, in much more depth, significant authors, periods, and genres within the African American literary and cultural tradition. Topics include Science and Technology in African American Literature; the Slave Narrative; and Black Travel Writing.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 6 credits
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 370 Topics in Literature and Medicine 3.0 Credits
This is a variable topics course which focuses on aspects of illness, healing, care-giving, aging, grief, and mortality as presented in narrative. Exploration of how literary construction and analysis affect understanding of these experiences. Topics include Illness and Healing in Literature and The Physician in Literature and Film. May be repeated three times for credit.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 9 credits

ENGL 380 Literary Theory 3.0 Credits
This course examines literary theoretical thinking, and focuses on twentieth century structuralism, post-structuralism, and contemporary theory. We will examine the ways in which language is conceived and reconceived by major theoretical writers and the implications of this rethinking for conceptualizations of history, politics, ideology, sexuality, and trauma, among others.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENGL.
Cannot enroll if classification is Freshman or Sophomore
Prerequisites: ENGL 101 [Min Grade: C] and ENGL 102 [Min Grade: C] and (ENGL 202 [Min Grade: C] or ENGL 203 [Min Grade: C] or ENGL 204 [Min Grade: C] or ENGL 205 [Min Grade: C] or ENGL 206 [Min Grade: C] or ENGL 211 [Min Grade: C] or ENGL 212 [Min Grade: C] or ENGL 214 [Min Grade: C])

ENGL 395 [WI] Special Studies in Literature 3.0 Credits
This is a variable topics course, providing intense literary study on a specific theme. May be repeated for credit. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Prerequisites: ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A]

ENGL 470 Capstone Seminar in Medical Humanities 3.0 Credits
This seminar gives students the opportunity to synthesize, contextualize, and deepen their understanding of how disciplines in the humanities and the social sciences approach the experiences and implications of illness, aging, mortality and healing. Regular guest lecturers, discussion of assigned readings, student presentations, and written projects.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is CMDH.
Prerequisites: (ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: D]) and HUM 315 [Min Grade: B]

ENGL 490 Seminar in English and American Literature 4.0 Credits
An advanced course with variable topics in British or American Literature stressing textual analysis, cultural and historical contexts and research; provides students with intensive preparation for advanced and professional studies.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 12 credits
Restrictions: Can enroll if major is ENGL and classification is Junior or Senior.

ENGL 492 Seminar in World Literature 4.0 Credits
An advanced course with variable topics in World Literature stressing textual analysis, cultural and historical contexts and research; provides students with intensive preparations for advanced and professional studies.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 12 credits
Restrictions: Can enroll if major is ENGL and classification is Junior or Senior.
ENGL 499 Senior Project in Literature 4.0 Credits
Open to English Majors only, the senior project in literature should reflect the student's interest in a specific subject, author or theme and should demonstrate the student's research, critical and analytical expertise at an advanced, pre-professional level.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENGL and classification is Senior.

ENGL I199 Independent Study in ENGL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL I299 Independent Study in ENGL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL I399 Independent Study in ENGL 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL I499 Independent Study in ENGL 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL T180 Special Topics in English 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL T280 Special Topics in English 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL T380 Special Topics in English 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENGL T480 Special Topics in English 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

English as a Second Language

Courses

ESL 001 Foundations of University Study 0.0 Credits
High intermediate to advanced English as a second language course. This course provides ESL students with a foundation for University success through developing academic communication skills and strategies and promoting awareness of the academic and co-curricular culture of the American university.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 15 credits
Restrictions: Can enroll if major is ESL or major is IG.

ESL 002 Foundations of Academic Writing 0.0 Credits
This course introduces ESL students to the academic essay and the process approach to writing as well as reading for different purposes.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 003 Foundations of Academic Reading 0.0 Credits
This course introduces ESL students to the skills of critical reading for information, specifically summarizing and evaluating source material.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 004 International Gateway Foundations of Academic Writing for Chemistry 201 0.0 Credits
This course provides International Gateway students with support for success in the CHEM 201 course through developing academic skills and strategies to participate in the sciences.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 010 Listening and Speaking I 0.0 Credits
Low beginning English as a second language. Provides intensive instruction in the development of the following skills: speaking and listening in everyday situations, vocabulary, pronunciation, and grammatical functions. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 011 Reading and Writing I 0.0 Credits
Low beginning English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, simple inferring, basic vocabulary development, sentence and paragraph writing, basic grammatical structures, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
ESL 012 English in Everyday Life 0.0 Credits
Low beginning English as a second language. Prepares students who have trouble talking with and understanding native English speakers in everyday situations such as going to the store or the bank, asking for directions, using the telephone, etc. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 013 Beginning Grammar 0.0 Credits
Beginning English as a second language. Provides instruction and practice in such areas of English grammar as simple verb tenses, sentence structure, modals, and irregular verbs. Placement testing is required. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL.

ESL 020 Listening and Speaking II 0.0 Credits
High beginning English as a second language. Provides intensive instruction in the development of the following skills: speaking and listening (participating actively in spoken interactions and responding appropriately), vocabulary related to topics in the course, pronunciation and intonation patterns, and grammatical functions. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 021 Reading and Writing II 0.0 Credits
High beginning English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, non-academic paragraph writing, basic grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 022 Pronunciation and Conversation 0.0 Credits
High beginning to low intermediate English as a second language. Emphasizes vocabulary, pronunciation, and idioms. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 023 Intermediate Grammar III 0.0 Credits
Low intermediate English as a second language course. Provides instruction and practice in such areas as present, past, and future tense verbs, question structures, nouns and pronouns, and modals. Placement testing is required. Offered as needed. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 024 Presentations with Stories & Legends 0.0 Credits
Beginning to low intermediate. English as a second language. Provides instruction and practice in reading comprehension, writing, listening, and presentations using stories from a variety of sources. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL.

ESL 030 Listening and Speaking III 0.0 Credits
Low intermediate English as a second language. Provides intensive instruction in the development of the following skills: pronunciation (sounds, stress, intonation), vocabulary, listening/speaking (participating and responding appropriately in discussions, following directions, completing listening activities), grammatical competence, and repair of communication breakdown. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 031 Reading and Writing III 0.0 Credits
Low intermediate English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic paragraph and essay format, grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 032 English for Business Purposes 0.0 Credits
Intermediate English as a second language. Provides communication skills needed to do business with English speakers. Topics include small talk and telephone skills, participation in business meeting, presentations, communication through business letters and memos, and business negotiation. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 034 Understanding the News Media 0.0 Credits
Intermediate to advanced English as a second language. Emphasizes listening, discussion, and reading skills as students learn to read newspaper articles and listen to news from a variety of sources. Provides instruction on how the news is made and evaluated. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 035 Intermediate Vocabulary Development 0.0 Credits
Intermediate English as a second language course. Provides strategies to improve academic, general, and technical vocabulary; to discover common roots in English words; and to improve reading skills. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.
ESL 036 TOEFL iBT Listening & Speaking 0.0 Credits
High intermediate to advanced English as a second language. Prepares students to take the Internet-based TOEFL (Test of English as a Foreign Language) for academic purposes. Provides instruction in the listening and speaking sections of the TOEFL. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Can enroll if major is ESL or major is IG.

ESL 037 Intermediate Grammar IV 0.0 Credits
High intermediate English as a second language course. Provides instruction and practice in such areas as comparative structures, passive voice, gerunds and infinitives, and clause structures. Placement testing is required. Offered as needed. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 038 Intermediate Exploring American Life & Language 0.0 Credits
Intermediate English as a second language course. Students evaluate aspects of United States culture and history as presented in selected drama, literature, and music. Additional presentations and writing assignments support development of fluency in speaking and writing skills. Placement testing for this course is required. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 040 Listening and Speaking IV 0.0 Credits
High intermediate English as a second language. Provides intensive instruction in the development of the following skills: pronunciation/fluency (sounds, stress, intonation, linking, phrasing), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news, mini-lectures), repair of communication breakdown, and grammatical competence. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 041 Reading and Writing IV 0.0 Credits
High intermediate English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic essay format, grammatical structures and mechanics, and the ability to communicate ideas orally and in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 042 Advanced Grammar V 0.0 Credits
Low advanced English as a second language course. Provides instruction and practice in such areas as usage of advanced verb tenses, subject-verb agreement, pronouns, and modals. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 043 Intermediate Presentation Skills 0.0 Credits
Intermediate English as a second language course. Provides instruction on preparing, delivering, and evaluating presentations. Explores ways to engage audience and improve performance. Builds confidence through speaking skill development. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 044 Skills for College Success 0.0 Credits
High intermediate to advanced English as a second language. Addresses academic skills topics such as listening to lectures and note taking, reading textbooks and synthesizing information, conducting research, and expanding awareness of the United States academic environment. Placement testing is required. Offered all terms.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Can enroll if major is ESL or major is IG.

ESL 045 TOEIC Preparation 4-6 0.0 Credits
High intermediate to advanced English as a second language. Introduces skills and strategies that are helpful in taking the TOEIC test. Improves listening and reading comprehension skills. Focuses on analyzing types of test questions commonly asked and learning strategies for answering the questions. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 046 TOEFL iBT Reading & Writing 0.0 Credits
High Intermediate to advanced English as a second language. Prepares students to take the Internet Based TOEFL (Test of English as a Foreign Language) for academic purposes. Provides instruction in the reading and writing sections of the TOEFL. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 047 Intermediate Pronunciation and Conversation 0.0 Credits
Intermediate English as a second language course. Provides instruction on pronunciation, word stress, and intonation. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 048 TOEFL iBT Reading & Writing 0.0 Credits
High Intermediate to advanced English as a second language. Prepares students to take the Internet Based TOEFL (Test of English as a Foreign Language) for academic purposes. Provides instruction in the reading and writing sections of the TOEFL. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 049 Intermediate Pronunciation and Conversation 0.0 Credits
Intermediate English as a second language course. Provides instruction on pronunciation, word stress, and intonation. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 050 Listening and Speaking V 0.0 Credits
Low advanced English as a second language. Provides intensive instruction in the development of the following skills: pronunciation/fluency (ease, speed, smoothness of speaking), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news reports, lectures), repair of communication breakdown, and grammatical competence. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
ESL 051 Reading and Writing V 0.0 Credits
Low advanced English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, vocabulary development, academic essays and the use of source material, grammatical structures and mechanics, and the ability to communicate effectively in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 052 Advanced Vocabulary Development 0.0 Credits
Advanced English as a second language course. Provides strategies to improve academic, general, and technical vocabulary; to discover common roots in English words; and to improve reading skills. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 055 Strategies for Academic Reading 0.0 Credits
Advanced English as a second language. Improves reading comprehension. Provides skills for defining and identifying main and supporting ideas, recognizing transitional words and their role in meaning, and finding organizational patterns. Explores the authors' purpose, opinion, and tone. Placement testing is required. Offered as needed. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 056 GMAT Preparation 5-6 0.0 Credits
Advanced English as a second language. Provides instruction for GMAT reading. Offers strategies to identify key parts of an argument and reviews grammatical and stylistic rules in the sentence correction section. Analyses arguments. Provides instruction for essay writing. Placement testing is required. Offered as needed. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 057 Advanced Vocabulary and Idioms 0.0 Credits
Advanced English as a second language. Provides strategies to improve idiomatic language using authentic sources from a variety of media.
Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 058 Advanced Exploring American Life & Language 0.0 Credits
Advanced English as a second language course. Students evaluate aspects of United States culture and history as presented in selected drama, literature, and music. Additional presentations and writing assignments support development of fluency in speaking and writing skills. Placement testing for this course is required. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 060 Listening and Speaking VI 0.0 Credits
Advanced English as a second language. Provides intensive content-based instruction in the development of the following skills: pronunciation/fluency (ease, speed, smoothness of speaking), vocabulary, listening/speaking (participate appropriately in spoken interactions, understand news reports, lectures), grammatical competence, repair of communication breakdown. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 061 Reading and Writing VI 0.0 Credits
Advanced English as a second language. Provides intensive instruction in the development of the following skills: reading comprehension, inferring, academic writing (including research paper with synthesis, summary, reaction, analysis, and citation of sources), grammar and mechanics, and effective communication in writing. Placement testing is required. Offered all terms. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 062 TOEFL iBT for All Skills 0.0 Credits
High intermediate to advanced English as a second language. Prepares students to take the iBT (Internet Based Test of English as a Foreign Language) for academic purposes. Provides instruction in the listening, speaking, reading, and writing sections of the TOEFL. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 2 times for 12 credits
Restrictions: Can enroll if major is ESL or major is IG.

