# College of Medicine: Graduate School of Biomedical Sciences and Professional Studies

#### Overview

Renowned for its innovative, student-centered educational programs, the Graduate School of Biomedical Sciences and Professional Studies in the College of Medicine at Drexel University provides regionally unique PhD and Master's level academic offerings that attract the brightest, most ambitious and entrepreneurial applicants. With a strong emphasis on job placement in different scientific and health related career fields as well as academic rigor to prepare students for medical and health-related professional schools, Drexel students are at the forefront of their selected disciplines and emerge as graduates as the next generation of leaders.

Today, there are approximately 900 students pursuing doctoral or master's degrees and certificates within the Graduate School in the College of Medicine.

The collaborative nature of the Graduate School in the College of Medicine with other Drexel schools, for example Engineering and the College of Arts and Sciences, provides students with a multidisciplinary advantage. Coupled with the solid foundation afforded by a Drexel education, the innovation-driven programs offer students a unique experience that prepares them well to launch their careers in their chosen field of study.

The Graduate School of Biomedical Sciences and Professional Studies is committed to supporting and promoting an academic success-network that propels the transition from training in different disciplines to becoming leaders in solving global problems.

More information is available on the Graduate School of Biomedical Sciences and Professional Studies (http://www.drexel.edu/medicine/ Academics/Graduate-School/) website.

#### Majors

- Academic Medicine (MS) (p. 5)
- Biochemistry of Health & Disease (MS) (p. 7)
- Biochemistry of Health & Disease (PhD) (p. 10)
- · Biomedical Studies (MS) (p. 13)
- Biomedicine and Business (MS) (p. 15)
- Biomedicine and Digital Media (MS) (p. 20)
- Biomedicine and Entrepreneurship (MS) (p. 25)
- Biomedicine and Law (MS) (p. 30)
- Biotechnology (MS) (p. 35)
- Cancer Biology (MS) (p. 37)
- Clinical Research for Health Professionals (MS) (p. 40)
- Clinical Research Organization & Management (MS) (p. 42)
- · Drexel Pathway to Medical School (MS) (p. 44)
- Drug Discovery and Development (MS) (p. 45)

- Histotechnology (MS) (p. 48)
- Immunology (MS) (p. 50)
- Infectious Disease (MS) (p. 54)
- Intensive Medical Sciences (MS) (p. 58)
- Interdisciplinary Health Sciences (MS) (p. 59)
- Laboratory Animal Science (MLAS) (p. 62)
- Medical Science (MS) (p. 65)
- Medical Science (MD/MS) (p. 67)
- Microbiology and Immunology (MS) (p. 68)
- Microbiology and Immunology (PhD) (p. 70)
- Molecular and Cell Biology and Genetics (MS) (p. 72)
- Molecular and Cell Biology and Genetics (PhD) (p. 76)
- Molecular Medicine (MS) (p. 78)
- Neuroscience (MS) (p. 81)
- Neuroscience (PhD) (p. 84)
- Pathologists' Assistant (MS) (p. 87)
- Pharmacology & Physiology (MS) (p. 89)
- Pharmacology & Physiology (PhD) (p. 92)

#### **Minors**

- Clinical Research and Organization Management (p. 95)
- Drug Discovery and Development (p. 96)
- Pre-veterinary (p. 96)

#### Certificates

- Clinical Research (p. 98)
- Drug Discovery and Development (p. 99)
- Human Lactation Consultant (p. 101)
- Molecular Basis of Cancer (p. 102)
- Pre-Medical, Evening Program (p. 104)
- Quantitative Principles for Clinical Research (p. 106)

#### **Mission Statement**

Drexel University College of Medicine excels and innovates in education, research, and delivery of compassionate care in our culture of diversity, spirited inquiry, collaboration, and opportunity.

#### About the College

The College of Medicine's main campus, Queen Lane, is in a suburbanlike setting in the East Falls section of Philadelphia. Additional facilities are located at the Center City campus, next to Hahnemann University Hospital. Our Pediatrics Department is at St. Christopher's Hospital for Children, and the Psychiatry Department is based at Friends Hospital. Students can receive clinical education at more than 20 affiliated hospitals and ambulatory sites chosen for their commitment to teaching as well as medical excellence. The College of Medicine is renowned for its innovative educational programs, enhanced by the use of technology that permeates all components of the curriculum.

The College's medical practice, Drexel Medicine®, is a patient-focused practice emphasizing quality, innovation and community service, and enhanced by physician involvement in the research and educational programs.

Collaborative projects leveraging Drexel University's technological expertise continue to push the frontiers of nanomedicine and

neuroengineering. The College of Medicine is a major regional center for spinal cord research, and has developed one of the leading centers for malaria study in the nation. Additionally, the College is home to a memory disorders center dedicated to ground-breaking research in Alzheimer's and related dementias.

Drexel University College of Medicine houses one of eight National Institute on Drug Abuse (NIDA) Centers of Excellence for Physician Information, one of 21 National Centers of Excellence in Women's Health designated by the Department of Health & Human Services, the Executive Leadership in Academic Medicine (ELAM) program, and the Archives and Special Collections on Women in Medicine. It has developed the largest HIV/AIDS primary care practice in the Mid-Atlantic region, with extensive NIH-funded research in prevention and therapeutic intervention. Faculty clinicians are highly respected in numerous other specialties, including cardiology and pain management.

#### **Facilities**

Drexel University College of Medicine (http://www.drexel.edu/medicine/) is a living laboratory, giving students a broad variety of hands-on experience, enhanced by clinical rotations in hospitals, practicums, and external research opportunities, depending on their program of study. Students in all programs benefit from the College's physical plant, which offers some of the most advanced facilities in biomedical, health sciences, and healthcare education. The Queen Lane campus is designed for the purpose of teaching basic sciences and clinical skills in lecture halls, classrooms, small group rooms and a variety of laboratories. The College of Medicine provides wireless Internet access to curricular resources from anywhere on campus. Computers, multimedia technology, and the Internet augment the information and skills students learn from classes, print materials, and on clinical rotations. College of Medicine faculty members have been leaders in developing interactive computer-based learning tools, ranging from biochemical exercises to simulated patients presenting ethical dilemmas. Comprehensive curriculum websites, streaming videos of lectures, and online slide atlases for histology and pathology are all available.

Some of the College's key facilities and their features include:

#### **Queen Lane Student Activities Center**

A 17,700-square-foot student activity center was completed in 2006 at the Queen Lane Campus. The Student Activities Center occupies 2 floors and houses a full line of exercise equipment, a bookstore, student government offices and flexible space for events and lectures. The facility is available to students, staff and groups.

#### **Queen Lane Medical Simulation Center**

The College opened a state-of-the-art simulation center for medical education in 2010. Part of a new 25,000-square-foot addition, the center allows students to learn in simulated operating room and patient room settings.

#### **Clinical Education Assessment Center**

Ten examination rooms with digital capture that simulate physicians' offices are linked to control and observation rooms for faculty. Students work with standardized patients to enhance their abilities in medical interviewing, physical examination skills, and patient counseling.

#### **Multidisciplinary Laboratories**

• Forty-two tables with microscopes for teaching neuroanatomy, microbiology, and pathology are available.

• Microscopes are equipped with a networked video system so that all students in a class can look at a single slide under the microscope through monitors on their lab tables or on a projection screen and can retrieve microscopic images via computer.

