Center for Food and Hospitality Management

Drexel University's Center for Food and Hospitality Management offers programs designed to address the critical scientific and business issues surrounding the food industry. The programs emphasize both academic and career development for an innovative study of the art, science and business of the food.

One of the most distinct qualities of all of our programs is the way we uniquely and individually work to connect each student to their ideal career. Through supportive and connected faculty, co-op opportunities, the most relevant guest lecturers, and partnerships with key regional and national employers, our programs build an industry-relevant resume and a strong network before graduation.

Programs are taught by accomplished faculty with experience in all areas of food and hospitality. Coursework is offered in culinary arts, baking, food science, beverage, gastronomy, food policy, sustainability, food/hospitality marketing, customer service, event planning and more. The programs are intended for students who plan to pursue careers in culinary arts, as research chefs, in recipe development, in food innovation and ideation, for food companies, restaurants, hotels, event planning firms and beyond.

Majors
- Culinary Arts & Science (BSCAS) (p. 12)
- Culinary Arts (BSCA) (p. 7)
- Hospitality Management (BSHM) (p. 16)

Minors
- Culinary Arts (p. 11)
- Food Science (p. 18)
- Food Studies (p. 18)
- Gaming and Casino Operations (p. 19)

Culinary Arts

Major: Culinary Arts
Degree Awarded: Bachelor of Science in Culinary Arts (BSCA)
Calendar Type: Quarter
Total Credit Hours: 184.0
Classification of Instructional Programs (CIP) code: 12.0503
Standard Occupational Classification (SOC) code: 25-1011; 11-9051

About the Program

Note: Effective Fall Term 2015, students are no longer being accepted into this program; however, students may apply to the combined BS in Culinary Arts & Science (p. 12) degree program.

The major in culinary arts prepares students for leadership positions in the fine foods segment of the hospitality industry. This baccalaureate degree in culinary arts is among the first of its kind in the United States. This program comprises approximately equal parts liberal arts, business, hospitality management, and culinary arts. The aim of the program is to prepare students as independent thinkers who can work collaboratively in the field of culinary arts.

Students completing this program also receive a business minor with a choice of one of the following areas:
- Business Administration
- Marketing
- Entrepreneurship

Alternatively, students may meet with their Advisor to select a minor that is more in line with their personal and professional goals.

For more information, visit the Culinary Arts (http://drexel.edu/hsm/academics/Culinary-Arts-Food-Science) page on the Center for Hospitality and Sport Management's website (http://drexel.edu/hsm).

Program Delivery Options

Drexel's BS degrees include courses in the liberal arts, the humanities, sciences, hospitality management and culinary arts. Three business minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional Four-year option, with one co-op experience:
This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:
This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/programs/mba) website.

**Full-time Status Evening option without co-op experience:**
To be eligible, students should have a minimum of two years full-time work experience related to students’ majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

**Part-time option without co-op experience:**
Students work closely with academic advisors to develop a customized plan of study toward degree completion.

**London option:**
(Available for Hospitality Management and Culinary Arts students.) Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

Co-op/Career Opportunities

The hospitality industry employs 15 million people nationwide. According to the National Restaurant Association statistics, employment is growing at the rate of eleven percent each year, making this industry one of the fastest growing in the country. The Hospitality Management program enjoys close relationships with the finest hotels, restaurants and tourism partners in the greater Philadelphia area, as well as interaction with professional organizations that represent the industry on a regional, national and international level. These relationships result in over $80,000 a year in scholarship funding for our students.

Typical career paths for graduates include the following:

- Restaurants and private clubs, which employ over 9 million people in the US
- Hotels & Casinos with almost 2.5 million employees
- Airlines, tour operating companies, travel agencies and tourism consulting
- Convention, special events, meeting planning, and tourism agencies
- Cruise lines, the fastest growing segment of the industry
- Retirement and life-care facilities
- Food service and beverage brokers, distributors, and suppliers to the industry

Co-op Opportunities

Drexel University has long been known for its cooperative education/internship programs, which allow students to mix periods of full-time, career-related employment with their studies. All traditional Hospitality Management students pursue the 6-month co-op employment. This six-month experience during the junior year is in a supervisory or managerial capacity. The following hotels, facilities, restaurants and clubs have recently offered co-op positions to Drexel’s Hospitality Management students. Although many of these examples are located in the Philadelphia area, co-op jobs are not limited to any region.

- Four Seasons Hotel
- Jose Garces - Garces Group
- Mark Vetri - Vetri Family of Restaurants
- Marriott Hotels and Resorts
- Philadelphia Convention and Visitors Bureau
- America’s Test Kitchen
- Philadelphia Chamber of Commerce
- Frog Commissary Catering
- Ritz-Carlton Hotel
- Sbraga Restaurant
- Restaurant Business Magazine
- Union League (private club)
- Walt Disney World

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Culinary Arts

The minor in culinary arts is designed for students pursuing a variety of majors who also have an interest in food and cuisine. The required courses introduce the major cuisines, and develop necessary culinary technical skills and fundamental knowledge of foods and food preparation. Students are able to select elective courses in various cuisines or can explore more theoretical areas of the field through topics including gastronomy, food history, and food writing.

Facilities

The major facility of the Hospitality Management, Culinary Arts and Food Science programs is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/academic-bistro), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, conference room and the Les Dames d’Escoffier Library.

Philadelphia Location

A unique feature of the Hospitality Management program at Drexel is that it is located in Philadelphia, with close proximity to New York City, Baltimore, and Washington, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, resorts, and casinos that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

Culinary Arts & Science

Major: Culinary Arts & Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 185.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Program (CIP) code: 12.0503
Standard Occupational Classification (SOC) code: 35-2014

About the Program

The major in culinary arts and science allows students to deeply explore cuisine—the practical techniques of cooking, but also its science, history, culture, politics and economics. Students receive a broad overview of cooking and cuisine and specialize in food and beverage management, which prepares students for leadership positions in the restaurant and food industry.

Students majoring in culinary arts and science are prepared for careers in the food industry such as pastry chef, chef, research chef or product developer.

This baccalaureate degree in culinary arts and science is among the first of its kind in the United States. This program comprises approximately equal parts liberal arts, business, hospitality management, food science, and culinary arts. The aim of the program is to prepare students as independent thinkers who can work collaboratively in the food industry.

For more information, visit the Culinary Arts & Science (http://drexel.edu/hsm/academics/Culinary-Arts-Food-Science) page on the Center for Hospitality and Sport Management’s website (http://drexel.edu/hsm).

Program Delivery Options

Drexel’s BS degrees include courses in the liberal arts, the humanities, sciences, hospitality management and culinary arts. Three business minors are also offered. The BS degree can be completed on a full-time or part-time basis:

Traditional Four-year option, with one co-op experience:
This option includes one six-month period of full-time employment in the junior year.

Four plus One option BS/MBA combined degree, with co-op experience:
This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/graduate/drexel-lebow-mba) website.

Part-time option without co-op experience:
Students work closely with academic advisors to develop a customized plan of study toward degree completion.

London option:
(Available for Hospitality Management and Culinary Arts and Science students.) Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad). Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

at the rate of eleven percent each year, making this industry one of the fastest growing in the country. Our Culinary Arts & Science program enjoys close relationships with outstanding and internationally acclaimed chefs, in the finest restaurants, hotels and tourism partners in the greater Philadelphia area. We also have relationships with professional organizations that represent the industry on a regional, national and international level such as Research Chefs Association, Institute of Food Technologists and International Association of Culinary Professionals. These relationships result in over $80,000 a year in scholarship funding for our students.

Typical career paths for graduates include the following:
- Restaurants and private clubs, which employ over 9 million people in the US
- Hotels Resorts & Casinos with almost 2.5 million employees
- Airlines, tour operating companies, travel agencies and tourism consulting
- Convention, special events, meeting planning, and tourism agencies
- Food Service and beverage brokers, distributors, and suppliers to the industry
- Food waste and sustainability practices and solutions.

Co-Op Opportunities

Drexel University has long been known for its cooperative education/internship programs, which allow students to mix periods of full-time, career-related employment with their studies. Culinary Arts & Science students pursue the 6-month co-op employment. This six-month experience during the junior year is tailored to fit the interests of each student. The following hotels, facilities, restaurants and clubs have recently offered co-op positions to Drexel’s Culinary Arts & Science students. Although many of these examples are located in the Philadelphia area, co-op jobs are not limited to any region.

- Vernick Restaurant
- High Street Hospitality Group
- Jose Garces - Garces Group
- Marc Vetri - Vetri Family of Restaurants
- Kevin Spraga - Sbraga Restaurants
- Philadelphia Convention and Visitors Bureau
- America’s Test Kitchen
- Philadelphia Chamber of Commerce
- Frog Commissary Catering at The Franklin Institute
- Walt Disney World Co
- Saxbys

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

The major facility of the Culinary Arts & Science program is located on the sixth floor of the Academic Building. It is a 6,500 square foot space that includes three state-of-the-art commercial kitchens, bakery and laboratories, as well as the Academic Bistro (http://drexel.edu/hsm/about/academic-bistro), the student-run restaurant, bar and lounge. The facility also includes a sensory analysis lab, hospitality and gaming lab, and conference room. As part of the curriculum, students in this major are
required to take food safety and sanitation courses which include lab work at Papadakis Integrated Science Building.

**Philadelphia Location**

A unique feature of the Culinary Arts & Science program at Drexel is our location in Philadelphia, with proximity to New York City, Boston, Baltimore, and Washington DC, as well as the resort centers on the Atlantic seacoast and in the Pocono Mountains. These regions include hundreds of hotels, restaurants, and resorts, that are used for field trips and campus visits by hospitality resource professionals. Students also gain hands-on experience through faculty-directed field trips throughout the region.

**Hospitality Management**

**Major: Hospitality Management**

**Degree Awarded:** Bachelor of Science in Hospitality Management (BSHM)

**Calendar Type:** Quarter

**Total Credit Hours:** 182.0

**Co-op Options:** Three Co-op (Five years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 52.0904

**Standard Occupational Classification (SOC) code:** 11-9051; 11-9071; 11-9081

**About the Program**

The hospitality management major at Drexel University prepares students for leadership positions in the lodging, food service, and tourism and gaming industries. It also provides the necessary foundation for graduate school.

The hospitality management program recognizes the critical importance of an interdisciplinary education with a global perspective for tomorrow’s leaders and managers. Committed to building student knowledge across functional areas and contributing disciplines, the program allows for increased specialization with elective coursework in the following areas:

- Food and Beverage Management
- Gaming and Resort Management
- Travel and Tourism
- Hotel Administration
- Meeting and Event Planning

Home to one of the top hospitality programs in the region, Drexel prides itself on its reputation for progressive, high-quality education. The thriving metropolis of Philadelphia serves as the learning lab for these unique programs. As the sixth largest city in the United States, Philadelphia is in the midst of a restaurant renaissance featuring world-class cuisine and entertainment. Student-focused faculty members are recognized for their professional affiliations, research, published work, and above all, teaching.

Students also receive a business administration minor and have 24.0 credits of free elective to pursue a second minor option.

For more information, visit the Hospitality Management Program's website.

**Program Delivery Options**

Drexel’s BS in Hospitality Management degree includes courses in the liberal arts, the humanities, language, sciences, hospitality management and culinary arts. A business administration minor is also included. The BS degree can be completed on a full-time or part-time basis:

**Four plus One option BS/MBA combined degree, with co-op experience:**

This option combines the four-year BS degree followed by the one-year Professional MBA to qualify freshmen applicants. Incoming freshmen will generally have a minimum of 1300 on the SAT, a GPA of 3.5 or higher, and be in the top 10% of their high school graduating class. For MBA requirements visit the LeBow College Professional MBA (http://www.lebow.drexel.edu/academics/graduate/drexel-lebow-mba) website.

**Five-year option, with three co-op experiences:**

This option allows students to pursue a variety of professional experiences in the industry including the option to co-op abroad.

**Full-time Status Evening option without co-op experience:**

To be eligible, students should have a minimum of two years full-time work experience related to students’ majors, and a minimum of one year of college level work. Full-time students are eligible for full-time financial aid packages.

**Part-time option without co-op experience:**

Students work closely with academic advisors to develop a customized plan of study toward degree completion.

**American University in Rome:**

Every three years, the Drexel hospitality management faculty participate in a study and teach abroad experience. Students are invited to spend the fall semester abroad in Rome, Italy and earn 18.0 credits. Students take two Hospitality related courses taught by a Drexel professor and two additional courses at AUR of their choosing. All course instruction is in English, but a term of Italian 101 is a prerequisite for the experience. More information can be found on the Study Abroad website.

**London option:**

Students are invited to spend a term in their sophomore, junior or senior year in the Study Abroad Program (http://www.drexel.edu/studyabroad), Drexel in London, while earning up to 18.0 credits. The program’s emphasis is on the global implications of and opportunities within the hospitality industry.

* Three language courses are required from: ARBC, CHIN, FREN, GER, GREC, ITAL, JAPN, KOR, RUSS, or SPAN and then one additional arts & humanities course from any of the above as well as ENGL, GST, HIST, HUM, JUDA, LANG, LING, PHIL, WGST, or WRIT areas.

** Students may choose from ANTH, CJS, PSCI, PSY, and SOC courses.

*** Choose additional Hospitality courses or courses from CULA or SMT.
Minor in Food Science

About the Minor

The minor in food science is designed for students interested in applying the basic sciences to the world’s largest industry. The minor should be especially attractive to students in chemistry, chemical engineering, nutrition, and biological sciences, as it provides a background for excellent employment and post-baccalaureate study opportunities in areas closely allied to their basic disciplines.

The minor consists of 25.0 credits. Interested students should consult with a culinary science faculty member to schedule courses appropriate for their background and goals.

Minor in Food Studies

About the Program

Food is central to our existence and is touched upon in a variety of disciplines at the university. This minor seeks to capture and help students navigate the breadth of course offerings that touch upon food systems. Because food systems can be studied through many different lenses, students can adapt this food studies minor to their program of study. For example, students interested in public health policy issues can create a minor of hands-on community-based culinary classes, public health, and nutrition classes. If a student is interested in food-related research and development, he or she might tailor the minor with business- or entrepreneurship-centered classes and practical experience in the Drexel Food Lab.

Accelerated Degree Programs
- Sport Management (BSSM) / Business Administration (MBA) (p. 22)

Sport Management

Major: Sport Management
Degree Awarded: Bachelor of Science in Sport Management (BSSM)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 31.0504
Standard Occupational Classification (SOC) code: 11-1021

About the Program
The Bachelor of Science in Sport Management (http://drexel.edu/sportmanagement) program is designed for students who plan to pursue careers in the sport industry. The major draws on the strengths of its own core offerings and a business administration core. Students may also augment their degrees with minors from the University's other schools and departments including business administration, entrepreneurship, communications, and media arts.

Students will master the knowledge and skills necessary for success in professional sports organizations, collegiate athletics, sport media companies, and businesses that service and are complimentary to the sport industry. The co-op option engages students with extensive experiential learning. Our Philadelphia location is optimal for accessing opportunities throughout the Northeast corridor and beyond.

The program offers options covering a wide range of areas of study; students are able to match their skills, abilities, and interests with a specific niche within the sport industry. Students may choose a minor or create their own particular specialization and area of expertise, in consultation with our department's academic advisors and faculty.

Coursework
The sport management major consists of 180.0 credits. All students enrolled in the program are required to take 46.0 credits of general education courses, 40.0 credits of general business, and a sport business core of 42.0 hours. These courses are supplemented by 36.0 hours creating a specialization that may include a minor or concentration, and 16.0 hours of free electives.

Degree Completion Options
The Bachelor of Science degree in sport management can be completed in either four or five years:

Five-year option, with co-op experience
This option allows for the greatest amount of employment experience, with three distinct six-month periods of employment included with studies. After the start of the sophomore year, students study or work through all terms, including summers.

Four-year option, with internship experience
This option includes one six-month period of full-time employment. After the start of the sophomore year, students either study or work through all terms, including summers.
For more information about this major, visit the Center for Sport Management (http://drexel.edu/sportmanagement).

Co-op/Career Opportunities

Co-op Opportunities

Drexel University has long been known for its co-operative education programs, through which students combine periods of full-time, career-related employment with their studies. Co-op employment is required for sport management students and is central to their experience.

Within the sport management major, co-operative education gives students experience in a range of sport-related jobs and settings. Students may be placed with professional athletic teams, university athletics and recreation programs, or with organizations aligned with sports (e.g., a sports agency). Co-op experiences are available with many of the region’s sports, recreation and health organizations, including professional sports teams, college athletic departments, law firms, and sports agencies, sports media networks, non-profit organizations, youth organizations, sports complexes, and others.

Career Opportunities

The multidisciplinary nature of the sport management program allows its graduates to be ready for a wide range of sport-related professions, including athletic management, sports and recreational activities at all levels (professional, semi-professional, collegiate, scholastic, and youth) within a range of organizations (public, private, community, recreation, scholastic, professional, and amateur), and for varying purposes (competitive, fitness, wellness, and rehabilitation).

Sports management graduates are uniquely qualified for leadership, or support positions in professional and amateur sports organizations, in recreation and community centers, in high schools and colleges, and in other sports venues. The program also prepares students for graduate or professional study in a variety of fields including sport management, law, business administration, communication, education, and other fields.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more information on career opportunities.

Minor in Sport Management

The minor in sport business is designed to introduce students to the primary areas of study in the sport industry. Students will be exposed to a variety of perspectives for assessing the sports business.

Sport Management Faculty

Lawrence Cohen, JD (Temple University). Assistant Teaching Professor. Sports and antitrust law; tickets sales data analytics; sport sponsorship trends.

Jeffrey Levine, JD (Tulane University, ABD Louisville). Assistant Clinical Professor. Expertise in sport, law and policy.

Joel Maxcy, PhD (Washington State University) Director. Professor. Economics of sport; labor economics & policy; economics of antitrust & regulation.

Ellen Staurowsky, EdD (Temple University) Program Director, Athletic Administration Concentration. Professor. Social justice issues in sport; gender equity in sport; Title IX pay equity and equal employment opportunity; athlete exploitation; college sport reform; and misappropriation of American Indian imagery in sport.
Karen Weaver, EdD (University of Pennsylvania), Associate Clinical Professor. Sport marketing & promotions, public relations, media, and leadership in sport.

### Sport Management (BSSM) / Business Administration (MBA)

**Major: Sport Management / Business Administration**

**Degree Awarded:** Bachelor of Science (BSSM) & Master of Business Administration (MBA)

**Calendar Type:** Quarter

**Total Credit Hours:** 229.0

**Co-op Option:** Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 31.0504

**Standard Occupational Classification (SOC) code:** 11-1021

Drexel's BS Sport Management/MBA accelerated degree program offers select candidates an opportunity to earn a Bachelor of Science in Sport Management and an MBA degree, in just 5 years. The result is a powerful, nationally recognized credential from one of the country's most established providers of higher education.

At the completion of their undergraduate degree, students begin MBA coursework in Drexel's LeBow College of Business and acquire graduate level skills including strategic management, managerial finance, international business, entrepreneurship, leadership and ethics.

Students who are admitted into the MBA program are required to take 51 credits, which includes coursework in a focused concentration. Students are required to meet with their graduate advisor to determine a plan of study prior to beginning the MBA portion of their education. The MBA coursework begins during the summer quarter immediately after graduation.

- SMT 270 Sports Facility Planning & Management 3.0
- Specialization elective 3.0

**Term Credits**: 17.0

**Term 5**
- COM 270 [WI] Business Communication or 310 [WI] Technical Communication 3.0
- SMT 275 Sports Event Management 3.0
- SMT 290 Digital Media in Sport 4.0
- STAT 201 Introduction to Business Statistics 4.0
- Free elective 3.0

**Term Credits**: 17.0

**Term 6**
- BLAW 201 Business Law I 4.0
- SMT 285 Sport, Industry, and Society 4.0
- Free elective 3.0
- Specialization elective 3.0
- Natural Science elective 3.0

**Term Credits**: 17.0

**Term 7**
- ORGB 300 [WI] Organizational Behavior 4.0
- PHIL 301 Business Ethics or 325 Ethics in Sports Management 3.0
- Specialization electives 6.0
- Liberal Arts elective 3.0

**Term Credits**: 16.0

**Term 8**
- INTB 200 International Business 4.0
- or MIS 200 Management Information Systems 4.0
- SMT 320 Sport Economics 4.0
- SMT 362 Sport Ticket Sales 3.0
- Specialization elective 3.0

**Term Credits**: 14.0

**Term 9**
- ECON 202 Principles of Macroeconomics 4.0
- SMT 201 Sports Marketing, Promotion, and Public Relations 4.0
- Specialization elective 3.0
- Social Science or Liberal Arts elective 3.0

**Term Credits**: 14.0

**Term 10**
- FIN 301 Introduction to Finance 4.0
- SMT 230 Sports and the Law 4.0
- Specialization elective 6.0

**Term Credits**: 12.0

**Term 11**
- SMT 401 Professional Portfolio 3.0
- Specialization elective 9.0

**Term Credits**: 12.0

**Term 12**
- Specialization elective 3.0
- Free electives 10.0

**Term Credits**: 13.0

**Term 13**
- ACCT 510 Essentials of Financial Reporting 2.0
- MGMT 530 Managing and Leading the Total Enterprise 2.0
- MKTG 510 Marketing Strategy 2.0
- ORGB 510 Leading in Dynamic Environments 2.0
- ORGB 520 Leading High-Performance Teams 1.0
- POM 510 Operations and Supply Chain Management 2.0
- Free elective 3.0

**Term Credits**: 14.0

**Term 14**
- FIN 601 Corporate Financial Management 3.0
- MGMT 510 Business Problem Solving 3.0
- Free elective 3.0
- Concentration course 3.0

**Term Credits**: 12.0

**Term 15**
- BLAW 510 Analyzing Legal Options in Decision-Making 1.0
- ECON 601 Managerial Economics 3.0
- STAT 510 Introduction to Statistics for Business Analytics 2.0
- Free elective 3.0
- Concentration course 3.0

**Term Credits**: 12.0

**Term 16**
- MGMT 520 Strategy Analysis 2.0
- MGMT 770 MBA Capstone 2.0
- ORGB 530 Career and Professional Development 1.0
- Concentration course 3.0
- Experiential Credit 3.0

**Term Credits**: 11.0

**Total Credit**: 230.0
College of Computing & Informatics

From our position on the leading edge of information and technology, Drexel University's College of Computing & Informatics (CCI) instills the knowledge and skills necessary for our students to lead and innovate across industries in a rapidly evolving technological landscape.

Building on Drexel University's exceptional foundation of entrepreneurship and cooperative education, we provide unparalleled professional experiences and the on-the-job training that is vital to preparing today's students for tomorrow's world. At CCI, our unique structure bringing computing and informatics together under one roof in a dynamic, collaborative college allows us to spot trends before they emerge, to solve problems before they occur, and to build a better tomorrow, starting today.

The College contributes to theory and practice along dimensions that include technical, human, organizational, policy and societal considerations. This broad perspective positions the College to address the complex, multi-disciplinary problems that are increasingly common as society becomes more dependent on information technology.

The academic programs of the College provide broad and deep coverage of computing & informatics. For more information about the College, please visit the College’s website (http://www.drexel.edu/cci).

Majors
- Computer Science (BACS, BSCS) (p. 24)
  - Computer Security Concentration (p. 34)
  - Game Programming and Development Concentration (p. 36)
- Computing and Security Technology (BSCST) (p. 37)
- Data Science (BSDS) (p. 45)
- Information Systems (BSIS) (p. 50)
- Software Engineering (BSSE) (p. 57)

Minors
- Computer Science (p. 29)
- Data Science (p. 46)
- NEW: Human Computer Interaction
- Information Systems (p. 52)
- Security Technology (p. 57)
- Software Engineering (p. 60)

About the College
The College of Computing & Informatics (http://www.drexel.edu/cci) (CCI) offers a number of undergraduate degrees in computer science, computing & security technology, data science, information systems, and software engineering. The degree programs are open to freshmen and transfers from other departments at Drexel and other universities. Students have access to the computing facilities available to all Drexel students.

The College educates professionals through its interdisciplinary programs to meet a wide range of needs in the computing and informatics fields to benefit all sectors of society.

Transfer admission for traditional undergraduate programs occurs in the fall term only due to the sequence of required courses. Internal transfer students can be admitted at any term. Admission to the BS online completion program in computing & security technology is offered on a rolling basis. Please contact an undergraduate advisor (http://cci.drexel.edu/resources/current-students/undergraduate/advising.aspx) for more information.

Cooperative Education
Cooperative education emphasizes career management through experiential learning as an integral part of the education process. The co-op is based on employment in practical, major-related positions consistent with the interests, abilities, and aptitudes of the students.

For more general information on Drexel University's co-op opportunities, visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc).

Computer Science
Major: Computer Science
Degree Awarded: Bachelor of Science in Computer Science (BSCS) or Bachelor of Arts in Computer Science (BACS)
Calendar Type: Quarter
Total Credit Hours: 186.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 11.0701
Standard Occupational Classification (SOC) code: 11-3021; 15-1111; 15-1131; 15-1132; 11-1199

About the Program
The College of Computing & Informatics' Bachelor of Science/Arts in Computer Science offers extensive exposure and hands-on practice in the core areas of the field, including programming paradigms and languages, algorithms, systems, networking, and software engineering. Students also select upper level tracks in areas such as artificial intelligence, security, graphics and vision, and human-computer interaction. The program's flexibility allows students to easily sample from areas in which they would like to apply their computing knowledge. This hands-on curriculum combined with co-op provides real-world experience that culminates in a full-year software project.

The programs of study in computer science are designed with the flexibility to prepare students for careers in a rapidly changing profession and to allow strong preparation for graduate education in the field. In addition to the courses in the major, the Bachelor of Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering. The Bachelor of Arts degree emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Core courses in all programs include programming and data structures, programming language concepts, computer systems architecture, and software methodology and engineering. Students also choose two other tracks from a list of possible specializations. Please contact your advisor (http://cci.drexel.edu/resources/current-students/undergraduate/advising.aspx) at the College of Computing & Informatics for a current list of computer science track and elective courses.

Concentrations
- Computer Security (p. 34)
- Game Programming and Development (p. 36)
Additional Information
For more information about this program, please visit the BS/BA in Computer Science web page (http://drexel.edu/cci/programs/undergraduate-programs/bsba-computer-science) on the College of Computing & Informatics' website.

Degree Requirements (BS)
The Bachelor of Science (BS) in Computer Science program emphasizes foundation courses in the sciences and in applied mathematics, leading to careers involving applications in science and engineering.

Computer Science Requirements
- **CS 164** Introduction to Computer Science 3.0
- **CS 171** Computer Programming I 3.0
- **CS 172** Advanced Computer Programming I 3.0
- **CS 260** Data Structures 3.0
- **CS 265** Advanced Programming Tools and Techniques 3.0
- **CS 270** Mathematical Foundations of Computer Science 3.0
- **CS 275** Web and Mobile App Development 3.0
- **CS 281** Systems Architecture 4.0
- **CS 283** Systems Programming 4.0
- **CS 350 [WI]** Software Design 3.0
- **CS 360** Programming Language Concepts 3.0
- **CS 411** Software Engineering 3.0

Computer Science track courses (see below) 18.0
Computer Science electives (see below) 6.0

Computing & Informatics Requirements
- **CI 101** Computing and Informatics Design I 2.0
- **CI 102** Computing and Informatics Design II 2.0
- **CI 103** Computing and Informatics Design III 2.0
- **CI 491 [WI]** Senior Project I 3.0
- **CI 492 [WI]** Senior Project II 3.0
- **CI 493 [WI]** Senior Project III 3.0

Mathematics Requirements
- **MATH 121** Calculus I 4.0
- **MATH 122** Calculus II 4.0
- **MATH 123** Calculus III 4.0
- **MATH 201** Linear Algebra 4.0
- **MATH 221** Discrete Mathematics 3.0
- **MATH 311** Probability and Statistics I 4.0

Mathematics elective (see below) 4.0

Science Requirements
- Select one of the following lab science sequences:
  - **BIO 122** Cells and Genetics 4.0
  - **BIO 124** and Evolution & Organismal Diversity 4.0
  - **BIO 126** and Physiology and Ecology 4.0
- **CHEM 101** General Chemistry I 3.0
  - **CHEM 102** and General Chemistry II 3.0
  - **CHEM 103** and General Chemistry III 3.0
- **PHYS 101** Fundamentals of Physics I 4.0
  - **PHYS 102** and Fundamentals of Physics II 4.0
  - **PHYS 201** and Fundamentals of Physics III 4.0

Science electives (see below) 6.0

Arts & Humanities Requirements
- **COM 230** Techniques of Speaking 3.0
- **ENGL 101** Composition and Rhetoric I: Inquiry and Exploratory Research 3.0

**University Requirements**
- **UNIV CI101** The Drexel Experience 2.0
- **CI 120** CCI Transfer Student Seminar 1.0
- **CIVC 101** Introduction to Civic Engagement 1.0
- **COOP 101** Career Management and Professional Development 1.0
- **Free electives** 10.5-15.5
- Total Credits 186.5-191.5

Total Credits 186.5-191.5

Program Electives
- **Computer Science electives**: any CS course numbered 300 or higher
- **Mathematics electives**: MATH 200, MATH 210, any MATH course numbered 300 or higher
- **Science electives**: any CHEM (except CHEM 111, CHEM 112, CHEM 113, CHEM 114, CHEM 151), BIO (except BIO 161, BIO 162, BIO 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except PHYS 050, PHYS 100, PHYS 103, PHYS 104, PHYS 105, PHYS 106 [WI], PHYS 121, PHYS 122, PHYS 151, PHYS 160, PHYS 305, PHYS 324, PHYS 405; cannot take both PHYS 131 & PHYS 181), ENVS, ENSS
- **Writing & Communications electives**: any WRIT, COM, ENGL courses officially certified as Writing Intensive (http://drexel.edu/engphil/about/DrexelWritingCenter/wiCourses/course_list) (WI), and SCRP 270 [WI]
- **Business electives**: any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX
- **Social Studies electives**: any AFAS, ANTH, GST, HIST, JUDA, PSCI, PSY (except PSY 332, PSY 337), SOC (except SOC 364, SOC 365), WGST
- **Arts & Humanities electives**: any ARCH, ARTH, CMGT, CJJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except ENGL 101, ENGL 102, ENGL 103, ENGL 105), ESTM, FASH, FMVD, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCH, WSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/ModernLanguages/languages) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 152, ANIM 211, ANIM 212

Computer Science Tracks
Students must complete two of the following Computer Science tracks for a total of 18.0 credits. The tracks may overlap by one course. Students should check with the College for any additional Special Topics courses being offered that may be appropriate for one of the tracks.

Algorithms and Data Structures
- **CS 440** Theory of Computation 3.0
- **CS 457** Data Structures and Algorithms I 3.0
- **CS 458** Data Structures and Algorithms II 3.0

Artificial Intelligence
Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Degree Requirements (BA)

The Bachelor of Arts (BA) program emphasizes foundation courses in the humanities and the social sciences, leading to careers involving applications in those areas.

Writing-Intensive Course Requirements
Program Electives

- **Computer Science electives:** any CS course numbered 300 or higher
- **Mathematics electives:** MATH 200, MATH 210, any MATH course numbered 300 or higher
- **Science electives:** any CHEM (except CHEM 111, CHEM 112, CHEM 113, CHEM 114, CHEM 151), BIO (except BIO 161, BIO 162, BIO 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except PHYS 050, PHYS 100, PHYS 103, PHYS 104, PHYS 105, PHYS 106 [WI], PHYS 121, PHYS 122, PHYS 151, PHYS 160, PHYS 305, PHYS 324, PHYS 405; cannot take both PHYS 131 & PHYS 181); ENVS, ENSS, PHEV
- **Social Studies electives:** any AFAS, ANTH, GST, HIST, JUDA, PSCI, PSY (except PSY 332, PSY 337), SOC (except SOC 364, SOC 365), WGST
- **International electives:** any GST, MUSC 331, PSCI 150, PSCI 255, PSCI 345, PSCI 357
- **Diversity Studies electives:** any AFAS, WGST
- **Arts & Humanities electives:** any ARCH, ARTH, CMGT, CJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except ENGL 101, ENGL 102, ENGL 103, ENGL 105), ESTM, FASH, FMVD, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 152, ANIM 211, ANIM 212

**Computer Science Tracks**

Students must complete two of the following Computer Science tracks for a total of 18.0 credits. The tracks may overlap by one course. Students should check with the College for any additional Special Topics courses being offered that may be appropriate for one of the tracks.

**Algorithms and Data Structures**
- CS 440 Theory of Computation 3.0
- CS 457 Data Structures and Algorithms I 3.0
- CS 458 Data Structures and Algorithms II 3.0

**Artificial Intelligence**
- CS 380 Artificial Intelligence 3.0
- Select two of the following: 6.0
  - CS 383 Machine Learning
  - CS 385 Evolutionary Computing
  - CS 387 Game AI Development
  - CS 481 Advanced Artificial Intelligence

**Computer and Network Security**
- CS 472 Computer Networks: Theory, Applications and Programming 3.0
- CS 475 Computer and Network Security 3.0
- Select one of the following: 3.0
  - CS 303 Algorithmic Number Theory and Cryptography
  - CS 377 Software Security

**Computer Architecture**
- CS 352 Processor Architecture & Analysis 3.0
- Select two of the following: 6.0
  - CS 476 High Performance Computing
  - ECEC 356 Embedded Systems
  - ECEC 413 Introduction to Parallel Computer Architecture

**Computer Graphics and Vision**
- CS 430 Computer Graphics 3.0
- CS 435 Computational Photography 3.0
- Select one of the following: 3.0
  - CS 431 Advanced Rendering Techniques
  - CS 432 Interactive Computer Graphics

**Computing Systems**
- CS 361 Concurrent Programming 3.0
- CS 370 Operating Systems 3.0
- Select one of the following: 3.0
  - CS 352 Processor Architecture & Analysis
  - CS 365 System Administration
  - CS 441 Compiler Workshop I
  - CS 461 Database Systems
  - CS 472 Computer Networks: Theory, Applications and Programming

**Game Development and Design**
- CS 345 Computer Game Design and Development 3.0
- Select two of the following: 6.0
  - CS 347 Experimental Game Development
  - CS 348 Serious Game Development
  - CS 387 Game AI Development
  - CS 445 Topics in Computer Gaming
  - GMAP 377 Game Development: Workshop I
  - GMAP 378 Game Development: Workshop II

**Human-Computer Interaction**
- CS 338 Graphical User Interfaces 3.0
- Select one of the following: 3.0
  - INFO 310 Human-Centered Design Process & Methods
  - PSY 337 Human-Computer Interaction

- Additional Free Electives may be required dependent upon the math courses selected.
Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

#### Minor in Computer Science

The computer science minor provides students with a breadth of knowledge in areas that form the foundation of computer science. The student adds some depth by selecting courses from a list of advanced computer science courses.

The Computer Science minor is available to all University students in good standing, with the exception of Computer Science majors.

#### Prerequisites

One of the following Mathematics sequences must be completed before entering the program:

- MATH 101 and MATH 102
- MATH 121 and MATH 122

Requirements

Applying in Computer Science Bachelor’s/Master’s Accelerated Degree

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree program pages for the details of these requirements.

When completing undergraduate CS electives and graduate CS courses, students should take care to avoid equivalent courses at both the undergraduate and graduate levels. The table below indicates pairs of equivalent courses; students may only take one or the other in each pair but not both.

Bachelor’s/Master’s Accelerated Degree in Computer Science

Applying

The guidelines for applying to the Computer Science Bachelor’s/Master’s (BS/MS) Accelerated Degree Program are as follows:

• University regulations require application after the completion of 90.0 credits but before the completion of 120.0 credits.
• Applicants must have an overall cumulative Grade Point Average of 3.5 or higher.
• Letters of recommendation from two Computer Science faculty are required.
• Students must submit a plan of study. Consult your advisor and course schedules for guidance.
• Applicants must have completed the following courses with a minimum GPA of 3.50

Program Requirements

The courses below should be taken at Drexel. Seek guidance from your advisor regarding additional coursework if any courses below have been taken outside of Drexel.

</tbody>
</table>

Total Credits 24.0

Note: No more than 9.0 credits from a student’s major may be used to fulfill the minor requirements. Students who, because of this rule, require additional credits to reach 24.0 total credits may select additional Advanced Electives as needed.

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College's bachelor's and master's degree programs as well as other options:

• Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
• Any CCI BS/MBA Accelerated Degree (BS/MBA)
• Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel’s website.

Requirements

The requirements of the Computer Science BS/MS program follow the requirements of both the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbstext) and the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degerequirementsmstext). Students must complete all the requirements of the BS in Computer Science (http://catalog.drexel.edu/undergraduate/collegeofcomputingandinformatics/computerscience/#requirementsbstext) except that they may drop two free electives (still maintaining the 180.0 credit minimum for the BS degree). In addition, students must complete 45.0 credits of graduate courses to satisfy the requirements of the MS in Computer Science (http://catalog.drexel.edu/graduate/collegeofcomputingandinformatics/computerscience/#degerequirementsmstext). Please refer to the linked program pages for the details of these requirements.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic
advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Plan of Study

Students in the BS/MS program typically forego their third co-op and take advanced courses during those two terms. The sample plan of study below thus assumes a total of 14 terms completed within a 5-year period.

Co-op/Career Opportunities

Co-Op Options
Three co-op options are available for this program:

• 5-year/3 co-op
• 4-year/1 co-op
• Accelerated Degree (BS & MS): 5-year/2 co-op

Career Opportunities

The demand for computing skills is tremendous and growing, with highly paid jobs. Most professionals in the field focus on the design and development of software and software-based applications. Typical jobs include software engineer, programmer, web designer, multimedia or software developer, systems analyst or consultant, database specialist, client-server architect, network designer, and database specialist. Most positions require at least a bachelor’s degree. Relevant work experience, such as that provided by co-operative education, is also very important, as cited by the Occupational Outlook Handbook (http://www.bls.gov/ooh) published by the US Bureau of Labor Statistics.

Job titles of recent computer science graduates include:

• Web Developer
• Software Systems Engineer
• Software Developer
• Network Engineer
• Application Analyst

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College's iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University's network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computer Science degree is evaluated relative to the following Objectives and Outcomes.

**Research Laboratories**

The College houses multiple research labs, led by CCI faculty, across Drexel's main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

**Alumni Garden**

The Rush Building's Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

**3401 Market Street**

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such as University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

**Evaluations**

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computer Science degree is evaluated relative to the following Objectives and Outcomes.

**Computer Science Program Educational Objectives**

Drexel Computer Science alumni will:

a. be valued employees in a wide variety of occupations in industry, government and academia, in particular as computer scientists and software engineers;

b. succeed in graduate and professional studies, such as engineering, science, law, medicine and business;

c. pursue life-long learning and professional development to remain current in an ever changing technological world;

d. provide leadership in their profession, in their communities, and society;

e. function as responsible members of society with an awareness of the social and ethical ramifications of their work.

**Computer Science Student Outcomes (for Bachelor of Science and Bachelor of Arts)**

The Drexel Computer Science program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of computing and mathematics appropriate to the discipline

b. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

c. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

d. An ability to function effectively on teams to accomplish a common goal

e. An understanding of professional, ethical, legal, security and social issues and responsibilities

f. An ability to communicate effectively with a range of audiences

g. An ability to analyze the local and global impact of computing on individuals, organizations, and society

h. Recognition of the need for and an ability to engage in continuing professional development

i. An ability to use current techniques, skills, and tools necessary for computing practice

j. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.

k. An ability to apply design and development principles in the construction of software systems of varying complexity.

**Additional Information**

To view the latest BS/BA in Computer Science program enrollment numbers, please click here (http://drexel.edu/cci/programs/undergraduate-programs/Facts).

**Computer Science Faculty**

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management,
application of computer programming principles and solutions to engineering problems.

M. Brian Blake, PhD (George Mason University) Executive Vice President for Academic Affairs and Provost; Distinguished Professor of Systems and Software Engineering; Joint Appointments with the College of Engineering and the College of Medicine. Software engineering approaches for integration of Web-based systems.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Constantine Katsinis, PhD (University of Rhode Island). Teaching Professor. High-performance computer networks, parallel computer architectures with sustained teraflops performance, computer security, image processing.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañon, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Computer Science

Computer Security Concentration

The Computer Science concentration in Computer Security is designed to supply graduates with the skills needed to prepare them for a wide range of opportunities. It gives students the ability to design and implement computing security and privacy processes, software and systems.
Students use mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of such systems.

Computer security specialists are needed who can work within cyberspace to help secure, defend against, respond to, and in some instance, even initiate preemptive attacks. These individuals must have detailed knowledge of the systems they protect, an understanding of the cyber-environment and physical environment in which they operate, and an understanding of the ethical expectations and legal surroundings of their field.

Additional Information
For more information about this concentration, visit the College of Computing & Informatics (http://www.drexel.edu/cci)’ web site.

Computer Security Concentration Program Requirements
Students in the Computer Security Concentration should follow the below concentration requirements in addition to the core degree requirements for the BS in Computer Science program (p. 25). For any questions regarding your plan of study, please contact your Undergraduate Advisor (http://drexel.edu/cci/resources/current-students/undergraduate/advising).

The concentration in Computer Security follows the requirements of the B.S. in Computer Science (p. 25) except as noted below.

### Computer Science Requirements
The following courses must be taken as the 6 CS track courses and the CS electives:

- **CS 303** Algorithmic Number Theory and Cryptography
- **CS 361** Concurrent Programming
- **CS 370** Operating Systems
- **CS 377** Software Security
- **CS 467** Security and Human Behavior
- **CS 472** Computer Networks: Theory, Applications and Programming
- **CS 475** Computer and Network Security
- **INFO 310** Human-Centered Design Process & Methods

### Computing & Informatics Requirements
- **MATH 410** Multivariate Calculus
- **MATH 410** Discrete Mathematics
- **MATH 410** Linear Algebra
- **MATH 410** Matrices
- **MATH 410** Mathematical Structures
- **MATH 410** Scientific Data Analysis
- **MATH 410** Software Engineering
- **MATH 410** Theory of Computation

### Science Requirements
- **CS 281** Systems Architecture
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design
- **CS 350 (WI)** Software Design

Computer Science

Game Programming and Development Concentration

The concentration in game programming and development provides conceptual understanding of game design and practical experience in the design and the development of games. The courses in this concentration include fundamentals of game design and development, large-scale game development, and special topics in educational and experimental game design.

Additional Information

For more information about this concentration, visit the College of Computing & Informatics (http://www.drexel.edu/cci)’s web site.

Game Programming and Development Concentration

Program Requirements

Students in the Game Programming and Development Concentration should follow the below concentration requirements in addition to the core degree requirements for the BS in Computer Science program (p. 25). For any questions regarding your plan of study, please contact your Undergraduate Advisor (http://drexel.edu/cci/resources/current-students/undergraduate/advising).

Students in the Game Programming and Development Concentration should follow the below concentration requirements in addition to the core degree requirements for the B.S. in Computer Science (p. 25). For any question regarding your plan of study, please contact your Undergraduate Advisor.

The Game Programming and Development concentration follows the requirements of the B.S. in Computer Science (p. 25) except as noted below.

Sample Plan of Study (BS) - Game Programming and Development Concentration

5 YR 5 YR UG Co-op Concentration / Game Programming & Development

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing-Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.
### Computing and Security Technology

**Major:** Computing and Security Technology  
**Degree Awarded:** Bachelor of Science in Computing & Security Technology (BSCST)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 188.0  
**Co-op Options:** Three Co-op (Five years); One Co-op (Four years)  
**Classification of Instructional Programs (CIP) Code:** 11.1003  
**Standard Occupational Classification (SOC) Code:** 15-1122  

**Note:** The on-campus CST major (Full Time only) admits new and transfer students Fall Quarter. The online CST major (Part Time only) admits transfer students Fall and Spring Quarters.

#### About the Program

The College of Computing & Informatics’ Bachelor of Science in Computing & Security Technology (BSCST) prepares students for work related to the management and administration of large-scale computing infrastructure. Students gain experience with core information technology (IT) areas including servers, databases, networks, the Web, and information security and cybersecurity. The program places emphasis on practical education and fundamental concepts that are supplemented by laboratory experience.

Core courses provide students with practical knowledge and skills related to proprietary and open source servers, network administration, software development, database administration, and IT security. Students take advanced electives and a concentration in either Computing Technology or Computing Security. The advanced courses include topics such as:

mobile applications, IT risk assessment, intrusion detection, security audits, and computer forensics.

The degrees in Computing & Security Technology, Data Science (p. 45), and Information Systems (p. 50) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

The BS in Computing & Security Technology is offered as a full-time, on-campus bachelor's degree program or as an online, part-time degree completion program for students who have completed approximately two years of college work.

Students are no longer being admitted to the on-site BSCST degree program that was offered at Burlington County College (BCC), Delaware County Community College (DCCC), and the Montgomery County Community College (MCCC). Students from these institutions are invited to apply to transfer into the online program or the on-campus program at Drexel. Also, students are no longer being admitted to the Drexel Saturday Scholars program.

For more information about this program, please visit the BS in Computing & Security Technology web page (http://drexel.edu/ccs/academic-programs/undergraduate-programs/bs-computing-security) on the College of Computing & Informatics' website.

Degree Requirements

Students completing this major must select either a concentration in computing technology or a concentration in computing security.

† Also choose Quantitative methods elective from any non-required MATH course, STAT 201, or SOC250
* Students select any non-required courses from the following: ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS, HSCI, GEO, ENSS.
** Students select any non-required courses from the following: ANTH, COM, ENGL, HIST, PHIL, PSCI, PSY, SOC, WRIT, ECON, ENTP, ARTH, FMST, MUSC, TVST, VSST

Please note: If a Computing & Security Technology student pursues a Business Administration Minor, MIS classes do not count towards the Business Administration Minor for Computing & Security Technology students. Students must choose another option to fulfill the Business Administration Minor requirements.

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor's and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately. Students accepted in this program can combine any of the College bachelor's and master's degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on Drexel's website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics' website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

Co-Op/Career Opportunities

Co-Op Options

Three co-op options are available for this program:
Co-op is not available for online students.

**Career Opportunities**

Graduates of the Computing and Security Technology program who complete a concentration in Computing Technology can pursue careers as information technologists and advanced technicians in a wide range of industries. Information technologists are capable of performing multiple IT tasks and accessing various information resources. The program gives students a unique set of applied skills that allow them to fill a number of roles as part of the information systems team. Graduates with a concentration in Computing Security pursue careers as advanced technicians who operate and administer the security tools, technologists who create and install security solutions, and leaders who define the security policies.

Job titles of recent computing and security technology graduates include:

- Security Administrator
- Chief Information Security Officer
- IT Audit Manager
- Project Manager
- Lead Systems Engineer
- Network Engineer
- Server Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more information on career opportunities.

**Facilities**

**Drexel University Libraries**

Drexel University Libraries (http://library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W. W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

**iCommons**

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

**Rush Building**

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

**University Crossings - Cyber Learning Center and Computer Lab**

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is
staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories
The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden
The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street
3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/ccisearch/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Computing & Security Technology degree is evaluated relative to the following Objectives and Outcomes.

BS Computing & Security Technology Program Educational Objectives

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the profession and community as demonstrated by contributions towards society’s greater good and prosperity

BS Computing & Security Technology Program Student Outcomes

The program enables students to attain, by the time of graduation:

- An ability to apply knowledge of computing and mathematics appropriate to the program’s student outcomes and to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues and responsibilities
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Computing & Informatics Faculty

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video
tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (University of Pennsylvania). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology) PhD in Information Studies Program Director. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor; Director, Metadata Research Center. Metadata, ontological engineering, data science, knowledge organization, information retrieval.

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (University of Maryland) Department Head, Information Science; Director of International Programs. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach.

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning.
Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession.

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor.

Jake Williams, PhD (University of Vermont). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability.

Erija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dairymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (Drexel University). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported
cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (Drexel University). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Data Science

Major: Data Science

Degree Awarded: Bachelor of Science in Data Science (BSDS)

Calendar Type: Quarter

Total Credit Hours: 188.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 11.0401; 11.0501; 11.0802

Standard Occupational Classification (SOC) code: 15-1121; 15-1141

About the Program

The Bachelor of Data Science (BSDS) prepares students to meet the challenges presented by the explosive growth of very large scale and complex data sources. The availability of data from sources such as business activities, social media and scientific instruments constantly creates new problems requiring data-driven solutions and opportunities and problems for innovation. BS in Data Science students develop the knowledge and skill to address these opportunities for the benefit of individuals and organizations. Students in the degree complete a minor, typically in business or the sciences, to provide knowledge and skill in a specific subject area to which data science techniques can be applied.

Data Science students learn to:

- Define domain specific and context-relevant data analytics questions and hypotheses for individuals and organizations.
- Select relevant data sources and transform data suitable for solving data analytics problems.
- Identify appropriate techniques and tools for acquiring, retrieving, analyzing, and making use of the data.
- Apply data analytics techniques and skills to build analytical and predictive models for answering data science questions.
- Create visualizations and communicate data analytics results to a large audience and decision makers.
- Assess the necessary skills arising from the interdisciplinary nature of data science as a combination of hacking skills, analytical techniques, and domain knowledge.

The degrees in Computing and Security Technology (p. 37), Data Science, and Information Systems (p. 50) share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Data Science web page (http://drexel.edu/cci/programs/undergraduate-programs/bs-datascience) on the College of Computing & Informatics' website.

Natural Science Requirements
Science electives: Select from ANAT, BIO, CHEM, ENVS, FDSC, NFS, PHEV, PHYS. Courses from other departments may be considered with advisor approval.

Behavioral and Social Science Requirements
PSY 101 General Psychology I 3.0
PSY 330 Cognitive Psychology 3.0

Arts and Humanities Requirements
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
COM 230 Techniques of Speaking 3.0
or COM 310 Technical Communication

University and College Requirements
UNIV CI101 The Drexel Experience 2.0
or CI 120 CCI Transfer Student Seminar
CIVC 101 Introduction to Civic Engagement 1.0
COOP 101 Career Management and Professional Development 0.0

Minor Requirements
Choose a minor in a data science application area including business and natural science

Free Electives 27.0

Total Credits 187.0

---

1 Students should consult their academic advisor regarding a minor that requires more than 24.0 credits. Please note: If a Business Administration Minor is selected, MIS classes do not count towards the Business Administration Minor for Data Science students. Students must choose another option to fulfill the Business Administration Minor requirements.

Minor in Data Science

Data Science provides a foundation for problem-solving in a data-driven society. The minor in Data Science combined basic courses in statistics, information and technology and social contexts to address problems that require large and disparate datasets.

Any student in any major can benefit from a minor in data science. Graduates with such background knowledge are prepared to actively participate in the application of data science within their major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in data science.

Total Credits 26.0

Co-op/Career Opportunities

Co-op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

Career Opportunities

The new data science major provides valuable skills that can be transported to a number of job settings. The demand for graduates with data science knowledge is strong, and employers often want evidence of additional communication and problem-solving skills that can be applicable to specific disciplines. Data science program graduates could potentially serve as key members of organizational data science teams able to create novel information products, with an emphasis on solving problems that can only be addressed using large and disparate data sources. The program is also an excellent preparation for graduate study in data science.

Sample job titles for data science graduates include:

- Data Scientist
- Business Intelligence Officer
- Information Architect
- Usability Analyst

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing,
more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such as University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

Evaluations

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Data Science degree is evaluated relative to the following Objectives and Outcomes.

BS Data Science Program Educational Objectives

Within three to five years of graduation, alumni of the program are expected to achieve one or more of the following milestones:

- Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
- Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
- Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
- Display commitment and leadership within the professional and community as demonstrated by contributions towards society’s greater good and prosperity.
BS Data Science Program Student Outcomes

The program enables students to attain, by the time of graduation

- An ability to apply knowledge of computing and mathematics appropriate to the discipline
- An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
- An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- An ability to function effectively on teams to accomplish a common goal
- An understanding of professional, ethical, legal, security and social issues
- An ability to communicate effectively with a range of audiences
- An ability to analyze the local and global impact of computing on individuals, organizations, and society
- Recognition of the need for and an ability to engage in continuing professional development
- An ability to use current techniques, skills, and tools necessary for computing practice

Information Science Faculty

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology) PhD in Information Studied Program Director. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor; Director, Metadata Research Center. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (University of Maryland) Department Head, Information Science; Director of International Programs. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Aleksandra Sarcevic, PhD (Rutgers University). Assistant Professor. Computer-supported cooperative work, human-computer interaction, healthcare informatics, crisis informatics, social analysis of information and communications technology (ICT).
Human Computer Interaction

Il-Yeol Song, PhD (Louisiana State University). PhD in Information Studies. Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor.

Jake Williams, PhD (University of Vermont). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado). Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

Linda S. Marion, PhD (Drexel University). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (Drexel University). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Human Computer Interaction

About the Minor

The minor in Human Computer Interaction provides a course of study for students who would like to improve the integration of computing in the lives of individuals and to use computing to enable collaboration within groups. The minor combines courses in human computer interaction, ubiquitous computing, graphical interface design, and social computing.

The minor is available to all University students in good standing.

Total Credits: 12.0

CCI majors: Replace INFO 110 with an additional HCI elective.

** HCI Elective Recommendations:

For non-CCI majors: INFO 103, INFO 150, INFO 216, INFO 250 or INFO 405
For CS majors: CS 275, CS 338, CS 467
For INFO majors: INFO 150, INFO 250, INFO 350, INFO 405

Information Systems

Major: Information Systems

Degree Awarded: Bachelor of Science Degree in Information Systems (BS)

Calendar Type: Quarter

Total Credit Hours: 188.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 11.0401
About the Program

The College of Computing & Informatics’ Bachelor of Science in Information Systems (BSIS) prepares students to apply information technology for the benefit of individuals and organizations. Students develop the skills and knowledge to design, develop, and manage leading-edge information systems. Since many Information Systems students choose careers in business organizations, a minor in business is built in to the degree requirements.

The Information Systems curriculum prepares students for a wide range of information technology applications. Students learn how to determine client needs, design appropriate solutions, specify data architectures, and improve usability of systems.

The core courses in the program address topics including fundamentals of programming, systems analysis and design, database management systems, networking, security and privacy, and social aspects of information systems. These courses provide a foundation for more advanced courses in technical areas of interest to each student. The technical courses are supplemented by courses in business, behavioral sciences, natural sciences, mathematics, and humanities to provide balance and useful supplemental materials for information systems careers.

The degrees in Computing and Security Technology (p. 37), Data Science (p. 45), and Information Systems share a common first year. This allows students to easily switch among the degrees early in their studies. In addition, some of the electives in each degree are accessible to students in the other two majors and this provides a deeper and broader set of advanced topics for students in all three majors.

Additional Information

For more information about this program, please visit the BS in Information Systems web page (http://drexel.edu/cci/academics/programs/undergraduate-programs/bs-information-systems) on the College of Computing & Informatics’ website.

Free Electives 40.0

Total Credits 187.0

- Any non-required INFO course

Minor Requirements:

Students must complete the requirements for a minor in an information systems application area. The following minors are approved for this requirement:

- College of Business minors – Note: the MIS minor cannot be used for this requirement due to its considerable overlap with the IS major
- Close School of Entrepreneurship minors
- School of Public Health minors
- Other minors in IS application areas may be taken for this requirement with prior approval of an advisor

Business Minor Requirement

In addition to taking STAT 201, students complete the requirements for one of the following business minors. Please note: MIS classes do not count towards the Business Administration Minor for Information Systems students. Students must choose another option to fulfill the Business Administration Minor requirements.

- Accounting (p. 71)
- Business Administration
- Economics
Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

* An additional 6 credits or more are to be chosen from other course offerings in information systems pertinent to the student’s overall program of study. Guidance in selecting these electives will be provided by staff and faculty of the College of Information Science and Technology.

Accelerated Degrees

The College of Computing & Informatics offers several Accelerated Degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the College’s bachelor’s and master’s degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS/MBA Accelerated Degree (BS/MBA)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree page on Drexel’s website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics’ website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

Co-op/Career Opportunities

Co-Op Options

Two co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree (BS & MS): 5-year/2 co-op

The following list is a sample of recent co-op job titles and employers:

- Applications Architect, Aetna
- e-Communications Intern, Airgas
- PC Network Support, Aramark
- Information Systems Intern, Campbell’s Soup
- Distributed WAN Support Co-op, Cigna
- Network Services, GlaxoSmithKline
- Programmer/Analyst, Independence Blue Cross
- Information Management Co-op, Johnson & Johnson
- Database Developer, Princeton Plasma Physics
- Website Developer, QVC
- Shared Services Co-op, Wyeth

Career Opportunities

The demand for information systems professionals is strong. Graduates find careers in a number of areas, including designing information systems, leading project teams, planning, developing, and marketing information systems. Most information systems students enter the professional world right after graduation, but some continue their studies in advanced information technology programs.

Job titles of recent information systems graduates include:

- Security Analyst
- Network Systems Analyst
- Database Administrator
- Data Communications Analyst
- Systems Administrator
- Systems Engineer

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDs, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42"
display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OSX machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for usage in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

**Rush Building**

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

**University Crossings - Cyber Learning Center and Computer Lab**

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

**Research Laboratories**

The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

**Alumni Garden**

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

**3401 Market Street**

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.

**Evaluations**

The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the Information Systems degree is evaluated relative to the following Objectives and Outcomes.

**BS in Information Systems Program Educational Objectives**

Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Be valued contributors to private or public organizations as demonstrated by promotions, increased responsibility, or other professional recognition
b. Contribute to professional knowledge as demonstrated by published papers, technical reports, patents, or conference presentations
c. Succeed in continuing professional development as demonstrated by completion of graduate studies or professional certifications
d. Demonstrate commitment and leadership within their profession and community as demonstrated by professional and community activity or contributions towards society’s greater good and prosperity

**BS in Information Systems Student Outcomes**

The program enables students to attain, by the time of graduation:
Computing & Informatics Faculty

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Yuanfang Cai, PhD (University of Virginia). Associate Professor. Formal software design modeling and analysis, software economics, software evolution and modularity.

Christopher Carroll, MS (Drexel University). Assistant Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization, network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (University of Pennsylvania). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drott, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology) PhD in Information Studied Program Director. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor; Director, Metadata Research Center. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information
disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (University of Maryland) Department Head, Information Science; Director of International Programs. Professor. Digital libraries, information visualization, visual interface design, knowledge management, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach.

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity.

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning.

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession.

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD ( Rutgers University ) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinational optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration.

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University). Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.
Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor.

Jake Williams, PhD (University of Vermont). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability

Erija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (Drexel University). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (Drexel University). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.

Minor in Security Technology

The demand for individuals with security related skills is increasing and essential in today's internet-dominated society. Computer and information systems managers are becoming more involved with the security of data, responsible for sophisticated and more efficient computer networks and increasingly more complex websites and intranets. The minor in Security Technology combines basic courses in security and technology required to help organizations keep their computer systems secure.

Any student in any major can benefit from a minor in Security Technology. Graduates with such background knowledge are prepared to actively participate in the application of security technology within the major area of study.

The minor is available to all University students in good standing, with the exception of students majoring in Computing and Security Technology.

Software Engineering

Major: Software Engineering
Degree Awarded: Bachelor of Science in Software Engineering (BSSE)
Calendar Type: Quarter
Total Credit Hours: 188.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years)
Classification of Instructional Program (CIP) code: 14.0903
Standard Occupational Classification (SOC) code: 15-1132; 15-1133

About the Program

The College of Computing & Informatics' Bachelor of Science in Software Engineering (BSSE) prepares students to design and build software systems. Software is essential to the functioning of modern society but
high quality software is very challenging to create. Software engineering focuses on the knowledge and skills to meet that challenge and create high quality software on schedule within budget.

The Software Engineering curriculum addresses a full range of software activities including gathering client requirements, designing and constructing software solutions, testing software, and modifying and extending existing systems. The curriculum also recognizes that most software is developed by teams, and students develop skills in project management and team operation. Graduates are well-prepared to function as software engineering team members and also move toward software engineering management.

The core courses address programming and use of software development tools, specification and design, software architecture, verification and validation, software evolution, and team projects. These courses are supplemented with courses drawn from computer science and Informatics that provide theoretical background and application knowledge. The full curriculum prepares BSSE students to apply processes, methods, and tools to the problem of building and maintaining software with a defined level of quality, at a predictable cost, on a predictable schedule.

**Additional Information**

For more information about this program, please visit the BS in Software Engineering web page (http://drexel.edu/cci/academics/programs/undergraduate-programs-bs-software-engineering) on the College of Computing & Informatics’ website.

**Degree Requirements**

**Software Engineering Requirements**
- CS 164: Introduction to Computer Science 3.0
- CS 171: Computer Programming I 3.0
- or CS 175: Advanced Computer Programming I 3.0
- CS 172: Computer Programming II 3.0
- or CS 176: Advanced Computer Programming II 3.0
- SE 210: Software Specification and Design I 3.0
- SE 211: Software Specification and Design II 3.0
- SE 310: Software Architecture I 3.0
- SE 311: Software Architecture II 3.0
- SE 320: Software Verification and Validation 3.0
- SE 410: Software Evolution 3.0

**Computer Science Requirements**
- CS 260: Data Structures 3.0
- CS 265: Advanced Programming Tools and Techniques 3.0
- CS 281: Systems Architecture 4.0
- CS 283: Systems Programming 4.0

**Information Systems Requirements**
- INFO 210: Database Management Systems 3.0
- INFO 310: Human-Centered Design Process & Methods 3.0
- INFO 420: Software Project Management 3.0

**Computing & Informatics Requirements**
- CI 101: Computing and Informatics Design I 2.0
- CI 102: Computing and Informatics Design II 2.0
- CI 103: Computing and Informatics Design III 2.0
- CI 491 [WI]: Senior Project I 3.0
- CI 492 [WI]: Senior Project II 3.0
- CI 493 [WI]: Senior Project III 3.0

**Computing & Informatics Electives**
- CS 472: Computer Networks: Theory, Applications and Programming 3.0-4.0
- or INFO 330: Computer Networking Technology I 3.0
- Computing & Informatics electives (see below) 18.0

**Mathematics Requirements**
- CS 270: Mathematical Foundations of Computer Science 3.0
- MATH 121: Calculus I 4.0
- MATH 122: Calculus II 4.0
- MATH 123: Calculus III 4.0
- MATH 221: Discrete Mathematics 3.0
- STAT 201: Introduction to Business Statistics 4.0
- STAT 202: Business Statistics II 4.0

**Science Requirements**

Select one of the following lab science sequences:
- BIO 122: Cells and Genetics 3.0
- & BIO 124: and Evolution & Organismal Diversity 3.0
- & BIO 126: and Physiology and Ecology 3.0
- CHEM 101: General Chemistry I 3.0
- & CHEM 102: and General Chemistry II 3.0
- & CHEM 103: and General Chemistry III 3.0
- PHYS 101: Fundamentals of Physics I 3.0
- & PHYS 102: and Fundamentals of Physics II 3.0
- & PHYS 201: and Fundamentals of Physics III 3.0

Additional Science electives to reach 21 credits (see below)

**Arts & Humanities Requirements**
- ENGL 101: Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- ENGL 103: Composition and Rhetoric III: Themes and Genres 3.0
- PHIL 105: Critical Reasoning 3.0
- PHI 311: Ethics and Information Technology 3.0
- COM 230: Techniques of Speaking 3.0
- COM 310 [WI]: Technical Communication 3.0
- PSY 101: General Psychology I 3.0
- PSY 330: Cognitive Psychology 3.0

Select two of the following:
- ACCT 110: Accounting for Professionals 3.0
- ECON 201: Principles of Microeconomics 3.0
- ECON 202: Principles of Macroeconomics 3.0
- Arts & Humanities, Business, or Social Studies elective (see below) 3.0-4.0

**University Requirements**
- UNIV CI101: The Drexel Experience 2.0
- or CI 120: CCI Transfer Student Seminar 2.0
- CIVC 101: Introduction to Civic Engagement 1.0
- COOP 101: Career Management and Professional Development 0.0

**Free Electives**
- 13.0-18.0
- Total Credits 186.0-193.0

**Program Electives**

- Computing & Informatics electives: any non-required CS, INFO, SE course numbered 300 or higher except CS 350 [WI] or CS 451
- Science electives: any CHEM (except CHEM 111, CHEM 112, CHEM 113, CHEM 114, CHEM 151), BIO (except BIO 161, BIO 162, BIO 163; can take only one of BIO 100, BIO 107, BIO 122; can take only one of BIO 101, BIO 109, BIO 124), PHYS (except PHYS 050, PHYS 100, PHYS 103, PHYS 104, PHYS 105, PHYS 106 [WI], PHYS 121, PHYS 122, PHYS 151, PHYS 160, PHYS 305, PHYS 324, PHYS 405; cannot take both PHYS 131 and PHYS 181), ENVS, ENSS, PHEV.
- Business electives: any ACCT, BLAW, BUSN, ECON, ENTP, FIN, HRMT, INTB, MGMT, MIS, MKTG, OPM, OPR, ORGB, STAT, TAX.
- Social Studies electives: any AFAS, ANTH, HIST, GST, JUDA, PSCI, PSY (except PSY 332, PSY 337), SOC (except SOC 364, SOC 365), WGST.
- Arts & Humanities electives: any ARCH, ARTH, CMGT, CJS, COM, CULA, DANC, EDEX, EDUC, ENGL (except ENGL 101, ENGL 102,
ENGL 103, ENGL 105), ESTM, FASH, FMVD, INTR, LING, MUSC, PHIL, PHTO, THTR, VSCM, VSST, WRIT, Foreign Language courses (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages) as defined by the College of Arts and Sciences, and GMAP 260, ANIM 140, ANIM 141, ANIM 152, ANIM 211, ANIM 212

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Accelerated Degrees

The College of Computing & Informatics offers several accelerated degree programs designed to allow students to complete both a bachelor’s degree and a graduate degree along with cooperative educational experience in fewer years than would be typical if pursuing the degrees separately.

Students accepted in this program can combine any of the Computing and Informatics bachelor’s and master’s degree programs as well as other options:

- Any CCI BS/any CCI MS Accelerated Degree (BS & MS in five years, including 2 Co-ops)
- Any CCI BS /MBA Accelerated Degree (BS/MBA) (BS & MBA in four years, including 1 Co-op option only)
- Any CCI BS/JD Accelerated Degree (BS/JD)

For more information on the criteria for entering this program, visit the BS/MS Accelerated Degree (http://www.drexel.edu/undergrad/academics/accelerated-degrees) page on the Drexel website.

For more information on how to apply for the BS/MS Accelerated Degree program, please visit the College of Computing & Informatics’ website (http://drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

Co-op/Career Opportunities

Co-Op Options

Three co-op options are available for this program:

- 5-year/3 co-op
- 4-year/1 co-op
- Accelerated Degree: 5-year/2 co-op

Career Opportunities

The demand for software engineering professionals is quite strong. Graduates can expect career opportunities in software design and development in a variety of application areas. Software engineering graduates are particularly well suited to work as members or leaders of software project teams. They have knowledge and skills to help them develop quality software within schedule and cost constraints.

According to the U.S. Bureau of Labor Statistics’ Occupational Outlook Handbook (http://www.bls.gov/ooh), software developer is among the fastest growing U.S. careers requiring at least a bachelor’s degree, with an estimated 186,600 new jobs by 2024. Although they have jobs in most industries, many software developers work in computer systems design and related services firms or software publishers. The field’s rapid growth is mainly due to the increase in demand for computer software, especially in healthcare.

Most software engineering students enter the professional world right after graduation, but some continue their studies in advanced software engineering programs.

Job titles of recent software engineering graduates include:

- Software Engineer
- Software Architect
- Software System Project Manager
- Software Project Team Leader

For more information on co-op and post-graduate opportunities, visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/cci/admissions/undergraduate/admissions-requirements/cci-bsms-degree-admissions).

Drexel University Libraries

Drexel University Libraries (http://www.library.drexel.edu) is a learning enterprise, advancing the University’s academic mission through serving as educators, supporting education and research, collaborating with researchers, and fostering intentional learning outside of the classroom. Drexel University Libraries engages with Drexel communities through
four physical locations, including W. W. Hagerty Library, Hahnemann Library, Queen Lane Library and the Library Learning Terrace, as well as a vibrant online presence which sees, on average, over 8,000 visits per day. In the W.W. Hagerty Library location, College of Computing & Informatics students have access to private study rooms and nearly half a million books, periodicals, DVDS, videos and University Archives. All fields of inquiry are covered, including: library and information science, computer science, software engineering, health informatics, information systems, and computing technology. Resources are available online at library.drexel.edu or in-person at W. W. Hagerty Library (http://www.library.drexel.edu/locations).

The Libraries also make available laptop and desktop PC and Mac computers, printers and scanners, spaces for quiet work or group projects and designated 24/7 spaces. Librarians and library staff—including a liaison librarian for computing and informatics—are available for individual research consultations and to answer questions about materials or services.

iCommons

Located in Room 106 of the Rush Building, the College’s iCommons is an open lab and collaborative work environment for students. It features desktop computers, a wireless/laptop area, free black and white printing, more collaborative space for its students and a furnished common area. There is a fully equipped conference room for student use with a 42” display and videoconferencing capabilities. The iCommons provides technical support to students, faculty, and administrative staff. In addition, the staff provides audio-visual support for all presentation classrooms within the Rush Building. Use of the iCommons is reserved for all students taking CCI courses.

The computers for general use are Microsoft Windows and Macintosh OS X machines with appropriate applications which include the Microsoft Office suite, various database management systems, modeling tools, and statistical analysis software. Library related resources may be accessed at the iCommons and through the W.W. Hagerty Library. The College is a member of the Rational SEED Program which provides cutting-edge software development and project management software for use in the iCommons and CCI classrooms. The College is also a member of the Microsoft Academic Alliance known also as “DreamSpark” that allows students free access to a wide array of Microsoft software titles and operating systems.

The iCommons, student labs, and classrooms have access to networked databases, print and file resources within the College, and the Internet via the University’s network. Email accounts, Internet and BannerWeb access are available through the Office of Information Resources and Technology.

Rush Building

The Rush Building houses classrooms, CCI administrative offices (academic advising, graduate admissions, faculty, etc.) and the iCommons computer lab (open to all CCI students). The building holds 6 classrooms equipped for audio-visual presentation. These rooms typically contain a networked PC, HD video player, ceiling mounted projectors, and other equipment for presentations and demonstrations. Four of these classrooms are fully equipped to function as laptop computing labs for networking, programming and database-related projects.

The Information Technology Laboratory, located in the Rush Building, consists of enterprise class information technology hardware that students would encounter in industry positions. The hardware includes 20 high powered workstations that are available to students and specialized networking lab simulation software. The hardware is networked and reconfigurable utilizing multiple virtual technologies as needed for the various classes the laboratory supports. In addition, a special system has been built into to the classroom to allow for conversion into a standard laptop computing lab utilizing motorized monitor lifts that allow the monitors and keyboards to recess into the desk.

University Crossings - Cyber Learning Center and Computer Lab

CCI also has classrooms, administrative office and faculty offices located in University Crossings, located at the corner of JFK Blvd. and Market Street. The building houses the Cyber Learning Center, a student computer lab, as well as several classrooms with video-conference enabled technology and media projection capabilities.

The Cyber Learning Center (CLC) provides consulting and other learning resources for students taking computer science classes. The CLC is staffed by graduate and undergraduate computer science students from the College of Computing & Informatics.

Both the CLC and UC Lab now serve as a central hub for small group work, student meetings, and TA assistance. The UC Lab is organized with desk space around the perimeter of the lab for individual or partner/pair-programmed student work, as well as with clusters of tables which can be connected as needed into pods to create workspaces for larger groups.

Research Laboratories

The College houses multiple research labs, led by CCI faculty, across Drexel’s main campus including: the Auerbach and Berger Families Cybersecurity Laboratory, Drexel Health and Risk Communication Lab, Socio-Technical Studies Group, Intelligent Information & Knowledge Computing Research Lab, Evidence-based Decision Making Lab, Applied Symbolic Computation Laboratory (ASYM), Geometric and Intelligent Computing Laboratory (GICL), High Performance Computing Laboratory (SPIRAL), Privacy, Security and Automation Laboratory (PSAL), Drexel Research on Play (RePlay) Laboratory, Software Engineering Research Group (SERG), Vision and Cognition Laboratory (VisCog) and the Vision and Graphics Laboratory. For more information on these laboratories, please visit the College’s research web page (http://cci.drexel.edu/research.aspx).

Alumni Garden

The Rush Building’s Alumni Garden provides additional collaborative space for students, faculty, professional staff and alumni. The Garden features wireless networking, tables with built-in power outlets, accessible covered patio and balconies and a bicycle rack. The Alumni Garden (http://cci.drexel.edu/about/our-facilities/rush-building/rush-alumni-garden-request-for-use.aspx) may be reserved for Drexel events.

3401 Market Street

3401 Market Street houses faculty offices and doctoral student workspaces. It also is home to College research groups such and University initiatives such as the Isaac L. Auerbach Cybersecurity Institute (http://drexel.edu/cci/research/centers-institutes/Cybersecurity). The Institute’s Auerbach and Berger Families Cybersecurity Laboratory serves as University’s first training facility dedicated to identifying challenges and discovering solutions in the areas of cyber infrastructure protection and incident response.
Evaluations
The College of Computing & Informatics works continually to improve its degree programs. As part of this effort, the software engineering degree is evaluated relative to the following Objectives and Outcomes.