ESL 063 Advanced Grammar VI 0.0 Credits
High advanced English as a second language course. Provides instruction and practice in such areas as usage of passive tense, noun clauses, adjective clauses, gerunds and infinitives, and conditional sentences. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 064 Advanced Presentation Skills 0.0 Credits
Advanced English as a second language course. Provides instruction on preparing, delivering, and evaluating presentations. Explores ways to engage audience and improve performance. Builds confidence through speaking skill development. Placement testing is required. Offered all terms. 3-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 067 Language of Science Technology Engineering and Mathematics 0.0 Credits
High intermediate to advanced English as a second language course. Provides instruction on building academic vocabulary, reading, and oral skills by incorporating authentic materials from a variety of STEM (Science, Technology, Engineering & Math) fields.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.
ESL 068 Language of Media and Design 0.0 Credits
High Intermediate-Advanced Listening & Speaking. Develops English as a second language communicative fluency in design-related concepts and vocabulary through the use of authentic materials and experiences.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 0 credits

ESL 069 Advanced Pronunciation and Conversation 0.0 Credits
Advanced Intermediate English as a second language course. Provides instruction on pronunciation, word stress, and intonation. Gives students a chance to improve and practice their spoken communication skills. Placement testing is required. Offered all terms. 3.0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 070 GLOBE Business Information 0.0 Credits
Intermediate to advanced level English as a second language. Develops students' ability to read business material, understand key vocabulary and discuss current events in the business sector. Provides instruction in reading and understanding case studies. Placement testing is required. Offered as needed. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 071 GLOBE Business Communication 0.0 Credits
Intermediate to advanced level English as a second language. Improves students' ability to effectively communicate in business setting. Offers strategies for negotiation and provides instruction on cross-cultural communication styles. Placement testing is required. Offered as needed. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 072 Business Site Visits 0.0 Credits
Intermediate to advanced level English as a second language. Prepares students to observe American business practices on site. Develops research skill. Provides instructions and practice in organizing and making presentations as well as letter writing skills. Placement testing is required. Offered as needed. 3.0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 073 Introduction to Business Research 0.0 Credits
High-intermediate to advanced level English as a second language. Introduces students to the research process of business related topics and exposes them to American culture and conversation through interaction. Offered as needed. 7.5-0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 074 IELTS Listening and Speaking 0.0 Credits
High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the listening and speaking sections of the IELTS test. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 075 IELTS Reading and Writing 0.0 Credits
High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the reading and writing sections of IELTS. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL.

ESL 076 IELTS (International English Language Testing System) Test Preparation All Skills 0.0 Credits
High intermediate to advanced English as a second language. Prepares students to take the IELTS (International English Language Testing System) for academic and professional purposes. Provides instruction in the listening, speaking, reading, and writing sections of the IELTS test. Placement testing is required.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 12 credits
Restrictions: Can enroll if major is ESL or major is IG.

ESL 080 Preparation Course for International Teaching Assistants 0.0 Credits
Intermediate to advanced English as a second language. Prepares new international teaching assistants for their responsibilities in the university. Provides intensive instruction in English language, pedagogy, and the culture of the American classroom. Department permission required. Offered as needed. 18.0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 081 Accent Reduction 0.0 Credits
This is an advanced English as a second language course, which provides intensive instruction in the development of speaking and pronunciation skills. Students will practice pronunciation skills by participating actively in spoken interactions and responding appropriately while focusing on vocabulary, pronunciation, intonation patterns, and grammatical functions.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ESL or major is IG.

ESL 090 English for Medical Purposes 0.0 Credits
High intermediate to advanced English as a second language. Prepares participants' communication skills in medical context. Provides an overview of the American healthcare system and the dynamics of the different participants involved in the system. Placement testing is necessary. Offered as needed. 2.5-2.5-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
ESL 091 Special Topics in English Language & Culture 0.0 Credits
Advanced English as a second language. Focuses on specific issues in English structure and usage. Includes issues of discourse, sociolinguistics, and culture. Placement testing is necessary. Offered as needed. 3.0-0.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ESL 110 Introduction to Academic Discourse 3.0 Credits
The course prepares students for courses requiring English academic communication. The course provides a review of English grammar, an introduction to academic writing, reading, and academic support services. Opportunities to interact with other members of the university community are provided. By departmental approval only.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits

ESL 180 Topics in English for Academic Purposes 2.0 Credits
This course focuses on the academic discourse of a particular genre and/or content area in English for Specific Purposes or English for Academic Purposes.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 5 times for 12 credits

Entertainment & Arts Management

Courses

EAM 130 Overview of Entertainment and Arts Management 3.0 Credits
Students acquire an understanding of the profit and non-profit organization within a social and governmental context. Of primary focus are the arts organization as an entity, how they are organized and the impact and place they have within the community.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

Discusses the professional operation of museums and commercial art galleries including advocacy, legal, administration, curatorial, exhibition, and public issues by examining the questions: What are the challenges of managing a museum's collection including acquisition policies, insurance, conservation and storage of art? What resources are needed to manage a gallery?.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

EAM 302 Exhibition Design 3.0 Credits
Discuss key issues in exhibition presentation including visual design elements, accessibility, and approachable presentation strategies. This course also explores theoretical and ethical issues related to museums, art collecting, cultural patrimony, curatorial authority, and diversity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

EAM 310 Social Media in Entertainment 3.0 Credits
Social Media in Entertainment teaches students how to develop the strategies for using social media as a marketing tool in the arts and entertainment industries. The goal will be to develop a social media strategy for a specific entity utilizing information on strategies and tactics learned during the course, as well as how to integrate this strategy into an overall marketing plan. Students will learn how to craft a strategy, how to evaluate which social media tools and tactics to use to achieve the most effective results and how to successfully implement the strategy.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

EAM 312 Introduction to Fund Development for the Arts 3.0 Credits
Course provides an overview of basic fund-raising techniques for non-profit arts organizations. Strategies for raising funds from individuals, corporations, foundations, and government funding sources are reviewed and analyzed. Methodologies for developing a complete fund-raising plan are studied.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is EAM.
Prerequisites: EAM 130 [Min Grade: D]
EAM 313 Volunteer and Board Management 3.0 Credits
This course continues the work of EAM 312 - Intro to Fund Development for the Arts. It will build on that course by focusing on the area of volunteers for nonprofit organizations. Content will examine the board of directors and other volunteers in relation to governing, managing, operating a nonprofit arts entity.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is EAM.
Prerequisites: EAM 312 [Min Grade: D]

EAM 321 Box Office and Venue Management 3.0 Credits
Focuses on the operational management tasks. Students explore the marketing and promotional component of box office management, the use of technology and ticket sales, and managing people.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: EAM 211 [Min Grade: D]

EAM 322 Performing Arts Touring and Promotion 3.0 Credits
This course provides an overview of organizing performing arts tours and events by discussing administrative and management responsibilities of touring including booking, logistics, staffing, promotion and decision making.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior.

EAM 325 Producing for Live Entertainment 3.0 Credits
This course is experience-based and designed to familiarize students with all aspects of producing a live entertainment event and to discuss and develop the necessary skills to do so successfully through practical experience. The course provides an overview of the issues routinely encountered by producers of live events, both commercial and non-profit, through the actual producing of an arts/entertainment event. Skills developed include working creatively with artists; understanding project management, planning and budgeting; revenue projection and management (including possible fundraising); understanding technical and logistical issues around production; and successful execution.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 1 times for 6 credits
Restrictions: Cannot enroll if classification is Junior

EAM 340 Artist Representation and Management 3.0 Credits
This course teaches EAM students who will be representing or managing artists, or will be working with agents or artist managers, the nature of those jobs and the challenges of successfully working with talent to promote and monetize their careers.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is EAM and classification is Junior or Senior.

EAM 391 [WI] Promotion, Press and Publicity 3.0 Credits
This course addresses media positioning and addresses relationship development, press releases, PSA's, CD promotional development and other methods for promoting arts and entertainment. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

EAM 399 Independent Study in Entertainment and Arts Management 12.0 Credits
Provides individualized study in entertainment and arts management in a specialized area of study. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 4 times for 12 credits
Restrictions: Cannot enroll if classification is Junior

EAM 401 Writing for Arts Managers 3.0 Credits
Focuses on non-marketing writing, with a significant portion of the class focusing on the development and writing of proposals seeking funding for arts organizations. The course covers in-depth the standard elements of a complete professionally prepared proposal, as well as exposing students to alternate formats.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (ENGL 103 [Min Grade: D] or ENGL 105 [Min Grade: A] or HUM 108 [Min Grade: D]) and EAM 312 [Min Grade: D]
EAM 461 Entertainment Publishing 3.0 Credits
A detailed look at the publishing industry, including history and economics of publishing. Industry segments to be covered include books, periodicals and new media. Topics include developer/publisher issues, laws, industry operating characteristics, distribution and industry trends.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Not repeatable for credit
-Prerequisites: EAM 361 [Min Grade: D]

EAM 465 Special Topics in Entertainment and Arts Management 1.0-3.0 Credit
Provides study in entertainment and arts management on a special topic. This course may be a lecture or laboratory course. May be repeated for credit if topics vary.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated 5 times for 15 credits

EAM 471 Fine Arts Market Development 3.0 Credits
Examines the dynamics of the commercial visual arts market, including international auction houses such as Sotheby's and major private collectors. Answers questions like: How is the market value (price) of art works determined?.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Not repeatable for credit
-Restrictions: Cannot enroll if classification is Freshman

EAM 472 Trends in Visual Arts 3.0 Credits
Exploration of recent developments in the visual arts in the US and abroad. Includes the reviewing of major visual arts exhibitions and emerging artists and artistic trends within the decade. Field trips to area galleries and art museums are included.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Not repeatable for credit
-Restrictions: Cannot enroll if classification is Freshman

EAM 491 Entertainment and Arts Management Senior Project 1.0 Credit
Senior Project is a thesis course on a topic of the student's choice over the three quarters of senior year in close cooperation with a faculty advisor. The student will present their final project to a jury in their final quarter of senior year.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated 3 times for 3 credits
-Restrictions: Can enroll if major is EAM and classification is Senior.