#### New College Building

The New College Building at the Center City Hahnemann campus is designed for the purpose of teaching basic and clinical sciences, with auditoriums, classrooms, laboratories and offices. The lecture halls are designed to accommodate a variety of educational methodologies, spanning from the basic lecture format to the enriched laboratory setting where courses such as Anatomy, Pathology, Microbiology, Histology and Applied Anatomic Pathology can be taught.

#### Libraries

Drexel University has four libraries (http://www.drexel.edu/medicine/ About/Libraries/) to serve the needs of students, faculty and staff. The collections of two libraries – one at Queen Lane and one at Center City – emphasize subjects relevant to the health sciences, with print resources distributed to meet the needs of the programs and departments at each campus, and free document delivery service between the locations.

Computers in the reference areas of each library, and the Microcomputer Centers, provide access to the Libraries' online catalog; to databases (indexes) including MEDLINE, CINAHL, and PsycINFO; to more than 2000 full-text electronic journals, and to online reference resources such as MD Consult and Harrison's Online. Full Internet access is provided for reference and research purposes.

All online resources (databases, electronic journals, etc.) are available to students, staff and faculty who are registered Library users, and can be accessed from off-campus locations. In addition to Internet access, computers in the Microcomputer Centers also provide a broad range of software including word processing, spreadsheet, communications, graphics, and statistics. Computer-assisted instruction and tutorials are available for many curricula-related topics. A plotter and scanner are also available at some locations.

The Library staff is dedicated to providing assistance to students and other library users through on-the-spot reference help, mediated literature searches, and instructional sessions. Guides are available online to help with the use of Library services and resources.

#### Videoconferencing

Drexel University College of Medicine makes extensive use of videoconferencing between Philadelphia campuses and clinical teaching sites, and the Sacramento campus. There are videoconferencing classrooms with split screen to allow for speakers in different locations.

#### Web-Based Instruction

Uses of web-based instruction range from providing a supplement to classroom instruction to teaching a whole course remotely. Many instructors post their syllabi on the web, distribute supplementary readings via the web, and set up electronic discussion lists for their students. Having students submit assignments electronically is common practice.

Unique faculty-developed tools, including doc.com, a web-based set of video encounters between physician and patient, help medical students improve their communication skills. DxR, a web-based patient simulation program, trains students in clinical reasoning; and MedEthEx provides an online series of exercises in medical ethics and communication. The recently implemented Web-OSCE, closely linked to doc.com, allows

medical trainees to interview standardized patients remotely and receive performance feedback.

# Academic Medicine

Major: Academic Medicine Degree Awarded: Master of Science Calendar Type: Semester Minimum Required Credits: 36.0 + research-based publication; Additional 25.0 credits for concentration in otolaryngology Classification of Instructional Programs (CIP) code: 51.1199 Standard Occupational Classification (SOC) code: 25-1071

Note: This program is currently not accepting students.

## About the Program

Exceptional residents often pursue scholarly activities in addition to fulfilling their other residency requirements. This program is designed for those residents who publish research and pursue scholarly activities in addition to their typical residency training, and who desire to pursue careers in clinical education in their field of interest.

Students pursuing an MS in Academic Medicine must designate a concentration. At this time the first available concentration is the field of otolaryngology.

The MS in Academic Medicine is designed to address topics of value to the academic physician, including training in leadership, education, ethics, professionalism, public health, health accreditation, statistics, bioepidemiology, research techniques, medical writing and editing, grant writing, research regulations, public speaking and academic health center management. These are topics typically important to educators, but not commonly covered in depth during residency training.

#### **Goals and Objectives**

The MS in academic medicine provides a structured pathway for physicians planning careers as clinical educators to acquire specialized knowledge and to demonstrate a special expertise in teaching. The objectives of the MS in Academic Medicine include:

- · Training young physicians to be skilled clinical educators;
- Providing students with core knowledge about academic medicine that is not included systematically in residency training programs;
- Encouraging research;
- · Exposing students to the process of supervising and mentoring research;
- · Encouraging life-long continued study of materials and methods for clinical education.

#### Examinations

All residents are required to take in-service training examinations annually. This is a national, standardized test provided for each clinical specialty. Performance at the 70th percentile or better in this examination is considered a passing grade for the MS. Alternatively, board certification would be sufficient to acknowledge that the student has mastered a body of knowledge suitable for the MS degree. Each clinical specialty has its own (very rigorous) requirements for board certification, supervised by the American Board of Medical Specialties.

# **Admission Requirements**

Applications are reviewed by the department in which the degree is offered (for example: otolaryngology - head and neck surgery).

Recommendations for acceptance are presented to the Biomedical Graduate Education Committee of the College of Medicine for final approval. The requirements for admission include but are not limited to:

- Enrollment in an ACGME approved residency program;
- Satisfactory completion of at least one year of residency;
- A letter of recommendation from the applicant's Department Chair or Program Director;
- · An interview in person;
- · Medical school transcript.

#### Additional Information

Visit the Office of Biomedical Graduate Studies Admissions website for more detailed information about applying to the program, including important application dates.

## **Degree Requirements**

A minimum of 36.0 semester credits are required with a B average or better. Thus, the course of study for the MS in Academic Medicine will be in addition to the standard curriculum for residents plus the requirement of a research-based, first authored publication.

#### **Research Requirements**

Each candidate for the MS will conduct a research project under the guidance of his/her advisory committee. In most cases this project will encompass clinical or bench research that will result in a first author publication in a peer-reviewed journal. (Case reports are not sufficient for fulfilling this requirement.) However if the student is involved in scholarly activity of another nature that is deemed sufficiently rigorous by the advisory committee, flexibility to recognize and accept other activities is intended. For example, such activities might include writing a book or developing the curriculum for a new academic program.

Total Credits		36.0
Additional didactic courses in	cluded in the Associated Residency Program	6.0
IDPT 600S	Thesis Defense (taken twice, each time for 9 credits)	18.0
IDPT 500S	Responsible Conduct of Research	2.0
ACMD 602S	Academic Medicine Thesis Research	4.0
ACMD 601S	Academic Medicine: Core Knowledge II	3.0
ACMD 600S	Academic Medicine: Core Knowledge I	3.0

**Total Credits** 

#### Required courses for concentration in Otolaryngology

#### 25.0 semester credits

OTO 600S	General Otolaryngology	3.0
OTO 601S	Otology	3.0
OTO 602S	Head and Neck Oncology	3.0
OTO 603S	Pediatric Otolaryngology, Introduction	3.0
OTO 604S	Journal Club in Otolaryngology	1.0
Select two Otolaryngology electives fr		6.0
OTO 605S	Laryngology – Voice, Introduction	
OTO 606S	Laryngology – Voice, Advanced	
OTO 607S	Laryngology - Swallowing	
OTO 608S	Temporal Bone Dissection	
OTO 609S	Neurotology	
OTO 610S	Audiology	
OTO 611S	Endocrine Surgery	
OTO 612S	Allergy and Immunology	
OTO 613S	Radiology of the Head and Neck	
OTO 614S	Pathology and Histology	
OTO 615S	Pediatric Otolaryngology, Advanced	
OTO 616S	Otolaryngology Practice	
OTO 617S	Research Methodology and Publication	
OTO 618S	Facial Plastic and Reconstructive Surgery	
OTO 619S	Sleep Disorders	
OTO 620S	Taste and Smell	
OTO 622S	Bronchoesophagology	
Select one Otolaryngology surgery ele	ctive from the following:	6.0
OTO 700S	General Otolaryngologic Surgery	
OTO 701S	Otologic Surgery	
OTO 702S	Head and Neck Oncologic Surgery	
OTO 700S	General Otolaryngologic Surgery	
OTO 703S	Pediatric Otolaryngologic Surgery	
OTO 704S	Neurotologic Surgery	
OTO 705S	Laryngologic Surgery	
OTO 706S	Rhinologic Surgery	
OTO 707S	Surgery of the Sinuses	
OTO 708S	Bronchoesophagology	
OTO 709S	Cosmetic Plastic and Reconstructive Surgery	

**Total Credits** 

#### Writing-Intensive Course Requirements

In order to graduate, all students must pass three writing-intensive courses after their freshman year. Two writing-intensive courses must be in a student's major. The third can be in any discipline. Students are advised to take one writing-intensive class each year, beginning with the sophomore year, and to avoid "clustering" these courses near the end of their matriculation. Transfer students need to meet with an academic advisor to review the number of writing-intensive courses required to graduate.