Program Educational Objectives
Within three to five years of graduating, alumni of the program are expected to achieve one or more of the following milestones:

a. Graduates of the program obtain employment as software developers, where their software and communication skills eventually propel them toward technical and administrative leadership positions in industry and government.

b. Graduates of the program demonstrate an ability to continue to learn throughout their career and to keep pace with changing technology as appropriate to their positions.

c. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and completing technical graduate courses and other technical education to position them to advance software engineering practice as senior technical staff members or managers.

d. Graduates of the program specialize and enhance their software engineering knowledge by enrolling and graduating from MSc and PhD degree programs to position them to contribute to the intellectual foundations of the discipline of software engineering as researchers in industrial and government laboratories as well as in academia.

e. Graduates of the program advance toward becoming leaders in disciplines other than software engineering by enrolling and graduating from graduate-level degree programs in complimentary disciplines such as law and business, where the BSSE serves as an educational foundation.

f. Graduates of the program will demonstrate an awareness of their professional and social responsibility as software engineers by participation in professional activities and application of their knowledge for the good of society.

Software Engineering Student Outcomes
The program enables students to attain, by the time of graduation:

a. An ability to apply knowledge of mathematics, science and engineering

b. An ability to design and conduct experiments, as well as to analyze and interpret data

c. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability

d. An ability to function on multidisciplinary teams

e. An ability to identify, formulate and solve engineering problems

f. An understanding of professional and ethical responsibility

g. An ability to communicate effectively

h. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context

i. A recognition of the need for, and an ability to engage in life-long learning

j. A knowledge of contemporary issues

k. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Additional Information
The Software Engineering program is accredited by the Engineering Accreditation Commission (EAC) of ABET (http://www.abet.org).

To view the latest BS in Software Engineering program enrollment numbers, please click here (http://drexel.edu/cci/programs/undergraduate-programs/Facts).

Computing & Informatics Faculty

Yuan An, PhD (University of Toronto, Canada). Associate Professor. Conceptual modeling, schema and ontology mapping, information integration, knowledge representation, requirements engineering, healthcare information systems, semantic web.

David Augenblick, MS (University of Pennsylvania). Associate Teaching Professor. Introductory and object-oriented programming, data structures and database systems, computer application project management, application of computer programming principles and solutions to engineering problems.

Ellen Bass, PhD (Georgia Institute of Technology) Head of Department of Information Science; Joint Appointment with the College of Nursing and Health Professions. Professor. Characterizing human judgement and decision making, modeling human judgement when supported by information automation, computational models of human-human and human-automation coordination.

Mark Boady, PhD (Drexel University). Assistant Teaching Professor. Computer Algebra, complex symbolic calculations, automation of computation problems

David E. Breen, PhD (Rensselaer Polytechnic Institute). Associate Professor. Self-organization, biomedical image/video analysis, biological simulation, geometric modeling and visualization

Matthew Burlick, PhD (Stevens Institute of Technology). Assistant Teaching Professor. Image processing, machine learning, real-time video tracking, object detection and classification, statistics/probability, and acoustics

Christopher Carroll, MS (Drexel University). Associate Teaching Professor. Information technology within healthcare companies, computer networking and design, IT infrastructure, server technology, information security, virtualization and cloud computing.

Bruce W. Char, PhD (University of California-Berkeley). Professor. Symbolic mathematical computation, algorithms and systems for computer algebra, problem-solving environments parallel and distributed computation.

Chaomei Chen, PhD (University of Liverpool). Professor. Information visualization, visual analytics, knowledge domain visualization,
network analysis and modeling, scientific discovery, science mapping, scientometrics, citation analysis, human-computer interaction.

Michael Chu, MSE (University of Pennsylvania). Associate Teaching Professor. System, server, computer networking and design; IT Infrastructure; information technology management and security; Web system programming; database and mobile application development

Catherine D. Collins, MLIS (Indiana University). Associate Teaching Professor. Knowledge management, collection development, management of information organizations, information sources and services, international development.

M. Carl Drot, PhD (University of Michigan). Associate Professor. Systems analysis techniques, web usage, competitive intelligence.

Andrea Forte, PhD (Georgia Institute of Technology) PhD in Information Studied Program Director. Associate Professor. Social computing, human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, information literacy.

Susan Gasson, PhD (University of Warwick). Associate Professor. The co-design of business and IT-systems, distributed cognition & knowledge management in boundary-spanning groups, human-centered design, social informatics, online learning communities, grounded theory.

Colin Gordon, PhD (University of Washington). Assistant Professor. Software reliability, program behavior, concurrent and systems-level code, formal assurance, programming models, distributed computing, even testing

Jane Greenberg, PhD (University of Pittsburgh) Alice B. Kroeger Professor; Director, Metadata Research Center. Metadata, ontological engineering, data science, knowledge organization, information retrieval

Rachel Greenstadt, PhD (Harvard University). Associate Professor. Artificial intelligence, privacy, security, multi-agent systems, economics of electronic privacy and information security.

Peter Grillo, PhD (Temple University) Associate Department Head for Undergraduate Affairs, Information Science. Teaching Professor. Strategic applications of technology within organizations.

Gregory W. Hislop, PhD (Drexel University) Senior Associate Dean for Academic Affairs. Professor. Information technology for teaching and learning, online education, structure and organization of the information disciplines, computing education research, software evaluation and characterization.

Xiaohua Tony Hu, PhD (University of Regina, Canada). Professor. Data mining, text mining, Web searching and mining, information retrieval, bioinformatics and healthcare informatics.

Jeremy R. Johnson, PhD (Ohio State University). Professor. Computer algebra; parallel computations; algebraic algorithms; scientific computing.

Weimao Ke, PhD (University of North Carolina at Chapel Hill). Associate Professor. Information retrieval (IR), distributed systems, intelligent filtering/recommendation, information visualization, network science, complex systems, machine learning, text/data mining, multi-agent systems, the notion of information.

Xia Lin, PhD (University of Maryland) Department Head, Information Science; Director of International Programs. Professor. Digital libraries, information visualization, visual interface design, knowledge mapping, human-computer interaction, object-oriented programming, information retrieval, information architecture, information-seeking behaviors in digital environments.

Geoffrey Mainland, PhD (Harvard University). Assistant Professor. High-level programming languages and runtime support for non-general purpose computation.

Spiros Mancoridis, PhD (University of Toronto). Professor. Software engineering; software security; code analysis; evolutionary computation.

Gabriela Marcu, PhD (Carnegie Mellon University). Assistant Teaching Professor. Human-computer interaction, health informatics, action research, ethnography, user experience design, designing for social change, organizational information systems, ubiquitous computing, knowledge management.

Adelaida Alban Medlock, MS (Drexel University). Associate Teaching Professor. Introductory programming; computer science education.

William Mongan, MS (Drexel University) Associate Department Head for Undergraduate Affairs, Computer Science. Associate Teaching Professor. Service-oriented architectures, program comprehension, reverse engineering, software engineering, computer architecture, computer science education, engineering education outreach

Gaurav Naik, MS (Drexel University). Assistant Research Professor. Computer networking and cybersecurity

Ko Nishino, PhD (University of Tokyo) Associate Department Head for Graduate Affairs, Computer Science. Professor. Computer vision, computer graphics, analysis and synthesis of visual appearance.

Danuta A. Nitecki, PhD (University of Maryland at College Park) Dean of Libraries. Professor. Library metrics and use in management, library as place, and academic library service models.

Krzysztof Nowak, PhD (Washington University). Associate Teaching Professor. Fourier analysis, partial differential equations, image processing, wavelets, asymptotic distribution of eigenvalues, numerical methods and algorithms, computer science education.

Santiago Ontañón, PhD (University of Barcelona). Assistant Professor. Game AI, computer games, artificial intelligence, machine learning, case-based reasoning

Jung-ran Park, PhD (University of Hawaii at Manoa). Associate Professor. Knowledge organization and representation, metadata, computer-mediated communication, cross-cultural communication, multilingual information access.

Alex Poole, PhD (University of North Carolina). Assistant Professor. Archives and records, digital humanities, digital curation, pedagogy, diversity and inclusivity in the LIS profession

Jeffrey L. Popyack, PhD (University of Virginia). Professor. Operations research, stochastic optimization, computational methods of Markov decision processes; artificial intelligence, computer science education.

Lori Richards, PhD (University of North Carolina). Assistant Professor. Archives, digital curation, electronic records management, information technology and digital collections, cloud computing and record keeping, management of information organizations.

Michelle L. Rogers, PhD (University of Wisconsin-Madison). Associate Professor. Human-computer interaction, healthcare informatics, human
factors engineering, socio-technical systems, health services research, patient safety.

Jeffrey Salvage, MS (Drexel University). Teaching Professor. Object-oriented programming, multi-agent systems, software engineering, database theory, introductory programming, data structures.

Dario Salvucci, PhD (Carnegie Mellon University) Department Head, Computer Science. Professor. Human computer interaction, cognitive science, machine learning, applications for driving.

Kurt Schmidt, MS (Drexel University). Associate Teaching Professor. Data structures, math foundations for computer science, programming tools, programming languages.

Ali Shokoufandeh, PhD (Rutgers University) Senior Associate Dean of Research. Professor. Theory of algorithms, graph theory, combinatorial optimization, computer vision.

Erin Solovey, PhD (Tufts University). Assistant Professor. Human-computer interaction, brain-computer interfaces, tangible interaction, machine learning, human interaction with complex and autonomous systems.

Il-Yeol Song, PhD (Louisiana State University) PhD in Information Studies Program Director. Professor. Conceptual modeling, ontology and patterns, data warehouse and OLAP, object-oriented analysis and design with UML, medical and bioinformatics data modeling & integration,

Julia Stoyanovich, PhD (Columbia University). Assistant Professor. Data and knowledge management, big data, biological data management, search and ranking.

Brian Stuart, PhD (Purdue University), Associate Teaching Professor. Machine learning, networking, robotics, image processing, simulation, interpreters, data storage, operating systems, computer science, data communications, distributed/operating systems, accelerated computer programming, computer graphics.

Filippos Vokolos, PhD (Polytechnic University). Assistant Teaching Professor. System architecture, principles of software design and construction, verification and validation methods for the development of large software systems, foundations of software engineering, software verification & validation, software design, programming languages, dependable software systems.

Rosina Weber, PhD (Federal University of Santa Catarina). Associate Professor.

Jake Williams, PhD (University of Vermont). Assistant Professor. Data science, scientific programming, computational social science, computational linguistics and natural language processing, mathematics, machine learning, algorithms and scalability.

Enija Yan, PhD (Indiana University). Assistant Professor. Network Science, information analysis and retrieval, scholarly communication methods and applications.

Christopher C. Yang, PhD (University of Arizona, Tucson). Associate Professor. Web search and mining, security informatics, knowledge management, social media analytics, cross-lingual information retrieval, text summarization, multimedia retrieval, information visualization, information sharing and privacy, artificial intelligence, digital library, and electronic commerce.

Emeritus Faculty

Michael E. Atwood, PhD (University of Colorado) Associate Dean for Research and for Undergraduate Education. Professor Emeritus. Human-computer interaction, computer-supported cooperative work, organizational memory.

Thomas A. Childers, PhD (Rutgers University). Professor Emeritus. Measurement, evaluation, and planning of information and library services, the effectiveness of information organizations.

Prudence W. Dalrymple, PhD (University of Wisconsin-Madison) Director, Institute for Healthcare Informatics. Professor Emeritus. User-centered information behaviors, particularly in the health arena, health informatics, evidence based practice, education for the information professions and evaluation, and translation of research into practice.

David E. Fenske, PhD (University of Wisconsin-Madison). Dean Emeritus and Professor. Digital libraries, informatics, knowledge management and information technologies.

John B. Hall, PhD (Florida State University). Professor Emeritus. Academic library service, library administration, organization of materials.

Linda S. Marion, PhD (Drexel University). Professor Emeritus. Formal and informal communication, bibliometric studies of scholarly communication, diffusion of information, information use in the social sciences, academic and public libraries, information science education.

Katherine W. McCain, PhD (Drexel University). Professor Emeritus. Scholarly communication, information production and use in the research process, development and structure of scientific specialties, diffusion of innovation, bibliometrics, evaluation of information retrieval systems.

Carol Hansen Montgomery, PhD (Drexel University) Dean of Libraries Emeritus. Research Professor. Selection and use of electronic collections, evaluation of library and information systems, digital libraries, economics of libraries and digital collections.

Delia Neuman, PhD (The Ohio State University). Professor Emeritus. Learning in information-rich environments, instructional systems design, the use of media for learning, and school library media.

Gerry Stahl, PhD (University of Colorado, Northwestern University). Professor Emeritus. Human-computer interaction, computer-supported cooperative work, computer-supported collaborative learning, theory of collaboration.

Howard D. White, PhD (University of California at Berkeley). Professor Emeritus. Literature information systems, bibliometrics, research methods, collection development, online searching.

Susan Wiedenbeck, PhD (University of Pittsburgh). Professor Emeritus. Human-computer interaction, end-user programming/end-user development, empirical studies of programmers, interface design and evaluation.

Valerie Ann Yonker, PhD (Drexel University). Professor Emeritus. Human service information systems, systems analysis and design, measurement in software evaluation, knowledge engineering.
Goodwin College of Professional Studies

In today’s competitive job market, education is a smart investment in your future. Goodwin responds to the demands of today’s learner by offering programs that tailor a student's learning experience to their career aspirations. Our General Studies degree-completion program is ideal for transfer students who already possess an associate’s degree or just have existing college credits. It is also ideal for students who wish to chart their own path toward a college degree.

Major

- General Studies (BS) (p. 65)

Minor

- NEW: Client Development and Customer Service

Client Development and Customer Service

About the Minor

The minor in Client Development and Customer Service is a 24.0 to 26.0 credit curriculum designed to familiarize students with customer service theory while providing practical training to develop skills for building and maintaining successful client relationships. The minor can provide a strong complement for majors that emphasize entrepreneurship, interpersonal skills, nonprofit enterprise and marketing. Students minoring in Client Development and Customer Service might also consider a double minor in Business Administration.

Admission Requirements

- Minimum GPA of 2.0
- Academic advisor approval
- Must be enrolled in an undergraduate degree program

Program Requirements

A grade of "C" (2.0) or better must be earned in each course to be counted toward this minor.

General Studies

Major: General Studies

Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Classification of Instructional Programs (CIP) code: 24.0101
Standard Occupational Classification (SOC) code: 11-9199

About the Program

The Bachelor of Science (BS) in General Studies is the ideal degree completion program for self-directed students who desire a program they can tailor to their personal and professional interests. The program covers the fundamentals of a university education while allowing students to exhibit intellectual interest and discipline across a broad range of college-level coursework. A general studies degree informs employers of a graduate’s ability to think creatively when problem solving and work independently at a high level with a minimum of direction.

General studies students have more options for courses which apply to their degree requirements when they register for a given term. The flexibility to study subjects which have produced some of the greatest ideas, innovations and art in recorded history, can be both a personally and professionally rewarding benefit of a general studies degree.

Designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. Students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives.

The ability to include minors (http://catalog.drexel.edu/minors) within the General Studies major can be of great value to working adults who are seeking advancement or a change in their employment. Adult learners looking to improve their earning potential often find that a degree makes them eligible for higher-level positions within their organizations or others.

The Goodwin General Studies degree completion program offers students evening and online options to make it as convenient as possible for working adults to take advantage of the opportunity to return to school and complete their college degree.

Advising

Students in the BS in General Studies program are advised by an academic advisor (determined alphabetically by last name) who serves as an important resource to students as they progress and manage their educational and career goals.

Students receive one-on-one personal advisement to ensure that educational and professional objectives are met within the course of study.

For more information on this major, visit Goodwin College’s (http://goodwin.drexel.edu/mep/ug_ptgstd.php) web page.

Degree Requirements

This program is designed for individuals with a diverse college background and varied educational interests that cannot be captured in a single degree program. In consultation with their academic advisor, students have the opportunity to experiment in a variety of academic subjects through a generous amount of free electives. An attractive feature is that students can complete minors (http://catalog.drexel.edu/minors) en route to their degree.
Drexel’s highly regarded co-operative education program in which students interchange periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools.

The College and its distinguished faculty are committed to advancing the science and practice of management through basic, applied, and instructional research in the various disciplines of business. The College maintains strong connections to business professions and the community through participation in professional organizations, a commitment to community service, and dedication to providing opportunities for lifelong learning. Drexel’s LeBow College of Business—fully accredited by AACSB-International—offers two distinct undergraduate degrees, Bachelors of Science in Business Administration that has 8 major options and 3 co-majors, and Bachelors of Science in Business and Engineering, plus an option in ten minors and two certificate programs.

**Majors**

- Accounting (BSBA) (p. 69)
- Business Analytics (co-major) (BSBA) (p. 72)
- Business and Engineering (BSBAE) (p. 76)
- Finance (BSBA) (p. 80)
- General Business (BSBA) (p. 84)
- Legal Studies (BSBA) (p. 86)
- Management Information Systems (BSBA) (p. 88)
- Marketing (BSBA) (p. 91)
- Operations and Supply Chain Management (BSBA) (p. 95)
- Organizational Management (co-major) (BSBA) (p. 98)
- **NEW:** Real Estate Management and Development (BSBA)
- Technology Innovation Management (co-major) (BSBA) (p. 102)

**Minors**

- Accounting (p. 71)
- Business Administration (p. 95)
- Business Analytics (p. 74)
- Finance (p. 83)
- Legal Studies (p. 88)
- Management Information Systems (p. 90)
- Marketing (p. 93)
- Operations and Supply Chain Management (p. 97)
- Organizational Management (p. 99)
- **NEW:** Real Estate Management and Development
- Technology Innovation Management (p. 103)

**Certificates**

- Brand and Reputation Management (p. 80)
- Social Responsibility in Business (p. 80)

**LeBow College of Business**

**About the College**

The mission of the LeBow College of Business is to integrate Drexel University’s technological prominence with experience-based education to develop world-class leaders and advance knowledge through research. At the undergraduate level, this objective is accomplished by providing high-quality educational programs that integrate theory and practice. Drexel’s highly regarded co-operative education program in which students interchange periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools.
periods of academic study and full-time, off-campus employment with partner companies, sets us apart from other business schools.

The College and its distinguished faculty are committed to advancing the science and practice of management through basic, applied, and instructional research in the various disciplines of business. The College maintains strong connections to business professions and the community through participation in professional organizations, a commitment to community service, and dedication to providing opportunities for lifelong learning. Drexel’s LeBow College of Business—fully accredited by AACSB-International—offers two distinct undergraduate degrees, Bachelor of Science in Business Administration that has 8 major options and 3 co-majors, and Bachelor of Science in Business and Engineering, plus an option in ten minors and two certificate programs.

About the Curriculum

BS in Business Administration Program

The Bachelor of Science in Business Administration program is designed to prepare students for managerial positions in business and other institutions. To accomplish this, the undergraduate curriculum has the following characteristics and goals:

• An early exposure to the structure and functions of business enterprises
• The bridging of theory and concepts with professional practice
• The integration of material across disciplines within business as well as between business and other fields
• The enhancement of effective communication, problem-solving, and interpersonal skills
• Coverage of the ethical issues inherent in a business setting
• Coverage of the global, political, social, and legal/regulatory environment in which businesses operate
• Coverage of the impact of technology and technological changes on the operation of the business enterprise
• An emphasis on career preparation
• Opportunities for experiential learning through traditional co-op programs and other "hands-on" opportunities

BS in Business and Engineering Program

The Business and Engineering Degree Program contains a broad-based business and engineering curriculum, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study more deeply the areas of accounting, economics, finance, information systems, law, marketing, organizational behavior, entrepreneurship, operations, and statistics along with the functional areas of engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The Business and Engineering Degree Program gives students the opportunity to:

• Develop a breadth and depth of knowledge in functional business areas such as accounting, economics, entrepreneurship, finance, information systems, law, marketing, organizational behavior, operations, and statistics.
• Complete a broad education in engineering disciplines after completing a firm foundation in science and mathematics.

• Develop skills in technical communication and critical reasoning.
• Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.
• Apply acquired skills from co-op work experiences to further enhance their knowledge base.
• Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.
• Learn the operational aspects of business operations to improve the functioning of technically oriented businesses

BS in Economics Program

The Bachelor of Science in Economics program is designed to provide students with an understanding of the market system, as well as economic institutions, policies and development. In addition to this deep coverage of economics, the major includes liberal arts and sciences requirements. The program is flexible, allowing the student to customize the curriculum and choose areas of emphasis including concentrations in business economics or mathematical economics, as well as to select a coordinating field from other majors and minors at Drexel. The BS in Economics program provides excellent training for graduate school in economics.

BA in Economics Program

The Bachelor of Arts in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with interest in the less quantitative features of economics and a broader liberal arts education, particularly in areas offered by the College of Arts and Sciences. The degree gives students the flexibility to major or minor in a coordinate field outside of economics.

The Economics program:

• Provides a deep understanding of economics and broad training in arts and sciences.
• Enables students to apply acquired skills from co-op work experiences to further enhance their knowledge base.
• Prepare students for a wide variety of opportunities after graduation ranging from; corporate positions, consulting, government agencies, business, and law.
• Is a rigorous program that develops students’ critical thinking and problem solving skills.

Degree Requirements

The Business Administration curriculum requires a minimum of 180.0 credits. The Business & Engineering curriculum requires a minimum of 185 credits. The Economics curriculum requires a minimum of 187.0 credits. The courses in each curriculum may be grouped into three categories:

General Education

The liberal arts comprise 50 percent or more of total credits required. Courses in communications, economics, English, history, mathematics, natural science, political science, psychology, sociology, and statistics teach students to think effectively and to communicate ideas to others. In addition, they provide a good understanding of the economic, social, and political systems within which we live and business operates.

Common Body of Knowledge in Business
Courses in accounting, business strategy and social responsibility, finance, law, organizational behavior, management information systems, production management, and marketing introduce students to all the functional areas of business, the quantitative aspects of decision-making, and the behavioral factors common to all organizational structures.

**Major (BSBA) or Coordinated Field (BSECON & BAECON)**

The curriculum permits students to pursue one or more majors within the (BSBA) programs. The major coursework and the common body of knowledge in business together comprise not more than 50 percent of the total credits required for graduation. In the Economic programs, students must select a coordinated field to augment the general education and economics course work.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-course-list) on the Drexel University Writing Program web page (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses in Banner/DrexelOne can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Cooperative Education**

The five-year cooperative education programs consist of 12 terms in college and six terms in co-operative employment. During the freshman year, students spend three terms in school (fall, winter, and spring) and have a summer vacation. For each of the next three years, students alternate two terms in school with two terms of co-op. The senior year consists of three terms in college with no cooperative employment.

The four-year cooperative education program consists of 12 terms in college and two terms in cooperative employment. The two terms of co-op experience take place in the third year.

The non-cooperative four-year program comprises 12 terms in school with vacations during the summers.

Cooperative education, academic eligibility requirements, acceptance of transfer students, and placement services are described in detail in other sections of this catalog. Students wishing to prepare for admission to professional schools may obtain preprofessional counseling from the Office of Preprofessional Programs, 215.895.2437.

**Special Programs**

**Accelerated/Dual Degrees**

LeBow College offers an accelerated BS/MBA and BS/MS degree programs that provides academically qualified students with the opportunity to earn both a bachelor's degree and an MBA or MS in Accounting in the time normally required for the undergraduate degree at Drexel University. The program combines the advantage of practical work experience in the renowned Drexel Co-op with the graduate credentials of our nationally recognized programs.

LeBow College also offers a five-year dual-degree program with the European Business School (ESB) at Reutlingen University in Germany. This exciting dual degree program allows undergraduate students to earn degrees from both Drexel University’s LeBow College of Business and Reutlingen University’s European School of Business. In total students will spend 18 months in Germany completing two semesters of study and one semester on Co-op.

**Drexel in London**

The College’s Drexel in London Program offers flexible schedules for study abroad, ranging from six-week summer sessions to six-month (two-term) combined study and co-operative education programs in which students can earn up to 18 credits and fulfill one of their co-op requirements. The program’s emphasis is on international business in general, with a particular focus on the United Kingdom and the European Union. Business course selections each year will be selected from the list of courses that constitute the international business concentration, but students in other concentrations may participate in the program. Housing is provided in South Kensington, one of central London's most desirable residential sections. Drexel in London applications are administered by the Study Abroad (http://www.drexel.edu/studyabroad) office, 215.571.3558.

**Business Learning Community (BLC)**

LeBow College’s Business Learning Community (BLC) is a way of life at Drexel University - a cohort of freshman business students who live and attend classes together. The BLC was recently recognized by AACSBAccreditation Committee as a “strength and effective practice of the LeBow College of Business.” The program is designed to ease transition to university life, (http://catalog.drexel.edu/) enhance student academic performance, (http://catalog.drexel.edu/) provide opportunities for student engagement and networking and improve the overall student experience.

**LeBow BRIDGE**

BRIDGE is a LeBow College of Business undergraduate program that provides support to students in four critical areas: academic excellence, financial literacy and social engagement and community service. BRIDGE scholars receive the tools to be successful through advising programs related to academics, financial skills, professional development, cultural awareness and community service.

Students work together to build relationships within a dynamic and diverse group experience. Mentors are also available to BRIDGE scholars to provide guidance and ensure a positive college experience. After freshman year, BRIDGE scholars can serve as peer mentors to underclassmen.

**Global Classroom**

The LeBow Global Classroom program prepares candidates to become 21st Century Executives, able to tackle the toughest business challenges in our increasingly globalized business world. Each year a select cohort of 20 high-potential students from around the world enters this rigorous global education experience to acquire the complex set of skills and attitudes to thrive in an increasingly uncharted and globalized
marketplace. The learning community experience is akin to a “Global Classroom”.

**Peer Leader Program**

LeBow College’s Peer Leader Program is an outstanding learning experience for sophomore business students. Through a highly competitive application process, top-performing LeBow students with extraordinary leadership potential are identified, selected, trained and paired with UNIV 101 instructors to serve as mentors for new freshmen both inside and outside the classroom.

**Summer Institutes**

LeBow Summer Institutes offer an introduction to business education through exceptional summer programs designed for outstanding high school students with an interest in business. LeBow Summer Institutes offer the opportunity to maximize and develop the business and leadership skills sought after by employers and college admissions officers.

**Facilities**

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

**Accounting**

Major: Accounting

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0301

Standard Occupational Classification (SOC) code: 13-2011; 13-2080

**About the Program**

Accounting provides critical information that allows for decision making at all levels of business. Required courses prepare students to provide accounting information so it is useful for all decision makers. These courses cover financial accounting, managerial accounting, taxation and auditing. Electives may also be taken in the areas of Forensic accounting, Internal Audit and State And Local Taxation.

There is a wide range of career opportunities for accountants which include public accounting, corporate and non-profit accounting, and governmental accounting. Professional accountants will obtain a license either as a Certified Public Accountant (CPA) or as a Certified Managerial Accountant (CMA) after passing the examinations and completing all education and experience requirements. The University’s co-op program provides practical experience for accounting students. Time spent working in accounting co-op positions is accepted as part of the experience requirement for Pennsylvania and many other states.

Students planning to obtain a CPA license must take additional coursework to meet state mandated requirements. Each state has different education requirements for licensure. Interested students should consult with their academic advisor and/or the Department of Accounting (http://www.lebow.drexel.edu/Faculty/Departments/Accounting) upon declaring the major to ensure ample time to fulfill such requirements.

**General Education Electives**

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

- Society and Culture
- Communication, English, Fine Arts, Global Studies, Language or Philosophy
- Social Science
- Anthropology, History, Sociology, Political Science, Psychology
- Science
- Computer Science, Information Systems, Science

**Additional General Education Electives**

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science

Co-op/Career Opportunities

Public, private, and government accounting provide the greatest range of career possibilities. Professional accountants are normally certified as public accountants (CPA) or managerial accountants (CMA) after passing the appropriate professional examinations.

Drexel’s co-op program provides an added advantage to accounting students; time spent working in accounting co-op positions is often accepted as part of the one year of accounting experience needed for CPA certification.

Drexel’s accounting graduates accept positions in public accounting, private industry, government, and nonprofit organizations. Many also choose to continue their studies in graduate schools, pursuing such degrees as a MBA, master’s in taxation, master’s in accounting or a PhD. Overall, Drexel’s graduates enjoy a high placement rate.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

Minor in Accounting

About the Minor

Requirements

• No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.

• A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.

• No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.

• Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.

• Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.

• Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Business Analytics

Jennifer Wright, MTA (Villanova University) Assistant Department Head, Accounting and Tax. Associate Clinical Professor.

Business Analytics

Co-Major: Business Analytics
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1301
Standard Occupational Classification (SOC) code: 11-1021

The Business Analytics program is a "co-major"

About the Program

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior analyst providing daily reports on production to the CEO seeking to transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

Example business analytics jobs include, BA Strategy Consultants, Business Intelligence and Performance Management Consultants, Advanced Analytics, Optimization Consultants.

Because students in this co-major are required to choose a major in one of the functional areas of business, the curriculum enables students to tailor the program to their interests and anticipated career path.

Students complete the business analytics co-major in conjunction with one of the following majors:

- Accounting (p. 69)
- Finance (p. 80)
- International Business (p. 114)
- Legal Studies (p. 86)
- Management Information Systems (p. 88)
- Marketing (p. 91)
- Operations & Supply Chain Management (p. 95)

An additional distinguishing feature of the business analytics co-major is the required senior project (BUSN 460) where students work in small
teams on real business analytics projects from LeBow College’s corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company’s current business challenges. Experiencing this data driven decision-making process is invaluable career preparation.

- ECON 360 | Time Series Econometrics
- MIS 342 | Systems Analysis and Design
### MIS 343 Database Design and Implementation
### MIS 349 Predictive Business Analytics with Relational Database Data
### MIS 361 Information System Project Management
### MKTG 326 Marketing Insights
### MKTG 366 Customer Analytics
### MKTG 367 Data-Driven Digital Marketing
### OPR 320 Linear Models for Decision Making
### OPR 330 Advanced Decision Making and Simulation
### OPR 340 Decision Models for the Public Sector
### STAT 331 Introduction to Data Mining for Business
### STAT 335 Introduction to Experimental Design

**Total Credits: 183.0-186.0**

* Students select seven (21.0 credits) of additional general education electives with a minimum of one course in each of the following categories:
  - Society and Culture (Communication, English, Fine Arts, International Area Studies, Language, Philosophy)
  - Social Science (Anthropology, History, Sociology, Political Science, Psychology)
  - Math and Science (Computer Science, Information Systems, Math, Science)

** Students completing the Business Analytics co-major must do so in conjunction with a primary business major. Students must select a primary major from the following list:
  - Accounting
  - Real Estate Management and Development
  - Finance
  - Legal Studies
  - Management Information Systems
  - Marketing
  - Operations & Supply Chain Management
  - International Business

*** Occasionally, departments can also offer special topics courses and independent studies on emerging areas of analytics. These courses may be substituted with department chair approval.

† The following groupings of courses are recommended by departments for their respective career pathways. Students are strongly encouraged to complete three courses for at least one career pathway, based on their other major(s) and career goals.

**Accounting:**
- STAT 331: Introduction to Data Mining for Business
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- OPR 320: Linear Models for Decision Making

**Economics:**
- ECON 301: Microeconomics
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- MIS 343: Database Design and Implementation
- STAT 331: Introduction to Data Mining for Business
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing
- Complete both of the following courses:
  - BUSN 360: Programming for Business Analytics (R)
  - MIS 349: Predictive Analytics (SAS)

**Finance:**
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- STAT 331: Introduction to Data Mining for Business
- OPR 320: Linear Models for Decision Making

**Management Information Systems:**
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- MIS 361: Information System Project Management

**Marketing:** (Even though only three will be counted toward the BA co-major/minor, we recommend that the students use their primary major or free business electives to complete all of the courses below in order to develop a solid foundation. Note that MKTG 366 and STAT 331 employ similar techniques and MKTG 367 and STAT 335 employ similar techniques.)
- MKTG 326: Marketing Insights
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing
- STAT 331: Data Mining
- STAT 335: Introduction to Experimental Design

**Operations and Supply Chain Management:**
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- STAT 331: Introduction to Data Mining for Business
- STAT 335: Introduction to Experimental Design
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- OPR 320: Linear Models for Decision Making
- OPR 330: Advanced Decision Making and Simulation
- OPR 340: Decision Models for the Public Sector
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing

### Sample Plan of Study

**Term Credits:** 16.0
### Business Analytics

**Term 2**
- BUSN 102: Foundations of Business II 4.0
- ECON 202: Principles of Macroeconomics 4.0
- ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- MATH 102: Introduction to Analysis II 4.0

**Term Credits**: 15.0

**Term 3**
- ACCT 115: Financial Accounting Foundations 4.0
- CIVC 101: Introduction to Civic Engagement 1.0
- ENGL 103: Composition and Rhetoric III: Themes and Genres 3.0
- PSY 101: General Psychology I 3.0

Select one of the following:
- BIO 100: Applied Cells, Genetics & Physiology
- or 101: Applied Biological Diversity, Ecology & Evolution
- CHEM 151: Applied Chemistry
- PHYS 151: Applied Physics

**General Education elective**: 3.0

**Term Credits**: 17.0

**Term 4**
- ACCT 116: Managerial Accounting Foundations 4.0
- BLAW 201: Business Law I 4.0
- COM 270 (WI): Business Communication 3.0
- STAT 201: Introduction to Business Statistics 4.0

**Term Credits**: 15.0

**Term 5**
- INTB 200: International Business 4.0
- MIS 200: Management Information Systems 4.0
- STAT 202: Business Statistics II 4.0

Select one of the following:
- BIO 101: Applied Biological Diversity, Ecology & Evolution
- or 100: Applied Cells, Genetics & Physiology
- CHEM 151: Applied Chemistry
- PHYS 151: Applied Physics

**Term Credits**: 15.0

**Term 6**
- Any 200-399 English (ENGL) course 3.0
- FIN 301: Introduction to Finance 4.0
- MKTG 201: Introduction to Marketing Management 4.0
- OPM 200: Operations Management 4.0

**Term Credits**: 15.0

**Term 7**
- BUSN 260: Introduction to Business Analytics 4.0
- ORGB 300 [WI]: Organizational Behavior 4.0
- PHIL 105: Critical Reasoning 3.0
- Primary Major Course* 4.0

**Term Credits**: 15.0

**Term 8**
- History elective 4.0
- Primary Major Course* 4.0
- Science elective 3.0

Pick one of the following:
- BUSN 360: Programming for Data Analytics
- MIS 349: Predictive Business Analytics with Relational Database Data

**Term Credits**: 15.0

**Term 9**
- Society and Culture elective 3.0
- Business Analytics Elective 4.0
- Primary Major Courses* 8.0

**Term Credits**: 15.0

**Term 10**
- UNIV B201: Career Management 1.0

**Primary Major Course* 4.0**
- Business Analytics Elective 4.0
- Fine Arts elective 3.0
- General education elective 3.0

**Term Credits**: 15.0

**Term 11**
- MGMT 450: Strategy and Competitive Advantage 4.0
- Primary Major courses* 8.0
- Business Analytics Elective 4.0

**Term Credits**: 16.0

**Term 12**
- BUSN 460: Business Analytics Senior Project 4.0
- Primary Major course* 4.0
- Social Science elective 3.0
- General education elective 6.0

**Term Credits**: 17.0

**Total Credit**: 186.0

* See degree requirements (p. 72) for a list of business majors that may be completed in conjunction with the business analytics major.

### Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

**Requirements**

- No more than 2 courses or 8.0 credits required by a student's major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: economics, finance, international economics, legal studies, management information systems, marketing, organizational management, technology innovation management, and operations & supply chain management.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

### Minor in Business Analytics

How does a company design an effective social media campaign for its brand new product? How does a bank make credit card offers or detect fraud? How does a chain store stock its shelves with just the right products at the right price? Technology has made it possible to collect, store, process and analyze massive data sets that can help businesses make better decisions. However, there remains a gap that can only be filled by those with a background in business analytics. From the junior analyst providing daily reports on production to the CEO seeking to...
transform his or her business, all are looking for guidance and talent in business analytics.

LeBow students are uniquely positioned to address descriptive, diagnostic, predictive, prescriptive and pre-emptive questions across the business analytics lifecycle from the corporate generation of data through the application and impact on managerial and leadership decision-making and innovation.

Ranked second in a Computerworld survey on the most difficult skills to find, Business Analytics expertise is not only scarce, but in demand. McKinsey Global Institute reports that the United States could face a shortage of between 140,000 and 190,000 individuals who possess Business Analytics skills and an additional 1.5 million managers with the skills to implement the results.

The Business Analytics minor at LeBow consists of basic courses in statistics, operations research, and management information systems as well as advanced courses in management information systems, statistics/ econometrics, and modeling. The curriculum enables students to tailor the program to their interests and anticipated career path.

One of the distinguishing features of the business analytics minor is the required senior project (BUSN 460) where students work in small teams on real business analytics projects from LeBow College’s corporate partners. The projects require students to bring together all the key elements of the business analytics curriculum to derive business insights for a company’s current business challenges. Experiencing this data driven decision making process is invaluable career preparation.

The following groupings of courses are recommended by departments for their respective career pathways. Students are strongly encouraged to complete three courses for at least one career pathway, based on their other major(s) and career goals.

**Accounting:**
- BUSN 230: Introduction to Data Mining for Business
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- OPR 320: Linear Models for Decision Making

**Economics:**
- ECON 301: Microeconomics
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- MIS 343: Database Design and Implementation
- STAT 331: Introduction to Data Mining for Business
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing

Complete both of the following courses:
- BUSN 360: Programming for Business Analytics (R)
- MIS 349: Predictive Analytics (SAS)

**Finance:**
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- STAT 331: Introduction to Data Mining for Business
- OPR 320: Linear Models for Decision Making

**Management Information Systems:**
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- MIS 361: Information System Project Management

**Marketing:** (Even though only three will be counted toward the BA co-major/minor, we recommend that the students use their primary major or free business electives to complete all of the courses below in order to develop a solid foundation. Note that MKTG 366 and STAT 331 employ similar techniques and MKTG 367 and STAT 335 employ similar techniques.)
- MKTG 326: Marketing Insights
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing
- STAT 331: Data Mining
- STAT 335: Introduction to Experimental Design

**Operations and Supply Chain Management:**
- ECON 350 [WI]: Applied Econometrics
- ECON 360: Time Series Econometrics
- STAT 331: Introduction to Data Mining for Business
- STAT 335: Introduction to Experimental Design
- MIS 342: Systems Analysis and Design
- MIS 343: Database Design and Implementation
- OPR 320: Linear Models for Decision Making
- OPR 330: Advanced Decision Making and Simulation
- OPR 340: Decision Models for the Public Sector
- MKTG 366: Customer Analytics
- MKTG 367: Data-Driven Digital Marketing

**Facilities**

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square
feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

Business Analytics Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization.

Michaela Draganska, PhD (Kellogg School of Management, Northwestern University) Department of Marketing. Associate Professor. Advertising strategy, product assortment decisions, new product positioning, distribution channels. Marketing analytics and big data, marketing communications, marketing research, marketing strategy, technology and innovation.

Elea Feit, PhD (University of Michigan) Department of Marketing. Assistant Professor. Bayesian hierarchical models, interactive (eCommerce), marketing research, missing data.

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo.

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Samir Shah, DPS ( Pace University). Associate Clinical Professor. Drexel University’s Provost Fellow India Partnerships.

Chaojiang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Business and Engineering

Major: Business and Engineering

Degree Awarded: Bachelor of Science in Business and Engineering (BSBAE)

Calendar: Quarter

Total Credit Hours: 183.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The major in business and engineering combines two of Drexel’s most exciting programs, linking business and engineering to provide students with expertise in both fields.

The program contains a curriculum combining coursework in both business and engineering, enabling graduates to work successfully in technically oriented business positions. Students complete a set of broad functional business core courses along with a firm foundation in science, mathematics, and engineering. Students also study quantitative decision making within a business context, technology innovation management, and operations management. They complete a minor in business as well as a concentration in engineering. Graduates of this program will be well prepared to participate in innovative technological efforts in business.

The major gives students the opportunity to learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.

Mission

The Bachelor of Science in Business and Engineering program provides students the opportunity to:

• Learn important concepts in functional business areas such as accounting, economics, finance, information systems, law, marketing, organizational behavior, operations, and statistics.

• Study in more depth the areas of operations, technology innovation management, and other functional business areas.

• Complete a course of study in an engineering discipline after completing a firm foundation in science and mathematics.

• Develop skills in technical communication and critical reasoning.

• Study ethical issues faced by managers and engineers, and understand technology from a historical perspective.

• Apply acquired skills in co-op work experiences to further enhance their knowledge base.

• Study entrepreneurship from a management and finance perspective for preparation in innovative technological efforts.

• Learn to improve the functioning of technically oriented businesses through operational competencies.

About the Business Minors

All Business and Engineering students are required to complete a business minor under the curriculum, and they will have the ability to
choose from any of the business minors that are currently offered by the LeBow College of Business.

- Accounting (p. 71)
- Business Analytics
- Economics
- Finance
- International Economics (p. 120)
- Legal Studies (p. 88)
- Management Information Systems (p. 90)
- Marketing (p. 93)
- Operations & Supply Chain Management (p. 97)
- Organizational Management (p. 99)
- Technology Innovation Management (p. 103)

About the Engineering Concentrations

All Business and Engineering students are required to complete an engineering concentration under the curriculum, and they will have the ability to choose from the following:

- Chemical Engineering
- Civil Engineering
- Electrical and Computer Engineering
- Mechanical Engineering
- General Engineering

For more information on the specific courses for the concentration, please refer to the Degree Requirements Page (p. 77).

Additional Information

For additional information about the program or to schedule an appointment, please contact the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Decision).

Total Credits 183.0-184.0

* Students must take 4-5 LeBow courses to complete the requirements of a business minor. Students must select a minor from the following list:
  - Accounting
  - Economics
  - Entrepreneurship
  - Finance
  - International Economics
  - Legal Studies
  - Management Information Systems
  - Marketing
  - Operations & Supply Chain Management
  - Technology Innovation Management
** Students must select an engineering concentration and complete all five courses required for it:

- Electrical and Computer Engineering: ECE 200, ECE 201, ECEL 301 [WI], ECE 203, ECES 301
- Mechanical Engineering: ENGR 210, MEM 201, MEM 202, MEM 220, MEM 371
- Civil Engineering: ENGR 210, CAEE 202, CAEE 203, CAEE 212, MEM 202
- Chemical Engineering: ENGR 210, CHE 201, CHE 202, CHE 206, (CHE 301 or CHE 307)
- General Engineering: Any 5 courses from those listed for the above concentrations

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Facilities**

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

**Co-op/Career Opportunities**

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

**Decision Sciences & MIS Faculty**

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD (The Ohio State University) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Oben Ceryan, PhD (University of Michigan Ann Arbor) Department of Decision Sciences. Assistant Professor. Dynamic Pricing, Inventory Control, Revenue Management, Stochastic Optimization, Supply Chain Management

Christopher Gaffney, PhD (Rutgers University, New Brunswick). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lae Kim, PhD (Penn State University) Department of Decision Sciences. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management

Jeongsik Lee, PhD (University of California Los Angeles). Assistant Professor. Economics of Innovation; Social networks; Technology management

Benjamin Lev, PhD (Case Western Reserve University). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Hazem Maragah, PhD (Louisiana University) Department of Decision Sciences. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Fariborz Y. Partovi, PhD (The Wharton School, University of Pennsylvania) Department of Decision Sciences. Professor. Manufacturing Technology Development, Quality Implementation, Quality Management, Service Management, Six-Sigma

Matthew Reindorp, PhD (University of Maryland). Associate Clinical Professor. Supply Chain Finance; Supply Chain Management; Stochastic Processes; Simulation; Real options

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University’s Provost Fellow India Partnerships

Wenjing Shen, PhD (University of Michigan). Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (Columbia University) Department of Decision Sciences. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management
Certificate in Brand and Reputation Management

Certificate Level: Undergraduate
Admission Requirements: Current Drexel students only
Certificate Type: Certificate
Number of Credits to Completion: 16.0
Instructional Delivery: Campus
Calendar Type: Quarter
Expected Time to Completion: 3 years
Classification of Instructional Program (CIP) Code: 52.1499
Standard Occupational Classification (SOC) Code: 11-2021

In the increasingly competitive and volatile global marketplace, brand and reputation management have gained considerable interest and importance in organizations, including corporations, non-profits, and those in the public sector.

The Brand and Reputation Management Certificate program introduces the concept of the product and/or corporate brand, the components that make up a good brand, and how to develop brand strategies that are appropriate for various types of organizations. Students will also learn about the various stakeholders that impact or enhance an organization’s ability to build its brand and reputation as well as learn to analyze the business environment in order to identify a desired image, to create brand positioning strategy, and to develop and nurture the positive perception of a product, organization, individual or place.

Following the completion of all other required courses, all students must also complete an "honors" project as part of MKTG 363 Brand & Reputation Management Project. The topic and scope of the project must be approved by the Department Head in the Department of Marketing (http://www.lebow.drexel.edu/faculty-and-research/disciplines/marketing). Completed projects will be a written project submitted to the Department Head of Marketing for evaluation in a pass/fail manner.

Students must complete one course from the following options, depending upon career interests:

- MKTG 324 Marketing Channels and Distribution Systems: 4.0
- MKTG 347 New Product Development: 4.0
- MKTG 348 Services Marketing: 4.0
- MKTG 356 Consumer Behavior: 4.0

Or a course from outside the LeBow College in a related field, with the approval of the Department Head in the department of Marketing.

Total Credits: 16.0

" Taken upon the completion of all other requirements.

Certificate in Social Responsibility in Business

Through course work, civic engagement and related co-op experience, the Certificate in Social Responsibility in Business provides a well-rounded look at corporate social responsibility, giving students a unique perspective on ethical leadership in the business community. The certificate program, open only to currently enrolled Drexel University students, encourages students to seek co-op experience and positions after graduation with firms committed to acting with social responsibly.

Program Requirements

In conjunction with the Lindy Center for Civic Engagement, (http://drexel.edu/lindycenter) students initiate and complete a socially focused winter break or spring break project during any one term/break. The scope of the project entails civic responsibility and focuses on business applications. An example would be to assist in the preparation of income tax forms for under privileged Philadelphia residents. This project is in addition to requirements of the University 101 course.

Student will use their My LIFE e-portfolios to retain reflections and relevant writings from each of the required courses.

Coordinated with the Center for Civic Engagement, students will complete a minimum of sixty hours (60) of civic engagement while a student at Drexel University.

Students are required to earn a minimum of "C" in the following required courses, and a "B" average over all the courses.

Finance

Major: Finance
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0801
Standard Occupational Classification (SOC) code: 11-3031;13-2052; 13-2041; 13-2051

About the Program

Students with a major in finance obtain a thorough understanding of the basic concepts, principles, operating procedures, and analytical techniques in the various areas of finance. Throughout the finance curriculum, students develop and apply quantitative skills for financial decision making within the business environment.

This major prepares students for careers in private business firms, including positions involving forecasting and budgeting for financial decisions.
resources, cost-effectiveness analysis, control of expenditures, evaluation and financing of new projects, and evaluation of alternative methods of financing; in the investment field, including positions in security analysis, sales and trading, and investment banking and in the public sector, including positions at the federal, state, and local government levels.

For more information about the program, contact the Department of Finance (http://www.lebow.drexel.edu/faculty-and-research/disciplines/finance).

Major Requirements

All core mathematics and statistics courses should be completed before embarking on the upper-level finance major courses. A second course in business statistics, STAT 202 with a minimum grade of C, must be completed as a prerequisite for the major's required courses.

Because of the relevance of financial accounting to the field of finance, it is strongly recommended that finance students also complete ACCT 321 and ACCT 322 (Financial Accounting I and II) as two of their free electives.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the
attribute "WI" to bring up a list of all writing-intensive courses available that term.

### Sample Plan of Study

**Term 1**
- BUSN 101: Foundations of Business I 4.0
- ECON 201: Principles of Microeconomics 4.0
- ENGL 101: Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- MATH 101: Introduction to Analysis I 4.0
- UNIV B101: The Drexel Experience 1.0

**Term Credits**: 16.0

**Term 2**
- BUSN 102: Foundations of Business II 4.0
- CIVC 101: Introduction to Civic Engagement 1.0
- ECON 202: Principles of Macroeconomics 4.0
- ENGL 102: Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- MATH 102: Introduction to Analysis II 4.0

**Term Credits**: 16.0

**Term 3**
- ACCT 115: Financial Accounting Foundations 4.0
- ENGL 103: Composition and Rhetoric III: Themes and Genres 3.0
- PSY 101: General Psychology I 3.0
- Society and culture course* 3.0
- General Education elective* 3.0

**Term Credits**: 16.0

**Term 4**
- ACCT 116: Managerial Accounting Foundations 4.0
- STAT 201: Introduction to Business Statistics 4.0
- History (HIST) elective 4.0
- Select one of the following:
  - BIO 100: Applied Cells, Genetics & Physiology
  - CHEM 151: Applied Chemistry
  - PHYS 151: Applied Physics

**Term Credits**: 16.0

**Term 5**
- BLAW 201: Business Law I 4.0
- COM 270 [WI]: Business Communication 3.0
- STAT 202: Business Statistics II 4.0
- Select one of the following:
  - BIO 100: Applied Cells, Genetics & Physiology
  - CHEM 151: Applied Chemistry
  - PHYS 151: Applied Physics

**Term Credits**: 15.0

**Term 6**
- FIN 301: Introduction to Finance 4.0
- MKTG 201: Introduction to Marketing Management 4.0
- ORGB 300 [WI]: Organizational Behavior 4.0
- Social Science Elective 3.0

**Term Credits**: 15.0

**Term 7**
- FIN 302: Intermediate Corporate Finance 4.0
- MIS 200: Management Information Systems 4.0
- OPM 200: Operations Management 4.0
- Science Elective* 3.0

**Term Credits**: 15.0

**Term 8**
- FIN 321: Investment Securities & Markets 4.0
- PHIL 105: Critical Reasoning 3.0

**Term Credits**: 15.0

**Total Credits**: 180.0

* See degree requirements (p. 81).

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

### Co-op/Career Opportunities

The finance program at Drexel prepares students for careers in corporate financial management, the investment field, and the public sector. It also provides excellent basic preparation for various types of professional certification, including chartered financial analyst (CFA) and certified financial planner (CFP). In money and capital markets, finance students often find careers in banking, securities analysis, and...
portfolio management. In government, many choose to work for regulatory agencies.

Typical positions include financial analyst, capital budgeting officer, credit analyst, merger and acquisition manager, bank trust officer, portfolio analyst, and personal wealth manager.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

**Minor in Finance**

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, international economics, legal studies, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

All core mathematics and statistics courses should be completed before embarking on the upper-level finance minor courses. A second course in business statistics, STAT 202, with a minimum grade of C, must be completed as a prerequisite for the minor's required courses.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment. Prospective students may also consult with the Finance Department (http://www.lebow.drexel.edu/academics/undergraduate/majors/finance).

Standard Occupational Classification (SOC) code: 11-1021; 11-2022; 11-3011; 11-9199

About the Program

The major in general business equips students with a thorough understanding of theory and practice in the fundamental areas of business such as accounting, economics, finance, management, and marketing. This major is intended for business students who wish to gain breadth within their undergraduate studies. Students will develop the skills and competencies necessary for success across a diverse spectrum of business organizations.

Students selecting the major in general business should choose eight courses from at least five of the following fields: accounting (ACCT (p. 538)), economics (ECON (p. 673)), finance (FIN (p. 736)), human resource management (HRMT (p. 778)), international business (INTB (p. 792)), legal studies (BLAW (p. 801)), management (MGMT (p. 802)), marketing (MKTG (p. 809)), management information systems (MIS (p. 804)), business statistics (STAT (p. 614)), organizational behavior (ORGB (p. 856)), operations research (OPR (p. 855)) and operations management (OPM (p. 854)).

Please note that students pursuing this degree option are not eligible to obtain a business co-major or business minor.

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

Society and Culture
Communication, English, Fine Arts, Global Studies, Language or Philosophy 3.0
Social Science
Anthropology, History, Sociology, Political Science, Psychology 3.0
Science
Computer Science, Information Systems, Science 3.0

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science

Business Requirements
ACCT 115 Financial Accounting Foundations 4.0
ACCT 116 Managerial Accounting Foundations 4.0
BLAW 201 Business Law I 4.0
BUSN 101 Foundations of Business I (Online students take BUSN 111) 4.0
BUSN 102 Foundations of Business II (Online students take BUSN 112) 4.0
ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
FIN 301 Introduction to Finance 4.0
INTB 200 International Business 4.0
MGMT 450 Strategy and Competitive Advantage 4.0
MIS 200 Management Information Systems 4.0
MKTG 201 Introduction to Marketing Management 4.0
OPM 200 Operations Management 4.0
ORGB 300 [WI] Organizational Behavior 4.0
STAT 201 Introduction to Business Statistics 4.0
Select one of the following: 4.0
MGMT 260 Introduction to Entrepreneurship
MGMT 370 Business Consulting
MGMT 371 Business Consulting for Nonprofits
MGMT 451 Management Simulation
STAT 202 Business Statistics II

Major Requirements

Eight required courses (See Major Requirements list below) 32.0
Free Electives 18.0
Total Credits 180.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must
be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

### Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://
Co-Op/Career Opportunities
Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

General Business Faculty
Beth Buckman, MBA (Drexel University). Assistant Clinical Professor. Unique needs of transfer student research
Jodi Cataline, MBA (University of Delaware). Associate Clinical Professor. Research on financial literacy
Dana D’Angelo, CPA, MBA (Drexel University). Clinical Professor. Global classrooms and use of backchannel research
Susan Epstein, MBA (Drexel University). Associate Clinical Professor. Research surrounding the development writing in first year business students
Christopher Finnin, EdD (Drexel University) Director, General Business Studies. Associate Clinical Professor. Student engagement, learning communities, writing across the curriculum
Eric Rios, MBA, M.ED (Eastern University, Drexel University). Assistant Clinical Professor. Research on the needs of first generation college students

Legal Studies

Major: Legal Studies
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 22.9999
Standard Occupational Classification (SOC) code: 11-9199

About the Program
Law is pervasive in all aspects of business and life. The major in legal studies provides Drexel University students with the ability to recognize the influence of the law, understand its application and make informed and intelligent decisions regarding the course of action to take.

Although the major in legal studies will benefit those interested in pursuing a career in law, it is not intended solely for students aspiring to attend law school. This major enhances any business student’s perspective on the impact of legal issues within their respective professions.

Students will learn the basics of various areas of the law and the legal environment of business and will learn to identify the factual situation in which to apply that law. They will be able to analyze the facts, determine which aspects of the law are pertinent, apply the law to the facts, and draw a conclusion. Clarity of thought, reasoning and expression (both oral and written) are additional results of this process.

Emphasis is on critical thinking as a tool for problem solving, so that whatever the discipline, students will be able to identify and prevent possible problems or seek proper and timely assistance for critical decision making.

Additional Information
For more information about the program, contact the Department of Legal Studies (http://www.lebow.drexel.edu/Faculty/Departments/Legal).

**Term Credits** 15.0

**Total Credit: 180.0**
Minor in Legal Studies

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, management information systems, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/phila/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-guides) provided by the Steinbright Career Development Center.

Legal Studies Faculty

Roger D. Collons, JD (George Washington University; Georgia State University) Department of Legal Studies. Professor. Patent law, preservation of wealth.

Richard P. Freedman, JD, LLM (Temple University) Head of the Department of Legal Studies. Associate Professor. Taxation, corporate and business matters, real estate, estate planning, estate administration and elder law.

Andrew Genetta, JD (Cleveland-Marshall College of Law). Associate Clinical Professor.

Rosalie S. Kreider, JD (Villanova University) Department of Legal Studies. Assistant Professor. Intellectual property rights of employed inventors and authors; labor relations.

Natalie Pedersen, JD (Harvard University) Department of Legal Studies. Assistant Professor. American law, contract law, labor and employment law.

Steven R. Sher, JD (Georgetown University Law Center) Department of Legal Studies. Associate Professor. Business law, product liability, negligence, medical malpractice.

Management Information Systems

Major: Management Information Systems

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1201

Standard Occupational Classification (SOC) code:11-3021

About the Major

Management Information Systems (MIS) is about managing how and why people, organizations, and markets apply, design, and deploy information technology to achieve tactical and strategic business goals. MIS is about the integration of both areas of expertise and applying the power of technology to solving business problems.

The major in management information systems prepares students for opportunities in the information technology field and business. Aimed at producing graduates who bridge the gap between technical knowledge and business functions, the program focuses on a mix of applied computer systems content, interpersonal interaction, and a practical business orientation.

While administered by the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Management), the major in management information systems is interdisciplinary in nature. The courses may be taken by students in other colleges and departments who wish to complement other computer-related studies with business-oriented information systems subjects.
Degree Requirements

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements

CIVC 101 Introduction to Civic Engagement 1.0
COM 270 [WI] Business Communication 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
MATH 101 Introduction to Analysis I 4.0
MATH 102 Introduction to Analysis II 4.0
PHIL 105 Critical Reasoning 3.0
PSY 101 General Psychology I 3.0
UNIV B101 The Drexel Experience 1.0
UNIV B201 Career Management 1.0

Select two of the following:

- BIO 100: Applied Cells, Genetics & Physiology
- or BIO 101: Applied Biological Diversity, Ecology & Evolution
- CHEM 151: Applied Chemistry
- PHYS 151: Applied Physics

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

Society and Culture

- Communication, English, Fine Arts, Global Studies, Language or Philosophy
- Social Science
- Anthropology, History, Sociology, Political Science, Psychology
- Science
- Computer Science, Information Systems, Science

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science

Business Requirements

ACCT 115 Financial Accounting Foundations 4.0
ACCT 116 Managerial Accounting Foundations 4.0
BLAW 201 Business Law I 4.0
BUSN 101 Foundations of Business I (Online students take BUSN 111) 4.0
BUSN 102 Foundations of Business II (Online students take BUSN 112) 4.0
ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
FIN 301 Introduction to Finance 4.0
INTB 200 International Business 4.0
MGMT 450 Strategy and Competitive Advantage 4.0
MIS 200 Management Information Systems 4.0
MKTG 201 Introduction to Marketing Management 4.0
OPM 200 Operations Management 4.0
ORGB 300 [WI] Organizational Behavior 4.0
STAT 201 Introduction to Business Statistics 4.0

Select one of the following:

- MGMT 260 Introduction to Entrepreneurship
- MGMT 370 Business Consulting
- MGMT 371 Business Consulting for Nonprofits
- MGMT 451 Management Simulation
- STAT 202 Business Statistics II

Major Requirements

Eight required courses (See Major Requirements list below) 32.0
Free Electives 18.0

Total Credits 180.0

Management Information Systems Major Required Courses

- MIS 342: Systems Analysis and Design 4.0
- MIS 343: Database Design and Implementation 4.0

Select six of the following:* 24.0

- MIS 344: Networking Technologies for Business
- MIS 345: Client/Server Computing for Business
- MIS 346: Management Information Systems Strategy
- MIS 347: Domestic and Global Outsourcing Management
- MIS 348: Visual Basic Database Programming for Business
- MIS 349: Predictive Business Analytics with Relational Database Data
- MIS 351: Introduction to Programming for Business in C#
- MIS 352: Advanced Business Programming with ASP.Net
- MIS 361: Information System Project Management

Total Credits 32.0

* Students select from the following courses, or any other course at LeBow with the program manager’s permission.

### Co-op/Career Opportunities

Career opportunities exist in a wide range of business settings. Students prepare for careers as managers of information resource units, or as staff members who develop and support computer systems.

Recent Management Information System (MIS) graduates have gone on to work for many types of businesses and other organizations. Some job titles include: Management Consultants, IS Business Analysts, IT Project Management, IT Consultants, IT Systems Managers, Systems Analysts. Some MIS students also choose to continue their studies with an MBA; recent Drexel MIS graduates are now attending Columbia, Princeton, and the University of Pennsylvania.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

### Minor in Management Information Systems

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Business administration, business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, marketing, business analytics, organizational management, technology innovation management, and operations & supply chain management.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty,
students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

Decision Sciences & MIS Faculty

Pramod Abichandani, PhD. Assistant Clinical Professor.

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/ Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

Avijit Banerjee, PhD (The Ohio State University) Department of Decision Sciences. Professor. Interface with Marketing, Pricing Revenue Management, Inventory Control, Operations Planning and Scheduling, Production Planning and Control, Supply Chain Management

Hande Benson, PhD (Princeton University) Assistant Department Head, Decision Sciences & MIS. Associate Professor. Interior-point methods, Large Scale Optimization, Mathematical Programming, Nonlinear Optimization, Operations and Supply Chain Optimization, Optimization Software, Portfolio Optimization

Oben Ceryan, PhD (University of Michigan Ann Arbor) Department of Decision Sciences. Assistant Professor. Dynamic Pricing, Inventory Control, Revenue Management, Stochastic Optimization, Supply Chain Management.

Christopher Gaffney, PhD (Rutgers University, New Brunswick). Assistant Clinical Professor. Applied Probability, Decision Theory, Risk Analysis.

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce, Online Auctions; Outsourcing; SAS; Technology Adoption.

Seung-Lee Kim, PhD (Penn State University) Department of Decision Sciences. Professor. Inventory control, Production Planning and Control, Quality Management, Six-Sigma, Supply Chain Management.

Jeongsik Lee, PhD (University of California Los Angeles). Assistant Professor. Economics of Innovation; Social networks; Technology management.

Benjamin Lev, PhD (Case Western Reserve University). Trustee Professor. Inventory Control, Mathematical Programming, Operations Planning and Scheduling.

Merrill W. Liechty, PhD (Duke University). Clinical Professor. Bayesian statistics, portfolio selection, higher moment estimation, higher moment estimation, Markov Chain Monte Carlo.

Chuanren Liu, PhD (Rutgers University). Assistant Professor. Data Mining, Decision Models, Risk Assessment, Sequential Analysis.

Hazem Maragah, PhD (Louisiana University) Department of Decision Sciences. Associate Professor. Statistical quality control, total equity management, applied statistics.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Matthew Reindorp, PhD (University of Maryland). Associate Clinical Professor. Supply Chain Finance; Supply Chain Management; Stochastic Processes; Simulation; Real options.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University’s Provost Fellow India Partnerships.

Wenjing Shen, PhD (University of Michigan). Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (Columbia University) Department of Decision Sciences. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management.

Chaojiang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Marketing

Major: Marketing

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1401

Standard Occupational Classification (SOC) code: 11-2021

About the Program

Marketing is one of the most dynamic areas of business because it focuses on satisfying the ever-changing wants and needs of people. Professional marketers research and identify target audiences, develop products and services, formulate pricing strategies, develop advertising and promotional campaigns, and implement methods of distribution so that customers receive products and services where and when they want them. Perhaps the most basic marketing skill is to be able to see an organization’s activities from the customer’s viewpoint.

A major in marketing prepares students for the many opportunities that exist in product and brand management, marketing research, advertising, digital marketing, customer analytics, retailing, channel management,
logistics and physical distribution, professional personal selling and sales management, purchasing, wholesaling, marketing planning and analysis, public relations, marketing entrepreneurship, and new-product development.

**Additional Information**

For more information about the major, contact the Department of Marketing (http://www.lebow.drexel.edu/academics/disciplines/marketing).

Co-op/Career Opportunities

Marketing opportunities abound in all types of organizations — including manufacturing firms, wholesalers, retail stores, Internet firms, service organizations, banking and financial institutions, law and accounting firms, hospitals, colleges and universities, museums, chambers of commerce, professional sports teams, government agencies, charitable foundations, churches, and countless other settings. Any organization that seeks to reach a particular audience or consumer group needs the skills of marketers.

There are many specialized jobs in marketing, including product and brand managers, marketing researchers, advertising executives, pricing analysts, direct (non-store) marketers, Internet marketers, professional buyers, manufacturing agents, transportation and distribution managers, industrial and consumer salespeople, stockbrokers, sales managers, college enrollment managers, wholesalers, retailers, marketing planners, sales forecasters, marketing cost analysts, public relations managers, media and event planners, sales promotion managers, trade show or exhibit marketers, new product development managers, management consultants, digital marketers, marketing data analytics and international marketers.

Co-op Experiences

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Marketing research assistant, manufacturing firm: “Assisted in the development of new products, which included gathering information concerning competitive products, markets, pricing. Conducted testing of new products. Assisted in special projects. . . gained good experience.”

Retail analyst, producer of luxury home products: “Supported the sales and production divisions. Tracked weekly and monthly sales information. Developed product placement charts for forecasting. Assisted in maintaining productivity reports. Developed and presented a window treatment market analysis.”

Activity-based management (ABM) analyst, pharmaceuticals manufacturer: “Supported the ABM team (5 people). Member of two sub-project teams. Maintained full participation on both sub-teams while still maintaining responsibilities on core team. Developed efficiencies in re-engineering methodologies, activity-based costing methodologies, and support of change management. . . included as a full team member.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

Minor in Marketing

Marketing is one of the most dynamic areas of business because it focuses on satisfying the ever-changing wants and needs of people. Since it involves the creation of value for customers, as well as the acquisition and retention of customers, this minor is appropriate in combination with a myriad of business and non-business majors including,

**Requirements**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- **Cannot do a major and a minor in the same field of study.**

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Operations & Supply Chain Management

Major: Operations & Supply Chain Management

Degree Awarded: Bachelor of Science in Business Administration (BSBA) Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.0205
Standard Occupational Classification (SOC) code: 11-3051; 11-3071

About the Program

The major in Operations & Supply Chain Management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems. Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings. In this major, courses drawing on the foundations and the state-of-the-art for both production and service industries allow students to craft a course of study that can meet industry standards.

Additional Information

For additional information about the program, students should contact the Department of Decision Sciences and MIS (http://www.lebow.drexel.edu/Faculty/Departments/Decision).

Co-op/Career Opportunities

Operations & Supply Chain Management students go on to work in a variety of fields, including manufacturing, product planning and research and development. The #4 and #6 on the Top 10 Best Business Jobs in the US News and World Report rankings are Operations Analysts and Logistics Analysts. According to the Bureau of Labor Statistics (https://www.bls.gov), the number of jobs in Operations & Supply Chain Management will grow 13-22% over the next 7 years. The Operations & Supply Chain Management major is the top BSBA Major in LeBow for job placement satisfaction. The average starting salary of our graduates is $50,667.

Co-op Placements

Operations & Supply Chain Management majors land some of the most prestigious and highest paying co-op assignments. Our co-op employers include:

- Estee Lauder
- PECO Energy
- Johnson & Johnson
- Bimbo Bakeries
- Exelon Corporation

The average weekly co-op salary is $517.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides (http://www.drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

Minor in Operations and Supply Chain Management

The minor in operations and supply chain management is designed to prepare students for eventual participation as managers or specialists in the operations activity of industrial and service systems. Today, companies worldwide are competing in very different ways and very different environments than they were in the past because of technological advances. Operations, Supply Chain Management, and Logistics are key functions through which companies can gain strategic advantage, and companies are hiring graduates to drive innovations for their new economic surroundings. In this minor, courses drawing on the foundations and the state-of-the-art for both production and service industries allow students to craft a course of study that can complement their existing major.

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.

A grade of "C" (2.0) or better must be earned for each course in this minor for it to be counted.

No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.

Students should check the prerequisites of all classes when selecting electives. It is the responsibility of the student to know prerequisites.

Business administration and business & engineering & economic students may complete any of the business minors, including: accounting, economics, finance, international economics, legal studies, management information systems, marketing, business analytics, organizational management and technology innovation management.

Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

Wenjing Shen, PhD (University of Michigan). Associate Professor. The interface of operations management and marketing; inventory management; supply chain management.

Min Wang, PhD (Columbia University) Department of Decision Sciences. Assistant Professor. Healthcare Operations Management, Inventory Control, Production Planning and Control, Service Management, Supply Chain Management.

Chaoyang Wu, PhD (University of Cincinnati). Assistant Professor. Business Analytics, Computational Statistics, Healthcare Analytics, Semiparametric Regression, Statistical Data Mining.

Organizational Management

Co-Major: Organizational Management

Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 186.0
Classification of Instructional Programs (CIP) code: 52.0213
Standard Occupational Classification (SOC) code: 11-9199

The Organizational Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing or Operations and Supply Chain Management.

About the Program

The co-major in “Organizational Management” is designed for students with varied backgrounds who seek to develop knowledge and skills in leadership, teamwork, and communication. These organizational management skills are intended to supplement core technical skills such as Finance, Accounting, Marketing, etc. The curriculum provides students with a foundation of skills for effectively working with others in a variety of contexts and situations. This co-major complements a variety of degrees and is suitable for business majors.

Leadership.

Professor. Business Education; Groups/Teams; Leadership; Supply Chain

David Kurz, EdD
Professor of Management

Jeffrey H. Greenhaus, PhD
Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

Cuneyt Gozu, PhD
Associate Professor. Groups/Teams; Multi-Level Modeling; Shared Leadership.

Lauren D’Innocenzo, PhD
Organizational Management Faculty

Upon completing the minor, students will be able to:

• Discover important insights about oneself as a leader and develop a self-awareness of strengths and opportunities for personal growth
• Manage career and networks to achieve personal growth
• Develop the skills and competencies needed to lead effectively in today’s dynamic and diverse environment
• Increase conceptual understanding of leadership in different types of situations and facing different types of challenges
• Learn how to influence and manage conflict within organizations
• Identify various approaches and imperatives for leading teams
• Recognize ethical dilemmas in management practice and how to infuse ethical standards within a group or team
• Learn how to effectively function within a team and lead a team for success
• Recognize how human factors can both distort and enhance the process of managerial decision making
• Understand how the changing nature of work (e.g., global, technological, etc.) influences choices about design and practices within organizations

Organizational Management Faculty

Lauren D’Innocenzo, PhD (University of Connecticut). Assistant Professor. Groups/Teams; Leadership; Organizational Culture and Fit.

Cuneyt Gozu, PhD (University of Albany). Associate Clinical Professor. Attitudes; Groups/Teams; Leadership; Motivation; Power and Influence

David Kurz, EdD (University of Pennsylvania). Assistant Clinical Professor. Business Education; Groups/Teams; Leadership; Supply Chain Leadership.

Mary Mawritz, PhD (University of Central Florida). Assistant Professor. Abusive supervision; deviant behavior; leadership.

Christian Resick, PhD (Wayne State University). Associate Professor. Groups/Teams; Leadership; Organizational Culture and Fit; Personality.

Joan Weiner, PhD (The Wharton School, University of Pennsylvania). Professor. Business ethics, leadership, communication and decision making; educational innovation; health system management design.

Jonathan C. Ziegert, PhD (University of Maryland). Associate Professor. Attitudes; Diversity; Groups/Teams; Leadership; Organizational Culture and Fit.

Real Estate Management and Development

Major: Real Estate Management and Development
Degree Awarded: Bachelor of Science in Business Administration (BSBA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.1501
Standard Occupational Classification (SOC) code: 11-9141

Drexel’s Real Estate Management and Development major encompasses foundation courses in real estate operations, management and development, including specialized courses in sustainability, asset management, real finance, and law. The major balances students’ need for critical thinking and business acumen skills by including core business, social sciences, and humanities courses. Students in this full-time, face-to-face major will benefit from Philadelphia’s outdoor classroom – its diverse real estate market. The curriculum also includes a six-month co-op experience that partners classroom knowledge with experiential learning to further develop the requisite skills students need to succeed as real estate management and development professionals in the built environment.

Daniel Dorn, PhD (Columbia University) Department of Finance. Associate Professor. Capital markets and investments; behavioral finance.
Technology Innovation Management

Co-Major: Technology Innovation Management

Degree Awarded: Bachelor of Science in Business Administration (BSBA) Calendar Type: Quarter

Total Credit Hours: 186.0

Classification of Instructional Programs (CIP) code: 52.0201
Standard Occupational Classification (SOC) code: 11-1021; 11-9199

The Technology Innovation Management program is a co-major that must be taken in conjunction with the following majors Accounting, Finance, International Business, Legal Studies, Management Information Systems, Marketing or Operations and Supply Chain Management.

About the Program

Technology and Innovation Management is a unique and exciting area within the broad field of management. The field focuses broadly on understanding the process of innovation, and management approaches to innovation with special emphasis on technology change and a source of innovations.

The Technology Innovation Management program offers a very significant way of differentiating the Drexel business student in the marketplace by embedding skill sets and knowledge base emphasizing technology innovation management which is built on a sold business background. Students most likely to benefit from a Technology Innovation Management co-major will have majors in Operations and Supply Chain Management, Marketing, and Management Information Systems; however, this is not a restricted co-major. Technology Innovation Management courses are oriented primarily toward innovation, with an emphasis on technology-based innovation.

The minor in Technology Innovation is designed for students with varied backgrounds who seek to develop knowledge and skills in innovation process and strategic approaches to technology. These technology innovation management skills are intended to supplement other majors from around the university.

**Minor in Technology Innovation Management**

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.

• A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.

• No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.

• Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.

• Business & engineering and economic students may complete any of the business minors, including: accounting, economics, finance, international economics, international business, legal studies, management information systems, marketing, business analytics, organizational management, and operations & supply chain management.

• Cannot do a major and a minor in the same field of study.