EAM I99 Independent Study in Entertainment & Arts Management 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM I499 Independent Study in Entertainment & Arts Management 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM I199 Independent Study in Entertainment & Arts Management 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM I399 Independent Study in Entertainment & Arts Management 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated 4 times for 12 credits

EAM I499 Independent Study in Entertainment & Arts Management 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM T180 Special Topics in Entertainment & Arts Management 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM T280 Special Topics in Entertainment & Arts Management 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM T380 Special Topics in Entertainment & Arts Management 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated multiple times for credit

EAM T480 Special Topics in Entertainment & Arts Management 1.0-3.0 Credit
Topics decided upon by faculty will vary within the area of study.
-College/Department: Antoinette Westphal College of Media Arts Design
-Repeat Status: Can be repeated 5 times for 15 credits

Entrepreneurship and Innovation Courses

ENTP 100 Innovation Neighborhood 1.0 Credit
This course is designed to introduce students to the numerous entrepreneurial activities that are part of Drexel University and the greater Philadelphia region. The course sparks curiosity about innovations and ideas not commonly encountered, and stimulates creative thinking about new opportunities.
-College/Department: Close School of Entrepreneurship
-Repeat Status: Not repeatable for credit
ENTP 101 Life Strategies I 3.0 Credits
Life Strategies is a two term series which reinforces entrepreneurship as an increasingly important life skill. First in the series, Life Strategies I, has two thrusts. It first explores the accelerating job market evolution and why future careers and earning a living will be vastly different from even recent history. Facts presented make the case people should embrace entrepreneurship as a “habit of mind” as they maneuver future career options. The course then introduces the personal skill set valuable to entrepreneurs, skills every student should consider honing to help them navigate their future whether or not they plan to be an entrepreneur.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Prerequisites: ENTP 101 [Min Grade: D]

ENTP 102 Life Strategies II 3.0 Credits
Life Strategies II introduces the fundamentals of starting an entrepreneurial endeavor. The course provides students with a basic understanding of startup enterprise essentials and why a startup isn’t just a smaller version of a large business. The course is intended to give a student who has no business training the ability to frame a potential business idea for consideration by others using only a few simple models, common sense, and logic. Life Strategies I is a prerequisite.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Prerequisites: ENTP 101 [Min Grade: D]

ENTP 205 Ready, Set, Fail 3.0 Credits
There are many students who say they want to be an entrepreneur, but they are often not ready for the risk that comes with starting and growing a business. Taking risks requires a deep appreciation of failure. This course will teach students how to appreciate failure, learn from it, and use these experiences to build future success in an entrepreneurial setting.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit

ENTP 210 Leading Start-Ups 3.0 Credits
Entrepreneurs face unique leadership challenges, especially when founding a new company. This course provides the aspiring entrepreneur with tools and frameworks necessary for creating strategy, building companies, and assembling human capital with limited resources. By exploring what entrepreneurial leaders actually do, and how they do it, the student will learn through experiential exercises both the challenges and the excitement of starting a new venture.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Prerequisites: ENTP 210 [Min Grade: D]

ENTP 215 Building Entrepreneurial Teams 3.0 Credits
The overall goal of this course is to evaluate the different approaches in forming teams during the startup of a new company. We will compare and contrast evidence-based and anecdotal team formation models to determine their advantages and disadvantages as well as their effects on the expected outcomes.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Prerequisites: ENTP 210 [Min Grade: D]

ENTP 250 Ideation 3.0 Credits
Innovation is the driving force behind today’s economy and ideation supports an individual’s ability to innovate. This course provides students with tools, methods and self-reflection techniques necessary to bring new ideas into reality. Through creative innovation, successful entrepreneurs not only create new ventures but also re-invent companies to remain competitive in an ever-changing market. Students in this course will use ideation techniques to develop new ideas, change or build upon established practices and apply these techniques in approaching and analyzing business situations. Students will be able to apply creative skills more effectively both personally and professionally.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit

ENTP 270 Social Entrepreneurship 3.0 Credits
This course examines how social entrepreneurs launch successful ventures to address the world’s most challenging social and environmental problems. The course introduces students to frameworks and methodologies that challenge current models to advance original solutions to existing problems. A passion for social change is advanced by adopting a market orientation and data-driven approaches that encompass both social and financial outcomes.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit

ENTP 275 Women and Minority Entrepreneurship 3.0 Credits
Today, women and minority entrepreneurs are starting new business ventures at a quick pace. Yet they there are few resources for these business owners to improve the historically high failure rate or grow their new venture. In this course, students will understand how race, gender, or ethnicity plays a part in establishing a women- or minority-owned enterprise. The course examines the current state of minority and women’s entrepreneurship along with the conditions that support or block minority or women entrepreneurs.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit

ENTP 325 Early Stage Venture Funding 3.0 Credits
This course provides students with an understanding of the process, opportunities and challenges associated with early stage venture funding. It exposes you to the concepts, practices and tools related to the funding needs of early stage ventures with a focus on bootstrapping, friends/ family financing and angel-stage investment. The course will include an understanding of the unique needs of family businesses, small businesses and social ventures, as well as a deep look at alternative (but increasingly popular) fund raising techniques such as crowdfunding. This will be accomplished through a combination of field projects, readings, cases, and speakers designed to convey the unique environment of investments and new ventures.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Prerequisites: ACCT 115 [Min Grade: D] or ACCT 120 [Min Grade: D] or ACCT 110 [Min Grade: D]
ENTP 329 Entrepreneurship & New Technologies 3.0 Credits
Creating a new technology venture offers unique challenges. Indeed, innovation and advances in technology are prevalent, and technological innovation leads to competitive advantage. Students are introduced to the challenges of new technology-based companies that include: the complexity of intellectual property, research team development, and sources of funding. This course will examine entrepreneurship in technology markets and take a deep view of what it takes to be a technology entrepreneur.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 340 Managing Entrepreneurial Growth 3.0 Credits
Managing growth includes leveraging assets at every stage and controlling the risk. This course will focus on areas that are essential to a new venture’s growth, including planning, marketing, talent management, and financial performance. Students will examine the growth opportunities of a venture and develop an experiential growth plan that will provide the greatest impact for a firm.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 350 Dynamics of the Family Firm 3.0 Credits
This course studies the unique dynamics of family firms and the complex issues involved with creating, owning, and successfully operating a family business. Students will examine ownership structures, strategic human-resource issues, governance, strategy, marketing, family dynamics, culture, and philanthropy.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 360 Franchising 3.0 Credits
Franchising is rapidly increasing worldwide. There is a growing need among franchise owners for employees with industry experience and know-how, and there are growing opportunities for entrepreneurs who want to start a franchise. Together, these developments present a unique opportunity for the entrepreneur. This course offers various aspects of starting, developing, and managing a franchise.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 370 Global Entrepreneurship 3.0 Credits
This course focuses on international opportunity identification for new and emerging companies; market analysis; joint ventures, regional legal and cultural issues and financing foreign ventures. The course will provide students with an understanding of the complexities faced by entrepreneurs doing business in a global environment and with knowledge, which will help them to be successful within the global context. In classroom discussion, emphasis will be placed on entrepreneurship in China, India and Latin America however class projects will touch upon numerous countries across the globe.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 385 Innovation in Established Companies 3.0 Credits
This course provides students with an understanding of how companies remain competitive using innovation as the driving force behind product or service development. Entrepreneurs challenge assumptions and create value in established organizations. While most executives would agree that innovation is the key to a sustainable business in the 21st century, few seem to understand how to make it a reality. Students will be introduced to various kinds of internal and joint ventures, such as corporate venture-capital investments, alliances, mergers, and acquisitions to create value and promote entrepreneurship within an organization. Students will develop skills that are important for careers in an entrepreneurial setting and corporate venture activities.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 390 Clean Tech Ventures 3.0 Credits
This course will provide the groundwork to understanding new venture development in clean energy markets. Through experiential learning, specifically, field visits to local energy companies, and through guest speakers, students will develop an appreciation and understanding of the market conditions and policy implications of new ventures in this sector.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 410 Thought Leadership 3.0 Credits
The individual entrepreneur faces many challenges. This course takes a philosophical and ethical approach to developing the entrepreneurial mindset. This course examines the ethical challenges in a start-up venture or high-growth firm, as illustrated through discussions by guest speakers–serial entrepreneurs. Students will be required to reflect on the varying viewpoints presented by the distinguished experts, and will develop their own approaches and philosophies regarding “the entrepreneur” and the “process of entrepreneurship.”
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENTP 440 Launch It! Early Stage 3.0 Credits
This course is designed for students interested completing one of four minors offered by the Close School of Entrepreneurship: Entrepreneurship and Innovation, Social Entrepreneurship, Energy Innovations or Health Innovations. In the course, students will be expected to identify an opportunity and propose the launch of a company. Working in teams, students will also learn how to experiment with different business models, validate a market need, and build all facets of a start-up company. Students will be expected to achieve milestones and propose key risks on which the business’ success depends.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
ENTP 450 Launch It! 3.0 Credits
This course is designed for those serious about being entrepreneurs. Students will be expected to work on the actual launching of a start-up. The course involves talking to customers, partners, competitors, experimenting with different business models, validating a market need through customer development, and building all facets of a start-up company. *Admission to this course requires submission of a business application form and approval of the application by the professor.
College/Department: Close School of Entrepreneurship
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENTP 205 [Min Grade: D] and ENTP 250 [Min Grade: D] and ENTP 325 [Min Grade: D]

ENTP T480 Special Topics in Entrepreneurship 1.0-12.0 Credit
This course covers various topics of particular relevance to the study of entrepreneurship.
College/Department: Close School of Entrepreneurship
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

Environmental Engineering
Courses
ENVE 300 Introduction to Environmental Engineering 3.0 Credits
Overview of environmental engineering practice: water resources, water and waste control, solid waste, air pollution, risk management and environmental health. Population and resource demand forecasting, chemistry and microbiology necessary to solve basic problems is included.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CAEE 201 [Min Grade: D]

ENVE 302 Environmental Transport and Kinetics 3.0 Credits
Covers applications of mass balances to describing transport environmental systems, diffusive and dispersive processes, and coupling transport and kinetic models.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 201 [Min Grade: D]

ENVE 335 Industrial Safety 3.0 Credits
Examines safety in the workplace, loss prevention principles, Occupational Safety and Health Act implementation, accident investigation techniques, and basics of loss control and risk management.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: CHE 201 [Min Grade: D]

ENVE 410 Solid and Hazardous Waste 3.0 Credits
Provides an overview of municipal and industrial waste management, including design and economic analysis. Discusses options such as landfilling and incineration from engineering, social, and regulatory perspectives. Reviews physical, chemical, and biological treatment of hazardous waste.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENVE 415 Recycling of Materials 3.0 Credits
This course will examine the selection criteria for recycling component materials. Recycling involves both reusing materials for energy applications and reprocessing materials into new products.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENVE 302 [Min Grade: D]
ENVE 416 Urban Water Resources & Infrastructure Systems 3.0 Credits
This course covers planning, design, and operation of water and wastewater systems in urban areas. Topics include domestic and firefighting water supply, treatment, storage and distribution; wastewater collection and treatment; stormwater collection, peak flow attenuation and treatment, and protection of source/receiving water aquatic habitat.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENVE 300 [Min Grade: D] and CIVE 330 [Min Grade: D] and CIVE 430 [Min Grade: D]

ENVE 421 Water and Waste Treatment II 3.0 Credits
Covers processes used for water purification and waste treatment, containment and immobilization of hazardous wastes, and ultimate disposal of residues and hazardous materials.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ENVE 421 [Min Grade: D]

ENVE 422 Water and Waste Treatment Design 3.0 Credits
Covers integration of processes into a complete treatment system. Includes detailed design procedures to control wastes, prevent environmental contamination, and protect drinking water quality.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVE 421 [Min Grade: D]

ENVE 435 Groundwater Remediation 3.0 Credits
Reviews physical, chemical, and biological remediation technologies for contaminated sites and groundwater by in-site and ex-site applications.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVE 421 [Min Grade: D]

ENVE 450 Data-based Engineering Modeling 3.0 Credits
This course covers empirical methods to understand and model engineering systems. Students will learn to develop statistical models and use three common statistical software packages, Excel, SPSS, and R.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman or Junior or Pre-Junior or Sophomore
Prerequisites: ENGR 361 [Min Grade: D] or CHE 335 [Min Grade: D] or MEM 361 [Min Grade: D] or MATH 311 [Min Grade: D]

ENVE 455 Geographic Information Systems 3.0 Credits
The course provides grounding in fundamental principles of GIS, and achieves understanding through hands on practical laboratories. Course topics include: spatial reference systems, geographic data theory and structures, structures, spatial analysis tools, functions and algorithms, GIS data sources, compilation and quality, and GIS project design and planning.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.