A "WI" next to a course in this catalog may indicate that this course can fulfill a writing-intensive requirement. For the most up-to-date list of writingintensive courses being offered, students should check the Writing Intensive Course List (http://drexel.edu/coas/academics/departments-centers/englishphilosophy/university-writing-program/writing-intensive-courses/) at the University Writing Program (http://drexel.edu/coas/academics/departmentscenters/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writing-program/). (http://drexel.edu/coas/academics/departments-centers/english-philosophy/university-writingprogram/drexel-writing-center/) Students scheduling their courses can also conduct a search for courses with the attribute "WI" to bring up a list of all writing-intensive courses available that term.

# **Biochemistry of Health & Disease**

Major: Biochemistry of Health and Disease Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 (non-thesis); 54.0 (thesis) Classification of Instructional Programs (CIP) code: 26.0210 Standard Occupational Classification (SOC) code: 19-1021

#### About the Program

The graduate program in Biochemistry of Health & Disease offers a challenging and broad-based curriculum of research and coursework leading to the MS or PhD degree (p. 10). The aim of the graduate program is to train the next generation of biomedical scientists in the theory and practice of biochemistry, biophysics and molecular biology, in an environment of experiential learning that fosters new discoveries in biomedical research. Graduate students will be challenged to become independent and critical thinkers, and prepared for the demands of scientific careers in industry, academia, and government. The themes of molecular structure, molecular mechanism, and molecular regulation are recurrent throughout the diverse research areas represented by the program faculty.

#### **Additional Information**

For more information, visit the College of Medicine's Biochemistry of Health and Disease program (https://drexel.edu/medicine/academics/graduate-school/biochemistry-of-health-and-disease/) website.

#### Admission Requirements

A minimum of two years of full-time study is required for an MS degree. This program is designed to prepare students for competitive industry jobs and for acceptance into PhD programs.

In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper.

Applicants may only apply to one program. All documents submitted by you or on your behalf in support of this application for admission to Drexel University become the property of the University, and will under no circumstances be released to you or any other party. Please note, an application fee of \$75 U.S. is required.

#### **Transcripts**

Provide official transcripts from all colleges and universities attended.

International students: If you have already graduated from your previous institution at the time of your application, please email your graduation certificate(s) attached as PDF or Microsoft Word documents to enroll@drexel.edu.

· International Transcript Evaluation (international applicants only)

Transcripts must be evaluated by the following agency for admittance into this program:

World Education Services, Inc. (WES) Bowling Green Station, PO Box 5087 New York, NY 10274-5087 212.966.6311 Applicants are responsible for supplying all necessary documentation and paying all necessary fees to have your transcripts evaluated by by WES. Please have the course-by-course evaluation sent to the mailing address listed below.

### **Standardized Test Scores**

Submit official Graduate Record Examination (GRE) test scores. Medical College Admission Test (MCAT) scores may be submitted in lieu of GRE scores. Electronic submission is preferred through our school code, 2194.

TOEFL scores are required for international applicants or applicants who earned a degree outside the U.S. IELTS scores may be submitted in lieu of TOEFL scores. Scores will be reviewed based on section scores and total scores.

#### Essay

Please write approximately 500 words explaining your reasons for pursuing a degree from Drexel; your short-term and long-term career plans; and how your background, experience, interest, and/or values, when combined with a Drexel degree, will enable you to pursue these goals successfully.

Submit your essay with your application or through the Discover Drexel portal after you submit your application.

#### Resume

Upload your résumé as part of your admission application or through the Discover Drexel Portal after you submit your application.

#### Letters of Recommendation

Three letters of recommendation are required. To electronically request recommendations, you must list your recommenders and their contact information on your application. We advise that you follow up with your recommenders to ensure they received your recommendation request — they may need to check their junk mail folder. Additionally, it is your responsibility to confirm that your recommenders will submit letters by your application deadline and follow up with recommenders their recommendations.

Request recommendations with your application or through the Discover Drexel portal after you submit your application.

#### Math Science GPA Form

Complete your Math Science GPA form through the Discover Drexel portal after you submit your application.

# **Biochemistry of Health & Disease PhD**

Major: Biochemistry of Health and Disease Degree Awarded: Doctor of Philosophy (PhD) Calendar Type: Semester Minimum Required Credits: 131.0 Classification of Instructional Programs (CIP) code: 26.0210 Standard Occupational Classification (SOC) code: 19-1021

## About the Program

The graduate program in Biochemistry of Health & Disease offers a challenging and broad-based curriculum of research and coursework leading to the PhD degree. The aim of the graduate program is to train the next generation of biomedical scientists in the theory and practice of biochemistry, biophysics and molecular biology, in an environment of experiential learning that fosters new discoveries in biomedical research. Graduate students will be challenged to become independent and critical thinkers, and prepared for the demands of scientific careers in industry, academia, and government. The themes of molecular structure, molecular mechanism, and molecular regulation are recurrent throughout the diverse research areas represented by the program faculty.

This program is research intensive, with the ultimate goal of training students to become leaders of scientific research in academics and industry. Graduates are well-rounded, independent scientists qualified to pursue careers in research in universities, the pharmaceutical and biotech industries, and government. In addition, PhD scientists may choose future careers in college teaching, research administration, science policy, or patent law.

#### **Additional Information**

For more information, visit the College of Medicine's Biochemistry of Health and Disease program (https://drexel.edu/medicine/academics/graduate-school/biochemistry-of-health-and-disease/) website.

### **Admission Requirements**

All documents submitted by you or on your behalf in support of this application for admission to Drexel University become the property of the University, and will under no circumstances be released to you or any other party. Please note, an application fee of \$75 U.S. is required.

#### Transcripts

Provide official transcripts from all colleges and universities attended.

International students: If you have already graduated from your previous institution at the time of your application, please email your graduation certificate(s) attached as PDF or Microsoft Word documents to enroll@drexel.edu.

#### International Transcript Evaluation (international applicants only)

Transcripts must be evaluated by the following agency for admittance into this program:

World Education Services, Inc. (WES) Bowling Green Station, PO Box 5087 New York, NY 10274-5087 212.966.6311

Applicants are responsible for supplying all necessary documentation and paying all necessary fees to have your transcripts evaluated by by WES. Please have the course-by-course evaluation sent to the mailing address listed below.

#### Essay

Please write approximately 500 words explaining your reasons for pursuing a degree from Drexel; your short-term and long-term career plans; and how your background, experience, interest, and/or values, when combined with a Drexel degree, will enable you to pursue these goals successfully.

Submit your essay with your application or through the Discover Drexel (https://discover.drexel.edu/secure/login/) portal after you submit your application.

#### Resume

Upload your résumé as part of your admission application or through the Discover Drexel (https://discover.drexel.edu/secure/login/) portal after you submit your application.