### Required Courses

- **MGMT 201** Introduction to Technology Innovation Management 4.0
- **MGMT 301** Designing Innovative Organizations 4.0
- **MGMT 302** Competing in Technology Industries 4.0
- **MGMT 364** Technology Management 4.0

**Select 2 courses from either track:** 8.0

#### Product Innovation Track

- B LAW 360 Intellectual Property and Cyber Law
- FIN 335 Entrepreneurial Finance
- **MGMT 370** Business Consulting
- MKTG 347 New Product Development
- MKTG 355 Interactive Marketing
- MKTG 357 Global Marketing
- MKTG 365 Digital Marketing
- ORGB 400 Team Development and Leadership
- ORGB 420 Negotiations and Conflict Resolution

#### Process Innovation Track

- **MGMT 370** Business Consulting
- MIS 350 Intro to Enterprise Application Software Using SAP - Accounting & Analytics
- MIS 361 Information System Project Management
- OPM 315 Service Operations Management

### Total Credits 24.0

### Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-Lebow-hall) to learn more about Gerri C. LeBow Hall.

### Co-Op/Career Opportunities

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities. To learn more about career opportunities and resources see the Career Guides (http://drexel.edu/scdc/career-services/counseling/career-guides) provided by the Steinbright Career Development Center.

### Technology Innovation Management Faculty

Shanti Dewi Anak Agung Istri, PhD *(Georgia Institute of Technology)*. Assistant Professor. Technology commercialization; Technology entrepreneurship.

Suresh Chandran, PhD *(Vanderbilt University)*. Associate Clinical Professor. Corporate entrepreneurship; corporate social responsibility; global management; intellectual property and employee rights; Sustainability; Technological Innovation.

Robert W. Keidel, PhD *(Wharton School, University of Pennsylvania)*. Clinical Professor. Cognitive coaching; Executive team building; Organizational design; Strategic thinking; Strategy creation

Jeongsik Lee, PhD *(University of California Los Angeles)*. Assistant Professor. Economics of Innovation; Social networks; Technology management

Yu-Chieh Lo, PhD *(University of Southern California)*. Assistant Professor. Categorization in markets; Organization theory; Technology innovation.

Dai Ma, PhD *(University of Chicago)*. Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Michele K. Masterfano, DBA *(Argosy University)*. Associate Clinical Professor. Business Planning; Marketing Research; Marketing Strategy; Social Capital; Social Networking

Rajiv Nag, PhD *(Pennsylvania State University)*. Assistant Professor. Organizational Knowledge and Identity; Organizational learning and change; Strategic Leadership; Strategic Performativity

Vadake Narayanan, PhD *(University of Pittsburgh)*. Delloitte Touche Jones Stubbs Professor. Cognition and Strategy; Corporate Entrepreneurship; Organization design

Haemin Park, PhD *(University of Washington)*. Assistant Professor. IPO, Knowledge-based Vie of the Firm; Technology Entrepreneurship; Venture capital

Stanley Ridgley, PhD *(Duke University)*. Assistant Clinical Professor. Business communication; Cognition and strategy; Competitive intelligence; Determinants of Firm Performance; Global Management; New Markets in Emerging Countries; Russian Business Culture.

Daniel Tzabbar, PhD *(University of Toronto)*. Associate Professor. Accessing and managing knowledge; Alliances; Human capital; Organizational learning and change; Social Capital; Technology Entrepreneurship; Technology Innovation

### LeBow College of Business: School of Economics

Economics is one of Drexel LeBow’s strongest disciplines. The LeBow College of Business celebrated its strengths in economics teaching and research by elevating its economics department into a School of Economics. The School of Economics will continue Drexel LeBow’s commitment to offering a curriculum that is current and challenging, and to conducting research that aligns with business trends and informs policy makers.
A degree, major or minor in Economics provides students with a robust understanding of the workings of the market system and major economic institutions, economic policy, and development.

**Majors**

**BA, BS, BS-JD Economics**
- Economics (BA, BS, BS-JD) (p. 107)

**BS Business Administration**
- Business Economics co-major (p. 105)
- International Business (p. 114)
- International Business co-major (p. 117)

**Minors**
- Economics (p. 112)
- International Economics (p. 120)

**Business Economics**

**Major: Business Economics**

**Degree Awarded: Bachelor of Science in Business Administration (BSBA)**

**Calendar Type: Quarter**

**Total Credit Hours: 184.0**

**Co-op Options:**
- Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 45.0601

**Standard Occupational Classification (SOC) code:** 11-9199; 19-3011

The Business Economics program is a "co-major."

**About the Program**

Economics is the study of allocating scarce resources among competing needs. The program places particular emphasis on the application of theory toward the solution of particular problems in such areas as international trade, money and finance, consumer activities, economic development, and other areas.

Drexel’s Business Economics co-major is designed for students who wish to receive a sound education within a specific functional area of business (Primary major) while supplementing that knowledge with an overview of economics.

Prepares students to apply the rigorous methods of modern quantitative economics in a business context. This program combines coursework in economics and the functional fields of business administration within the context of a general scientific and humanities curriculum.

More information can be found on the School of Economics webpage (http://www.lebow.drexel.edu/faculty-and-research/disciplines/economics).

Total Credit: 186.0

* Students completing the Business Economics Co-major must do so in conjunction with a primary business major. Students must select a primary major from the following list: Accounting, Entrepreneurship, Finance, Legal Studies, Management Information Systems, Marketing, or Operations & Supply Chain Management.

School of Economics Faculty

Marco Airaudo, PhD (University of Pennsylvania Philadelphia), Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (Drexel University). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (University of Minnesota). Clinical Professor. Economic theory, macroeconomics.
Sebastien Bradley, PhD (University of Michigan). Associate Professor. Public finance, international economics, applied econometrics, real estate.

Mian Dai, PhD (Northwestern University). Associate Professor. Managerial economics and strategy, applied econometrics, industrial organization.

Pia DiGirolamo, PhD (Purdue University). Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa D. Harrison, PhD (University of Texas Austin) Associate Dean for Academic Affairs and Innovation, Academic Director of the Center for Nonprofit Governance. Associate Professor. Econometrics, public finance, industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (Penn State University) Dean, LeBow College of Business. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (Temple University). Assistant Clinical Professor. Education and human capital.

Andre Kurmann, PhD (University of Virginia). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (Duke University) Director, LeBow College of Business PhD program. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD (Michigan State University) Senior Associate Dean, Academic Programs. Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (Louisiana State University). Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Irina Murtazashvili, PhD (Michigan State University). Assistant Professor. Applied econometrics.

Maria Olivero, PhD (Duke University). Associate Professor. Macroeconomics, international finance.

Eydis Olsen, MA (American University). Associate Clinical Professor. Macroeconomics, political economy.

Tristan Potter, PhD (Boston College). Assistant Professor. Macroeconomics, labor economics, search theory.

Konstantinos Serfes, PhD (University of Illinois at Champaign-Urbana). Professor. Industrial organization, microeconomics, game theory.

Ricardo Serrano-Padial, PhD (University of California at San Diego). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (University of California at Berkeley) Interim Director, School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Kozlara, PhD (University of Wisconsin). Professor Emeritus. Applied micro and macro economics.

Biju Yang Lester, PhD (University of Pennsylvania). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (Boston College). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD (Purdue University). Professor Emeritus. International economics, input-output analysis.

Economics

Major: Economics
Degree Awarded: Bachelor of Science in Economics (BSECON) or Bachelor of Arts in Economics (BAECON)
Calendar Type: Quarter
Total Credit Hours: 187.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: (BS) 45.0603; (BA) 45.0601
Standard Occupational Classification (SOC) code: 19-3011; 13-2000

About the Program
Economics is at the root of business decisions, government policy making, and global relations. As a course of study, it can lead to diverse career opportunities, and is often viewed favorably as excellent preparation for graduate programs such as business and law.

Bachelor of Arts in Economics
The BA in Economics introduces students to modern economics within the context of a broad-based liberal arts curriculum. The degree is oriented toward students with interest in the less quantitative features of economics and a broader liberal arts education, particularly in areas offered by the College of Arts and Sciences. The degree requires students
develop a depth of knowledge in a coordinate field (minor or secondary major) outside of economics.

**Bachelor of Science in Economics**

The BS in Economics program introduces students to modern economics within the context of a general scientific and humanities curriculum. This degree is oriented towards students interested in acquiring a broad-based education with a focus on quantitative and professional skills.

The program is designed to provide students with an understanding of the market system, as well as economic institutions, policies and development. In addition to this deep coverage of economics, the major includes liberal arts and sciences requirements. The degree stipulates that students either complete one of the specific economic concentrations (Business Economics or Mathematical Economics) or develop a depth of knowledge in a minor or secondary major field outside of economics. The BS in Economics program provides excellent training for graduate school in economics.

The BS in Economics offers concentration choices in both Business Economics and Mathematical Economics.

**Business Economics Concentration**

This concentration prepares students to apply the rigorous methods of modern quantitative economics as professionals in a business context. This program combines coursework in economics and the functional fields of business administration within the context of a general scientific and humanities curriculum.

**Mathematical Economics Concentration**

This concentration prepares students for graduate study in quantitative and rigorous programs in economics and related fields. This program will also prepare students for professional work in quantitative economics or closely related areas, by providing coursework in economics and mathematics, in the context of a general scientific and humanities curriculum.

**Coordinate Field Option**

As an alternative to choosing one of these concentrations, students may also personalize their degree by developing a depth of knowledge in a minor or secondary major field outside of economics such as finance, social sciences, international studies or natural sciences. Examples of possible coordinating minors could include a minor in History and Politics for students interested in political economy or policy studies; a minor in American or European Studies for students interested in the economics of those countries, or a minor in Communication for students interested in economic journalism. In addition, students can complete a specialization in business economics or mathematical economics as an area of concentration.

**Minor in Economics**

The minor in Economics provides a solid background in the application of economic theory to markets. Students complete standard courses in micro- and macroeconomics that emphasize core training in economic decision making. Students also choose a course that applies this training to areas such as international economics, firm and industry behavior, quantitative economic analysis, and public policy. This type of analytical training provides a strong complement to many majors, including business fields, but would be especially useful for students interested in careers in public policy or law.

**Minor in International Economics**

The minor in International Economics is designed for students with varied backgrounds who have a particular interest in learning more about the international economic environment. The curriculum provides the students a basic understanding of economics and exposes them to advanced topics dealing with international trade, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

**Additional Information**

For more information about this major, contact the School of Economics. (http://www.lebow.drexel.edu/Faculty/Departments/Economics)

**Degree Requirements (BS)**

While a variety of options are available for study in coordinating fields, two specific concentrations have been developed to address key areas in economics.

- The business economics concentration
- The mathematical economics concentration

The requirements for those concentrations are listed beneath the general requirements for the BS in Economics program.

### General education requirements

</tbody>
</table>
Students selecting this concentration must have satisfied the general educational mathematics requirements by completing MATH 121 and MATH 122.

**Mathematical Economics Concentration**

Students selecting this concentration must have satisfied the general educational mathematics requirements by completing MATH 121 and MATH 122.

**Economics Electives**

Select 20.0 credits from any of the following:

- ECON 203 Survey of Economic Policy
- ECON 200 Economics of Small Business
- ECON 326 Economic Ideas [WI]
- ECON 330 Managerial Economics
- ECON 331 International Macroeconomics
- ECON 334 Public Finance
- ECON 336 Labor Economics
- ECON 338 Industrial Organization
- ECON 342 Economic Development
- ECON 344 Comparative Economic Systems
- ECON 348 Mathematical Economics
- ECON 351 Resource and Environmental Economics
- ECON T480 Special Topics in ECON
- ENVS 370 Practice of Environmental Economics
- FIN 301 Introduction to Finance
- FIN 325 Financial Institutions and Markets
- INTB 332 Multinational Corporations
- INTB 440 Seminar in International Business
- INTB 338 Regional Studies in Economic Policies and International Business
- SOC 240 Urban Sociology
- SOC 260 Classical Social Theory

**Additional Requirements**

- Coordinate Field 26.0
- Additional courses as required to satisfy a coordinating field (a second major, minor, or one of the two available concentrations below)
- Free electives 30.0

**Total Credits** 187.0

* Students pursuing the concentration in Mathematical Economics can select CS 171 instead of CS 143.

** Students who take the Mathematical Economics or Business Economics concentrations must complete the required concentration courses and free electives for a total of 56.0 credits.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students planning their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities
The study of economics prepares students for a variety of fields: research economists in banks, government and universities; law; economic development for local government, banks and firms; business management and consulting; government and international agencies, such as the CIA, World Bank, IMF and USAID; and business and economic journalism.

Career Paths and Degree Combinations
Economics provides an excellent foundation for many career options and can also be combined with many other majors and minors in preparing students for great careers.

For example:

Banking and Finance
- Economics and Finance
- Economics and Business
- Economics and Mathematics
- Business Economics Concentration
- Economics and Physics
Academia
• Economics and Anthropology
• Economics and Psychology
• Economics and Mathematics
• Economics and Philosophy

Economics Research in Industry
• Economics and Mathematics
• Mathematical Economics Concentration
• Economics and Marketing
• Economics and Finance

High Tech and IT Industries
• Economics and Information Systems
• Economics and Chemistry
• Economics and Biology

Economics Research in Governments and International Organizations
• Economics and Environmental Studies
• Economics and Political Science
• Economics and International Studies

Law School and Other Graduate School Options
• Economics and Legal Studies
• Economics and Philosophy
• Economics and Political Science
• Economics and International Studies

Opportunities
Recently, economics students have obtained positions at the following institutions:
• Federal Reserve Bank, Board of Governors
• Citibank
• Vanguard Corporation
• Deloitte Consulting
• Black Rock Inc.
• Tyco Electronics

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Economics
The minor in economics provides a solid background in the application of economic theory to markets. Students complete standard courses in micro- and macroeconomics that emphasize core training in economic decision making. Students also choose a course that applies this training to areas such as international economics, firm and industry behavior, quantitative economic analysis, and public policy. This type of analytical training provides a strong complement to many majors, including business fields, but would be especially useful for students interested in careers in public policy or law.

Requirements
• No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
• A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
• No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
• Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
• Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

**Total Credits**: 24.0

**Dual/Accelerated Degree**

**Dual Degree Bachelor’s Programs**

With careful planning, students can complete two full degrees in the time usually required to complete one. The double major option works best in closely related areas. For detailed information the student should contact his or her advisor.

**Degree Requirements BS ECON Dual Degree Bachelor of Science / Juris Doctor**

This program is a modified BS in Economics that allows students the ability to consider a BS/JD degree.

Conditional on successful admittance into Drexel's Kline School of Law (http://drexel.edu/law).

Due to the complex nature of this program students should work closely with their advisor when selecting courses.

**School of Economics Faculty**

Marco Airaudo, PhD (University of Pennsylvania Philadelphia). Associate Professor. Computational economics, international economics, macroeconomics and monetary economics.

Patricia Awerbuch, MBA (Drexel University). Assistant Clinical Professor. Performance of on-campus students in an online classroom designed for distance learners; business professors.

Richard Barnett, PhD (University of Minnesota). Clinical Professor. Economic theory, macroeconomics.

Sebastien Bradley, PhD (University of Michigan). Associate Professor. Public finance, international economics, applied econometrics, real estate.

Mian Dai, PhD (Northwestern University). Associate Professor. Managerial economics and strategy, applied econometrics, industrial organization.

Pia DiGirolamo, PhD (Purdue University). Assistant Clinical Professor. Macroeconomics, international finance.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Teresa D. Harrison, PhD (University of Texas Austin) Associate Dean for Academic Affairs and Innovation, Academic Director of the Center for Nonprofit Governance. Associate Professor. Econometrics, public finance,
industrial organization, empirical microeconomics including health and nonprofit organizations.

Paul E. Jensen, PhD (Penn State University) Dean, LeBow College of Business. Associate Professor. International trade. Primary research interest is international trade, particularly in empirical studies of international trade patterns.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Stephen Joyce, MA (Temple University). Assistant Clinical Professor. Education and human capital.

André Kurmann, PhD (University of Virginia). Associate Professor. Computational economics, financial economics, labor economics, macroeconomics and monetary economics.

Christopher A. Laincz, PhD (Duke University) Director, LeBow College of Business PhD program. Associate Professor. Economic development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Vibhas Madan, PhD (Michigan State University) Senior Associate Dean, Academic Programs. Professor. International trade theory, applied microeconomics.

Roger A. McCain, PhD (Louisiana State University). Professor. Computational economics, game theory.

Bruce D. McCullough, PhD (University of Texas Austin). Professor. Applied Econometrics, Data Mining, Econometric Techniques, Reliability of Statistical and Econometric Software.

Marta Murtazashvili, PhD (Michigan State University) Assistant Professor. Applied econometrics.

Maria Olivero, PhD (Duke University). Associate Professor. Macroeconomics, international finance.

Eydis Olsen, MA (American University). Associate Clinical Professor. Macroeconomics, political economy.

Tristan Potter, PhD (Boston College). Assistant Professor. Macroeconomics, labor economics, search theory.

Konstantinos Serfes, PhD (University of Illinois at Champaign-Urbana). Professor. Industrial organization, microeconomics, game theory.

Ricardo Serrano-Padial, PhD (University of California at San Diego). Assistant Professor. Microeconomics theory, information economics with applications in finance, macroeconomics and industrial organization.

Mark Stehr, PhD (University of California at Berkeley) Interim Director, School of Economics. Associate Professor. Health economics, health behaviors, public finance, public policy.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

Emeritus Faculty

Edward C. Koziara, PhD (University of Wisconsin). Professor Emeritus. Applied micro and macro economics.

Bijou Yang Lester, PhD (University of Pennsylvania). Professor Emeritus. Behavioral characteristics of shopping on-line, economic issues of electronic commerce, contingent employment and part-time work, the economy and suicide.

Andrew G. Verzilli, PhD (Boston College). Professor Emeritus. Teaching effectiveness in economics; economics and financial history.

Chiou-shuang Yan, PhD (Purdue University). Professor Emeritus. International economics, input-output analysis.

International Business

Major: International Business

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The international business major explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

International business focuses on business activities that cross national borders. The plan of study explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

This major allows students to choose from a menu of courses. The curriculum is interdisciplinary, with courses drawn from across business disciplines and anthropology. Specialized operational courses are offered, along with more general theoretical and comparative ones.

For more information about this program, contact the School of Economics (http://www.lebow.drexel.edu/academics/disciplines/economics).

Degree Requirements

Students completing the major in international business are required to complete six courses in the same language (a language other than the student's native language) at Drexel University. It is recommended that students also take a 320 or 420 language course, focusing on the language of business or professions. This requires a minimum of 6 language courses (24.0 credits) at the college level or up to level 6 placement, including proficiency in at least one language. Some of these courses may count toward the student's general education electives.

Students may satisfy the language requirement through foreign language course replacement by studying overseas. All study abroad programs
must be approved by the Study Abroad Office (http://www.drexel.edu/studyabroad).

Bachelor of Science in Business Administration (BSBA) Degree Requirements

General Education Requirements
CIVC 101 Introduction to Civic Engagement 1.0
COM 270 [WI] Business Communication 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
MATH 101 Introduction to Analysis I 4.0
MATH 102 Introduction to Analysis II 4.0
PHIL 105 Critical Reasoning 3.0
PSY 101 General Psychology I 3.0
UNIV B101 The Drexel Experience 1.0
UNIV B201 Career Management 1.0
English literature elective ENGL 200 through ENGL 399 3.0
Fine Arts elective 3.0
History (HIST) elective 4.0

Select two of the following: 6.0
BIO 100 Applied Cells, Genetics & Physiology
or BIO 101 Applied Biological Diversity, Ecology & Evolution
CHEM 151 Applied Chemistry
PHYS 151 Applied Physics

General Education Electives

Students select seven (21.0 credits) general education electives, with a minimum of one course in each of the following three categories. Students take the remaining 12.0 credits from any of the topics listed under Additional General Education Electives.

- Society and Culture
- Communication, English, Fine Arts, Global Studies, Language or Philosophy
- Social Science
- Anthropology, History, Sociology, Political Science, Psychology
- Science
- Computer Science, Information Systems, Science

Additional General Education Electives

Twelve (12.0) credits must be earned by taking 4 courses from the following topics: Communication, English, Fine Arts, Global Studies, Language, Philosophy, Anthropology, History, Sociology, Political Science, Psychology, Computer Science, Information Systems, Math, Science

Business Requirements

ACCT 115 Financial Accounting Foundations 4.0
ACCT 116 Managerial Accounting Foundations 4.0
BLAW 201 Business Law I 4.0
BUSN 101 Foundations of Business I (Online students take BUSN 111) 4.0
BUSN 102 Foundations of Business II (Online students take BUSN 112) 4.0
ECON 201 Principles of Microeconomics 4.0
ECON 202 Principles of Macroeconomics 4.0
FIN 301 Introduction to Finance 4.0
INTB 200 International Business 4.0
MGMT 450 Strategy and Competitive Advantage 4.0
MIS 200 Management Information Systems 4.0
MKTG 201 Introduction to Marketing Management 4.0
OPM 200 Operations Management 4.0
ORGB 300 [WI] Organizational Behavior 4.0
STAT 201 Introduction to Business Statistics 4.0

Select one of the following: 4.0
MGMT 260 Introduction to Entrepreneurship
MGMT 370 Business Consulting
MGMT 371 Business Consulting for Nonprofits
MGMT 451 Management Simulation

## Co-op/Career Opportunities

International business graduates are employed in a variety of corporate settings, including the pharmaceutical, banking and telecommunication industries. Some students pursue graduate studies or find employment in multilateral governmental organizations.

The concentration has been designed to provide a competitive advantage for those students interested in international business careers. In addition to business coursework, students also take advantage of Drexel’s programs in history-politics, sociology, anthropology, and other areas that focus on international topics.

The University offers minors in Arabic (p. 314), Chinese (p. 315), French (p. 316), German (p. 316), Italian Studies (p. 317), Japanese (p. 317), Korean (p. 317), Russian ([http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/russianminor](http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/russianminor)), and Spanish (p. 319). Each minor can include study of the vocabulary needed for business transactions within the particular language.

Proficiency certificates are also available to students at the intermediate level as proof that students are proficient enough to live abroad and interact with native speakers in their home countries and cultures. Proficiency certificates are available in Arabic (p. 305), Chinese (p. 306), French (p. 306), German (p. 306), Hebrew (p. 306), Italian (p. 307), Japanese, (p. 307) Korean, (p. 307) Russian, ([http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/intermediaterussianproficiencycertificate](http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/intermediaterussianproficiencycertificate)) and Spanish (p. 307).

Visit the Drexel Steinbright Career Development Center ([http://www.drexel.edu/scdc/career-services/counseling/career-guides](http://www.drexel.edu/scdc/career-services/counseling/career-guides)) page for more detailed information on co-op and post-graduate opportunities. Also visit the Career Guides ([http://drexel.edu/scdc/career-services/counseling/career-guides](http://drexel.edu/scdc/career-services/counseling/career-guides)) provided by the Steinbright Career Development Center.

## Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage ([http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall](http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall)) to learn more about Gerri C. LeBow Hall.

## International Business Faculty

Murugan Anandarajan, PhD ([Drexel University] Department Chair, Management; Department Head, Decision Sciences and MIS. Professor. Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Rolph E. Anderson, PhD ([University of Florida] Sr. Professor of Marketing. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.
Trina Larsen Andras, PhD (University of Texas at Austin) Head of the Department of Marketing; Academic Director, Center for Corporate Research Management. Professor. International marketing, marketing channels management, cross-cultural communication.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS); Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

David Gefen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRP II, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Yanliu Huang, PhD (The Wharton School, University of Pennsylvania). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Daniel Korschun, PhD (Boston University). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Hyokjin Kwak, PhD (University of Georgia) Department of Marketing. Professor. Advertising effects, consumer behaviors and e-commerce.

Dali Ma, PhD (University of Chicago). Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Vibhas Madan, PhD (Michigan State University) Senior Associate Dean, Academic Programs. Professor. International trade theory, applied microeconomics.

Maria Olivero, PhD (Duke University). Associate Professor. Macroeconomics, international finance.

Stanley Ridgley, PhD (Duke University). Assistant Clinical Professor. Business communication; Cognition and strategy; Competitive intelligence; Determinants of Firm Performance; Global Management; New Markets in Emerging Countries; Russian Business Culture.

Bert Rosenbloom, PhD (Temple University) Rauth Chair of Electronic Commerce. Professor. Marketing channels and distribution systems, electronic commerce, inter-organizational marketing management, wholesale and retail distribution, marketing strategy and planning.

Samir Shah, DPS (Pace University). Associate Clinical Professor. Drexel University’s Provost Fellow India Partnerships

Srinivasan Swaminathan, PhD (University of Texas-Austin). Professor. Marketing research and strategy, pricing and promotions, loyalty and satisfaction.

Constantinos Syropoulos, PhD (Yale University) Trustee Professor of International Economics. Professor. International trade, political economy, applied microeconomics.

Yoto Yotov, PhD (Boston College). Associate Professor. International trade, applied microeconomics, political economy.

International Business Co-Major

Major: International Business

Degree Awarded: Bachelor of Science in Business Administration (BSBA)

Calendar Type: Quarter

Total Credit Hours: 184.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 52.1101

Standard Occupational Classification (SOC) code: 11-1021

About the Program

The International Business Co-Major explores the international business environment as well as the internal workings of international corporations and the impact of international considerations on the various functional areas of business.

The International Business Co-Major allows students to choose from a menu of courses. The curriculum is interdisciplinary, with courses drawn from across business disciplines and anthropology. Specialized operational courses are offered, along with more general theoretical and comparative ones. The co-major option substitutes further training in a relevant business discipline or functional field in the form of a Primary Major instead of the language courses.

**Primary Major Courses**

Students completing the International Business co-major (requirements listed below) must do so in conjunction with a primary business major. Students must select a primary major from the following list (Accounting, Entrepreneurship, Finance, Legal Studies, Management Information Systems, Marketing, or Operations & Supply Chain Management.)

**International Business Co-Major Requirements**

The International Business Major offers two options: Option (A), which includes study for competency in a language other than English (and other than the student's native language). For more information, please see the International Business (Stand-Alone Option) listed under Majors. Option (B) is the Co-Major option highlighted below. The co-major option substitutes further training in a relevant business discipline or functional field in the form of a Primary Major instead of the language courses.

Cyber crime, strategic management of information technology, unstructured data mining, individual internet usage behavior (specifically abuse and addiction), application of artificial intelligence techniques in forensic accounting and ophthalmology.

Rolph E. Anderson, PhD (University of Florida) Royal H. Gibson Sr. Professor of Marketing. Professor. Personal selling and sales management; multivariate data analysis; customer relationship management (CRM); customer satisfaction and customer loyalty.

Trina Larsen Andras, PhD (University of Texas at Austin) Head of the Department of Marketing; Academic Director, Center for Corporate Research Management. Professor. International marketing, marketing channels management, cross-cultural communication.

Orakwue B. Arinze, PhD (London School of Economics). Professor. Client/Server computing; Enterprise Application Software (EAS)/Enterprise Resource Planning Software (ERP); knowledge-based and decision support applications in operations management.

David Gelen, PhD (Georgia State University) Provost Distinguished Research Professor. Professor. Strategic IT management; IT development and implementation management; research methodology; managing the adoption of large IT systems, such as MRPII, ERP, and expert systems; research methodology, eCommerce; Online Auctions; Outsourcing; SAS; Technology Adoption.

Shawkat M. Hammoudeh, PhD (University of Kansas). Professor. Applied econometrics, financial economics, international economics, and natural resource economics.

Yanliu Huang, PhD (The Wharton School, University of Pennsylvania). Associate Professor. Consumer n-store decision making, consumer planning, health marketing, memory and learning.

Bang Nam Jeon, PhD (Indiana University) Department of Economics and International Business. Professor. Financial economics, world financial market linkages, foreign direct investment flows in the Asia-Pacific economies, the Korean economy: currency crisis, FDI, and macroeconomic issues, regional economic integration and newly industrializing economies: the

Daniel Korschun, PhD (Boston University). Associate Professor. Brand and corporate reputation management, corporate social responsibility, internal marketing, marketing strategy, relationship marketing.

Hyokjin Kwak, PhD (University of Georgia) Department of Marketing. Professor. Advertising effects, consumer behaviors and e-commerce.

Dali Ma, PhD (University of Chicago). Associate Professor. Social hierarchy; Social networks; Sociology of entrepreneurship; Sociology of transitional China

Vibhas Madan, PhD (Michigan State University) Senior Associate Dean, Academic Programs. Professor. International trade theory, applied microeconomics.

Facilities

In fall 2013, LeBow College opened its 12-story, Gerri C. LeBow Hall, with a finance trading lab, behavioral studies lab and integrated teaching technology in all classrooms. The new building features two lecture halls, 15 classrooms of varying sizes and seating configurations, including case study rooms and cluster classrooms designed to facilitate group work. Other amenities consist of extensive areas of student spaces, including 12 collaboration rooms, two quiet study areas, and 3,500 square feet of student lounges. Gerri C. LeBow Hall brings together faculty, students and staff, in a state of the art building on the University City campus. Please visit the LeBow College of Business webpage (http://www.lebow.drexel.edu/about/campuses/philadelphia/location/gerri-c-lebow-hall) to learn more about Gerri C. LeBow Hall.

International Business Faculty

Murugan Anandarajan, PhD (Drexel University) Department Chair, Management; Department Head, Decision Sciences and MIS. Professor.
Minor in International Economics

This minor is designed for students with varied backgrounds who have a particular interest in learning more about the international economic environment. The curriculum provides the students a basic understanding of economics and exposes them to advanced topics dealing with international trade, multinational corporations, and other aspects of international economics. The minor complements a variety of degrees, particularly for students interested in applying their major discipline within an international context or within a multinational corporation.

Requirements

- No more than 2 courses or 8.0 credits required by a student’s major may be counted towards this minor.
- A grade of “C” (2.0) or better must be earned for each course in this minor for it to be counted.
- No more than two transfer courses may be used to complete this minor. Transfer credits must be taken before matriculated at Drexel.
- Students should check the pre-requisites of all classes when selecting electives. It is the responsibility of the student to know pre-requisites.
- Cannot do a major and a minor in the same field of study.

All prospective students should meet with an advisor from the College as soon as possible. Call 215.895.2110 to set up an appointment.

The Antoinette Westphal College of Media Arts & Design

The Antoinette Westphal College of Media Arts & Design curricula include general studies in liberal arts and science, and experiential learning in studio, lab, and classroom settings within the disciplines.

Mission Statement

The Antoinette Westphal College of Media Arts & Design (http://www.drexel.edu/westphal) (The Westphal College) is a community of learning in the areas of media, design, fine arts, performing arts, and the management of creative enterprise that values experiential and immersive education. Students are encouraged to give form to ideas by learning to recognize invention and innovation in a rapidly changing world through creative, critical, and collaborative approaches. The Westphal College’s diverse programs seek to foster innovation and leadership in progressively interconnected disciplines and areas of study.

The academic programs are rigorous, and provide the appropriate balance of a solid foundation with individual creative direction, cultural awareness, strong technical skills, and an understanding of management and professional practice. The College is committed to continual review of curricula, processes and outcomes to make those improvements and refinements necessary to further enrich our students’ education, and to continue to foster independent thinkers, astute leaders, and creative problem solvers.

Majors

- Animation & Visual Effects (BS) (p. 124)
- Architecture (BArch) (p. 127)
- Art History (BA, BS) (p. 134)
- Dance (BS) (p. 143)
- Design & Merchandising (BS) (p. 147)
- Entertainment (p. 151) & (p. 151) Arts Management (BS) (p. 151)
- Fashion Design (BS) (p. 161)
- Film & Video (BS) (p. 165)
- Game Design & Production (BS) (p. 170)
- Graphic Design (BS) (p. 172)
- Interactive Digital Media (BS) (p. 175)
• Interior Design (BS) (p. 179)
• Music Industry (BS) (p. 180)
• Photography (BS) (p. 192)
• Product Design (BS) (p. 195)
• Screenwriting & Playwriting (BS) (p. 198)
• TV Production & Media Management (BS) (p. 202)
• Westphal Studies Program (BS) (p. 204)

Minors
• Animation & Visual Effects (p. 126)
• Architecture (p. 133)
• Art History (p. 134)
• Dance (p. 146)
• Digital Media (p. 183)
• NEW: Entertainment & Arts Management
• Film Studies (p. 168)
• Fine Arts (p. 183)
• NEW: Immersive Media
• Interactive Digital Media (p. 177)
• Interdisciplinary Smart Initiatives (p. 183)
• Jazz and African-American Music (p. 184)
• Music (p. 184)
• Music Performance (p. 184)
• Music Theory and Composition (p. 192)
• Performing Arts (p. 184)
• Photography (p. 194)
• Product Design (p. 197)
• Retail (p. 185)
• Screenwriting (p. 197)
• Somatics (p. 185)
• Sports Media Production (p. 185)
• Sustainability in the Built Environment (p. 186)
• Television Industry and Enterprise (p. 186)
• TV Production & Media Management (p. 187)
• Theatre (p. 187)
• Video Production (p. 169)

Certificates
• Dance Studies (p. 146)

Undergraduate Co-operative Education
Westphal College students spend a minimum of six months (two terms) applying classroom and studio skills in positions within their chosen professions. Often referred to as "The Ultimate Internship," a co-op is a valuable, direct way to learn about a career, work with other professionals, and gain skills and experience that set Drexel graduates apart from students who complete their professional education in more traditional academic settings.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Special Programs
The Westphal College offers a number of special programs including Study Abroad, Accelerated Dual Degree, Accelerated Summer Courses, Enrichment Programs and Dance for Professionals.

Study Abroad
Many students in the College participate in study abroad ranging from ten days to two terms. Some of the more popular programs are: Drexel in London, Fashion in London, Australia, Rome, France, Prague, Japan and Cuba. Students interested in study abroad should consult with their Program Director, Academic Advisor and the Study Abroad Office, 215-895-1704.

Enrichment Programs
The Department of Architecture & Interiors runs summer study tours abroad to Rome and Paris as elective course offerings in history and theory. These programs focus the travel portion into three-week periods to accommodate student work commitments.

Accelerated Dual Degree Programs
Dual degree programs enable academically qualified students to earn both a bachelor’s and an advanced degree in five years.

The following Accelerated Degree Programs are available to qualified High School students entering their freshman year in the Westphal College:

• BS Music Industry/MBA: This program offers the highly motivated and musically focused student an opportunity to combine music theory and technology with the MBA degree. The program is available to qualified Music Industry majors.

• BS Entertainment & Arts Management/MBA: This program allows high-achieving students preparing for leadership roles in media companies and arts organizations the opportunity to earn their MBA degree. The program is available to qualified Entertainment & Arts management majors.

• BS in Design & Merchandising/MBA: This program combines study in the area of fashion retail merchandising with the MBA degree. The program is available to qualified Design and Merchandising majors.

The following Accelerated Degree Programs are available to qualified matriculated students in the Westphal College:

• BA Art History/MS in Arts Administration: This five-year program is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading and writing. Specialized University resources, such as the Leonard Pearlstein Gallery (http://www.drexel.edu/pearlsteingallery), the Drexel Collection (http://drexel.edu/DrexelCollection/about/galleries), and the Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) are available to directly support the student’s studies.

• BA Art History/MS in Museum Leadership: This five-year program is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading and writing, or gain competencies in various applied or technical areas. Specialized University resources, such as the Leonard Pearlstein Gallery (http://www.drexel.edu/pearlsteingallery),
the Drexel Collection (http://www.drexel.edu/DrexelCollection),
The Academy of Natural Sciences of Drexel University (http://www.ansp.org/visit/exhibits), and the Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) are available to students wishing to pursue careers in Museum work.

- **BS/MS in Digital Media Programs:** This program allows highly motivated students to complete both the BS (Animation & Visual Effects, Game Design & Production, Interactive Digital Media) and MS degrees in Digital Media programs in five years.

- **BS Interior Design/MS in Interior Architecture & Design:** This program combines the Interior Design undergraduate and the graduate Interior Architecture & Design degrees in an intensive five-year program that provides an opportunity for the student to focus on an area of specialization.

- **BS Dance/MS in Elementary Education:** This career focus, dance in education, prepares students for jobs as elementary school teachers (grades Pre-Kindergarten through 4) who may also serve as school dance specialists. Students choosing this option will earn a BS degree in Dance through the Department of Performing Arts and may elect to continue for a fifth year of study to earn an MS in the Teaching, Learning and Curriculum-Teacher Certification through the School of Education.

- **BS Entertainment & Arts Management/MS in Arts Administration:** While not an accelerated program, students who complete the EAM program may also choose to pursue a graduate degree at Drexel in Arts Administration. Students who apply for the graduate Arts Administration program and graduate with a 3.5 GPA in the last two years of the EAM degree program are automatically accepted into the program.

### Accelerated Summer Courses

With departmental permission, students may enroll in Visual Studies accelerated courses over the summer. These typically include courses in Accelerated Design I, II, III, Introductory Drawing and Figure Drawing I. These courses primarily are offered so that new undergraduate transfer students and pre-graduate students can complete their future programs in an economical time frame. Students with some experience in studio coursework may be eligible to take accelerated courses. A portfolio review is required to determine eligibility.

### Dance Part Time Professionals

The Part Time Professional Option of the Dance Major is designed for professional dancers interested in pursuing a BS degree in Dance while continuing their performance careers, or at the conclusion of their performing careers. This program grants “professional life experience” credits and an extended period of time to fulfill the remaining required courses.

### Ensembles

#### Choral Ensembles

- **University Chorus (MUSC 101/001)** Dr. Steven Powell, Director
  A select group of 18 singers chosen by audition from the University Chorus. They perform secular music from the Renaissance period (Madrigals).

- **Chamber Singers (MUSC 102/001)** Dr. Steven Powell, Director
  A small combo utilizing a rhythm section and any varying combination of saxes and brass. The repertoire includes music of the styles of jazz, Latin, funk, and rock.

- **Concert Band (MUSC 105/001)** Dr. Wesley Broadnax, Director
  Students who are proficient on woodwind, brass, or percussion instruments may become members of this large instrumental ensemble by auditioning for the director. Membership is based on the student’s ability and the instrumental needs of the ensemble.

- **Jazz Orchestra (MUSC 107/001)** Dr. George Starks, Director
  Performs music which is associated with and/or inspired by acknowledged masters of the jazz tradition such as Duke Ellington, Count Basie, Charlie Parker, Dizzy Gillespie, Miles Davis, Charles Mingus, Thad Jones, and others.

- **The Jazztet (MUSC 108/001)** Dr. George Starks, Director
  This ensemble performs small group masterpieces such as literature associated with Art Blakey, Horace Silver, Clifford Brown, John Coltrane, and others.

- **University Orchestra (MUSC 109/001)**
  This is a full orchestra that performs concert repertoire of various periods from the 18th century to the present day. Wind, brass, and percussionists must be in the Concert Band in order to participate.

- **Fusion Band (MUSC 112/001)** Lynn Riley, Director
  A small combo utilizing a rhythm section and any varying combination of saxes and brass. The repertoire includes music of the styles of jazz, Latin, funk, and rock.

- **Percussion Ensemble (MUSC 113/001)** Mark Beecher, Director
  Students in this group will have the opportunity to play, improve and perform on many instruments of the percussion family including: snare drum, bass drum, xylophone, marimba, timpani- and even hands and feet.

- **Mediterranean Ensemble (MUSC 114/001)** Bruce Kaminsky, Director
  Students perform traditional music from Southeastern Europe, the Middle East and Northern Africa. All traditional and Western instruments are welcomed including oud, bouzouki and saz along with guitar, violin and sax. Percussionists can play Drexel’s wide assortment of traditional drums including doumbek, req and djimbe. Students will have the opportunity to perform 7/8 and 9/8 rhythms from Greece, 10/8 rhythms from Turkey, learn songs in Greek, Turkish, Arabic and Hebrew. The ensemble also has a dance component.

- **Guitar Ensemble II (MUSC 106/002)** Greg Wright, Director
  A select group of 16 singers chosen by audition from the University Chorus. They perform “anything that swings,” doing a variety of pieces from the 20’s to the 10’s with a three-piece back-up band.

- **Gospel Choir (MUSC 115/001)** Rev. Greg Ross, Director
  The Gospel Choir is a group of approximately 60 singers that is open to all Drexel Students. This ensemble performs contemporary gospel music with its own backup band.
An auditioned group of approximately ten guitarists plus bass players and a drummer. Repertoire includes a side range of styles utilizing music reading ability and improvisation skills

*Guitar Ensemble I (MUSC 106/001) Greg Wright, Director*

An un-auditioned group of ten to fifteen guitarists who use repertoire to sharpen their musical and technical skills.

*Keyboard Ensemble (MUSC 110) Wanda Canfield, Director*

A group of twelve keyboardists who utilize acoustic and electronic pianos to play a variety of repertoire.

*Rock Ensemble (MUSC 117) Lynn Riley, Director*

A small combo of vocalists, guitarists, bassists, keyboardist, and drummers who perform repertoire ranging from classic rock to alternative.

---

**Drexel University Dance Program**

**Dr. Miriam Giguere, Director, Dance Ensemble (DANC 131)**

Elegant, exciting, sophisticated, sleek are all words commonly used to describe the Drexel Dance Ensemble. Performing ballet, jazz, tap and modern dance, the Drexel Dancers are both versatile and original.

*The Drexel Dance Ensemble (DANC 131)*

A professional caliber dance company presenting two fully-produced concerts in the Mandell Theater each year. Students participating in the 60 member ensemble are given the opportunity to explore their artistry through working with professional choreographers, both faculty and guests artists, as well as a selection of student choreographers. The diversity of choreographic talent promises a show with dimension and unique perspectives on contemporary and classical dance forms. Entrance into this company is open to any dancers beyond their freshman year by audition twice yearly.

*The FreshDance Ensemble (DANC 131)*

Dance company open exclusively to freshmen at Drexel. The 30 dancers in the ensemble perform two fully produced concerts at the Mandell Theater each year. Works by both professional and student choreographers are performed in a variety of genres including ballet, modern, jazz and hip-hop. Entrance into the company is open twice yearly by audition.

*The Youth Performance Exchange Touring Ensemble (DANC 131)*

This 8-10 member dance troupe performs assembly style lecture demonstration programs introducing student K-8 to the art of dance. Students learn the program each fall and perform for 15-20 elementary and middle school each Friday morning in winter and spring terms. Open by audition each fall term.

---

**Drexel University Theatre Program**

**Mr. Nick Anselmo, Director of Theatre Programs**

*Introduction to Theater Production Practicum (THTR 130)*

An introduction to the tools, basic skills and safety procedures that students must know in order to work on Theater Program shows.

*Theatre Performance Practicum (THTR 131)*

Students perform in Mainstage productions in the URBN Annex Black Box Theater or the Mandell Theater. An audition is required to participate in this ensemble.

*Theatre Production Practicum (THTR 132)*

Students serve as the stage crew for all theatrical productions at the URBN Annex Black Box Theater or the Mandell Theater and build all the sets, costumes, hang lights and run sound for all the shows.

*Theatre Management Practicum (THTR 133)*

Students work as stage managers, production managers, and in administrative positions of Drexel's Co-op Theater Company.

*Open Mic Management Practicum (THTR 134)*

Students manage and run all aspects of The Late Night Series, a free weekly open mic that strives to both champion and nurture performing artists with Philadelphia and the Drexel community.

*Theatre Performance Ensemble (THTR 141)*

The Theatre Performance Ensemble focuses on a specific area of performance training, creation, and research to supplement the standard theatre curriculum in performance.

*Director's Lab Practicum (THTR 142)*

Practical experience in acting for the stage through participation in a student directed one-act play in conjunction with the Play Directing Class. An audition is required to participate in this ensemble.

*Musical Theatre Cabaret (THTR 143)*

Practical experience preparing a song for performance with an emphasis on applying acting techniques to the delivery, it concludes with a public Cabaret performance.

*New Works Festival Performance Practicum (THTR 144)*

Practical experience in acting and dramaturgy for the stage through participation, development, and performance of student written plays in conjunction with the Page-to-Stage class.

Students participate in all aspects of theatre performance and production, including; acting, directing, design, costumes, lighting, sets, sound, publicity, and box office.

---

**Facilities**

Designed to be an incubator for tomorrow's creative leaders, The URBN Center is the award-winning home for many of the programs in the Antoinette Westphal College of Media Arts & Design, providing students with rigorous, studio intensive instruction and the latest technological resources. Majors that share this space include Animation & Visual Effects, Architecture, Design & Merchandising, Entertainment & Arts Management, Fashion Design, Game Design & Production, Graphic Design, Interactive Digital Media, Interior Design, Music Industry and Product Design.

The URBN Center also provides a black box theater (http://drexel.edu/performingarts/about/facilities/URBN-center-black-box-theater) for our Theatre program, a 3,500 square foot Leonard Pearlstein Gallery (http://www.drexel.edu/pearlesteingallery), two MIDI labs (http://drexel.edu/westphal/academics/undergraduate/MIP/Facilities) and MAD Dragon Records Suite, a Motion Capture studio, a Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) featuring Universal Laser Cutters and 3D printing and prototyping, the Robert and Penny Fox (http://www.drexel.edu/foxcollection) Historic Costume Collection (http://www.drexel.edu/foxcollection), the Charles Evans Fashion Design Library, a multi-use screening & lecture room, and offices for the College’s administrative functions.

The Paul Peck Problem Solving & Research Building is home to our Photography major and Department of Art & Art History. Within this
Animation and Visual Effects

Major: Animation and Visual Effects
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 10.0304
Standard Occupational Classification (SOC) code: 27-1014

About the Program

The Animation & Visual Effects major provides students with the artistic, technological, story-telling and design skills to succeed as animators and visual effects artists in the highly competitive entertainment, design and communications industries.

Animation and Visual Effects has grown beyond its traditional applications in entertainment, such as feature films, television and internet based programming. Today, these production techniques are widely used in feature films, medical research, engineering, virtual reality and augmented reality systems, immersive media, web content, the performing arts, interactive game systems, corporate communications and higher education. The depth and complexity of this field necessitates a rigorous course of study.

To best prepare students for the demands of careers in these cutting-edge disciplines, this program provides a foundational understanding of design and technology, with core courses in multiple aspects of digital media, completing a six month co-op and delving into rigorous coursework covering specialized aspects of digital animation, visual effects and immersive media. Students will learn the underlying principles of animation, along with advanced, industry-standard software and hardware technologies. The entire creative pipeline from storyboarding through modeling and animation is covered in depth, allowing students to experience all aspects of production.

Additional Information

To find out more about this major, visit the Westphal College’s Animation & Visual Effects Major web page.

- ANIM 248 Advanced Lighting
Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Total Credits: 186.0
Facilities

Our facilities include more than 100 triple-boot MacPro and Boxx Technology workstations, a 16 camera Vicon motion capture studio, green screen room, a 2-ton motion platform theme park ride, FTIR multitouch displays, laser scanner, stereoscopic projector, eye tracker, fNIR and EEG brain interfaces, and 3D theater, recording studios, etc. Students use professional software including Unreal, Unity3D, Maya, 3D Studio Max, Houdini, Massive, etc.

More information can be found at Drexel RePlay Lab’s Facilities (http://replay.drexel.edu/facilities.html) page.

Animation and Visual Effects Faculty

Theo Arzt. BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

John Berton Assistant Professor. Visual effects, lighting and rendering Computer-Generated Imagery (CGI)

Milady S. Bridges, BA (Rutgers University). Assistant Teaching Professor. Animation principles, modeling, rigging, enveloping, particle simulations, lighting, composting, and editing.

Graham D. Clark, MFA (Academy of Art University). Assistant Teaching Professor. Animation and visual effects, stereography.

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Nick Jushchyshyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects, VR/Immersive Media. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (Carnegie Mellon University). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Tyler School of Art, Temple University) Program Director, Game Design & Production. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Tony Rowe, AA (Institute of Computer Technology). Assistant Teaching Professor. Veteran AAA Game Designer, mentor at Drexel’s Entrepreneurial Game Studio. Game history, writing, and level design.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (Vienna University of Technology) Department Head, Digital Media. Professor. Production management, educational use of video games.

Jichen Zhu, PhD (Georgia Institute of Technology). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-
based cultural artifacts; interactive storytelling, games and software studies.

Architecture

Major: Architecture
Degree Awarded: Bachelor of Architecture Degree (BArch)
Calendar Type: Quarter
Total Credit Hours: 227.0
Classification of Instructional Programs (CIP) code: 04.0201
Standard Occupational Classification (SOC) code: 17-1011

About the Program

The practice of architecture requires a unique skill set—creative thinking and aesthetic sensitivity balanced with technical knowledge, cultural understanding, and social responsibility. Critical thinking and communication skills are needed. Drexel’s Bachelor of Architecture program encompasses foundation courses in the applied and social sciences, the humanities, and a wide range of professional architecture courses to prepare students for careers in architecture and related fields. At the heart of the curriculum are the design studios where students are challenged to apply their knowledge acquired from the above disciplines to consequential design problems.

Drexel’s work/study program is an experiential-based learning model that complements and provides an alternative to traditional full-time academic architecture programs. The Drexel model provides a practical, high-quality education to those students who seek early exposure to daily architectural practice as well as an affordable alternative to students who could not otherwise be able to enter the profession.

At Drexel there are two paths to an accredited Bachelor of Architecture degree, serving two distinct populations: the 2+4 option and the part-time evening option.

The Architecture Program’s advising guidelines (http://www.drexel.edu/westphal/undergraduate/ARCH/Curriculum/#c3) include scheduling guidelines, studio advancement requirements, and general studio policies.

Accreditation

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (http://www.naab.org) (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Drexel University, Antoinette Westphal College of Media Arts & Design, Department of Architecture + Interiors offers the following NAAB-accredited degree program(s):

2+4 Option: 6 year program (2 years full-time, 4 years part-time) Bachelor of Architecture

Part-Time Evening Option: 7 year part-time program Bachelor of Architecture

Next accreditation visit for both tracks: 2018

About the 2+4 Option

The 2+4 option is an accelerated route designed for a small class of well-prepared students entering directly from high school. In this program, two years of full-time coursework address the basic principles of architectural design and satisfy fundamental University core requirements in the arts and sciences as well as those job-related skills that are needed for entry-level professional positions. A comprehensive review of performance will take place after each year to ensure that students are making sufficient progress in all areas. After successfully completing the minimum requirements of the full-time phase, students find full-time employment in the building industry, including architecture firms, while continuing their academic program part-time in the evening for four additional years.

About the Part-time Evening Program

The part-time evening option is one of only two part-time evening architectural programs in the United States, leading to an accredited Bachelor of Architecture degree. Designed for non-traditional and transfer students, this program offers all courses part-time in the evening, enabling students to work full-time. The evening program sequence is seven years, but transfer students with university-level design credits can reduce its length by meeting specific program requirements through transcript and portfolio review.

By combining work and study, all Drexel Architecture students may be able to simultaneously satisfy their required internship for licensure, now called the Architectural Experience Program (AXP) while completing their professional degree, thus qualifying for the registration exam on graduation in most jurisdictions.

Additional Information

For more information, visit the Architecture Program (http://www.drexel.edu/westphal/academics/undergraduate/ARCH) website. For advising and transfer information please review the Architecture Program’s curriculum (http://www.drexel.edu/westphal/academics/undergraduate/ARCH/Curriculum) page.

In August of 2015, Drexel was approved by the National Council of Architectural Registration Boards (NCARB) (http://www.ncarb.org) for participation in the Integrated Path to Architectural Licensure (IPAL) (https://www.ncarb.org/gain-apx-experience) Program. Students seeking access to this track will be reviewed by the Program Director and Faculty starting in the Spring of 2017.

Note: Architecture vs Architectural Engineering

Because Drexel University offers two programs with "architecture" in their titles, it is useful to point out the significant differences between them:

- Architects design buildings to meet people's spatial, organizational, and aesthetic needs; they also coordinate the building design process. All states, the District of Columbia, and three U.S. territories (Guam, Puerto Rico, and the U.S. Virgin Islands) require individuals to be licensed (registered) before they may call themselves architects.
or contract to provide architectural services. Many architecture school graduates work in the field even though they are not licensed or while they are in the process of becoming licensed. But they may not call themselves an architect. A licensed architect is required to take legal responsibility for all work. Licensure requirements usually include:

- A professional degree in architecture;
- A period of practical training or internship; and
- Passage of all divisions of the Architect Registration Examination (ARE).

- **Architectural engineers** specialize in the design of engineering systems within buildings. Architectural engineers learn Bachelor of Science degrees and become professional engineers with the required experience and state examinations. Students whose interests are focused on the technological and engineering aspects of buildings should review Drexel's major in Architectural Engineering (p. 346) offered by the College of Engineering.

**Total Credit: 227.0**
Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Sample Plan of Study (Part-time Evening Option)

This curriculum format is adjustable to each student's academic situation. Transfer credit evaluation, prior architectural experience, and other considerations may restructure the student's yearly program schedule.

* Prior to taking this course student must meet program's minimum studio advancement requirements. See the program's Advising Guidelines (http://www.drexel.edu/westphal/undergraduate/ARCH/Curriculum/#c3) for more details.

** See degree requirements (p. 130).

Opportunities

Drexel's work/study program is an experiential-based learning model that complements and provides an alternative to traditional full-time academic architecture programs. The Drexel model provides a practical, high-quality education to those students who seek early exposure to daily architectural practice as well as an affordable alternative to students who could not otherwise be able to enter the profession.

Ordinarily, Drexel's architecture graduates continue working for the firms that employed them during the work-study phase of their studies. In time, some architects reach positions of associate or partner in these offices, while others choose to launch their own firms. Urban design, historic preservation, interior design, and facilities management are some of the related careers that architectural graduates also pursue with similar patterns of success.

Drexel is located in University City, a Philadelphia neighborhood that includes several centers of education and research. Philadelphia itself offers an unparalleled collection of landmark architecture and urban planning that spans 300 years of development. The region has always been home to architectural firms of national and international prominence. A rich and varied environment combined with an accomplished and supportive professional community make Philadelphia an ideal laboratory for the study of architecture. All of the faculty in the program are active in the Philadelphia architecture community, many in leadership positions at firms.

Students seeking support for resume and portfolio development may schedule an appointment with the Program Director by contacting the Architecture Program. Job listings exclusively for Drexel Architecture students can be found on the Architecture Opportunities site. (http://www.drexel.edu/westphal/academics/undergraduate/ARCH/Opportunities) Firms seeking Drexel interns may contact students directly by finding student links to resume, worksample and web portfolios at this site.

Minor in Architecture

About the Minor

A minor in architecture gives students majoring in other disciplines an opportunity to explore architecture through a coherent sequence of coursework. The minor in architecture can also be used for preparation towards professional graduate study in this field. Interested students should consult the Architecture Program Director for course selection and scheduling.

The minor requires design studio courses, courses in architectural history, and architectural elective courses. No more than 9.0 credits from a student's major can be used to fulfill the minor requirements.

Program Requirements

Required Courses

Required Architectural History  9.0
Choice of Three
ARCH 141 Architecture and Society I
ARCH 142 Architecture and Society II
ARCH 143 Architecture and Society III
ARCH 144 Architecture and Society IV

Required Architecture Studios  12.0
ARCH 107 Foundation Design I (Non Design Majors)
ARCH 108 Foundation Design II
ARCH 109 Foundation Design III
ARCH 211 Architectural Representation I
ARCH 181 Architecture Studio 1A
ARCH 181 Architecture Studio 1B
ARCH 181 Architecture Studio 1C
ARCH 181 Architecture Studio 1D
ARCH 181 Architecture Studio 2A
ARCH 181 Architecture Studio 2B
ARCH 181 Architecture Studio 2C
ARCH 181 Architecture Studio 2D

Total Credits  24.0-27.0

* Non-Design Majors will be required to take the following studios: ARCH 107, ARCH 108, ARCH 109, ARCH 211 & ARCH 181
Students who have successfully completed ARCH 192 or VSST 103 should start the studio sequence with ARCH 181
Students who have successfully completed INTR 233 should start the studio sequence with ARCH 183

** Electives can be chosen from the ARCH rubric if the prerequisite is satisfied.
Facilities

The Department's offices, studios and teaching facilities are located on floors 3, 3A, 4 and 4A of the URBN Center at 3501 Market Street. The Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) on the first floor is open to all Westphal students and has state-of-the-art fabricating equipment, accessible to students after required training. The Westphal Print Center (http://www.drexel.edu/westphal/about/overview/making_spaces/WestphalPrintCenter) is a full-service, low-cost facility is located on 3A and is accessible to students from on and off campus. A full wood working shop is located in the Visual Studies Arts Annex at 3220 Cherry Street.

Interior Design Faculty

Rena Cumby, BArch, MS (Drexel University) Department Head. Department of Architecture & Interiors. Associate Professor. Interior designer; foundation studies and design education.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Jeff Fama, MArch (State University of New York at Buffalo). Adjunct Instructor. Retail, entertainment, and theater design.

Susan Feenan, BArch (Temple University). Adjunct Instructor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (Pennsylvania State University). Adjunct Instructor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Carla Heikin, MS (Drexel University). Adjunct Instructor. Workplace Strategy.

Peter Johnston, RA, AIA, MArch (University of California). Assistant Teaching Professor. Hospitality and institutional architecture and interior design.

Nicole Koltick, MArch (University of California) Director, Design Futures Lab. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Maria Kuttruff, MS (Drexel University). Adjunct Instructor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

William Mangold, NCIDQ, MPhil (City University Graduate Center, NY) Associate Director MS Interior Architecture & Design. Assistant Teaching Professor. Research on theories of space and place.

Diana S. Nicholas, RA, AIA, NCARB, MFA (University of the Arts, Philadelphia) Director of MS Design Research. Assistant Professor. Coordinator, Sustainability in the Built Environment

Karen Pelzer, NCIDQ, BS Interior Design (Drexel University). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ, MS (Drexel University) Director of BS and MS Interiors Programs. Associate Professor. Research on user participation and the design process.

Eric Rymshaw, RA, BArch (Drexel University). Adjunct Instructor. Vice President and Design Principal of Fury Design, Philadelphia.

Elena Sabinson, MS (Drexel University). Assistant Teaching Professor. Technology and visualization methods.

Frances Temple-West, RA, AIA, MArch (Virginia Tech). Adjunct Instructor.

Ada Tremonte, NCIDQ, BS (Drexel University) Associate Director, BS Interior Design. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

Emeritus Faculty

Sylvia Clark, MArch (University of Pennsylvania). Professor Emeritus.

Marjorie Kriebel, BArch (University of Pennsylvania). Professor Emeritus.

Karim Kuenstler, MS (Bank Street College of Education and Parsons). Professor Emeritus.

Marilynne L. Rose, NCIDQ, MS (Drexel University). Professor Emeritus.

Art History

Major: Art History

Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 180.0-184.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 50.0701

Standard Occupational Classification (SOC) code: 25-4011; 25-4012; 25-4013

About the Program

The history of art explores the meanings, values, and purposes of the visual arts within the historical cultures that create them. Works of fine and applied arts are understood not merely as aesthetic forms, but as expressions of the social, economic, scientific, religious, and political contexts that gave rise to them. The study of art history thus effectively serves the high purposes of a liberal education by equipping students with an understanding of world cultures and their histories from multiple disciplinary perspectives, and by encouraging the development of critical thinking, reading, research, and writing skills.

The art history program has a uniquely flexible curricular design in that it permits students to pursue art history as either a Bachelor of Arts or a Bachelor of Science degree. The BA degree is intended for students wishing to become professional art historians or who wish to supplement the art history curriculum with other courses leading to a specific career path. The BS degree is designed to allow students to combine the art history major with another major or to tailor the curriculum to their specific interests and aspirations. Both the BA and BS degrees require a total of 180.0-184.0 credit hours.
Another feature of this program is that it offers two accelerated, five-year degree tracks leading to MS degrees in either Museum Leadership or Arts Administration.

Bachelor of Arts

The BA degree requires 60.0 credit hours of art history, 71.0-75.0 credit hours of General Education courses, and 49.0 credit hours of Free Electives. The BA degree requires a strong component of Arts and Humanities courses in order to prepare students to enter the professional world of art historians by exposing them to critical reasoning, philosophy, anthropology, literature, world cultures, and foreign languages. The 49.0 credit hours of Free Electives can be used under faculty advisement to take additional art history courses, develop special competencies and areas of interest (e.g., race and gender studies; design history; museum studies, etc.), or gain competencies in various applied or technical areas. This BA program requires two 3-month co-ops.

Bachelor of Science

The BS degree also requires 60.0 credit hours of art history, but it only requires 35.0-39.0 credit hours of General Education courses, thereby freeing up 85.0 credit hours of coursework to accommodate another major or to design a personalized curriculum. The 85.0 credit hours of free electives provided by the BS degree permits the student to simultaneously pursue a second major, one or more minors, or simply explore the life of the mind by taking courses, with faculty advisement, in diverse fields. This program does not require a co-op taken in addition to that which is required by the second major.

### Minor in Art History

The minor in art history provides a broad humanistic background not only for students planning to attend graduate and professional schools in the fields of applied, media and design arts, social and information sciences, education, business and medicine, but also for those entering a more general job market. The minor is designed to be flexible enough to appeal to Antoinette Westphal College of Media Arts and Design majors as well as majors from the other colleges throughout the university.

Dual/Accelerated Degree
Art History BA/ Arts Administration MS

This five-year, accelerated degree program leading to a Master of Science in Arts Administration, is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s cultures and their histories and further develop his or her capacities for critical thinking, reading, and writing. The MS in Arts Administration prepares students for careers in the administration of museums and the performing arts.

Specialized University resources, such as the Pearlstein Gallery, the Drexel Museum, and the Historic Costume Collection, are available to directly support student’s studies.

Writing-Intensive Course Requirements
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Dual/Accelerated Degree

Art History BA/ Museum Leadership MS

This five-year, accelerated degree program leading to a Master of Science in Museum Leadership, is an excellent option for the student who wishes to broaden and deepen his or her knowledge of the world’s museums and their practices. The degree prepares students for the opportunities and challenges of the evolving museum landscape. The innovative curriculum embraces planning and design, governance, financial management and resource development for museums. Graduates of this program gain employment in museum marketing, development, education and administration.

Specialized University resources, such as the Pearlstein Gallery, the Drexel Museum, and the Historic Costume Collection, are available to students wishing to pursue careers in Museum work.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

Co-op Opportunities

Drexel's enviable geographical location in the northeast corridor of the United States provides a distinct advantage for an art history program because of the proximity of many important Museums, galleries, and auction houses. The Philadelphia Museum of Art, Pennsylvania Academy of the Fine Arts, Barnes Foundation, Rodin Museum, Institute of Contemporary Art, and the Penn Museum of Archeology and Anthropology are all local and easily accessible. Museums, galleries and auction houses in New York, Washington, Baltimore and other east coast centers are all within a reasonable distance by train, bus, or car. These institutions will offer students an abundance of opportunities for first-hand study of the major collections of art, architecture, and design. Proximity to these institutions can also provide for many choice opportunities for cooperative education experiences.

Some possibilities include:

- Barnes Foundation
- Philadelphia Museum of Art
- Pennsylvania Academy of the Fine Arts
- American Philosophical Society
- Moderne Gallery
- Calderwood Gallery
- RagoArts Auction House, Lambertville, NJ
- Twelve Gates Gallery for Contemporary South Asian Art
- Newark Museum, NJ
- Metropolitan Museum of Art
- Brooklyn Museum
- Mural Arts Program
- Asia Society NY
- Christie's NY

Career Opportunities

A major in art history can prepare students for a wide variety of careers, as well as preparation for graduate school.

Possible career paths:

- Museum Administrator
- Gallery Director
- Curator
- Museum Registrar
- Museum Educator
- Art Consultant
- Art Librarian
- Editor
- Art and/or Intellectual Property Law
- Artist Representative
- Non-profit and governmental organizations
- Teacher (K-12)
- Teacher/Researcher (college and university)

As a particularly broad humanities discipline, art history serves as an outstanding pre-professional degree, providing excellent preparation for a wide variety of professions, such as law, medicine, education and library science.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Art History Faculty

Jennifer Blazina, MFA (Cranbrook Academy of Art, Bloomfield Hills, MI). Professor. Coordinator of printmaking, fine arts.

Mark Brack, PhD (University of California at Berkeley). Associate Professor. British and American architecture from 1700 to the present; Hispanic colonial architecture in the American Southwest; vernacular architecture; historic preservation.

Pia Brancaccio, PhD (Istituto Universitario Orientale, Naples, Italy). Associate Professor. South Asian art.

Katie Broh, AIA, MArch (University of Pennsylvania). Adjunct Instructor. Partner, MGA; performing arts and educational facilities.

Charles Capaldi, AIA, LEED, AP, MArch (Colombia University). Adjunct Instructor. Partner at CaVa Architects.

Lewis Colburn, MFA (Syracuse University) Sculpture Area Coordinator. Assistant Professor. Sculpture, 3D design.

Anda Dubinskis, MFA (University of Pennsylvania) Drawing Area Coordinator. Associate Teaching Professor. Drawing.

Joseph F. Gregory, PhD (SUNY at Binghamton). Associate Professor. Modern European art.

Linda Kim, PhD (University of California, Berkeley). Associate Professor. American art, Modern art.

in education, physical therapy and performance. Students participating
four possible career paths within dance: dance/movement therapy, dance
and focus. This program combines rigorous academic coursework with
combined extensive stage and studio dance experiences to prepare students for
careers in the field of dance. He or she is looking for extensive experiences to improve as a dancer, choreographer and performer while being stimulated academically. This student wants to study dance—both physically and cognitively—in college while being offered the possibility of gainful employment after graduation.

For more information about this major, visit the Westphal College’s Dance (http://www.drexel.edu/westphal/academics/undergraduate/DANC) web page.

DANC 260  Injury Prevention for Dance  3.0
Free electives  6.0

**Term Credits:** 14.0

**Term 9**

DANC 131  Dance Practicum in Performance  1.0
or 133  Dance Practicum in Choreography  1.0
DANC 140, 141, or 142  Ballet Technique I, II, or Ballet Dance Technique III  2.0
DANC 150, 151, or 152  Modern Dance Technique I, II, or Modern Dance Technique III  2.0

**Term Credits:** 15.0

**Term 10**

DANC 131  Dance Practicum in Performance  1.0
or 133  Dance Practicum in Choreography  1.0
Select two of the following:
- DANC 160  Jazz Dance Technique I  3.0
- DANC 161  Jazz Dance Technique II  3.0
- DANC 170  Hip-Hop Dance Technique I  2.0
- DANC 171  Hip-Hop Dance Technique II  2.0
- DANC 190  African Dance Technique I  2.0
- DANC 191  African Dance Technique II  2.0

Natural Science elective  4.0
Free electives  6.0

**Term Credits:** 15.0

**Term 11**

DANC 131  Dance Practicum in Performance  1.0
or 133  Dance Practicum in Choreography  1.0
DANC 150, 151, or 152  Modern Dance Technique I, II, or Modern Dance Technique III  2.0
Natural Science elective  4.0
Free electives  6.0

**Term Credits:** 17.0

**Term 12**

DANC 241  Dance Composition II  3.0
MUSC 331  World Musics  3.0
English (ENGL) elective  3.0
Free electives  6.0

**Term Credits:** 15.0

**Total Credit:** 185.0

**Co-op/Career Opportunities**

The dance major is designed for students to focus on one of four career options. Several of the tracks lead to graduate study at Drexel or may be completed at the end of four years. Each also includes a co-op opportunity that allows for extended interaction with professionals in dance therapy, physical therapy, education, and performance. Students wishing to change career focus throughout the course of the undergraduate curriculum will have the option to do so.

Students focusing on dance/movement therapy participate in a six month co-op experience during the spring and summer terms of their junior year. These students may participate in co-op with a practicing dance/movement therapist, community dance artist, or mental health professional in a mental health, social service, rehabilitation, medical, special education or community arts setting.

Students focusing on physical therapy, will participate in a six month co-op in which they work in a setting with a physical therapist, such as a hospital, treatment center, school, or private practice. Co-op experiences
where students are able to work with physical therapists working on
dancers as clients will be encouraged.

Students focusing on **dance in education** participate in after school
dance programs, artist in residence school partnerships and auditorium
lecture demonstration programs as part of a touring dance company
run by the dance program at Drexel, or other dance education focused
activities in a school or studio setting, during the fall and winter of their
junior year as their co-op experience.

Students focusing on **custom design or performance** may participate in a
six month co-op including performance, administration, production, 
event planning and grant writing. Students interested in performance
will work with professional choreographers to experience multiple aspects of
creating a sustainable life in performance and/or choreography.

Visit the Drexel Steinbright Career Development Center (http://
www.drexel.edu/scdc) page for more detailed information on co-op and
post-graduate opportunities.

**Minor in Dance**

The minor in dance offers students an opportunity to explore dance in the
studio through technique classes, and in the classroom through academic
classes in dance. Participation in the dance ensemble class(es) is required,
although performance with the ensemble is not. There is no audition for
the dance minor program.

**Dance Faculty**

Lindsay Browning, BFA *(Bradford University)*. Adjunct Instructor. Yoga
Jim Bunting, BFA *(University of the Arts, Philadelphia)*. Adjunct Instructor. 
Jazz dance.
Clyde Evans Adjunct Instructor. Director of Chosen Dance Company; hip-hop.
Chris Farrell, MBA *(Fordham University)*. Adjunct Instructor. Rhythmic 
Studies; accompaniment.
Miriam Giguere, PhD *(Temple University)* Department Head, Performing Arts. Associate Professor. Professional modern dancer, choreographer and dance educator whose research centers on cognition during the creative process. She has published nationally and internationally and is a frequent presenter on the integration of dance and academics at national and international conferences.

Valerie Ill, MFA *(University of Oregon)* Program Director, Dance; Director of the Youth Performance Exchange and Dornsife Dance. Assistant Teaching Professor. Intersections of dance and the community.

Tania Isaac, MFA *(Temple University)*. Assistant Teaching Professor. Caribbean-American dancer/choreographer; fusion of choreography with personal documentary and social commentary to grapple with identity, post-colonial issues, feminism and juxtapositions of European and African influences.

Lucinda Lea, BA *(Indiana University)*. Adjunct Instructor. Ballet, Certified Trager Practitioner/Movement Educator
Marcie Mamura, MFA *(University of Oregon)*. Adjunct Instructor. Assistant Director, FreshDance.

Jennifer Morley, MFA *(Temple University)*. Assistant Teaching Professor. Master Pilates instructor and director of the Drexel Pilates Teaching Training program; modern dance, choreography.

Carl Paris, PhD *(Temple University)*. Adjunct Instructor. Interdisciplinary approach to dance studies, cultural studies and issues around black dance and performance.

Olive Prince, MFA *(Temple University)*. Adjunct Instructor. Choreography, creative process and improvisation; Director of Olive Prince Dance.

Meredith Rainey Adjunct Instructor. Former soloist with Pennsylvania Ballet and director of Carbon Dance Theater. Ballet, choreography.

Heather Smallley, BS *(Drexel University)*. Adjunct Instructor. Arts administration.

Leah Stein, BA *(Wesleyan University)*. Adjunct Instructor. Modern technique; improvisation.

Lauren Stepanski, DPT *(Drexel University)*. Adjunct Instructor. Dance kinesiology

**Dance Studies**

**Professional Dance Certificate Program**

**Certificate Level:** Undergraduate
**Admission Requirements:** High school diploma or GED equivalency
**Certificate Type:** Certificate
**Number of Credits of Completion:** 18.0
**Instructional Delivery:** Campus
**Calendar Type:** Quarter
**Maximum Time Frame:** 1 year
**Financial Aid Eligibility:** Not aid eligible
**Classification of Instructional Program (CIP) Code:** 50.0399
**Standard Occupational Classification (SOC) Code:** 27-2031

The certificate in dance studies is a 1-year option for any qualified professional dancer to assess whether they have the interest and aptitude for entering an undergraduate dance program. The certificate program has no entrance requirement beyond possession of a high school diploma or GED equivalency. All credits earned in the certificate of study in dance will be transferable into the part-time or full time BS degree in Dance (p. 143).

Theoretical understanding of consumption as it relates to retail buying, merchandising (D&M Shop).

Merchandising (D&M Magazine), Fashion Show Production or Visual using free electives or use these electives toward focused study in Media. Students pursuing the Bachelor of Science in Design & Merchandising may complete a concentration in Retail Buying & Merchandising. With the growth in omni-channel retail, students need to develop their skills not only for careers in traditional brick-and-mortar retailing establishments, but other retail models. These include: print and digital based retailing (catalog, television, and Internet). In this concentration, students explore all major retail merchandising and marketing channels and their requirements for buying, staffing, technology, logistics, distribution, and organizational behavior.

**About the Program**

Students in the Design & Merchandising program develop an appreciation for style and product quality, learn to communicate verbally and visually about design across traditional and emerging media, and gain the business knowledge and skills required to promote an aesthetically grounded point of view in the global marketplace.

The Design & Merchandising program at Drexel University's Antoinette Westphal College of Media Arts & Design educates and prepares students to effect change via creative problem-solving in design and commerce. Through an interdisciplinary approach, we strive to graduate adaptable, creative, confident and passionate professionals who are technologically adept and globally aware.

Through the classroom, co-op experience and study abroad opportunities (http://www.drexel.edu/studyabroad), the program prepares students to create, merchandise, market, promote and distribute fashion product, based on a knowledge of visual/aesthetic and business considerations. Design & Merchandising students graduate with the knowledge and skills needed for success in traditional and emerging roles in the global marketplace, and as practical and responsible corporate citizens who will make the world a more compelling, beautiful place in which to live and work.

Design & Merchandising majors typically focus study in the areas of fashion and fashion-related retail merchandising, media merchandising, fashion show production and visual merchandising. Elective credits may be used for a concentration in Retail Buying & Merchandising. Elective credits may also provide students with an option to minor in business administration, art history, product design, marketing, or to pursue other specific educational goals.

For more information about this major, visit the College's Design & Merchandising (http://www.drexel.edu/westphal/academics/undergraduate/DSMR) page.