ENVE 460 Fundamentals of Air Pollution Control 3.0 Credits
Fundamental topics with regard to the formation and control of air pollutants are studied. This course provides strong foundation for engineers who will be involved in the development of engineering solutions for industrial air pollution prevention and design, development or selection of air pollution control devices and systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit

ENVE 465 Indoor Air Quality 3.0 Credits
Introduces basic concepts about indoor air quality, indoor air pollutants, including their sources and health effects, transport of pollutants, modeling of pollutant concentration in buildings, and ventilation as well as air cleaning systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENVE 302 [Min Grade: D] or AE 220 [Min Grade: D]

ENVE 470 Industrial Ecology 3.0 Credits
Industrial Ecology (IE) is an evolving view of industrial operations which seeks to design processes and manufacture products in such a way to minimize and optimize their environmental interactions. IE borrows the analogy from nature that “waste” from one organism is “food” for another. Within the “technospher”, the organization in which economic processes and activities are conducted by humans, IE uses the evolving tools life cycle assessment (LCA), material flow analysis (MFA), and economic valuation, to explore novel approaches to minimizing waste stocks and flows at both micro and macro levels.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: CIVE 240 [Min Grade: B-] and ENVE 300 [Min Grade: B-]

ENVE 471 Environmental Life Cycle Assessment 3.0 Credits
This course provides undergraduate engineering students with an enhanced skill set to permit them to cooperate more fully in the sustainable design and planning of engineering systems. Students will be introduced to the systems analysis modeling approaches, life cycle assessment (LCA) and material flow analysis (MFA), and will explore research-oriented aspects of the methods and their application in engineering design, decisions, and public policy.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Prerequisites: ENVE 300 [Min Grade: B-] and CIVE 240 [Min Grade: B-]

ENVE 485 Professional Environmental Engineering Practice 1.0 Credit
Professional and ethical considerations in environmental engineering practice. Career management and lifelong learning.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVE and classification is Senior.
ENVE 486 Environmental Engineering Processes Laboratory I 2.0 Credits
Laboratory experiments on common environmental engineering unit processes are performed. Students use data to draw conclusions relevant to design of full-scale systems.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVE and classification is Senior.
Prerequisites: ENVE 302 [Min Grade: D] and ENVS 401 [Min Grade: D]

ENVE 487 Environmental Engineering Processes Laboratory II 2.0 Credits
Laboratory experiments on common environmental engineering unit processes are performed. Students use data to draw conclusions relevant to design of full-scale systems. Continuation of ENVE 486.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVE and classification is Senior.
Prerequisites: ENVE 486 [Min Grade: D]

ENVE 491 [WI] Senior Project Design I 3.0 Credits
Introduces the design process. Covers information retrieval, problem definition, proposal writing, patents, and design notebooks. Explores problem areas through presentations by experts from industry, government, and education. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ENVE 486 [Min Grade: D]

ENVE 492 [WI] Senior Design Project II 3.0 Credits
Continues the work started in ENVE 491. Requires written and oral progress reports. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ENVE 491 [Min Grade: D]

ENVE 493 [WI] Senior Design Project III 3.0 Credits
This course is the final sequence in the design project. It requires written and oral final reports, including oral presentations by each design team at a formal Design Conference open to the public and conducted in the style of a professional conference. This is a writing intensive course.
College/Department: College of Engineering
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: ENVE 492 [Min Grade: D]

ENVE I199 Independent Study in ENVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE I299 Independent Study in ENVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE I399 Independent Study in ENVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE I499 Independent Study in ENVE 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE T180 Special Topics in ENVE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE T280 Special Topics in ENVE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE T380 Special Topics in ENVE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

ENVE T480 Special Topics in ENVE 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Engineering
Repeat Status: Can be repeated multiple times for credit

Environmental Graphic Design

Courses

EVGD 200 Introduction to Environmental Graphic Design 4.0 Credits
This course is an introduction to the Environmental Graphic Design specialty including wayfinding systems, architectural graphics, signage, exhibit design, and mapped and themed environments.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D]

EVGD 210 Architectural Signage 4.0 Credits
Architectural Signage focuses on identification and wayfinding systems within a built environment. This course explores means and methods through class exercises and assigned projects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is GRDS.
Prerequisites: EVGD 200 [Min Grade: D]
EVGD 220 Wayfinding 4.0 Credits
This course explores the discipline of wayfinding in an urban environment through the use of visual clues and directional hierarchy, including typography, symbols, and color.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is GRDS.  
**Prerequisites:** EVGD 210 [Min Grade: D]

EVGD 310 Design Techniques and Materials 3.0 Credits
This course introduces a wide range of materials and techniques and explores how they may be applied to develop a successful environmental graphics project.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is GRDS.  
**Prerequisites:** EVGD 220 [Min Grade: D]

EVGD 320 Exhibit Design 4.0 Credits
This exploration of exhibit design focuses on communicating a narrative visually through the design of space, graphics, objects, and interactivity.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is GRDS.  
**Prerequisites:** VSCM 230 [Min Grade: D] and VSCM 240 [Min Grade: D] and EVGD 200 [Min Grade: D]

EVGD 421 Environmental Branding 4.0 Credits
This course explores the marketing power of a branded identity when it is visually and spatially applied to a retail environment.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is GRDS.  
**Prerequisites:** EVGD 320 [Min Grade: D]

EVGD 496 Senior Thesis in Environmental Graphic Design 3.0 Credits
Senior Thesis is a personal investigation that evidences advanced problem solving in Environmental Graphic Design. Proposals must have faculty approval.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is GRDS.  
**Prerequisites:** EVGD 320 [Min Grade: D] and EVGD 421 [Min Grade: D]

EVGD I199 Independent Study in EVGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit  
**Restrictions:** Can be repeated multiple times for credit

EVGD I299 Independent Study in EVGD 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
**College/Department:** Antoinette Westphal College of Media Arts Design  
**Repeat Status:** Can be repeated multiple times for credit  
**Restrictions:** Can be repeated multiple times for credit

Environmental Science

Courses

ENVS 101 Introduction to Environmental Science 5.0 Credits
Students will be introduced to a variety of disciplines and techniques necessary to effectively study local stream, marsh, lake, and terrestrial ecosystems. Students will examine the physical, chemical, and biological elements with these ecosystems with an emphasis on biological elements. Some of the field experiences will include learning how to sample algae, higher plants, invertebrates, fish and salamanders, and methods for surveying and monitoring marshes and selected physical and chemical measurements.
**College/Department:** College of Arts and Sciences  
**Repeat Status:** Not repeatable for credit  
**Restrictions:** Can enroll if major is ENSS or major is ES or major is GEO.
ENVS 102 Natural History, Research and Collections 2.0 Credits
Students will learn about the scope, nature and uses of the specimen collection, methods of collection care, maintenance and growth for different taxonomic groups. Students will learn how biodiversity research questions and projects are conceived and implemented. Students will observe and collect specimens and data, and begin to learn analyses and publication of results. Students will gain an appreciation for the role of natural history collections in modern research.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVS or major is GEO.

ENVS 169 Environmental Science 3.0 Credits
This course provides an introduction to environmental problems and their causes, cultural changes, worldviews, ethics and environment. It covers such topics as science, matter and energy, ecosystems and how they work, air and air pollution, climate, global warming, and ozone loss, waste minerals and soil, solid, toxic and hazardous wastes, protecting food sources and energy resources.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if major is BIO or major is ENVS

ENVS 201 Practical Identification of Plants and Animals 2.0 Credits
This course provides instruction and hands on experience in using print and online taxonomic keys, field guides and reference collections of real specimens for identification of plants, animals and fungi. The emphasis is on the flora and fauna of the Philadelphia region and learning how to use identification tools in the field and lab. The main objective is to have students understand the importance of accurate identification of organisms and to develop basic knowledge and skills that can be extended and applied to organisms widely.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVS.
Prerequisites: BIO 124 [Min Grade: D]

ENVS 202 Tree of Life 2.0 Credits
This course reviews the diversity of life in the context of phylogenetic history as the organizing principle. The course emphasizes recent discoveries of living and fossil taxa, breakthroughs and controversies in resolving relationships, and the key evolutionary innovations in eukaryotes, such as multicellularity, major shifts in habitat, parasitism, symbiosis, and complex morphological novelties.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVS or major is GEO.
Prerequisites: BIO 124 [Min Grade: D]

ENVS 203 The Watershed Approach 2.0 Credits
Students will integrate several disciplines of study to compare an urbanized to a non-urbanized stream ecosystem. All elements of the stream ecosystem and its watershed will be examined. Field experience will include learning how to assess the physical properties of a stream, measure and monitor water quality, sample invertebrates and vertebrates.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVS.
Prerequisites: ENVS 101 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 212 Evolution 4.0 Credits
Aspects of the fact of evolution are discussed in class, including early evolutionary thought, pivotal moments in the history of life, and evidences for evolution from fossils, genetics, and living organisms. Key concepts include natural selection, speciation, adaptation, vicariance, inclusive fitness, and evo-devo. Non-scientific arguments pertaining to evolution are refuted.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 226 Discoveries in Animal Behavior 3.0 Credits
The course explores the incredible diversity of animal behavior using specially selected examples of recent research findings. It focuses on the adaptiveness of behavior: how animals solve problems posed by their physical and social environments. We will consider implications of research on other species for understanding our own (human) behavior. Non-majors only.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 230 General Ecology 3.0 Credits
This course examines how organisms interact with the biological and physical world and bridges the natural sciences with the social sciences. Using evolutionary theory as its basis, this course will cover topics spanning multiple levels of organization within the science of ecology.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 109 [Min Grade: D]