#### Letters of Recommendation

Three letters of recommendation are required. To electronically request recommendations, you must list your recommenders and their contact information on your application. We advise that you follow up with your recommenders to ensure they received your recommendation request — they may need to check their junk mail folder. Additionally, it is your responsibility to confirm that your recommenders will submit letters by your application deadline and follow up with recommenders their recommendations.

Request recommendations with your application or through the Discover Drexel (https://discover.drexel.edu/secure/login/) portal after you submit your application.

#### Math Science GPA Form

Complete your Math Science GPA form through the Discover Drexel (https://discover.drexel.edu/secure/login/) portal after you submit your application.

#### **Degree Requirements**

Required Courses		
BIOC 502S	Biochemistry 1st Lab Rotation	4.0
BIOC 503S	Biochemistry 2nd Lab Rotation	4.0
BIOC 504S	Biochemistry 3rd Lab Rotation	4.0
BIOC 506S	Biochemistry Journal Club *	9.0

# **Biomedical Studies**

Major: Biomedical Studies Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 51.0 graduate, 28.0 undergraduate Classification of Instructional Programs (CIP) code: 26.0102 Standard Occupational Classification (SOC) code: 19-1042

## About the Program

This two-year special master's degree program is designed for students who have completed all health professional school prerequisites and need to strengthen their science background and MCAT score before applying to medical or other health professional schools.

In the first year, students take advanced undergraduate courses in physics and chemistry, graduate courses in biochemistry, physiology, anatomy, psychology/sociology, laboratory techniques, a community outreach course, and a year-long dedicated MCAT preparation course. Students transition into the second year of the program after passing all courses with a minimum cumulative graduate GPA of 3.0, sitting for the MCAT, and completing a summer research project. Students typically submit their medical school applications during the summer between year one and year two. During the second year, students take rigorous coursework in biochemistry, physiology, microanatomy, and neuroanatomy, utilizing the medical-school-equivalent lectures and laboratory materials of the IMS curriculum (p. 58), complemented by an ethics and a professionalism course.

The Master of Science degree will be awarded contingent upon satisfactory completion of all program requirements, including a minimum cumulative graduate GPA of 3.0.

#### **Additional Information**

Drexel University College of Medicine Division of Pre-Medical and Pre-Health Programs Graduate School of Biomedical Sciences and Professional Studies New College Building, Room 4104 245 North 15th Street, Mail Stop 344 Philadelphia, PA 19102

Phone: 215-762-4692 Email: CoM\_MedicalSciences@drexel.edu

For more information about this program, visit the College of Medicine's Master of Science in Biomedical Studies (http://drexel.edu/medicine/academics/ graduate-school/biomedical-studies/) webpage.

## **Admission Requirements**

Applicants to the MBS program must have fulfilled all undergraduate pre-medical requirements and demonstrated mastery of the material at a minimum grade of C. These requirements include a year of biology, chemistry, physics, and organic chemistry, including respective laboratory sections. Applicants are required to submit official MCAT scores if the exam was taken or official GRE scores in lieu of the MCAT. The following credentials are competitive for application to the MBS program:

- A minimum undergraduate math/science (BCPM) and cumulative GPA of 2.9
- All premedical prerequisite courses at a grade of C or better
- · Minimum MCAT scores of 35th percentile or minimum GRE scores of 50th percentile

Applicants with lower scores may be considered if they can demonstrate a marked improvement in their academic history. Healthcare-related experiences, community service, research, leadership, and extracurricular activities are also taken into consideration.

#### **Degree Requirements**

Required Undergraduate Courses		
MSPP 400S	Advanced Topics in Chemistry I	4.0
MSPP 401S	Advanced Topics in Chemistry II	4.0
MSPP 402S	Advanced Topics in Physics I	4.0

# **Biomedicine and Business**

Major: Biomedicine and Business Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 11-1021

#### About the Program

#### **Mission Statement**

The online MS in Biomedicine and Business degree program provides comprehensive training in fundamental aspects of scientific discovery, technology commercialization, and business. The program prepares graduates for management positions in scientifically oriented organizations in the public or private sector (e.g., biotechnology and pharmaceutical industry, academics, government, and non-profit organizations). Students develop broad core knowledge in biological sciences and biomedical technology development and commercialization plus finance, economics, and organizational leadership.

#### Curriculum

This is an interdisciplinary program offered by the College of Medicine. The science courses are taught by faculty from Drexel University College of Medicine. Faculty from Drexel University's LeBow College of Business teach the business courses.

- Non-thesis program (36.0 semester credits are needed to graduate)
- · Required and elective courses in each discipline
- · Flexible internship elective (experiential learning)
- · Customizable plan of study

#### Format

- · Online (select courses in both disciplines are offered face to face on campus)
- · New students admitted each fall and spring semesters
- · Classes taught throughout the year (fall, spring, and summer)
- · Accelerated: 1-year MS (full-time) or 1.5 years (part-time)

#### **Full-Time and Part-Time Options**

Students may meet the degree requirements on either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in one year. Part-time students must complete the program within four years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (https://drexel.edu/ drexelcentral/).

#### **Additional Information**

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Business webpage (https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/).

For information regarding financial aid, please visit Drexel Central (https://drexel.edu/drexelcentral/).

## **Admission Requirements**

New students are admitted every fall and spring semester.

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required. A minimum cumulative grade point average (GPA) of 3.0 is strongly preferred.

#### 16 Biomedicine and Business

Applicants must also fulfill the following requirements for consideration:

- · Official transcripts from all colleges and universities attended
- · Essay/personal statement
- Resume
- · References from at least three instructors or professionals

Official test scores from graduate and professional admission exams, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT), are optional but highly desirable.

Three letters of recommendation are required. If you received your degree within the last five years, it is strongly recommended that at least one letter of recommendation be provided by someone familiar with your academic qualifications and potential (e.g., your undergraduate advisor, a course instructor, or your research mentor). If you are requesting a letter from someone at your place of employment, the recommendation should be provided by a supervisor (or another more senior manager) with direct knowledge of your work and should address your scientific aptitude as well as your work ethic.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores.

- · TOEFL score needs to be at least 90 with at least a 27 in both the reading and writing sections
- · IELTS score needs to be above 7

An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

Certain visa types do not permit individuals to enroll in online or hybrid programs. Foreign applicants should check with their visa sponsors for eligibility. Drexel University cannot sponsor F-1 or J1 visas for individuals interested in online, hybrid, or part-time programs.

Online applications (https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply) are accepted all year round for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

#### **Additional Information**

For more information, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

#### **Degree Requirements**

Science courses are offered by Drexel University College of Medicine and are taught in **semester terms** (fall, spring and summer). Business courses are offered by LeBow College of Business and are taught face to face in **quarter terms** (fall and winter quarters only).

Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program requires the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

There are several ways to customize the internship or experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal needs and career aspirations. The duration of the internship may vary. Shorter rotations may require that the student enrolls in elective courses to meet the semester credit requirements for the degree.

Required Courses		
Science		
MIIM 503S	Biomedical Ethics	2.0
or IDPT 500S	Responsible Conduct of Research	
MIIM 518S	Foundations of Applied Biomedicine *	3.0

LIVE 001 The Statup way, now to Drive innovation in Entrepreneurial Companies		
	LNIF VOI	

\*

- \*\* Substitutions: MIIM 525S and MIIM 536S
- \*\*\* Science courses are offered on a semester basis; business and entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap. Credits shown for business and entrepreneurship courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science, business and entrepreneurship courses.