**Degree Requirements**

Students pursuing the Bachelor of Science in Design & Merchandising may complete a concentration in Retail Buying & Merchandising using free electives or use these electives toward focused study in Media Merchandising (D&M Magazine), Fashion Show Production or Visual Merchandising (D&M Shop).

**Concentration in Retail Buying & Merchandising**

This concentration is designed to broaden students' practical and theoretical understanding of consumption as it relates to retail buying, management and merchandising.
** Social science electives must equal a minimum of 9.0 credits. Suggested social science electives: SOC 210 Race, Ethnicity and Social Inequality; SOC 215 Sociology of Work; SOC 240 Urban Sociology; SOC 345 Sociology for the Environment; SOC 340 Globalization; SOC I499 Independent Study in SOC.

*** Suggested art history electives: ARTH 335 History of Costume I: Preclassical to Directoire [WI]; ARTH 336 History of Costume II: Directoire to World War I [WI]; ARTH 477 Art History Seminar.

** Concentration Options
Retail Buying & Merchandising Concentration

Required Courses
- DSMR 233 [WI] Retail Image Analysis 3.0
- DSMR 313 International Fashion Merchandising 3.0
- DSMR 324 Retail Intersections: Social & Cultural Issues 3.0
- DSMR 325 Advanced Merchandise Planning and Buying 4.0

Select three from the following: 12.0
- DSMR 326 Fashion Product Promotion
- DSMR 397 Retail Practicum
- MKTG 324 Marketing Channels and Distribution Systems
- MKTG 344 Professional Personal Selling
- MKTG 355 Interactive Marketing
- MKTG 356 Consumer Behavior

Total Credits 25.0

Writing-Intensive Course Requirements
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program) and the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center). Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

Opportunities

An education in Design & Merchandising prepares individuals for a wide variety of career paths. Graduates often pursue opportunities in buying, merchandising and retail operations; fashion and home product development; fashion product promotion; media merchandising; and public relations. More recently, graduates select careers in merchandising technologies, or customer relationship management. Students may elect to choose a minor opening up an unlimited number of options.

Co-Op Experiences

Some past co-op employments of design and merchandising students include:

- Assistant Buyer, Urban Outfitters/Anthropologie, Philadelphia, PA
- Merchandising Co-op, TJX Companies, Framingham, MA
- Merchandising Assistant, Nation Design, New York, NY
- Product Development, Boathouse Sports, Philadelphia, PA
- Merchandising Co-op, Mundi Westport Group, New York, NY
- Creative and Digital Assistant, Article 22, Brooklyn, NY
- Public Relations Assistant, QVC, West Chester, PA
- Assistant Fashion Coordinator, Special Events Department, Saks Fifth Avenue
- Fashion Showroom Co-op, BCBG Max Azria, New York, NY
- Public Relations Assistant, Neiman Marcus, King of Prussia, PA
- Design/Market Co-op, Charlotte Ronson, New York, NY
- Public Relations Co-op, KB Brand Partners, New York, NY
- Production Co-op, Derek Lam, New York, NY
- Retail/Manufacturing/Merchandising Asst., Nicole Miller, Philadelphia PA

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree Program

Only available to Design & Merchandising majors (4-year with co-op), this dual degree program combines study in the areas of fashion retail merchandising and product development with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

Degree Requirements

The degree requirements for each program are located on the following pages:

- BS in Design & Merchandising Requirements (p. 147)
- MBA Requirements (http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext)

Additional requirements for the dual degree program

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.
Students should visit the Westphal College of Media Arts and Design (http://www.drexel.edu/westphal) for more information.

**Fashion, Product Design & Merchandising Faculty**

Kristen Ainscoe, BS (*Drexel University*). Assistant Teaching Professor. Visual merchandiser; merchandise management.

Chris Baeza, MLD (*Pennsylvania State University*). Assistant Teaching Professor. Creative direction, brand management, product design and merchandising, textiles and manufacturing.

Catherine Byers, MA (*American University*). Assistant Teaching Professor. Journalism; marketing and communications.

Nick Cassway, BFA (*Tyler School of Art*). Assistant Teaching Professor. Curating; experimental portraiture; computer design.

Anne C. Cecil, MA (*University of the Arts*). Adjunct Instructor. Web designer, product designer, merchandising and artist.

Joseph H. Hancock, II, PhD (*Ohio State University*). Professor. Apparel merchandising, textiles and clothing, culture and marketing strategies.

Tsz Kwok, EdD (*Drexel University*) Associate Director for Graduate College. Adjunct Instructor. Leadership development, creative leadership, pre-orientation program, comparative and international education, qualitative research methods, and teaching and learning about multicultural education in teacher preparation courses.

Beth Phillips, MS (*Georgetown University*). Associate Teaching Professor. Business and international marketing, linguist, analysis of products.

**Entertainment & Arts Management**

Major: Entertainment & Arts Management

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 185.0 - 187.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Program (CIP) code: 50.1001

Standard Occupational Classification (SOC) code: 13-1011

**Our Goal**

Our overall goal in the EAM program is to prepare students for leadership careers in the entertainment and arts fields by giving them:

- a broad understand of the business of entertainment & the arts, from for-profit commercial entertainment companies to non-profit arts & culture organizations;
- real world experience;
- skills development in the creative discipline that interests them, and
- expert advice and insight from practicing professionals.

**BS/MS Option**

Students who complete the Entertainment & Arts Management program may also choose to pursue a graduate degree at Drexel University in arts administration, television management or museum leadership. Students who graduate with a 3.5 GPA in the last two years of the program who apply to the MS in Arts Administration (http://catalog.drexel.edu/graduate/collegeofmediaartandsdesign/artsadministration) are automatically accepted into the MS program. Other graduate degrees within the college are available to students as well.

**Dual Degree MBA Option**

Students majoring in Entertainment and Arts Management (4-year with co-op) may choose the BS Entertainment and Arts Management/MBA dual degree option. This highly attractive program option combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the MBA in five years.

**Applying to the Dual Degree MBA Option**

Freshman applicants to the Entertainment & Arts Management program with a combined Math and Critical Reading SAT score of 1300 and a 3.5 GPA may apply for the BS/MBA program at the time of their initial application to Drexel University. Current students may choose to apply to the dual degree option once they have achieved between 90.0 and 120.0 credits. All students who are accepted into the accelerated program must maintain a 3.2 GPA as an EAM undergraduate, and must submit 2 letters of recommendation and meet minimum GMAT requirements at the time of the application to the MBA program.

For more information about this major, visit the College’s Entertainment & Arts Management (http://www.drexel.edu/westphal/academics/undergraduate/eam) page.

**Degree Requirements**

Coursework in the EAM program includes general education and core requirements as well as specialized coursework within the student’s chosen area of concentration and, if applicable, within a specific arts or media discipline. For instance, within the media management concentration, students choose coursework in one of two disciplines: film, video, and screenwriting or digital media. In the performing arts management concentration, students choose coursework in a dance, performing arts, or theatre discipline.

The core requirements provide an overview of the student’s future career field and its required key skills and abilities. The core requirements build
a foundation for further advanced and specialized courses, taught in
the student's area of concentration. At the end of their freshman year,
students select one of the following concentrations:

- **A Visual Arts Management Concentration**
- **B Performing Arts Management**
  a. Dance Concentration
  b. Performing Arts Concentration
  c. Theatre Concentration
- **C) Media Management**
  a. Digital Media Concentration
  b. Cinema and Television Concentration
- **D) Sports Entertainment Concentration**

General Education Requirements

Written Analysis and Communication Requirements

   VSST 111 Figure Drawing I
   VSST 112 Figure Drawing II
   VSST 301 Painting I
   VSST 302 Painting II
   VSST 303 Painting III

Total Credits 48.0

B. Performing Arts Management

1. Dance Concentration
  DANC 140 Ballet Technique I 2.0
  DANC 150 Modern Dance Technique I 2.0
  DANC 160 Jazz Dance Technique I 2.0
  or DANC 170 Hip-Hop Dance Technique I
  DANC 201 [WI] Dance Appreciation 3.0
  DANC 210 Introduction to Dance 3.0
  DANC 240 Dance Composition I 3.0
  DANC 325 [WI] Twentieth Century Dance 3.0
  DANC 355 Rhythmic Study for Dance 3.0
2. Performing Arts Concentration

DANC 201 [WI] Dance Appreciation 3.0
DANC 210 Introduction to Dance 3.0
DANC 325 [WI] Twentieth Century Dance 3.0
EAM 270 Audience Development for Arts 3.0
EAM 313 Volunteer and Board Management 3.0
EAM 321 Box Office and Venue Management 3.0
EAM 322 Performing Arts Touring 3.0
EAM 325 Producing for Live Entertainment 3.0
EAM 401 [WI] Writing for Arts Managers 3.0
MUSC 130 Introduction to Music 3.0
Choose 2 of the following 5 MUSC courses 6.0
   MUSC 331 World Musics
   MUSC 333 Afro-American Music USA
   MUSC 338 American Popular Music [WI]
   MUSC 236 Rock Music Through the Mid-60s
   MUSC 238 Rock Music Since the Mid-60s
THTR 115 Theatrical Experience 3.0
THTR 210 Acting: Fundamentals 3.0
THTR 240 Theatre Production I 3.0
Six terms of Performing Arts ensembles (3 classes must be taken for 1 credit each. One must be THTR 130) 3.0

Total Credits 48.0

3. Theatre Concentration

EAM 270 Audience Development for Arts 3.0
EAM 313 Volunteer and Board Management 3.0
EAM 321 Box Office and Venue Management 3.0
EAM 322 Performing Arts Touring 3.0
EAM 325 Producing for Live Entertainment 3.0
EAM 401 [WI] Writing for Arts Managers 3.0
THTR 121 [WI] Dramatic Analysis 3.0
THTR 210 Acting: Fundamentals 3.0
THTR 211 Acting: Scene Study 2.0
THTR 221 [WI] Theatre History I 3.0
THTR 222 [WI] Theatre History II 3.0
THTR 240 Theatre Production I 3.0
THTR 260 Production Design 3.0
THTR 320 Play Direction 3.0
One Theatre (THTR) elective 3.0
Six terms of Theatre Practicum Courses 4.0

Total Credits 48.0

THTR 130, THTR 131, THTR 132

C. Media Management

1. Digital Media Concentration

ANIM 140 Computer Graphics Imagery I 3.0
COM 111 Principles of Communication 3.0
COM 240 New Technologies in Communication 3.0
COM 270 [WI] Business Communication 3.0
DIGM 105 Overview of Digital Media 3.0
EAM 365 Media and Entertainment Business 3.0
FMVD 110 Basic Shooting and Lighting 3.0
GMAP 260 Overview of Computer Gaming 3.0
IDM 100 Introduction to Web Development 3.0
IDM 211 User Interface Design I 3.0
IDM 221 Web Design I 3.0
MKTG 322 Advertising & Integrated Marketing Communications 4.0
VSST 110 Introductory Drawing 3.0
One Digital Media (ANIM, GMAP, WBDV) elective 3.0
Digital Media track students also select one course from the following: 3.0
   ANIM 220 Digital Compositing I
   DIGM 350 [WI] Digital Storytelling
   DIGM 451 [WI] Explorations in New Media
   IDM 222 Web Design II

Total Credits 46.0

2. Cinema and Television Concentration

COM 111 Principles of Communication 3.0
COM 240 New Technologies in Communication 3.0
COM 270 [WI] Business Communication 3.0
EAM 365 Media and Entertainment Business 3.0
FMVD 110 Basic Shooting and Lighting 3.0
FMVD 115 Basic Editing 3.0
FMVD 120 Basic Sound 3.0
MKTG 322 Advertising & Integrated Marketing Communications 4.0
SCRH 200 Screenwriting I 3.0
TVIE 285 Media Law and Ethics 3.0
Select four from the following: 12.0
   TVPR 212 TV Commercials and Promos
   FMVD 200 Documentary Video Production
   FMVD 215 Narrative Video Production
   FMVD 220 Experimental Video Production
   FMVD 235 Intermediate Lighting
   FMVD 237 Intermediate Editing
   FMVD 305 Special Effects Make-up
   FMVD 365 Special Topics in Production
   SCRH 241 Writing TV Comedy
   SCRH 242 Writing TV Drama
   SCRH 275 Screenwriting II [WI]
   SCRH 280 Writing the Short Film
   SCRH 310 Literature for Screenwriters
   SCRH 370 Screenplay Story Development
   SCRH 380 Screenwriting Workshop I
   SCRH 381 Screenwriting Workshop II
   TVIE 280 Research, Sales and Programming
   TVPR 100 TV Studio: Basic Operations
   TVPR 200 TV Studio: Live Directing
   TVPR 210 TV Studio: Narrative
   TVPR 230 Scripted TV Production
   TVPR 236 Reality TV Production
   TVPR 356 DNews
   TVPR 357 DNews II
Choose 1 of 2 from the following: 3.0
   TVPR 240 Producing for Television
   FMVD 286 Producing for Features

Total Credits 46.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Recommended Plans of Study

At the end of their freshman year, students select one of the following concentrations. Each concentration has its own unique Plan of Study:

(A) Visual Arts Management Concentration

<table>
<thead>

**Co-op/Career Opportunities**

Entertainment & Arts Management prepares students for a variety of careers in both commercial and nonprofit organizations - from creative, hands-on positions to administrative and management roles.

The career possibilities in this field are extensive and include the following positions:
Examples of Past Co-op Jobs

EAM students work at many of the leading entertainment and arts companies in the country.

Examples of some of the co-op employers where EAM students have worked:

- Showtime
- A&E Network
- AEG Live - Los Angeles
- The Tonight Show Starring Jimmy Fallon
- Atlantic Records
- Sony Music Entertainment
- Disney
- Comcast
- NBC Universal - NYC
- The Onion
- Screen Actors Guild
- Sirius/XM Radio
- Abrams Artist Agency – NYC
- Red Light Management - NYC
- Fox News Channel
- Warner Music Group
- Nashville Casting
- Rain Management Group
- The Trocadero
- XFINITY Live! Philadelphia
- Asbury Lanes
- Cosi Television NY
- World Café Live!
- Kimmel Center for the Performing Arts
- Lincoln Center for the Performing Arts
- Sesame Workshop
- Upright Citizens Brigade
- Edinburgh Fringe Festival
- Webster Hall NYC
- Philadelphia Theatre Company
- Joffrey Ballet
- Pennsylvania Ballet
- Arden Theatre Company

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

About the Accelerated Degree Program (BS/MBA)

Available to students majoring in entertainment and arts management (4-year with co-op), this dual degree program combines study in the management of the arts and entertainment industries along with the MBA degree. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

Incoming freshmen selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

Degree requirements

BS in Entertainment & Arts Management (p. 151)

MBA Requirements (http://catalog.drexel.edu/graduate/collegeofbusiness/businessadministration/#degreerequirementstext)

BS/MBA students may be waived from three MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing on the LeBow College's web site for additional information. Students who complete MIS 200 in their undergraduate program will, in addition, be waived from a fourth MBA course (MIS 612).

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

Additional requirements for the dual degree program

- A cumulative GPA of at least 3.2 is required throughout the program.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student’s third year.
- Students must submit an acceptable plan of study at least three terms before anticipated start of graduate part of the program.

Students should visit the Westphal College of Media Arts and Design (http://www.drexel.edu/undergrad/academics/colleges-schools/westphal) for more information.

Minor in Entertainment & Arts Management

Drexel's Entertainment & Arts Management (EAM) minor program gives students an introduction to the challenging industry of entertainment and arts business. The selected curriculum gives students a basis in entertainment finance, promotion, business planning, intellectual property rights, cultural literacy, and artist representation. Students in Drexel’s EAM minor do not choose concentrations but rather take a core selection of classes and then select nine hours of electives in order to customize their learning.
The EAM minor is open to all undergraduate students in the Drexel University system; no prerequisites or department approval needed.

College of Media Arts and Design Facilities

Our college offers high-quality facilities and resources to its students including a state-of-the-art black-box theatre, HD film screening rooms, rehearsal studios, event venues, and more. The following are some links for more information about some of our facilities.

- Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/westphal/resources/FHCC)
- Design and Imaging Studios (http://www.drexel.edu/westphal/student-resources/technology)
- DUTV (http://www.dutv.org), (Paul F. Harron Studios) student-run cable television station
- Leonard Pearlstein Gallery (http://www.drexel.edu/westphal/resources/LeonardPearlsteinGallery)
- MAD Dragon Media Group (http://maddragonrecords.com)
- Mandell Theater (http://www.drexel.edu/performingarts/about/facilities/mandell-theater)
- Rudman Institute for Entertainment Industry Studies (http://www.drexel.edu/westphal/resources/Rudman)
- WKDU (http://www.wkdu.org), Drexel’s student-run radio station

Entertainment and Arts Management Faculty

Lawrence Epstein, MBA (Cornell University) Interim Department Head, Arts & Entertainment Enterprise. Teaching Professor. Media Finance, Station Group Management Media Analytics, Financial, Technical and Strategic Planning. Technology Assessment and Management, New Venture Management

Julie Goodman, MFA (Temple University) Program Director, MS in Arts Administration. Associate Professor. Cultural policy, political activism in the arts, changes in economic and social policy, arts sector changes.

Brea Heidelberg, MS, MA, PhD (Villanova, The Ohio State University) Associate Program Director. Assistant Professor. Arts management educator, consultant, and researcher focusing on the intersection of the arts and other fields of study.

Brian Moore, MS, MFA (Drexel University; Louisiana State University) Program Director, BS in Entertainment and Arts Management. Associate Teaching Professor. Commercial entertainment: film, theatre, television. Nonprofit organizations: theatre, general fund development; strategic planning; communications and marketing; executive management.

Brandon Pankey, BA (University of Pennsylvania). Adjunct Instructor. Vice President of Business Development & Operations for Live Nation Urban, the newest joint venture with Live Nation Entertainment, the world’s leading company for live entertainment. Artist clients included The Roots, Jill Scott, Nicki Minaj, Lil’ Wayne, and T.I.

Amy Scheidegger, MS (Drexel University). Adjunct Instructor. Working artist teaching audience development, advocacy and strategic management. Creator of the <em>Artistic Rebuttal Book Project</em>/</em>

Scott Schwartz, JD (University of Buffalo). Adjunct Instructor. General counsel at Dansko, LLC; teaches Copyright & Trademarks.

Neville Vakharia, MS (Drexel University) Research Director. Associate Professor. Technology in the arts, strategic planning and evaluation, management and leadership, innovation and entrepreneurship.

David Weiss Adjunct Instructor. VP at Freeman’s Auction House, Host of <em>Antiques Roadshow</em> on PBC; Teaches Fine Art Market Development

Brannon Wiles, JD (Columbia University School of Law). Assistant Professor. Producing for commercial theatre, law and the arts, contract negotiation, labor relations, budgeting and company management.

Justin Wineburgh, JD (Widener University). Adjunct Instructor. Teaching Law for Entertainment and Arts Management. CEO of Alkemy-X production company.

Fashion Design

Major: Fashion Design
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0407
Standard Occupational Classification (SOC) code: 27-1022

About the Program

The Fashion Design Program at Drexel University’s Antoinette Westphal College (http://www.drexel.edu/westphal/undergraduate/fash) of Media Arts & Design educates and trains visionary designers to use an integrated approach toward the creation of contemporary fashion within the context of an expanding, yet converging global economy and society. The fusion of art, design, science and technology serves as a springboard
for the production of unique apparel for the 21st century, and represents a trans-disciplinary approach that requires flexibility and focus. Over the past two decades, Drexel's Fashion Design program has developed a stellar, international reputation and is ranked in the top five nationally and 16th worldwide. That is due in part, to a passionate and experienced faculty, novel approaches to pedagogy, and participation in national and international competitions. Faculty and alumni connections to industry leaders strongly augment and catalyze the program, the strength of which is closely linked to the philosophy that each student has a distinct vision and a unique aesthetic that must be cultivated on an individual basis.

Within the beautiful new studios and specialized labs in the URBN Center, students learn to master skills and push the boundaries using those skills. Students can engage in collaborative University wide research through the use of the exCiTe Center (http://drexel.edu/excite) located next door and the Hybrid Making Lab (http://www.drexel.edu/westphal/resources/making_spaces/HybridMakingLab) located on the URBN Center’s first floor. They acquire detailed knowledge about industrial productions, advanced technologies in design, collaborative design, materials and processes, and the marketing and merchandising of clothing. Accordingly, our future fashion designers, both undergraduates and graduates alike, develop an intuitive and practical understanding of design through a fine arts foundation, while studying the psychological, social and historical contexts of fashion through the world-renowned Robert and Penny Fox Historic Costume Collection (http://www.drexel.edu/foxcollection) (FHCC). Importantly, the students are provided with commercial studio/ atelier training that goes hand-in-hand with classroom instruction through the University’s cooperative education program (http://www.drexel.edu/westphal/forStudents/co-op). Cooperative education offers invaluable opportunities for students to observe and participate in the fashion industry at the ground level. Critiques by visiting professionals are included in all upper level courses and provide valuable “real world” input, as well as future career connections. A large percentage of students spend a term studying abroad (http://www.drexel.edu/studyabroad) in the world’s great fashion capitals, including London (https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10070&Type=O&sType=O), England and Florence (https://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=40220), Italy. Upon graduation, students show their collections (http://www.drexel.edu/westphal/fash) in the annual fashion show.

For more information about this major, visit the College's Fashion Design (http://drexel.edu/westphal/academics/undergraduate/FASH) page.

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the
attribute "WI" to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

Drexel Co-op is a renowned collegiate program. Students spend a minimum of 6 months either in the US (http://www.drexel.edu/westphal/academics/co-op) or abroad (http://www.drexel.edu/scdc/co-op/international) where they can apply their skills in the challenging and exciting fashion industry. Areas of opportunity include garment design, concept design, product development, production, textile design, costume design, technical design, CAD, publishing, curatorial work, promotion and marketing. During the cooperative education program students apply their industry knowledge and gain experience in the diverse, fast paced global world of fashion. Students forge long lasting relationships with alumni and other industry professionals.

Co-op Experiences

Some past co-op employers of fashion design students include:

- A Wish Come True, Greater Philadelphia Area
- Abercrombie & Fitch, Ohio
- Althea Harper, New York
- Amsale, New York
- Austin Scarlett, New York
- Australian Internships - Bec & Bridge
- Beijing Yu Wen Hua Apparel Company
- BCBG Max Azria, California
- Bioko Biodiversity Protection Program, Equatorial Guinea
- Blazina International, Philadelphia
- Calvin Klein, New York
- Carole Hochman Design Group, New York
- Charlotte Ronson, New York
- Chico’s FAS, Inc., Ft. Meyers Fl
- Dennis Basso/Stallion Inc., New York
- Destination Maternity Corporation, Philadelphia, PA
- DYLanLEX, Philadelphia, PA
- Elite Sportswear, L.P., Reading, PA
- Elie Tahari, New York
- Elixir Fashion Apparel & Alicia Lee Designs, China
- Gelmart International, New York
- Hanky Panky, LTD, New York
- Haute Hippie, New York
- Jill Stuart International, New York
- Joe Fresh, New York
- Jordache Enterprises, New York
- Junko Yoshioka, New York
- Lilly Pulitzer, Greater Philadelphia Area
- LL Bean, Freeport, ME
- Lori Coulter, LLC, St. Louis, MO
- Maggie Norris Couture, New York
- Marchesa, New York, NY
- Marios Schwab Ltd., London, UK
- Michael Kors, New York
- Milly LLC, New York
- Naeem Khan LTD, New York
- Nanette Lepore, New York
- Ohne Titel, New York
- PARigi Group, Greater Philadelphia Area
- Parker, New York
- Peter Pilotto, London, UK
Facilities

Drexel University’s Antoinette Westphal College of Media Arts & Design is located in the new URBN Center at 3501 Market Street in Philadelphia. The URBN Center is a 140,000 square foot state-of-the-art facility where the Fashion Design studios are located on the 3rd floor. Classes are held in fully equipped studios for design and construction, pattern drafting, CAD design, and textile design including a dedicated senior and graduate design studio. Other studios on the 3rd floor include a specialty equipment lab, computer lab, knitwear studio, a fabric dying and research lab, fashion drawing studio, and the Charles Evans Library. In our state of the art knitwear lab, students have access to Shima Seiki’s computerized flat knitting machine, and APEX Design Systems. The open environment of the URBN Center provides opportunity for collaboration with all of the programs at the Westphal College. Design & Merchandising is on the first floor, opposite the main lobby where work from all of the College’s students is regularly displayed. Digital Media, Animation & Visual Effects, Game Art & Production, Web Development & Interaction Design, Product Design, Graphic Design, Interiors, and Architecture’s studios and labs are also located in the URBN Center. The Center encourages anyone interested to schedule a visit (http://www.drexel.edu/westphal/about/contact) to experience the creativity, technology, innovation and resulting excitement.

Fashion Design Faculty

Renee Weiss Chase, MS (Drexel University). Professor. Fashion designer; computer-aided design systems for the fashion curriculum.

Maureen DeSimone, MBA, in progress (Colorado State). Adjunct Instructor. Wholesale business operations, marketing and line development.

Anita Dennis, AST (Art Institute of Philadelphia) Fashion Laboratory Technician. Assistant Teaching Professor. Fashion designer and technician; construction skills.

Genevieve Dion, MFA (University of the Arts) Director, Shima Seiki Haute Technology Lab, ExCITe Center. Associate Professor. Industrial designer, wearable artist, new materials technology research.

Cynthia Golembuski, MS (Drexel University) Associate Program Director, Fashion Design. Associate Teaching Professor. Fashion designer, illustrator, computer aided design.

Roberta Gruber, MS (Drexel University). Associate Professor. Fashion designer and illustrator; wearable artist, merchandiser, special events.

Lisa L. Hayes, BFA (Syracuse University) Program Director, Fashion Design. Associate Professor. Fashion designer, product designer, pattern design.

Jaeyoon Jeong, MS (Drexel University). Assistant Teaching Professor. Owner/Designer Jaeyoon Jeong Collection

Jackie Kilmartin, MS, BS (Jefferson University, University of the Sciences). Assistant Teaching Professor. Owner/ Knitwear Designer Lilian Jackson Textiles.

Jan Marshall, BA (Long Island University). Assistant Teaching Professor. Fashion designer, knitwear, product development, fashion analysis.

Kathi Martin, MSIS (Drexel University) Associate Director of the Graduate Program in Fashion Design. Professor. Fashion and textile designer; textile artist; computer-aided design, best practices online databases and graphic interfaces for fashion and historic costume, high resolution 3D interactive images for fashion design.

Alphonso McClendon, MS (Drexel University) Program Director, Design & Merchandising. Associate Professor. Fashion designer, product and business development, computer aided planning and design.

Clare Sauro, MA (Fashion Institute of Technology) Curator, Historic Costume Collection. Associate Teaching Professor. Costume history.

Film & Video

Major: Film & Video

Degree Awarded: Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 186.0

Co-op Options: One Co-op (Four years)

Classification of Instructional Program (CIP) code: 50.0602

Standard Occupational Classification (SOC) code: 27-2012; 27-4031; 27-4032
About the Program

The film and video major offers a balance of technical craft and artistic vision that prepares students to pursue professional careers in the film industry. The program is hands-on with ample production opportunities from the first year of study supported by a strong emphasis in the liberal arts and foundations of design. There is also substantial coursework in screenwriting and film studies.

This highly competitive program, with only sixty-four freshmen accepted annually, features smaller classes that foster student-faculty interaction and mentoring, as well as ample access to excellent equipment. The unique Drexel co-op and Los Angeles Summer Program enhance education by providing students with professional employment experience.

The Film and Video program also offers minors in Film Studies and Video Production.

Additional Information

For more information about this program, contact the program director:
Tom Quinn

Co-Op/Career Opportunities

Opportunities

Students who study film and video can move on to careers as film or video directors, producers, video or film editors, directors of photography (film), camerawork, as well as grips and special effects coordinators.

Co-Op Experiences

Some past co-op employers of film and video students include:

- USA Network, New York
- Comcast, Philadelphia
- Bad Robot, Los Angeles
- ICM, Los Angeles
- Focus Features, New York
- Law & Order, New York
- NFL Films, Mount Laurel, New Jersey
- Tribeca Film Center, New York
- National Geographic Television, Washington DC
- NBC, New York
- Paramount Studios, Los Angeles
- MTV, New York

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

Film and Video facilities include a shooting studio with green screen; two screening rooms; a fully equipped HD television studio; post-production labs for editing, color correction and audio recording & mixing; specially outfitted multimedia rooms; state of the art film production equipment including cameras, steadicams, lighting and audio equipment.

Additionally, the college operates DUTV (http://www.dutv.org), a HD cable television station reaching over 350,000 households.

Minor in Film Studies

About the Minor

The Minor in Film Studies comprises courses that cover the major artistic and institutional developments in cinema from its late-nineteenth-century origins to the present. As these courses cover a variety of critical topics that are essential to any film studies curriculum - such as the study of major genres and auteurs, the technologies and techniques contributing to the development of the medium, as well as the historical circumstances that influenced the cinema's evolution since its inception - they will establish a sound critical foundation for students to choose and to flourish in the subsequent courses required for the minor.

The Minor in Film Studies is open to all University students.

Minor in Video Production
About the Minor
The Minor in Video Production provides a thorough foundation in filmmaking craft. Once core required courses are completed, students have the opportunity to apply newly acquired skills in their choice of several advanced film production courses or to explore television studio production.

The Minor in Video Production is open to all University students.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Film & Television Faculty

Andrew Altrichter, MBA (Drexel University) Program Manager, Drexel University’s television station (DUTV). Adjunct Instructor. Videography, editing, production.

John Avarase, BS (Drexel University). Assistant Teaching Professor. Composer, film and video scores, mixing and sound design.

Alison Bagnall, BA (Yale University). Visiting Professor. Filmmaker

Jackie Borock, LLB (Widener University). Adjunct Instructor. Media law, intellectual property, first amendment

David Culver, AS (Graham Junior College) Manager of the Paul F. Harron Studios/DUTV. Associate Teaching Professor. Film, Video, Station Management, Emerging Media Technology

Karen Curry, BA (Fordham University) Executive Director, Kal and Lucille Rudman Institute for Entertainment Industry Studies. Adjunct Instructor. Global media, news production and management.

David Deneen, BFA (Philadelphia College of Art). Assistant Teaching Professor. Film & video.

Gerard M. Hooper, MFA (Temple University). Associate Teaching Professor. Film and video; European and non-western cinema.

D. B. Jones, PhD (Stanford University). Professor. Film and video; cinema studies.

Matthew Kaufhold, MA (University of North Carolina) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Karim P. Kelly, MFA (New York University) Department Head, Cinema and Television. Associate Professor. Film and video; television studies.

Yvonne D. Leach, MFA (Temple University). Associate Professor. Television studies.

Susan Magee, MFA (Bennington). Instructor. Social marketing, electronic publishing, technical communication.

Joe Marsini, BS, CPA (University of Delaware). Adjunct Instructor. Media finance, strategic planning, financial reporting, contract negotiations, collective bargaining agreements.

Thomas Quinn, MFA (Temple University) Program Director, Film & Video. Assistant Professor. Writer, Director, filmmaker.

Philip W. Salas, BS (Temple University). Assistant Teaching Professor. Utilization of advanced set top box data to measure fragmented viewing behavior. Impact of new television distribution technologies on traditional broadcasters and multichannel program providers.

David A. Schwartz, BA (Rider University). Associate Teaching Professor. Steadicam operator; cameraman.

Andrew Susskind, BA (Harvard University) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

Jocelyn Tarquini-Motter, MFA (American Film Institute). Assistant Teaching Professor. Editing.

Albert S. Tedesco, MA (University of Pennsylvania) Director of the Paul F. Harron Graduate Program in Television Management. Teaching Professor. Media Management, Organizational Structure, Research
Methods, Media Ethics, Media Law, The Regulatory Environment, Technology Assessment, Media Theory, Media Analytics

Gregory S. Wolmart, MFA (University of Pennsylvania). Assistant Professor. Cinema studies; film history.

Martin (Marty) Zied, BA (Penn State). Adjunct Instructor. Speech Communications, Producer/Director Television and Film

Game Design & Production

Major: Game Design and Production
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 36.0113
Standard Occupational Classification (SOC) code: 15-1131

About the Program

Drexel's top-ten nationally-ranked Game Design & Production program combines a strong comprehension of animation and interactivity with an understanding of design, programming, production, and team work.

The major mirrors a sector that has seen an explosion in gaming, not just in personal entertainment, but throughout multiple industries and the corporate world. The gaming industry has matured into a source of large-budget AAA and smaller indie entertainment projects. It encompasses the use of serious gaming, where gaming technologies are used in education and training for practically any topic.

Fully immersive games use constantly evolving methods of presentation and interaction, such as personal data-trackers, Internet-of-Things (IoT), multi-touch displays, mediated-reality (augmented and virtual) motion and gesture capture, motion simulation, and haptic devices. To best prepare for the demands of careers in these rapidly changing disciplines, students pursue a foundation of design and technology, taking core courses in all aspects of digital media, completing a six-month co-op and delving into rigorous specialty coursework. Provided a robust foundation, students are prepared to adapt to shifting industry demands and maintain a fluency across the digital media spectrum.

To complement the creative focus of the Game Design & Production major, a minor in Computer Science is popular, and in many cases an ideal supplement for Game Design & Production students. This minor increases programming knowledge while maintaining a creative design and production focus. This minor would be easy to achieve within a plan of study using free electives. For the computer-engineering-focused, a sister concentration in game programming and development (http://catalog.drexel.edu/undergraduate/collegenetworkingandinformatics/gameprogramminganddevelopment) is offered as part of Drexel's major in computer science (http://catalog.drexel.edu/undergraduate/collegenetworkingandinformatics/computerscience).

Additional Information

To find out more about this major, visit the Westphal College's Game Design & Production Major (http://www.drexel.edu/westphal/undergraduate/GDAP) page.

**Co-op/Career Opportunities**

Drexel students have broad training in all areas of game design and production, and our students have career opportunities in both entertainment gaming and broader simulation/training industries, and anywhere interactive gaming technology is applied - a growing segment in all industries.

**Co-op Experiences**

Building a career often begins with a few key contacts and the co-op program gives Drexel students the chance to meet professionals, making their skills known, and build their personal network. A recent co-op student at Microsoft Studios worked with producers on several different titles and was offered a job in his junior year that was waiting for him after he completed his senior year.

In addition to small and large entertainment companies, students have opportunities to explore how game design is applicable to many local and international industries ranging from aerospace to pharmaceuticals to yacht design.

Recent co-op opportunities include game and digital media jobs in Philadelphia region companies like eNable Games, Entrepreneurial Game Studio, iD Tech Game Design & Development Academy, IDEA, Penn Medicine, PHL Collective, Skyless Game Studios, and Virtual Health.
Students also secured game and digital media co-ops at national and international companies, like Rockstar Games in San Diego and Inter Media Japan in Tokyo.

Career Experiences

Our students work in leading entertainment companies including 343 Industries, Blizzard, Disney, EA Games, Ghost Story Games, Industrial Light & Magic, Irrational Games, Microsoft Studios, Microsoft Xbox, Midway MCsoft, Nexon, Oculus VR, Riot Games, Rockstar Games, Sony SCEA, Spry Fox, The Coalition, Turn 10 Studios, Volition, and Zynga.

Other students chose indie studios or launch their own digital media or game companies. Students also chose to work outside of entertainment by applying their game production skills to more serious endeavors with companies including Comcast, Lockheed Martin, and Vanguard.

Jobs titles include Art Director, Animator, Associate Producer, Character Animator, Cinematic Lead, Cinematics Animator, Community Manager, Digital Project Coordinator, Facial Capture Artist, Game Designer, Lead Cinematic Animator, Lead Technical Director, Lead Virtual Production Manager, Marketing Manager, Motion Capture Technician, Previsualization Supervisor, Program Manager, Programmer, Senior Animator, Senior Artist, Senior Community Manager, Simulation Developer, Technical Artist, and Virtual Production Engineer.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities, or Drexel's RePlay Lab careers (http://www.replay.drexel.edu/careers.html) page.

Dual Accelerated Degrees

BS/MS in Digital Media

The accelerated degree programs enable academically qualified students to earn both a bachelor's and a master's degree in five years instead of six — graduating sooner than they would in traditional programs. In addition, the graduate-level courses students take in their junior and senior years are included in their undergraduate tuition, which saves almost a year's worth of their MS tuition.

Current Drexel students may apply for an accelerated degree programs through the Graduate College of Drexel University (http://drexel.edu/graduatecollege) after completing 90.0 credits, but no more than 120.0 credits. Many of our accelerated students have gone on to careers at leading companies including Pixar, Microsoft Studios, Dreamworks, NCSoft, and Disney.

Game Design and Production Faculty

Theo Artz, BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

Milady S. Bridges, BA (Rutgers University). Assistant Teaching Professor. Animation principles, modeling, texturing, rigging, enveloping, particle simulations, lighting, compositing, and editing.

Graham D. Clark, MFA (Academy of Art University). Assistant Teaching Professor. Animation and visual effects, stereography.

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (Pennsylvania State University ) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Troy Finamore, MS (Drexel University) Program Director, Interactive Digital Media. Assistant Teaching Professor. Advertising, design and interactivity.

Nick Jushchyshyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects, VR/immersive Media. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (Carnegie Mellon University). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Tyler School of Art, Temple University) Program Director, Game Design & Production. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Tony Rowe, AA (Institute of Computer Technology). Assistant Teaching Professor. Veteran AAA Game Designer, mentor at Drexel's Entrepreneurial Game Studio. Game history, writing, and level design.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Jichen Zhu, PhD (Georgia Institute of Technology). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

Graphic Design

Major: Graphic Design
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0409
Standard Occupational Classification (SOC) code: 27-1024

About the Program

Westphal College's graphic design curriculum provides a balance of theory and practice in rigorous design study enhanced by general education coursework in the humanities and the physical and social sciences. Students learn to conceptualize, visualize and realize visual communications through the rigor of project-based exploration and experimentation based on the formal foundations of typography, imagemaking, aesthetics and critical thinking. Graphic design students are immersed in all aspects of visual communications, such as books, magazines and publications (print and screen based), posters,
Degree Requirements

For more information about the major, visit the Graphic Design program web page.

Graphic design students can also pursue advanced elective coursework in web and motion graphic design, environmental graphic design, experimental publication design and other interdisciplinary special topics projects.

Additional Information

For more information about the major, visit the Graphic Design program web page.

Degree Requirements

General Education Requirements

- CIVC 101 Introduction to Civic Engagement: 1.0
- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research: 3.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing: 3.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres: 3.0
- MATH 119 Mathematical Foundations for Design: 4.0
- PHYS 121 Physical Science for Design I: 4.0
- UNIV A101 The Drexel Experience: 2.0
- Required Arts and Humanities: Students elect a minimum of 9.0 credits: 9.0
- Required Social Science: Students elect a minimum of 4.0 credits: 4.0
- Free electives: 23.0
- Co-operative education (two terms): 0.0

Visual Studies Requirements

- ARTH 101 History of Art I: Ancient to Medieval: 3.0
- ARTH 102 History of Art II: Renaissance to Romanticism: 3.0
- ARTH 103 History of Art III: Modern Art: 3.0
- PHTO 110 Photography: 3.0
- VSST 101 Design I: 4.0
- VSST 102 Design II: 4.0
- VSST 103 Design III: 4.0
- VSST 110 Introductory Drawing: 3.0
- VSST 111 Figure Drawing I: 3.0
- VSST 301 Painting I: 4.0
- VSST 321 Screenprint I: 4.0
- Visual Studies (VSST) elective: 4.0

Graphic Design Requirements

- ARTH 300 [WI] History of Modern Design: 3.0
- PHTO 210 Intermediate Photography: 3.0
- VSCM 100 Computer Imaging I: 3.0
- VSCM 200 Computer Imaging II: 3.0
- VSCM 230 Visual Communication I: 4.0
- VSCM 231 Visual Communication II: 4.0
- VSCM 232 Visual Communication III: 4.0
- VSCM 240 Typography I: 3.0
- VSCM 241 Production: 3.0
- VSCM 242 Typography II: 3.0
- VSCM 332 Visual Communication IV: 4.0
- VSCM 333 Visual Communication V: 4.0
- VSCM 340 Typography III: 3.0
- VSCM 350 [WI] Graphic Design: 20th Century and Beyond: 3.0
- VSCM 430 Visual Communication VI: 4.0
- VSCM 440 Book Design: 4.0
- VSCM 450 Professional Portfolio: 3.0

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List.

Co-op/Career Opportunities

Potential employers include advertising agencies, publishers, printers, independent and in-house design studios, museums and galleries, magazines and newspapers, and television. Training in visual communication prepares an individual for careers in many fields because the problem-solving methods and organizational skills it builds are widely applicable.

Co-op Experiences

Following is a sampling of graphic design co-op employers:

- Comcast (http://corporate.comcast.com)
- Esquire (http://www.esquire.com)
- The Franklin Institute (https://www.fi.edu)
- Hasbro (https://www.hasbro.com/en-us)
- Intuitive Company (http://intuitivecompany.com)
- National Constitution Center (https://constitutioncenter.org)
- Philadelphia Museum of Art (http://www.philamuseum.org)
- Philadelphia Union (http://www.philadelphiaunion.com)
- Quirk Books (http://www.quirkbooks.com)
- Razorfish (https://www.razorfish.com)
- WebLinc (https://www.weblinc.com)

Career Opportunities

Our graphic design alumni go on to successful careers in a range of positions including lead designer, creative director, art director, interaction designer, user experience director, and owner or partner of firms. Some of the companies where you will find our alumni include:

- AgileCat (http://agilecat.com)
- America’s Test Kitchen (https://www.americastestkitchen.com)
- Ann Taylor Inc (http://www.anntinc.com)
- Bloomberg (https://www.bloomberg.com)
- Blue Cadet (http://www.bluecadet.com)
- Brooks Brothers (http://www.brooksbrothers.com)
- Comcast Corporation (http://corporate.comcast.com)
- Conde Nast (http://www.condenast.com)
- eCity Interactive (http://www.ecityinteractive.com)
- ESPN (http://www.espn.com)
- ex:it (http://www.explorexit.com)
- Facebook (https://www.facebook.com/careers/?ref=pf)
- The Franklin Institute (https://www.fi.edu)
- Intuitive Company (http://intuitivecompany.com)
- Kikkerland (https://kikkerland.com)
- Longwood Gardens (https://longwoodgardens.org)
- Marvel Entertainment (http://marvel.com)
- Michael Graves Design Group (https://michaelgraves.com)
- National Constitution Center (https://constitutioncenter.org)
- QVC (http://www.qvc.com)
- Philadelphia Museum of Art (http://www.philamuseum.org)
- Saatchi & Saatchi (http://saatchi.com/en-us)
- Sesame Workshop (http://www.sesameworkshop.org)
- Time Inc. (https://www.timeinc.com)
• Under Armour (https://www.under armour.com/en-us)
• Vera Bradley (https://www.verabradley.com/us/Home)

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Facilities**

The graphic design studios are located on the fourth floor of the URBN Center in the Antoinette Westphal College of Media Arts and Design. There are five dedicated studios equipped with up-to-date electronic and traditional tools. Studios have work surfaces for traditional practices that will accommodate 15 students, and wall surfaces for critiques or posting examples of printed work. In addition, students have access to a dedicated, non-scheduled graphic design “open lab” equipped with all necessary technology and work surfaces.

**Graphic Design Faculty**

Jack Cliggett, MFA (Syracuse University). Associate Professor. Graphic design; logo design, corporate identity, Chinese propaganda, and thesis.

Joshua Gdovin, BS (Drexel University). Assistant Teaching Professor. Graphic design; web graphics; motion graphics, and thesis.

Jody Graff, BS (Drexel University) Program Director, Graphic Design. Associate Professor. Graphic design; publication design, annual report design, three-dimensional graphics and packaging, environmental graphic design (exhibition and wayfinding), and thesis.

Eric Karnes, MFA (Virginia Commonwealth University). Assistant Professor. Graphic design; logo design, corporate identity, advanced typography, publication design, book design, professional portfolio, thesis.

William Rees, BS (Drexel University) Associate Program Director, Graphic Design. Associate Teaching Professor. Graphic design; logo design, corporate identity, publication design, electronic imaging, print production, professional portfolio, and thesis.

Sandra Stewart, BFA (Tyler School of Art, Temple University) Academic Associate Dean, Antoinette Westphal College of Media Arts and Design. Associate Professor. Graphic design; logo design, corporate identity, publication design, three-dimensional graphics and packaging, and thesis.

Mark Willie, MFA (Boston Museum School of Fine Arts). Teaching Professor. Graphic design; typography, logo design, corporate identity, publication design, book design, professional portfolio, and thesis.

Shushi Yoshinaga, BFA (Philadelphia College of the Arts). Associate Professor. Graphic design; letterform, typography, and thesis.

**Emeritus Faculty**

David Raizman, PhD (University of Pittsburgh). Distinguished University Professor Emeritus. Graphic design; History of Modern Design, Graphic Design; 20th Century & Beyond

---

**Immersive Media**

**About the Minor**

The minor provides a foundation in the principles, techniques and tools used in the design and production of virtual reality, augmented reality (VR/AR) and other forms of Immersive Media, with the opportunity for individualized tailoring according to the student's interests.

**Total Credits: 24.0**

**Interactive Digital Media**

**Major: Interactive Digital Media**

**Degree Awarded:** Bachelor of Science (BS)

**Calendar Type:** Quarter

**Total Credit Hours:** 186.0

**Co-op Options:** One Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 11.0801

**Standard Occupational Classification (SOC) code:** 15-1134; 27-1014

**About the Major**

We design for people, not screens. We are the evangelists of interactivity. We focus on humans and their behavior; on verbs, not nouns. We are empathetic. We care about the user experience. Great content and great design are the tip of the iceberg when it comes to interactive products that engage the mind, heart and body. We aim for design that engages and delights. We are passionate. We create digital products that promote and inspire human activity, and which adapt to individual choice and deliver personalized content. Our products and processes are agile. They can change gracefully over time and still retain their own unique identity. We are future-proof.

Here, we understand that the past is just as important as the future. We learn the core principles to define and stay ahead of the curve. We are flexible and versatile. We know that in an industry of constant change our work is never done and our education never stops. We prepare for this change by building upon a solid foundation in order to discover the trends of tomorrow. To us, work and play have the same definition. We are curious.
We believe that discoveries are made through experimentation and that magical things happen through collaboration. Desktops, laptops, mobile devices, glasses and watches are only the beginning. We know that anything that can be connected will be connected. We are adaptable. While others focus on technology, we choose to focus on creativity. We believe that design and code are inseparable. They are the tools that we use to render the intent of our imagination.

**Total Credits** 186.0

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program-wi) (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program-drexel-writing-center). Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

Students who study interactive digital media can move on to careers as web designers, graphic designers, digital media designers, user research & experience specialists, multimedia artists, interactive designers, web programmers, and web user interface designers.

Co-op Experiences

Some past co-op employers of film and video students include:

- Brownstein Group
- Comcast
- Digitas Health
- eCity Interactive
- Electronic Ink
- Happy Cog

Visit the Drexel Steinbright Career Development Center (http://drexel.edu/scdc) web page for more detailed information on co-op and post-graduate opportunities.

Dual Accelerated Degree

The accelerated degree program enables academically qualified students to earn both their bachelor's degree and a master's degree in digital media — graduating sooner than they would in traditional programs.

Current Drexel digital media students may apply for the accelerated BS/MS degree through the Graduate College after completing 90.0 credits, but no more than 120.0 credits. Contact the Graduate College (http://www.drexel.edu/graduatecollege) for further information.

Minor in Interactive Digital Media

About the Minor

The Interactive Digital Media Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundations in interactivity, including: design and development of websites and mobile applications with the opportunity for individualized tailoring according to the student's interests. It is open to all University students and is administered and advised by the Digital Media program.

Program Requirements

Required Courses

- DIGM 100  Digital Design Tools  3.0
- IDM 221  Web Design I  3.0

Select six of the following:  18.0

- IDM 100  Introduction to Web Development
- IDM 101  History of Web Development
- IDM 211  User Interface Design I
- IDM 212  User Interface Design II
- IDM 215  User Experience Design I
- IDM 222  Web Design II
Facilities

Digital media program facilities include a motion capture and green screen studio, a screening room, DSLR digital still cameras, HD video cameras and lighting equipment, triple boot PowerMac stations (Mac / Windows / Unix) with dual monitors, wacom tablets, game consoles, mobile devices, and 2 undergraduate open labs with 24/7 access.

Additionally, the program houses the RePlay Lab (http://replay.drexel.edu/facilities.html) in the URBN Center which is a collaborative effort between the Digital Media program and the Computer Science department (in the College of Computing & Informatics). At Drexel University, game development does not “live” in solely one department, and so mirrors the true nature of game development in commercial settings.

Interactive Digital Media Faculty

Theo Artz, BFA (Tyler School of Art, Temple University). Associate Professor. Digital media.

Kurt Aspland, BFA (Art Center College of Design). Adjunct Instructor. Illustrator, graphic designer and creative director.

John Berton Assistant Professor. Visual effects, lighting and rendering Computer-Generated Imagery (CGI)

Milady S. Bridges, BA (Rutgers University). Assistant Teaching Professor. Animation principles, modeling, texturing, rigging, enveloping, particle simulations, lighting, compositing, and editing.

Graham D. Clark, MFA (Academy of Art University). Assistant Teaching Professor. Animation and visual effects, stereography.

Chester Cunan, BS (Drexel University). Adjunct Instructor.

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Christopher Fernandez, BS (Drexel University). Adjunct Instructor. Designer and illustrator in the world of interactive design creating innovative, exciting digital campaigns and solutions.

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Troy Finamore, MS (Drexel University) Program Director, Interactive Digital Media. Assistant Teaching Professor. Advertising, design and interactivity.

Bernard Flakoff, BS (Temple University). Adjunct Instructor. Creative content and strategic analytics for innovative and advanced technology platforms.

Kevin Gross, MS (Drexel University). Adjunct Instructor.

Nick Jushchysyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects, VR/Immersive Media. Associate Professor. Visual effects, digital media and animation.

Jason Kirk, MS (Drexel University). Adjunct Instructor.

Frank J. Lee, PhD (Carnegie Mellon University). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Tyler School of Art, Temple University) Program Director, Game Design & Production. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Kenneth Oum, MS (Drexel University). Professor. Computer interface gaming, web development, video production.

Mark Petrovich, MS (Drexel University). Adjunct Instructor.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Ryan Reed, BS (Drexel University). Adjunct Instructor.

Patrick Richardson, MS (Drexel University). Professor. Applied physics, electronics, software scripting, and physical computing.

Tony Rowe, AA (Institute of Computer Technology). Assistant Teaching Professor. Veteran AAA Game Designer, mentor at Drexel’s Entrepreneurial Game Studio. Game history, writing, and level design.

Philip Sinatra, BS (Drexel University). Professor. Website/application programming.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (Vienna University of Technology) Department Head, Digital Media. Professor. Production management, educational use of video games.

Ed Yakovich, MS (Philadelphia University). Professor. HTML/CSS/JS architecture and best practices.

Diane Zatz Adjunct Instructor.

Jichen Zhu, PhD (Georgia Institute of Technology). Associate Professor. Developing humanistic and interpretive framework of computational
technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

**Interior Design**

**Major: Interior Design**

**Degree Awarded: Bachelor of Science (BS)**

**Calendar Type:** Quarter

**Total Credit Hours:** 186.0

**Co-op Options:** One Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 50.0408

**Standard Occupational Classification (SOC) code:** 27-1025

**About the Program**

The undergraduate interior design program explores the behavioral, technological, environmental and aesthetic aspects of interior design within the context of increasingly more complex design projects. Combined with art and art history and general education requirements, a core of interior design courses creates a unique education at the forefront of design. Through academics grounded in problem-solving design studios, cooperative employment, and a dedicated faculty, the Interior Design program prepares students for leadership positions in the industry. The Interior Design program is ranked in the Top 10 by DesignIntelligence, America's Best Architecture & Design Programs.

The BS interior design program is CIDA (Council for Interior Design Accreditation) and NASAD (National Association of Schools of Art & Design) accredited.

**Program Philosophy and Mission**

The interior design program at the Antoinette Westphal College of Media Arts & Design is committed to developing the leaders of tomorrow. We believe that combining a studio-based, sequential interior design curriculum, with broad liberal arts study and the experiential learning of a well-established co-op program develops skillful designers, creative thinkers and potential leaders. We offer each student the opportunity for intellectual and personal growth through a hands-on approach to teaching, advising and collaborating. Developing skilled designers, creative thinkers, responsible citizens and professional leaders through academic, experiential and professional learning is the mission of the interior design program. We seek to cultivate students who acknowledge their responsibilities to the safety and well-being of the public and the stewardship of the environment and who can lead in a multifaceted profession and ever-changing world.

For more information about this major, visit the College’s Interior Design page.

Co-op/Career Opportunities

Interior design is a multi-faceted field and includes careers with interior design firms, architectural firms, and facilities management organizations; in governmental agencies; and in the furniture and textile industries. Full-time paid employment in the profession is an integral component of the program at Drexel. The six-month co-operative education, undertaken in the junior year, provides project-based experience as well as the daily operation of a design firm. Students may opt to do their co-op in Philadelphia or in another location of their choosing. Through a required course and career advisement services offered by the Steinbright Career Development Center, students develop the ability to market themselves and obtain jobs in leading firms, worldwide.

Co-op Experiences

Some past co-op employers of interior design students include:

- Ballinger
- Children's Hospital of Philadelphia Facilities
- Daroff Design
- DAS
- Disney
- Eberlein Design Consultants
- Ewing Cole
- Floss Barber Inc.
- Gensler
- Hillier Lewis
- Herman Miller
- HOK
- Jacobs Associates
- Knoll International
- L2 Partridge
- Marguerite Rogers
- Nelson
- Perkins Eastman
- RJMJ
- Stantec
- University of Pennsylvania
- West Chester University

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

About the Accelerated Degree Program

Qualified students in Interior Design have the option of continuing into the graduate Interior Architecture + Design program to obtain a dual BS/MS degree. This program allows highly motivated students to graduate with both degrees in a total of five years. Students apply for this accelerated program when they complete 90.0 credits of coursework, and before completing 120.0 credits.

Additional requirements for acceptance into the Dual Degree Program:
• Overall GPA of undergraduate coursework – 3.2 minimum
• Overall GPA of interior design studio coursework – 3.5 minimum
• Portfolio Review: interior studio work and foundation visual work
• Essay: reason for application, professional goals and leadership qualities you possess
• Two letters of recommendation speaking to your work ethic and leadership skills

**Evaluation Process**

A committee of interiors faculty reviews the applications and discusses the merits of the student to undergo the intensity and rigor of the final two years of the program. The Committee consists of no less than three members – Director of the Interiors programs, Associate Director BS Interior Design program and the Associate Director MS Interior Architecture & Design program.

Students should visit the Westphal College of Media Arts and Design (http://www.drexel.edu/westphal) for more information.

**Facilities**

The interior design program is housed in the URBN Center, a state of the art design and arts facility on Drexel’s campus. The URBN Center officially opened in September 2012. A hub for creative minds to gather, share ideas and work together to bring those ideas from the mind to the page, and into the world of tomorrow, interiors students benefit from a wide-range of resources including interior design studios, the interior design resource library, a hybrid making lab, wood shop and computer laboratories. The Hybrid Making Lab (http://drexel.edu/westphal/about/overview/making_spaces/HybridMakingLab) is open to all Westphal students and has state-of-the-art fabricating equipment including 3-d printers, laser cutters and CNC Router. The Westphal Print Center (http://drexel.edu/westphal/about/overview/making_spaces/WestphalPrintCenter) is a full-service, low-cost facility and is accessible to students from on and off campus.

The URBN Annex houses a black box theater, screening room and the Leonard Pearlstein Gallery (http://www.drexel.edu/pearlsteingallery). Additional studio and classroom space in the Peck Problem Solving and Research Center and the Design Arts Annex accommodate photography, basic design, painting, sculpture and a full woodworking shop with industrial-quality equipment.

Philadelphia, one of the nation’s major design centers, gives interior design students the vitality of the contemporary arts at local galleries; easy access to many museums, libraries, renowned buildings, as well as design centers located in Philadelphia, New York City and Washington, D.C.

**Interior Design Faculty**

Rena Cumby, BArch, MS (Drexel University) Department Head, Department of Architecture & Interiors. Associate Professor. Interior designer; foundation studies and design education.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Jeff Fama, MArch (State University of New York at Buffalo). Adjunct Instructor. Retail, entertainment, and theater design.

Susan Feenan, BArch (Temple University). Adjunct Instructor. Institutional and commercial architecture.

Gary Garofalo, BS Arch Eng (Pennsylvania State University). Adjunct Instructor. Principal Lighting Design Collaborative; lighting expert, lighting design.

Carla Heikin, MS (Drexel University). Adjunct Instructor. Workplace Strategy.

Peter Johnston, RA, AIA, MArch (University of California). Assistant Teaching Professor. Hospitality and institutional architecture and interior design.

Nicole Koltick, MArch (University of California) Director, Design Futures Lab. Assistant Professor. Researching possibilities for architecture and design through the use of unexpected and innovative interdisciplinary models. Foundation design studios, fabrication and technology seminars.

Maria Kuttruff, MS (Drexel University). Adjunct Instructor. Owner/Principal, Viola Interior Design, LLC. Residential interior design.

William Mangold, NCIDQ, MPhil (City University Graduate Center, NY) Associate Director MS Interior Architecture & Design. Assistant Teaching Professor. Research on theories of space and place.

Diana S. Nicholas, RA, AIA, NCARB, MFA (University of the Arts, Philadelphia) Director of MS Design Research. Assistant Professor. Coordinator, Sustainability in the Built Environment

Karen Pelzer, NCIDQ, BS Interior Design (Drexel University). Assistant Teaching Professor. President, Karen Pelzer Interiors; hospitality design.

Debra Ruben, MS, IDEC, LEED AP, NCIDQ, MS (Drexel University) Director of BS and MS Interiors Programs. Associate Professor. Research on user participation and the design process.

Eric Rymshaw, RA, BArch (Drexel University). Adjunct Instructor. Vice President and Design Principal of Fury Design, Philadelphia.

Elena Sabinson, MS (Drexel University). Assistant Teaching Professor. Technology and visualization methods.

Frances Temple-West, RA, AIA, MArch (Virginia Tech). Adjunct Instructor.

Ada Tremonte, NCIDQ, BS (Drexel University) Associate Director, BS Interior Design. Associate Teaching Professor. President, ada Design Associates; corporate/commercial design.

**Emeritus Faculty**

Sylvia Clark, MArch (University of Pennsylvania). Professor Emeritus.

Marjorie Kriebel, BArch (University of Pennsylvania). Professor Emeritus.

Karín Kuenstler, MS (Bank Street College of Education and Parsons). Professor Emeritus.
Minor in Digital Media

About the Program

The Digital Media Minor requires the completion of eight courses (minimum 24.0 credits). The minor provides basic foundations in digital media, including; 3D animation, game art, and interactivity with the opportunity for individualized tailoring according to the student's interests.

The Digital Media Minor is open to all University students.

Program Requirements

Required Courses:
- DREG 100 Digital Design Tools 3.0
- DREG 105 Overview of Digital Media 3.0
- ANIM 140 Computer Graphics Imagery I 3.0
- GMAP 260 Overview of Computer Gaming 3.0
- IDM 100 Introduction to Web Development 3.0

Select any three courses in ANIM, DREG, GMAP or WBDV 9.0

Total Credits 24.0

Minor in Fine Arts

The Fine Arts minor enables students to develop skills and concepts in the studio arts. Students in studio courses learn to combine skills in using tools and materials, visual theoretical concepts, and new technologies, all of which are necessary for design professionals.

To be eligible for the minor in Fine Arts, a student must have completed a minimum of 24.0 undergraduate credits, have a declared major, and have a minimum GPA of 2.7. The academic credit requirements for the minor must be completed at or before the time of graduation.

Basic design prerequisite courses are required for most Art & Art History courses and some of these may already have been taken for a student's major. However, only 9.0 credits of major-related coursework can be applied to the credits required for the minor in Fine Arts. Students with design credits from other schools or departments may be allowed to apply them to their prerequisite requirements only upon review by the fine art minor faculty advisor.

Minor in Interdisciplinary Smart Initiatives

The Interdisciplinary Smart Initiatives Minor provides students across the University an experience of breadth and depth through interdisciplinary practices and learning. Students will develop skills and knowledge in the topics associated with problem solving, innovative technology, leadership and immersive participatory experiences. Skills and knowledge will be delivered through collaborative teaching and coursework, skill building, experimentation, experiential learning, and engaging research initiatives.

This minor provides the opportunities to engage in a variety of University venues and initiatives that places students on the leading edge of their chosen paths. The Interdisciplinary Smart Initiatives Minor is intended to build on experiential learning that is the foundation of a Drexel education.

Admission Requirements

The Interdisciplinary Smart Initiatives Minor is open to all University students that meet the criteria for acceptance. Because of the nature of the minor, success is dependent upon students showing self-discipline, being highly motivated and self-reliant. All applications for the minor will be submitted to the director of the minor.

Please contact Dr. Ulrike Altenmüller-Lewis at ua27@drexel.edu with questions concerning the INSI Minor.

The following are the requirements that students must meet to be considered:
- **Required Essay:** Student statement of interest and desired goals
- **Required Recommendation:** Two letters of recommendation from faculty that speaks to the student’s ability to be collegial and collaborative, exhibit initiative and resourcefulness and ability to work independently.

Choose 9 credits from the following subject areas:
- Antoinette Westphal College of Media Arts & Design
- INTR 310 | Sustainability: History, Theory and Critic
Minor in Jazz and African-American Music

The minor in jazz and African-American music takes advantage of Drexel faculty expertise in those areas. This minor can include course work in jazz history, African-American music, jazz theory, private study in jazz performance, and ensemble work in several ensembles devoted to jazz.

| MUSC 121 | Music Theory I | 3.0 |
| MUSC 125 | Ear Training I | 1.0 |
| MUSC 126 | Ear Training II | 1.0 |

**Minor in Music**

The minor in music requires 26.0 credits, including work in music theory, history, applied music (class or private lessons), and ensemble performance, and 6.0 credits of music electives.

| MUSC 121 | Music Theory I | 3.0 |
| MUSC 125 | Ear Training I | 1.0 |
| MUSC 126 | Ear Training II | 1.0 |
| MUSC 241 | Private Lesson (3 terms) | 6.0 |
| MUSC 300 | Improvisation | 3.0 |
| MUSC 331 | World Musics | 3.0 |
| MUSC 333 | Afro-American Music USA | 3.0 |
| MUSC 336 | History of Jazz | 3.0 |

**Minor in Performing Arts**

Designed for the student who wishes to explore the fields of dance, music and theater rather than specialize in one area, the minor in performing arts provides motivated students the opportunity to learn about all three areas while performing for two years in one or more of the department's performing groups.

| DANC 210 | Introduction to Dance | 3.0 |
| MUSC 130 | Introduction to Music | 3.0 |
| MUSC 241/242 | Applied music (two terms selected from MUSC) | 4.0 |
| THTR 115 | Theatrical Experience | 3.0 |
| THTR Elective | 3.0 |
| Dance Elective | 3.0 |
Minor in Retail

The retail minor, administered by the Design & Merchandising Program, provides basic foundations in retail operations, buying and merchandise planning and e-commerce. The curriculum allows the opportunity for individualized tailoring according to a student's interests. The minor is open to all Drexel University students, and requires the completion of eight or nine courses for a minimum of 24.0 credits.

Required Courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>DSMR 231</td>
<td>Retail Operations *</td>

</tr>
<tr>
<td>DSMR 397</td>
<td>Retail Practicum</td>
<td>3.0</td>
</tr>
</tbody>
</table>

Total Credits 24.0

* All courses are currently open to all DSMR students. DSMR 231 and DSMR 232 are required for all students enrolled in DSMR and the retail minor. The three elective courses can be delivered during other quarters as required. All courses will be restricted to appropriately include the students enrolled in the retail minor. As the industry and curriculum change, courses will be added and adapted accordingly.

Minor in Somatics

About the Minor

An understanding of movement and body language has become increasingly important across many fields; in communication, corporate training, movement therapy, education, performance, rehabilitation, sport and fitness. Physical health, clear communication and effective leadership all rely on an awareness of how we carry our bodies through our lives. The Somatics Minor provides an in-depth study of the body, building from an understanding of its functional/structural basis, to its patterns and habits. We focus on how to interpret, analyze, and articulate somatic concepts and develop strategies for application.

Minor in Sports Media Production

About the Minor

The Sports Media Production Minor is a gateway for students committed to pursuing a career and a meaningful introduction for those who are intrigued but uncertain about sports media as a profession. Students are required to take the same foundational shooting & lighting, editing, sound, and studio operations courses as the TV Production and Media Management and Film and Video majors and minors. They are also required to take a TVIE sports media strategy course as well as SMT digital and sports media history courses that will provide a greater academic and contextual understanding of the profession. With additional
courses in actual physical production, on-air performance, and technology courses.

**Minor in Sustainability in the Built Environment**

The intent of this minor is to prepare students to engage and analyze future design challenges from a sustainability perspective. Students completing this program will be able to approach these challenges in a resourceful and insightful way, with a solid foundation of sustainability principles. The emphasis on collaboration and trans-disciplinary teamwork will allow students to serve as agile leaders in their future careers and be active participants in the critical discourse of their field.

In addition to the 15.0 credits of core courses, students select 9.0 credits of electives. The list below will be updated as new courses in sustainability become available. Students having a question about the inclusion of a course not currently listed as a possible elective should check with the coordinator for this minor.

**Additional Electives**

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

Students select three of the following (or alternative options with the permission of the advisor for this minor):

- ANTH 360 Culture and the Environment
- ARCH 348 Studies in Vernacular Architecture
- ARCH 463 Emerging Architectural Technology
- ARCH 465 Energy and Architecture
- COM 317 [WI] Environmental Communication
- INTR 465/ ENVP 360 Special Topics in Interior Design
- ENVS 260 Environmental Science and Society
- PHIL 341 Environmental Philosophy
- SOCI 341 Environmental Movements in America
- SOCI/ENVP 345 Sociology of the Environment

**Total Credits** 24.0

* The elective list will be updated as new courses in sustainability become available. If a student has questions regarding inclusion of a course not on this list, he or she should see the Advisor for the Sustainability in the Built Environment Minor Program.

**Minor in Television Industry and Enterprise**

**About the Program**

Students with a 3.0 or higher G.P.A. may apply for the TV Industry & Enterprise minor program. Once accepted, they take 21.0 credits of required courses that provide a basic foundation in the historical, financial, and programming elements of the television industry. The remaining 6.0 credits of study provide students the opportunity to have more hands-on production experience and/or to delve more deeply into the academic study of a specific area of interest.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List on the University Writing Program website. Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Music Industry

Major: Music Industry
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 187.0 - 188.0
Co-op Options: Two Co-ops (Four years)
Classification of Instructional Programs (CIP) code: 50.1003
Standard Occupational Classification (SOC) code: 27-2041

About the Program

The degree in music industry offers the highly motivated student a program of study that combines education in music, music industry practices, and music technology with career preparation. Two concentrations are offered—Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP)—providing hands-on experience and a strong academic foundation in relevant areas of this rapidly changing industry. The music industry curriculum is divided into four areas which are combined with cooperative experience: general education, music core, music industry core, and concentration requirements.

In an industry where the process of career building often begins with a few key contacts, the cooperative education program provides Drexel students the opportunity to meet industry professionals and network. The program prepares students for careers in the music industry in such diverse positions as recording engineer, music producer, sound designer, music lawyer, business manager or music publisher. The co-op experience during the sophomore and junior year summer terms involves full-time career-related employment, during which students gain valuable insight into how the entertainment industry works.

About the Concentrations

The major offers two concentrations: Music Industry Business and Recording Arts (MIBU) and Music Production (RAMP):

- The Music Industry Business (MIBU) concentration provides a rigorous academic foundation complemented by a real-world, highly-intensive business experience. This mission is realized through the students' participation in the MAD Dragon Music Group, a group of student-run enterprises including: MAD Dragon Records, MAD Dragon Live, MAD Dragon Publishing, and MAD Dragon Marketing.

- The Recording Arts and Music Production (RAMP) concentration focuses on the techniques and technologies of music and audio production. As well as providing the technology-oriented student with the necessary skills to perform as an audio engineer or record producer, the concentration teaches students a full range of industry functions including post-production audio, live sound engineering, and music and audio freelancing skills. The concentration encourages the technology student to interact with the students in the business concentration by recording, mixing and mastering the music for MAD Dragon Music Group projects, and engaging in live performance production.

All Music Industry students qualify to apply for a minor in business administration after completing their music industry core requirements. This emphasis on business courses as part of the core requirements is one of the foundations of the program.

Special Admissions Considerations

Students wishing to be admitted to the music industry major must meet or exceed the general requirements for admission to the University and the College of Media Arts and Design.

The program no longer accepts hard-copy portfolios. However, when applying to the Music Industry program, applicants are encouraged to use the portfolio portal provided on the Admissions Instructions webpage to upload electronic examples of pertinent activities (music and/or business and entrepreneurial), as well as a resume of music industry related experience.

In their major-specific essays, applicants should address their reasons for selecting the music industry major at Drexel and share their passion for this unique area of study.

For more information about this major, visit the College's Music Industry (http://www.drexel.edu/westphal/academics/undergraduate/MIB) page.

Degree Requirements

All students take the same general education, music industry core and business courses. Students choose their concentration at the time of admission; however it is possible to switch as late as the beginning of junior year.

Concentrations:

- Music Industry Business (MIBU)
- Recording Arts and Music Production (RAMP)

About the Concentrations

Music Industry Business (MIBU)

- Concentration provides a rigorous academic foundation complemented by a real-world, highly-intensive business experience. This mission is realized through the students' participation in the MAD Dragon Music Group, a group of student-run enterprises including: MAD Dragon Records, MAD Dragon Live, MAD Dragon Publishing, and MAD Dragon Marketing.

Recording Arts and Music Production (RAMP)

- Concentration focuses on the techniques and technologies of music and audio production. As well as providing the technology-oriented student with the necessary skills to perform as an audio engineer or record producer, the concentration teaches students a full range of industry functions including post-production audio, live sound engineering, and music and audio freelancing skills. The concentration encourages the technology student to interact with the students in the business concentration by recording, mixing and mastering the music for MAD Dragon Music Group projects, and engaging in live performance production.

All Music Industry students qualify to apply for a minor in business administration after completing their music industry core requirements. This emphasis on business courses as part of the core requirements is one of the foundations of the program.

Special Admissions Considerations

Students wishing to be admitted to the music industry major must meet or exceed the general requirements for admission to the University and the College of Media Arts and Design.

The program no longer accepts hard-copy portfolios. However, when applying to the Music Industry program, applicants are encouraged to use the portfolio portal provided on the Admissions Instructions webpage to upload electronic examples of pertinent activities (music and/or business and entrepreneurial), as well as a resume of music industry related experience.

In their major-specific essays, applicants should address their reasons for selecting the music industry major at Drexel and share their passion for this unique area of study.

For more information about this major, visit the College's Music Industry (http://www.drexel.edu/westphal/academics/undergraduate/MIB) page.

Degree Requirements

All students take the same general education, music industry core and business courses. Students choose their concentration at the time of admission; however it is possible to switch as late as the beginning of junior year.

Concentrations:

- Music Industry Business (MIBU)
- Recording Arts and Music Production (RAMP)
• Music Industry: Business (MIBU) Concentration
• Music Industry: Recording Arts & Music Production (RAMP) Concentration

Students are also able to take courses in any other concentration as long as they fulfill the prerequisite requirement(s) and there is room in the class to accommodate the student.

### Total Credits

| Drexel University | 189 |
**About the Accelerated Degree Program**

The BS in Music Industry/MBA program offers students a program that combines an undergraduate degree in music business and technology with an MBA degree awarded by the Drexel LeBow College of Business. The program is designed to allow students to complete both the bachelor's degree and the Master of Business Administration degree in five years.

The program is offered to qualified students who apply for this option prior to the end of freshmen year or prior to the completion of 90 credits. All students who apply for this option must take the GMAT entrance exam.

Students selected for this program will generally have a minimum of 1350 on the SAT, a GPA of 3.5 or better, and rank in the top 10% of their high school graduating class. A strong candidate for this program will have taken significant AP coursework while in high school.

BS/MBA students may be waived from two MBA Enterprise Management courses, assuming a grade of B or better is earned in specified undergraduate courses. Students can review the Waiver Policies for the Statement of Curriculum Standing on the LeBow College's website for additional information.

The above conditions hold only for fully accepted BS/MBA students as identified by Enrollment Management.

**Additional requirements for the dual degree program:**

- A minimum of 3.2 cumulative GPA must be maintained throughout the entire undergraduate portion of this program or the student will not be able continue on to the MBA.
- Students must take the GMAT examination and achieve a minimum score of 570 prior to the end of the tenth term in order to continue in the program. It is recommended that students take the GMAT examination late in the student's third year.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program), (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center). Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Music Theory and Composition

About the Minor

The minor in music theory and composition is aimed at people who are writing their own music or who would like to begin doing so. Students will take courses in music theory, arranging, composition, and digital composition, and end with a portfolio of several completed pieces.

Requirements

<table>
<thead>
<tr>

Photography

Major: Photography
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0605
Standard Occupational Classification (SOC) code: 27-4021

About the Program

The Drexel University Photography program teaches students how to develop a unique photographic vision using a combination of aesthetics and technology. Using both applied and theoretical teaching methods and blending traditional processes with current digital technologies, the photography curriculum provides aspiring photographers with the breadth of experience and knowledge required to succeed in today’s marketplace.