ENVS 247 Native Plants and Sustainability 3.0 Credits
Plants are an integral part of our daily lives in nearly every way, directly or indirectly. Increasingly, our landscapes are becoming dominated with species that are introduced from other parts of the world (intentionally or by accident), displacing many of the species that were once key components of our ecosystems. The impacts of the loss of native plants are profound. This course will give students an overview of the many reasons why native plants are critically important to us, and the problems that arise when non-native plants replace them. There will be discussions about topics ranging from evolutionary theory, conservation, agriculture, public health, nutrition, and more.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 254 Invertebrate Morphology and Physiology 3.0 Credits
Provides comparative study of the major invertebrate groups, relationships between physiology and organismal structure, phylogenetic relationships and classification, development, and life histories.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 100 [Min Grade: D] or BIO 101 [Min Grade: D] or BIO 107 [Min Grade: D] or BIO 109 [Min Grade: D] or BIO 124 [Min Grade: D]
Corequisite: ENVS 255
ENVS 255 Invertebrate Morphology and Physiology Lab 2.0 Credits
This laboratory course provides a comparative study of the morphology of representative species from the major invertebrate groups. How their structural features relate to their physiology and behavior is emphasized. Identification of species, examining phylogenetic relationships, and understanding life histories will relate organisms to their ecological roles.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Corequisite: ENVS 254

ENVS 260 Environmental Science and Society 3.0 Credits
This course is a multidisciplinary introduction to the range of disciplines that make up the environmental sciences. The aim of this course is to provide an understanding of basic physical, ecological and social sciences that focus on the study of the natural environment and its interaction with human society.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 275 Global Climate Change 3.0 Credits
This course provides a multidisciplinary introduction to the issue of global climate change. It focuses on the scientific evidence for climate change, its impact on natural and human systems, actions that can be taken to mitigate or adapt to climate change and the political and cultural dynamics of this issue.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 280 Special Topics 12.0 Credits
Special topics offered in biodiversity, earth and environmental science. Topics include recent multidisciplinary areas of environmental concern.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENVS 284 Physiological and Population Ecology 3.0 Credits
Examines the role of physiological adaptation in the ecology of plants and animals and the principles of population biology as applied to biological systems. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D]

ENVS 285 [WI] Population Ecology Laboratory 2.0 Credits
This laboratory course will introduce the basic concepts of populations ecology in context of their modern ramifications and will prepare students for advanced research in population ecology. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 284 [Min Grade: D] (Can be taken Concurrently)

ENVS 286 Community and Ecosystem Ecology 3.0 Credits
Introduces the principles of community and ecosystem ecology. Emphasizes the role of community structure and ecosystem organization in the ecology of plants and animals.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D]

ENVS 287 Community Ecology Laboratory 2.0 Credits
This laboratory course will introduce the basic concepts of community ecology in context of their modern ramifications and will prepare students for advanced research in community and ecosystem ecology. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 286 [Min Grade: D] (Can be taken Concurrently)

ENVS 289 Global Warming, Biodiversity and Your Future 3.0 Credits
Human induced global warming is changing the physical environment, ecological systems, and human systems around the world. We will explore causes, effects, and consequences of global warming using NASA satellite information and current scientific and semi-popular writings. Students will understand the implications of global climate change for their futures.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 302 Environmental Chemistry Laboratory 2.0 Credits
In this course students will learn basic techniques for chemical analysis of environmental samples, including biological material, water and soil. Students will also learn to utilize more manual methods but will also use electronic data acquisition systems and further develop their scientific writing skills.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enrol if major is ENVS.
Prerequisites: CHEM 103 [Min Grade: D]

ENVS 304 Energy and the Environment: Iceland 3.0 Credits
This course studies how an economy and culture changes when it switches from fossil to alternative energy. In the last 30 years Iceland has switched from a poor country fueled by fossil fuels to one of the wealthiest nations in Europe, with only 20 percent of its energy coming from fossil fuels. In this class students will synthesize data/knowledge into flow diagrams of the economy of Iceland and then use the synthesis to understand the impacts of energy development and extraction on the environment and society.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
ENVS 305 Iceland Intensive: Green Energy 1.0 Credit
Students will attend an intensive course in Iceland on energy plants and their impact on the environment. The course in Iceland will bring students to various energy facilities to examine their operation and better understand how these facilities impact the environment and serve society. Before each tour of a power plant students will attend a lecture at Reykjavik University on power production and its role in fueling economies and its potential impacts on the environment.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Corequisites: ENVS 304

ENVS 308 GIS and Environmental Modeling 3.0 Credits
Students will learn how to write computer programs to read data directly from digital maps and then perform various spatial analyses and modeling tasks. The class will include an introduction to spatial- and geo-statistics; techniques for determining ecological richness of organisms; methods for modeling basic forcing factors such as solar radiation, water temperature; approaches for modeling the flow of water in a landscape; and ultimately, combining these techniques to model or simulate ecosystems.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENVS or major is ES or major is GEO.

ENVS 310 Introduction to Environmental Chemistry 3.0 Credits
This course uses a topic-based approach to the chemistry of the environment. Students in this course are expected to have a minimal/ some knowledge of chemistry, with a desire of applying this knowledge to the environment. Topics of interest include environmental chemistry of water, water pollution, water treatment, geochemistry, atmospheric chemistry, air pollution, hazardous materials and resources.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: CHEM 103 [Min Grade: D]

ENVS 312 Systematic Biology 3.0 Credits
This is an introduction to systematic biology. The primary tasks of systematics are 1) the discovery, description, and classification of biodiversity to construct a general reference system for life on Earth; 2) the reconstruction of the "tree of life": the descent relationships among units of biodiversity at multiple hierarchic levels from genes to phyla; and 3) the application of reconstructions of decent relationships to the study of evolution. Phylogenetic systematics, concerned with units of biodiversity at the species level and above, will be emphasized.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 202 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 315 Plant Animal Interactions 3.0 Credits
Plant-animal interactions provide us with some of the most remarkable examples of adaptation and co-evolution. They are also key determinants of ecosystem functions. This course will provide a survey of the diversity of plant-animal interactions, the multidisciplinary approaches used to understand their ecology and evolution, and their importance to ecosystem services that sustain human societies.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 322 Tropical Ecology 3.0 Credits
This is a course in the ecology of tropical rain forests and dry forests. Tropical ecology will explore the physical and biological factors that result in the formation of the forest, the effect of human impact, the effectiveness of management, and the future of these forests.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 323 Tropical Field Studies 3.0 Credits
Ecology of tropical rain forests and dry forests. We will explore physical and biological factors that result in formation of these forests, effect of human impacts on these forests, effectiveness of management of these forests, and the future of these forests in Costa Rica in the field. Some or all pre-requisites may be taken as either a pre-requisite or co-requisite. Please see the department for more information.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 109 [Min Grade: D]

ENVS 324 Microbial Ecology 3.0 Credits
Studies the relationships of microbes with plants, animals, and the environment, both biotic and abiotic components. Examines the key role of microbes in the functioning of ecosystems affecting decomposition, disease, nutrient cycling, and energy flow. Studies these processes and the role of microbes in the natural functions of ecosystems.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 221 [Min Grade: D] or ENVR 316 [Min Grade: D] or ENVS 316 [Min Grade: D]

ENVS 326 Molecular Ecology 3.0 Credits
Through a combination of lecture, discussion, and computational exercises, students will learn how molecular tools have been used to study genetic variation. They will then learn how these studies have provided answers to previously unanswered questions in fields including ecology, evolution, behavior, conservation, and forensics.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or ENVS 284 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 218 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 327 Molecular Ecology Laboratory 2.0 Credits
Through a combination of laboratory and computational exercises, students will develop a toolkit for applied molecular studies of ecology and evolution. The course will focus on initiating or continuing a novel research project relating to one of several topics within the field of molecular ecology.

College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or ENVS 284 [Min Grade: D] or BIO 211 [Min Grade: D] or BIO 218 [Min Grade: D]
ENVS 230 Conservation Biology 3.0 Credits
This course will detail the loss of biodiversity and explore related issues, including the theories and practices of conservation biology and the solutions currently and the solutions currently being formulated to enhance the preservation of species on our planet. The course will explore potential limitations to these strategies and provide an appreciation of the relevance of ethics, economics and politics to biodiversity conservation while promoting the potential for individual action to influence conservation efforts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 330 Aquatic Ecology 3.0 Credits
Studies the relationships between aquatic plants and animals and their environment. Introduces the study of the ecology of lakes, rivers, ponds, and streams.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 333 Wetland Ecology 3.0 Credits
Examination of the structure, function, and dynamics of wetland ecosystems. Topics include geomorphology, hydrology, biogeochemistry, plant and animal adaptations to wetland environments, and wetland policy.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 334 Watershed Ecology 3.0 Credits
Watershed ecology explores the linkages among aquatic ecosystems and their water catchment or watershed. Aquatic ecosystems are influenced by physical, chemical, and biologic factors in "the watershed." The conditions in the watershed influence aquatic ecosystems at several spatial-scales, for example areas neighboring a stream, "the riparian zone," influences water temperature much more than those areas further away from the stream. Incorporating spatial scale into watershed studies is a developing field with many opportunities to advance watershed science and the associated environmental regulations and policies.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 336 Terrestrial Ecology 5.0 Credits
Studies the relationships between terrestrial plants and animals and their environment. Introduces the study of the ecology of local ecosystems, such as the Poconos and the New Jersey Pine Barrens.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: BIO 126 [Min Grade: D] or ENVR 230 [Min Grade: D] or ENVS 230 [Min Grade: D]

ENVS 341 Equatorial Guinea: Society & Environment 4.5 Credits
A lecture and community outreach course based at the National University of Equatorial Guinea that combines instruction in mankind's relationship with the natural environment (human population, natural resources, environmental degradation, pollution, biodiversity loss and climate change) with environmental outreach activities specific to Equatorial Guinea.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 342 Equatorial Guinea: Natural Resource Economics 4.5 Credits
A lecture course based a the National University of Equatorial Guinea that combines instruction in the economic implications of natural resources (renewable and non-renewable resources, efficient utilization, market performance, government controls, sustainability and discounting) with a university-wide guest lecture series addressing local issues.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 343 Equatorial Guinea: Field Methods 3.0 Credits
A lecture and field excursion course based at the University of Equatorial Guinea combining instruction in standard methods for studying rainforest communities (expedition planning; GPS and mapping, forest diversity and productivity; wildlife population monitoring) with multi-day field experiences in Bioko Island's remote protected areas.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 344 Equatorial Guinea: Field Research 6.0 Credits
An intensive research course that takes advantage of the unspoiled rainforest adjacent to the Moka Wildlife Center, a university-affiliated research station located in the highlands of Bioko Island, Equatorial Guinea (Central/West Africa). Opportunities exist for student research on topics including primates, antelope, birds, chameleons, butterflies and plants.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 1 times for 6 credits

ENVS 351 Resource and Environmental Economics 4.0 Credits
Examines the microeconomic and quantitative aspects of markets for both renewable and exhaustible resources, and the interaction between the energy and resource sectors of the economy and between the productive sectors of the economy and the natural environment, with evaluation of major public initiatives and issues in these areas.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 352 Ornithology 3.0 Credits
Birds are among the most ubiquitous, diverse, and charismatic animals and we know a great deal about their biology through the contributions of both professional Ornithologists and citizen scientists alike. This course will touch on a variety of topics, including evolution, ecology, behavior, conservation, and biological diversity of birds.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 126 [Min Grade: D] or ENVS 230 [Min Grade: D]
ENVS 354 Ichthyology 3.0 Credits
This course will explore fish and the link between their diversity in form and ecological function. This combined lecture-lab course will cover the basic systematics, evolutionary relationships, biogeography, structure, physiology, life history, and ecology of fishes and lampreys.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 126 [Min Grade: D] or ENVS 230 [Min Grade: D]