#### **Additional Information**

For more information, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

First Year			

**Total Credits 42** 

\* This is a full-time plan with # 9.0 semester credits/semester. Business and entrepreneurship courses are listed in quarter credits, since they are offered in quarter terms (overlap with semester terms). However, 2.0 semester credits will be awarded for 3.0 quarter credits completed. To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine. Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 4 terms (1 year), completing 3-4 courses per term, all terms are eligible for financial aid. The first term can be part-time (8 credits) and still meet the 36 semester credit requirement for graduation.

Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another

Drexel College or School. Students graduate after 5 terms (1.5 years), completing 3-4 courses per term, all terms are eligible for financial aid.

#### Additional Information

To learn more about part-time options, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# **Program Goals**

Upon completion of the degree requirements of this program, students would have achieved the following program-level goals:

- Develop core knowledge in biological sciences, technology development, and commercialization
- · Gain understanding of finance, economics, management, and organization leadership
- · Apply business expertise to evaluate the process of delivering biomedical products to market
- Develop skills to identify and evaluate professional ethical dilemmas and appropriate solutions
- Strengthen communication, leadership, and soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, and networking)

#### **Drexel Student Learning Priorities (DSLPs)**

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (http://drexel.edu/provost/assessment/outcomes/dslp/) to help them build their future:

#### Core Intellectual and Practical Skills:

- Communication
- · Creative and critical thinking
- Ethical reasoning
- Information literacy
- · Self-directed learning

#### **Experiential and Applied Learning:**

- · Global competence
- Leadership
- Professional practice
- · Research, scholarship, and creative expression
- Responsible citizenship

#### **Additional Information**

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# **Biomedicine and Digital Media**

Major: Biomedicine and Digital Media Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 27-1014

## About the Program

The MS in Biomedicine and Digital Media is an online program that intersects science, technology, entrepreneurship, and interactive digital art design and animation. This skills-based program is for individuals interested in media design and production careers with an emphasis in health and science.

Graduates of this program will be prepared to progress into more advanced graduate studies in science or digital media and/or careers in scientifically oriented media/communication jobs in the public or private sector (e.g., academic, scientific publishing and media companies), or lead their new ventures in digital imaging.

#### Curriculum

This is an interdisciplinary online program offered by the College of Medicine. The science courses are taught by faculty from Drexel University's College of Media Arts and Design teach the digital media courses. Students must complete a minimum of 36.0 semester credits to graduate.

- · Non-thesis program (36.0 semester credits are needed to graduate)
- · Required and elective courses in each discipline
- · Flexible internship elective (experiential learning)
- Customizable plan of study

#### Format

- Online
- · New students admitted each fall and spring semesters
- · Classes taught throughout the year (fall, spring, and summer)
- · Accelerated: 1-year MS (full-time) or 1.5 years (part-time)

#### **Full-Time and Part-Time Options**

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in one year. Part-time students must complete the program within four years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (http://www.drexel.edu/ drexelcentral/).

#### **Additional Information**

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

#### **Admission Requirements**

New students are admitted every fall and spring semester.

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required. Although a minimum cumulative grade point average (GPA) of 3.0 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

Applicants must also fulfill the following requirements for consideration:

- · Official transcripts from all colleges and universities attended
- · Essay/personal statement
- Resume
- · References from at least three instructors or professionals

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

Three letters of recommendation are required. If you received your degree within the last five years, it is strongly recommended that at least one letter of recommendation be provided by someone familiar with your academic qualifications and potential (e.g., your undergraduate advisor, a course instructor, or your research mentor). If you are requesting a letter from someone at your place of employment, the recommendation should be provided by a supervisor (or another more senior manager) with direct knowledge of your work and should address your scientific aptitude as well as your work ethic.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

- · TOEFL score needs to be at least 90 with at least a 27 in both the reading and writing sections
- · IELTS score needs to be above 7

Certain visa types do not permit individuals to enroll in online or hybrid programs. Foreign applicants should check with their visa sponsors for eligibility. Drexel University cannot sponsor F-1 or J1 visas for individuals interested in online, hybrid, or part-time programs.

Online applications (https://online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-business/#apply) are accepted all year-round for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

#### **Additional Information**

For questions about the curriculum and program goals, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Digital Media webpage (https://www.online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-digitalmedia/).

For information regarding financial aid, please visit Drexel Central (http://www.drexel.edu/drexelcentral/).

#### **Degree Requirements**

Science courses are offered by Drexel University College of Medicine and are taught in **semester terms** (fall and spring). Digital Media courses are offered by Westphal College of Media Arts & Design and are taught in **quarter terms** (fall, winter, spring, and summer).

Three (3.0) credit quarter courses confer the equivalent of 2.0 semester credits. The program required the completion of 36.0 semester credits for graduation. Semesters and quarters overlap sufficiently to allow full-time students to meet the degree requirements for this program in two years.

There are several ways to customize the internship or experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal needs and career aspirations. The duration of the internship may vary. Shorter rotations may require that the student enrolls in elective courses to meet the semester credit requirements for the degree.

However, 2.0 semester credits will be awarded for 3.0 quarter credits completed. To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine. Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 5 terms (1.5 years), completing 2-3 courses per term, all terms are eligible for financial aid

#### **Additional Information**

To learn more about part-time options, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# **Program Goals**

Upon completion of the degree requirements of this program students would have developed:

- A broad core knowledge in interactive digital media development for application in biomedical science and innovative technologies
- · More in-depth analytical, research, and critical thinking skills applicable to the process of biomedical technology development
- · Skills to identify professional ethical dilemmas and evaluate appropriate solutions
- · Graduate-level communication and leadership skills
- · Additional professional soft skills (e.g., teamwork, problem-solving, knowledge of career opportunities, networking)

#### **Drexel Student Learning Priorities (DSLPs)**

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (https://drexel.edu/provost/assessment/outcomes/dslp/) to help them build their future:

#### Core Intellectual and Practical Skills:

- Communication
- · Creative and critical thinking
- · Ethical reasoning
- Information literacy
- Self-directed learning

#### **Experiential and Applied Learning:**

- · Global competence
- · Leadership
- Professional practice
- · Research, scholarship, and creative expression
- Responsible citizenship

#### Additional Information

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# **Biomedicine and Entrepreneurship**

Major: Biomedicine and Entrepreneurship Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 19-1020

#### **About the Program**

#### **Mission Statement**

The online MS in Biomedicine and Entrepreneurship program integrates training in technical and practical aspects of science, research, and entrepreneurship for individuals interested in pursuing innovation-driven careers in the life sciences. The program helps develop individual initiative and entrepreneurial thinking around scientific discoveries and innovation. The program is designed to facilitate not only new venture creation but also individual initiative and entrepreneurial thinking.

Graduates of the program will be prepared to progress into more advanced graduate studies in science or entrepreneurship and/or careers in scientifically oriented management jobs in the public or private sector. These graduates will especially be equipped to lead or have top management roles in new biomedical or life sciences ventures.

#### Curriculum

This is an interdisciplinary online program offered by the College of Medicine. The science courses, which are offered online, are taught by faculty from Drexel University College of Medicine. Drexel University's Charles D. Close School of Entrepreneurship (http://drexel.edu/close/) teach the entrepreneurship courses.