The photography foundation courses are the same for each student until their third year, at which point they design a custom path of study that culminates in their senior thesis portfolio. Our alumni’s achievements reflect the diversity built into our program. They own successful photography studios, teach in high school and college programs, serve
as curators, work as magazine photo editors and operate their own digital illustration firms.

The College's extensive photographic facilities (http://www.drexel.edu/westphal/undergraduate/PHTO/Facilities) are available to every photography major at Drexel.

Additional Information
For more information about this major, visit the College's Photography (http://www.drexel.edu/westphal/undergraduate/PHTO) website.

Total Credits: 181.0
Photography Faculty

Cali Capodici, BA (Montclair State University). Adjunct Instructor. Advertising portfolio development; photography production and photography & business.

Joanne Carrick, M.Ed (Tyler School of Art, Temple University). Adjunct Instructor. Photography and intermediate photography.

Julia Cybularz, MFA (The School of Visual Arts). Adjunct Instructor. Photography; color photography, junior project in photography, advanced DSLR.

Trevor Dixon, BFA (University of the Arts). Adjunct Instructor. Advanced studio photography.

Michael Froio, BS (Drexel University). Adjunct Instructor. Photography; intermediate photography and fine black and white printing.

Niko Kallianiotis, MFA (School of Visual Arts). Adjunct Instructor. Photography; intermediate photography and photojournalism.

Co-op/Career Opportunities

Photographers pursue careers in a wide variety of fields. Primary choices among Drexel graduates include journalism, illustration, fashion and advertising, and fine arts.

Recent co-op placements have included:

- Micheal Creagh, New York City
- The Edywnn Houk Gallery, New York City
- Jonathan Pushnik, Advertising Photographer, Philadelphia, PA
- Philadelphia Magazine, Philadelphia, PA
- Jason Varney, Editorial Photographer, Philadelphia
- Saturday Night Live, New York City

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Photography

About the Minor

The minor in photography gives students a thorough understanding of photographic practices using a combination of aesthetics and technology. This flexible minor has been developed to accommodate both Antoinette Westphal College of Media Arts and Design majors as well as majors from any other college. It is an excellent choice for students who are majoring in marketing, communications and journalism. Many employers in these fields are now routinely request that candidates have a good working knowledge of Photoshop and photographic practices.

* See degree requirements (p. 193).
George McCardle, BS (Drexel University). Adjunct Instructor. Digital Photography III

Andrea Modica, MFA (Yale University). Professor. Photography; portraiture, photojournalism, palladium printing, and thesis.

Benjamin Riley, BS (Drexel University). Adjunct Instructor. Photography; intermediate photography and studio photography.

Diana Rossi, M.Ed (Arcadia University). Adjunct Instructor. Photography and intermediate photography.

Paul Runyon, BFA (The University of New Mexico) Program Director, Photography. Associate Professor. Studio photography, view-camera photography, studio lighting, business aspects of photography.

Ashley Smith, MFA (School of Visual Arts). Adjunct Instructor. Studio photography

Amanda Tinker, MFA (Temple University). Assistant Teaching Professor. Photography, history of photography, historical and alternative processes, and intermediate photography.

Jason Varney, BS (Drexel University). Adjunct Instructor. Studio photography

L. Kylie Wright, BA (University of Virginia). Assistant Teaching Professor. Photography; digital photography, and master printing.

Product Design

Major: Product Design
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 187.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 50.0404
Standard Occupational Classification (SOC) code: 27-1021

About the Program

Product design combines the fields of art, business, and engineering to design the products people use every day. The program in product design focuses creativity and intellect, and prepares students for careers in a range of product design fields including corporate product design, design consulting, entrepreneurial endeavors, sustainable product development, and global design initiatives.

The major in product design is centered on teaching students the skills to develop and design products for a vast array of industries, specializing in multidisciplinary design research focused on product development and commercialization. It will also encourage collaboration in green design, sustainability and innovation in product development, facilitating and combining the fields of art, business, engineering and technology.

Students have the opportunity to create products ranging from furniture and toys to medical devices and consumer electronics in design competitions and charrettes. Students learn in state-of-the-art facilities that include a modeling shop and studio, laser cutters, 3D printers, rapid prototypers and molding clays and tools. The modeling shop and studio are large design-centered spaces, built to promote and sustain the studio culture students will enter upon graduation.

Students enrolled in the product design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

For more information about this major, visit the College’s Product Design (http://www.drexel.edu/westphal/academics/undergraduate/PROD) page.

Degree Requirements

In addition to the following requirements for graduation, students enrolled in the Product Design major will be expected to pursue a minor outside of product design that will allow them to apply their design capabilities toward a specific area of expertise.

Co-op/Career Opportunities

Product designers have careers in a wide range of industries including consumer electronics, housewares, furniture, fashion accessories, medical devices, toys, automotive and transportation. The work of product designers improves the usefulness and appearance of countless products that contribute to the quality of our work and personal lives.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Product Design

About the Minor

Students in this minor—through a combination of three studio courses and four applied lecture courses—learn to combine skills in creative problem solving with a visual product design process. Students develop product concepts and collaborate on the development of product ideas, including the creation and integration of new technologies, sustainability, healthcare and socially responsible design, all of which are beneficial for design professionals.

The minor is specifically created to offer students a unique multi-disciplinary studio experience. Students will develop skills in the rapid visualization of ideas, creative problem solving, transformative design thinking and an understanding of the product development process in a collaborative setting. This minor is offered to all students having an interest in developing product ideas, including students from the College of Engineering, the LeBow College of Business, and the School of Biomedical Engineering as well as College of Media Arts and Design students who would like to add a product focus to their design degree.

Academic requirements

To be eligible for the minor in product design, a student must have completed a minimum of 30.0 undergraduate credits, have declared a major, and have a minimum GPA of 2.7. No prerequisite courses are required. Students may be encouraged to augment or prepare for this minor. Only upon review by the faculty advisor for the minor will students with design credits from other institutions or departments be allowed to require. Students may be encouraged to augment or prepare for this major, and have a minimum GPA of 2.7. No prerequisite courses are required. Students can fulfill a writing-intensive requirement. For the most up-to-date list of courses, visit the Intensive Course List at the University Writing Program

Screenwriting

Minor in Screenwriting

The minor in screenwriting is intended to guide students from the acquisition of foundational screenwriting skills through the completion of a full-length script for film or television. Fifteen of the credits are directly craft-oriented, teaching students what they need to know to translate their ideas into a format suitable for production; the other nine credits are dedicated to background knowledge intended to inform creative thinking and develop a student's individual voice.

Film & video majors should note that they will be taking half of the courses in the screenwriting minor as part of their degree requirements, making this minor a relatively simple addition to their education.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the...
attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Screenwriting and Playwriting**

**Major:** Screenwriting and Playwriting  
**Degree Awarded:** Bachelor of Science (BS)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 182.0  
**Co-op Options:** One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 50.0504  
**Standard Occupational Classification (SOC) code:** 27-3043

**About the Program**

The Westphal College Screenwriting & Playwriting program guides students in their pursuit of a career writing for the stage or screen. The program emphasizes the principles of dramatic writing through a practical hands-on approach to instruction in small classes. Our graduates take away the skills, experience, and confidence to gain an edge in a rewarding and competitive field.

Students first acquire the essential skills of dramatic story telling, then apply those abilities to the creation of scripts that conform to professional standards. Drexel's pioneering co-op affords hands-on experience in the field, working alongside professional artists. Drexel marks the beginning of the life-long process of developing a writer’s eye that sees the world from a different angle and allows writers to tell their own uniquely compelling stories.

The Screenwriting & Playwriting Program also offers a Minor in Screenwriting (p. 197).

For more information about this major, visit the College's Screenwriting & Playwriting (http://www.drexel.edu/westphal/undergraduate/SCRP) page, or contact the Program Director:

**Degree Requirements**

**General education requirements**

- ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
- MATH 119 Mathematical Foundations for Design 4.0
- UNIV A101 The Drexel Experience 2.0
- Required Arts and Humanities (excluding ENGL courses) - students elect a minimum of 9.0 credits
- Required Social Science students elect a minimum of 9.0 credits 8.0
- Electives 9.0

**Visual Studies Requirements**

- ARTH 102 History of Art II: Renaissance to Romanticism 3.0
- ARTH 103 History of Art III: Modern Art 3.0
- DIGM 220 Digital Still Imaging I 3.0
- VSST 108 Design I for Media 3.0

**Screenwriting and Playwriting Requirements**

**Literature requirements**

- ENGL 315 [WI] Shakespeare 3.0
- Select one of the following:
  - ENGL 200 [WI] Classical to Medieval Literature 3.0
  - ENGL 20 Renaissance to the Enlightenment 3.0
  - ENGL 20 Romanticism to Modernism 3.0
- Select one of the following:
  - ENGL 203 [WI] Post-Colonial Literature I 3.0
  - ENGL 202 Post-Colonial Literature II 3.0
- Literature (ENGL) electives 6.0

**Cinema studies/Theatre studies requirements**

- ENGL 216 [WI] Readings in Drama 3.0
- THTR 121 [WI] Dramatic Analysis 3.0
- FMST 101 Film History I: Emergence 3.0
- FMST 102 Film History II: New Waves 3.0
- Theatre (THTR) choice elective (any advanced acting, directing or production course) 3.0
- Cinema studies (FMST Film Studies or TVST Television Studies) elective 3.0

**Methods requirements**

- FMVD 110 Basic Shooting and Lighting 3.0
- FMVD 115 Basic Editing 3.0
- FMVD 120 Basic Sound 3.0
- FMVD 215 Narrative Video Production 3.0
- THTR 210 Acting: Fundamentals 3.0
- THTR 211 Acting: Scene Study 2.0
- THTR 240 Theatre Production I 3.0
- THTR 320 Play Direction 3.0

**Writing requirements**

- SCRP 220 Playwriting I 3.0
- SCRP 225 Playwriting II 3.0
- SCRP 270 [WI] Screenwriting I 3.0
- SCRP 275 [WI] Screenwriting II 3.0
- SCRP 280 [WI] Writing the Short Film 3.0
- SCRP 310 Literature for Screenwriters 3.0
- SCRP 370 Screenplay Story Development 3.0
- SCRP 495 Senior Project in Dramatic Writing I 3.0
- SCRP 496 Senior Project in Dramatic Writing II 3.0
- SCRP 497 Senior Project in Dramatic Writing III 3.0
- WRIT 225 [WI] Creative Writing 3.0

**Writing Choice:** select one of the following courses:

- COM 160 Introduction to Journalism 3.0
- COM 181 Public Relations Principles and Theory 3.0
- WRIT 220 [WI] Creative Nonfiction Writing 3.0

Select one of the following two-course sequences:

- SCRP 382 Playwriting Workshop I 6.0
- & SCRP 383 Playwriting Workshop II 6.0
- SCRP 380 Screenwriting Workshop I 6.0
- & SCRP 381 Screenwriting Workshop II 6.0

**Total Credits:** 182.0

**CONCENTRATION OPTIONS**

**Concentration in Writing Comics & Graphic Novels**

- SCRP 260 Writing Comics 3.0
- SCRP 263 Comic Book Editing 3.0
- SCRP 266 Graphic Novel Art and Industry 3.0
- SCRP 384 Comic/Graphic Novel Writing Workshop I 3.0
- SCRP 385 Comic/Graphic Novel Writing Workshop II 3.0

**Concentration in Narrative Game Writing**

**Co-op/Career Opportunities**

Dramatic writing is writing for production — work intended for performance on the stage or screen. These days, “screen” can mean movie, TV, or computer, and the work can be anything from full stage plays to 15-second commercials to video game scripts. As the entertainment industry changes, so do the outlets for our students and graduates.

**Co-op Experiences**

By working for film and television production companies, theater organizations, entertainment management companies, magazines, advertising and public relations firms, and other professional writers, Screenwriting & Playwriting students gain valuable insights into how the entertainment industry works. In an industry where the process of building a career often begins with a few key contacts, the co-op program gives Drexel students the chance to begin shaping their own professional networks.

Screenwriting and Playwriting students secured Co-op or post-graduation positions with:

- IM Global
- Disney Video Animation
- Marvel Comics
- Lionsgate Films
- Skyless Games
- Arden Theater Company
- Campbell’s Soup
- Marvel Studios
- SyFy Network
- Nickelodeon
- Dynamite Entertainment
- prominent Hollywood talent managers
- The Playwright’s Center
- Valiant Entertainment
- Sciencefiction.com
- Major League Baseball Productions
- Panels.net
- Voice of America
- Fantagraphics
- the production office of “Star Trek: Enterprise”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

**Screenwriting and Playwriting Faculty**

Bruce Graham, BA (Indiana University of Pennsylvania). Associate Teaching Professor. Playwright.

Matthew Kaufhold, MA (University of North Carolina) Program Director, Screenwriting and Playwriting. Associate Teaching Professor. Screenwriter, Producer.

Thomas Quinn, MFA (Temple University) Program Director, Film & Video. Assistant Professor, Writer, Director, filmmaker.
Andrew Susskind, BA (Harvard University) Program Director of TV Production & Media Management. Associate Teaching Professor. Producing for Television, The Sitcom, Directing Single and Multi-Camera

TV Production & Media Management

Major: TV Production and Media Management
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 186.0
Co-op Options: One Co-op (Four years)
Classification of Instructional Programs (CIP) code: 10.0202
Standard Occupational Classification (SOC) code: 27-2012

About the Program

The TV Production and Media Management program educates students to conceive, produce, and market entertainment through current and evolving television platforms. The program addresses the creative aspects, the craft, and the business of producing fictional and nonfictional content, and prepares students to work in all distribution formats.

The TV Production and Media Management program combines the resources of DUTV, Drexel’s fully-equipped, high-definition television station, with a comprehensive academic program to provide students with foundational experiences in the development, writing, production, editing, programming, multi-platform distribution, management, and promotion of television and internet content.

The major offers a course of study of 186.0 credits distributed over courses focused on development, production and post-production, business, and history. Students are taught by and work with a faculty of notable industry professionals whose experience, passion, and contacts help prepare them to enter and navigate the competitive world of television.

The major is designed as a four year, co-op program. For more information about this major, visit the College’s TV Production and Media Management (http://www.drexel.edu/westphal/academics/undergraduate/TELE) page.

Degree Requirements

All TV Production & Media Management majors take the same core courses for the first five terms (through the winter term of their sophomore year). These core courses encompass production fundamentals, digital media fundamentals, an introduction to television industry and enterprise, and beginning screenwriting. Finally, there is an introductory TV studio course, TV field course, and television studies course. The core requirements build a foundation for further advanced and specialized courses, taught in the student’s area of concentration.

By the spring term their sophomore year, students select one of the following concentrations:

- **TV Comedy & Drama**: Students who choose this track gain an education in fictional programming. They will further hone their production skills in lighting and editing; they will be introduced to acting so they can better understand directing actors.

- **TV Industry & Enterprise**: Students choosing this track gain an education in the business of television, completing three courses in the LeBow College of Business: business law, entrepreneurship, and marketing. They learn about the financial aspects of television and are introduced to managing the IT area as it relates to television.

• **TV News & Non-Fiction Production**: Students who choose this track gain an education in documentary, news and nonfiction programming. They will hone their production skills in lighting and editing; they will learn how to direct TV studio programs and remote programs using multiple cameras.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

As the fourth largest television market and home of Comcast, one of the most rapidly expanding cable companies in the United States, Philadelphia is a major national television center. The TV Production & Media Management program takes advantage of this in numerous ways, including adjunct faculty, guest speakers, scholarship possibilities, internships, co-op experiences, and joint ventures. The major interacts with the Paul F. Harron TV Studios, which houses DUTV (http://dutv.drexel.edu/television/Main.html)’s fully HD studio, where students produce projects as part of their course work.

TV majors have done internships and Co-ops in New York, Philadelphia, and Los Angeles, working for production companies, talent and casting agencies, and television stations.

Drexel also offers a graduate level program in Television Management, and some students in the undergraduate major may wish to apply to the graduate program.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Television Facilities

DUTV, an educational access channel operated by Drexel University, provides a laboratory for students majoring in Television. The Paul F. Harron TV Studios houses DUTV and its fully-HD shooting studio, providing students with work space as well as hands-on technical and management experience that is so essential to the program.

Film and video facilities include a shooting studio with a green screen, large and small screening rooms, a fully equipped television studio; digital editing facilities; specially outfitted multimedia rooms for all courses; digital video camcorders; 16mm film cameras, and lighting and audio equipment.
a second field. It acknowledges the specialization that is characteristic of the majors in the College and the expectations of the professional fields for which our students are being prepared. Simultaneously, it recognizes the breadth and rapidly changing nature of many disciplines and permits a student who has acquired a basic working knowledge of a specific aspect of media arts and design to investigate a clearly defined alternative.

Admission to the program is limited to currently matriculated College of Media Arts and Design students who have completed the major-intensive sophomore year and experienced a co-op placement or completed their junior-year courses. The following items are required as part of the application:

- A student-generated, individualized plan of study, developed with and signed by a member of the Westphal Studies Program Advisors Committee
- A statement in writing of the student’s goals in applying to the major and the rationale of how the proposed plan of study addresses those goals
- A definition of appropriate co-operative education placement if the student has not completed a six-month employment in the field of his or her major
- A letter from the student’s current program director

Approval by the Westphal Studies Program Advisors Committee is required for admission to the major; it is not automatic upon request. The committee must be convinced by the validity of the applicant’s reasons for applying, the proposed study plan, and accompanying documentation. Details about the application procedure may be obtained from the director of Westphal Studies Program.

**Recommended Plan of Study**

This program requires an individualized plan of study. Students sign off on this agreed-upon plan with the Director of the Studies of the Westphal Studies program. A student must have completed two terms of junior year in a College of Media Arts and Design major to be eligible for admission into this major.

The student, in consultation with her/his advisor and the director of the program, devises a personalized interdisciplinary study plan. The approved plan of study provides a rationale for the concentration and how the elective credits are to be used. This plan of study must be completed and approved before admission into the major.

** The Close School of Entrepreneurship **

In today's extremely competitive global workforce, there is an increased value and demand for initiative, independence, innovation, and the intellectual dexterity to rethink of old ways of doing things and invent new ones. The Charles D. Close School has pioneered an approach to entrepreneurship education that addresses this need by teaching students to be entrepreneurial thinkers and doers, preparing them to meet the world market on solid footing and to create their own opportunities.

The Close School defines entrepreneurship as more than starting a company or sparking innovation within established organizations. At the Close School, entrepreneurship is a habit of mind and attitude; a skill set applicable to pursuing innovation in business, personal and career contexts; we assist students in cultivating an approach to life build around collaboration, negotiation and communication. The Close School's
academic programs prepare students to face the challenges of self-employment and new venture creation in an evolving 21st century workforce.

- Health Innovations (p. 210)
- Social Entrepreneurship (p. 210)

**Background**

Charles D. Close was a groundbreaking entrepreneur who experienced success as founder, leader, and investor in a series of technology companies. He also was one of Drexel University’s most distinguished alumni, graduating in 1936 with a degree in electrical engineering.

Mr. Close was the former Chairman of the Board of Expansion Seal Technologies Group, and former Chairman of the Board of CDS Analytical. Earlier in his career he was President of Continental Disc Corporation, Technical Investor at Kellet Corp, President and Chairman of Compudyne Corporation, and Founder and President of Fluid Controls Company. Over the years, he also published a number of technical articles on instrument controls and systems. Mr. Close was a Director at J.W. Microelectronics, Athena Controls, Kellet Corp., Chemical Data Systems, Instrument Society of America, and General Components. In addition, he was a trustee for the privately-held CDC Fund.

In addition to the Drexel 100, Mr. Close was also inducted into the Alumni Circle of Distinction for the College of Engineering. As a student, he was President of the Chess Club and a member of the American Institute of Electrical Engineers.

He and his late wife, Barbara, established a philanthropic legacy that included a sizable anonymous gift in 1999 to Drexel University that helped launch and build the Baiada Institute for Entrepreneurship (http://www2.lebow.drexel.edu/Baiada).

In March 2009, the Charles and Barbara Close Foundation gave Drexel $1.5 million to establish the A.J. Drexel Autism Institute, and in December 2012, the foundation’s gift of $12.5 million established the Charles D. Close School of Entrepreneurship.

Mr. Close, whom friends knew as “Charley,” enjoyed skiing, music, science, and was an avid golfer and member of the Cedarbrook Country Club in Blue Bell, PA. Charles D. Close passed away on September 6, 2009, at the age of 94. His legacy lives on in the generations of future entrepreneurs being educated in the Charles D. Close School of Entrepreneurship.

In 2014, the Charles D. Close School of Entrepreneurship became the first first freestanding school of entrepreneurship in the nation to offer degrees.

**Goals and Objectives**

- Infuse entrepreneurship as a way to think, learn, and succeed across the University in terms of values, behaviors, and process, regardless of major.
- Provide a coordinated approach to entrepreneurship education throughout Drexel University.
- Complement and enhance undergraduate and graduate education outcomes for all Drexel University students by developing entrepreneurial thinking within the curriculum and opportunities for entrepreneurial practice.
- Provide students with different paths to engage, learn, and live entrepreneurship, depending on their personal level of interest and career ambitions, having exposed all to introductory concepts and approaches.
- Integrate academic and campus life activities as they relate to entrepreneurship providing multiple paths that align with student aspirations.
- Encourage and create a supportive academic and physical environment to allow the pursuit of student and faculty passions, and big ideas.

**School Offerings**

The Close School of Entrepreneurship offers students various paths to becoming an “entrepreneur.” The School is based on the premise that all students have the potential to be innovative: to take their ideas, in whatever context, and make their ideas a reality. The curricular and co-curricular programs are formulated to accommodate students’ potential paths to learning and living entrepreneurship.

The School’s curricular initiatives emphasize interdisciplinary coursework in collaboration with other academic units. The School offers a BA in Entrepreneurship and Innovation, minors in Energy Innovations, Entrepreneurship and Innovation, Health Innovations, and Social Entrepreneurship. In addition, elective courses with minimal or no prerequisites are available to all Drexel students to integrate entrepreneurial education with all other academic disciplines at the University. The School collaborates with the Office of Research and Technology Commercialization in developing programs and activities focused on academic entrepreneurship. Through the appointment of joint interdisciplinary faculty, a core of clinical faculty (serial entrepreneurs and seasoned executives) and tenured/tenure-track faculty, the Close School will cultivate a research agenda, providing thought leadership to academics and practitioners. Finally, the Close School of Entrepreneurship collaborates with regional and national organizations and the entrepreneurial community to advance innovation and entrepreneurial initiatives.

**Entrepreneurship Living-Learning Community**

The Close School of Entrepreneurship has created a community of young entrepreneurs at Drexel. Students of all backgrounds and interests, united by dreams of starting companies and pursuing their entrepreneurial passions, participate in a unique residential program supported by dedicated faculty and staff. This close-knit community of enterprising students lives together and enjoys targeted training, fun activities, and
field trips as well as experienced and connected mentors able to foster their innovative aspirations.

The Entrepreneurship Living-Learning Community hosts approximately twenty incoming freshmen annually and is comprised of students from different majors across the University. All full-time entering freshmen planning to live on campus with an interest in innovation and entrepreneurship are encouraged to apply regardless of undergraduate major. Students in this community all live on the same floor and wing of Myers Hall.

Entrepreneurship Co-Op

The co-op experience is the hallmark of a Drexel education. Drexel students intersperse one or three six-month periods of work within their academic plans of study. By weaving together scholarly and practical experiences, Drexel students graduate with a unique set of skills that open up a diverse array of professional opportunities upon graduation.

The Close School recognizes that many undergraduates have already started their own companies. To encourage this entrepreneurial spirit within our student body, the Close School, in collaboration with the Steinbright Career Development Center, offers to all Drexel undergraduate students the opportunity to use their own company as their co-op experience. Students who qualify for this opportunity receive a salary ($15,000), like other co-op students who work for established companies and organizations. Most importantly, students participating in the entrepreneurship co-op receive weekly mentoring from Close School faculty.

Launch It!

During this ten-week capstone course, students work on the actual launching of a start-up and de-risking their business model. Students will talk to customers, partners, and competitors as they engage the iterative process of how a start-up actually works. Students learn how to use the business model canvas to brainstorm each part of a company. Each week will bring a new adventure outside of the classroom as students test each part of their business models, and then share their hard-earned knowledge with the rest of the class.

Entrepreneurship and Innovation

Major: Entrepreneurship and Innovation
Degree Awarded: Bachelor of Arts Degree (BA)
Calendar Type: Quarter
Total Credit Hours: 181.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 52.0701
Standard Occupational Classification (SOC) code: 11-1011; 11-1021; 11-9199

About the Program

The BA in Entrepreneurship and Innovation is designed to prepare students to think and act entrepreneurially, in the context of established companies, in working for small and growing ventures, in starting a new venture or self-employment, and in an overall general approach to their personal and professional lives. Within this innovative curriculum, students build entrepreneurial skills such as resilience, opportunity recognition, collaboration, negotiation and effective communication.

The program emphasizes interdisciplinary coursework in collaboration with other Drexel colleges and schools providing entrepreneurship students with the opportunity to take classes with future engineers, scientists, artists, and business leaders.

For additional information about the BA in Entrepreneurship and Innovation, please contact Jamuna Saha at js3599@drexel.edu.

Degree Requirements

Required Courses:

- Entrepreneurial Mindset: This is a suite of courses that addresses individual entrepreneurial skills such as resiliency, collaboration, innovative thinking and communication. These courses develop personal and interpersonal skills needed to be a successful "entrepreneur" in several contexts.

- The Process of Entrepreneurship: This set of required courses covers a broad range of topics that immerse students in the entire landscape of entrepreneurship.

- Electives: Constitutes a group of courses from the Close School and across the University that reflect the themes of innovation and entrepreneurship.

- Minors: All entrepreneurship majors are required to select an academic minor which will provide domain expertise in their area of interest. Students may select from over 100 minors offered by the University.

- CS 143  Computer Programming Fundamentals
- CS 171  Computer Programming I

OR
- CS 140  Computer Science Principles
- CS 171  Computer Programming I
- CS 172  Computer Programming II

Entrepreneurship Electives  21.0
Select seven of the following:
- BLAW 346  Entrepreneurial Law
- BMES 409  Entrepreneurship for BMES
- DIGM 223  Creative Concept Design
- DSMR 231  Retail Operations
- EAM 211  Strategic Management for Entertainment and Arts Management
- ECON 202  Principles of Macroeconomics
- ENTP 275  Diversity Entrepreneurship
- ENTP 270  Social Entrepreneurship
- ENTP 360  Franchising
- ENTP 370  Global Entrepreneurship
- ENTP 390  Energy Entrepreneurship
- MEM 462 [WI]  Introduction to Engineering Management
- MIS 200  Management Information Systems
- MKTG 201  Introduction to Marketing Management
- MKTG 347  New Product Development
- MKTG 364  Marketing for New Ventures
- PROD 210  Introduction to Product Design
- PROD 345  Applied Human Centered Design
- PSY 150  Introduction to Social Psychology
- RELT 315  Power of Retail Brands
- SOC 245  Sociology of the Future

Required Academic Minor***  24.0
Free Electives  5.0
Total Credits  181.0-184.0

* A computer science course cannot satisfy both a technology requirement and a computer language requirement.
** BMES 409, ENTP 270, ENTP 275, ENTP 360, ENTP 370 and ENTP 390 cannot satisfy both a concentration requirement and an entrepreneurship elective requirement.
*** BA students are required to complete an academic minor offered by any other Drexel College or School.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the
attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Entrepreneurship and Innovation

The minor in entrepreneurship and innovation is designed for students who are interested in starting their own ventures, working for start-up companies, or pursuing jobs within established corporations. Students who minor in entrepreneurship and innovation will learn to adopt the entrepreneurial mindset that can be applied to their personal and professional lives.

For additional information about the entrepreneurship minor, please contact Jamuna Saha at js3599@drexel.edu.

The College of Arts and Sciences

About the College

Mission Statement

By pursuing excellence in research and scholarship, we educate our students to become ethical professionals and citizens with knowledge of and appreciation for the fundamental interactions among the humanities, social sciences and the sciences in a fast-changing, challenging, and diverse world.

About the College of Arts and Sciences

Drexel University’s College of Arts and Sciences (http://www.drexel.edu/coas) (CoAS) stands unafraid in the face of change. We recognize that our ever-evolving, fast-paced culture required a new approach to education, one that understands the world is malleable and can be molded by minds inspired to lead society’s evolution.

But innovation requires more than an ambitious personality. It requires versatility – we must not only be experts in our field, but also agile enough to engage in the cross-disciplinary work needed to address modern problems resourcefully. That’s why our faculty challenge students to see past their own perspectives and establish a deeper understanding of humanity’s needs. It’s why our co-op program inserts students within
a professional culture, introducing them to the expectations of the job while offering hands-on practical application of coursework. And it’s why, starting as early as early as freshman year, students team with faculty members as peers, conducting research that affects the world now.

Here at CoAS, we are committed to implementing in-the-moment change, not for personal glory, but because it’s what the world needs.

**Special Programs**

**Emerging Scholars Program**

This two-year program is designed for students interested in the humanities and social sciences who want to experience the range of opportunities in these disciplines before choosing a major. The program provides mentorship, specialized seminars, and co-curricular events, as well as a co-op position in the community to guide students toward...
defining their scholarly and career interests. The Emerging Scholars Program does not grant a degree, but helps guide students in choosing a major that's right for them.

Learn more on the College of Arts and Sciences (http://drexel.edu/coas/academics/undergraduate-programs/emerging-scholars-program) website.

Pre-professional Programs

Students wishing to prepare for admission to professional schools of medicine, veterinary medicine, dentistry, or public health may obtain pre-professional counseling and application assistance at the Steinbright Career Development Center. (http://drexel.edu/scdc) For health profession application assistance, students may call 215.895.2437. For law school admission assistance, students may call 215.895.1632

Accelerated Programs

The College of Arts and Sciences offers several accelerated degree programs that enable academically qualified students to earn both a bachelor’s and an advanced degree concurrently, graduating sooner than they would in traditional programs. Depending on the academic program, eligible students can be admitted to an accelerated degree program in one of two ways: as an incoming freshman or after completing a minimum of 90.0 credits but no more than 120.0 credits. Note: In addition to the options listed below, student can apply to combine degree programs into an accelerated BS/MS program. Talk to your academic advisor to learn more.

More details about Accelerated Programs can be found on the Undergraduate Admissions (http://drexel.edu/coas/admissions/overview) website.

DragonsTeach

DragonsTeach is a collaboration between the College of Engineering, the College of Arts and Sciences, and the School of Education designed to allow students in science, technology, engineering, and math (STEM) degree programs to explore a career in education. Through a unique combination of skills development and classroom experiences, DragonsTeach students can earn a minor in STEM Education and eligibility for teaching credentials while completing their major degree program and co-ops. Learn more on the DragonsTeach website (http://drexel.edu/dragonsteach).

Eligible Majors:

• BS in Biology
• BS or BA in Chemistry
• BS in Environmental Science
• BS or BA in Mathematics
• BS in Physics

Secondary and Elementary Teacher Certification

The School of Education offers innovative curricula that combines academic majors with appropriate coursework to satisfy state requirements for certification in elementary education. Students interested in the teacher education programs should contact the School of Education (http://drexel.edu/soe).

The Drexel Writing Center

The Drexel Writing Center (DWC) is dedicated to helping students, faculty, and staff, at all levels of experience and across all disciplines, in their development as writers.

• The DWC works with writers at all stages in the writing process, from brainstorming ideas to polishing final drafts.
• The DWC focus is on individual, one-on-one sessions that feature a conversational, collaborative relationship between the reader and the writer they work with.
• Interaction with the DWC will help writers develop not just writing but critical thinking and reading skills.
• While DWC readers do not perform copy-editing services, they will help students learn strategies for proofreading and editing their documents.

The DWC is located at 0032 MacAllister Hall and can be reached at 215.895.6633. Further information can be found at the Drexel Writing Center (http://drexel.edu/writingcenter) website.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

English Language Center

As part of the College of Arts and Sciences, Drexel’s English Language Center (http://www.drexel.edu/elc) offers an accredited intensive English program throughout the year. In addition to classes in academic skills such as essay writing and oral presentations, the Center offers the Language of STEM (Science Technology Engineering and Math), Language of Media and Design, Global Business English program (GLOBE), English for academic purposes, TOEFL and IELTS preparation, ESL Teaching enhancement programs, and other subjects.

Through the International Gateway program, the English Language Center offers academic language preparation for students who have an admissible high school academic background but need further English language proficiency. This pathway program combines academic English language courses, credit courses taught by CoAS faculty, and acculturation activities. Students admitted into the University Preparation program (UPREP) begin their studies at Drexel in the English Language
Center in a short, pre-term program designed to prepare international students for the academic work and culture of the American university.

Accepted undergraduate students have access to free language tutoring and other academic skills workshops throughout the academic year.

For more information, see the ELC website or contact the Center at:

English Language Center
229 N. 33rd Street
Philadelphia, PA 19104
Phone: 215-895-2022
Fax: 215-895-6775
E-mail: elc@drexel.edu

The Drexel Co-op

No summers of coffee runs or mindless filing here! Drexel students embark on six-month periods of full-time employment in practical, discipline-specific positions consistent with their interests and abilities. Depending on their chosen program, students have the opportunity to participate in up to three different co-op positions - that's 18 months of real work experience - during their time at Drexel, allowing them to explore their career options, strengthen their resumes and build a professional network in the process. While co-op opportunities can be both paid and unpaid, students who participate in the co-op program typically receive higher starting salaries post-graduation than graduates of other schools.

The number of co-op experiences required for graduation is determined by the student's chosen course of study. The following options exist for most majors:

- **Three Co-op Option** (Five Years)
- **One Co-op Option** (Four Years)
- **No Co-op Option** (Four Years) *Though this program is available, we strongly encourage students to take advantage of the co-op program, a key benefit of a Drexel education.*

Learn more on the Steinbright Career Development Center (http://drexel.edu/scdc) website.

Global Opportunities

Global Opportunities Abound

Philadelphia may be the heart of Drexel's campus, but the world is our muse. There are numerous opportunities for Drexel Dragons to go abroad.

Study Abroad

Study abroad allows students a unique academic experience to learn about subjects from an international perspective, often with local students and professors. From Costa Rica to Barcelona, Milan to Turkey, Brazil to Israel, our students have studied all over the world.

Research Abroad

Research extends far beyond the walls of any laboratory. Our students have studied sea turtles in Costa Rica, infectious diseases in Uganda and data from the Double Chooz experiment in France. Many of our faculty members are also involved in international research collaborations and our students have the opportunity to make an impact alongside them.

Co-Op Abroad

Co-op abroad provides students with a unique professional perspective and exposure to an international work environment. Our students have worked at Coca Cola in India, the UN Development Programme in Africa, the Italian Parliament in Rome, and the Heraklion Community Mental Health Center in Greece - just to name a few.

An international co-op gives students a distinct advantage in the global economy, making them more attractive to prospective employers. Candidates with international experience also have the ability to earn higher starting salaries upon graduation.

Visit the Steinbright Career Development Center (http://drexel.edu/scdc) website to learn more.

Travel Courses

The College of Arts and Sciences' travel-integrated courses allow students to travel domestically or internationally for one or two weeks at the end of a course to extend their studies beyond the classroom. Recent classes have traveled to France to learn about WWI and Brazil to study commodities exchange. Talk to your academic advisor to learn more.

Alternative Spring Break

The Alternative Spring Break (ASB) program places teams of Drexel students in communities to engage in community service and experiential learning during spring break. Students may choose to work domestically or internationally in activities that benefit the environment, the community and those in need.

Community-Based Learning

In the College of Arts and Sciences' unique Community-Based-Learning (CBL) courses, students don't just study the issues affecting the world, they study alongside the people affected - from prison inmates to hospice patients. CBL courses are offered in three formats:

- Side by side
- Community Hybrid
- Service Learning

Side-by-side courses create a co-learning environment in which Drexel students and the community members take classes together.

Community hybrid courses are composed entirely of Drexel students and the community members split between the classroom and the community.

Service-learning courses require service in the community in addition to students' credit hours in the classroom.

For a current list of available courses, visit the Lindy Center for Civic Engagement (http://drexel.edu/lindycenter).

Accelerated BA in Philosophy and MS in Public Policy

**Major: Philosophy and Public Policy**

**Degrees Awarded:** Bachelor of Arts (BA) and Master of Science (MS)

**Calendar Type:** Quarter

**Total Credit Hours:** 225.0

**Co-op Options:** Three Co-op (Five years)

Classification of Instructional Programs (CIP) code: 44.0501
About the Program
Accelerated-degree programs provides the opportunity to earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone.

No undergraduate major prepares students for success in as wide a range of research areas and careers as philosophy. Drexel's Philosophy program is uniquely devoted to the idea that theory without practice is empty and practice without theory is blind. This makes our BA an especially valuable foundation for research and careers in Public Policy.

Admission Requirements
Students who meet the standard eligibility requirement for accelerated programs should consult with their advisor and work on an individual plan of study to submit with the Change of Curriculum form.

Virtual Reality & Immersive Media Faculty

Paul Diefenbach, PhD (University of Pennsylvania). Assistant Professor. Game development, real-time rendering.

Jeremy Fernsler, BA (Pennsylvania State University) Program Director, Game Design & Production. Assistant Teaching Professor. Digital effects artist; compositor and animator for the feature film visual effects industry.

Nick Jushchyshyn, MFA (Academy of Art University) Program Director, Animation and Visual Effects, VR/Immersive Media. Associate Professor. Visual effects, digital media and animation.

Frank J. Lee, PhD (Carnegie Mellon University). Professor. Human-computer interaction; cognitive engineering and science; intelligent software agents for games and education.

Robert Lloyd, MFA (Tyler School of Art, Temple University) Program Director, Game Design & Production. Assistant Teaching Professor. Game development, themed entertainment and motion simulation.

David Mauriello, BA (Lafayette College). Assistant Professor. 3D modeling and animation.

Glen Muschio, PhD (Temple University). Associate Professor. Digital media, society, communication.

Stefan Rank, PhD (Vienna University of Technology). Assistant Professor. Artificial intelligence, game design and human-computer interaction.

Jervis Thompson, BS (Drexel University). Associate Teaching Professor. Digital media, interactive multimedia.

Michael Wagner, PhD (Vienna University of Technology) Department Head, Digital Media. Professor. Production management, educational use of video games.

Jichen Zhu, PhD (Georgia Institute of Technology). Associate Professor. Developing humanistic and interpretive framework of computational technology, particularly artificial intelligence (AI), and constructing AI-based cultural artifacts; interactive storytelling, games and software studies.

Accelerated BA in Philosophy and MS in Science, Technology & Society

Major: Philosophy and Science, Technology & Society

Degrees Awarded: Bachelor of Arts (BA) and Master of Science (MS)

Calendar Type: Quarter

Total Credit Hours: 225.0

Classification of Instructional Programs (CIP) code: 30.1501

Standard Occupational Classification (SOC) code: 11-9121

About the Program

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone. By combining graduate-level study with their undergraduate program, motivated students graduate with an MS and BA in just five years. Students can complete the degree solely through coursework or combine coursework with a master’s project or a master’s thesis. The flexibility offered by the STS curriculum, the opportunity to work closely alongside research-active faculty, and the training offered in multiple theoretical and research methodologies opens the door to a wide range of career opportunities.

Students in the accelerated program have the opportunity to craft their own original research project with guidance from some of the most interesting and dynamic faculty scholars in their fields. The STS Lab course is a unique feature of the curriculum--it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in depth.

Admission Requirements

Depending on the academic program, eligible students can be admitted to an accelerated degree program in one of two ways: as an incoming freshman or after completing a minimum of 90 credits but no more than 120 credits.

To learn more about eligibility and enrollment requirements, visit the Undergraduate Admissions (http://drexel.edu/undergrad/academics/accelerated-degrees) web page.

  PHIL 351 Philosophy of Technology
  PHIL 355 Philosophy of Medicine
  PHIL 361 Philosophy of Science
  PHIL 381 [WI] Philosophy in Literature
  PHIL 385 Philosophy of Law
  PHIL 391 Philosophy of Religion

Total Credits 182.0

* Philosophy students are encouraged to choose the General Philosophy Concentration to complete the accelerated program, but may also opt for concentrations in Ethical Theory and Practice, Philosophy and Law, or Philosophy, Technology and Science.

STS Required Courses:

BASIC REQUIREMENTS
SCTS 501 Introduction to Science, Technology and Society 3.0
SCTS 502 Research Methods 3.0
SCTS 503 Advanced Research Methods 3.0
SCTS 504 Science, Technology & Society Theories 3.0

ADVANCED REQUIREMENTS
Ethics, Values, Identities, and Culture 6.0
Select two of the following:
  CHP 807 Public Health Ethics
  INFO 679 Information Ethics
  SCTS 600 Contemporary Feminist Theory
  SCTS 610 Material Culture
  SCTS 614 Technology, Progress, and Determinism
  SCTS 615 The Biopolitics of Health
  SCTS 620 Medicine, Technology and Science
  SCTS 650 Global Subjects of Biocapital
  SCTS 651 Transnational Science, Technology & Capitalism

Science and Technology Policy 3.0
Select one of the following:
  COM 650 Telecommunications Regulation and Policy
  INFO 725 Information Policy
  PLCY 509 Sustainability & Public Policy
  SCTS 570 Environmental Policy
  SCTS 571 Science and Technology Policy
  SCTS 641 Risk and Disaster Policy
  SCTS 643 Contemporary STEM Workforces: Organizations of Labor in Lab, Shop and Clinic
  SCTS 645 War and Technoscience

Science, Technology & Society Lab 3.0
Select one of the following:
  SCTS 550 Special Topics in STS Lab
  SCTS 561 Mobilities Lab
  SCTS 562 Identity and Intersectionality Lab

Thesis/Project and Electives 21.0
SCTS 798 Master's Research

**Total Credits: 45.0**
Accelerated BA in Sociology and MS in Science, Technology & Society

Major: Sociology and Science, Technology & Society
Degrees Awarded: Bachelor of Arts (BA) and Master of Science (MS)
Calendar Type: Quarter
Total Credit Hours: 225.0
Co-op Options: Three Co-op (Five years)
Classification of Instructional Programs (CIP) code: 31.1501
Standard Occupational Classification (SOC) code: 11-9121

About the Program
The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone. The accelerated program provides students with a strong training in sociology and in the interdisciplinary field of Science, Technology and Society (STS).

The sociology major at Drexel University has three components: theory, methods, substantive coursework and features specialized coursework relating to social justice issues.

Sociology is the systematic study of societies. Society is the sum total of individual and group interaction and relations, from small groups and families to global networks and complex social organizations. The discipline covers a wide variety of fields of inquiry. Sociologists examine structural relations—how human society is organized from small groups to large institutions—and is committed to developing a critical understanding of these relationships. Thus the sociology major stresses theory, research methods, quantitative and qualitative data analysis as applied to a wide variety of substantive areas including but not limited to social inequality, political power, gender, class, race, ethnicity, family, crime, technology and environmental change as well as a wide variety of social and political movements connected with social change. The stress on critical understanding means that sociology majors will strive not only to develop strong analytic abilities but an intellectual and ethical engagement reflected in sociologically informed thinking and action. The research and analytical skills developed in our program are sought after by a wide variety of professions.

Specialized social justice coursework is typically carried out in connection with community groups and organizations. It is a way the Sociology Program and Drexel University as a whole seeks to become practically engaged with the wider community while promoting social justice.

The Science, Technology, and Society (STS) program systematically investigates the social dimensions of science, technology and medicine. Faculty from a range of disciplines contribute to a curriculum that features a broad set of perspectives, all grounded in a foundation of critical thinking, research methods, and writing and presentation skills. The STS program emphasizes three interrelated areas: environment and sustainability; health and medicine; and information, identities and networks. The STS Lab course is a unique feature of the curriculum—it prepares students to work as a team to address meaningful science and technology related topics. Working with a faculty adviser, graduate students develop an individualized plan of study that allows them to pursue their interests in depth.

STS students are independent thinkers who are dedicated to understanding the intersections of society, science, medicine and technology. While STS students vary in their professional and educational backgrounds and career ambitions, they share a common commitment to a critical approach to our world's most pressing technoscientific challenges.

Prospective students for the MS in STS see this educational opportunity as a crucial factor in their skill development and career advancement. They are recent college graduates in the social sciences, humanities, natural sciences, and engineering; middle and high school teachers; and professionals in businesses, city and state government offices, and area hospitals. Students can attend full time or part time and complete all coursework in the evening.

---

*At least one foreign language course must be at the 200-level. In addition, the department recommends students take 2 additional foreign language courses as free electives.*
Science, Technology and Society Faculty

Lloyd Ackert, PhD (Johns Hopkins University). Teaching Professor. History of science and technology; ecology; Russian science.

Peter Amato, PhD (Fordham University) Director. Philosophy. Teaching Professor. Ethics, Marxism, Continental philosophy

Jesse Ballenger, PhD (Case Western Reserve University). Associate Teaching Professor. Healthcare, medicine and ethics; aging and neurodegenerative diseases; Science and Technology Studies.

Merritt Brockman, DHA, FACHE (Medical University of South Carolina). Assistant Professor. Patient Centered Medical Home, Improvements in Health Care Delivery.

Robert J. Brulle, PhD (George Washington University). Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Chalmers Clark, PhD (Graduate Center of the City University of New York). Associate Professor. Wittgenstein (the contextual grounds of human language), Holism in the Naturalized Epistemology of WV Quine, Trust relations in the medical profession (physician-patient, biomedical research, and public health), the professions and public trusts.

Robert D'Ovidio, PhD (Temple University) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.

Mary Ebeling, PhD (University of Surrey) Director, Women's and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Christian Hunold, PhD (University of Pittsburgh). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Krik Jalbert, PhD (Rensselaer Polytechnic Institute). Visiting Research Professor. Social studies of science and technology, citizen science, environmental justice, information transparency, knowledge infrastructures, energy policy

Kelly Joyce, PhD (Boston College) Director, Master's Program in Science Technology & Society. Professor. Science, medicine and technology; aging and technology; qualitative social science methods; healthcare and medicine.

Alison Kenner, PhD (Rensselaer Polytechnic Institute). Assistant Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities.

Scott G. Knowles, PhD (Johns Hopkins University) Interim Department Head, History. Professor. Urban history, history of technology, history of disasters, modern history.

Brent Luvaas, PhD (UCLA). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.
Jonson Miller, PhD (Virginia Tech). Associate Teaching Professor. Science and technology, American history, military history.

Kevin Mitchell, PhD, MBA (Walden University). Assistant Professor. Health disparities in vulnerable populations, strategic healthcare management, evidenced based medicine and clinical pharmacology and therapeutics.

Gwen Ottinger, PhD (University of California, Berkeley). Assistant Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Flavia Padovani, PhD (University of Geneva). Assistant Professor. Philosophy of science, epistemology, logic

Rosalind Remer, PhD (University of California) Vice Provost and Executive Director, Lenfest Center for Cultural Partnerships. History of the book, early American economic and business history, public history, museum planning, non-profit management.

Jody A. Roberts, PhD (Virginia Polytechnic Institute and State University) Director, Center for Contemporary History and Policy, Chemical Heritage Foundation. Assistant Professor. Intersections of emerging molecular sciences and public policy and the ways in which tensions brought about between the two get resolved.

John Rossi, VMD, MBE (University of Pennsylvania) Director, M.S. in Public Health Ethics. Assistant Professor. Public health ethics, research ethics, ethical theory, animal and environmental ethics, risk assessment and communication, public health history.

Tiago Saraiva, PhD (Universidad Autónoma de Madrid). Associate Professor. History of science and technology; transnational history; environmental history

Jonathan Seitz, PhD (University of Wisconsin) Assistant Department Head. History. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Nicholas Shapiro, PhD (University of Oxford). Visiting Research Professor. Everyday infrastructure; DIY scientific instrumentation; biopolitics; critical theory; multispecies ethnography.

Mimi Sheller, PhD (New School for Social Research) Director, Center for Mobilities Research and Policy. Professor. Sustainable mobility and mobility justice; new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Chloe Silverman, PhD (University of Pennsylvania). Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Amy Slaton, PhD (University of Pennsylvania). Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Andrew Smith, PhD (SUNY, Stony Brook). Assistant Professor. Social and political philosophy, ethics, American philosophy

Kathryn Steen, PhD (University of Delaware). Associate Professor. History of technology, history of industry and business, and comparative history.

Michael Yudell, MPH, PhD, MPhil (Columbia University) Chair, Department of Community Health and Prevention. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

**Anthropology**

**Major: Anthropology**

**Degree Awarded:** Bachelor of Arts (BA)

**Calendar Type:** Quarter

**Total Credit Hours:** 182.0

**Co-op Options:** One Co-op (Four years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 45.0201

**Standard Occupational Classification (SOC) code:** 19-3091

**About the Program**

Anthropology is the study of human beings — past and present. Students majoring in anthropology broaden their understanding of the ways of life on planet Earth through courses that explore the diversity of human cultures, courses that explore the range of theoretical ideas about culture and human organization, and specialized courses in field techniques and methodology.

The anthropology major is a small, highly specialized program. The program has emphases in digital and media anthropology, symbolic communication, and community organization. Students are provided with an exceptional background in theory, and methodology, and fieldwork that will open doors to various career paths or lead to graduate training.

Two options exist in the anthropology bachelor of arts degree program. The first option is a four-year program with a single six month co-op in the junior year. For the majority of anthropology majors, the co-op will provide a fieldwork experience for students. Students who select to undertake a co-op are guided by interaction with faculty both inside and outside the classroom. The second option is a four-year non-co-op option. The core of the major in this option is the seminar in ethnography which majors are required to take each fall term for a total of 12.0 credits.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the

## Co-op/Career Opportunities

### C0-Op Opportunities

In order for majors to take the required seminar in ethnography, all anthropology co-ops are scheduled for the fall/winter cycle. Anthropology co-ops are student initiated and developed through discussions with faculty, rather than being selected from an existing list. Co-op ideas frequently emerge from discussions in the seminar in ethnography as students who have undertaken co-ops report on their experiences. Past co-ops have included: teaching English in Costa Rica; working on an archeological dig in the Yucatan; studying agricultural practices in Hawaii; working with an arts program in Oaxaca. In addition, several majors have collaborated on faculty research, while others have been engaged in community outreach projects.

### Post-Graduate Opportunities

Many corporations, schools and health-care institutions are using ethnographic field techniques and qualitative methods in order to understand their markets and clientele, or for that matter, their own organizational structure. The Anthropology major prepares students for employment in these areas, as well as for further graduate work in anthropology, public policy, law and other social and behavioral sciences.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) web page for more detailed information on post-graduate opportunities.

## Minor in Anthropology

The anthropology minor provides students in other fields with a cross-cultural awareness that will enable them to interact with a variety of people in a wide range of situations. By giving students a respect for and understanding of the basis of cultural variation, the minor can facilitate working in international settings. Even for students working within the United States, anthropology offers increased sensitivity to ethnic and population diversity. Medicine, law, counseling, nursing, and nutrition are
only a few of the fields in which clients and professionals may come from different parts of our heterogeneous society.

Please note: No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

(http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Anthropology Faculty**

Barbara Hornum, PhD ( Bryn Mawr College) Director of Center for Academic Excellence (DCAE). Associate Professor. Comparative gerontology, planned communities, continuing care communities, retirement, faculty development.

David Kutz, PhD (Temple University). Professor. Social and cultural theory; political economy; gerontology; materialisms; semiotic realisms; activity theory; reflection theories; communities of practice and labor theories of culture.

Brent Luvaas, PhD (UCLA). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Usha Menon, PhD (University of Chicago). Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Rakhmiel Peltz, PhD (Columbia University, Linguistics; University of Pennsylvania, Biological Sciences) Director of Judaic Studies Program. Professor. Sociolinguistics, ethnography of communication, social history of Yiddish language and culture, Yiddish culture of Eastern Europe, language planning, language and ethnic identity, language and group memory, aging and ethnicity, history of urban neighbors.

Douglas V. Porpora, PhD (Temple University) Director of Graduate Program in Communication, Culture, and Media. Professor. International political economy, culture, social theory, and philosophy of social science.

Robert Powell, PhD (Temple University). Assistant Teaching Professor. Early and Middle Bronze Age Crete; archaeoastronomy; early state formation; archaeology and anthropology of frontiers; mass communication.

Amber R. Reed, PhD (UCLA). Visiting Assistant Professor. Democracy, Apartheid, Nostalgia, Race, Postcolonial Theory, Childhood/Youth Studies, Politics of Culture.

Rachel R. Reynolds, PhD (University of Illinois at Chicago). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

Wesley Shumar, PhD (Temple University) Department Head, Anthropology. Professor. Ethnography of cyberspace, online learning.
communities, political economy of higher education, globalization, activity theory, semiotics, critical realism, psychoanalysis, identity and the self.

Emeritus Faculty

Anthony Glascock, PhD (University of Pittsburgh) Coordinator of the Anthropology Program. Professor Emeritus. Aging and health, definitions of functionality and impairment, technology and aging, social organization, Ireland, East Africa.

Biological Sciences

Major: Biological Sciences
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 26.0101
Standard Occupational Classification (SOC) code: 19-1029

About the Program

The biological sciences major resides in the Department of Biology (http://drexel.edu/coas/academics/departments-centers/biology). Students earn a bachelor's degree in the biological sciences and are prepared for technical careers in research or commercial laboratories, or for professional schools or graduate study.

The biological sciences encompass many areas of study. Biologists study the structure and functions of living organisms from the individual cell to the full organism, and collectively to the community level. Discoveries in the biological sciences influence many aspects of our daily lives and have become the foundation of many new developments in biotechnology and medicine. In the past two decades, advances in molecular biology, cell biology and genetics have been rapid, opening many new, exciting career opportunities in biotechnology, genetic engineering and the development of new diagnostics and therapeutics. Biologists can pursue a variety of options including careers in medicine, dentistry, veterinary medicine or other health-related areas; in research or commercial laboratories at pharmaceutical companies, medical research laboratories, biotechnology companies or in government agencies; and in teaching. In fact, more than 100 different occupations have been listed for biologists. Graduates in the biological sciences are in demand and enjoy a high placement rate with competitive salaries.

The curricular choices are designed to provide a sound basis for careers in the private sector, government and research laboratories, and for advanced study in graduate and professional programs in medicine, other health related areas, or in teaching.

The course requirements identifies required support courses in chemistry, physics, mathematics, humanities, and science and human affairs. With proper selection of electives, students can meet teacher certification requirements or complete a minor in another field. Students are encouraged to consult frequently with their academic advisor for curriculum planning.

In addition to the core requirements, students select one of five concentrations in a field of interest:

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Program Options

Co-op employment is an option for biological science students. The major offers three distinct plans:

Five-year option with co-op experience
This option allows for the greatest amount of employment experience, with three distinct six-month periods of employment included with studies. After the start of the sophomore year, students study or work through all terms, including summer.

Four-year option with co-op experience
The degree includes just one six-month period of employment. After the start of sophomore year, students study or work through all terms, including summer.

Four-year option without co-op experience
The degree can be completed in four years without co-op/internship employment. Students are not required to pursue studies during any of the summer terms.

Degree Requirements

The Biological Sciences curriculum is designed to provide students with both depth and flexibility within the field of biology. In addition to the core requirements, students select one of five concentrations in a field of interest.

- Cell/Molecular Biology/Genetics/Biochemistry
- Organismal Biology/Physiology
- Ecology/Evolution/Genomics
- Pathobiology
- General Biology

Concentration requirements and elective options are outlined below. Within each concentration, students are able to further specialize in a focus area by taking recommended electives.

Students select one of five concentration and fulfill the requirements, as outlined below.

1. The Cell/Molecular/Genetics/Biochemistry (CMGB) Concentration

This concentration provides exposure to several vital disciplines within Biology, and will prepare students for a diversity of careers in research, medicine, and industry. Students interested in tailoring their studies more specifically may follow the suggested "focus areas" when selecting their two CMGB Concentration electives.

2. The Organismal Biology/Physiology Concentration
This concentration combines courses in organismal biology and physiology with an opportunity to focus on human physiology. The concentration is designed to appeal to students interested in health and medicine, but also accommodates students seeking a wider breadth of knowledge in organismal diversity. Students can focus their electives in human physiology or can choose courses that study non-human organisms.

Organismal Biology/Physiology Concentration Requirements
BIO 201  Human Physiology I  4.0
BIO 203  Human Physiology II  4.0
or BIO 256  Vertebrate Morphology and Physiology  4.0
BIO 270  Development Biology  2.0
Select one of the following:
BIO 412  Biology of Aging  3.0
or BIO 284  Biology of Stress  3.0
or BIO 466  Endocrinology  3.0
or BIO 468  Pathophysiology  3.0
Organismal Biology/Physiology Concentration Electives (See List Below)
Cell/Molecular/Genetics/Biochemistry (CMGB) Elective  3.0
Two Organismal/Physiology Electives  6.0
Ecology/Evolution/Genomics Elective  3.0
Concentration Laboratory Courses
Two Laboratory Electives  4.0
Total Credits  30.0

* Students interested in pursuing a focus area in Human Physiology or Organismal Biology should contact the academic advisor in the Biology Department for specific focus recommendations.

**Organismal/Physiology electives

BIO 201  Human Physiology I  4.0
BIO 203  Human Physiology II  4.0
BIO 221  Microbiology  3.0
BIO 223  Parasitology  3.0
BIO 256  Vertebrate Morphology and Physiology  3.0
BIO 264  Ethrobotany  3.0

ENVS 394  Entomology Laboratory  2.0  

3. The Ecology/Evolution/Genomics Concentration

This concentration focuses on ecological and evolutionary aspects of biology for biology majors who also have specific interests in ecology, evolution or genomics. This concentration is designed to maintain a breadth of knowledge in biology, but also allows students to tailor their course work more specifically to reflect their specific area of interest.

Ecology/Evolution/Genomics Concentration requirements

ENVS 326  Molecular Ecology  3.0  
ENVS 428  Evolutionary Biology & Human Health  3.0  
or BIO 331  Bioinformatics I  3.0  
BIO 436  Population Genetics  3.0-4.0  
or ENVS 230  General Ecology  3.0  
Select one of the following:  3.0-5.0  
BIO 221  Microbiology  3.0  
BIO 223  Parasitology  3.0  
BIO 256  Vertebrate Morphology and Physiology  3.0  
BIO 413  Genomics  3.0  
BIO 420  Virology  3.0  

ENVS 254  Invertebrate Morphology and Physiology  3.0  
ENVS 360  Evolutionary Developmental Biology  3.0  
ENVS 382  Field Botany of the New Jersey Pine Barrens  4.0  
ENVS 391  Freshwater and Marine Algae  3.0  
ENVS 392  Ichthyology and Herpetology  3.0  
ENVS 393  Entomology  3.0  
ENVS 438  Biodiversity  3.0  

Ecology/Evolution/Genomics concentration electives

Select one Cell/Molecular/Genetics/Biochemistry (CMGB) elective (see list below)  3.0  
Select one Organismal/Physiology elective (see list below)  3.0  
Select two Ecology/Evolution/Genomics electives (see list below)  6.0  

Concentration Laboratory Courses

Select two Laboratory electives (see list below)  4.0  

Total Credits  28.0-31.0  

* Students interested in pursuing a focus area in Ecology, Evolutionary Biology or Genomics should contact the academic advisor in the Biology Department for specific focus recommendations.

Cell/Molecular/Genetics/Biochemistry (CMGB) electives

BIO 244  Genetics I  3.0

## 4. The Pathobiology Concentration

The Pathobiology concentration focuses on pathogenesis, and provides a unique option for students that differs from the more traditional disciplines in cell/molecular/genetics/biochemistry. This concentration is designed to appeal to students with an interest in pursuing careers in areas of public and allied health.

5. The General Biology Concentration

This concentration will allow maximum flexibility for students who want to develop their own unique plan of study. The concentration is designed for students who may not have one specific area of interest, but who are looking to be well-rounded in the biological sciences. Students pursuing careers in education, where a wider breadth of knowledge in biology is desirable, may choose to select this concentration.

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Co-op/Career Opportunities

Opportunities

Students earn a bachelor's degree in the biological sciences and are prepared for technical careers in research or commercial laboratories or for professional schools. Graduates typically work for pharmaceutical companies, medical research laboratories, biotechnology companies, or in government laboratories. Many graduates also choose to pursue an advanced degree in the field.

Co-op Opportunities

Past co-op employers of biosciences majors have included:

- GlaxoSmithKline
- Fox Chase Cancer Center
- Children's Hospital of Philadelphia
- Johnson and Johnson
- Merck
- Wistar Institute
- Moss Rehab
- ViroPharma, Inc.
- Janssen Biotech
- Integral Molecular
- Takeda
- Merck
- Fox Chase Cancer Center
- Wistar Institute
- Children's Hospital of Philadelphia
- Johnson and Johnson
- Merck
- Wistar Institute
- Moss Rehab
- ViroPharma, Inc.
- Janssen Biotech
- Integral Molecular

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Combined Bachelors/Masters Degree

Qualified students can take graduate courses in their junior and senior years for undergraduate or graduate credit. They can also complete a combined BS/MS degree in five years. Further questions about the BS/MS degree program should be directed to the departmental graduate advisor:

Kate Pelusi
Graduate Program Manager
Department of Biology
215.895.6374
kp475@drexel.edu

Minor in Biological Sciences

The minor in biological sciences is designed for students who wish to become acquainted with the life sciences while pursuing a major in another area. This option should be particularly useful for students majoring in areas such as chemistry, engineering, physics, or psychology who are interested in admission to medical schools or graduate programs. Students interested in the minor should consult with an academic advisor in the department for help with course selections.

BIO ELECTIVE OR ENVS 212 ** 3.0

Total Credits 24.5

* A grade of "C" or better must be earned for each course in this minor for the course to meet the requirement.

** The Biology Elective can be selected from any of the regularly offered Biology department lecture courses 200-level and above according to your specific interests. Note that existing course prerequisites may affect which courses may be selected.

Facilities

The Department of Biology resides in the Papadakis Integrated Sciences Building (PISB). This state of the art facility has well-equipped teaching laboratories with networked computers and advanced digital image analysis capability. Both teaching and research laboratories contain a range of modern equipment including microscopes, centrifuges, chromatographs, spectrophotometers, scintillation counters, culture chambers, and densitometers.

Visit the Research in Biology (http://www.drexel.edu/coas/academics/departments-centers/biology/research) web page for more information.

Biological Sciences Faculty

Michael Akins, PhD (Yale University). Assistant Professor. The neural mechanisms underlying how organisms interact with the environment; circuit formation, particularly of sensory circuits, and neural diseases including autism and Fragile X syndrome (FXS).

Shivanthi Anandan, PhD (University of California, Los Angeles). Associate Professor. Microbial genetics, in particular the analysis of light-regulated signal transduction pathways and the regulation of gene expression in photosynthesizing organisms.

John R. Bethea, PhD (University of Alabama at Birmingham) Department Head. Professor. Neuroscience and immunology.

Valerie Bracchi-Ricard, PhD (University Joseph Fourier, Grenoble, France). Research Assistant Professor. Role of TNF and TNF receptors in neuroinflammation and remyelination following spinal cord injury.

Laura Duwel, PhD (University of Cincinnati) Assistant Department Head, Department of Biology. Teaching Professor. Immunology and microbiology.

Felice Elefant, PhD (Temple University). Associate Professor. Understanding the roles of two classes of chromatin regulatory proteins termed histone acetyltransferases (HATs) and histone de-methylases.

Denise Garcia, PhD (UCLA). Assistant Professor. Neuroscience, the role of astrocytes in the central nervous system.

Tali Gidalevitz, PhD (University of Chicago). Assistant Professor. Genetic and molecular pathways regulating protein folding homeostasis, and their role in protein conformation diseases, aging, and development.

Mary Katherine Gonder, PhD (The City University of New York) Director, Bioko Biodiversity Protection Program Co-Founder, Central African Biodiversity Alliance. Associate Professor. Deciphering spatial patterns of biodiversity across the Gulf of Guinea and Congo Basin region; Conservation measures to mitigate the effects of habitat loss and climate change in western equatorial Africa.
Susan Gurney, PhD (Westfälische Wilhelms-Universität Münster (Germany)). Assistant Teaching Professor. Evolutionary genetics (human and equids); stem cell biology; forensic science

Meshagae Hunte-Brown, PhD (Drexel University). Associate Teaching Professor. Stable isotopes in aquatic food webs, ecosystem ecology, STEM education.

Jiu Jiang, MD, PhD (Shanghai Second Medical University). Research Associate Professor. T cell immune response to virus infection in aged mice.

Karen Kabnick, PhD (Massachusetts Institute of Technology). Associate Teaching Professor. Molecular and genetic mechanisms of cellular biology, human disease, host/parasite interactions.

Robert Loudon, PhD (Thomas Jefferson University). Associate Teaching Professor. Rho GTPases, regulation of act cytoskeleton, Regulation of G protein-coupled receptors by receptor kinases and arrestins.

Daniel Marena, PhD (Syracuse University) Director of the Biology Graduate Program, Co-Director of the Cell Imaging Center. Associate Professor. Developmental neurobiology and behavior; CHAR syndrome; Pitt-Hopkins syndrome; Alzheimer’s disease.

Donna Murasko, PhD (Penn State Hershey Medical Center) Dean, College of Arts and Sciences. Professor. The effects of aging on the adaptive immune response to influenza virus and retrovirus latency and reactivation.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O’Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Ryan Petrie, PhD (McGill University). Assistant Professor. Mechanisms of cell movement through three-dimensional extracellular matrix.

Jerome Ricard, PhD (University Joseph Fourier, Grenoble, France). Research Assistant Professor. Inflammation and cell death after spinal cord injury. Regulation of cell death by Eph receptors.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

Nianli Sang, MB, PhD (M.B., Fudan University Shanghai Medical College; Ph.D., Thomas Jefferson University) Co-Director of the Cell Imaging Center. Associate Professor. Molecular and cellular biology of cancer; posttranslational modification, folding and quality control of proteins and their implication in cellular biology and human diseases.

Aleister Saunders, PhD (University of North Carolina, Chapel Hill) Senior Vice Provost for Research, Director of the RNAi Resource Center. Associate Professor. Identification and characterization of genes and proteins involved in Alzheimer’s disease.

Kevin P.W. Smith, PhD (Drexel University). Assistant Teaching Professor. Linking behavioral ecology and organismal diversity, neonate behavior in herpetological models, STEM education.

Elias T. Spiliotis, PhD (The Johns Hopkins University) Director of the Cell Imaging Center. Associate Professor. Cell polarity and cell division: regulation of cytoskeleton-dependent motility.

Jennifer Stanford, PhD (Harvard University). Assistant Professor. Evaluating and improving approaches to teach STEM content in higher education environments to promote student learning, engagement in STEM courses, and STEM student retention.

Monica M. Togna, PhD (New Jersey Institute of Technology). Assistant Teaching Professor. Examination of the structure and function of living organisms from the cellular to the organismal level in order to better understand common physiological processes.

Emeritus Faculty

Jospeh Bentz, PhD (State University of New York (SUNY) at Buffalo). Professor. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

Certificate in Ethical Theory and Practice

Only available to currently enrolled Drexel students.

The Certificate in Ethical Theory and Practice exemplifies Drexel’s commitment to engaged education and the Philosophy Program’s emphasis on the inter-involvement of theory and practice. In our family, civic, work, and professional lives, we are confronted with issues of conduct and choices about what to do, what to create, how to move through the world and what kind of persons to be. This Certificate reflects each student’s potential to move through the world as a positive and constructive force no matter what field of endeavor he or she may pursue.

Admission Requirements

Open to Drexel students in all schools and colleges, in all majors who have completed fifteen credits.

Program Requirements

Required Courses

| PHIL 101 | Introduction to Western Philosophy | 3.0 |
| PHIL 105 | Critical Reasoning | 3.0 |
| PHIL 241 | Social & Political Philosophy | 3.0 |
| PHIL 251 | Ethics | 3.0 |

Select two of the following:

| PHIL 301 | Business Ethics | 6.0 |
| PHIL 305 | Ethics and the Media |
| PHIL 311 | Ethics and Information Technology |
| PHIL 315 | Engineering Ethics |
| PHIL 317 | Ethics and Design Professions |
| PHIL 321 | Biomedical Ethics |
| PHIL 322 | Ethics of Human Enhancement |
| PHIL 323 | Organizational Ethics |
| PHIL 325 | Ethics in Sports Management |
| PHIL 330 | Criminal Justice Ethics |
| PHIL 335 | Global Ethical Issues |
| PHIL 340 | Environmental Ethics |
Certificate in Medical Humanities

The Certificate Program in Medical Humanities is designed for students majoring in any of the biological sciences, health professions including biomedical engineering, nursing and public health, the humanities, and the social sciences, with the aim of promoting dialogue and mutual appreciation for various approaches to health related issues.

The wide range of applicable courses within designated disciplines fosters an interdisciplinary context for investigating the many challenges within medicine and caregiving. This format, in turn, encourages students to explore illness, disability, dying, and healing as human experiences and to evaluate some of the limitations of an exclusively scientific perspective on medical practice and research.

A three credit introductory seminar (HUM 315) and a three credit concluding Capstone Seminar (ENGL 470) further provide intellectual cohesiveness and a sense of community among students enrolled in the program. Both co-directors of the program will help students choose courses best suited for their personal and professional interests. Note that most courses applicable to the program also fulfill humanities electives for other majors and that courses may change as departments offer more options.

Opportunities

Those students who successfully complete the program will receive a certificate in medical humanities. This certificate highlights the student’s proficiency in an interdisciplinary approach to health related issues not easily attainable through isolated courses.

Additional information

For additional information, contact the program directors:

Edward “Ted” Fristrom, PhD
Department of English and Philosophy
College of Arts and Sciences, Drexel University
ecf35@drexel.edu

Stacey Ake, PHD (biology), PHD (philosophy)
Department of English and Philosophy
College of Arts and Sciences, Drexel University
sea29@drexel.edu

Required Courses

Select one of the following literature courses:

ENGL 360 [WI] Literature and Society (Portrayals of Mental Disorders)
ENGL 370 Topics in Literature and Medicine (Illness and Healing in Literature)
ENGL 370 Topics in Literature and Medicine (The Physician in Literature and Film)
ENGL 370 Topics in Literature and Medicine (Health Matters in Drama)

Select one of the following philosophy courses:

PHIL 251 Ethics
PHIL 321 Biomedical Ethics
PHIL 355 Philosophy of Medicine
PHIL 361 Philosophy of Science

Select two courses from the following:

AFAS T380 Special Topics in Africana Studies (Race, Disease, and History)
AFAS T380 Special Topics in Africana Studies (HIV/Aids in Africa)
ANTH 220 Aging In Cross-Cultural Perspective
ARTH 320 Art in the Age of Technology
ARTH 465 [WI] Special Topics in Art History
BIO 212 Biotechnology
BMES 338 Biomedical Ethics and Law
ENVS 321 Environmental Health
HIST 280 History of Science: Ancient to Medieval
HIST 285 Technology in Historical Perspective
PSY 242 Psychology of Disability
PSY 244 Culture and Personality
PSY 252 Death and Dying
PSY 356 Women’s Health Psychology
SOC 120 Sociology of the Family
SOC 125 Sociology of Aging
SOC 225 Sociology of Technology & Aging
Certificate in Writing and Publishing

The certificate in writing and publishing (CWP) offers currently enrolled Drexel University students the opportunity for both professional and personal development through a combination of available courses in professional writing, creative writing and publishing. The certificate enhances employment opportunities, opening a broad range of professional choices in cooperative employment and in the post-degree job market as skills are acquired. The CWP improves on-the-job performance, as the student develops writing skills and associated professional knowledge.

The program develops core competencies through the synergy of writing and publishing courses. The courses develop the student's skills in writing and publishing both through theory and practical application.

General requirements

The certificate in writing and publishing allows students to achieve certification in one or more of the following tracks:

- professional writing and publishing
- creative writing and publishing
- comprehensive writing and publishing (no longer accepting new students)

Each track requires the completion of a minimum of six courses (18.0 credits). Tracks can be designed to meet the professional needs and personal interests of the individual student.

Working with an advisor, students will choose not only the track but the courses within the track to develop an individually tailored program. Students can choose courses that will meet the general requirements of the program, while also satisfying their own professional and personal requirements.

Those students who have successfully completed this program will receive a certificate in writing and publishing. The transcript will indicate the completion of the CWP. This certification will indicate proficiency in written communication and familiarity with techniques in publishing in a variety of venues. The certificate program in writing and publishing highlights the student's acquisition of skills more than they would be in a list of courses on a transcript.

The completion of the certificate demonstrates the student's commitment to writing and publishing skills. It highlights writing skills of students majoring in business and technical areas; similarly, for students in the humanities and social sciences, it certifies writing and publishing skills, either in creative writing or professional writing.

Students meet with one of the two program co-directors to determine their track:

Harriet Levin Millan
Director, Certificate in Writing and Publishing
harriet.levin.millan@drexel.edu

Henry Israeli
Associate Director, Certificate in Writing and Publishing

hpi22@drexel.edu

Track Requirements

The professional writing and publishing track offers three options: business communication and publishing; technical communication and publishing; and journalism. This track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena. The creative writing and publishing track, is useful to all students as it encourages personal and professional development through creative writing and a knowledge of publishing. The comprehensive track is no longer accepting new students.