ENVS 360 Evolutionary Developmental Biology 3.0 Credits
Evolutionary Developmental Biology (Evo-Devo) compares developmental processes between organisms to determine how these mechanisms evolved in light of ancestral relationships. Topics include "your inner fish," how to "build" a dinosaur, and the reducibly simple evolution of the eye. Also explored are developmental controls such as environmental factors and molecular mechanisms.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 212 [Min Grade: D] or BIO 217 [Min Grade: D]

ENVS 364 Animal Behavior 3.0 Credits
The mechanisms, ecology and evolution of the activities of animals in relation to their natural environment. Topics include development and control (neural and hormonal) of behavior, adaptations for survival, feeding, and predator avoidance, strategies of habitat selection, communication, reproduction, and social behavior.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 212 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 365 Animal Behavior Laboratory 2.0 Credits
An observational study of the behavior of a captive group of social animals at the Philadelphia Zoo including species selection, background research, ethogram construction, 16 hours of quantified observation, analysis of data and written report.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 370 Practice of Environmental Economics 3.0 Credits
The focus of this course is on the real world implications of environmental resources exploitation and economic tools for dealing with them. Areas include air and water pollution, toxic wastes and mineral, water and forestry resource harvesting/extraction.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ECON 201 [Min Grade: D] and ECON 202 [Min Grade: D]

ENVS 382 Field Botany of the New Jersey Pine Barrens 4.0 Credits
This course focuses on plant identification skills that are necessary to conduct scientific botanical surveys. The vascular flora of the New Jersey Pine Barrens, including rare plant species, is emphasized with special reference to habitat and community analysis. Non-vascular species are examined but not emphasized.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D]

ENVS 385 Systems Ecology 3.0 Credits
Systems Ecology will provide the tools to integrate and synthesize disciplines of sciences to understand the development, disruption, and dynamics of ecosystems. Students will learn general systems theory about how elements of an ecosystem interact with other parts of the system and how exogenous or external variables drive ecosystem processes. The course will show how to combine field data with simple mathematics in step by step calculations to describe, study, and emulate complex systems.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 354 [Min Grade: D] or ENVS 360 [Min Grade: D]

ENVS 388 Marine Field Methods 4.0 Credits
Course focus is on the ecology of local marine environments. Students learn marine field survey methods, identification of marine organisms, habitat analyses, and use of equipment for measuring abiotic variables (soil and water). Field exercises focus on key aspects of the regional ecology: fire, soil and water.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.
Prerequisites: ENVS 368 [Min Grade: D] or BIO 141 [Min Grade: D]
ENVS 391 Freshwater and Marine Algae 3.0 Credits
Origin and evolution of various algal groups, principles and methods of algal systematics, algal ecology, and use of algae as environmental indicators. Field trips to local streams, ponds and wetlands where students will collect algal samples and record environmental data. Lab work will include sample processing and algal identification.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Pre-Junior or Senior.
Prerequisites: BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 392 Ichthyology and Herpetology 3.0 Credits
Many species of fishes, amphibians and reptiles face extirpation from their former ranges and some face total extinction within our lifetime. This course investigates major regional and global issues concerning viability of these organisms and addresses solutions using concepts of population ecology, community ecology, physiological ecology and conservation biology.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.
Prerequisites: BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 393 Entomology 3.0 Credits
This course introduces students to some of the major topics in the field of entomology.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]
Corequisite: ENVS 394

ENVS 394 Entomology Laboratory 2.0 Credits
This course introduces students to some of the major practical topics in the field of entomology. The course consists of lab work, collecting trips, and creation of an insect collection.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 124 [Min Grade: D] or BIO 141 [Min Grade: D]
Corequisite: ENVS 394

ENVS 400 Cascade Mentoring 2.0 Credits
Provides senior ENVS students with mentoring and service opportunities within the Environmental Science curriculum. The course will also cover issues of ethics, professional development and career counseling. ENVS senior students will be required to enroll as a peer mentor for one of these six courses. Seniors will work with faculty to help plan and deliver experiential activities and will act as mentors and tutors for first and second year students enrolled in these courses.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 6 credits
Restrictions: Can enroll if major is ENVS and classification is Senior.
Prerequisites: CHEM 102 [Min Grade: D] or CHEM 122 [Min Grade: D]

ENVS 405 Atmospheric Chemistry 3.0 Credits
Introduces the principles of atmospheric physics and photochemical kinetics as a prelude to understanding the atmospheric chemical system. Examines the chemistry of the natural atmosphere to prepare for the understanding of how pollutants interact with natural species. Considers pollution of the stratosphere and the troposphere.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVR 401 [Min Grade: D] or ENVS 401 [Min Grade: D]

ENVS 409 Environmental Surveying and GIS 3.0 Credits
This course is a field intensive course that gives students hands on training on state-of-the-art surveying gear. Students will learn the principals of surveying used by field ecologists or geoscientists, including types of surveying gear, how to use it in the field, and how to analyze collected data.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENVS 410 Physiological Ecology 3.0 Credits
Examines mechanisms by which physiological factors affect and limit the distribution and abundance of animals, including physiological and behavioral thermoregulation, heat and cold tolerance, acclimation, metabolism, osmoregulation and dehydration tolerance, feeding strategies, digestion and feeding patterns, energy and water budgets, toxins and optimality theory.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 412 Biophysical Ecology 3.0 Credits
Covers energy balances and methods of heat transfer in organisms, including convection, conduction, radiation, evaporation, and metabolism and steady-state and transient energy balances, including mass balances, water uptake and evaporation.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: (MATH 239 [Min Grade: D] or MATH 123 [Min Grade: D]) and (PHYS 153 [Min Grade: D] or PHYS 102 [Min Grade: D])

ENVS 413 Advanced Population Ecology 3.0 Credits
One of the greatest issues concerning life on Earth and human impact on the planet is whether species will survive or go extinct. This course explores how wild populations change over time and investigates the concepts and quantitative methods used to determine the viability of plant and animal populations.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 284 [Min Grade: D]
ENVS 414 Advanced Community Ecology 3.0 Credits
Community ecology is the study of how populations of organisms interact with each other and the physical environment. Students will investigate the underlying principles that explain and predict interactions among populations of organisms, and how these principles can be used to conserve and manage wild animal and plant communities.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: ENVS 286 [Min Grade: D]

ENVS 417 Stream Assessment 3.0 Credits
Most stream and river ecosystems are stressed by human activities, and aquatic ecologists are frequently called upon to assess problems, make scientific evaluations and provide management recommendations. A main goal of this course is to provide problem-solving experiences in stream assessment based on example real-world environmental questions. The assessments will provide students opportunities to address issues they may face as ecologists, engineers, managers and policy makers.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: ENVS 230 [Min Grade: D] or BIO 126 [Min Grade: D] or BIO 141 [Min Grade: D]

ENVS 438 Biodiversity 3.0 Credits
This course explores major patterns of biodiversity that biologists have documented across the planet. The course begins with an overview of major types of biodiversity, focusing on species diversity, and methods for measuring and analyzing biodiversity. Next it explores major patterns of biodiversity that are fundamental to ecology and conservation, and theories for the causes of biodiversity patterns.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Prerequisites: BIO 124 [Min Grade: D] or ENVS 230 [Min Grade: D]

ENVS 441 [WI] Issues in Global Change I: Seminar 2.0 Credits
Discuss topics such as records of climate change, atmospheric chemistry and global warming, the greenhouse effect, ozone depletion, acid rain, decreased biodiversity, desertification, deforestation, and sea-level rise. This is a writing intensive course.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.
Prerequisites: ENVS 441 [Min Grade: D]

ENVS 442 Issues in Global Change II: Research 2.0 Credits
Requires students to focus on a particular change topic or issue in order to analyze it, prepare a research report, and present a final seminar.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.
Prerequisites: ENVS 441 [Min Grade: D]

ENVS 443 Issues in Global Change III: Synthesis 2.0 Credits
The purpose of this course is to provide seniors in Environmental Science and Ecology with an opportunity to make an in-depth examination of the factors causing global change in the 21st century, to analyze their own data as well as that in the literature, to synthesize new ideas and to report orally and in writing on their findings.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is ENSS or major is ENVS or major is GEO and classification is Senior.
Prerequisites: ENVS 442 [Min Grade: D]

ENVS 470 Advanced Topics in Evolution 3.0 Credits
Discusses and evaluates selected topics such as population and quantitative genetics, genomics in evolutionary analysis, fitness concepts and modes of selection, species concepts and modes of speciation, evolution of development and complex adaptations, biological diversification over space and time, adaptive radiation and extinction, historical biogeography. Topics for each term will be selected based on current research and interest.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated 3 times for 12 credits
Prerequisites: ENVS 212 [Min Grade: D] or BIO 217 [Min Grade: D]

ENVS 497 Research 0.5-12.0 Credits
Provides guided research in ecology, earth science and environmental science.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

ENVS I199 Independent Study in ENVS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENVS I299 Independent Study in ENVS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENVS I399 Independent Study in ENVS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENVS I499 Independent Study in ENVS 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENVS T180 Special Topics in Environmental Science 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Environmental Studies & Sustainability

Courses

ENSS 120 Introduction to Environmental Studies 3.0 Credits
This course looks at the many topics that fall under the interdisciplinary focus of environmental studies, such as biodiversity, preservation, conservation, sustainability, deforestation, environmental justice, risk society, treadmill of production, and climate change. Students will be introduced to the ideas, issues and practices linked to these concepts.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENSS 275 Global Climate Change 3.0 Credits
This course provides a multidisciplinary introduction to the issue of global climate change. It focuses on the scientific evidence for climate change, its impact on natural and human systems, actions that can be taken to mitigate or adapt to climate change and the political and cultural dynamics of this issue.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit

ENSS 280 Special Topics 1.0-12.0 Credit
This course will explore current issues and interests in Environmental Studies. The topic will vary each term.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENSS 325 Introduction to Urban and Environmental Planning 4.0 Credits
This course serves to introduce students to the field of urban and environmental planning. In doing so, this course seeks to expose students to the skill sets used by planners; including the planning process; citizens participation models; community needs assessment; data analysis and presentation; plan implementation and evaluation; and professional ethics.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 326 Cities and Sustainability 3.0 Credits
This course will provide an overview of the issue of sustainability planning and policy for cities. Topics include how we define sustainability for cities, and how we measure its progress and impacts. The course will also cover how land reuse planning impacts the development of green space, including parks, gardens and urban agriculture, as well as green building, the green economy and the impact of sustainability planning on public health outcomes.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 341 Environmental Movements in America 4.0 Credits
Focuses on key collective actors and institutions that are involved in the creation of U.S. environmental policies, including historical and cultural processes of change involving social movements, environmental advocacy organizations, foundations, and the media.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 345 Sociology of the Environment 4.0 Credits
Examines acts of nature vs. acts of man, food and health, environmental politics, social movements and environmental issues, environmental and development policies, and environmental and global change.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 346 Environmental Justice 4.0 Credits
Focuses on the political economy of environmental injustice and the impact of social movements addressing it; impact of chemical pollutants on human health; and the scientific and legal issues surrounding the study and regulation of pollutants.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 347 Introduction to Environmental Policy Analysis 4.0 Credits
Introduction the development and implementation of U.S. environmental policy, including historical development, political process, methods of analysis and creation of laws, regulations and budgets.
College/Department: College of Arts and Sciences
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