- · Non-thesis program (36.0 semester credits needed to graduate)
- · Required and elective courses in each discipline
- · Flexible optional internship (experiential learning)
- · Customizable plan of study

#### Format

- · Online (select courses in both disciplines are offered face to face on-campus)
- · New students admitted each fall and spring semesters
- Classes taught throughout the year (fall, spring, and summer)
- · Accelerated: 1-year MS (full-time) or 1.5 years (part-time)

#### **Full-Time and Part-time Options**

Students may meet the degree requirements on either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in one year. Part-time students must complete the program within four years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (https://drexel.edu/ drexelcentral/).

#### **Additional Information**

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu or visit the Drexel University Online MS in Biomedicine and Entrepreneurship webpage (https://www.online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicineentrepreneurship/).

## **Admission Requirements**

New students are admitted every fall and spring semester.

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required; although a minimum cumulative grade point average (GPA) of 3.0 is strongly preferred.

Applicants must also fulfill the following requirements for consideration:

- · Official transcripts from all colleges and universities attended
- Official test scores from graduate and professional admission exams are highly desirable, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT)
- · References from at least three instructors or professionals

Official test scores from graduate and professional admission exams, such as the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), Law School Admission Test (LSAT), or Medical College Admission Test (MCAT), are optional but highly desirable.

Three letters of recommendation are required. If you received your degree within the last five years, it is strongly recommended that at least one letter of recommendation be provided by someone familiar with your academic qualifications and potential (e.g., your undergraduate advisor, a course instructor, or your research mentor). If you are requesting a letter from someone at your place of employment, the recommendation should be provided by a supervisor (or another more senior manager) with direct knowledge of your work and should address your scientific aptitude as well as your work ethic.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

- TOEFL score needs to be at least 90 with at least a 27 in both the reading and writing sections.
- · IELTS score needs to be above 7

Certain visa types do not permit individuals to enroll in online or hybrid programs. Foreign applicants should check with their visa sponsors for eligibility. Drexel University cannot sponsor F-1 or J1 visas for individuals interested in online, hybrid, or part-time programs.

Online applications (https://www.online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-entrepreneurship/#apply) are accepted all yearround for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

#### **Additional Information**

\* Substitutions: MIIM 515S and MIIM 516S OR MIIM 530S OR MIIM 531S
 \*\* Science courses are offered on a semester basis: entrepreneurship course

Science courses are offered on a semester basis; entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap.
 Credits shown for ENTP courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science and entrepreneurship courses.

#### **Additional Information**

For more information, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

#### Sample Plans of Study

These are samples of customizable plans of study. Variations may occur depending on course availability and each student's interest.

## Full-Time, Fall Start

-- -----

First Year			
Fall	Credits Spring	Credits Summer	Credits
Required Course(s)	Required Course(s)	Elective Course(s)	
MIIM 518S	3.0 MIIM 519S	3.0 MIIM 605S	2.0-6.0
Elective Course(s)	MIIM 503S or IDPT 500S	2.0 MIIM 645S	2.0

#### **Additional Information**

To learn more about part-time options, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

#### **Program Goals**

Upon completion of the degree requirements for this MS program, students would have achieved the following program-level goals:

- Develop essential knowledge and skills for managing commercialization of biomedical innovation within the context of new ventures and established enterprises
- · Develop analytical, research, and critical thinking skills around science and biomedical innovation and new product development

- · Develop an advanced understanding of professional ethics
- · Develop advanced communication and leadership skills
- · Develop practical knowledge and skills used in real-life scenarios
- Develop other "work readiness" soft skills such as teamwork, problem-solving, knowledge of career opportunities, and networking

## Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs (http:// drexel.edu/provost/assessment/outcomes/dslp/)) (http://www.drexel.edu/provost/irae/assessment/outcomes/dslp/)to help them build their future:

#### Core Intellectual and Practical Skills:

- Communication
- Creative and critical thinking
- Ethical reasoning
- Information literacy
- · Self-directed learning

#### **Experiential and Applied Learning:**

- · Global competence
- · Leadership
- · Professional practice
- · Research, scholarship, and creative expression
- Responsible citizenship

#### Additional Information

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# **Biomedicine and Law**

Major: Biomedicine and Law

Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 19-1020; 23-2000

## About the Program

The online Master of Science in Biomedicine and Law degree program comprehensive training in technical and practical aspects of science and innovation as well as in the legal aspects related to new biomedical product development, entrepreneurship, and regulatory compliance. This program is geared to individuals interested in careers focused on technology development.

Graduates of this program will be prepared to progress into more advanced graduate studies in science and/or careers in scientifically oriented management jobs in the public or private sector (e.g., technology commercialization offices, patent agencies). These individuals will also be competitive law school applicants if they so chose to continue their professional studies even though credits for their legal coursework in this program will not be transferable for law school credits.

#### Curriculum

This is an interdisciplinary online program offered by the College of Medicine. The science courses, which are offered online, are taught by faculty from Drexel University College of Medicine. Faculty from Drexel University's Kline School of Law teach the entrepreneurship courses.

- · Non-thesis program (36.0 semester credits needed to graduate)
- · No thesis requirement
- · Required and elective courses in each discipline
- Flexible internship elective (experiential learning)
- Customizable plan of study

#### Format

- · Online (select courses in both disciplines are offered face to face on-campus)
- · New students admitted each fall and spring semesters
- · Classes taught throughout the year (fall, spring, and summer)
- Accelerated: 1-year MS (full-time) or 1.5 years (part-time)

#### **Full-Time and Part-Time Options**

Students may meet the degree requirements in either a full-time (at least 9.0 credits per semester) or part-time basis. Full-time students generally complete the program in one year. Part-time students must complete the program within four years. Students must enroll in at least 4.5 semester credits of College of Medicine courses to qualify for financial aid. For information regarding financial aid, please visit Drexel Central (https://drexel.edu/ drexelcentral/).

#### **Additional Information**

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

## **Admission Requirements**

New students are admitted every fall and spring semester.

Post-college applicants must have completed a four-year degree program. An undergraduate degree in science is preferred but not required; although a minimum cumulative grade point average (GPA) of 3.0 is strongly preferred.

Applicants must also fulfill the following requirements for consideration:

- · Official transcripts from all colleges and universities attended
- · Essay/personal statement
- Resume
- · References from at least three instructors or professionals.

Official test scores from graduate admission exams, such as the Graduate Record Examination (GRE), are optional but highly desirable.

Three letters of recommendation are required. If you received your degree within the last five years, it is strongly recommended that at least one letter of recommendation be provided by someone familiar with your academic qualifications and potential (e.g., your undergraduate advisor, a course instructor, or your research mentor). If you are requesting a letter from someone at your place of employment, the recommendation should be provided by a supervisor (or another more senior manager) with direct knowledge of your work and should address your scientific aptitude as well as your work ethic.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL). IELTS scores may be submitted in lieu of TOEFL scores. An evaluation by World Education Services (WES) is required for transcripts from institutions outside the United States.

- TOEFL score needs to be at least 90 with at least a 27 in both the reading and writing sections
- · IELTS score needs to be above 7

Online applications (https://www.online.drexel.edu/online-degrees/biomedical-degrees/ms-biomedicine-law/) are accepted all year-round for consideration for either fall or spring admission. Students may defer admission by one year. All admission decisions are made at the College of Medicine.

#### **Additional Information**

For questions about the curriculum and program goals, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

For information regarding financial aid, please visit Drexel Central (http://www.drexel.edu/drexelcentral/).

For questions about how to apply to the program, please contact an enrollment counselor at duonline@drexel.edu.

## **Degree Requirements**

There are several ways to customize the experiential learning component (2.0 - 6.0 semester credits) so that it satisfies both the degree requirements and, especially, the student's own personal situation. The duration of the internship may vary. Shorter rotations may require that the student enroll in elective courses to meet the semester credit requirements for degree.