Note: Many majors already require one or more of the courses leading to the certificate in writing and publishing or list these courses as recommended electives.

Professional Writing and Publishing Track

18.0 quarter credits

The professional writing and publishing track is useful for business majors or students in technical or science areas who want to highlight their acquisition of writing skills. For students majoring in the humanities it provides an opportunity to develop areas of writing and publishing competencies in the professional arena.

This track offers three focus options:

- business communication and publishing; for students interested in a career in business.
- technical communication and publishing; for students interested in engineering, science, information science and technology and careers in higher education.
- journalism; for students interested in global journalism and international affairs.

Creative Writing and Publishing track

18.0 quarter credits

This track is designed for students who want to develop their creative writing skills either for personal development and expression, or because they recognize that creative writing develops imagination; sharpens clarity of expression; and enhances sensitivity to other people. Creative writing is a good pre-professional concentration for pre-law, pre-med, and the social sciences. The importance of creative writing has been recognized for engineering and for business.

Chemistry

Major: Chemistry

Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: BA -184.5; BS - 190.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 40.0501

Standard Occupational Classification (SOC) code: 19-2031

About the Program

Drexel’s Department of Chemistry offers both a BA and a BS degree in chemistry. The BA is offered as a 4-year non-co-op program for those interested in following their undergraduate education in chemistry with professional school, such as law or medicine. The BS degree, offered in three formats (a 5-year three co-op, 4-year one co-op and a 4-year non-co-op), is certified by the American Chemical Society. In addition, a minor in chemistry is available for students in other majors who desire a strong physical science background.

Each student plans a course of study and selects electives in consultation with an advisor in the Department of Chemistry (http://www.drexel.edu/coas/academics/departments-centers/chemistry). Students who show initiative and laboratory ability are encouraged to participate in undergraduate research by selecting a research problem in collaboration with one of the departmental faculty members. Students in the BS program are required to participate in undergraduate research through the Senior Research courses.

Most graduate courses in chemistry are open to qualified seniors. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.

Additional Information

For more information about the major in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair
Department of Chemistry
Drexel University
dk68@drexel.edu

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

** Courses with CHEM prefix, although ENVS chemistry courses can also fulfill this requirement.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

---

* CHEM 230 and CHEM 231 must be taken concurrently.

---

** Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Accelerated Bachelor's/Master's Dual Degree**

The Bachelor's/Master's (BS/MS) dual degree program is an accelerated program providing the academically qualified student with an opportunity to earn both a BS and an MS degree (two diplomas are awarded) in five years, the time normally required to finish the co-op option BS degree alone.

This is an academically demanding program, but there are several allowances built in to enable the program to be completed in the time allotted. For instance, only 180 rather than 190.5 undergraduate quarter credits are required. The co-op experience may be adjusted; the student may take two rather than three co-op cycles, enabling two additional quarters of on-campus study. If needed, the student may also take evening courses while on co-op.

**Eligibility**

Exceptional students with a cumulative grade point average of at least 3.0 and who are enrolled in the five-year co-op option program are eligible for the BS/MS program. Students formally apply to the program after they have completed 90 credits but before they have completed 120 credits. Students are strongly encouraged to begin planning for the program as early as their freshman year. Students who have more than 120 credits are not eligible.

Transfer students are eligible to join the BS/MS program, but they must be able to complete the program in the time it would take to complete the BS degree alone. International transfer students must be able to meet the required minimum TOEFL score for the department graduate program (currently 550) in order to be admitted to the BS/MS program.

**Application Process**

Interested applicants need to formally apply to the program. Applications are available in the Office of Graduate Admissions or in the College of
Arts & Sciences advisor’s office. Applications must be accompanied by a Plan of Study prepared in consultation with the undergraduate and graduate advisor in the department and approved by both the Department Head and the Dean. Entry into the program must be officially approved by both the Department Head and Academic Dean.

BS/MS Requirements
Students enrolled in the BS/MS dual degree program must complete 180 undergraduate quarter credits for the BS degree and at least 45 graduate quarter credits for the MS degree. All graduate departmental requirements must be satisfied in full, including producing a thesis, if the thesis-option Master’s program is elected. Master’s thesis requirements may be completed in the summer term of the final year with prior approval of the department. Students in the BS/MS program must maintain a cumulative GPA of 3.0 in their undergraduate and graduate coursework to remain in the program. Further questions about the BS/MS degree program should be directed to the departmental graduate advisor.

Additional Information

Drexel University
dk68@drexel.edu

Minor in Chemistry
The academic minor program in chemistry is designed to expose students to each of the major sub-disciplines of chemistry (analytical, inorganic, organic, and physical). In order to accomplish this students take a total of at least 27.5 credits of chemistry past the freshman year (100 level courses).

As chemistry is an experimental science at least two laboratory courses must be included in the group of courses taken for the minor. Students should note that their academic major may require certain chemistry courses that can also be used to fulfill the requirements for a minor in chemistry.

Total Credits 27.5

* May substitute CHEC 352 Physical Chemistry and Applications II (4 credits) or CHEC 353 Physical Chemistry and Applications III (4 credits) for the CHEM 253 Thermodynamics and Kinetics requirement.

** The 9.5 credits of chemistry electives must include at least one additional laboratory course. These electives are selected from any of the regularly offered chemistry department lecture or laboratory courses 200-level and above according to your specific interests. Note that existing course pre-requisites may affect which courses may be selected. The variable credit courses CHEM 493 Senior Research Project or CHEM 497 Research (Undergraduate) may also be used to fulfill either the lecture or laboratory requirements for the minor.

Additional Information
For more information about the minor in chemistry, contact:

Daniel King, PhD
Undergraduate Affairs Committee Chair

Co-op/Career Opportunities
Opportunities for chemistry majors include working in research and development in corporate and government laboratories in the chemical, pharmaceutical and agricultural (e.g., U.S. Department of Agriculture) sectors. There is a remarkably high concentration of chemical and pharmaceutical companies in the Philadelphia region. Other options include entering medical, dental, law, or other professional schools.

The major in chemistry is sufficiently flexible to allow students to prepare to teach at the secondary level. With proper selection of electives, students can meet teacher certification requirements.

Sample Co-op Opportunities
A five-year co-op degree is offered. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Assistant chemist, pharmaceuticals manufacturer: “My position involved the synthesis and characterization of target compounds in the endothelione project. Involved the development of synthetic roots to the prescribed target. This would include the investigation of reactions which were going to be used. . . . the position was very independent . . . great working environment.”

Co-op chemist, petroleum refiner: “Performed synthesis of ligands and metal complexes. Operated FT-IR spectrometer for sample analysis. Submitted samples for analysis by mass spectrometer and NMR. . . . The position allowed me to develop the skills necessary for independent research in organic synthesis.”

Assistant lab technician, pharmaceuticals manufacturer: “I was an assistant technician in a mass spectrometry lab. . . . I was responsible for the development of SDS-gel electrophoresis techniques for gels and gel membranes. . . . I developed the methods independently and my employer encouraged me to be an expert on the technique and explore any method I found that would benefit the lab.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.
Facilities

There are nine undergraduate teaching laboratories in the department: three freshman Chemistry labs, three Organic Chemistry labs, a Physical Chemistry lab, an Analytical Instrumentation Laboratory and a combined Analytical/Inorganic Chemistry lab.

Mass Spectrometry Laboratory
The department maintains a professionally staffed mass spectrometry facility available to all members of the university community. Currently available instrumentation consists of a Waters Autospec M high resolution magnetic-sector mass spectrometer, a Bruker Autoflex I MALDI Time-of-Flight Mass Spectrometer, a Thermo LTQ-FT Fourier Transform Mass Spectrometer, a Sciex API-3000 triple-quadrupole mass spectrometer, and a Varian Saturn 2000 Gas Chromatograph/Ion-trap mass spectrometer system.

Nuclear Magnetic Resonance Laboratory
The professionally staffed Chemistry Department NMR facility is equipped with 300MHz and 500MHz Varian Unity INNOVA NMR systems; both instruments have multi-nuclear capability. The probe on the 500MHz instrument is a cryogenically cooled triple resonance model (1H (13C/15N)) suitable for protein analysis. A Varian X-band 12" EPR spectrometer is also available.

Analytical Instrumentation Laboratory
The open-access departmental Analytical Instrumentation Laboratory includes two Perkin-Elmer (PE) Spectrum One Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Lambda-35 UV/visible spectrometer, a PE Lambda-950 UV/visible/NIR spectrometer with a 60-mm-diameter diffuse reflectance integrating sphere, a PE model 343 polarimeter, a PE LS55B luminescence spectrometer, a PE Clarus 500 capillary-column GC with dual FID detectors, a Clarus 500 capillary-column GC/MS system (with electron impact capability), a PE Series 200 Quaternary HPLC development system with UV/visible photodiode array detector, a PE Series 200 binary HPLC system interfaced to a Sciex 2000 triple-quadrupole mass spectrometer, a PE Series 2000 binary Gel Permeation Chromatography system with refractive index detector, and a Varian AA240FS flame atomic absorption spectrometer equipped with a GTA 120 Graphite Furnace Accessory.

Organic Instrumentation Laboratory
The Organic Instrumentation Laboratory (co-located with the organic synthesis teaching laboratories in the Papakis Integrated Sciences Building) is equipped with two Perkin-Elmer (PE) Spectrum Two Fourier-transform infrared absorption spectrometers each with a universal diamond ATR accessory, a PE Clarus 500 capillary-column GC with one FID and one TCD detector, and an Anasazi EFT-90 FT-NMR system.

Other Departmental Facilities
The department has a VEECO INNOVA N3 Multimode Scanning Probe Microscope and also maintains a computational chemistry laboratory equipped with nine Dell Optiplex 790 computers running Hyperchem v 8.0. Research laboratories for each of the department faculty members are located in Disque and Stratton Halls. Instrumentation available in the research laboratories is described on individual faculty web pages. Full-time professional support includes two electronic instrument specialists (for NMR and MS- Chemistry Department), two electronics specialists (College of Arts & Sciences Electronics Shop), and four machinists (Drexel University Machine Shop).

Chemistry Faculty

Anthony W. Addison, PhD (University of Kent at Canterbury, England). Professor. Design and synthesis of novel biomimetic and oligonuclear chelates of copper, nickel, iron, ruthenium and vanadium; their interpretation by magnetochemical, electrochemical and spectroscopic methods, including electron spin resonance; CD and ESR spectroscopy and kinetics for elucidation of molecular architecture of derivatives (including NO) of oxygen-binding and electron-transfer heme- and non-heme iron metalloproteins of vertebrate and invertebrate origins; energy-transfer by Ru, Ir and lanthanide-containing molecules and assemblies.

Jason Cross, PhD (University of Surrey (UK)). Assistant Teaching Professor. Luminescent lanthanide complexes

Peter DeCarlo, PhD (University of Colorado) Graduate Studies Advisor., Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Aaron Fafarman, PhD (Stanford University). Assistant Professor. Photovoltaic energy conversion; solution-based semiconductor synthesis; colloidal nanocrystals; electrical and optical spectroscopies.

Fraser Fleming, PhD (University of British Columbia (Canada)) Department Head, Chemistry. Professor. Nitriles, Isonitriles, Stereochemistry, Organometallics

Joe P. Foley, PhD (University of Florida) Associate Department Head. Professor. Separation science, especially the fundamentals and biomedical/pharmaceutical applications of the following: pressure-driven separation techniques: capillary electrophoresis (CE), electrokinetic chromatography, supercritical fluid chromatography, and high-performance and two-dimensional liquid chromatography (LC). Within these techniques, we explore novel separation modes (e.g., dual-opposite-injection CE and sequential elution LC), novel surfactant aggregate pseudophases, and chiral separations.

Lee Hoffman, PhD (Flinders University, Adelaide, South Australia). Assistant Teaching Professor. Interfacial studies on the self-assembly of natural organic materials, understanding the nature of each component, and development of a mechanism describing this process; Dendrimer/metal nanocomposite design and synthesis hosting metallic nanoparticles, utilizing the multivalent dendritic polymer architecture for further exploitation with other molecules such as antibodies and other targeting species.

Monica Ilies, PhD (Polytechnic University of Bucharest). Assistant Teaching Professor.

Haileng Frank Ji, PhD (Chinese Academy of Sciences). Professor. Micromechanical sensors for biological and environmental applications; Nanomechanical drug screening technology.

Daniel B. King, PhD (University of Miami). Associate Professor. Assessment of active learning methods and technology in chemistry courses; incorporation of environmental data into chemistry classroom modules; development of hands-on activities and laboratory experiments.

Daniel A. Kleier, PhD (University of Notre Dame). Associate Teaching Professor.
Communication

Molly O'Connor, PhD (Drexel University). Assistant Teaching Professor. Synthesis and characterization of chiral and achiral metal complexes with novel multidentate ligands.

Kevin G. Owens, PhD (Indiana University). Associate Professor. Mass spectrometry research, including the development of sample preparation techniques for quantitative analysis and mass spectrometric imaging using matrix-assisted laser desorption/ionization (MALDI) time-of-flight mass spectrometry (TOFMS) techniques for both biological and synthetic polymer systems, the development of laser spectrometric techniques for combustion analysis, and the development of correlation analysis and other chemometric techniques for automating the analysis of mass spectral information.

Lynn S. Penn, PhD (Bryn Mawr College). Professor. Surface modification for specific applications: chemically derivatize metal and ceramic solid surfaces; designing and executing sequential chemical processes, building complex and layered structures on surfaces, with specific focus on behavior of polymer brushes (investigating the fundamental transport-selective behavior of polymer brushes because of potential in drug delivery, biomedical devices and as an explanation of some biological processes).

Reinhard Schweitzer-Stenner, PhD (Universität Bremen (Germany)). Professor. Exploring conformational ensembles of unfolded or partially folded peptides and proteins; determining the parameters governing peptide self-aggregation; structure and function of heme proteins; investigating protein-membrane interactions; use of IR, VCD, Raman, NMR and absorption spectroscopy for structure analysis.

Peter A. Wade, PhD (Purdue University). Associate Professor. Exploration of a newly discovered (3.3)-sigmatropic rearrangement in which O-allyl nitronic esters are thermally converted to #.#-unsaturated nitro compounds; development and exploitation of a carbon-based hemiacetal mimic; and exploration of cycloaddition reactions involving nitroethylene derivatives and novel nitrile oxides.

Anthony Wambsgans, PhD (Rice University). Associate Teaching Professor.

Jun Xi, PhD (Cornell University). Associate Teaching Professor. Biomacromolecular interactions both in solution and in confined environment; mechanisms of DNA replication and DNA repair; structure and function of molecular chaperones; drug target identification and new therapeutic development; single molecule enzymology; DNA directed organic synthesis.

Emeritus Faculty

Amar Nath, PhD (Moscow State University, Moscow USSR). Professor Emeritus.

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 09.0401; 09.0900; 09.0908; 09.9999; 23.1303

Standard Occupational Classification (SOC) code: 11-2011; 11-2031; 27-3022; 27-3041; 27-3042; 27-3043

About the Program

The Communication department offers a major in communication, with concentrations in public relations, journalism, technical and science communication, and an open, flexible track.

The department is committed to helping students become broadly educated and professionally competent communicators. Students are exposed to a variety of media and are guided in the development of their interpretive and expressive skills.

All communication majors take a common core of courses that emphasize communication theory and methods. They then specialize in one of four concentrations. Students in the public relations concentration pursue careers in public relations, event planning, media relations, social media, and corporate communication. Those who choose the technical and science communication concentration go on to work in technical writing, science writing, publishing, and software and hardware documentation. Journalism students pursue careers in journalism and news. Students in the Open concentration have the flexibility of crafting their path through the major and thus have career possibilities in any of the areas listed here. Many communication graduates also go on to law school, to business school for an MBA, or to graduate school.

Students who elect the public relations concentration have the option of pursuing either a bachelor of arts degree or a bachelor of science degree. Students who elect the technical and science communication concentration must pursue the bachelor of science degree. Students in journalism must complete the requirements for the bachelor of arts degree. Students in the open track complete the requirements for the bachelor of arts degree.

Degree Requirements: Journalism (BA)

Journalism provides students with the skills and theoretical perspective they need to be a journalist in today’s swiftly changing media environment. An extension of the program’s core curriculum, the concentration hones the student’s ability to write, edit, and produce audiovisual content while at the same time exposing the student to new and evolving aspects of the field.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Degree Requirements: Public Relations (BA)

The concentration in public relations covers a broad range of activities that help an organization and its public communicate with one another. The field includes public relations, media relations, event planning, publication design, employee and customer communication, social media, and government relations.

Skills in this field include written, oral, and visual communication. A public relations specialist might be called on to write articles for an in-house newsletter, to research and write an annual report to shareholders, to publicize a special event, to write a speech for an executive, to plan a press conference, to develop a media plan for an organization, or to script a video for an employee orientation session.

Free electives 36.0
Total Credits 180.0-184.0

* At least one foreign language course must be at the 200-level or above.

Writing-Intensive Course Requirements
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List at the University Writing Program. Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Degree Requirements: Technical & Science Communication (BS)**

Students within this track learn to communicate scientific and technical information to various professional and public audiences. The program combines courses that develop communication skills with courses that enhance understanding of science and technology.

Students who study technical and science communication find work in a wide range of areas, including technical writing for software or hardware products, proposal and grant writing, and research or writing in the fields of health, pharmaceuticals, medicine or science.

**General Requirements**

- Technical, Science and Communication elective 3.0
- Social and behavioral science elective 3.0
- Term Credits: 16.0

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic program.
work in a variety of areas, including communication, business, and law. Although graduate study is not necessary for those who pursue careers in public relations, students have used the major as a basis for graduate work in a variety of areas, including communication, business, and law. Graduates with a concentration in public relations find employment in various business areas with an indirect relationship to public relations concentrations enable the graduates to find administrative positions in the field of Communication and will thus be ready for a variety of career options. Many students become technical writers and editors who produce manuals and reports about high-technology products and services. Students may also choose to pursue graduate study, whether in journalism or another discipline.

### Co-op/Career Opportunities

#### Public Relations

Graduates with a concentration in public relations find employment in a wide variety of fields, including public relations, advertising, special events planning, writing and editing, and public information. In addition, the strong communication and management skills stressed by this concentration enable the graduates to find administrative positions in various business areas with an indirect relationship to public relations such as marketing, sales, human resources consulting, or publishing.

Co-operative education opportunities are available with a variety of corporations and nonprofits in such positions as corporate communication specialist, public relations assistant, and newsletter writer. The following are samples of co-op experiences:

- Advertising and Promotions Assistant, CoreStates Bicycle Championships, Philadelphia.
- Advertising/ Promotions Co-op, U.S. Marketing Division, Mobil Oil Corp., Fairfax, VA.
- Assistant Coordinator, Communications Bureau, United Way of Southeastern Pennsylvania, Philadelphia.

#### Journalism

Journalism students pursue careers in journalism, broadcast media, and news. Given the rapidly changing nature of these fields, graduates may also find work in new types of publishing platforms, such as social media or mobile, or involving audiovisual content creation. Journalism graduates may also choose to pursue graduate study, whether in journalism or another discipline.

Journalism students have held co-ops with a number of media, news, and information companies, including the following:

- **Production assistant, WPVI-TV (Channel 6) Philadelphia**
- **Staff writer, Delaware County Daily Times**
- **Promotions department, WPLY-FM (Y-100)**
- **Production assistant, sports department, FOX-29 (WTFX-TV)**

#### Technical and Science Communication

Students who study technical and science communication are prepared for a variety of career options. Many students become technical writers and editors who produce manuals and reports about high-technology products and services. Students may also go on to write specifications and in-house organs for business, industry, and government. Other students conduct and interpret surveys for business. In addition, this program is excellent preparation for graduate study in a number of fields, such as law and medicine.

Co-operative education opportunities are available with a variety of corporations and nonprofit organizations. The following are some samples of past co-op experiences:

- **Technical writer**, Unisys Corp. and Hewlett Packard
- **Web page writer**, Hospital of the University of Pennsylvania
- **Pharmaceutical writer**, GlaxoSmithKline
- **Medical writer**, Medcases Corp.

#### Open Communication Track

Students in the Open track will develop a focus that fits their interests in the field of Communication and will thus be ready for a variety of career options, which can include any of the directions open to students in the other concentrations in communication. In addition, this program is

excellent preparation for graduate study in a number of fields, such as law and medicine.

Co-op Experiences in the Open Communication track

Students in this track can choose from the variety of co-op opportunities open to any student in Communication.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdcc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Communication

The minor in communication is a 24.0 credit curriculum designed to familiarize students with communication theory while providing training in print and digital communication. The minor can provide a strong complement for majors that emphasize presentations, interpersonal skills, publicity, and marketing. Students minoring in communication can focus on public relations, journalism, and technical science communication, environmental communication, or nonprofit communication.

Students complete 2 required courses, 2 courses in one of the areas listed below, and four additional electives from the COM course offerings that fit their interest.

Please note: No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Communication Faculty

Ronald Bishop, III, PhD (Temple University) Undergraduate Director. Professor. Investigative reporting, sports journalism, journalism history, journalism sourcing patterns, textual narrative and ideological analysis, cultural history of fame.

Karen Cristiano, MS (Temple University) Assistant Department Head of Communication. Teaching Professor. Journalism, medical writing, feature writing, copy editing, mass media and society.

Richard Forney Assistant Teaching Professor. Broadcast journalism technology and the effects of new technologies on personal and corporate communication skills.

Alexander Friedlander, PhD (Carnegie Mellon University) Associate Dean for Undergraduate Education, College of Arts and Sciences. Associate Professor. Rhetorical theory and practice, document design, writing and technology.

Ernest A. Hakanen, PhD (Temple University). Professor. Telecommunications policy, adolescent media use, communication theory and history, global media, semiotics.

Barbara Hoekje, PhD (University of Pennsylvania). Associate Professor. Sociolinguistic theory, discourse analysis, applied linguistics (language teaching, learning, and testing).

Julia May, PhD (Drexel University) Graduate Director. Assistant Teaching Professor. Political communication, international politics and news coverage thereof, public opinion, transatlantic relations, war, torture and human rights, debate in the public sphere.

Alexander Nikolaev, PhD (Florida State University). Associate Professor. Public relations, political communication, organizational communication, mass communication, international communications and negotiations, communications theory.

Rosemary Rys, MA (Rowan University). Assistant Teaching Professor. Public relations and marketing.

Lawrence Souder, PhD (Temple University). Associate Teaching Professor. Science and technical writing, communication ethics, nonprofit communication.
Allan Stegeman, MA (University of Houston). Teaching Professor. Communication, technology and mass media, video.

Susan Stein, PhD (University of Wisconsin). Associate Teaching Professor. Science, environmental, and health communication

Scott Tattar, BA (York College). Instructor. Public relations, media relations, strategic communication.

Asta Zelenkauskaitė, PhD (Indiana University). Assistant Professor. Social media, user-generated content, computer-mediated communication, interactivity, active audience analysis, mobile communication, gender and online identity, prosumer culture, internet of things, quantitative/qualitative research.

Criminology and Justice Studies

Major: Criminology and Justice Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Justice Informatics Concentration

Program Description

With its thematic concentration in Justice Informatics (JI), Drexel University has transformed the traditional criminal justice degree program to produce graduates who possess knowledge and skills that are highly valued by criminal justice agencies in the 21st century. Namely, the program draws from criminology and criminal justice and computing and informatics to produce globally aware and technology proficient graduates who bring an analytical and information-led approach to solving the problems crime creates for society.

Each exposure to the criminal justice system represents a data collection point, which becomes part of a massive and disparate array of data held by the government. Students will learn how to collect, manage, visualize, and analyze large sources of information so that they can bring their expertise into the crime and justice occupational arena and/or graduate school. In addition to learning to work with "big" data in the public justice arena, students will learn how to identify, collect, manage, and use data from the expansive -- and rapidly growing -- private system of justice and security to creative innovative solutions for identifying, solving, and preventing crime.

Graduates of Drexel's Justice Informatics concentration will be ideally suited to meet the demands of the growing job market for crime analysts among criminal justice, defense, and intelligence agencies and in the private-sector security community. Crime analysts have become an essential part of the modern criminal justice agency. They have become vital to, for example, the large police department looking to deploy resources in a manner that matches crime trends, the intelligence agency working to prevent terrorist events, and the financial services firm hoping to identify the fraudulent use of a credit card. JI graduates can also play an integral role on teams that build future information technology solutions for intelligence, defense, and criminal justice agencies from the public and private sectors.

Given the global nature of crime and justice issues, JI requires one course on international justice systems; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: The Legacy of Nazi Policing and Cold War Justice in Munich and Prague; The Roots of Common Law Justice in London. Please visit the Study Abroad Program (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) web page to view the location and itinerary of the 2016 study tour). The emphasis on comparative justice and study abroad reside at the leading edge of Drexel’s core value of global citizenship.

The Justice Informatics thematic concentration reserves 27.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Visit Drexel's Modern Languages Program (http://www.drexel.edu/culturecomm/academics/undergraduate/modernlang/languages) web page for a list of language minors.

Additional Information

For more information about the Justice Informatics concentration, please contact:

---

**Minor in Criminal Justice**

Students from any major who are interested in the law, legal issues and the forensic sciences may envision a future connection with the criminal...
just system. These students could enhance their career possibilities by adding a minor in criminal justice to their major field of study.

The minor consists of four required courses and four criminal justice electives for a total of 24.0 credits.

**Total Credits:** 24.0

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List. Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

**Justice Informatics Concentration**

**Professional Experiences**

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. This way, when they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney's Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have co-op'd and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, The US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

**Criminology and Justice Studies Faculty**

Robert D'Ovidio, PhD (Temple University) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.

Ashley Dickinson, PhD (Indiana University of Pennsylvania). Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD (University of Pennsylvania, Villanova University School of Law). Assistant Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Lallen Johnson, PhD (Temple University). Assistant Professor. Drugs and violence; race, crime and justice; ecology of crime; geographic information systems.
Robert J. Kane, PhD (Temple University) Director, Criminology and Justice Studies Program. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Cyndi Rickards, EdD (Drexel University) Senior Assistant Dean for Community Engagement. Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

Criminology and Justice Studies

About the Department

In what ways did the War on Drugs of the 1980s and 1990s impact urban communities in terms of street-corner dealing, violence, and overall health? What about national incarceration rates, and racial disparities in the adjudication process? How do so-called Three Strikes laws typically influence the decisions of judges at sentencing? How far will the War on Terrorism push the legal boundaries of government surveillance and the monitoring of electronic communications, and what will be the impacts of such forces? Finally, how are “big data” being used (now and in the future) by justice, intelligence, or private organizations to identify social networks, conduct risk assessments, and make decisions about crime policy and resource deployment?

Drexel University's Program of Criminology and Justice Studies offers a rich educational experience that emphasizes justice and criminological theory, the use of tools and data to answer big questions about crime and justice while teaching students how to translate conceptual knowledge into the state of the art practice. With its three thematic concentrations -- Criminology and Justice Policy, Justice Informatics, and Criminal Justice -- the Department of Criminology and Justice Studies offers students many pathways through which to explore a curriculum that emphasizes learning beyond the classroom in urban, global, and experiential settings.

Minor in Criminal Justice

Students from any major who are interested in the law, legal issues and the forensic sciences may envision a future connection with the criminal justice system. These students could enhance their career possibilities by adding a minor in criminal justice to their major field of study.

The minor consists of four required courses and four criminal justice electives chosen from two categories, for a total of 24.0 credits.

Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Criminology and Justice Policy concentration

About the Program

The Criminology & Justice Policy (C&JP) concentration grounds students in criminological theory and crime policy, as well as justice analytics, to help them identify, describe, and respond to current and emerging crime and security problems. A key goal of any rational crime policy is to maximize its benefits — e.g., reducing crime — while limiting its social costs, such as mass-incarceration, racial disparities, and violent backlashes. Through that lens, C&JP students will work with crime and police calls for service data, geo-tagged social media transmissions, and other sources of information to identify and explain crime trends, “hotspots,” and “colds spots” across given geographies; and they will put their theory to use as they learn to generate and test research hypotheses related to crime and justice policy outcomes. Moreover, through community-based learning (a core value of the program), C&JP offers students the unique opportunity to experience criminology and justice education from the perspectives of those most affected by the criminal justice system: One required course is taught in an active jail; another is taught in a local community service organization.

Finally, recognizing the global nature of crime and justice issues, C&JP requires one course on international justice systems, two globally-themed courses outside the program; and it encourages all students to participate in at least one faculty-led study abroad program during which students will explore various justice-related themes (examples of recent trips: The Legacy of Nazi Policing and Cold War Justice in Munich and Prague; The Roots of Common Law Justice in London). Please see the Study Abroad Program (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) web page to view the location and itinerary of the 2016 study tour.). The emphasis on comparative justice and study abroad reside at the leading edge of Drexel’s core value of global citizenship.

The Criminology & Justice Policy thematic concentration reserves 31.0 credits of free electives so that students can earn a minor outside the Program in Criminology and Justice Studies. Students interested in intelligence/security-related careers should consider minoring in a language. Visit Drexel’s Modern Languages Program (http://www.drexel.edu/coas/academics/departments-centers/global-studies-modern-languages/degrees-programs/modern-languages) web page for a list of language minors.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Criminology and Justice Policy concentration

Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. When they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney’s Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have done co-ops and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, The US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty. The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

Criminology and Justice Studies Faculty

Robert D'Ovidio, PhD (Temple University) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.

Ashley Dickinson, PhD (Indiana University of Pennsylvania). Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD (University of Pennsylvania, Villanova University School of Law). Assistant Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Lallen Johnson, PhD (Temple University). Assistant Professor. Drugs and violence; race, crime and justice; ecology of crime; geographic information systems.

Robert J. Kane, PhD (Temple University) Director, Criminology and Justice Studies Program. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.
Criminology and Justice Studies

Major: Criminology and Justice Studies
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.0401
Standard Occupational Classification (SOC) code: 11-9199

Criminal Justice Concentration

The Criminal Justice concentration is housed in the Program of Criminology and Justice Studies and serves as the "generalist" concentration for the program. Specifically, the Criminal Justice concentration focuses its curriculum primarily on the substance of criminal justice institutions and crime and does not require many of the analytics and computer-based courses that the other two concentrations require. This concentration is primarily intended for students seeking a traditional criminal justice education. Because the Criminal Justice concentration reserves 41.0 credits of free electives, it is the most flexible of the three concentrations, allowing students, for example, to relatively easily double major, or to take on a minor while still reserving enough free credit for other courses of interest outside the program.

Despite that the CJ concentration is the least analytically demanding of the three concentrations, it still offers the community-based learning and global perspective of the other two concentrations. Students in all three concentrations are encouraged to participate in at least one faculty-led study abroad program during which students will explore various justice related themes. Recent trips have been The Legacy of Nazi Policing and Cold War Justice in Munich and Prague and The Roots of Common Law Justice in London. Please see the Study Abroad Program (http://studyabroad.drexel.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=47709) web page to view the location and itinerary of the 2016 study tour. The emphasis on comparative justice and study abroad reside at the leading edges of Drexel's core value of global citizenship.

Criminal Justice Concentration

Degree Requirements

General Requirements

ANTH 101 Introduction to Cultural Diversity 3.0
COM 150 Mass Media and Society 3.0
ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0
PHIL 101 Introduction to Western Philosophy 3.0
PSCI 100 Introduction to Political Science 4.0
PSY 101 General Psychology I 3.0
SOC 101 Introduction to Sociology 3.0
English Elective (any ENGL course over 200-level) 3.0
Fine Arts Elective 3.0
History Elective 4.0
UNIV H101 The Drexel Experience 1.0
UNIV H201 Looking Forward: Academics and Careers 1.0

CIVC 101 Introduction to Civic Engagement 1.0
Math Sequences
Take any two Math courses 6.0-8.0
Science Sequence
Take any two Science courses with a lab from any combination of Biology, Chemistry, and Physics 8.0

Program in Criminology and Justice Studies Core Requirements

CJS 101 Introduction to Criminal Justice 3.0
CJS 200 Criminology 3.0
CJS 210 Race, Crime, and Justice 3.0
CJS 220 Crime and the City 3.0
CJS 260 Justice in Our Community 4.0
CJS 261 Prison, Society and You 3.0
CJS 290 Crime and Public Policy 3.0
CJS 375 Criminal Procedure 3.0
CJS 376 Sentencing 3.0
PHIL 330 Criminal Justice Ethics 3.0

Methods and Analytics Sequence

CJS 250 Research Methods & Analytics I 3.0
CJS 300 Research Methods and Analytics II 3.0

Criminal Justice Thematic Concentration

CJS 266 Crime Prevention Planning 3.0
CJS 276 Introduction to Computer Crime 3.0
CJS 278 Introduction to Law Enforcement 3.0
CJS 280 Communities and Crime 3.0
CJS 360 Juvenile Justice 3.0
CJS 374 Restorative Justice 3.0

Program Electives

Complete 10 of the following courses: 30.0

CJS 265 Criminal Investigation
CJS 273 Surveillance, Technology, and the Law
CJS 274 Sex, Violence, & Crime on the Internet
CJS 275 Issues in Domestic Violence
CJS 289 Terrorism
CJS 295 International Field Experience
CJS 301 Methods and Analytics III
CJS 302 Advanced Criminological Theorizing
CJS 320 Comparative Justice Systems
CJS 330 Crime Mapping I Using Geographic Information Systems
CJS 335 Intelligence-Led Decision-Making
CJS 362 Gender, Crime, and Justice
CJS 365 Computer Investigations and the Law
CJS 366 Technology and the Justice System
CJS 372 Death Penalty - An American Dilemma
CJS 373 Environmental Crime
CJS 377 Intellectual Property Theft in the Digital Age
CJS T380 Special Topics in Criminology and Justice Studies
CJS I399 Independent Study
PSYC 229 Theories of Justice

Free Electives 42.0

Total Credits 182.0-184.0

Review the prerequisites before trying to register.

### Criminal Justice Concentration

#### Professional Experiences

Students will complete one co-op (i.e., professional placement), typically during the spring and summer quarters of their Junior year. When they return for the start of their senior year, they can immediately begin their (impending) post-graduation job search with their co-op experience still recent on their resume. Some placements are paid (usually in the private sector) and others are unpaid (primarily in the public sector). The placements earn students academic credit while providing professional socialization and learning with crime and justice professionals. The networking aspects of these placements are invaluable for future career development. In addition to the learning experiences, past students have received excellent letters of recommendation for future employment agencies and for graduate and law school admissions.

In recent years, students have been placed in local agencies such as the District Attorney’s Office, the Institutional Law Project, the Juvenile Law Center, the Defendants Association of Philadelphia, the Philadelphia and Bucks County Prison Systems and the Pennsylvania Prison Society, Pennsylvania and New Jersey State Police. Several students have done co-ops and later worked full time at the Eastern State Penitentiary Historical Site and Museum. On the state level, co-op students have worked with the Board of Probation & Parole and other agencies. At the federal level, the US Customs Service had an agreement to accept cooperative education placements after having been screened by faculty.

The faculty in Criminology and Justice Studies has been working over the past few years to expand its list of research co-ops (primarily for students working toward graduate school) and international co-ops.

### Criminology and Justice Studies Faculty

Robert D’Ovidio, PhD (Temple University) Associate Dean for Humanities and Social Science Research and Graduate Education. Associate Professor. The intersection of computer technology, crime, and the criminal justice system; criminological theory; policing; transnational crime.
Ashley Dickinson, PhD (Indiana University of Pennsylvania). Assistant Teaching Professor. Corrections; offender rehabilitation; risk management; offender classification; gender and crime.

Jordan Hyatt, PhD, JD (University of Pennsylvania, Villanova University School of Law). Assistant Professor. Community corrections; drug treatment; homelessness; probation/parole; re-entry; risk assessment; sentencing.

Lallen Johnson, PhD (Temple University). Assistant Professor. Drugs and violence; race, crime and justice; ecology of crime; geographic information systems.

Robert J. Kane, PhD (Temple University) Director, Criminology and Justice Studies Program. Professor. Police authority and accountability; urban ecology and sociology; violence and public health; police strategies and practices.

Cyndi Rickards, EdD (Drexel University) Senior Assistant Dean for Community Engagement. Assistant Teaching Professor. On-line pedagogy; service-learning pedagogy; juvenile justice; domestic violence.

### English

**Major: English**

**Degree Awarded: Bachelor of Arts (BA)**

**Calendar Type: Quarter**

**Total Credit Hours: 182.0**

**Co-op Options:** Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

**Classification of Instructional Programs (CIP) code:** 23.9999

**Standard Occupational Classification (SOC) code:** 25-1123

### About the Program

Specifically designed to engage students in critical thinking and applied writing skills, the English major offers a wide-ranging curriculum on British, American and World literatures and stresses the cultural, historical and political contexts that shape and affect literary production. The Department of English and Philosophy (http://www.drexel.edu/coas/academics/departments-centers/english-philosophy) also offers variety of courses on periods and genres; creative writing; and the relationship between literature and the visual arts, science and technology.

Students develop solid techniques in critical inquiry as well as in writing, literary, and reading skills. Implicit in our undertaking is the leadership role of our department in the formulation and discussion of such broad theoretical and practical questions as the following: the connection between oral and written communication skills; analytical, ethical, and critical thinking; questions of value and morality; the relevance and relation of the past to the present; the relations between and among cultures; the role of literary and philosophical texts in our attempts to explain human motives and behavior; and the relations between the sexes.

Co-op/Career Opportunities

English majors pursue many professional fields in addition to teaching and creative writing. Many go on to law school, politics and government, or business careers. The critical thinking, analytical and writing skills provided by our program are essential for high-level decision-making and problem solving in any professional situation.

Co-op employment is an option for English majors who can explore co-op or internship opportunities at Philadelphia museums, city government and visitors’ bureaus, television and radio stations, law firms, and nonprofit organizations.
Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

**Minor in English**

**About the Minor**

The English minor provides students from other majors with a more intensive background in literature. Coursework in the minor exposes students to literature from a variety of periods, cultures and genres and also provides practice in critical thinking, literary analysis and writing. These courses enrich students' intellectual lives and provide them with skills that are valuable in a variety of professional situations. Where a course required for the minor is already required for a student’s major, the student is directed to choose another English elective. Other substitutions are permissible at the discretion of the Program Director.

**Accelerated/Dual Degree**

**About the Program - English BA / Publishing MA**

In keeping with Drexel University’s commitment to experiential learning, the accelerated degree program of a BA in English and an MA in Publishing offers students the opportunity to graduate in five years with two separate six-month co-op experiences and a Masters degree, which also includes many opportunities for hands-on experience.

Drexel’s unique quarter system allows English majors with considerable flexibility within their course of study. Students can focus on writing, literary criticism, or comparative literature, for example, while also enhancing the breadth and depth of their education with courses taught in other departments and programs across the University. Drexel Publishing Group (DPG) is a unique part of the English department. DPG is solely responsible for three publications, each one unique and vital: Painted Bride Quarterly, one of the nation’s oldest literary magazines; 5027mac.org, a news and culture blog written by our students; and The 33rd, the only university-based text in the United States that includes interdisciplinary, multi-genre pieces written by students at all levels and faculty as well. DPG and its activities are the overlapping element between our undergraduate and graduate programs, with student at all levels working together to make each element more successful.

Drexel’s Masters of Arts in Publishing is interdisciplinary, offering courses in law, marketing, and graphic design. Instructors come from all areas of publishing: from newspapers to small presses, from online venues to academic presses. Classes often feature guest speakers who are also currently working in the industry, such as small press founders, trade magazine editors, agents, and more. Course instructors and
guest speakers inform students and broaden perspectives on career opportunities in the publishing industry.

**Admission Requirements**

Students must apply when their undergrad status is at a minimum of 90.0 credits and a maximum of 120.0 credits.

Students apply through Graduate Admissions and must follow Drexel University admission application guidelines.

**Degree Requirements**

**Undergraduate Requirements:**

**University Requirements:**

- **CIVC 101** Introduction to Civic Engagement 1.0
- **ENGL 101** Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
- **ENGL 102** Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
- **ENGL 103** Composition and Rhetoric III: Themes and Genres 3.0
- **UNIV H101** The Drexel Experience 1.0
- **UNIV H201** Looking Forward: Academics and Careers 1.0

**Two Mathematics Courses** 6.0

**Two Science Courses** 6.0

**Two Foreign Language Courses** 8.0

Any two (2) consecutive foreign language courses (completing level 201)

**Humanities and Fine Arts** 12.0

Select four of the following:

- **ARTH 101** History of Art I: Ancient to Medieval
- **ARTH 102** History of Art II: Renaissance to Romanticism
- **ARTH 103** History of Art III: Modern Art
- **DANC 201** Dance Appreciation [WI]
- **DANC 210** Introduction to Dance
- **DANC 220** History of Dance
- **DANC 325** Twentieth Century Dance [WI]
- **FMST 150** American Classic Cinema
- **FMST 250** The Documentary Tradition

- Publishing electives must be 500-level or above.

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/).
Sample Plan of Study

English Faculty

Jan Armon, PhD (University of Michigan), Associate Teaching Professor. Academic functions of personal writing, first-year writing.

Kenneth Bingham, MA (Temple University), Teaching Professor. Literature of baseball; engineering ethics; first-year writing.
Valerie Booth, PhD (Emory University). Associate Teaching Professor. Literature and science; first-year writing.

André Carrington, PhD (New York University). Assistant Professor. Cultural politics of race, gender and genre; feminism; critical race theory.

Lisa DiMaio, MEd (Temple University). Teaching Professor. English as a Second Language (ESL).

Dan Driscoll, MA (Temple University) Associate Director, University Writing Center. Teaching Professor. Curricular Initiatives. Co-Director, Minor in Writing. First-year writing.

Anne Erickson, PhD (Purdue University). Assistant Teaching Professor. Online educational applications; the short story cycle; first-year writing.

Nomi Eve, MFA (Brown University). Assistant Teaching Professor. Director, Drexel Storylab. Fiction writing.

Robert Finegan, MFA (University of Pittsburgh). Associate Teaching Professor. Technical writing; creative writing; first-year writing.

Alexis Finger, MS (Queens College, CUNY). Associate Teaching Professor. Speech education; English as a Second Language (ESL); oral communication.

Valerie Fox, PhD (Binghamton University). Teaching Professor. Interests include creative writing, literary editing, cross-disciplinary genres, and small press related topics.

Edward Fristrom, PhD (State University of New York-Albany). Associate Teaching Professor. Co-Director, Certificate in Medical Humanities. Medical memoir; writing studies; environmental literature and rhetoric; creative writing, multimedia, and writing education; first-year writing.

Keunah Han, PhD (Temple University). Assistant Teaching Professor. English as a Second Language (ESL)

Cassandra Hirsch, MFA (Rosemont College). Assistant Teaching Professor. Fiction writing; first-year writing.

Gabriella Ibieta, PhD (City University of New York). Associate Professor. Comparative literature; Cuban and Latin American fiction.

Henry Israeli, MFA (University of Iowa) Associate Director, Certificate in Writing and Publishing. Associate Teaching Professor. Founder and editor of Saturnalia Books, a publisher of contemporary poetry. Holocaust literature; dramatic literature; first-year writing.

Kirsten Kaschock, PhD (University of Georgia). Assistant Teaching Professor. Editor-in-chief of thINKing DANCE. Associate Editor, 5027 Mac. American literature; first-year writing.

Miriam Kotzin, PhD (New York University). Professor. Founding Editor, Per Contra. American literature; genre studies; creative writing; communications.

Roger Kurtz, PhD (University of Iowa) Department Head. Professor. Postcolonial and world literatures; African literature and culture; trauma theory.

Stephen Mandell, PhD (Temple University). Professor. American literature; technical writing; speech; first-year writing.

Deirdre McMahon, PhD (University of Iowa). Associate Teaching Professor. Nineteenth-century British literature and culture: empire, critical race studies and analyses of material culture; first-year writing.

Marianallet Mendez-Rivera, PhD (University of Minnesota). Assistant Teaching Professor. Use of the mass media to secure, maintain and enhance political power; international technical communication—including issues of translation v. localization; first-year writing.

Harriet Levin Millan, MFA (University of Iowa) Director, Certificate in Writing and Publishing. Associate Teaching Professor. Poetry writing; first-year writing.

Jill Moses, MFA (University of Oregon). Assistant Teaching Professor. Dramatic literature; first-year writing.

Christopher T. Nielson, PhD (Purdue University) Assistant Department Head; Director, Programs in English. Teaching Professor. Shakespeare; Renaissance drama and literature; dramatic literature; first-year writing.

Karen Nulton, PhD (Rutgers University) Director, Writing Assessment. Associate Teaching Professor. American literature; writing assessment; writing pedagogy; writing across the curriculum; first-year writing.

Margene Peterson, MA (Rhode Island School of Design). Assistant Teaching Professor. English as a Second Language (ESL).

Donald Riggs, PhD (University of North Carolina-Chapel Hill). Teaching Professor. Cinematic monsters; science fiction and fantasy literature and film; Renaissance literature; creative writing; first-year writing.

Donna Rondolone, PhD (University of Pennsylvania). Associate Teaching Professor. Medieval literature; Arthurian legend; first-year writing.

Gail Rosen, JD (Temple University). Associate Teaching Professor. Literature and law; first-year writing.

Doreen Alvarez Saar, PhD (SUNY Buffalo) American Literature Editor, Rocky Mountain Review of Language and Literature. Professor. American literature; early American literature; eighteenth-century American literature; race and gender studies.

Sheila Sandapen, PhD (Indiana University of Pennsylvania) Assistant Director, First-Year Writing Program. Assistant Teaching Professor. Cultural studies; postcolonial literature; British literature; children's literature; women's studies; history and film; first-year writing.

Fred A. Siegel, PhD (New York University) Director, First-Year Writing Program. Teaching Professor. Popular theater; dramatic literature, creative non-fiction; first-year writing.

Scott Stein, MFA (University of Miami). Teaching Professor. Founding Editor, When Falls the Coliseum: A Journal of American Culture (Or Lack Thereof). Creative writing; first-year writing.

Eva Thury, PhD (University of Pennsylvania). Associate Professor. Mythology; classical literature; dramatic literature; desktop publishing and software documentation; first-year writing.
Kathleen Volk Miller, MA (Rutgers University) Director, Graduate Program in Publishing; Co-Director, Drexel Publishing Group. Teaching Professor. Co-Editor, Painted Bride Quarterly (PBQ). Associate Editor, 5027 Mac. Faculty Advisor, Maya. Creative writing; first-year writing.

Maria Volynsky, EdD (Temple University) Associate Director, First-Year Writing Program; ESL Coordinator. Associate Teaching Professor. English as a Second Language (ESL).

Scott Warnock, PhD (Temple University) Director, Drexel Writing Center; Director, University Writing Program. Professor. Rhetoric and composition; medical writing; information technology and literacy.

Robert A. Watts, MA (Temple University). Associate Teaching Professor. Creative writing; first-year writing.

Rachel Wenrick, MFA (Columbia University) Director, Writers Room. Associate Director, University Writing Program: Strategic Initiatives; Co-Director, Minor in Writing. Associate Teaching Professor. First-year writing.

Vincent Williams, PhD (Temple University). Associate Teaching Professor. The intersection of race, gender, class and urbanism; first-year writing.

Jennifer Yusin, PhD (Emory University). Associate Professor. Postcolonial literature; trauma theory; literary theory; psychoanalysis, and memory studies in contemporary literature in English.

Emeritus Faculty

Valarie Arms, PhD (Temple University). Professor Emeritus. Rhetoric and Composition

Richard Astro, PhD (University of Washington) Distinguished Professor. Provost Emeritus. Twentieth-century American literature; eighteenth-century British poetry; sports and social issues.

Raymond Brebach, PhD (University of Illinois). Professor Emeritus. Modern British fiction; the novel; textual studies.

Environmental Science

Major: Environmental Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 183.5
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 03.0104
Standard Occupational Classification (SOC) code: 19-2041

About the Program

The environmental science program at Drexel University is committed to educating undergraduates for technical careers and graduate study in the diverse areas of environmental science vital to understanding, conservation and restoration of clean and healthy natural environments in the 21st century. The affiliation between the Academy of Natural Science (http://www.ansp.org) and Drexel University offers students unique opportunities to take a leadership role in ecology, environmental science and environmental policy, and to grow the scope, capacity and reputation of the natural sciences at the University. The philosophy of the Biodiversity, Earth, and Environmental Science Department is “Experiential Learning Early and Often.”

Environmental science is a multidisciplinary field designed to examine environmental problems and find solutions. This field requires understanding of a number of disciplines, including biology, physics and chemistry. Solving some of our environmental problems also requires knowledge of environmental policy, ethics, and scientific data analysis.

The program has an integrated curricular approach designed around student laboratory and field investigations. The goal of this program is to give students not only knowledge about biology, chemistry, and ecology but also the ability to use the tools and skills of a scientist. The program includes extensive use of computers in the laboratory, and students make frequent oral and written presentations based on their laboratory projects.

Field experience electives may include trips to local aquatic and terrestrial habitats such as streams, lakes, the John Heinz National Wildlife Refuge, New Jersey Pine Barrens, Delaware, Barnegat and Chesapeake Bays, and the Appalachian Mountains. Students are also encouraged to take advantage of study abroad (http://www.drexel.edu/studyabroad) options, including ENVS field courses. These programs often require early planning so it is advisable for interested students to speak to their advisor about opportunities in their first year.

Concentrations are available in:

- Biodiversity and Evolution
- Ecology & Conservation
- Environmental Science

Additional Information

For more information about the program, visit the Department of Biodiversity, Earth & Environmental Science's (http://www.drexel.edu/coas/academics/departments-centers/bees) web page.

Susan Cole
Undergraduate Advisor
Environmental Science
colled@drexel.edu or email bees@drexel.edu.

Degree Requirements

The program is designed to prepare students for careers in environmental science, environmental assessment, marine science, basic and applied ecology, biodiversity, evolutionary biology, and conservation and paleontology. The requirements for specific concentrations in biodiversity and evolution; earth science; ecology & conservation; and environmental science follow the list of degree requirements.

Humanities/Social Science electives | 6.0 |

UNIV S151 | The Drexel Experience | 1.0 |

CIVC 101 | Introduction to Civic Engagement | 1.0 |
UNIV 5201  Looking Forward: Academics and Careers  1.0
Mathematics and Statistics  18.0

Select one of the following sequences:
- Calculus sequence
- MATH 121  Calculus I
- MATH 122  Calculus II
- MATH 123  Calculus III

Analysis sequence
- MATH 101  Introduction to Analysis I
- MATH 102  Introduction to Analysis II
- MATH 239  Mathematics for the Life Sciences

Additional required mathematics courses:
- MATH 410  Scientific Data Analysis I
- MATH 411  Scientific Data Analysis II

Environmental Science Concentration

Total Credits  12.0

Biodiversity & Evolution Concentration

Required Courses
- BIO 244  Genetics I  3.0
- ENVS 312  Systematic Biology  3.0
- ENVS 438  Biodiversity  3.0
- ENVS 470  Advanced Topics in Evolution  3.0

Total Credits  12.0

Ecology & Conservation Concentration

Required Courses
- ENVS 284  Physiological and Population Ecology  3.0
- ENVS 286  Community and Ecosystem Ecology  3.0
- ENVS 328  Conservation Biology  3.0

Ecology & Conservation elective  3.0

Total Credits  12.0

Environmental Science Concentration

Required Courses
- ENSS 341  Environmental Movements in America  4.0
  or ENSS 347  Introduction to Environmental Policy Analysis  4.0
- ENVS 275  Global Climate Change  3.0
- ENVS 284  Physiological and Population Ecology  3.0
  or ENVS 286  Community and Ecosystem Ecology  3.0
- ENVS 310  Introduction to Environmental Chemistry  3.0

Total Credits  13.0

Notes about Environmental Science Opportunities:

- Field experience electives include quantitative environmental measurements in local aquatic and terrestrial habitats, such as streams, lakes, the Delaware Bay, the Poconos, and the New Jersey Pine Barrens (for example, Field Botany: NJ Pine Barrens; Ecology of the Pine Barrens; Marine Field Methods).
- Students are required to consult frequently with their academic advisors for curriculum planning. Many of the graduate courses in environmental science are also open to qualified seniors who wish to become familiar with some of the applications in the field. Prerequisites and descriptions of available graduate courses appear in the graduate catalog.
- The Equatorial Guinea: Bioko Island Study Abroad Program offers a unique opportunity for undergraduates and recent graduates to study tropical biodiversity and its conservation, with an emphasis on field work that takes advantage of Bioko Island's pristine rainforests ranging from sea level to over 10,000 feet in altitude, its seven species of rare monkeys and its four species of nesting sea turtles. For more information, please visit the Drexel Study Abroad Office (http://www.drexel.edu/studyabroad).

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing-Intensive Course Requirements section in the catalog.
Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Sample Plan of Study**

The plan of study below is a generic plan, suited for all four concentrations. Contact the program advisor for additional details.

| **Term Credits** | **14.0** |

**Total Credit**: 183.5-189.5

* See degree requirements (p. 277).

**Co-op/Career Opportunities**

Environmental scientists pursue careers in environmental assessment, environmental health, ecology, conservation, marine science, and atmospheric science.

**Co-op Opportunities**

Co-op and research opportunities will be available with the scientists at the Academy of Natural Sciences (http://www.ansp.org). In addition, recent co-op experiences have included:

- CHPlanning, Center City Philadelphia
- Lakes Environmental Assn., Maine
- US Environmental Protection Agency, Center City Philadelphia
- Criterion Lab Inc, Philadelphia PA Suburbs
- Philadelphia Water Department, Philadelphia
- Temple University, Philadelphia
- Fairway Testing Co., NYC
University of Alaska, Fairbanks, Alaska
Bioko Biodiversity Protection Program, Equatorial Guinea
React Environmental Professional Services Group Inc., Philadelphia
Exelon Corporation, Philadelphia

**Graduate Opportunities**

Graduates in this major typically work for government environmental agencies, in environmental consulting firms, and in environmental departments of various industries. Additional training at the graduate level is an option for many students.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdcc) page for more detailed information on co-op and post-graduate opportunities.

**Environmental Science Faculty**

Walter F. Bien, PhD (Drexel University) Director, Laboratory of Pinelands Research. Research Professor. Natural resource management, restoration ecology, conservation biology, and New Jersey Pinelands community dynamics.

Carol Collier, FAICP, FAWRA, MRP (University of Pennsylvania) Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library; Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Daniel P. Duran, PhD (Vanderbilt University). Associate Teaching Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect systems to better understand fundamental evolutionary processes and maintain biodiversity.

Jon Gelhaus, PhD (University of Kansas) Curator, Department of Entomology: Academy of Natural Sciences. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Richard J. Horwitz, PhD (University of Chicago) Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O'Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pilsbury Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

James R. Spotila, PhD (University of Arkansas) L. D. Betz Chair Professor. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluyt, PhD (University of Hawaii). Assistant Professor. The cyclicity of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

David J. Velinsky, PhD (Old Dominion University) Department Head, Biodiversity, Earth and Environmental Science. Professor. Geochemical cycling of organic and inorganic constituents of sediments and waters; Sedimentary diagenesis of major and minor elements; Isotope biogeochemistry of carbon, nitrogen and sulfur in marine and freshwater systems.

Elizabeth B. Watson, PhD (University of California, Berkeley). Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

**Emeritus Faculty**

Jospeh Bentz, PhD (State University of New York (SUNY) at Buffalo). Professor. Biophysics, biochemistry and biopharmaceuticals, focused on the molecular basis of biological membrane transport and fusion.
Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Environmental Studies

Major: Environmental Science
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 182.0
Classification of Instructional Programs (CIP) code: 03.0313
Standard Occupational Classification (SOC) code: 19-2041

About the Program

Note: Effective Fall 2014, students are no longer being accepted into this program. Please see the BA in Environmental Studies and Sustainability (p. 283).

The major in environmental studies is a multi-disciplinary program designed to provide students with both a technical grounding in environmental science as well as a strong emphasis in social science in order to prepare students for environmental policy careers.

The causes and consequences of environmental problems are extremely complex, involving the connection of natural ecological systems to human systems such as physical infrastructure and the built environment. Equally important to understanding environmental problems are the social, economic and political considerations that govern society’s ability to balance its current needs and desires with those of future generations. Indeed, ecological problems and their consequences are an enduring problem of society. Problems such as air and water pollution, exposure to toxic chemicals, sprawling land development, environmentally damaging energy extraction and unsustainable energy use practices, to name a few, all conspire to negatively influence our natural world as well as human health and well being.

The environmental studies major draws on the University’s academic strengths in science, technology, social science and communication. Courses and faculty are drawn from a diverse set of academic programs: including the natural sciences, social sciences and the humanities. The program also benefits from Drexel’s urban location -- as issues related to urban sustainability policy and planning, including urban redevelopment and land reuse practices, transportation policy, green building, energy efficiency, urban farming and food systems, recycling, and racial and class-based environmental justice and health -- are core topics of the program of study.

The degree is designed to prepare students for a wide set of vocational opportunities with governmental agencies, corporations, and nonprofit organizations that develop, implement and communicate environmental policies. Students are strongly encouraged to gain valuable professional experience through Drexel’s cooperative education program.

For more information visit the Department of Biodiversity, Earth & Environmental Science (http://www.drexel.edu/coas/academics/departments-centers/bees) web page.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Minor in Environmental Studies

The environmental studies minor is an interdisciplinary minor designed to give students specializing in other fields a background in contemporary environmental issues and the ability to analyze such issues. For students majoring in such fields as business and engineering, the minor in environmental studies will provide them with the tools to make better decisions about products or projects related to environmental economics, political pollutants, environmental policy, and environmental justice. For students who are liberal arts majors, the minor in environmental studies offers the opportunity to focus on the social- and natural-science aspects of the environment, and to be prepared for issues they may encounter in their careers.

Environmental Studies and Sustainability

The objective of this major is to educate students so that they will be successful in finding solutions to environmental challenges that all societies will face in the 21st century. Graduates will be educated with the goal of thinking in terms of cross-cultural ideas and dialogue. In that way they will be encouraged to help people of all cultures understand environmental problems and act in the area of environmental stewardship.

The BA in Environmental Studies and Sustainability (ENSS) is administered in the Department of Biodiversity, Earth and Environmental Science (BEES). It is a multidisciplinary degree that takes advantage of existing courses in both the Arts and Sciences to educate graduates who will be able to work in government agencies, corporations and nonprofit organizations who develop, implement or are affected by environmental policies.

Objective

The objective of this major is to educate students so that they will be successful in finding solutions to environmental challenges that all societies will face in the 21st century. Graduates will be educated with the goal of thinking in terms of cross-cultural ideas and dialogue. In that way they will be encouraged to help people of all cultures understand environmental problems and act in the area of environmental stewardship.

The BA in Environmental Studies and Sustainability will provide graduates with a broad understanding of environmental science, policy development, needs of decision makers, attorneys and engineers, urban and international concerns and current environmental issues. Important to any future position in fields of environmental policy, planning and sustainability, the program builds on communication skills, collaboration abilities and team building, a "customer" orientation, creativity and innovative thinking ability, analytical ability and critical thinking and problem solving ability, a work orientation with professionalism and a positive attitude, occupation-specific skill and knowledge through co-op, and leadership ability. Students may opt to specialize in different study tracks including Policy, Government and Business; Social Awareness and Action, and Scientific Inquiry.

Drexel Advantage

There is a distinct advantage to a student in undertaking an environmental studies and sustainability degree at Drexel. Drexel University was one of the first universities in the nation to establish an undergraduate environmental science degree in the late 1960s. Since that time Drexel has expanded to areas of environmental policy and sustainability. Over
the long history of the program, Drexel has established an extensive network of co-op employers who value Drexel students, including federal and state governments, consulting firms, research institutions, non-profit organizations and industry, with work ranging from biological field sampling to developing policy with governmental decision makers, action plans for non-profit organizations, or model environmental strategies with industrial sustainability offices. Drexel students take advantage of the co-op program to both get more extensive experience and get paid while doing so. By graduation, students resumes include real-world experiences.

Environmental Studies and Sustainability Faculty

Walter F. Bien, PhD (Drexel University) Director, Laboratory of Pinelands Research. Research Professor. Natural resource management, restoration ecology, conservation biology, and New Jersey Pinelands community dynamics.

Carol Collier, FAICP, FAWRA, MRP (University of Pennsylvania) Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library: Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Daniel P. Duran, PhD (Vanderbilt University). Associate Teaching Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect systems to better understand fundamental evolutionary processes and maintain biodiversity.

Jon Gelhaus, PhD (University of Kansas) Curator, Department of Entomology: Academy of Natural Sciences. Professor. Systematic expertise in crane flies (Tipuloidea); phylogenetic reconstruction; historical and ecological biogeography; biodiversity measures and evolution of morphological character systems.

Richard J. Horwitz, PhD (University of Chicago) Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology; phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O’Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation.
effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pillsbury Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

James R. Spotila, PhD (University of Arkansas) L. D. Betz Chair Professor. Professor. Physiological and biophysical ecology, thermoregulation of aquatic vertebrates, biology of sea turtles.

Loyc Vanderkluysen, PhD (University of Hawaii). Assistant Professor. The cyclicality of volcanic eruptions, volcanic degassing processes, and large igneous provinces.

Elizabeth B. Watson, PhD (University of California, Berkeley). Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Jospeh Bentz, PhD (State University of New York (SUNY) at Buffalo). Professor. Biophysics, biochemistry and biopharmaceutics, focused on the molecular basis of biological membrane transport and fusion.

John G. Lundberg, PhD (University of Michigan). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

---

### About the Program

From energy to climate change to environmental degradation, many of the most pressing societal issues of the coming century will pertain to geoscience. The study of the Earth is central to maintaining clean drinking water, mitigating environmental contamination, providing ores and rare elements necessary for industry, and locating new sources of energy.

The Biodiversity, Earth and Environmental Science (BEES) Department offers a major in geoscience, with three concentration options designed to meet the needs of students wishing to pursue graduate school or immediate employment in the geosciences:

- **Applied Geology**
- **General Geoscience**
- **Paleontology**

The core requirements encompass foundational courses in science, writing, and math, and traditional courses that form the backbone of the geosciences. Building upon these are innovative courses focused on Earth systems processes, key environmental issues, practical field experiences, and advanced geological study.

In addition to nourishing and honing the passions of students studying the Earth, the core curriculum is designed to:

1. Instill key technical skills early-on, as a pathway to high-quality co-op opportunities;
2. Lay the groundwork for our students to pursue advanced graduate study in the geosciences and other disciplines, and;
3. Enable our graduates to translate marketable skills and knowledge into high-quality jobs in industry and government.

Geoscience majors will begin their field experiences during the first term of their freshmen year. Most courses include a laboratory section or a hands-on recitation section (“dry lab”), plus at least three field trips to relevant regional geological sites. These courses, combined with the co-op experience and summer geological field camp, provide students real-world experience in the field.

### About the Concentrations

#### Applied Geology

The applied geology concentration is designed for students wishing to enter the geoscience workforce upon graduation. Possible employment opportunities include jobs in: environmental consulting, geotechnical consulting, geophysical consulting, the petroleum and natural gas industry, the mining industry, federal agencies (e.g., USGS, USDA, NOAA, FEMA, EPA, DOI, and Army Corps of Engineers), and state and local agencies (e.g., state environmental agencies, state geological surveys, and municipal water departments).

#### General Geoscience

The general geoscience concentration allows maximum flexibility and is designed for students wishing to pursue other areas of study within the geosciences, students wishing to pursue policy-related careers, and students planning to apply to professional graduate programs, such as those in law or business schools. The policy component of this concentration allows students to explore related societal issues, which may help guide their career aspirations. This concentration also provides transfer students with a pathway to graduate on time.
Students graduating from this concentration will be well prepared to enter graduate school in science or policy, as well as to pursue professional studies. Students seeking immediate employment will be competitive for jobs with, for example, certain NGOs, environmental foundations, consulting companies, and government policy positions related to natural resources and the environment.

Paleontology

The concentration in paleontology prepares students who are interested in pursuing related research in graduate school and students seeking entry-level positions in paleontology. Examples of these jobs include biostratigrapher for petroleum companies, fossil resource manager for the Bureau of Land Management, and related positions with the National Parks Service, USGS, and state geological surveys.

Undergraduates in this concentration benefit from world-class resources already established at the Academy of Natural Sciences. These include the Invertebrate paleontology collection, with over 1 million specimens; the vertebrate fossil collection, with over 22,000 specimens; historically important specimens, such as the Thomas Jefferson fossil collection, the first discovered dinosaur skeleton, and the first discovered tyrannosaur; and the paleobotany collection, with over 5,000 specimens, including a large proportion of type specimens.

Students in the paleontology concentration will have access to numerous fossil sites along the Atlantic Coastal Plain and in the Appalachian Province. Opportunities exist for student research at two well-established sites: Dr. Daeschler’s Red Hill site, which produces evolutionarily important forms representing the fish to tetrapod transition; and Dr. Lacovara’s Inversand site, which records a mass-death assemblage at the end of the Cretaceous Period.

Additional Information

Free electives:

- Choose to start CHEM or BIO sequence depending on concentration. Paleontology students should take BIO 124 & BIO 126. Students interested in applied or geochemistry should start CHEM.

** Note: Students do Field Camps during Co-Op in the Junior year. These 6.0 credits are transferred during Co-Op. Please see your advisor for additional information.

Minor in Geoscience

Geosciences are at the core of numerous problems facing the world today, and impact the lives of communities across the planet. Climate change, natural disasters, access to mineral resources and clean water, and availability of energy all shape government policies and corporate strategies, and are a cause of concern for society at large.

The geoscience minor is designed to give students specializing in other fields the skills to understand and analyze these issues. It is a natural fit for environmental science majors who wish to understand how the physical world can impact biodiversity, ecological processes and environmental impacts. For students majoring in such fields as business and engineering, the minor in geoscience will provide them with the tools to make better decisions about products or projects related to natural hazards and their impact, cost and availability of natural resources, energy policy, space exploration, land use, and environmental justice. For students who are liberal arts majors, the minor in geoscience offers the opportunity to explore earth science issues that shape the social, cultural,
political and scientific debate, and to be prepared for issues they may encounter in their careers.

GEO 101  Physical Geology  4.0
GEO 102  History of the Earth  4.0

GEO 401  Igneous and Metamorphic Petrology  
GEO 412  Geology of Groundwater  
GEO 418  Geophysics  

Co-Op/Career Opportunities

Co-Op Opportunities
There are over one hundred environmental, geophysical, and geotechnical firms within the greater Philadelphia region. Plus, there are opportunities with federal, state, and municipal agencies, jobs in central Pennsylvania related to the Marcellus Shale, and research opportunities between Drexel and the Academy of Natural Sciences.

All geoscience majors follow the five-year, three co-op plan of study program. Transfer students may be granted an exception for a two co-op plan of study, so that they may remain on schedule. The summer geological field camp will occur during the third co-op cycle. In this third co-op, geoscience students attend field camp and also partake in an abbreviated co-op work experience.

Career Opportunities
According to the U.S. Bureau of Labor Statistics (BLS), employment for geoscientists through 2020 is expected to grow faster than the average for all occupations. In addition, the geoscientists are expected to outpace life, physical, and social sciences in job creation. The employment outlook for geoscientists in Drexel's surrounding area is particularly bright, with a robust environmental consulting industry and exploding demand related to Marcellus Shale drilling.

The geoscience major, with its three concentrations, prepares students who are interested in entering the workforce immediately as well as those who are interested in pursuing related research in graduate schools.

Facilities and Field Sites

Facilities
The geoscience major leverages resources at Drexel University and the Academy of Natural Sciences (http://www.ansp.org), such as a mineral collection with 9,000 specimens, over a million fossil specimens, Dinosaur Hall, The Patrick Center for Environmental Research, a state-of-the-art fossil preparation lab, notable research programs, and faculty with expertise in geology, paleontology, and related disciplines.

Summer Geological Field Camp
Summer geological field camp is the quintessential undergraduate experience for geosciences students. It is a long-held tradition in geology departments that students head out West, during the summer before graduation, to apply their knowledge to real-world situations and to acquire field skills that will serve them throughout their careers. This is particularly important for students in eastern schools, where the mountains are small and outcrops are scarce. Field camp also provides networking and bonding opportunity for students. Friends made at field camp often become colleagues for life. At the Geological Society of America meeting, reunions are organized by university and by field camp.

The summer geological field camp for geoscience students will occur during the third co-op cycle.

Barnegat Bay Coastal Field Station
The BEES field station on Barnegat Bay in Waretown, NJ provides geoscience students with opportunities to engage in hands-on research in coastal geology, barrier island morphology, oceanography, and sedimentology. The facility includes a lodge, two classrooms/meeting rooms, dining hall, dormitories, and rustic cabins. The field station is located on 194 acres of diverse coastal habitat, including a maritime forest, tidal creek, salt marsh, fresh water pond, brackish impoundment, and bayshore environments. The department's research vessel gives students access to back-bay and near-shore marine environments.

The department holds its introductory field session for incoming freshmen and other events at the field station. The facility may also serve as a base for excursions into the Pine Barrens, a heavily forested area containing a number of interesting deposits related to the last glacial period.

Red Hill Fossil Site
The Red Hill fossil site, in Tioga County, Pennsylvania, exposes Devonian coastal sedimentary rocks that preserve a rich fossil fauna. Of particular importance is a fossil fish species, studied by Dr. Ted Daeschler, representing a critical transition between fish and tetrapods (land animals.) This site offers opportunities for studying vertebrate paleontology, stratigraphy, and sedimentology and provides students with a window into an important moment in the history of life on Earth.

Inversand Fossil Site: Local training ground for Geoscience Majors
The Inversand fossil site is a unique resource for geological education, research, and STEM outreach. The quarry is located in Gloucester County, NJ, only 20 minutes from Drexel’s campus, making it possible to conduct field exercises there within a three-hour class period. The geological formations that outcrop in the Inversand Quarry have yielded many new fossil species. The site has significance beyond vertebrate paleontology, however, and will provide a local laboratory for classes in geochemistry, geophysics, stratigraphy, sedimentology, hydrogeology, and environmental geology. As such, it will provide a valuable training-ground, a short distance from campus, for all Drexel geoscience majors.

Geoscience Faculty
Walter F. Bien, PhD (Drexel University) Director, Laboratory of Pinelands Research. Research Professor. Natural resource management.
Carol Collier, FAICP, FAWRA, MRP (University of Pennsylvania) Sr. Advisor, Watershed Management and Policy at the Academy of Natural Sciences; Director, Environmental Studies and Sustainability Program. Water resources management, environmental planning, climate change policy, the intersection of science, policy and decision making.

Ted Daeschler, PhD (University of Pennsylvania) Associate Curator of Vertebrate Zoology; Vice President for Systematic Biology and the Library; Academy of Natural Sciences. Associate Professor. Vertebrate fauna of the Late Devonian Period in eastern North America; fossil collecting; systematic work focusing on freshwater vertebrates; nature of early non-marine ecosystems.

Tatyana Livshultz, PhD (University of Arizona) Associate Professor. Phylogeography, systematics and taxonomy, population and conservation genetics, ecological niche modeling, focusing on insect systems to better understand fundamental evolutionary processes and maintain biodiversity.

Richard J. Horwitz, PhD (University of Chicago) Senior Scientist; Fisheries Section Leader; Ruth Patrick Chair of Environmental Sciences. Associate Professor. Reproductive ecology, life history and distribution of freshwater fishes; effects of land use, habitat structure and hydrology on population dynamics and species composition in aquatic systems; ecological modeling and biometry; anthropogenic contaminants in fishes.

Susan S. Kilham, PhD (Duke University). Professor. Aquatic ecology: phytoplankton; physiological ecology, especially of diatoms in freshwater and marine systems; large lakes; food webs; biogeochemistry.

Danielle Kreeger, PhD (Oregon State University). Research Associate Professor. Trophic interactions in aquatic ecosystems.

Tatyana Livshultz, PhD (Cornell University) Assistant Curator of Botany. Assistant Professor. Expertise of the milkweed and dogbane family (Apocynaceae); evolution and species diversity of the genus Dischidia; differences in floral form and function.

Richard McCourt, PhD (University of Arizona) Associate Curator of Botany, Academy of Natural Sciences of Drexel University; 2010-2012: Program Director, Division of Graduate Education, National Science Foundation. Professor. Biodiversity, evolution, ecology, and systematic of green algae, specifically charophyte algae.

Michael O’Connor, MD, PhD (MD, Johns Hopkins University; PhD, Colorado State). Associate Professor. Biophysical and physiological ecology, thermoregulation of vertebrates, ecological modeling.

Sean O’Donnell, PhD (University of Wisconsin-Madison). Professor. Tropical ecology, focusing on geographic variation and elevation effects on ecology and behavior of army ants and ant-bird interactions; neurobiology, focusing on brain plasticity and brain evolution in social insects.

Marina Potapova, PhD (Russian Academy of Sciences) Assistant Curator. Assistant Professor. Taxonomy, ecology, and biogeography of freshwater diatoms; methods of quantifying morphological characters of diatom frustules based on geometric morphometrics; systematic of monoraphid freshwater diatoms.

Gary Rosenberg, PhD (Harvard University) Pillsbry Chair of Malacology. Professor. Magnitude and origin of species-level diversity in the Mollusca.

Jacob Russell, PhD (University of Arizona). Associate Professor. Microbiomes and metagenomics; ecology and evolution of symbiosis.

E. Pilsbry Chair of Malacology. Assistant Professor. The implications of global and regional environmental change, and unraveling the interacting effects of multiple anthropogenic stressors on coastal ecosystems to promote more informed management, conservation, and restoration.

Jason Weckstein, PhD (Louisiana State University) Associate Curator of Ornithology. Associate Professor. Avian phylogenetics, comparative biology and evolutionary history; biodiversity surveys of birds and their parasites and pathogens; coevolutionary history of birds and their parasites.