ENSS 499 Independent Study 1.0-12.0 Credit
Provides a course of independent study in Environmental Studies. Topics for study must be approved in advance of registration by the advisor and the instructor involved.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit

ENSS I199 Independent Study in ENSS 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: College of Arts and Sciences
Repeat Status: Can be repeated multiple times for credit
Fashion Design

Courses

FASH 201 Survey of the Fashion Industry 3.0 Credits
Introduces the materials and methods used to design, develop, and market the fashion product, including current vocabulary and foundation of knowledge about industry practices and career opportunities.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FASH 210 Presentation Techniques in Fashion 3.0 Credits
Introduces the presentation techniques and skills used for communication in the fashion industry.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D] and FASH 201 [Min Grade: D]

FASH 211 Fashion Drawing I 3.0 Credits
Examines the fashion figure, fabrication, and conceptual design through the use of black, white, and gray media. Includes classroom drawing from a live model and weekly critiques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 211 [Min Grade: D]

FASH 212 Fashion Drawing II 3.0 Credits
Examines fashion forms, fabrication, and conceptual design through the use of color and mixed media. Works toward the development of a personal "fashion look" and an understanding of drawing as it relates to the fashion industry. Includes live model.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 211 [Min Grade: D]

FASH 220 Textile Design 3.0 Credits
Instructs the student in both traditional and digital techniques of textile design. Investigates layout, repeats, and coordinated fabric groups.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]

FASH 230 Textiles for Fashion Design 3.0 Credits
Examines the textile manufacturing industry and the fundamental processes involved in producing fabrics made of natural or manufactured fibers. Includes basic textile terminology and production processes as well as selection and evaluation of fabrics based on aesthetics, performance and care characteristics.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH.

FASH 241 Construction Skills 4.0 Credits
Develops a proficiency in basic garment construction. Emphasizes facility with industrial equipment. Introduces production techniques and an overall awareness of standards of quality.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FASH 251 Fashion Design I 4.0 Credits
Poses fashion problems to be solved, with an emphasis on elements of design. Explores use of half-scale experimentation and development of "studies" as an aid in developing design ideas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: VSST 304 [Min Grade: D]
FASH 252 Fashion Design II 4.0 Credits
Explores sources of inspiration and requires students to translate and develop source material into creative garments. Stresses the extension and elaboration of ideas within a specific market.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 251 [Min Grade: D]

FASH 310 Presentation Techniques 3.0 Credits
Introduces the presentation techniques and skills used for communication in the fashion industry.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: (VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]) and FASH 201 [Min Grade: D]

FASH 311 Textile Design 3.0 Credits
Instructs the student in both traditional and digital techniques of textile design. Investigates layout, repeats, and coordinated fabric groups.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 102 [Min Grade: D] or VSST 105 [Min Grade: D]

FASH 313 Fashion Drawing for Industry 3.0 Credits
Covers sketching and specification drawing for the professional designer. Emphasizes communicating with manufacturers, pattern-makers, and assistants regarding garment construction, detailing, and fabrication.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 210 [Min Grade: D]

FASH 314 Fashion Presentation Drawing 3.0 Credits
Requires the creation of a portfolio of original designs executed in a medium of choice. Explores various market segments of the industry and includes project reviews by critics who are specialists in these areas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 315 Computer Aided Design for Patternmaking 3.0 Credits
Develops skills in patternmaking, marker making, and grading, using the computer as a tool.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 342 [Min Grade: D]

FASH 316 Computer Aided Design for Fashion Design 3.0 Credits
Explores the use of computers in the fashion industry and develops presentation skills using industrial and commercial software.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 313 [Min Grade: D]

FASH 317 Technical Design 3.0 Credits
Technical Design is crucial in managing technical information internally and externally within a fashion design company. The student is trained in the essential skills of creating technical packages using data programs and sketching, conducting fittings, maintaining specs, and grading patterns and how to communicate information efficiently in a global fashion industry.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH.
Cannot enroll if classification is Freshman or Pre-Junior or Sophomore
Prerequisites: FASH 342 [Min Grade: D]

FASH 341 Flat Pattern Design 4.0 Credits
Explores basic patternmaking techniques and manipulations and establishes comparisons between drafting and draping techniques in the development of standard slopers.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 342 Draping Design 4.0 Credits
Covers garment development by the draping method. Advances skills of FASH 341.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 341 [Min Grade: D]

FASH 343 Tailoring 4.0 Credits
Provides intensive investigation of materials and construction techniques used in tailoring. Uses a combination of garment production methods, including a strong emphasis on couture practices.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 342 [Min Grade: D]

FASH 349 Fashion Design I 4.0 Credits
Poses fashion problems to be solved, with an emphasis on elements of design. Explores use of half-scale experimentation and development of "studies" as an aid in developing design ideas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: VSST 204 [Min Grade: D] or VSST 304 [Min Grade: D]

FASH 350 Fashion Design II 4.0 Credits
Explores sources of inspiration and requires students to translate and develop source material into creative garments. Stresses the extension and elaboration of ideas within a specific market.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 251 [Min Grade: D] or FASH 349 [Min Grade: D]
FASH 351 Fashion Design III 4.0 Credits
Requirements development of original designs and execution incorporating draping, drafting, and flat-pattern techniques. Facilitates the development of a realistic approach to garment design in terms of industrial restrictions, and market segmentations. Includes professional critiques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 252 [Min Grade: D] and FASH 343 [Min Grade: D]

FASH 352 Fashion Design IV 4.0 Credits
Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 351 [Min Grade: D]

FASH 399 Independent Study in Fashion Design 0.5-12.0 Credits
Provides individually studied fashion design in a specialized area of study. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 433 Couture Techniques 3.0 Credits
Expands and broadens technical skills and lays the groundwork for development of the senior collection. Includes couture evening wear techniques and research processes.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Freshman
Prerequisites: FASH 351 [Min Grade: D]

FASH 450 Machine Knitting 3.0 Credits
Machine Knitting is an introduction to knitwear design specialization. Students learn to style and draw knit garments to develop a professional portfolio. Technical information regarding yarn analysis, stitch construction, pattern and garment construction are the focus of this class.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 9 credits
Restrictions: Can enroll if major is FASH.
Prerequisites: FASH 241 [Min Grade: D] and VSST 112 [Min Grade: D]

FASH 451 Accessory Design 3.0 Credits
This course provides students with concepts and skills to design traditional and contemporary fashion accessories with emphasis in embroidery; applique; hand painting; and clay, plastic and ceramic work.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 452 Millinery Design 3.0 Credits
Familiarizes students with the techniques and processes involved in hat making. Emphasis will be placed on historical perspectives and materials.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 241 [Min Grade: D]

FASH 453 Intimate Apparel Design 3.0 Credits
This course will offer an introduction to the foundations and sleepwear marketplace. Primary focus will be on the design and execution of two pieces for this market. Students will learn how to construct a bra (molded cups) and how to incorporate these details into their final looks for this market. In addition, students will learn the safe operation of the specialty sewing machines for knit construction.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 251 [Min Grade: D]

FASH 454 Advanced Fashion Drawing 3.0 Credits
Through in-class creative assignments with experimental techniques, students learn to respond rapidly, originally, and with increased focus to resolve drawing and design problems.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FASH 212 [Min Grade: D]

FASH 464 Professional Portfolio 3.0 Credits
This course will involve preparation and execution of a finished designer portfolio for couture, 7th Avenue or the boutique American market. Included in the preparation is research of their chosen entry into the market via history, visuals and customer profile.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH and classification is Senior.
Prerequisites: FASH 314 [Min Grade: D]

FASH 465 [WI] Special Topics in Fashion Design 0.5-12.0 Credits
Provides study in fashion design on a special topic or on an experimental basis. May be repeated for credit if topics vary. This is a writing intensive course.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 466 Business of Fashion 3.0 Credits
Presents the following topics in seminar fashion merchandising, retail distribution, interpreting consumer demand, merchandise assortment planning, unit and inventory control and pricing, fashion marketing and manufacturing, including the marketing process, components of the fashion industry, market evaluation, demographic and psychological factors, manufacturing components and processes, and case studies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FASH and classification is Senior.

FASH 467 Style and the Media 3.0 Credits
Fashion Journalism is reading and writing about all aspects of fashion, including reporting, criticism and commentary about photography related to fashion published in newspapers or magazines, displayed on websites, aired on radio and/or TV. The style of the writers and also the aspects of dress they found significant is examined.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
FASH 477 Fashion Design Seminar 3.0 Credits
Provides reading and discussion of pertinent topics of current concern in the professional area of fashion design.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Junior or Senior.

FASH 491 Collection I 4.0 Credits
The second of a three-part series in which the student develops the senior collection. Requires the student to demonstrate the synthesis of a personal aesthetic and technical acumen.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if classification is Senior.
Prerequisites: FASH 352 [Min Grade: D]

FASH 492 Collection II 3.0 Credits
Requires completion of senior collection and presentation in student fashion show.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FASH 491 [Min Grade: D]

FASH I199 Independent Study in Fashion Design 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH I299 Independent Study in Fashion Design 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH I399 Independent Study in Fashion Design 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH I499 Independent Study in Fashion Design 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH T480 Special Topics in Fashion Design 0.5-12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FASH T380 Special Topics in Fashion Design 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Film & Video

Courses

FMVD 110 Basic Shooting and Lighting 3.0 Credits
An introduction to the basics of shooting and lighting for film and video production through demonstrations, lectures, screenings and hands-on use of digital video and still cameras and lighting equipment.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 115 Basic Editing 3.0 Credits
Theoretical and practical principles of editing using a computer-controlled and post-production system utilizing sync sound film and video material. This class is a hands-on workshop. Screenings of excerpts from feature and short films are used to demonstrate editorial concepts.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 120 Basic Sound 3.0 Credits
A thorough analysis of sound theory and practical applications to give students the tools to understand how sound can be successfully recorded, edited, sweetened and re-recorded (mixed) for film and video.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 200 Acting for the Screen 3.0 Credits
This course examines the issues and techniques specific to acting for the camera. Through weekly workshops students address the limitations and relationships actors face in performing for the camera. The class explores various acting styles and schools of thought and involves extensive scene study and performance in a video setting.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 202 Directing for the Screen 3.0 Credits
This course provides students with an understanding of the role of a director in film and television. Students focus on the development of comprehensive skills for directing technical personnel, exposure to directing styles, communicating with actors and cinematic choices.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]
FMVD 206 Audio Production and Post 3.0 Credits
This course is an introduction to the creation and manipulation, of digital audio files. It is geared towards the Digital Media student, with respect to applying soundtrack elements to their images. Topics will include recording dialog, location sound recording, sound effects design, music editing, and multi-track mixing.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is DIGM.