\* Substitutions: MIIM 515S and MIIM 516S OR MIIM 530S OR MIIM 531S

\*\* Substitutions: MIIM 535S and MIIM 536S

\*\*\* Science and law courses are offered on a semester basis, and entrepreneurship courses are offered on a quarter basis. Semesters and quarters overlap. Credits shown for entrepreneurship courses are quarter credits (3 quarter credits = 2 semester credits). This program requires a minimum of 36.0 semester credits to meet the degree requirements. This requirement can be met through a combination of science, digital media and entrepreneurship courses.

#### **Additional Information**

Total Credits 32-37

\* This is a full-time plan with # 9.0 semester credits/semester. Both science and Law courses are listed in semester credits. To qualify for financial aid, each semester students must enroll in #4.5 credits in science courses offered by the College of Medicine. Students must enroll in at least 1 College of Medicine course in order to enroll in any course offered by another Drexel College or School. Students graduate after 4 terms (1 year), completing 3-4 courses per term, all terms are eligible for financial aid.

# Full-time, Spring Start

#### **Additional Information**

To learn more about part-time options, please contact Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

## **Program Goals**

Upon completion of the degree requirements for this MS program, students will have developed:

- · A broad core knowledge in biological sciences and legal aspects of biomedical innovation
- · More in-depth analytical, research, and critical thinking skills
- · An advanced understanding of professional ethics
- Graduate-level communication and leadership skills
- · Other "work readiness" soft skills such as teamwork, problem-solving, knowledge of career opportunities, and networking

#### Drexel Student Learning Priorities (DSLPs)

In the course of meeting these program-level goals, students would have also made progress in all of Drexel's Student Learning Priorities (DSLPs) (https://drexel.edu/provost/assessment/outcomes/dslp/) to help them build their future:

#### Core Intellectual and Practical Skills:

- Communication
- · Creative and critical thinking
- Ethical reasoning
- · Information literacy
- · Self-directed learning

#### Experiential and Applied Learning:

- · Global competence
- · Leadership
- · Professional practice
- · Research, scholarship, and creative expression
- Responsible citizenship

# Additional Information

For questions about the curriculum and program goals, please email Program Director Dr. Sujata Bhatia at skb322@drexel.edu.

# Biotechnology

Major: Biotechnology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 42.0 Classification of Instructional Programs (CIP) code: 41.0101 Standard Occupational Classification (SOC) code: 11-9121; 19-1029; 25-2031

#### About the Program

The MS in Biotechnology program is designed to train laboratory personnel in the theory and practice of state-of-the art technologies for biochemical analysis. The program is targeted to individuals who will be seeking employment in biotechnology/pharmaceutical firms or academic laboratories and is appropriate for recent college graduates or experienced technicians. Graduates of this program will possess a set of technical skills that will make them very competitive for laboratory jobs in the academic or industrial sectors, or, if they are already employed, enhance their potential for advancement.

This program includes both academic coursework and hands-on practica.

#### **Additional Information**

For more information, visit the College of Medicine's Biotechnology program (https://drexel.edu/medicine/academics/graduate-school/ biotechnology/) website.

#### Admission Requirements

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent. While there are no minimum requirements, applicants should be competitive with regard to grades, entrance exam scores and letters of recommendation. Students must fulfill all requirements for consideration as defined by the Executive Committee of the Division of Biomedical Science Programs:

- · official transcripts from all colleges and universities attended
- · official transcript evaluation such as WES, for transcripts from international institutions that are not in English, or that do not use a 4 point GPA scale;
- official entrance exam scores such as the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT);
- · references from at least three instructors or industry professionals;
- · an application fee of \$75;
- international applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS, with the exception of those who have received their undergraduate degree in an accredited US institution;

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematics-including, at a minimum--two semesters each of inorganic chemistry, organic chemistry, physics, calculus and biology.

#### Additional Information

To learn more about applying to Drexel College of Medicine programs, visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (http://www.drexel.edu/medicine/Academics/Graduate-School/) website.

### Degree Requirements

This program offers a set of required didactic courses designed to provide students with the theoretical underpinnings of modern Biochemistry and Biotechnology, and will form a foundation for the four hands-on practica. These practica will provide detailed exposure and experience in four different aspects of biochemistry/biotechnology: protein expression and purification; crystallography; gene expression and manipulation; protein-protein and protein-ligand interaction with SPR; and imaging/microscopy. Each practica will be conducted under the close supervision of a faculty member with expertise in the area, and will progress from an initial set of experiments in which the results are already known (allowing students to become familiar with techniques), then progressing to a project tightly associated with the ongoing research in the mentor's laboratory. The third practicum will be 8.0 semester credit hours, and will include preparation of a scholarly paper that reviews a topic related to the techniques associated with that particular practicum.

Required Courses		
BIOC 507S	Biochemistry Seminar Series *	3.0
BIOC 508S	Experimental Approaches to Biochemical Problems	3.0

# **Cancer Biology**

Major: Cancer Biology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 46.0 (non-thesis); 55.0 (thesis) Classification of Instructional Programs (CIP) code: 26.0911 Standard Occupational Classification (SOC) code: 19-1042

#### About the Program

The goal of the MS in Cancer Biology program is to provide a master's degree focused on the fundamentals of cancer from an interdisciplinary perspective, including:

- · Biology and molecular biology of cancer initiation;
- Metastasis;
- Treatment; and
- · Bioinformatics/systems biology.

The program is designed to meet the needs of two groups of individuals: (1) new or recent college graduates who wish to increase their marketability for jobs in academic or industrial laboratories through the acquisition of knowledge and skills more developed than obtained through a standard college curriculum; and (2) currently employed technical staff in the pharmaceutical or biotechnology industry (or academia) who wish to advance their position.

Consisting of both classroom and laboratory instruction, the program fills a need to train laboratory personnel in cancer theory and research. Graduates of this program will possess knowledge in both the theoretical as well as the practical level.

#### **Additional Information**

For more information, visit the College of Medicine's Cancer Biology program (https://drexel.edu/medicine/academics/graduate-school/cancerbiology/) website.

### **Admission Requirements**

For acceptance to the program, the applicant must have completed a four-year biology or chemistry-based bachelor's degree program, or equivalent, with at least a 3.0 GPA. Students must fulfill all requirements for consideration as defined by the Executive Committee of the Division of Biomedical Science Programs:

- · Official transcripts from all colleges and universities attended;
- Official transcript evaluation such as WES, for transcripts from international institutions that are not in English, or that do not use a 4 point GPA scale;
- Official entrance exam scores such as the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT);
- · References from at least three instructors or industry professionals;
- An application fee of \$75;

· International applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS, with the exception of those who have received their undergraduate degree in an accredited U.S. institution.

Students applying to the program will be expected to have undergraduate experience in chemistry, cell biology, biochemistry, and mathematicsincluding, at a minimum-two semesters each of inorganic chemistry, organic chemistry, physics, calculus, and biology.

## **Clinical Research for Health Professionals**

Major: Clinical Research for Health Professionals Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 51.0000 Standard Occupational Classification (SOC) code: 11-9199

#### About the Program

The MS in Clinical Research for Health Professionals program is a non-thesis curriculum designed for residents, fellows, and clinicians seeking knowledge in the conduct of translational and investigator-initiated research. The degree often acts as an advanced preparation for independent investigators and other practicing researchers familiar with clinical research while developing their clinical careers.