Emeritus Faculty

Jospeh Bentz, PhD (State University of New York (SUNY) at Buffalo). Professor. Biophysics, biochemistry and biopharmaceuticals, focused on the molecular basis of biological membrane transport and fusion.

John G. Lundberg, PhD (University of Michigan). Professor Emeritus. Diversity and diversification of fishes; documenting and interpreting the morphological, molecular, and taxonomic diversity of living and fossil fishes in the interrelated fields of systematic, faunistics and biogeography and paleobiology; exploration and collecting in poorly-known tropical freshwater habitats and regions.

Daniel Otte, PhD (University of Michigan) Senior Curator, Systematics and Evolutionary Biology. Professor Emeritus. Taxonomy and biogeography of Orthoptera (grasshoppers, crickets, katydids and their relatives).

Global Studies

Major: Global Studies
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 30.2001
About the Program

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.

Our students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel's Co-Op opportunities

Two mathematics courses 6.0-8.0

**Standard Occupational Classification (SOC) code: 19-3094**
Students must complete at least 30.0 distribution credits from the approved list:

**Global Business, Economics, and Development Distribution Options**

- ECON 342 International Business Law
- ENGL 308 [WI] The Literature of Business
- INTB 332 Multinational Corporations
- or INTB 334 International Trade
- PHIL 301 Business Ethics
- PSCI 255 International Political Economy
- PSCI 352 Business Consulting
- PSCI 353 Business Consulting for Nonprofits
- PSCI 355 [WI] Classical Social Theory
- STAT 201 Introduction to Business Statistics
- STAT 202 Business Statistics II

Global Business, Economics, and Development Concentration Requirements

Students must complete at least 24.0 credits above the 103-105 language level to earn a language minor.

**Global Studies Core Requirements**

- BLAW 340 International Business Law
- ECON 342 International Development
- ENGL 308 [WI] The Literature of Business
- INTB 332 Multinational Corporations
- or INTB 334 International Trade
- PHIL 301 Business Ethics
- PSCI 255 International Political Economy

**Global Health and Sustainability Distribution Options**

- PBHL 301 Epidemiology in Public Health
- PBHL 303 Overview of Issues in Global Health
- PBHL 309 Public Health Ethics

Global Health and Sustainability Concentration Requirements

Students must complete at least 24.0 credits above the 103-105 language level to earn a language minor.

**Global Health and Sustainability Concentration Requirements**

- ANTH 360 Culture and the Environment
- or SOC 345 Sociology of the Environment
- PBHL 301 Epidemiology in Public Health
- PBHL 303 Overview of Issues in Global Health
- SOC 346 Environmental Justice

Choose one of the following English classes

- ENGL 300 [WI] Literature & Science
- ENGL 302 Environmental Literature
- ENGL 370 Topics in Literature and Medicine

Choose one of the following Ethics courses

- PHIL 321 Biomedical Ethics
- PHIL 340 Environmental Ethics
- PHIL 341 Public Health Ethics

Global Health and Sustainability Distribution Options

Students must complete at least 30.0 distribution credits from the approved list:

- ANTH 310 Societies In Transition: The Impact of Modernization and the Third World
- ANTH 312 Approaches to Intercultural Behavior
- COM 270 [WI] Business Communication
- COM 345 Intercultural Communication
- COM 360 International Communication
- COM 362 International Negotiations
- COM 375 [WI] Grant Writing
- ECON 301 Macroeconomics
- ECON 321 Microeconomics
- ECON 326 Economic Ideas [WI]
- ECON 331 International Macroeconomics
- ECON 351 Resource and Environmental Economics
- ENGL 325 Topics in World Literature
- ENGL 360 [WI] Literature and Society
- ENTP 270 Social Entrepreneurship
- ENTP 370 Global Entrepreneurship
- ENTP 390 Energy Entrepreneurship
- FIN 301 Introduction to Finance
- FIN 346 Global Financial Management
- GST 320 Building Global Bridges
- GST 360 Civilizations
- GST 435 Model Organization of American States
- GST T280 Special Topics in Global Studies
- GST T380 Special Topics in Global Studies
- HIST 315 History of Capitalism
- INTB 332 Multinational Corporations
- INTB 334 International Trade
- INTB 336 International Money and Finance
- INTB 338 Regional Studies in Economic Policies and International Business
- MGMT 370 Business Consulting
- MGMT 371 Business Consulting for Nonprofits
- MKTG 201 Introduction to Marketing Management
- MKTG 322 Advertising & Integrated Marketing Communications
- MKTG 351 Marketing for Non-Profit Organizations
- MKTG 357 Global Marketing
- PSCI 351 International Organizations: The United Nations
- PSCI 352 Ethics and International Relations
- PSCI 357 The European Union in World Politics
- SOC 220 Wealth and Power

Global Health and Sustainability Distribution Options

Students must complete at least 30.0 distribution credits from the approved list:

- ANTH 265 Health & Healing Practices in Cross-Cultural Perspective
- ANTH 310 Societies in Transition: The Impact of Modernization and the Third World
- ANTH 360 Culture and the Environment
- BIO 109 Biological Diversity, Ecology & Evolution
- BIO 264 Ethnobotany
- BIO 312 Genetically Modified Foods
- CJ 373 Environmental Crime
- COM 316 Campaigns for Health & Environment
- COM 317 [WI] Environmental Communication
- COM 320 [WI] Science Writing
- COM 375 [WI] Grant Writing
- CULA 426 The Kitchen Garden: Summer
- CULA 427 The Kitchen Garden: Fall

Minor in Global Studies

Global Studies practices socially-responsible global citizenship through a unique combination of research-oriented and multilingual instruction, professional experience, and meaningful engagement with communities both here in Philadelphia and abroad.
Students experience Global Studies by:

- Examining the movement of peoples, goods, and cultures across countries and regions
- Studying global issues in concrete socio-economic, cultural, and geographical contexts
- Tackling structural inequalities from a variety of perspectives and disciplines
- Developing intercultural and language skills through unique pedagogical models
- Working with employers and communities in Philadelphia and around the world through Drexel’s Co-op opportunities

Program Requirements

Students must complete at least 201 of a language before earning the GST minor.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

Global Studies Faculty

Debiani Bhattacharyya, PhD (Emory University). Assistant Professor. Modern South Asian history; urban environmental history; history of economic thought; and post-colonial theory.

Rebecca Clothey, PhD (University of Pittsburgh) Director, Global Studies major. Assistant Professor. Comparative and international education, education of ethnic and linguistic minorities, sociology of education.

Vincent Duclos, PhD (University of Montreal). Assistant Professor. Digital spaces/technologies; global health; development; and relations between India and Africa.

Brenda Dyer, MA (University of Pennsylvania). Associate Teaching Professor. Language acquisition pedagogy, teaching writing, seventeenth and eighteenth century French literature, women writers, translation.

Mary Ebeling, PhD (University of Surrey) Director, Women's and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.

Gabriella Ibieta, PhD (City University of New York). Associate Professor. Comparative literature; Cuban and Latin American fiction.

Kristine Kelly, PhD (University of Wisconsin, Madison). Assistant Clinical Professor. Sociology of gender and development; anthropology of policy; comparative and international education; qualitative research methods; Vietnam and Southeast Asia.

Hiromi Koyama, MA (Okayama University). Teaching Instructor. Japanese language and literature; teaching writing; business Japanese; classical and modern Japanese literature.

Christopher A. Laincz, PhD (Duke University) Director, LeBow College of Business PhD program. Associate Professor. Economic
development, technological change, and growth, industrial organization, macroeconomics and monetary economics.

Brent Luvaas, PhD (UCLA). Associate Professor. DIY and independent media production; transnational consumer culture; popular music; new media and mediated subjectivities; youth culture in the US and Indonesia.

Nadia Magnanini, MA (University of Turin). Adjunct Professor.

Ilana Margolis Adjunct Professor.

Natalie N.H. Marley, MA (University of Hawai'i). Assistant Teaching Professor. Research in Japanese Linguistics with a focus on pedagogy and topics concerning second language acquisition and teaching; translation and interpretation between Japanese and English.

Ana Martinez-Donate, PhD (Universidad Autonoma de Madrid, Spain). Associate Professor. HIV prevention, Tobacco control, Obesity prevention, Access to health services.

Nada Matta, PhD (New York University). Assistant Professor. Middle East Studies; political economy; social movements; gender studies; revolutions; inequality

Maria delaluz Matus-Mendoza, PhD (Temple University) Director of Modern Languages. Associate Professor. Spanish Linguistic variation in the US; the relationship between language variation and mobility (social and geographical) among the Mexican communities in Mexico and in the United States; second language acquisition; language variation in media.

Usha Menon, PhD (University of Chicago). Professor. Self, identity & personhood, emotional functioning, Hindu morality, gender relations in Hindu society, adult development, popular Hinduism, post-colonial feminism, Hindu religious nationalism and Islamic radicalism.

Amel Mili, PhD, JD (Rutgers University, the University of Tunis). Assistant Teaching Professor. The intersection between religion and law; gender and politics; constitutional transition; language education

Rogelio Minana, PhD (Penn State) Department Head, Global Studies and Modern Languages. Professor. The role of classic cultural icons, particularly Don Quixote, in 21st century political and social justice discourse; the interplay between the traditional humanities, youth organizations, and digital storytelling.

Joel E. Oestreicher, PhD (Brown University) Director of the Global Studies major. Associate Professor. International organizations, international finance, development, and human rights.

Summi Oh, MA (Graduate School of Hyesung Women's University). Instructor.

N. Ou, MS (University of Pennsylvania). Assistant Teaching Professor. Chinese language grammar and writing; Chinese language pedagogy; intercultural communication

Robert Powell, PhD (Temple University). Assistant Teaching Professor. Early and Middle Bronze Age Crete; archaeoastronomy; early state formation; archaeology and anthropology of frontiers; mass communication.

Rachel R. Reynolds, PhD (University of Illinois at Chicago). Associate Professor. Sociolinguistics, ethnography of communication, intercultural communication, globalization and the rhetoric of community, political economy of immigration, race and ethnicity, new African immigrants in the United States, Igbo studies.

Simone Schlichting-Artur, EdD (University of Pennsylvania) Senior Assistant Dean of Global Initiatives. Teaching Professor. International business communication (Germany and the U.S.), public health policy and languages, German post-war history through film and literature, development of writing assessment tools for German minor.

Steve Vasquez Dolph, PhD (University of Pennsylvania). Assistant Teaching Professor. Early modern cultural production; ecology and representation; history and sociology of science; historical bibliography; politics and poetics of translation.

Alden Young, PhD (Princeton University) Director, Africana Studies. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Emeritus Faculty

Julie Mostov, PhD (New York University) Vice Provost for Global Initiatives. Professor Emeritus. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.

History

Major: History
Degree Awarded: Bachelor of Arts (BA)
Calendar Type: Quarter
Total Credit Hours: 182.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 54.0101
Standard Occupational Classification (SOC) code: 19-3093

About the Program

The history program reflects the strengths of Drexel University, including specialization in transnational history and in the history of science, technology and the environment. A series of required courses in history build skills in research and interpretation of the past while elective courses within and outside the history program allow students to shape their curriculum to meet their needs and interests. Our history graduates go to graduate school in history, to professional schools in law, medicine, and business, and to work in business, government agencies, and non-profit organizations.

We apply Drexel's experiential, research-intensive approach to the discipline of history. Using the extensive historical resources of Philadelphia, the region, and the digital world, students develop a profound understanding of history and the ways it is made. We also encourage students to enrich their education through co-op, study abroad, and summer research projects working alongside department faculty.

Degree Offered

The Bachelor of Arts (BA) provides a course of study that includes foreign language courses and a broad grounding in the liberal arts, with flexibility for students to choose courses to fulfill humanities, social science, math, and science requirements that will contribute to their overall educational and career plans.
The History minor allows students in other majors to explore the historical background of their discipline, to better understand the origins of the contemporary world, and to build the knowledge and skills needed to understand the development of human societies over time and to understand historical episodes into their proper contexts. The minor in History is highly flexible and allows students to choose those History courses which appeal to them and which will contribute to their broader education. To complete the minor, students must take a total of six History courses (24.0 credits), five of which must be at the 200-level or above.

Additional Information

**Total Credits** 27.0-28.0

† Courses which may fulfill the global engagement requirement include designated travel-integrated courses, study abroad courses (with approval), Global Classroom courses in history, or independent study courses (with approval.)

†† In addition to the required CoAS Foundation Requirements foreign language courses (two courses, including completion of a language through 201) in one language, students in the global history concentration must take at least one course in a second foreign language.

††† At least two courses must be 300-level and above.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

** Must be 200-level or above. May not be HIST 201.
*** See degree requirements (p. __________).

Co-Op/Career Opportunities

Co-Op Experiences

History majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the "real" world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the MS in Science, Technology, and Society program (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety), an MBA or other business program, or law school.

* Must be 200-level or above.
** Two must be 200-level or above.
*** Must be 200-level or above. May not be HIST 201.
† See degree requirements (p. __________).
Accelerated/Dual Degrees

About the Programs

Two accelerated/dual degrees are available:

• BA in History and MS in Science, Technology and Society program
• BA in History and the MS(LIS) program

Drexel University permits undergraduate students in 5-year programs to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time.

The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree (two diplomas are awarded) in the time normally required to finish a bachelor's degree alone.

Students entering the program must:

• have and maintain a minimum of 3.0 grade point average throughout the program
• have no fewer than 90.0 earned credits
• have no more than 120.0 registered credits
• complete only 2 co-ops if in a BA/MS program.

BA in History and the MS in Science, Technology, and Society Accelerated Degree

The accelerated degree program in History and Science, Technology and Society provides an opportunity to earn both a BA degree and an MS degree (two diplomas are awarded) in five years.

This program was created to meet the academic needs of History students who are interested in History, Technology and Science, and interested in pursuing careers in the rapidly growing field of STS.

Recommended Plan of Study

Students should work closely with undergraduate advisor and the graduate Science, Technology & Society advisor to schedule an individualized plan of study for their accelerated degree completion.

The following is a sample plan of study.

<table>

**BA in History and the MS(LIS) Accelerated Degree**

This program pairs the undergraduate History major with the school's MS in Library and Information Science in an accelerated time-frame. Students have the opportunity to earn both the undergraduate and graduate degrees in five years. Two diplomas are awarded. For students completing this program, the undergraduate background in history provides a natural fit with areas of library specialization, such as archival studies, records management, and related fields.

**About the Program**

Applicants may be provisionally admitted into the program as incoming freshmen. Participants have the option of choosing either a one or a two co-op history program. The non-co-op option is not available for students choosing this accelerated degree option.

When students have accumulated 90.0 credits, but have not yet registered for 120.0 credits, they can apply to formally enter the graduate program. The student must have at least a 3.2 GPA and must maintain this 3.2 GPA for the graduate portion of the program.

**Advising/Plan of Study**

Students should work closely with faculty advisers to schedule and maintain a plan of study throughout the accelerated program.

### History Faculty

Lloyd Ackert, PhD *(Johns Hopkins University)*. Teaching Professor. History of science and technology; ecology; Russian science.

Debjani Bhattacharya, PhD *(Emory University)*. Assistant Professor. Modern South Asian history; urban environmental history; history of economic thought; and post-colonial theory.

Scott G. Knowles, PhD *(Johns Hopkins University)* Interim Department Head, History. Professor. Urban history, history of technology, history of disasters, modern history.

Sharon Ku, PhD *(University of Cambridge, UK)*. Assistant Research Professor. History and sociology of science; nanotechnology; scientific standardization.

Jonson Miller, PhD *(Virginia Tech)*. Associate Teaching Professor. Science and technology, American history, military history.

Rosalind Remer, PhD *(University of California)* Vice Provost and Executive Director, Lenfest Center for Cultural Partnerships. History of the book, early American economic and business history, public history, museum planning, non-profit management.

Tiago Saraiva, PhD *(Universidad Autónoma de Madrid)*. Associate Professor. History of science and technology; transnational history; environmental history.

Jonathan Seitz, PhD *(University of Wisconsin)* Assistant Department Head, History. Teaching Professor. History of religion, science, medicine, witchcraft, early modern Europe, Italy.

Amy Slaton, PhD *(University of Pennsylvania)*. Professor. History of science and technology; history of standards and metrology; intersectionality, race, labor.

Kathryn Steen, PhD *(University of Delaware)*. Associate Professor. History of technology, history of industry and business, and comparative history.

Donald F. Stevens, PhD *(University of Chicago)*. Associate Professor. Modern Latin American history.

Alden Young, PhD *(Princeton University)* Director, Africana Studies. Assistant Professor. African history; economic history and the history of Arab and African interactions.

Michael Yudell, MPH, PhD, MPhil *(Columbia University)* Chair, Department of Community Health and Prevention. Associate Professor. Public health genomics; bioethics; history of public health; addiction.

### Emeritus Faculty

Eric Dorn Brose, PhD *(Ohio State University)*. Professor Emeritus. German and European history.

Robert Zaller, PhD *(Washington University)*. Professor Emeritus. English history and early modern European history.

### Intermediate Arabic Proficiency Certificate

The Intermediate Arabic Proficiency Certificate offers students a language certificate at the intermediate level as proof that they are proficient enough to live abroad and interact with native speakers in their home countries and cultures.
Please note that this certificate is available only to currently matriculated Drexel students.

## Program Requirements

The Intermediate Arabic Certificate requires a minimum of 15 credits and the required course of ARBC 202. Some study abroad courses may count towards the certificate with pre-approval from the Department. Students can choose from the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARBC 101</td>
<td>Arabic I</td>
</tr>
<tr>
<td>ARBC 102</td>

### Intermediate Hebrew Proficiency Certificate

The Intermediate Hebrew Proficiency Certificate offers students a language certificate at the intermediate level as proof that they are proficient enough to live abroad and interact with native speakers in their home countries and cultures.

Please note that this certificate is available only to currently matriculated Drexel students.
proficient enough to live abroad and interact with native speakers in their home countries and cultures.

Please note that this certificate is available only to currently matriculated Drexel students.

Program Requirements

The Intermediate Hebrew Certificate requires a minimum of 15 credits and the required course of HBRW 202. Some study abroad courses may count towards the certificate with pre-approval from the Department. Students can choose from the following courses.

<table>
<thead>
<tr>
<th>Course Code</th>

Total Credits 15.0

Mathematics

Major: Mathematics

Degree Awarded: Bachelor of Arts (BA) or Bachelor of Science (BS)

Calendar Type: Quarter

Total Credit Hours: 181.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 27.0101

Standard Occupational Classification (SOC) code: 15-2021; 15-2041

About the Program

The mathematics major at Drexel provides a supportive learning environment in which students obtain a firm grounding in the core areas of mathematics and apply this knowledge to problems encountered in a technological society. The Department of Mathematics (http://drexel.edu/coas/academics/departments-centers/mathematics) offers students the option of either a BA or a BS degree.

The Mathematics Department takes pride in offering a balanced and flexible curriculum. Three very different kinds of skills are emphasized in the mathematics major:

- **Abstract Reasoning**
  
  All students majoring in mathematics take courses that emphasize abstract reasoning. Students read and write proofs, and graduate well prepared to enter a PhD program in mathematics.

- **Computing**
  
  All students majoring in mathematics take a series of computing courses. This emphasis on computing is one of the distinctive features of the mathematics program at Drexel, and provides students with a competitive advantage in the job market.

- **Mathematical Modeling**
  
  All students majoring in mathematics take multidisciplinary courses that focus on the interplay between mathematics and an area of application.

  Students often use electives to focus on an area of personal interest. The Department of Mathematics encourages students to minor in a subject where mathematics is applied. The Department provides an advisor to assist students in selecting electives and planning career paths.

...
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

* Math majors must pass MATH 121 with a grade of B or higher.
** If a student takes both of MATH 331 and MATH 401, then one of these can count as a Mathematics Elective. Up to 3 mathematics-related courses from other departments may be substituted for Mathematics Electives with departmental permission. MATH special topics courses may be substituted for Mathematics Electives with departmental permission.

Categories of Electives

- **Humanities and arts electives**
  Designated courses in art, art history, communication studies, foreign languages (300-level or above), history, literature, music, philosophy, religion, and theatre arts.

- **International electives**
  Designated courses in anthropology, art history, history, literature, music, politics and sociology. Courses with an international focus may be used to fulfill requirements in other categories as well.

- **Science electives**
  Students select two courses from chemistry, biology or physics. Both courses may be in the same subject or they may be in different subject areas.

- **Social and behavioral sciences electives**
  Designated courses in anthropology, economics, criminology & justice studies, international relations, history, politics, psychology and sociology.

- **Studies in diversity electives**
  Designated courses in Africana studies, anthropology, communication, English, history, Judaic studies, linguistics, music, sociology and women’s & gender studies.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

</table>

**Total Credits** 38.0

- Students count only one of these two courses for their minor.
- A request form is available for any other mathematics courses upon the written approval prior to the beginning of the quarter in which the course is to be offered. Students should contact the Mathematics undergraduate academic advisor at advisor@math.drexel.edu.
- Students who take MATH 291 cannot also count MATH 321 or MATH 322 toward their minor.

**Mathematics Faculty**

Jason Aran, MS (Drexel University). Assistant Teaching Professor.

Jonah D. Blasiak, PhD (University of California at Berkeley). Assistant Professor. Algebraic combinatorics, representation theory, and complexity theory.

Patrick Clarke, PhD (University of Miami). Associate Professor. Homological mirror symmetry, Landau-Ginzburg models, algebraic geometry, symplectic geometry.

Ilker Colak, PhD (Universitat Autonoma de Barcelona). Visiting Assistant Professor. ODE’s. Dynamical Systems, Evolution of Social Behavior.

Daryl Falco, MS (Drexel University). Associate Teaching Professor. Discrete mathematics and automata theory.
Raymond Favocci, MS (Drexel University). Associate Teaching Professor.

Pavel Grinfeld, PhD (Massachusetts Institute of Technology). Associate Professor. Intersection of physics, engineering, applied mathematics and computational science.

Anatoli Grinshpan, PhD (University of California at Berkeley). Assistant Teaching Professor. Function theory and operator theory, harmonic analysis, matrix theory.

Yixin Guo, PhD (University of Pittsburgh). Associate Professor. Biomathematics, dynamical systems, ordinary and partial differential equations and math education.

R. Andrew Hicks, PhD (University of Pennsylvania). Professor. Geometry; optics; computer vision.

Robert Immodino, MS (Drexel University). Associate Teaching Professor.

Dmitry Kaluzhny-Verbovetskyi, PhD (Kharkov University). Professor. Operator theory, systems theory, complex analysis, C*-algebras and harmonic analysis.

Hwan Yong Lee, PhD (University of Utah). Assistant Teaching Professor. Electromagnetic wave propagation in composite media, optimization and inverse problem.

Georgi S. Medvedev, PhD (Boston University). Associate Professor. Ordinary and partial differential equations, mathematical neuroscience.

Shari Moskow, PhD (Rutgers University) Department Head. Professor. Partial differential equations and numerical analysis, including homogenization theory, numerical methods for problems with rough coefficients, and inverse problems.

Marna A. Mozeff, MS (Drexel University). Teaching Professor.

Oksana P. Odintsova, PhD (Omsk State University). Teaching Professor. Math education; geometrical modeling.

Dimitrios Papadopoulos, EdD (Drexel University). Assistant Teaching Professor.

Joel Pereira, PhD (University of North Carolina). Assistant Teaching Professor. Commutative Algebra.

Ronald K. Perlite, PhD (University of California at Berkeley) Undergraduate Advisor. Associate Professor. Applied mathematics, numerical analysis, symbolic computation, differential geometry, mathematical physics.

Marcia Perlstadt, PhD (University of California at Berkeley). Associate Professor. Applied mathematics, computed tomography, numerical analysis of function reconstruction, signal processing, combinatorics.

Brianna Pezzato, MEd (Millersville University). Instructor.

Adam C. Rickert, MS (Drexel University). Associate Teaching Professor.

Valerie Sarris, PhD (Yale University). Instructor.

Li Sheng, PhD (Rutgers University). Associate Professor. Discrete optimization, combinatorics, operations research, graph theory and its application in molecular biology, social sciences and communication networks, biostatistics.

Gideon Simpson, PhD (Columbia University). Associate Professor. Partial differential equations, scientific computing and applied mathematics.

Xiaoming Song, PhD (University of Kansas). Assistant Professor. Stochastic Calculus, Large Deviation Theory, Theoretical Statistics, Data Network Modeling and Numerical Analysis.

Kenneth P. Swartz, PhD (Harvard University). Assistant Teaching Professor. Applied statistics, data analysis, calculus, discrete mathematics, biostatistics.

Vaishalee T. Wadke, MS (Columbia University). Instructor.

Richard D. White, MS (Penn State University). Assistant Teaching Professor.

Hugo J. Woerdeman, PhD (Vrije Universiteit, Amsterdam). Professor. Matrix and operator theory, systems theory, signal and image processing, and harmonic analysis.

J. Douglas Wright, PhD (Boston University) Graduate Advisor. Associate Department Head. Professor. Partial differential equations, specifically nonlinear waves and their interactions.

Dennis G. Yang, PhD (Cornell University). Assistant Teaching Professor. Dynamical systems, neurodynamics.

Thomas (Pok-Yin) Yu, PhD (Stanford University). Professor. Multiscale mathematics, wavelets, applied harmonic analysis, subdivision algorithms, nonlinear analysis, applied differential geometry and data analysis.

Matthew Ziemke, PhD (University of South Carolina). Assistant Teaching Professor. Functional Analysis, Operator Algebras, Semigroups, Mathematical Physics.

Emeritus Faculty

Loren N. Argabright, PhD (University of Washington). Professor Emeritus. Functional analysis, wavelets, abstract harmonic analysis, the theory of group representations.

Robert C. Busby, PhD (University of Pennsylvania). Professor Emeritus. Functional analysis, C*-algebras and group representations, computer science.

William M.Y. Goh, PhD (Ohio State University). Associate Professor Emeritus. Number theory, approximation theory and special functions, combinatorics, asymptotic analysis.

Bernard Kolman, PhD (University of Pennsylvania). Professor Emeritus. Lie algebras; theory, applications, and computational techniques; operations research.
Charles J. Mode, PhD (University of California at Davis). Professor Emeritus. Probability and statistics, biostatistics, epidemiology, mathematical demography, data analysis, computer-intensive methods.

Patricia Henry Russell, MS (LaSalle University). Teaching Professor.

Justin R. Smith, PhD (Courant Institute, New York University). Professor. Homotopy theory, operad theory, quantum mechanics, quantum computing.

**Minor in Africana Studies**

The minor in Africana studies was created to provide the opportunity for undergraduate students throughout the University to gain an understanding of and background in the history and cultures of peoples of African descent in North and South America, the Caribbean, and Africa. This interdisciplinary minor includes courses in anthropology, history, literature, music, political science, and sociology, and provides an opportunity for directed study in areas of particular interest to the students. The Africana studies minor has intrinsic intellectual value and helps prepare individuals to become contributors to an increasingly pluralistic society. At the same time, this minor allows students interested in these fields to take advantage of the University’s strengths in the social sciences and humanities.

About the Minor

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

Professional Training

Students must complete a minimum of 18 credits from the list provided:

**Total Credits** 24.0

* Students must check with the Program Director for approval prior to making substitutions.

** With a focus on the Caribbean, Latin America or the Diaspora.

*** With a focus on race or the Diaspora.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Minor in Arabic**

**About the Minor**

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Arabic minor requires 24 credits of language study above Arabic 103. Students can choose from the following courses options including a minimum 13 credits of Special Topics classes.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARBC 201</td>
<td>Arabic IV</td>

Minor in Bioinformatics

About the Minor

The bioinformatics minor examines the application of computer technology and programming to biological fields such as genomics or proteomics. This multidisciplinary program is designed for students majoring in biomedical engineering, biological sciences, computer science, information systems, or mathematics. Combination with other majors is possible through consultation with the program director. The minor is divided among courses in biology, programming and computation, human-computer interface design, databases, and statistics.

Program Requirements

Students must complete a minimum of 24 credits of coursework as follows:

Core Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 331</td>
<td>Bioinformatics I</td>
<td>3.0</td>
</tr>
<tr>
<td>BIO 332</td>
<td>Bioinformatics II</td>
<td>3.0</td>
</tr>
</tbody>
</table>

Two Senior Research Project Courses

* Students can take multiple Special Topics courses for Minor credit.

Area-specific courses

In each of the following five areas, the requirements of a student’s major cover some of the competencies for Bioinformatics, while the remaining requirements will be fulfilled within the minor itself. A plan of study is determined by an Advisor in the Department of Biology based on the student’s major field of study. Thus, the requirements for completing the minor are determined on a case-by-case basis. Possible options for area-specific courses include the following:

Bioscience

<table>
<thead>
<tr>

**Minor in Bioscience and Society**

Designed for non-majors, the minor in bioscience and society is accessible to all students with an interest in biology. The minor includes a list of topical courses from which students can choose freely depending upon interest.

Required Courses

Select one of the following options: 3.0-4.0

- BIO 100 | Applied Cells, Genetics & Physiology
- or
- BIO 107 | Cells, Genetics & Physiology & BIO 108 | and Cells, Genetics and Physiology Laboratory

Select one of the following options: 3.0-4.0

- BIO 101 | Applied Biological Diversity, Ecology & Evolution
- or
- BIO 109 | Biological Diversity, Ecology & Evolution & BIO 110 | and Biological Diversity, Ecology and Evolution Laboratory

ENVS 212 | Evolution | 4.0

Select four of the following:* 14.0

- BIO 112 | Biotechnology for Society
- BIO 116 | How Your Body Works-Or Not
- BIO 118 | Basics of Cancer
- BIO 264 | Ethnobotany
- BIO 284 | Biology of Stress
- BIO 312 | Genetically Modified Foods
- ENVS 260 | Environmental Science and Society

Total Credits | 24.0-26.0

* A grade of "C" or better must be earned for each course in this minor for the course to meet the requirement.
** Other courses may be substituted depending on yearly course offerings after consultation with an academic advisor in the Department of Biology.

Minor in Chinese

About the Minor

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Chinese minor requires 24.0 credits of language study above Chinese 105. Students can choose from the following course options including 12 credits of Special Topics classes. Students will likely be required to take advanced courses abroad to complete the minor.

Minor in Computer Crime

The minor in computer crime grounds students in the fundamentals of crime, security and technology by focusing on the behavioral, legal, and societal factors associated with technology and deviance as they relate to both the private and public sectors. The curriculum exposes students to both the concepts and tools necessary to understand and ultimately address computer crime, such as financial fraud, identity theft and other digital crimes that cross national and international boundaries.

Required Courses
- CJS 101 Introduction to Criminal Justice
- CJS 200 Criminology
- CJS 276 Introduction to Computer Crime
- CJS 274 Sex, Violence, & Crime on the Internet
- CJS 365 Computer Investigations and the Law
- CJS 377 Intellectual Property Theft in the Digital Age

Additional Elective Courses
Select two of the following:
- CJS 265 Criminal Investigation
- CJS 266 Crime Prevention Planning
- CJS 267 Introduction to Security Studies
- CJS 273 Surveillance, Technology, and the Law
- CJS 362 Gender, Crime, and Justice
- CJS 375 Criminal Procedure
- CJS T380 Special Topics in Criminology and Justice Studies

Total Credits: 24.0

Minor in Ecology

The minor in ecology meets the needs of engineering, science, arts, applied arts, information, and business students interested in environmental science. Prior to taking ENVS 230 General Ecology, students are minimally expected to have had one term to a year of both general biology and general chemistry.

Required Courses
- ENVS 212 Evolution
- ENVS 230 General Ecology
- ENVS 260 Environmental Science and Society
- ENVS 284 Physiological and Population Ecology
- ENVS 286 Community and Ecosystem Ecology
- ENVS 328 Conservation Biology
- Environmental Science elective
- Field Course

Choose one of:
- ENVS 382 Field Botany of the New Jersey Pine Barrens
- ENVS 383 Ecology of the New Jersey Pine Barrens
- ENVS 388 Marine Field Methods

Total Credits: 26.0

Minor in French

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The French minor requires a minimum of 24 credits above French 103, including at least 12 credits above French 210, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.
- FREN 201 French IV
- FREN 202 French V
- FREN 310 Advanced Writing and Speaking
- FREN 320 Introduction to Language for the Professions
- FREN 330 Introduction to Identities and Communities
- FREN 340 Introduction to Power and Resistance
- FREN 350 Introduction to Language, Media, and Society
- FREN 410 Advanced Grammar and Translation
- FREN 420 Advanced Studies in Language for the Professions
- FREN 430 Advanced Studies in Identities and Communities
- FREN 440 Advanced Studies in Power and Resistance
- FREN 450 Advanced Studies in Language, Media, and Society

Total Credits: 24.0

Minor in Human Factors and Ergonomics

Note: Effective Fall 2015, students will no longer be accepted into this minor.

This minor is intended to meet the needs of the students who have an interest in any type of design and who recognize the importance of taking
account of human characteristics, both strengths and weaknesses, in the design of artifacts intended for human use (e.g., equipment, computer software, consumer products, and even entire work environments).

The minor should also be of particular interest to students who have an interest in doing graduate work in human factors, ergonomics, industrial design, etc.

Entry into the minor requires that general psychology (or an equivalent introductory course) be taken as a prerequisite. Students who have completed PSY 101 and who are interested in a minor in Psychology are expected to meet with a Psychology Department faculty member to discuss the selection of appropriate courses. No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

**Required Prerequisite**

General Psychology course (PSY 101 or equivalent)

**Required Courses**

**Minor in Italian Studies**

**About the Minor**

Drexel University and Philadelphia have deep connections with the Italian and Italo-American communities. In addition to the large population of Italians and Italian-Americans in Philadelphia and the region, including a substantial proportion of Drexel students, a significant number of faculty across the university have research interests that include the Italian context. The interdisciplinary minor in Italian Studies is designed to attract students interested in a variety of aspects related to Italian culture and to make use of the deep and diverse pool of resources on Drexel’s campus, in the region, and abroad.

The minor in Italian Studies shares the existing curriculum in Italian language but only requires three courses (9-12 cr.) of language study. This allows students to achieve at least a level of language proficiency sufficient to navigate Italian society but also allows students whose interests lie beyond the language to pursue substantial Italy-related coursework in other disciplines. The cultural studies side of the minor include 12-15 credits of coursework on Italian society and culture, including a required seminar in contemporary Italy.

**Program Requirements**

**Required courses:**

Students select 9.0-12.0 credits ITAL courses.  
ITAL 230 Italy and Italians Today 3.0

**Italian Studies Electives:**

ARTH 102 History of Art II: Renaissance to Romanticism  
ARTH 325 Ancient Greek and Roman Art  
ARTH 327 Italian Renaissance Art  
CULA 305 Fundamentals of Italian Cuisine  
FMST 345 Italian Neo Realism  
HIST 355 Venice and the Mediterranean from the Middle Ages to Napoleon  
SCL 419 Global Coaching Seminar

**Minor in Japanese**

**About the Program**

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Japanese minor requires a minimum of 24 credits with a minimum of 12 credits above JAPN 310.

Students will likely be required to take advanced courses abroad to complete the minor.

KOR 201 Korean IV
About the Program

The Neuroscience minor allows students from a vast array of disciplines the opportunity for formalized study in Neuroscience. This interdisciplinary minor integrates content from cellular, molecular, and systems neurobiology with neuropsychology, providing students with a strong foundation in basic principles of neurobiology and neuropsychology. This minor is a collaborative effort between Biology and Psychology, but is open to students in any major with an interest in gaining a deeper understanding of the biological and cognitive principles underlying brain function.

* 3 credits of research in neuroscience as BIO 497 or PSY 499 can be substituted for 1 elective in either of the categories

About the Program

The minor in nonprofit communication is a 24.0 credit curriculum designed to familiarize students with general communication theory and practice while providing training in print and electronic communication skills peculiar to the nonprofit sector. In addition to conventional course work this minor will include a practicum in the form of a 3.0 credit independent study (COM I399) for one term in which students will provide service and consultation for an area nonprofit organization as selected and coordinated by Drexel Edits (http://www.drexel.edu/coas/academics/departments-centers/communication/drexel-edits), the university's center for the support of nonprofit communication.

About the Program

The minor in Science, Technology and Society (STS) allows students to explore the cultural, ethical, historical, political, and institutional dimensions of science, medicine, and technology. By taking courses in different disciplines, students develop an interdisciplinary approach that empowers them to critically analyze the social dimensions of science, medicine, and technology. Science, technology and society (STS) programs, also called science and technology studies (STS), are growing in the US and worldwide. The ability to critically identify the values and incentives built into scientific knowledge and technology design and use is highly valued in settings such as health care organizations, government agencies, public policy realms, tech industries, and more.
Select 6 - 8 classes from the list below, with a minimum of 24 credits. At least 3 different subject areas must be represented among these classes.

- ANTH 330 Media Anthropology
- ANTH 345 Visual Anthropology
- ANTH 355 Digital Culture
- ANTH 360 Culture and the Environment
- ARCH 315 Sustainable Built Environment I
- BIO 112 Biotechnology for Society
- BIO 312 Genetically Modified Foods

Minor in Spanish

About the Program

In our globalized world, intercultural and multilingual communication is an indispensable asset for the 21st century citizen and worker. As part of the Department of Global Studies and Modern Languages, we offer language instruction rooted in communication and embedded in authentic cultural contexts. Language study opens a world of opportunities for our students, from co-ops and study abroad programs to engagement with global communities here in Philadelphia. Media and technology, as well as travel and commerce, make the study of languages more crucial than ever, for tackling global challenges such as climate change and inequality demand that our students communicate across languages and cultures.

The Spanish minor requires a minimum of 24 credits above SPAN 103, including at least 12 credits above SPAN 310, and at least one 400 level course. Students can choose from the following 300 and 400 level courses.

- SPAN 201 Spanish IV
- SPAN 202 Spanish V
- SPAN 310 Advanced Writing and Speaking
- SPAN 320 Introduction to Language for the Professions
- SPAN 330 Introduction to Identities and Communities
- SPAN 340 Introduction to Power and Resistance
- SPAN 350 Introduction to Language, Media, and Society
- SPAN 410 Advanced Grammar and Translation
- SPAN 420 Advanced Studies in Language for the Professions
- SPAN 430 Advanced Studies in Identities and Communities
- SPAN 440 Advanced Studies in Power and Resistance
- SPAN 450 Advanced Studies in Language, Media, and Society

Minor in Women's and Gender Studies

The Women's and Gender Studies (WGST) Minor gives students a broad, interdisciplinary and global understanding of how gender intersects with race, age, class, sexual orientation, and other identities that shape human consciousness and experience. The WGST minor equips women, men and people who are gender variant with tools for making sense of societal structures within which they must operate as students, professionals and citizens. Through comparative study of gender across cultures, both within the United States and globally, students who minor in WGST gain a critical lens on the complexities of gender as it is constructed and understood in diverse contexts. Through WGST courses, students develop skills to be attuned to how gender impacts all aspects of human interaction, from the family, to the workplace, to the voting booth.

As an academic program Women's and Gender Studies provides a sharp focus on assumptions about the way the world can and does work. It offers a conceptual framework to analyze experiences of inequality or discrimination, and asks students to become active, engaged, thoughtful participants in their learning and in their lives. Women's and Gender Studies prioritizes learning that helps students understand their "real life" experiences, at the same time that it asks students to reflect on and ask difficult, provocative and meaningful questions about those experiences.

Women's and Gender Studies works with many programs and departments at Drexel to emphasize how sex and sexuality intersect with other identities, as well as history, culture and geography to produce different beliefs, experiences and practices in peoples’ lives and in larger social structures.
Because businesses working across many industries, including those in the nonprofit sector, are increasingly sensitive to issues such as gender discrimination, sexual harassment, equal pay for comparable work, support for LGBTQ-identified employees, parental leave, and day care, students with a Minor in Women’s and Gender Studies gain a definite edge over other applicants for managerial and policy-making positions.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics-departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics-departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics-departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Minor in Writing

The Minor in Writing invites students from all disciplines to develop their writing skills and further their abilities to think critically and creatively by encouraging them to make connections beyond the scope of their discipline.

Students who complete the Minor in Writing will:

- be better positioned to succeed as writers in their future professional and personal endeavors;
- obtain a strong background in theoretical perspectives and practices of writing and rhetoric, as well as reading;
- achieve a better understanding of writing within their major fields of study;
- gain significant practice and experience in writing in many genres and rhetorical modes.

### Philosophy

**Major: Philosophy**

**Degree Awarded:** Bachelor of Arts (BA)

**Calendar Type:** Quarter

**Total Credit Hours:** 182.0

**Co-op Options:** One Co-op (Four years); No Co-op (Four years); Three Co-op (Five years)

**Classification of Instructional Programs (CIP) code:** 38.0101

**Standard Occupational Classification (SOC) code:** 25-1126

### About the Program

A great philosopher once said, "Philosophers have just interpreted the world--but the point is to change it." At Drexel, we believe ideas do affect and change the world--in how we choose what to do, in how we approach our activities, and in what we learn from them. We think the most important reason to engage in philosophy is that we can change the world.

The Drexel philosophy program is organized around the idea that the study of philosophy should help students confront life's complexity. Philosophy classes at Drexel involve students in the active development of their reflective, creative, rational, logical, and linguistic abilities by engaging them with the problems of life and the world. The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication about real issues and concerns. It is particularly valuable as a preparation for careers in education and law, or in graduate study in philosophy, or in fields related to philosophy like critical media studies, public policy, or science, technology, and society (STS).

Drexel philosophy majors take a mixture of historical and topical courses in the major fields of philosophical inquiry. These include ethics, metaphysics (philosophy of reality), epistemology (philosophy of knowledge), aesthetics (philosophy of art), social and political philosophy, philosophy of science, and logic. Our philosophy elective classes cover a wide range of subjects including technology, medicine, law, religion, science, the environment, and more. Our upper-level seminar classes are discussion-driven, reading- and writing-intensive classes usually limited to 10-12 students.

Prior to the end of sophomore year students may choose to focus their philosophical studies in one of three areas of concentration. These are:

- Ethical Theory and Practice,
- Philosophy and Law,
- Philosophy, Technology, and Science.
Students may also remain in the general Philosophy concentration, which gives them the widest range of options from which to select their courses.

Prior to the end of junior year, students may opt to work on a nine-credit Senior Thesis. This is a year-long, self-designed independent research and writing project, culminating in a defense before the program's faculty and students. This project consists of three one-on-one tutorials with a faculty member of the student's choosing.

The philosophy BA includes approximately 50.0 credits of free electives, which makes it possible for many students to double major. The Drexel philosophy program also offers a minor in philosophy (24.0 credits) and certificate programs in Ethical Theory and Practice; Philosophy, Arts and Humanities; and Philosophy, Science, and Technology, (18.0 credits each).

Additional Information

For more information about Drexel philosophy classes and programs, please visit the Department of English and Philosophy website or drop by to see our director anytime. The Department of English and Philosophy is located in MacAlister Hall, room 5044. The director can be contacted at:

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

PHIL 497 [WI] Senior Essay I: Research & Thesis Development (or Philosophy elective PHIL 341-395) 3.0
UNIV H201 Looking Forward: Academics and Careers 1.0
Philosophy elective PHIL 341-391 3.0
Free electives 6.0

**Term Credits** 16.0

**Term 11**
PHIL 431 [WI] Seminar in Modern Philosophy 3.0
PHIL 498 [WI] Senior Essay II: Argument Construction (or 481 [WI] Seminar in a Philosophical School) 3.0
Philosophy Elective PHIL 341-391 3.0
Free electives 6.0

**Term Credits** 15.0

**Term 12**
PHIL 461 [WI] Seminar in Contemporary Philosophy 3.0
PHIL 499 [WI] Senior Essay III: Defense (or 485 [WI] Seminar in a Major Philosopher) 3.0
Free electives 10.0

**Term Credits** 16.0

Total Credit: 182.0-195.0

• Students must complete two consecutive courses in a foreign language and must reach the 201 level. This may require incoming students to complete preliminary classes.

---

**Admission Requirements**

Information about the BA/JD program is available by visiting the BA/BS + JD web page (https://drexel.edu/coas/academics/pre-professional-degrees/ba-bs-jd).

Students who meet the standard eligibility requirement for accelerated programs should consult with their advisor and work on an individual plan of study to submit with the Change of Curriculum form.

**Minor in Philosophy**

This minor is intended for undergraduates seeking to broaden and enhance their education by attaining a firm grounding in philosophy. The minor requires seven carefully-selected classes, plus one 400-level seminar. Students who have completed 30.0 credits may apply for the philosophy minor by submitting the Application for Admission to Minor Program form, available online at the Drexel Central (http://www.drexel.edu/src) website.

As an alternative to PHIL 421 [WI] , PHIL 431 [WI] , and PHIL 461 [WI] , students may select PHIL T480 Special Topics, PHIL 481 [WI] Philosophical School or Movement, or PHIL 485 [WI] Major Philosopher class with program approval.

**Required Courses**

PHIL 101 Introduction to Western Philosophy 3.0

Select one of the following: 3.0

- PHIL 105 Critical Reasoning
- PHIL 111 Symbolic Logic I

**Select three Philosophy Foundations Electives:** 9.0

- PHIL 207 Symbolic Logic II
- PHIL 211 Metaphysics: Philosophy of Reality
- PHIL 212 Ancient Philosophy
- PHIL 214 Modern Philosophy
- PHIL 215 Contemporary Philosophy
- PHIL 221 Epistemology: Philosophy of Knowledge
- PHIL 231 Aesthetics: Philosophy of Art
- PHIL 241 Social & Political Philosophy
- PHIL 251 Ethics

**Select one Philosophy Elective:** 3.0

- PHIL 341 Environmental Philosophy
- PHIL 351 Philosophy of Technology
- PHIL 355 Philosophy of Medicine
- PHIL 361 Philosophy of Science
- PHIL 381 [WI] Philosophy in Literature
- PHIL 385 Philosophy of Law
- PHIL 391 Philosophy of Religion

**Select one Professional Ethics Elective:** 3.0

- PHIL 301 Business Ethics
- PHIL 305 Ethics and the Media
- PHIL 311 Ethics and Information Technology
- PHIL 315 Engineering Ethics
- PHIL 317 Ethics and Design Professions
- PHIL 321 Biomedical Ethics
- PHIL 322 Ethics of Human Enhancement
- PHIL 323 Organizational Ethics
- PHIL 325 Ethics in Sports Management
- PHIL 330 Criminal Justice Ethics
- PHIL 335 Global Ethical Issues
- PHIL 340 Environmental Ethics

**Select one Philosophy Seminar Elective:** 3.0

- PHIL 421 [WI] Seminar in Ancient Philosophy

Co-op/Career Opportunities

Opportunities

No major prepares students for success in as wide a variety of careers as philosophy. Because philosophical work helps students develop superior reasoning, communication, and analytical skills, a philosophy major can be an ideal choice for pre-med or pre-law students. It is also particularly valuable as a preparation for graduate study in philosophy, and fields related to it, such as critical media studies, public policy, education, and science, technology, and society (STS). The Drexel philosophy major is an excellent preparation for success in any field of endeavor that values thoughtful reflection, logical thinking, and clear communication. Philosophy majors graduate into a wide range of successful careers in business, industry, law, government, education, and service organizations and agencies as well as many fields of graduate study and research.

In just its first five years, the Drexel philosophy BA program graduated students into careers including teaching, the law, public policy, and academic research.

Co-op Experiences

Philosophy students at Drexel are encouraged to seek out interesting co-op opportunities related to the skills and interests they are developing through their philosophical explorations and potential career options they would like to explore. These can be as broad as the difference between an ethics-related co-op that has the student shadowing an ethicist working for a hospital’s board of institutional review, to a student who is interested in aesthetics and politics working with the Philadelphia Mural Arts Program in liaison with community groups. Students in philosophy who are pre-law frequently pursue law-related co-ops and co-ops at public and private agencies and organizations that employ lawyers and law students. Students in philosophy who are thinking about careers in academia have the full gamut of writing, editing, and publishing co-ops available to them, as well as research related co-ops they can develop by working with professors. While academically-oriented co-ops and co-ops in the Humanities generally pay less than those in the sciences, business, law, and engineering—if they pay at all—they are still enormously valuable as a way for students to develop a sense of what various careers might actually be like and how they work.

For detailed information on co-op and career opportunities, visit the Drexel Steinbright Career Development Center web page. For further information about co-op and career prospects related to philosophy, contact the Drexel philosophy program director:

Philosophy Faculty

Stacey Ake, PhD (Pennsylvania State University). Associate Teaching Professor. Ethics, semiotics, existentialism

Peter Amato, PhD (Fordham University) Director, Philosophy. Teaching Professor. Ethics, Marxism, Continental philosophy

Jacques N. Catudal, PhD (Temple University). Associate Professor. Epistemology, aesthetics, philosophy of religion

Nathan Hanna, PhD (Syracuse University). Assistant Professor. Ethics, philosophy of law, political philosophy

Adam Knowles, PhD (The New School for Social Research). Assistant Teaching Professor. Continental philosophy, phenomenology, Ancient Greek philosophy

Carol Mele, PhD (University of Pennsylvania). Associate Teaching Professor. Ethics, medical ethics, critical reasoning

Flavia Padovani, PhD (University of Geneva). Assistant Professor. Philosophy of science, epistemology, logic

Marilyn Gaye Piety, PhD (McGill University). Associate Professor. History of philosophy, philosophy of religion, Kierkegaard

Andrew Smith, PhD (SUNY, Stony Brook). Assistant Professor. Social and political philosophy, ethics, American philosophy

Philosophy, Arts, and Humanities Certificate

Only available to currently enrolled Drexel students.

The Certificate in Philosophy, Arts, and Humanities provides an excellent opportunity for undergraduate students in all majors to deepen and broaden their educational experience through engagement with questions and ideas related to the arts and the humanities. What is the nature of art and how is it related to ideas about “beauty”? How do interpretations contribute to our idea of what is true? How can competing interpretations be assessed and evaluated? These and many other related issues will be explored.

Students scheduling their courses can also conduct a search for courses with the attribute “WI” to bring up a list of all writing-intensive courses available that term.

Philosophy, Science, and Technology Certificate

Only available to currently enrolled Drexel students.

The Certificate in Philosophy, Science and Technology provides an excellent opportunity for undergraduate students in all majors to deepen and broaden their educational experience by enhancing and exercising their philosophical skills in relation to some of the most central issues and ideas related to science and technology. What is the nature and scope of natural science? How do the sciences produce our knowledge? Is technology a neutral factor in human life and history? What is our responsibility to the environment? These and many other questions will be explored.

Physics

Major: Physics
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 40.0801
Standard Occupational Classification (SOC) code: 19-102

About the Program

Drexel's undergraduate program provides a solid foundation in physics suitable for graduate study or to branch out into other scientific or technical disciplines. The physics program offers an innovative curriculum in a top-notch learning environment: small class sizes, personal input from faculty, and close interaction with researchers who are leaders in their fields. Students explore the span of universal phenomenon—from the farthest reaches of astrophysics and cosmology, to molecular biophysics and subatomic particle physics—providing a solid foundation for continued study and exploration. Most undergraduates actively participate in research projects, including co-authoring publications and presenting results at conferences.

Virtually every course in the physics major is designed to extend the students' ability to handle real-world problems solved by state-of-the-art techniques. An important feature of the program is the large number of electives, which allow a student to pursue topics of special interest. There are numerous elective courses in areas as diverse as biophysics and cosmology, nanoscience and particle physics. Students can also choose electives to meet teacher certification requirements.

The Laboratory for High-Performance Computational Physics is a venue for students to become proficient in numerical techniques, parallel processing, electronic communication, and the basic computer languages and software relevant to advanced studies and research in physics.

The Department of Physics (http://www.physics.drexel.edu/) conducts a broad array of outreach activities including the Kaczmarszczik Lecture Series, public observing nights at the Lynch Observatory (http://www.physics.drexel.edu/observatory), and demonstrations in grade school performed by the Drexel Chapter of the Society of Physics Students (http://www.physics.drexel.edu/coas/academics/departments-centers/physics/student-organizations/society-physics-students) (SPS).

In addition to the physics major, the Department also offers a minor in biophysics (p. 328) as well as a minor in astrophysics (p. 328) and a minor in biophysics (p. 329).

**Method Classes: Complete 12.0 credits from the following:**

- MATH 322: Complex Variables
- MATH 331: Abstract Algebra I
- MATH 401: Elements of Modern Analysis I
- PHYS 105: Instrumentation for Scientists I
- PHYS 115: Introduction to Electromagnetism
- PHYS 128: Classical Mechanics III
- PHYS 327: Introduction to Nuclear Physics
- PHYS 330: Classical Mechanics II
- PHYS 431: Quantum Mechanics III
- PHYS 432: Cosmology
- PHYS 452: Solid State Physics
- PHYS 461: Biophysics
- PHYS 462: Computational Biophysics
- PHYS 471: Nonlinear Dynamics
- PHYS 476: Particle Physics

**Subject Courses: Complete 15.0 credits from the following:**

- PHYS 217: Quantum Mechanics II
- ENGL 103: Composition and Rhetoric III: Themes and Genres
- UNIV S101: The Drexel Experience

**Technical electives can be any course in BIO, CHEM, ENVS, GEO, MATH, PHYS, or any course from the College of Engineering.**

---

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

* At least 6 credits must have a PHYS subject code.
** Courses at the 400 level and above will also be accepted.
*** Technical electives can be any course in BIO, CHEM, ENVS, GEO, MATH, PHYS, or any course from the College of Engineering.
Co-op/Career Opportunities

Students who complete a degree in physics have many options. Some enter graduate school with the intention of obtaining a master’s or a PhD. Others attend medical school. Engineering is yet another option, and graduates of an undergraduate physics program can enter this field with an unusually solid background in fundamental physical principles, mathematics, and computation. It is also possible for physics graduates to work in business and finance; for example, Wall Street employs many analysts trained in such “hard sciences” as physics. Many Drexel physics graduates proceed directly into graduate schools, or medical or other professional programs. Physics graduates have attended some of the best graduate programs in the United States, including Columbia, Harvard, and CalTech. Other graduates have found jobs in engineering and business, and with such government agencies as the National Bureau of Standards.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) for more detailed information on co-op and post-graduate opportunities.

Minor in Physics

About the Minor

Physics is a science that studies the natural phenomena at all scales, from that of the universe to elementary particles. This minor exposes the students to some of the basic principles of physics and would easily complement any other discipline—from engineering to other sciences.

The minor in physics requires a total of 10.0 credits from the elective list in addition to the prerequisite and core courses.

Because of the overlap in requirements between the astrophysics minor (p. 328) and the physics minor, students cannot minor in both.

Required Prerequisite Courses

- PHYS 101
- PHYS 102
- PHYS 201

*See degree requirements (p. 326).

Minor in Astrophysics

About the Minor

Astrophysics brings together many disparate areas of physics—gravitational physics govern the evolution of galaxies and clusters, nuclear physics dominates the cores of stars, electromagnetism governs the radiation that we use to observe these objects. Students majoring in mathematics and computer science, as well as other disciplines, are often fascinated by the questions raised by astrophysics.

Minor in Biophysics

About the Minor

Biophysics is the study of the complexity of life using tools provided by physics. It attempts to construct mathematical frameworks that explain among many other topics, how organisms obtain energy from the environment, how complex structures appear in the cell and how these relate to function. In essence, biophysics looks for principles that describe observed patterns and propose predictions based on these principles.

Admissions Requirements
Consultation and approval of the program director and completion of one of the prerequisite sequences. Students who have completed the PHYS 152, PHYS 153, PHYS 154 sequence will also be accepted into the minor provided they have an A- average in those courses and have completed MATH 121 and MATH 122.

Facilities

Astrophysics Facilities:

- The Numerical Astrophysics Facility emphasizes theoretical and numerical studies of stars, star formation, planetary systems, star clusters, galaxy distributions, cosmological modeling, gravitational lensing, and the early universe. The facility employs a high-performance Graphics Processing Unit (GPU) compute cluster, each node containing two 6-core, 2.7 GHz Intel Xeon CPUs and 96 Gbytes of RAM, accelerated by 4–6 Nvidia Fermi/Titan GPUs, and connected by QDR infiniband, affording computational speeds of up to 50 trillion floating point operations per second.
- The Joseph R. Lynch Observatory houses a 16-inch Mead Schmidt-Cassegrain telescope equipped with an SBIG CCD camera. Drexel was a member of the original Sloan Digital Sky Survey (SDSS) collaboration; faculty and students remain active in analyzing data from the SDSS. Drexel is currently an institutional member of the Large Synoptic Survey Telescope (LSST), currently under construction in Chile; faculty and students are developing LSST-related machine learning tools and analyzing simulated LSST data to prepare for “first light” in 2022.

Biophysics Facilities:

- Bio-manipulation and microscopy laboratories. Four optical tables and six research grade microscopes are configured to perform microscopic spectroscopy and manipulation on solutions and individual cells. A spatial light modulator allows spatial patterns to be encoded on samples and explored; all microscopes are temperature controlled with state of the art cameras, including a 2,000 frame per second high speed system. Each optical table is also equipped with high power lasers for photolysis or fluorescence spectroscopy. Microfluidic attachments are present on one table, and in an adjacent laboratory, a small microfluidic fabrication facility has been established.
- Experimental biophysics lab for studies of proteins and biomimetic lipids, including a fluorescence spectrometer.
- The Computational Biophysics facility also includes: (i) a Beowulf cluster with 46 dual Quad-core hyperthreaded Xeon CPU (736 cores) and 12GB of RAM nodes plus a master with 1TB of storage and 24GB of RAM, (ii) a Beowulf cluster with 44 dual-core Xeon CPU (344 cores), (iii) a dual Quad-core hyperthreaded Xeon CPU workstation with 24GB RAM and 3TB disk with two Tesla C2050 GPU CUDA-accelerated graphics card, (iv) a dual Quad-core hyperthreaded Xeon CPU workstation with 8GB RAM and 4TB disk with an NVIDIA N280 GPU CUDA-accelerated graphics card, (v) a quad 8-core hyperthreaded Xeon CPU workstation with 128GB RAM and 16TB total disk, (vi) a 72TB file server with 12GB RAM, (vii) a 96TB quad 6-core file server with 64GB RAM, (viii) and several Linux workstations connected through a gigabit network.
**Condensed Matter Facilities:**
- The Ultrafast Electron Diffraction laboratory investigates structural dynamics in nanoscale materials at timescales that are fundamental to materials science and condensed matter physics. The techniques are based on exciting matter with light and probing the response of the lattice with electrons. The research interests of the lab are in a range of phenomena and systems including phase transformations induced by strong laser excitation, phase transformations in strongly correlated systems, generation and detection of coherent lattice vibrations, and characterization of materials properties of graphene, few-layer-graphene, ultra-thin graphite & nanocrystalline diamond.
- The research at Energy Materials Research Laboratory is devoted to atomic scale investigations of materials for energy. As the size of the system shrinks, conventional bulk thermodynamics becomes irrelevant and we enter the realm of mesoscopic physics. The equilibrium behavior of small systems is governed by the prevailing number of surface atoms that behave differently from the bulk ones. The electronic properties are also subject to reduced number of available electronic states. We take advantage of different scanning probe microscopy and spectroscopy techniques to elucidate the local electronic properties of materials that are relevant to solving energy problems. The laboratory research is funded by grants from NSF and DOE.
- The Ultra-low Temperature Laboratory includes a dilution refrigerator, 3He and 4He cryostats and microwave sources to study quantum phenomena in nano and microscale devices, superconducting qubits, nanostructures and quantum fluids and solids.

**Particle Physics Facilities:**
- The Drexel particle physics group contributes to neutrino oscillation experiments at different baselines, including the DUNE long baseline experiment hosted by Fermilab, the Double Chooz experiment in France, and the PROSPECT short baseline experiment at Oak Ridge National Laboratory. We are also active in the IceCube neutrino telescope located at the geographic South Pole, the EXO-200 experiment located in NM, and the PICO dark matter experiment located at SNOLAB in Canada.
- The Bubble Chamber Laboratory develops superheated-liquid detectors for rare-interaction searches.

**Laboratory for High-Performance Computational Physics:**
- In addition to the department computing cluster (15 linux workstations), high-performance computing resources include a dual-processor server with two Xeon E5-2650 processors (16 cores), 128 GB of RAM, and two Xeon Phi P5110 co-processor cards (480 cores). Department researchers also have access to a cluster of 18 Dell PowerEdge C6145 servers (AMD Opteron 6378 Piledriver CPU’s, 64 cores/server, 256 GB RAM/server) with a total of 1152 cores and 4.5TB RAM.

**Physics Faculty**

Alexey Aprilev, PhD *(St Petersburg State University)*. Assistant Teaching Professor. Experimental biophysics.

Eric Brewe, PhD *(Arizona State University)*. Associate Professor. Physics Education Research, introductory course reform, network analysis in learning, neuromechanisms of learning.

Luis R. Cruz Cruz, PhD *(MIT)*. Associate Professor. Computational studies of confinement effects on the folding of amyloidogenic proteins, spatial correlations of neurons in the brain, firing dynamics of neuronal networks, fluid flow through porous media.

N. John DiNardo, PhD *(University of Pennsylvania)* Special Advisor to the Provost. Professor. Vibrational and electron dynamics at semiconductor surfaces and interfaces, metal-semiconductor interfaces, polymer surfaces and interfaces, diamond-like carbon thin films, and protein and cell interactions with biomaterials surfaces.

Michelle Dolinski, PhD *(University of California, Berkeley)*. Associate Professor. Neutrino physics, rare nuclear decays, cryogenic detector technologies.

Frank A. Ferrone, PhD *(Princeton University)*. Professor. Experimental and theoretical protein dynamics, kinetics of biological self-assembly, including sickle cell and Alzheimer’s disease, sickle cell testing and diagnostic devices.

David M. Goldberg, PhD *(Princeton University)* Associate Dean for Research and Graduate Education, Associate Department Head for Undergraduate Studies. Professor. Theoretical and computational cosmology, extragalactic astrophysics, gravitational lensing.

Maher Harb, PhD *(University of Toronto)*. Assistant Professor. Solid state physics, ultrafast electron diffraction, time-resolved X-ray diffraction, ultrafast lasers, nanofabrication, nano/microfluidics, instrument development, vacuum technologies.

Goran Karapetrov, PhD *(Oregon State University)*. Associate Professor. Experimental solid state physics, scanning probe microscopy, nanoscale catalysis, mesoscopic superconductivity.

Rachael M. Kratzer, PhD *(Drexel University)*. Assistant Teaching Professor. Quasars, active galactic nuclei.

Charles Lane, PhD *(California Institute of Technology)*. Professor. Experimental tests of invariance principles and conservation laws, neutrino oscillations and properties.

Christina Love, PhD *(Temple University)*. Assistant Teaching Professor. Educational methods and technology, STEM education, science literacy and outreach, particle physics, astrophysics.

Stephen L. W. McMillan, PhD *(Harvard University)* Department Head. Professor. Stellar dynamics, large-scale computations of stellar systems, and high-performance special-purpose computers.

Naoko Kurahashi Neilson, PhD *(Stanford University)*. Assistant Professor. Neutrino physics, high energy astro-particle physics.

Russell Neilson, PhD *(Stanford University)*. Assistant Professor. Dark matter, neutrino physics.

Gordon Richards, PhD *(University of Chicago)*. Professor. Quasars, active galactic nuclei, supermassive black holes, galaxy evolution, sky surveys, infrared/X-ray/radio astronomy.

Somdev Tyagi, PhD *(Brigham Young University)* Associate Head of Non-Major Studies in Physics. Professor. Nanobiophysics, Raman spectroscopy, magnetic materials.

Brigita Urbanc, PhD *(University of Ljubljana, Slovenia)*. Associate Professor. Computational and experimental biophysics of protein folding.
and assembly, relevant to Alzheimer's and Parkinson's disease; discrete molecular dynamics of coarse-grained protein and lipid models.

Michael Vogeley, PhD (Harvard University) Associate Department Head for Graduate Studies. Professor. Cosmology; galaxy formation and evolution; statistical analysis of large data sets; active galactic nuclei.

Jian-Min Yuan, PhD (University of Chicago). Professor. Protein folding, signal transduction pathways, computational biophysics, nonlinear dynamics and chaos in atomic and molecular systems, protein folding.

Emeritus Faculty

Shyamalendu Bose, PhD (University of Maryland). Professor. Nanoscience, high-temperature superconductivity, theory of surfaces and interfaces, disordered systems, electron and X-ray spectroscopies of solids.

Leonard D. Cohen, PhD (University of Pennsylvania). Professor Emeritus.

Leonard X. Finegold, PhD (University of London). Professor Emeritus.

Robert Gilmore, PhD (Massachusetts Institute of Technology). Professor. Applications of compact and non-compact Lie algebras for problems in nuclear, atomic, and molecular physics; nonlinear dynamics and chaos and the analysis of chaotic data.

Richard D. Haracz, PhD (Wayne State University). Professor Emeritus.

Frederick House, PhD (University of Wisconsin). Professor Emeritus.

Arthur P. Joblin, PhD (Drexel University). Professor Emeritus.

Donald C. Larson, PhD (Harvard University). Professor Emeritus.

Arthur E. Lord, PhD (Columbia University). Professor Emeritus.

James McCray, PhD (California Institute of Technology). Professor Emeritus.

Richard I Steinberg, PhD (Yale University). Professor. Neutrino physics.

Michel Vallières, PhD (University of Pennsylvania). Professor. Shell-model and mean field studies of nuclei on and off beta-stability, chaotic scattering, computational physics.

T. S. Venkataraman, PhD (Worcester Polytechnic Institute). Professor Emeritus.

Political Science

Major: Political Science

Degree Awarded: Bachelor of Arts (BA)

Calendar Type: Quarter

Total Credit Hours: 180.0

Co-op Options: One Co-op (Four years); No Co-op (Four years)

Classification of Instructional Programs (CIP) code: 45.1001

Standard Occupational Classification (SOC) code: 19-3094

About the Program

The political science program in the Department of Politics (http://www.drexel.edu/coas/academics/departments-centers/politics) helps students cultivate perspective, develop critical thinking and communication skills, and understand the economic, social, and political systems within which we live and work. Our curriculum builds on the department's research focuses and strengths. These include public policy, environmental politics, international organizations, human rights, and law and society. This flexible program allows students to shape a curriculum that meets their needs, whether they are preparing for public service, the business world, graduate school in political science, an MBA or other business program, or law school.

Degree Offered

The department offers a Bachelor of Arts (BA) in political science. Students may choose a substantive 'track' that best fits their needs and future goals. Our current tracks are: American Politics and Policy, International Politics, and Law and Politics.

The Bachelor of Arts (BA) provides a flexible course of study, which includes foreign language and allows for options in the fulfillment of humanities, social science, math, and science requirements.

Select four of the following courses:
**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Total Credit: 180.0**
Accelerated BA in Political Science and MS in Science, Technology & Society

About the Program

Drexel University permits undergraduate students to apply for graduate programs while completing their undergraduate programs, allowing students to complete their master's degrees in a shorter amount of time. The accelerated-degree program provides an opportunity to simultaneously earn both a BA degree and an MS degree in Science, Technology & Society (http://catalog.drexel.edu/graduate/collegeofartsandsciences/sciencetechnologyandsociety) (two diplomas are awarded) in five years.

Students entering the program must:

- have and maintain a minimum of 3.0 grade point average throughout the program
- have no fewer than 90.0 earned credits
- have no more than 120.0 registered credits

The Department of Politics would especially like to encourage its own majors to consider the accelerated degree program in Science, Technology & Society. If you are currently enrolled in a 4+1 (4COP Accelerated Program) degree program, you are required to fill out the Accelerated Degree Level Conversion Form. After obtaining all the required signatures, please direct the form to the Assistant Director for Graduate Studies Office, Randell 240.

For more information about the accelerated BA/MS program, contact:
STS Program Director
Macalister Hall, 3025
215.895.2463

Recommended Plan of Study

Students should work closely with faculty advisors in the Science, Technology & Society program to schedule an individualized plan of study for their accelerated degree completion.

225.0 minimum credits

Co-Op/Career Opportunities

Political science majors have a wide variety of co-op experiences from which to choose. Business and public utilities offer many lucrative possibilities, and local, state, and federal governments; museums and archives; and law firms present many additional interesting co-op placements. Pre-law students, for example, are especially eager to see the inside of a law office, whether the co-op job they receive is clerical or a more challenging paralegal assignment. These practical experiences in the “real” world can reinforce the lessons of the classroom, sharpen skills, and establish important contacts. Sample co-op positions include:

- Law clerk/paralegal, Joe Davidson, Attorney-at-Law, Philadelphia
- Research analyst, Legislative Office for Research Liaison, Harrisburg, PA
- Legislative intern, Corporate Public Affairs Division, Philadelphia Electric Company
- Assistant lobbyist, Government Relations Office, Drexel University
- Education intern, Philadelphia Museum of Art
- Researcher, Philadelphia Chamber of Commerce
- Assistant, Office of the Governor, Harrisburg, PA

Career Opportunities

The flexible programs allow students to shape a curriculum that meets their needs, whether they are preparing for the business world, graduate school in history or political science, the Department’s Masters Program in Science, Technology, and Society (http://drexel.edu/coas/academics/departments-centers/science-technology-society), an MBA or other business program, or law school.

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Politics Faculty

Phillip Ayoub, PhD (Cornell University). Assistant Professor. International relations, comparative politics, transnational social movements, marginalized groups

Scott Barclay, PhD (Northwestern University) Department Head, Politics. Professor. Judicial systems, civil rights, public policy and administration.

Zoltan Buzas, PhD (Ohio State University). Assistant Professor. International relations theory, international security, race and politics, diplomatic history.

Rose Corrigan, PhD (Rutgers University). Associate Professor. Women, public law, American politics and policy.

Richardson Dilworth, PhD (Johns Hopkins University) Director, Center for Public Policy. Professor. American political development, urban politics, public policy.

Erin R. Graham, PhD (Ohio State University). Assistant Professor. International institutions, international relations theory, global environmental politics.

Amelia Hoover Green, PhD (Yale University). Assistant Professor. Dynamics of conflict-related violence; intra-armed group politics and socialization; statistics in human rights.

Christian Hunold, PhD (University of Pittsburgh). Associate Professor. Environmental policy; comparative politics; urban wildlife; political theory.

Alison Kenner, PhD (Rensselaer Polytechnic Institute). Assistant Professor. Science, technology, and health; environmental health problems; cities and place; feminist theory; medical anthropology; digital humanities

Joel E. Oestreich, PhD (Brown University) Director of the Global Studies major. Associate Professor. International organizations, international finance, development, and human rights.

Elva Orozco-Mendoza, PhD (University of Massachusetts). Assistant Teaching Professor. Political freedom and action in the thought of Hanna Arendt; Feminist theory and feminist methodology; Protest politics; Theories of Violence; Identity politics, race, and gender in Latin American politics

Gwen Ottinger, PhD (University of California, Berkeley). Assistant Professor. Social studies of science and technology, environmental justice, science and engineering ethics, citizen science, environmental ethics.

Joshua Plencner, PhD (University of Oregon). Assistant Teaching Professor. American politics, race and racism, visual politics, political theory

William L. Rosenberg, PhD (Temple University). Professor. Behavioral politics, public opinion, and political communication.

Chloe Silverman, PhD (University of Pennsylvania). Associate Professor. Parent advocacy for autism, neurodiversity, and pollinator health research.

Jose Tapia, PhD (New School for Social Research). Associate Professor. The crises and fluctuations of the economy and the relation between these fluctuations and health conditions; quantitative aspects of social science.

Emeritus Faculty

Julie Mostov, PhD (New York University) Vice Provost for Global Initiatives. Professor Emeritus. Modern political thought, democratic theory, nationalism, gender studies, South Eastern Europe and the Balkans.
Psychology

Major: Psychology
Degree Awarded: Bachelor of Science (BS)
Calendar Type: Quarter
Total Credit Hours: 180.0
Co-op Options: Three Co-op (Five years); One Co-op (Four years); No Co-op (Four years)
Classification of Instructional Programs (CIP) code: 42.0101
Standard Occupational Classification (SOC) code: 19-3031; 19-3032; 19-3039

About the Program

Drexel University’s Department of Psychology is a tight-knight, active community of internationally known faculty and impressive student scholars. The department defines psychology as a science of mind and behavior. From the neurophysiological underpinnings of cognition to defining the impact of human behaviors within the judicial systems and policies. Psychology contributes the human behavioral aspects to other fields, including STEM, medicine, law, arts and social sciences. Our students work alongside professors on cutting-edge research and clinical projects in a range of areas, including health, forensic, neuropsychology, human development, experimental, cognitive and clinical psychology. Undergraduates also benefit from Drexel’s cooperative education program, gaining hands-on, extensive work experience in areas of their interest.

Bachelors of Science in Psychology

Students in the Bachelor of Science in Psychology program learn how to ask and answer important questions regarding human behavior, cognition and emotion, and how to apply their findings to improve lives. Within the program, students have the option to concentrate in specific areas:

Mind, Brain and Behavior

The Mind, Brain and Behavior (MBB) area of focus allows psychology majors to concentrate their plan of study on how the mind and brain produce human behavior. Situating the mind within its biological substrate is one of the great scientific challenges of the 21st century. MBB covers introductory through advanced courses, exposing students to the formal study of the human mind and behavior and their underlying brain systems and structures.

Human Development

This area allows students to focus on issues affecting human development across the lifespan. Using a biological, cognitive and socio-emotional perspective, students gain both breadth and depth in the understanding of current issues in child, adolescent and adult development.