FMVD 207 Location Sound Recording 3.0 Credits
This course will focus on training students to record quality sound for films in any location.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 210 Documentary Video Production 3.0 Credits
Builds on the knowledge of cinematic language and basic production technique learned in FMVD 110. Students become familiar with documentary shooting and editing strategies and produce final documentary projects.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 110 [Min Grade: D]

FMVD 215 Narrative Video Production 3.0 Credits
This course applies the basic skills learned in Screenwriting, Shooting and Lighting, Sound, Editing and Directing towards the creation of a fictional narrative film with increased emphasis on intermediate production and post-production technologies.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 202 [Min Grade: D] and SCRP 280 [Min Grade: D]

FMVD 218 Intermediate Cinematography 3.0 Credits
This course provides advanced focus in cinematic concepts and techniques and their use in electronic filmmaking.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 220 Experimental Video Production 3.0 Credits
This course explores experimental theses and techniques in video. Self discovery, working through a process, and developing varied strategies are part of each student's journey that culminates in a finished experimental film.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 226 Intermediate Sound 3.0 Credits
This course is designed to build upon the audio production recording skills achieved in FMVD 120-Basic Sound. Students will learn how to operate advanced industry standard field recorders and mix sound for multiple set microphones, including wireless microphones, and will become adept at troubleshooting potential film production audio issues.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 120 [Min Grade: D]

FMVD 228 Visual Storytelling 3.0 Credits
This course explores a variety of techniques and principles that are used to tell a visual story. It asks how we might differentiate a story told in images and sounds from one told in writing and investigates how techniques of cinematography, editing, and mise-en-scène contribute to the exposition of a story and to the articulations of its meaning.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD.
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 232 Film Action Choreography 3.0 Credits
In this course, a variety of different types of action scenes ranging from fistfights to car chases will be studied. Through screenings of successful action scenes and shot by shot analysis the student will learn the importance of camera placement and ample coverage. Through the combination of screenings and hands on action arrangement the student will gain an understanding of what is involved in a successful action sequence and have to skills to execute them.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 234 Legal Basics for Filmmakers 3.0 Credits
This course is designed to provide students with knowledge of basic business and legal issues in the film industry, and to develop a working understanding of intellectual property, contracts and other issues which apply to filmmaking, to assist the student in understanding the legal issues related to creative works.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 235 Intermediate Lighting 3.0 Credits
Emphasizes learning to model figures and shape scenery with light for film and video production. Covers methods of creating mood and atmosphere through light appropriate to the story of a particular film or video.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 110 [Min Grade: D]

FMVD 236 Film Business and Legal 3.0 Credits
This course introduces students to the business and legal issues related to the film industry. The class covers areas such as copyright, contracts, intellectual property, and distribution. Students will learn about the business and legal issues that are important to the success of their future career.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 237 Intermediate Editing 3.0 Credits
This course will build upon Adobe Premiere and Avid editing principles taught in FMVD 115-Basic Editing, with increased emphasis on editing aesthetics.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 242 Film Production Design 3.0 Credits
This course is designed to instruct in the techniques and methods of designing a set for film and television.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 268 Producing for Features 3.0 Credits
Producing will cover all aspects associated with producing a feature film in both the Hollywood and Independent arenas.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 291 Film and Video Internship 0.5-3.0 Credits
The student does a non-paying internship in the field of film and video for academic credit, working a minimum of 100 hours in a 10-week term for 3 credits. The student provides an initial informational sheet on the internship and submits a final paper on the experience. May be repeated for credit. The first time the course may be taken for 3 credits. After that, the course may be repeated, but for 1 credit each time. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is FMVD.

FMVD 295 Hollywood 101 3.0 Credits
This course will present an overview of how the business of Hollywood is really done. We’ll examine the role of producers, agents, managers, entertainment attorneys, publicists, and studio and network executives.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is EAM or major is FMVD or major is SCRP.

FMVD 298 Special Effects Make-up 3.0 Credits
Introduction to the materials and techniques used in the creation of a character or special effects make-up for film and video. Through demonstrations and hands-on projects, students learn the basics of cosmetic application and more specialized techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMVD 215 Steadicam Workshop 3.0 Credits
A hands-on introduction to the role of the camera operator in filmmaking.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD.
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 218 [Min Grade: D]

FMVD 230 Cutting Trailers 3.0 Credits
View, analyze and produce theatrical trailers and promos, as well as study the marketing methods that drive these productions. The history of trailers will also be studied.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 307 Camera Operators Workshop 3.0 Credits
This course will include an overview of the camera operator's role in filmmaking.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD.
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 218 [Min Grade: D]

FMVD 315 Audio Post Production 3.0 Credits
Sound Post-Production is a workshop that allows students to thoroughly focus on the audio portion of editing. In this course, the individual components of sound design are presented and students in order to understand how all the components work together to form a solid soundtrack.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 316 Post Color Correction 3.0 Credits
This course is designed to introduce students to the aesthetic and technical techniques of color grading using Blackmagic Design's DaVinci Resolve. Color Grading requires students to grasp the concepts of video scopes, color theory, and the glossary of colorist terms.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 310 Cutting Trailers 3.0 Credits
This course will provide an overview of the cutting trailer's role in filmmaking.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD.
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D] and FMVD 218 [Min Grade: D]

FMVD 317 Directing the Score 3.0 Credits
This course will provide the filmmaker student with the communication tools to direct a film score composer.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 320 Steadicam Workshop 3.0 Credits
A hands-on introduction to the use of the Steadicam as a creative production tool. The course will cover basic theory, set-up, and operation of the Steadicam with various cameras.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 310 [Min Grade: D]

FMVD 322 Production Workshop I 3.0 Credits
The first of a two-course sequence in which students produce a larger scale film, in terms of crew size, production value and story.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 215 [Min Grade: D]
FMVD 323 Production Workshop II 3.0 Credits
The second of a two-course sequence in which students produce a film or video project.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Prerequisites: FMVD 322 [Min Grade: D]

FMVD 324 Visual Effects for Film Editors 3.0 Credits
This course will introduce students to commonly used techniques in visual effects using Adobe After Effects. Students will learn workflow between After Effects and both Premiere and Avid editing systems, as well as integration with Photoshop and Illustrator.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 325 Stop Motion Animation 3.0 Credits
This course will explore the technique and expressive possibilities of traditional Stop Motion Animation. Students will learn to shoot objects or models one frame at a time to create the illusion of movement and life.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 110 [Min Grade: D] and FMVD 115 [Min Grade: D] and FMVD 120 [Min Grade: D]

FMVD 327 Advanced Lighting 3.0 Credits
This course expands upon lighting techniques taught in FMVD 235, Basic Lighting.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 235 [Min Grade: B]

FMVD 328 New Technologies in Film 3.0 Credits
This is a hands-on course that instructs in the use of emerging technologies in the film industry.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD or major is TELE.
Prerequisites: FMVD 310 [Min Grade: B]

FMVD 341 Creating Credits and Opticals 3.0 Credits
This course is designed to present a "real world" introduction to creating open and close title sequences for film and television.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 237 [Min Grade: D]

FMVD 344 Music Video Production 3.0 Credits
This course will study the history of Music Videos. Students will then develop and produce videos for artists represented by MAD DRAGON RECORDS.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 315 [Min Grade: D]

FMVD 365 Special Topics in Production 3.0 Credits
Focuses on a particular aspect of film and video production, such as cinematography, directing, or editing. The course may be repeated for credit if topics vary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 105 [Min Grade: D] or FMVD 110 [Min Grade: D]

FMVD 399 Independent Project in Film and Video 0.5-12.0 Credits
Students plan and produce a project in the area of film and video with faculty supervision. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Can enroll if major is FMVD. Cannot enroll if classification is Freshman

FMVD 400 Advanced Directing 3.0 Credits
This hands-on class explores the communication between actors and directors in the film industry. In a workshop setting, using professional actors, students work on scenes rotating as directors.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Cannot enroll if classification is Freshman

FMVD 415 Advanced Editing 3.0 Credits
This course builds upon the intermediate skills taught in FMVD 237-Intermediate Editing. Students advance towards editing larger scale productions, address challenges to specific types of projects, and explore advanced techniques.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Restrictions: Can enroll if major is FMVD and classification is Senior.
Prerequisites: FMVD 237 [Min Grade: B]

FMVD 420 Advanced Audio Post-Production 3.0 Credits
This course is designed to provide the student with an advanced understanding of the techniques and practices of the sound designer, sound editor, dialogue editor, sound effects editor, music editor, and recording mixer for film and television.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 315 [Min Grade: D]
FMVD 430 Advanced Cinematography 3.0 Credits
This course provides students with exposure to the principles of advanced cinematography and videography both in theory and practical experiences.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMVD 230 [Min Grade: D]

FMVD 465 Special Topics in Film and Video 3.0 Credits
Covers special topics in the area of film and video. May be repeated for credit if topics vary.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman
Prerequisites: FMVD 105 [Min Grade: D] or FMVD 110 [Min Grade: D]

FMVD 490 Directed Studies in Film and Video 0.5-12.0 Credits
Students undertake specified studies in the field of film and video with faculty supervision. May be repeated for credit. Department permission required.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit
Restrictions: Cannot enroll if classification is Freshman

FMVD 495 Senior Project in Film and Video 3.0 Credits
The student plans and produces a long-term project during the senior year with faculty supervision. The project is expected to integrate the academic and practical knowledge the student has acquired in the area of film and video.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated 3 times for 9 credits
Restrictions: Can enroll if major is FMVD and classification is Junior or Senior.
Prerequisites: FMVD 323 [Min Grade: D]

FMVD I199 Independent Study in Film & Video 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD I299 Independent Study in Film & Video 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD I399 Independent Study in Film & Video 0.5-12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD I499 Independent Study in Film & Video 12.0 Credits
Self-directed within the area of study requiring intermittent consultation with a designated instructor.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD T180 Special Topics in Game Film & Video 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD T280 Special Topics in Game Film & Video 12.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD T380 Special Topics in Game Film & Video 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

FMVD T480 Special Topics in Game Film & Video 3.0 Credits
Topics decided upon by faculty will vary within the area of study.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Can be repeated multiple times for credit

Film Studies

Courses

FMST 101 Film History I: Emergence 3.0 Credits
This course covers the emergence and evolution of film narrative in the first half of the 20th Century, as well as the core concepts of film analysis that help us understand this process. We will focus on the artistic and institutional factors contributing to the rise and decline of Classical Hollywood Cinema.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMST 102 Film History II: New Waves 3.0 Credits
This course investigates the liberation of film aesthetics in the latter half of the 20th Century, and how filmmakers of this era redefined their medium. Particular emphasis is placed on the "new waves" of filmmaking in Western Europe and the "New Hollywood" revolution that soon followed.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMST 101 [Min Grade: D]

FMST 103 Film History III: Trends 3.0 Credits
This course explores recent trends in domestic and international cinema, including the independent and multi-national filmmaking movements and ideologies that flourished around the turn of the 21st Century, as well as current developments in mainstream Hollywood cinema.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
Prerequisites: FMST 102 [Min Grade: D]

FMST 150 American Classic Cinema 3.0 Credits
This course explores the richness and variety of American Classic Cinema while instructing in the basic principles of cinematic storytelling.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit
FMST 160 European Cinema 3.0 Credits
This course surveys European Cinema from the period immediately after World War I to the present and looks at the work of several different directors whose work is representative of some of the dominant trends that have influenced western cinema.
College/Department: Antoinette Westphal College of Media Arts Design
Repeat Status: Not repeatable for credit

FMST 245 Non-Western Cinema 3.0 Credits
This is a survey of what has come to be considered World Cinema that originated outside of Europe and the United States. This course examines films that are great works of cinema that express the culture from which they spring as well as the unique artistic sensibilities and idea of their directors.