Clinical and Health

For those interested in health and service careers, this area of focus includes coursework, experiential learning, and individualized mentorship, providing students with practical experience in the field.

Combined Bachelors/Masters Degree

There is an accelerated MS program entitled the Psychology BS/MS Scholars program to which undergraduates may apply. For more information, visit the Drexel University Department of Psychology (http://www.drexel.edu/coas/academics/departments-centers/psychology) homepage.

Additional Information

To schedule an appointment students should contact the Psychology department’s academic advisor:

In order to graduate, all students must pass three writing-intensive courses. Students are advised to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course fulfills a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

- Students with AP psychology, or transfer students with PSY 101 credit, should check the AP Student Placement Exam Crosswalk (http://www.drexel.edu/provost/policies/pdf/supporting/ap_crosswalk.pdf) or check with their advisor.

**Students who do not wish to elect the research seminar sequence are required to take four additional advanced psychology electives instead.**
Looking Forward: Academics and Careers

Co-op/Career Opportunities

Some graduates seek employment immediately after receiving their bachelor’s degrees. They are well trained to work as research assistants in consulting firms and medical settings or to provide front-line services in mental health and educational settings. Other graduates go on to professional schools in law, business, medicine, and other health professions. Still others pursue graduate training in psychology and related fields. Students build skills and knowledge that provide a foundation for advanced study, create opportunities for future growth, and can be used to improve the quality of life for others.

Co-op Experiences

Drexel University has long been known for its co-operative education programs, through which students mix periods of full-time, career-related employment with their studies. Co-op/internship employment is an option for psychology majors. Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Minor in Psychology

The minor in psychology is intended to meet the needs of students who recognize that an understanding and analysis of individual psychological processes is a key component of their education. Students in the minor learn how to ask and answer important questions regarding human behavior, cognition and emotion to complement their major. The minor may also be of interest to students who have an interest in a double major but are unable to satisfy all of the requirements in two major fields.

Entry into the minor requires that PSY 101 General Psychology (or an equivalent introductory course) be taken as a prerequisite. Students who have completed and who are interested in a minor in Psychology are expected to meet with a Psychology Department faculty member to discuss the selection of courses appropriate to their major and their own personal interests. No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are
advised to take one writing-intensive class each year, beginning with the 
sophomore year, and to avoid “clustering” these courses near the end 
of their matriculation. Transfer students need to meet with an academic 
advisor to review the number of writing-intensive courses required to 
graduate.

A "WI" next to a course in this catalog may indicate that this course 
can fulfill a writing-intensive requirement. For the most up-to-date list of 
writing-intensive courses being offered, students should check the Writing 
Intensive Course List (http://drexel.edu/coas/academics/departments-
centers/english-philosophy/university-writing-program/writing-intensive-
courses) at the University Writing Program (http://drexel.edu/coas/
academics/departments-centers/english-philosophy/university-writing-
program). (http://drexel.edu/coas/academics/departments-centers/english-
philosophy/university-writing-program/drexel-writing-center) Students 
scheduling their courses can also conduct a search for courses with the 
attribute "WI" to bring up a list of all writing-intensive courses available 
that term.

Psychology Faculty

Meghan Butryn, PhD (Drexel University). Associate Research Professor. 
Treatment and prevention of obesity and eating disorders, behavioral 
treatment, acceptance and commitment therapy.

Dorothy Charbonnier, PhD (SUNY Stony Brook). Assistant Teaching 
Professor. The nature of the creative process and writing.

Evangelia G. Chrsikou, PhD (Temple University). Associate Professor. 
Cognitive neuroscience of memory, concepts, and action, neural 
mechanisms of cognitive and affective regulation, translational 
neuroscience.

Douglas L. Chute, PhD (University of Missouri) Louis and Bessie Stein 
Fellow; Faculty coordinator of ePsychology. Professor. Neuropsychology 
and rehabilitation; technological applications for the cognitively 
compromised and those with acquired brain injuries.

Brian Daly, PhD (Loyola University, Chicago) Director, Practicum Training. 
Assistant Professor. Pediatric neuropsychology, intervention with at-risk 
youth.

David DeMatteo, PhD, JD (MCP Hahnemann University; Villanova 
University School of Law) Director of the JD-PhD Program in Law and 
Psychology. Associate Professor. Psychopathy, forensic mental health 
assessment, drug policy; offender diversion.

Evan M. Forman, PhD (University of Rochester). Professor. Clinical 
psychology: mechanisms and measurement of psychotherapy outcome, 
cognitive-behavioral and acceptance based psychotherapies, the 
development and evaluation of acceptance-based interventions for health 
behavior change (for problems of obesity and cardiac disease) as well as 
mood and anxiety disorders; neurocognition of eating.

Pamela Geller, PhD (Kent State University). Associate Professor. 
Stressful life events and physical and mental health outcomes, particularly 
in the area of women’s reproductive health (e.g. pregnancy, pregnancy 
loss, infertility, medical education).

Maureen Gibney, PsyD (Widener University). Associate Teaching 
Professor. Clinical psychopathology; neuropsychological evaluation and 
intervention with the elderly.

Naomi Goldstein, PhD (University of Massachusetts) Co-Director of the 
JD-PhD Program. Associate Professor. Forensic psychology; juvenile 
justice; Miranda rights comprehension; false confessions; juvenile 
justice treatment outcome research; anger management intervention 
development; child and adolescent behavior problems.

Kirk Heilbrun, PhD (University of Texas at Austin). Professor. Forensic 
psychology, juvenile and adult criminality, violence risk assessment, 
forensic psychological assessment, treatment of mentally disordered 
offenders, academic-sports mentoring.

Adrienne Juarascio, PhD (Drexel University). Assistant Research 
Professor. Enhancing treatment outcomes for eating disorders 
and obesity; Acceptance-based behavioral treatments; Evaluating 
mechanisms of action in behavioral treatments.

Marlin Killen, PhD (Trident University International) Faculty Coordinator 
of ePsychology; Online Learning Council Fellow. Associate Teaching 
Professor. Authentic teaching methods in Psychology as well as student 
persistence behavior.

John Kounios, PhD (University of Michigan) Director, PhD Program in 
Applied Cognitive and Brain Sciences. Professor. Cognitive neuroscience, 
especially creativity, problem solving, and cognitive enhancement.

Michael Lowe, PhD (Boston College). Professor. Prevention and 
treatment of eating disorders and obesity; effects of appetitive 
responsiveness and dietary restraint on eating regulation; psychobiology 
of obesity-proneness; empirical foundations of unconscious processes.

John Medaglia, PhD (Pennsylvania State University). Assistant Professor. 
Neuropsychology: cognitive control; brain stimulation; neuroimaging; 
network analysis; cognitive neuroengineering; wellbeing.

Megan L. Meyer, PhD (Temple University). Assistant Teaching Professor. 
Influences on preferred body type; changes in body image, self-esteem, 
and self-efficacy in females as a function of strength training. Sensation 
and perception.

Danette Morrison, PhD (University of Maryland-College Park). Assistant 
Teaching Professor. Social relationships, identity development and 
achievement motivation of ethnic minorities.

Arthur Nezu, PhD, DLLL, ABPP (State University of New York at Stony 
Brook). Distinguished Professor. Behavioral medicine applications of 
problem-solving therapy and other cognitive-behavior therapies 
(e.g., to decrease emotional and psychosocial risk factors; improve 
adherence), particularly with regard to patients with cardiovascular 
disease; assessment.

Christine Maguth Nezu, PhD (Fairleigh Dickinson University). Professor. 
Cognitive-behavioral assessment and treatment for mood, anxiety, 
personality disorders, and coping with chronic illness; mind/body studies; 
stress and coping; developmental disabilities and comorbid behavioral 
and emotional disorders; spirituality and psychology.

Karol Ospowicz, PhD (Thomas Jefferson University). Assistant Teaching 
Professor. The application of advanced neuroimaging to the study of 
human brain function and anatomy.

Nancy Raitano Lee, PhD (University of Denver) Director MS and BS/MS 
Programs. Assistant Professor. Neuropsychological and neuroanatomic 
correlates of intellectual and developmental disabilities; Verbal memory 
and language difficulties in Down syndrome and other genetic disorders; 
Comorbid autism spectrum disorder symptoms in youth with genetic
disorders; Neuroanatomic correlates of individual differences in typical
and atypical cognition

Diana Robins, PhD (University of Connecticut) Research Program Leader,
Associate Professor. Autism screening, early detection of autism

Ludo Scheffer, PhD (University of Pennsylvania) Director of
Undergraduate Studies. Teaching Professor. Meta-cognitive development,
writing, and computers; Language and literacy development in the early
years in the context of family and schooling; Youth-at-risk; School
violence and bullying; Program/intervention effectiveness

Maria Schultheis, PhD (Drexel University) Interim Dean, College of Arts
and Sciences. Professor. Clinical Neuropsychology and rehabilitation
following neurological compromise (brain injury, stroke, multiple sclerosis),
application of technologies in psychology. Specialization in the use
of virtual reality (VR) simulation, and evaluation of the demands of driving
after disability.

Jennifer Schwartz, PhD (Idaho State University) Director of Psychological
Services Center. Associate Teaching Professor. Adult psychopathology;
evidence-based clinical practice; competency-based training;
competency-based clinical supervision.

Julia Sluzenski, PhD (Temple University). Assistant Teaching Professor.
Spatial and episodic memory, memory loss across the lifespan,
developmental psychology.

Fengqing (Zoe) Zhang, PhD (Northwestern University). Assistant
Professor. Neuroimaging data analysis; Data mining; Bayesian inference;
High dimensional data analysis

Eric A Zillmer, PsyD (Florida Institute of Technology) Carl R.
Pacifico Professor of Neuropsychology and the Director of Athletics.
Professor. Psychological assessment (neuropsychological, cognitive,
personality), psychiatric and neurological disorders, behavioral medicine,
neurogerontology, mathematical modeling, sports psychology, psychology
of genocides.

Emeritus Faculty

Donald Bersoff, JD, PhD (Yale University, New York University).
Professor Emeritus. Law and psychology; mental health law.

Thomas T. Hewett, PhD (University of Illinois at Urbana-Champaign).
Professor Emeritus. Human computer interaction and cognitive
engineering; development of computing environments to support
knowledge, workers, and high performance experts.

Myrna Shure, PhD (Cornell University). Professor Emeritus. Child
development, problem-solving interventions with children, prevention
programs.

Mary Spiers, PhD (University of Alabama at Birmingham). Professor
Emeritus. Clinical neuropsychology and medical psychology; memory and
practical applications for memory disorders in the elderly; cognitive health
of women.

Co-op Options: Three Co-op (Five years); One Co-op (Four years); No
Co-op (Four years)
Classification of Instructional Programs (CIP) code: 45.1101
Standard Occupational Classification (SOC) code: 19-3041

About the Program

The sociology major at Drexel University has three components: theory,
methods, substantive coursework and features specialized coursework
relating to social justice issues.

Sociology is the systematic study of societies. Society is the sum total
of individual and group interaction and relations, from small groups
and families to global networks and complex social organizations.
The discipline covers a wide variety of fields of inquiry. Sociologists
examine structural relations—how human society is organized from small
groups to large institutions—and is committed to developing a critical
understanding of these relationships. Thus the sociology major stresses
theory, research methods, quantitative and qualitative data analysis as
applied to a wide variety of substantive areas including but not limited
to social inequality, political power, gender, class, race, ethnicity, family,
crime, technology and environmental change as well as a wide variety
of social and political movements connected with social change. The
stress on critical understanding means that sociology majors will strive
not only to develop strong analytic abilities but an intellectual and ethical
engagement reflected in sociologically informed thinking and action. The
research and analytical skills developed in our program are sought after
by a wide variety of professions.

Specialized social justice coursework is typically carried out in connection
with community groups and organizations. It is a way the Sociology
Program and Drexel University as a whole seek to become practically
engaged with the wider community while promoting social justice.

For more information about the sociology major, visit the Department of
Sociology (http://www.drexel.edu/coas/academics/departments-centers/
sociology) web page.

- SOC 356 [WI] | Contemporary Social Theory | 4.0 |
- Sociology Required Elective (at 400 Lv) | 4.0 |
- Humanities/Fine Arts Elective | 3.0 |

**Term Credits**: 15.0

---

**Required Sociology Electives**

Select at least 12 of the following: (At least four must be at the 300 or 400 level; and at least one must be at the 400-level.)

- SOC 115 | Social Problems | 3.0 |
- SOC 210 | Race, Ethnicity and Social Inequality | 3.0 |
- SOC 215 | Sociology of Work | 3.0 |
- SOC 220 | Wealth and Power | 3.0 |
- SOC 221 | Sociology of the Family | 3.0 |
- SOC 222 | Sex and Society | 3.0 |
- SOC 230 | Gender and Society | 3.0 |
- SOC 235 | Sociology of Health and Illness | 3.0 |
- SOC 240 | Urban Sociology | 3.0 |
- SOC 245 | Sociology of the Future | 3.0 |
- SOC 268 | Sociology of Sport | 3.0 |
- SOC 270 | Theory of Applied and Community Sociology | 3.0 |
- SOC 271 | Sociology of Aging | 3.0 |
- SOC 276 | Global Climate Change | 3.0 |
- SOC 313 | Global Health Matters | 3.0 |
- SOC 315 | HIV/AIDS and Africa | 3.0 |
- SOC 320 | Sociology of Deviance | 3.0 |
- SOC 330 | Development and Underdevelopment in the Global South | 3.0 |
- SOC 340 | Globalization | 3.0 |
- SOC 341 | Environmental Movements in America | 3.0 |
- SOC 345 | Sociology of the Environment | 3.0 |
- SOC 346 | Environmental Justice | 3.0 |
- SOC 349 | Sociology of Disasters | 3.0 |
- SOC 370 | Practicum in Applied and Community Sociology | 3.0 |
- SOC 380 | Special Topics in Sociology | 3.0 |
- SOC 410 | Imagining Multiple Democracies | 3.0 |
- SOC 420 | Love, Rage & Debt: The Debt Society | 3.0 |
- SOC 430 | Politics of Life | 3.0 |
- SOC 444 | Social Movements | 3.0 |
- SOC 480 | Advanced Special Topics in Sociology | 3.0 |
- SOC 490 | Sociology Research Seminar I: Research Design | 3.0 |
- SOC 491 | Sociology Research Seminar II: Data Acquisition and Analysis | 3.0 |
- SOC 492 | Sociology Research Seminar III: Practicum in Sociological Research | 3.0 |
- SOC 499 | Independent Studies in Sociology | 3.0 |

**Free Electives**: 38.0

**Total Credits**: 182.0

* At least one foreign language course must be at the 200-level. In addition, the department recommends students take 2 additional foreign language courses as free electives.

**Sample Plan of Study**

**Term 1**
- ENGL 101 | Composition and Rhetoric I: Inquiry and Exploratory Research | 3.0 |
- SOC 101 | Introduction to Sociology | 3.0 |
- UNIV H101 | The Drexel Experience | 1.0 |
- Foreign Language Course | 4.0 |
- Mathematics course | 3.0 |

**Term Credits**: 14.0

**Term 2**
- CIVC 101 | Introduction to Civic Engagement | 1.0 |

---

**At least one foreign language course must be at the 200-level. In addition, the department recommends students take 2 additional foreign language courses as free electives.**
The sociology minor is designed to give students specializing in other fields a broader knowledge of contemporary social issues and the ability to analyze them in a reasoned fashion. For students majoring in another area of the liberal arts, the minor offers the opportunity to place the issues raised in the major methodologies. For students majoring in such fields as business and engineering, the minor helps develop skills in critical thinking that go beyond the acquisition of specialized, professional techniques. For students majoring in another area of the liberal arts, the minor offers the opportunity to place the issues raised in the major discipline within a larger social context.

**Co-op/Career Opportunities**

An undergraduate degree in sociology is excellent preparation for law school, medical school, or for graduate work in such fields as sociology, history, gerontology, or political science.

Outside of academics, sociologists work in a wide variety of settings. Some serve as statistical analysts for market research firms, health care agencies, and government. Others are involved in urban planning, survey research, public relations, agency management, trend analysis, or criminal justice. There are sociologists of religion working for national church organizations, and sociologists specializing in gerontology who are engaged in research or administration for agencies concerned with the aged.

**Co-op Experiences**

Some recent co-op positions held by sociology students include the following:

- Human Resources Assistant, National Board of Medical Examiners ([http://www.nbme.org](http://www.nbme.org))
- Giving Corps Intern, Cradles to Crayons ([http://www.nbme.org](http://www.nbme.org))
- Organizing Internship, Food & Water Watch ([https://www.foodandwaterwatch.org](https://www.foodandwaterwatch.org))
- Marketing Intern, Stradley Ronon Stevens & Young LLP ([http://www.stradley.com](http://www.stradley.com))

Visit the Drexel Steinbright Career Development Center ([http://www.drexel.edu/scdc](http://www.drexel.edu/scdc)) page for more detailed information on co-op and post-graduate opportunities.

**Minor in Sociology**

The sociology minor is designed to give students specializing in other fields a broader knowledge of contemporary social issues and the ability to analyze them in a reasoned fashion. For students majoring in such fields as business and engineering, the minor helps develop skills in critical thinking that go beyond the acquisition of specialized, professional techniques. For students majoring in another area of the liberal arts, the minor offers the opportunity to place the issues raised in the major discipline within a larger social context.

**Please note:** No more than three courses that are required for a student’s major can count towards fulfilling requirements for the minor.

**Required Courses**

Select five of the following: **

**Total Credits** 24.0

- No more than three courses that are required for a student's major can count towards fulfilling requirements for the minor.
- Students must take at least three elective courses at the 300 or 400 level.

**Sociology Faculty**

Susan Bell, PhD *(Brandeis University)* Department Head, Sociology. Professor. The interaction between patient cultures and embodied health movements; changing culture and structure of biomedicine; the experience of illness, women's health, and narrative representations of the politics of cancer, medicine, and women's bodies.

Robert J. Brulle, PhD *(George Washington University)*. Professor. Environmental policy and politics, critical theory, marine risk, social movements, environmental sociology.

Jessica Cohen, PhD *(Bowling Green State University)*. Associate Teaching Professor. Family demography

Mary Ebeling, PhD *(University of Surrey)* Director, Women's and Gender Studies. Associate Professor. Science and technology studies; emerging technologies and biocapital; media and democratic cultures; radical social movements; sociology of markets; political sociology; and ethnographic methodologies.
Claire Herbert, PhD (University of Michigan). Assistant Professor. Urban sociology; Housing and homelessness; Criminology; Law and society; Poverty and inequality; Social change.

Kelly Joyce, PhD (Boston College) Director, Master’s Program in Science Technology & Society. Professor. Science, medicine and technology; aging and technology; qualitative science methods; healthcare and medicine.

Emmanuel F. Koku, PhD (University of Toronto). Associate Professor. Social network analysis; qualitative/quantitative research; medical sociology; social epidemiology; social demography; sociology of development; communication and information technology; community and urban sociology.

Nada Matta, PhD (New York University). Assistant Professor. Middle East Studies; political economy; social movements; gender studies; revolutions; inequality.

Elizabeth McGhee Hassrick, PhD (University of Chicago). Assistant Research Professor. Social network interventions that promote positive outcomes for people with ASD, their families and communities.

Kevin Moseby, PhD (University of California-San Diego). Assistant Teaching Professor. The social and cultural studies of biomedicine/health, particularly as those domains intersect with and through the institutions of race/sexuality/gender, social movements/community advocacy, HIV/AIDS, racial health disparities, science and technological studies, and Black Studies.

Jason Orne, PhD (University of Wisconsin-Madison). Assistant Professor. Urban and Community Sociology; Sexualities Studies; Qualitative Methodologies; Sociology of Race and Ethnicity; Social Psychology; Social Theory.

Mimi Sheller, PhD (New School for Social Research) Director, Center for Mobilities Research and Policy. Professor. Sustainable mobility and mobility justice: new cultures and infrastructures of travel, transport, mobile communication, and urbanism; Caribbean Studies: history, culture and political theory of the region, including intersections of race, ethnicity, gender, sexuality and class.

Diane Sicotte, PhD (Arizona State University). Associate Professor. Sociology of environmental injustice: inequalities in the citing of environmental hazards; community-based research in neighborhoods dealing with industrial hazards; sociology of the environment; urban sociology; social inequalities.

Kelly Underman, PhD (University of Illinois at Chicago). Assistant Professor. Medical education, the social construction of bodies and emotions, and the politics of scientific knowledge production.

Kevin Woodson, PhD, JD (Princeton University; Yale Law School). Associate Professor. Race and the legal profession; criminal procedure; civil rights law.

### The Louis Stein Minor in Judaic Studies

The Louis Stein Minor in Judaic Studies, housed within the College of Arts and Sciences, is designed to give students the opportunity to explore and understand the history, culture, politics, and religion of the Jewish people. Through interdisciplinary coursework and directed field study, students investigate the Jewish experience from both a contemporary and a historical perspective.

The Louis Stein Minor in Judaic Studies requires 24.0 credits: 11.0 from required courses, and 13.0 from electives. Students can apply a maximum of 6.0 credits toward the minor from field study under the supervision of the academic advisor.

### Program Requirements

** Minor electives: 13.0 credits **

#### Courses offered as electives have included:

- [JUDA 211](http://catalog.drexel.edu/search/?P=JUDA%20211) American Jewish Experience
- [JUDA 212](http://catalog.drexel.edu/search/?P=JUDA%20212) [WI](http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/judaicstudies) Contemporary Jewish Life
- [JUDA 213](http://catalog.drexel.edu/search/?P=JUDA%20213) Jewish Cultural Tapestry
- [JUDA 214](http://catalog.drexel.edu/search/?P=JUDA%20214) Language and Cultural Diversity in the USA
- [JUDA 215](http://catalog.drexel.edu/search/?P=JUDA%20215) Reconstructing History After Genocide
- [JUDA 216](http://catalog.drexel.edu/search/?P=JUDA%20216) Yiddish Literature and Culture
- [JUDA 280](http://catalog.drexel.edu/search/?P=JUDA%20280) Special Topics in Judaic Studies
- [JUDA 298](http://catalog.drexel.edu/search/?P=JUDA%20298) Field Work in Judaic Studies
- [JUDA 1299](http://catalog.drexel.edu/search/?P=JUDA%201299) Independent Study in Judaic Studies
- [ANTH 120](http://catalog.drexel.edu/search/?P=ANTH%20120) Biblical Archeology of Israel and Jordan
- [ANTH 380](http://catalog.drexel.edu/search/?P=ANTH%20380) Special Topics in Anthropology (When offered as Archeology of the Middle East)
- [HBRW 101](http://catalog.drexel.edu/search/?P=HBRW%20101) Introduction to Hebrew I
- [HBRW 102](http://catalog.drexel.edu/search/?P=HBRW%20102) Introduction to Hebrew II
- [HBRW 103](http://catalog.drexel.edu/search/?P=HBRW%20103) Introduction to Hebrew III
- [HBRW 201](http://catalog.drexel.edu/search/?P=HBRW%20201) Intermediate Hebrew IV
- [HBRW 202](http://catalog.drexel.edu/search/?P=HBRW%20202) Intermediate Hebrew V
• HBRW 203 Intermediate Hebrew VI (p. 385)
• ENGL 395 [WI (http://catalog.drexel.edu/undergraduate/collegeofartsandsciences/judaicstudies)] Special Studies in Literature (When offered as Jewish Women in Literature and History)
• ENGL 323 Literature and Other Arts (When offered as Holocaust Testimonies)
• ENGL 345 American Ethnic Literature (When offered as Jewish American Writers)
• ENGL 325 Topics as World Literature (When offered as Israeli Literature & Culture, or as Yiddish Literature & Culture)
• LANG 180 Special Topics in Languages (When offered as Yiddish Language I)
• LANG 180 Special Topics in Languages (When offered as Yiddish Language II)

**Additional Information**

For more information about the Louis Stein Minor in Judaic Studies, please contact:

Kathleen Carll
Associate Director
Judaic Studies Program

**About the College**

Drexel University’s College of Engineering has emphasized its strengths in engineering, science and technology to train students to become the leaders of the future. In little over a century, Drexel University has transformed itself into a large, comprehensive institution committed to excellence in education, research and service to the engineering society and to the broader community. Although much has changed, the original mission of the University still rings true today.

The College of Engineering offers students a diverse academic learning and research environment embodying the highest standards of knowledge
and preparing them to impact society’s greatest challenges. Through entrepreneurial risk-taking and exploration, students are encouraged to find innovative solutions that promote economic development and improve life.

In addition to the traditional engineering curriculum, the college offers Engineering Technology (p. 386) and Construction Management (p. 368).

Objectives of the traditional Undergraduate Engineering Program

The profession of engineering is concerned with turning the natural elements and energies to the service of mankind. The objectives of the undergraduate program in the College of Engineering (http://www.drexel.edu/coe) are:

- To offer an education that will give graduates the flexibility to adjust to future changes in technology
- To develop a sense of professionalism and entrepreneurship
- To provide a framework for concentrated study in a professional area

To implement those objectives the curricula of the College of Engineering are designed to provide a firm grounding in basic science and liberal arts, along with broad-based engineering sciences and professional engineering subjects.

Cooperative Education

In five-year cooperative programs, engineering majors spend a total of 12 terms in school and six terms on co-op assignment. Freshmen attend classes for three terms. During their sophomore, pre-junior, and junior years, students generally attend class for two terms and are assigned a cooperative employment position for two terms each year. Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

About the Traditional Engineering Curriculum

Degree Requirements

The degree of Bachelor of Science in the engineering specialties is comprised of academic work and six terms of co-op or engineering experience for the five-year program. For the four-year program, only two terms of co-op are required. Transfer students must complete a minimum of two terms of co-op or engineering experience in order to earn a cooperative engineering degree accredited by ABET (http://www.abet.org).

Engineering student must maintain an overall grade point average of 2.0 in all required courses in their major.

The Bachelor of Science in Engineering (BSE) program is a customizable undergraduate engineering degree offered in the College of Engineering. The program is designed for students who are seeking an interdisciplinary education rooted in engineering. The degree is structured so students achieve a strong foundation in science, math and engineering. Upper level engineering electives can be chosen to fit the student’s individual interests and career objectives. The BS in Engineering program allows the student to create their own engineering curriculum path with the assistance of their BSE advisors. The program is also flexible enough so that students can complete up to two minors in areas which may include but are not limited to environmental studies, finance, entrepreneurship, music, legal studies or pre-med. To learn more about the Bachelor of Science in Engineering program, please visit the Program Overview webpage (http://drexel.edu/engineering/areas-of-study/engineering/BSE/ProgramOverview).

Curricular Organization

Students in the traditional engineering programs study the same subjects during the three terms in the first year. During the two terms of the sophomore year, students begin taking department specific coursework.

The first five terms are devoted to those subjects that form the foundation of the engineering curriculum. Courses in the core engineering curriculum are organized and taught to provide an integrated view of the basic sciences and an introduction to the art of engineering through group projects that deal with open-ended problems characteristic of the practice of engineering. Students also learn to use the modern tools of engineering both on the computer and in the laboratory.

The college considers it essential that students entering the Drexel Engineering Curriculum be placed in courses that take advantage of their abilities and prior training. Student preparation level is determined by a review committee that evaluates the student’s high school record, standardized test scores, and placement tests administered during freshman orientation.

Students who demonstrate the preparation and skills to succeed in our integrated engineering calculus course immediately will be placed in the course starting in the fall term. Students who are not prepared for this sequence may participate in a special "pre-engineering" program before the fall term. These students may also have a modified fall schedule and may need summer school during the following summer.

In the second year, professional subjects are introduced, and all the first-level professional courses are completed by the junior year. The senior year in all curricula contains at least one elective sequence so that students can study some aspect of engineering more deeply. In addition, all curricula provide a design experience in the senior year. Recognizing the importance of general education studies in the education of an engineer, all curricula require that courses be taken in this area. These requirements are described in more detail in the General Education Requirements (http://drexel.edu/engineering/resources/undergraduate-advising/current-students/electives/general-ed-electives).

The Common Curriculum

While some programs vary in detail, the following courses are common to most engineering curricula. See each program for specifics.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GVVC 101</td>
<td>Introduction to Civic Engagement</td>

</tbody>
</table>
ENGR 101 Engineering Design Laboratory I 2.0
ENGR 102 Engineering Design Laboratory II 2.0
ENGR 103 Engineering Design Laboratory III 2.0
ENGR 121 Computation Lab I 2.0
ENGR 122 Computation Lab II 1.0
ENGR 201 Evaluation & Presentation of Experimental Data I 3.0
ENGR 202 Evaluation & Presentation of Experimental Data II 3.0
ENGR 210 Introduction to Thermodynamics 3.0
ENGR 220 Fundamentals of Materials 4.0
ENGR 231 Linear Engineering Systems 3.0
ENGR 232 Dynamic Engineering Systems 3.0

In addition, engineering students complete thirty (30.0) credits of General Education Requirements (p. 345).

Electives
In addition to the electives in the General Education electives there are two types of elective sequences in the engineering curricula: technical electives and free electives. Technical electives are courses in engineering, science, or management that build on the required professional courses and lead to a specific technical specialization. Possible elective sequences should be discussed with and approved by advisors before the end of the junior year. Free electives are any courses for which students are eligible and that are not remedial in nature for engineering students.

Writing-Intensive Course Requirements
In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program), (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

General Education Requirements
The General Education Program is designed to give engineering students an opportunity to take a set of courses that complement their technical studies and satisfy their intellectual and/or career interests. All engineering majors must take thirty (30.0) credits. Nine (9.0) of the thirty credits are designated as follows and must be completed by all majors:

ENGL 101 Composition and Rhetoric I: Inquiry and Exploratory Research 3.0
ENGL 102 Composition and Rhetoric II: Advanced Research and Evidence-Based Writing 3.0
ENGL 103 Composition and Rhetoric III: Themes and Genres 3.0

General Education requirements for specific majors can be found in the degree requirements for each major. The remaining credits can be chosen from the disciplines listed below.

Course Subjects
This following list is a sampling of subject codes for courses that can be taken to fulfill General Education requirements; other courses may be accepted upon advisor approval.

Accounting (ACCT), Africana Studies (AFAS), Anthropology (ANTH), Arabic (ARBC), Architecture (ARCH), Art History (ARTH), Business Law (BLAW), Chinese (CHIN), Communication (COMM), Criminology & Justice Studies (CJS), Culinary Arts (CULA), Dance (DANC), Economics (ECON), Education (EDUC), English (ENGL, except ENGL 101, ENGL 102, ENGL 103 & ENGL 105), Entertainment & Arts Management (EAM), Entrepreneurship (ENTP), Film Studies (FMST), Finance (FIN), French (FREN), General Business (BUSN), German (GER), Global Studies (GST), Hebrew (HBRW), History (HIST), Hotel & Restaurant Management (HRM), Humanities (HUM, except HUM 107 & HUM 108), Interior Design (INTR), International Business (INTB), Italian (ITAL), Japanese (JAPN), Judaic Studies (JUDA), Korean (KOR), Language (LANG), Leadership (LEAD), Management (MGMT), Marketing (MKTG), Military Science (MLSC), Music (MUSC), Music Industry Program (MIP), Operations Management (OPM), Operations Research (OPR), Organizational Behavior (ORGB), Philosophy (PHIL), Photography (PHTO), Product Design (PROD) Project Management (PROJ), Political Science (PSSCI), Psychology (PSY, except PSY 330 & PSY 337), Public Health (PBHL), Real Estate (REAL), Russian (RUS), Screenwriting & Playwriting (SCRP), Sociology (SOC, except SOC 364 & SOC 365), Spanish (SPAN), Sports Management (SMT), STEM Teacher Education (ESTM), Taxation (TAX), Theatre (THTR), Visual Studies (VSST), WEST Studies (WEST), Women's and Gender Studies (WGST), and Writing (WRIT).

General Education electives must be non-technical. All Computer, Math, Engineering & Science related courses will NOT count as General Education electives.

Special Programs
Accelerated Programs/ Bachelor's/Master's Dual Degree Program
The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum. Students enrolled in this program may take advantage of the five-year Bachelor's/Master’s Dual Degree Program described on the College of Engineering’s Accelerated Programs (http://drexel.edu/engineering/programs/undergraduate/accelerated-programs) web page.

Lincoln University/Drexel 3-3 Plan
Drexel participates in a program with Lincoln University under which a student may attend Lincoln University for three years, taking liberal arts subjects and pre-engineering courses in mathematics, science, and related areas; transfer to Drexel; and receive a degree in engineering after three additional years at Drexel. This is similar to the conventional
3-2 program in which other colleges and universities participate; the extra year is necessitated by Drexel's co-operative education plan.

Facilities

Core Engineering Facilities

The Freshman Engineering Design Laboratories are located in the newly-created Innovation Studio. The Studio hosts activities for all class levels from Freshman Design at one end through Senior Design at the other. It includes 3D printers, multiple sensor suites and the college machine shop representing the flow of freshman initial ideas through complex fabrication.

Freshman Design courses taken by all new freshmen are held exclusively in the Innovation Studio which was completed in the fall of 2015. A team of Drexel faculty and staff designed the studio to allow activities of many scales as well as to promote open communication within and across groups of students. The lab tables accommodate work in small and larger groups.

The Innovation Studios are an example of Drexel’s commitment to undergraduate education, but providing up-to-date, high-quality technology to facilitate the kind of experiential learning that keeps Drexel at the cutting edge.

Department Facilities

Departments within the College of Engineering have laboratory equipment appropriate for required lab coursework within curriculum. Most engineering department webpages describe their specialized facilities in detail.

Architectural Engineering

Major: Architectural Engineering

Degree Awarded: Bachelor of Science in Architectural Engineering (BSAE)

Calendar Type: Quarter

Total Credit Hours: 193.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 14.0401

Standard Occupational Classification (SOC) code: 11-9041

About the Program

The architectural engineering major prepares graduates for professional work in the analysis, design, construction, and operation of residential, commercial, institutional, and industrial buildings. The program develops engineers familiar with all aspects of safe and economical construction. Students study the principles of structural support and external cladding, building environmental systems, and project management and develop depth in at least one area.

The program integrates building disciplines, including coordination with architects, construction managers, civil, mechanical, and electrical engineers, and others. Students use computer-aided design tools to understand system interactions, perform analysis, design, scheduling, and cost analysis, and present their work.

The first two years of the curriculum cover fundamentals necessary for all engineers. The pre-junior and junior years emphasize building systems and the principles governing their performance. In addition to the core engineering and science, students learn architectural approaches through studio design. Seniors focus on either structural or building environmental systems design, as well as a full-year realistic design project. The academic program is complemented by exposure to professional practice in the co-op experience.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All architectural engineering students participate in a design project.

Mission Statement

The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives

Architectural engineering graduates will become professionals who analyze, design, construct, manage, or operate residential, commercial, institutional and industrial buildings and systems, or advance knowledge of the field.

Student Outcomes

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for architectural engineering practice.

Concentration Options

Mechanical Concentration (HVAC)

Students who choose the mechanical concentration (HVAC) prepare for careers dealing with the building environment. As co-ops and graduates,
they will be involved in the many design aspects of building environmental control, including:

- building load definitions
- equipment selection and design
- distribution system design
- control systems design
- energy analysis and system optimization
- building operation for safety, economy and maximum performance

### Structural Concentration

Students who choose the structural concentration prepare for careers dealing with the building structure. As co-ops and graduates, they will be involved in the design of the many aspects of building structure including:

- building load definitions
- structural system design
- foundation system design

### Digital Building Concentration

Students who choose the digital building concentration prepare for careers dealing with the role of computer technology in building design, construction and operation. As co-ops and graduates, they will be involved in:

- development and use of Building Information Models (BIM) and databases
- configuration and operation of building sensor and actuator networks and monitoring systems
- developing and maintaining construction schedules, databases and monitoring systems

### Additional Information

For more information about this major, contact the program director:

Michael Waring, PhD
Assistant Professor
Civil, Architectural & Environmental Engineering
msw59@drexel.edu

** Students are asked to speak with their program advisor before registering for the INFO elective.

Co-op/Career Opportunities
The major in architectural engineering prepares students for professional work in residential, commercial, institutional, and industrial building systems, in cooperation with architects and other engineers.

Sample Co-op Experiences
When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Project technician, major university: “Studied and surveyed existing buildings and facilities for: their compliance with the Americans with Disabilities Act, heating and air conditioning equipment sizing, electrical loads, and their planning and usage of space. Designed improvements from the field surveys taken, and developed construction drawings. Worked closely with the workforce in implementing these changes.”

CAD technician, private engineering firm: “Prepared computer generated construction plans for various water and sewer reconstruction projects. . . .Was able to expand my knowledge of Auto CAD to include Advanced Design Modules.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree
The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor’s Programs
A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Required Courses for Dual Degree in Civil Engineering
CIVE 430 Hydrology 3.0
CIVE 477 [WI] Seminar 2.0
Minor in Architectural Engineering

About the Minor

The minor in architectural engineering, designed to broaden the professional capabilities of students, offers the building systems portion of the architectural engineering curriculum with enough attention to structural components for completeness. Pursuing a minor in architectural engineering can be of interest to mechanical engineering students who wish to learn the application of HVAC systems within the building context; to civil engineering students who require knowledge of large-scale infrastructure systems; and to chemical engineering students who wish to understand the energy and distribution aspects of process plant design.

The minor consists of a minimum of 24.0 credits total, with five required core courses. Students take a minimum of eight additional credits taken from a list of optional courses.

While this minor is primarily designed to provide technical knowledge and skills to other engineers, with the appropriate prerequisites students from other disciplines—such as architecture—can also complete this minor.

Prerequisites

The common engineering core curriculum prerequisites are required of all students in the College of Engineering. Students from other colleges will need the appropriate background prerequisite courses in physics, mathematics and thermodynamics.

Facilities

The Department is well equipped with state-of-the-art facilities:

- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work).
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements.

Civil, Architectural and Environmental Engineering Faculty

Abieyuwa Aghayere, PhD (University of Alberta). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (University of Illinois at Urbana-Champaign) John Roebling Professor of Infrastructure Studies. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (University of California, San Diego). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (Drexel University). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (West Virginia University). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (University of Colorado) Graduate Studies Advisor.. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Extended-care facilities design, research on spatial visualization, perception and imagination.

Patricia Gallagher, PhD (Virginia Polytechnic Institute). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (Carnegie-Mellon University). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (University of Illinois-Urbana) L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.
Ahmad Hamid, PhD (McMaster University). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (Imperial College). Professor. Director, Center for Family Intervention Science, a multidisciplinary research program focused on developing and testing family centered care models across the life span and in a variety of health care settings. Developer of Attachment Based Family Therapy (ABFT) focused on youth with depression, suicide trauma, and youth in the LGBTQ community. Behavioral health integration into primary care.

Joseph B. Hughes, PhD (University of Iowa) Dean of the College of Engineering and Distinguished Professor. Biological processes and applications of nanotechnology in environmental systems.

L. James Lo, PhD (University of Texas at Austin). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (Drexel University). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (Colorado State University). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MAC (University of Pennsylvania) Associate Dean for Undergraduate Affairs. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (Cornell University). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Michael Ryan, PhD (Drexel University). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology.

Christopher Sales, PhD (University of California, Berkeley). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (Johns Hopkins University). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (Massachusetts Institute of Technology). Assistant Teaching Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (University of Toronto). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (University of Iowa). Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (University of Illinois). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (Cornell University). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Joseph V. Mullin, PhD (Pennsylvania State University) Associate Department Head. Professor Emeritus. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Richard Weggel, PhD (University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Certificate in Construction Management

Certificate Level: Undergraduate
Admission Requirements: High school diploma or GED
Certificate Type: Certificate
Number of Credits to Completion: 18.0 - 19.0
Instructional Delivery: Campus, Online
Calendar Type: Quarter
Expected Time to Completion: 1 year
Financial Aid Eligibility: Not aid eligible
Classification of Instructional Program (CIP) Code: 52.2001
Standard Occupational Classification (SOC) Code: 11-9021

Construction Management I - Fundamentals
18.0 quarter credits

The Construction Management I - Fundamentals Certificate introduces students to the basic concepts of the construction industry.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 368).
Construction Management

**Construction Management II - Construction Science**

*18.0 quarter credits*

The Construction Management II - Construction Science Certificate focuses on introducing students to design concepts relating to heating, ventilation, and air conditioning systems and the integration of these systems into the construction process. In addition, the certificate also covers the process of estimating as well as building codes involved in construction projects.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 368).

**Construction Management III - Management Concepts**

*19.0 quarter credits*

The Construction Management III - Management Concepts Certificate focuses on construction contracts, specifications, and practices with regard to business law and liability. The certificate also covers value engineering and construction planning, scheduling, network systems, as well as the communications required for project control and claims prevention.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 368).

**Construction Management IV - Customized Independent**

*18.0 quarter credits*

The Construction Management IV - Customized Independent Certificate is designed to allow students to choose the higher-level courses that best suit their special needs and interests. Students must select all six of their courses at the start of the Certificate program.

Students interested in continuing their education after certification are able to apply their coursework and credits directly to the Bachelor of Science in Construction Management (p. 368).

**Chemical Engineering**

**Major:** Chemical Engineering  
**Degree Awarded:** Bachelor of Science in Chemical Engineering (BSCHE)  
**Calendar Type:** Quarter  
**Total Credit Hours:** 184.0  
**Co-op Options:** Three Co-op (Five years); One Co-op (Four years)  
**Classification of Instructional Programs (CIP) code:** 14.0701  
**Standard Occupational Classification (SOC) code:** 17-2041

**About the Program**

The department of Chemical and Biological Engineering's chemical engineering curriculum progresses through sequences in the fundamental physical sciences, humanities, engineering sciences, and engineering design.

Chemical engineers are dedicated to designing devices and processes that convert input materials into more valuable products and often to designing those products themselves. Such end products include petrochemical derivatives, fine chemicals, pharmaceuticals, plastics, and other materials, integrated circuits, electrical energy, biologically derived fuels, and much more. Chemical engineering often begins with small laboratory scale processes that must be scaled up to production levels through carefully integrated design, optimization, economic, environmental and safety analyses.

The Department of Chemical and Biological Engineering is responsible for equipping our graduates with the broad technical knowledge and teamwork skills required for them to make substantial contributions to society.

**Sample Senior Design Projects**

A special feature of the major is senior design. A group of students in the chemical engineering major works with a faculty advisor to develop a significant design project. Some recent examples include:

- Design of a process to make petrochemical intermediates
- Plastics recycling design
- Process design for antibiotic products

**Program Educational Objectives**

The chemical engineering major has four goals for its students:
• Our graduates will succeed in careers requiring strong skills in engineering, science, communication, and teamwork.
• Our graduates will continue to upgrade their technological skills through life-long learning involving self- or group-study.
• Our graduates will conduct their work with an understanding of its global impact and ethical consequences.
• Our graduates will contribute to research and development at the forefront of chemical engineering and related fields.

To help students reach these goals, the curriculum is structured so that they progress through sequences in the fundamental physical sciences, humanities, engineering sciences, and design.

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for chemical engineering practice.

Additional Information
The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this program, visit Drexel University’s Department of Chemical and Biological Engineering (http://www.chemeng.drexel.edu) web page.

**Writing-Intensive Course Requirements**

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

**Sample Plan of Study**

**5 YR UG Co-op Concentration**
Some major employers of Drexel’s chemical engineering graduates are DuPont, Merck, BASF, ExxonMobil, Dow Chemical, and Air Products. A number of graduates go on to pursue master’s and/or doctoral degrees. Graduate schools that Drexel's chemical engineers have attended include architecture, engineering, medicine, business, environmental, and ecological disciplines. Some employers include chemical, pharmaceutical, and petroleum companies. When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

Research assistant, chemicals manufacturer: “Conducted research in a developmental polyamide process. Aspects included scale-up from bench-scale to batch demonstration, installation and calibration of on-line composition sensors, off-line analytical techniques to assess product quality, and interfacing with plant sites to define and standardize a critical quality lab procedure. Documented results in technical memos and in a plant presentation . . . I had a lot of freedom and responsibility. It was great interacting with other researchers and technicians. Everyone was so helpful.”

Co-op engineer, chemicals manufacturer: “Created material safety data sheets, which involved chemical composition, hazard communication, occupational safety and health, emergency response, and regulatory issues for numerous products and wastes. Handled domestic and international regulatory reviews. Determined hazardous waste reporting requirements, handling and disposal procedures. Evaluated toxicological and ecological data for assessment of hazard ratings. Provided input on product safety technical reports.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Facilities

The Department of Chemical and Biological Engineering occupies the 2nd, 3rd, and 4th floors of the Center for Automation Technology. Approximately 35,000 square feet (gross) are available for the department.

Two thousand square feet of laboratory facilities are designed for the pre-junior and junior year laboratory courses. Experiments in these laboratory courses focus on applying concepts in thermodynamics, fluid mechanics, heat and mass transfer, separations, and reaction engineering. Laboratory courses are run with class sizes of 18 students or less.

The department has two computer laboratories:

- The senior design laboratory features nine booths designed for team projects. Each booth contains a work station loaded with the latest process simulation software produced by Aspen, Simulation Sciences and HYSYS. Seniors use the room heavily during their Capstone design experience, although pre-junior courses in separations and transport also include projects requiring use of the process simulation software.
- A second computer lab contains over 30 individual work stations with general and engineering-specific software.

Many undergraduate students participate in research projects in faculty laboratories as part of independent study coursework or BS/MS thesis work. Chemical engineering faculty are engaged in a wide range of research activities in areas including energy and the environment, polymer science and engineering, biological engineering, and multi-scale modeling and process systems engineering. Further details can be found on the Department of Chemical and Biological Engineering’s Research Group (http://drexel.edu/cbe/research/groups) web page.

Dual/Accelerated Degree

Accelerated Program

The accelerated program of the College of Engineering provides opportunities for highly-talented and strongly-motivated students to progress toward their educational goals essentially at their own pace. Through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Bachelor’s/Master’s Dual Degree Program

Drexel offers a combined BS/MS degree program for our top engineering students who want to obtain both degrees in the same time period as most students obtain a Bachelor's degree. In chemical engineering, the course sequence for BS/MS students involves additional graduate courses and electives.
Chemical Engineering Faculty

Cameron F. Abrams, PhD (University of California, Berkeley). Department Head, Chemical and Biological Engineering. Associate Professor. Molecular simulations in biophysics and materials; HIV drug design and molecular virology; thermoset molecular modeling and design.

Nicolas Alvarez, PhD (Carnegie Mellon University). Assistant Professor. Photonic crystal defect chromatography; extensional rheology of polymer/polymer composites; surfactant/polymer transport to fluid and solid interfaces; aqueous lubrication; interfacial instabilities.

Jason Baxter, PhD (University of California, Santa Barbara). Professor. Solar cells; semiconductor nanomaterials and thin films; ultrafast spectroscopy.

Richard A. Cairncross, PhD (University of Minnesota). Associate Professor. Effects of microstructure on transport and properties of polymers; moisture transport and degradation on biodegradation on biodegradable polymers; production of biofuel.

Nily R. Dan, PhD (University of Minnesota). Associate Professor. Design of synthetic gene and drug carriers; design of polymeric drug carriers; metal cluster formation in polymeric matrices; colloidal absorption in patterned surfaces.

Aaron Fafarman, PhD (Stanford University). Assistant Professor. Photovoltaic energy conversion; solution-based semiconductor synthesis; colloidal nanocrystals; electrical and optical spectroscopies.

Vibha Kalra, PhD (Cornell University). Associate Professor. Nanomaterials for energy storage devices; electrospinning of nanofibers; in-situ spectroscopy to understand energy storage mechanisms; molecular dynamics simulations.

Kenneth K.S. Lau, PhD (Massachusetts Institute of Technology). Associate Professor. Polymer thin films and devices; solar cells, supercapacitors and batteries; superhydrophobic and superhydrophilic surfaces; surface science and engineering; chemical vapor deposition.

Raj Mutharasan, PhD (Drexel University) Frank A. Fletcher Professor. Biochemical engineering; cellular metabolism and bioreactors; biosensors.

Giuseppe R. Palmese, PhD (University of Delaware). Professor. Reacting polymer systems; nanostructured polymers; radiation processing of materials; composites and interfaces.

Joshua Snyder, PhD (Johns Hopkins University). Assistant Professor. Electrocatalysis (energy conversion/storage); heterogeneous catalysis corrosion (dealloying nanoporous metals); interfacial electrochemical phenomena in nanostructured materials; colloidal synthesis.

Masoud Soroursh, PhD (University of Michigan). Professor. Process systems engineering; polymer engineering.

John H. Speidel, BCHE, MCHE (University of Delaware; Illinois Institute of Technology). Teaching Professor. Chemical process safety; process design engineering; integrated case studies.

Maureen Tang, PhD (University of California, Berkeley). Assistant Professor. Electrochemistry and electrochemical engineering; lithium-ion and beyond-Li batteries; electrocatalysis; passivation and charge transport.

Michael Walters, PhD (Drexel University). Assistant Teaching Professor. Undergraduate laboratory.

Steven P. Wrenn, PhD (University of Delaware). Professor. Biological colloids; microbubbles; ultrasound in complex fluids with theranostic applications.

Emeritus Faculty

Civil Engineering

Major: Civil Engineering

Degree Awarded: Bachelor of Science in Civil Engineering (BSCIV)

Calendar Type: Quarter

Total Credit Hours: 190.5

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 14.0801

Standard Occupational Classification (SOC) code: 17-2051

About the Program

The civil engineering major prepares students in the fundamental principles necessary to practice this profession in any of its branches, including construction management, water resources, structural, transportation, environmental, geotechnical, and public facilities engineering.

Civil engineers are active in the planning, design, construction, research and development, operation, maintenance, and rehabilitation of large engineering systems. A particular focus is the reconstruction of the nation’s infrastructure through solutions that minimize the disruption of social and natural environments.

Civil engineering graduates are grounded in the fundamental principles necessary for the practice of this profession in any of its modern branches, including construction management, water resources engineering, structural engineering, geotechnical engineering, transportation engineering, and environmental engineering.

Seven of the required courses in the discipline include integral laboratories or field projects for both educational illustration and professional practice exposure.

Careful selection of the electives specified in the curriculum can lead to a wide variety of career objectives. For instance, students with an interest in water resources engineering may elect advanced courses in hydrology, ecology, and chemistry; select senior professional electives in the geotechnical and water resources areas; and choose appropriate topics for senior design and senior seminar. Seniors, with the approval of the department head, can elect certain graduate courses.

A special feature of the major is senior design. A group of students works with a faculty advisor to develop a significant design project selected by the group. All civil engineering students participate in a design project.

Mission Statement

The civil and architectural engineering faculty are responsible for delivering an outstanding curriculum that equips our graduates with the broad technical knowledge, design proficiency, professionalism, and
communications skills required for them to make substantial contributions to society and to enjoy rewarding careers.

Program Educational Objectives

Civil engineering graduates will become professionals who analyze, design, construct, manage or operate physical infrastructure and systems, or advance knowledge of the field.

Student Outcomes

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for civil engineering practice.

Additional Information

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

For more information about this major, contact the Department of Civil, Architectural and Environmental Engineering (http://cae.drexel.edu).

* General Education Requirements (p. 345).

** A sequence of three courses in a major area of study is required, with a total of six 3-credit professional electives.

Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student’s major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A “WI” next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing-Intensive Course Requirements.

Co-op/Career Opportunities

When students complete their co-op jobs, they are asked to write an overview of their experiences. These brief quotes are taken from some recent student reports:

* **Engineering construction inspector, state department of transportation:** Supervised daily activities involved in the roadway construction of the [interstate] bypass. Recorded daily visual inspection reports for soil subbase and materials placed on site. Aided senior roadway engineers in approving grade prior to asphalt placement. Used various instruments to check temperature and depths for asphalt placement. Took part in on-site discussions with contractor to clear up any daily construction problems that would hinder quality of construction.

* **Construction inspector, municipal department of public property:** "Inspected work performed by private contractors on city public works construction and rehabilitation projects for adherence to contract

Intensive Course List (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.
The Department is well equipped with state-of-the-art facilities.

Facilities
- The department computer labs are in operation: a computer-assisted design (CAD) and computerized instructional lab; and a graduate-level lab (advanced undergraduates can become involved in graduate-level work).
- External labs are used for surveying, building diagnostics, and surface and ground-water measurements.
- A $4.5-million instruction and research lab renovation was funded by the National Science Foundation, alumni, and corporations.

Environment co-op, chemicals manufacturer: “Compiled data and wrote monthly regulatory reports, in charge of hazardous waste management and small projects as needed. . . . I had my own responsibilities that had an impact on the entire company. Employer was really interested in my opinion and gave me a chance to demonstrate my abilities, but also knew when to step in. Everybody was willing to answer any questions I may have had.”

Visit the Drexel Steinbright Career Development Center (http://www.drexel.edu/scdc) page for more detailed information on co-op and post-graduate opportunities.

Dual/Accelerated Degree

Accelerated program
The Accelerated Program of the College of Engineering provides opportunities for highly talented and strongly motivated students to progress toward their educational goals essentially at their own pace. Primarily through advanced placement, credit by examination, flexibility of scheduling, and independent study, the program makes it possible to complete the undergraduate curriculum and initiate graduate study in less than the five years required by the standard curriculum.

Dual Degree Bachelor’s Programs
A student completing the Bachelor of Science degree program in architectural engineering may complete additional courses (specified by the department) to earn the Bachelor of Science degree in civil engineering. (The reverse is difficult because of prerequisites in the sequence of architectural studio design courses, which begins in the sophomore year.)

Civil Engineering students can also complete a dual degree with the Bachelor of Science in Environmental Engineering.

Bachelor’s/Master’s Dual Degree Program
Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information about this program, visit the Department’s BS/MS Dual Degree Program (http://www.drexel.edu/cae/academics/bs-environmental-engineering/Accelerated%20and%20Dual%20Degree%20Programs%20CAEE) web page.

Civil, Architectural and Environmental Engineering Faculty
Abieyuwa Aghayere, PhD (University of Alberta). Professor. Structural design - concrete, steel and wood; structural failure analysis; retrofitting of existing structures; new structural systems and materials; engineering education.

A. Emin Aktan, PhD (University of Illinois at Urbana-Champaign) John Roebling Professor of Infrastructure Studies. Professor. Structural engineering; health monitoring of large infrastructure systems; infrastructure evaluation; intelligent systems.

Ivan Bartoli, PhD (University of California, San Diego). Associate Professor. Non-destructive evaluation and structural health monitoring; dynamic identification, stress wave propagation modeling.

Robert Brehm, PhD (Drexel University). Associate Teaching Professor. International infrastructure delivery; response to natural catastrophes; risk assessment and mitigation strategies; project management techniques.

S.C. Jonathan Cheng, PhD (West Virginia University). Associate Professor. Soil mechanics; geosynthetics; probabilistic design; landfill containments; engineering education.

Peter DeCarlo, PhD (University of Colorado) Graduate Studies Advisor.. Associate Professor. Outdoor air quality, particulate matter size and composition instrumentation and measurements, source apportionment of ambient particulate matter, climate impacts of particulate matter.

Eugenia Ellis, RA, PhD (Virginia Polytechnic State University). Associate Professor. Soil mechanics; geoenvironmental; ground improvement; sustainability.

Patrick Gurian, PhD (Carnegie-Mellon University). Associate Professor. Risk analysis of environmental and infrastructure systems; novel adsorbent materials; environmental standard setting; Bayesian statistical modeling; community outreach and environmental health.

Charles N. Haas, PhD (University of Illinois-Urbana) L. D. Betz Professor and Department Head, Civil, Architectural and Environmental Engineering. Professor. Control of human exposures to and risk assessment of pathogenic organisms; water and waste treatment; homeland security.

Ahmad Hamid, PhD (McMaster University). Professor. Engineered masonry; seismic behavior, design and retrofit of masonry structures; development of new materials and building systems.

Y. Grace Hsuan, PhD (Imperial College). Professor. Director, Center for Family Intervention Science, a multidisciplinary research program focused on developing and testing family centered care models across the life span and in a variety of health care settings. Developer of Attachment Based Family Therapy (ABFT) focused on youth with depression, suicide trauma, and youth in the LGBTQ community. Behavioral health integration into primary care

Joseph B. Hughes, PhD (University of Iowa) Dean of the College of Engineering and Distinguished Professor. Biological processes and applications of nanotechnology in environmental systems.
L. James Lo, PhD (University of Texas at Austin). Assistant Professor. Computational Fluid Dynamics (CFD) and airflow simulation; Indoor Environmental Quality; Building control integration with building information management systems.

Roger Marino, PhD (Drexel University). Associate Teaching Professor. Fluid mechanics; water resources; engineering education; land development.

Joseph P. Martin, PhD (Colorado State University). Professor. Geotechnical and geoenvironmental engineering; hydrology; transportation; waste management.

James E. Mitchell, MArch (University of Pennsylvania) Associate Dean for Undergraduate Affairs. Professor. Architectural engineering design; building systems; engineering education.

Franco Montalto, PhD (Cornell University). Associate Professor. Effects of built infrastructure on societal water needs, ecohydrologic patterns and processes, ecological restoration, green design, water interventions.

Michael Ryan, PhD (Drexel University). Assistant Teaching Professor. Microbial Source Tracking (MST); Quantitative Microbial Risk Assessment (QMRA); Dynamic Engineering Systems Modeling; Molecular Microbial Biology; Environmental Statistics; Engineering Economics; Microbiology

Christopher Sales, PhD (University of California, Berkeley). Assistant Professor. Environmental microbiology and biotechnology; biodegradation of environmental contaminants; microbial processes for energy and resource recovery from waste.

Yared Shifferaw, PhD (Johns Hopkins University). Assistant Professor. Computational and experimental mechanics; structural stability; optimization; health monitoring and hazard mitigation; sustainable structures; emerging materials; thin-walled structures and metallic structures.

Kurt Sjoblom, PhD (Massachusetts Institute of Technology). Assistant Teaching Professor. Laboratory testing of geomaterials, geotechnical engineering, foundation engineering.

Sabrina Spatari, PhD (University of Toronto). Associate Professor. Research in industrial ecology; development and application of life cycle assessment (LCA) and material flow analysis (MFA) methods for guiding engineering and policy decisions; specific interest in biomass and bioenergy, biofuels, and urban infrastructure.

Robert Swan Associate Teaching Professor. Geotechnical and Geosynthetic Engineering; soil/geosynthetic interaction and performance; laboratory and field geotechnical/geosynthetic testing.

Michael Waring, PhD (University of Texas-Austin) Associate Department Head for Undergraduate Programs; Director of Architectural Engineering Program. Associate Professor. Indoor air quality and building sustainability; indoor particulate matter fate and transport; indoor chemistry and particle formation; secondary impacts of control technologies and strategies.

Jin Wen, PhD (University of Iowa). Professor. Architectural engineering; Building Energy Efficiency; Intelligent Building; Net-zero Building; and Indoor Air Quality.

Aspasia Zerva, PhD (University of Illinois). Professor. Earthquake engineering; mechanics; seismology; structural reliability; system identification; advanced computational computational methods in structural analysis.

Emeritus Faculty

Harry G. Harris, PhD (Cornell University). Professor Emeritus. Structural models; dynamics of structures, plates and shells; industrialized building construction.

Joseph V. Mullin, PhD (Pennsylvania State University) Associate Department Head. Professor Emeritus. Structural engineering; failure analysis; experimental stress analysis; construction materials; marine structures.

Richard Weggel, PhD (University of Illinois) Samuel S. Baxter Professor Emeritus; Civil and Environmental Engineering. Professor Emeritus. Coastal engineering; hydraulics engineering; hydrology.

Computer Engineering

Major: Computer Engineering

Degree Awarded: Bachelor of Science in Computer Engineering (BSCE)

Calendar Type: Quarter
Total Credit Hours: 192.0

Co-op Options: Three Co-op (Five years); One Co-op (Four years)

Classification of Instructional Programs (CIP) code: 14.0901

Standard Occupational Classification (SOC) code: 15-1132; 15-1133; 15-1143; 17-2031

About the Program

The major provides a broad focus on digital circuit design, computer hardware and organization, programming and computer software, algorithms, and networks.

Computer engineers design smaller, faster, and more reliable computers and digital systems, embed microprocessors in larger systems (e.g., anti-lock brake systems), work in theoretical issues in computing, use object-oriented programming languages, and design large-scale software systems and computer networks. Computer engineers may work in positions that apply computers in control systems, digital signal processing, telecommunications, and power systems, and may design very large-scale integration (VLSI) integrated circuits and systems.

The computer engineering degree program is designed to provide our students with breadth in engineering, the sciences, mathematics, and the humanities, as well as depth in both software and hardware disciplines appropriate for a computer engineer. It embodies the philosophy and style of the Drexel Engineering Curriculum, and will develop the student's design and analytical skills. In combination with the co-op experience, it opens to the student opportunities in engineering practice, advanced training in engineering or in other professions, and an entry to business and administration.

The computer engineering program's courses in ECE are supplemented with courses from the departments of Mathematics and Computer Science. Students gain the depth of knowledge of computer hardware and software essential for the computer engineer.
Mission Statement

The ECE Department at Drexel University (http://drexel.edu/ece) serves the public and the university community by providing superior career-integrated education in electrical and computer engineering; by conducting research in these fields, to generate new knowledge and technologies; and by promoting among all its constituents professionalism, social responsibility, civic engagement and leadership.

Program Educational Objectives

The Electrical and Computer Engineering Program Educational Objectives are such that its alumni, in their early years after graduation can:

1. Secure positions and continue as valued, creative, dependable, and proficient employees in a wide variety of fields and industries, in particular as electrical and computer engineers;
2. Succeed in graduate and professional studies, such as engineering, science, law, medicine and business;
3. Pursue professional development through lifelong learning opportunities for a successful and rewarding career;
4. Provide leadership in their profession, in their communities, and in the global society;
5. Contribute to their professional disciplines body of knowledge;
6. Function as responsible members of society with an awareness of the social and ethical ramifications of their work.

Student Outcomes

The department’s student outcomes reflect the skills and abilities that the curriculum is designed to provide to students by the time they graduate. These are:

a) an ability to apply knowledge of mathematics, science, and engineering;

b) an ability to design and conduct experiments, as well as to analyze and interpret data;

c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;

d) an ability to function on multidisciplinary teams;

e) an ability to identify, formulate, and solve engineering problems;

f) an understanding of professional and ethical responsibility;

g) an ability to communicate effectively;

h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues;

k) an ability to use the techniques, skills, and modern engineering tools necessary for computer engineering practice.

Additional Information

Additional information about the major is available on the ECE Department website (http://www.ece.drexel.edu/Undergraduate_Programs2.html).

For advising questions, please contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising).

Seven Computer Engineering Courses 21.0
Free Electives 11.5

Total Credits 192.0

* General Education Requirements (p. 345).

** In addition to completing 192.0 credits, students majoring in computer engineering student must have a 2.0 cumulative overall GPA and a 2.0 cumulative GPA in their Computer Engineering courses.

### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid “clustering” these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writing-intensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/centers/english-philosophy/university-writing-program/writing-intensive-courses) at the University Writing Program (http://drexel.edu/coas/academics/centers/english-philosophy/university-writing-program). (http://drexel.edu/coas/academics/centers/english-philosophy/university-writing-program/drexel-writing-center) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

required to complete one degree. For detailed information the student should contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising).

Bachelor's/Master's Dual Degree Program

Exceptional students can also pursue a master of science degree in the same period as the bachelor of science.

For more information on these and other options, visit the Department of Electrical and Computer Engineering BS/MS (http://drexel.edu/ece/academics/undergrad/bs-ms) page.

Minor in Computer Engineering

The computer engineering minor is designed to provide students from other computer-intensive majors—such as computer science or other engineering majors—with a foundation of knowledge in the hardware portion of computer systems.

Prerequisites

Minor prerequisites include ENGR 103 or CS 172 or ECE 203, ECEC 301 or CS 172, CS 260 and CS 265 are also recommended, and are required for some upper level ECEC courses. Courses taken to meet these requirements will not count toward the minor.

* Students should choose an additional 12 credits from 300- and/or 400-level Computer Engineering (ECEC) courses. All prerequisites must be satisfied.

Additional Information

Additional information about this minor is available on the ECE Department website (http://www.ece.drexel.edu/Undergraduate_Programs2.html).

For advising questions, please contact the ECE advisor (http://drexel.edu/ece/academics/undergrad/advising).

Facilities

Drexel University and the Electrical and Computer Engineering Department are nationally recognized for a strong history of developing innovative research. Research programs in the ECE Department prepare students for careers in research and development, and aim to endow graduates with the ability to identify, analyze, and address new technical and scientific challenges. The ECE Department is well equipped with state-of-the-art facilities in each of the following ECE Research laboratories:

Research Laboratories at the ECE Department

Adaptive Signal Processing and Information Theory Research Group

The Adaptive Signal Processing and Information Theory Research Group (http://www.ece.drexel.edu/walsh/aspitrg/home.html) conducts
research in the area of signal processing and information theory. Our main interests are belief/expectation propagation, turbo decoding and composite adaptive system theory. We are currently doing projects on the following topics:

i) Delay mitigating codes for network coded systems,
ii) Distributed estimation in sensor networks via expectation propagation,
iii) Turbo speaker identification,
iv) Performance and convergence of expectation propagation,
v) Investigating bounds for SINR performance of autocorrelation based channel shorteners.

**Bioimage Laboratory**

Uses computer gaming hardware for enhanced and affordable 3-D visualization, along with techniques from information theory and machine learning to combine the exquisite capabilities of the human visual system with computational sensing techniques for analyzing vast quantities of image sequence data.

**Data Fusion Laboratory**

The Data Fusion Laboratory investigates problems in multisensory detection and estimation, with applications in robotics, digital communications, radar, and target tracking. Among the projects in progress: computationally efficient parallel distributed detection architectures, data fusion for robot navigation, modulation recognition and RF scene analysis in time-varying environments, pattern recognition in biological data sequences and large arrays, and hardware realizations of data fusion architectures for target detection and target tracking.

**Drexel Network Modeling Laboratory**

The Drexel Network Modeling Laboratory investigates problems in the mathematical modeling of communication networks, with specific focus on wireless ad hoc networks, wireless sensor networks, and supporting guaranteed delivery service models on best effort and multipath routed networks. Typical methodologies employed in our research include mathematical modeling, computer simulation, and performance optimization, often with the end goal of obtaining meaningful insights into network design principles and fundamental performance tradeoffs.

**Drexel Power-Aware Computing Laboratory**

The Power-Aware Computing Lab (http://dpac.ece.drexel.edu) investigates methods to increase energy efficiency across the boundaries of circuits, architecture, and systems. Our recent accomplishments include the Sigil profiling tool, scalable modeling infrastructure for accelerator implementations, microarchitecture-aware VDD gating algorithms, an accelerator architecture for ultrasound imaging, evaluation of hardware reference counting, hardware and operating system support for power-agile computing, and memory systems for accelerator-based architectures.

**Drexel University Nuclear Engineering Education Laboratory**

The field of nuclear engineering encompasses a wide spectrum of occupations, including nuclear reactor design, medical imaging, homeland security, and oil exploration. The Drexel University Nuclear Engineering Education Laboratory (DUNEEL) provides fundamental hands on understanding for power plant design and radiation detection and analysis. Software based study for power plant design, as well as physical laboratory equipment for radiation detection, strengthen the underlying concepts used in nuclear engineering such that the student will comprehend and appreciate the basic concepts and terminology used in various nuclear engineering professions. Additionally, students use the laboratory to develop methods for delivering remote, live time radiation detection and analysis. The goal of DUNEEL is to prepare students for potential employment in the nuclear engineering arena.

**Drexel VLSI Laboratory**

The Drexel VLSI Laboratory (http://ece.drexel.edu/faculty/taskin/wiki/vsilab/index.php/Main_Page) investigates problems in the design, analysis, optimization and manufacturing of high performance (low power, high throughput) integrated circuits in contemporary CMOS and emerging technologies. Suited with industrial design tools for integrated circuits, simulation tools and measurement beds, the VLSI group is involved with digital and mixed-signal circuit design to verify the functionality of the discovered novel circuit and physical design principles. The Drexel VLSI laboratory develops design methodologies and automation tools in these areas, particularly in novel clocking techniques, featuring resonant clocking, and interconnects, featuring wireless interconnects.

**Drexel Wireless Systems Laboratory**

The Drexel Wireless Systems Laboratory (DWSL) contains an extensive suite of equipment for constructing, debugging, and testing prototype wireless communications systems. Major equipment within DWSL includes:

- three software defined radio network testbeds (HYDRA, USRP, and WARP) for rapidly prototyping radio, optical and ultrasonic communications systems,
- a TDK RF anechoic chamber and EMSCAN desktop antenna pattern measurement system,
- a materials printer and printed circuit board milling machine for fabricating conformal antennas and wireless protocol conformance testing equipment from Aeroflex.

The lab is also equipped with network analyzers, high speed signal generators, oscilloscopes, and spectrum analyzers as well as several Zigbee development platforms for rapidly prototyping sensor networks.

DWSL personnel also collaborate to create wearable, fabric based transceivers through collaboration with the Shima Seiki Haute Laboratory in the Drexel ExCITe Center. The knitting equipment at Drexel includes sixteen SDS-ONE APEX3 workstations and four state-of-the-art knitting machines. The workstations accurately simulate fabric construction and provide researchers and designers the opportunity to program, create and simulate textile prototypes, import CAD specifications of final products, and produce made-to-measure or mass-produced pieces on Shima Seiki knitting machines. For testing smart textiles for biomedical, DWSL personnel also have collaborators in the Center for Interdisciplinary Clinical Simulation and Practice (CICSP) in the Drexel College of Medicine which provides access to medical mannequin simulators.

**Ecological and Evolutionary Signal-processing and Informatics Laboratory**

The Ecological and Evolutionary Signal-processing and Informatics Laboratory (EESI) (http://www.ece.drexel.edu/gailr/EESI) seeks to solve problems in high-throughput genomics and engineer better solutions for biochemical applications. The lab's primary thrust is to enhance the use of high-throughput DNA sequencing technologies with pattern recognition and signal processing techniques. Applications include assessing the organism content of an environmental sample, recognizing/classifying potential and functional genes, inferring environmental factors and interspecies relationships, and inferring microbial evolutionary relationships...
from short-read DNA/RNA fragments. The lab also investigates higher-level biological systems such as modeling and controlling chemotaxis, the movement of cells.

**Electric Power Engineering Center**

This newly established facility makes possible state-of-the-art research in a wide variety of areas, ranging from detailed theoretical model study to experimental investigation in its high voltage laboratories. The mission is to advance and apply scientific and engineering knowledge associated with the generation, transmission, distribution, use, and conservation of electric power. In pursuing these goals, this center works with electric utilities, state and federal agencies, private industries, nonprofit organizations and other universities on a wide spectrum of projects. Research efforts, both theoretical and experimental, focus on the solution of those problems currently faced by the electric power industry. Advanced concepts for electric power generation are also under investigation to ensure that electric power needs will be met at the present and in the future.

**Electronic Design Automation Facility**

Industrial-grade electronic design automation software suite and integrated design environment for digital, analog and mixed-signal systems development. Field Programmable Gate Array (FPGA) development hardware. Most up-to-date FPGA/embedded system development hardware kits. Printed circuit board production facility. Also see Drexel VLSI Laboratory.

**Microwave-Photonics Device Laboratories**

The laboratory is equipped with test and measurement equipment for high-speed analog and digital electronics and fiber optic systems. The test equipment includes network analyzers from Agilent (100kHz-1.3 GHz and 45 MHz-40 GHz), and Anritsu (45 MHz-6 GHz); spectrum analyzers from Tektronix, HP, and Agilent with measurement capability of DC to 40 GHz and up to 90 GHz using external mixers; signal generators and communication channel modulators from HP, Rhode-Schwarz, Systron Donner, and Agilent; microwave power meter and sensor heads, assortment of passive and active microwave components up to 40 GHz; data pattern generator and BER tester up to 3Gb/s; optical spectrum analyzer from Anritsu and power meters from HP; single and multimode fiber optic based optical transmitter and receiver boards covering ITU channels at data rates up to 10Gb/s; passive optical components such as isolator, filter, couplers, optical connectors and fusion splicer; LPKF milling machine for fabrication of printed circuit boards; wire-bonding and Cascade probe stations; Intercontinental test fixtures for testing of MMIC circuits and solid-state transistors; state-of-the-art microwave and electromagnetic CAD packages such as Agilent ADS, ANSYS HFSS, and COMSOL multi-physics module.

**Music and Entertainment Technology Laboratory**

The Music and Entertainment Technology Laboratory (MET-lab) is devoted to research in digital media technologies that will shape the future of entertainment, especially in the areas of sound and music. We employ digital signal processing and machine learning to pursue novel applications in music information retrieval, music production and processing technology, and new music interfaces. The MET-lab is also heavily involved in outreach programs for K-12 students and hosts the Summer Music Technology program, a one-week learning experience for high school students. Lab facilities include a sound isolation booth for audio and music recording, a digital audio workstation running ProTools, two large multi-touch display interfaces of our own design, and a small computing cluster for distributed processing.

**NanoPhotonics+ Lab**

Our research is primarily in the area of nanophotonics with a focus on the nanoscale interaction of light with matter. Interests include: liquid crystal/polymer composites for gratings, lenses and HOEs; liquid crystal interactions with surfaces and in confined nanospaces; alternative energy generation through novel photon interactions; ink-jet printed conducting materials for RF and photonic applications; and the creation and development of smart textiles technologies including soft interconnects, sensors, and wireless implementations.

**Opto-Electro-Mechanical Laboratory**