The program is also available to other clinical health professionals such as nurses (with a minimum of a bachelor's degree required), medical technologists, etc., to help these individuals advance their professional opportunities.

Online coursework coupled with supervised independent research activities will allow healthcare professionals in any academic hospital setting throughout the US to receive an MS degree from Drexel University College of Medicine (DUCoM).

#### **Research Project**

While the MS in Clinical Research for Health Professionals program does not require a thesis, the program is consistent with a master's level education that challenges students to clearly express well-organized thoughts in written form. The collection, analysis, and refinement of scientific information to produce a professional-level written document are crucial skills for those in the health professions. This requirement will expose students to the entire process of developing an independent research project and reporting on that research project up to and including experiencing a facsimile of the peer review and re-submission process. The research project will provide students with the opportunity to develop, test, and report on research hypotheses.

It is anticipated that each student will conduct a minimum of nine hours research per week for 3.0 credits per semester. Research may include a broad spectrum of clinical studies such as retrospective studies; bench-top studies in conjunction or not with pharmaceutical companies; development of new clinical methodologies/techniques; or development/evaluation of new medical devices. Research mentors must be established researchers with a doctoral degree. A key requirement of this mentored research is the support of a doctoral level mentor/advisor located at the institution where the student's research will be conducted. A curriculum vitae of the proposed research mentor must be submitted with the student's application for evaluation by the admissions committee and the program director. The appropriateness of the mentor will be evaluated by an ad hoc committee whose members come from the Graduate School faculty. The student must submit a 7-10 page journal-format paper at the end of each semester documenting their research and demonstrating that each successive semester's work builds upon their prior work.

#### **Additional Information**

Kamran Mohiuddin, M.D., M.B.A., FAPCR Director, Graduate Programs in Clinical Research km3668@drexel.edu 215-762-3812

For more information about the program and to apply, visit the Drexel University Online (http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crhp/) website.

### **Degree Requirements**

The MS in Clinical Research for Health Professionals program requires completing a minimum of 15.0 semester credits composed of three required courses and two clinical research electives. In addition, students will register for a total of 21.0 research credits.

Research mentors must be established researchers with a doctoral degree. A curriculum vitae of the proposed research mentor must be submitted with the student's application. The appropriateness of the mentor will be evaluated by an ad hoc committee whose members come from the Graduate School faculty.

The student must submit a 7-10 page journal-format paper at the end of each semester documenting their research and demonstrating that each successive semester's work builds upon their prior work. Contact the program director for additional requirements.

## **Clinical Research Organization and Management**

Major: Clinical Research Organization and Management Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 51.0000 Standard Occupational Classification (SOC) code: 11-9199

#### About the Program

The Master of Science in Clinical Research Organization and Management is an online program designed for individuals already trained in the area of clinical sciences, as well as for others who desire a focused education in the proper conduct of clinical research.

The Master of Science in Clinical Research Organization and Management program offers students a rigorous graduate education taught by leaders from the pharmaceutical, biotechnology, and medical device industries, as well as from academic research centers. The program provides online courses that include scientific rationale related to the design and analysis of clinical trials, epidemiology and biostatistics, ethics-based reasoning for the conduct of research, clinical trial management and monitoring processes, and federal regulatory rules and policies essential to the development of a broadly educated and well-prepared professional in clinical research and new therapeutic product investigation.

The program is designed so that graduates will be able to:

- · Successfully apply the framework and philosophies of research to the management of clinical trials, employing quality principles of current good clinical practice to produce valid and useful data
- · Ensure that sound ethical principles and values are always recognized and upheld in research involving a human population
- · Use current statistical knowledge and methods in the design, implementation, conduct, and assessment of clinical trial programs
- · Describe the scientific and clinical research literature to effectively interpret the results of clinical research, thereby enhancing the decision-making process

Students work with advisors to customize their course plans to meet their career goals.

#### Program Delivery Options

All Clinical Research (CR) courses are offered solely online. Visit Drexel University Online for details.

#### **Additional Information**

Kamran Mohiuddin, M.D., M.B.A.,FAPCR Director, Graduate Programs in Clinical Research km3668@drexel.edu 215-762-3812

For more information about the program, visit the Drexel University Online Master of Science in Clinical Research Organization and Management (https://www.online.drexel.edu/online-degrees/biomedical-degrees/ms-crom/) webpage.

For information about applying to the program, visit the Drexel University Online Admissions Criteria (https://www.online.drexel.edu/online-degrees/ biomedical-degrees/ms-crom/#admissionscriteria) webpage.

#### **Degree Requirements**

The Master of Science in Clinical Research Organization and Management program consists of 12 courses (36.0 credits). Any courses offered by the Clinical Research Organization and Management program (subject code "CR") may be applied to fulfill the requirements of this major. No master's thesis is required.

The program is organized into five areas of study devoted to clinical research and related administrative and regulatory issues. Students may take courses within their preferred area of study, a cross-section of courses within other areas of study, or any other Clinical Research (CR) courses being offered.

Program Requirements		36.0
New Product Research and Develop	oment	
CR 515S	Intro to Clinical Trials

## **Drexel Pathway to Medical School**

Major: Drexel Pathway to Medical School Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 44.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 19-1029

#### About the Program

This intensive, one-year master's degree program provides candidates a conditional acceptance for matriculation into the Drexel University College of Medicine's MD program following successful completion of the DPMS program. The intensive introductory summer enrichment curriculum provides small group instruction. Throughout the program, students are supported with individualized learning strategy enhancement, peer mentors, and tutors.

#### **Additional Information**

Drexel University College of Medicine Division of Pre-medical and Pre-health Programs Graduate School of Biomedical Sciences and Professional Studies New College Building, Room 4104 245 North 15th Street, Mail Stop 344 Philadelphia, PA 19102

Phone: 215-762-4692 Email: CoM MedicalSciences@drexel.edu

Visit the Drexel University College of Medicine's website for more information on the Drexel Pathway to Medical School program (https://drexel.edu/ medicine/academics/graduate-school/drexel-pathway-to-medical-school/).

### **Admission Requirements**

The program is open to all premedical students who have successfully completed the prerequisite coursework for medical school with a grade of C or better. All applications to the DPMS program are considered by the College of Medicine which utilizes a holistic review process. While there are no specific minimum or maximum GPA or score requirements, a typical competitive applicant has a GPA above 2.9 and an MCAT above the 25th percentile. If an applicant is chosen for an interview, they will be notified by the College of Medicine.

## **Drug Discovery and Development**

Major: Drug Discovery and Development Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 38.0 Classification of Instructional Programs (CIP) code: 26.1001 Standard Occupational Classification (SOC) code: 19-1029

#### About the Program

The MS in Drug Discovery and Development program provides in-depth exposure to the multiple elements involved in the discovery and development of marketed drugs. This unique program provides the rigorous scientific and technical training necessary to succeed and advance in the complex and multidisciplinary field of drug discovery. It has been designed to prepare students for a smooth transition into an enduring and productive career within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development beginning with the identification of a drug target and proceeding through to clinical trials, regulatory approval and commercialization. Students will also be introduced to business aspects as well as to other areas of biotechnology and to the basic sciences of pharmacology and physiology.

The MS in Drug Discovery and Development is available to individuals who have already obtained a BS or BA degree in the biomedical sciences, life sciences, health sciences or related fields who wish to pursue an industry-focused master's-level degree or enhance their qualifications for a doctoral program in the biomedical sciences or medicine. This includes individuals who plan to pursue a career in the pharmaceutical or biotechnical industries.

This program is also intended for individuals from other disciplines who wish to have a broader base of information about drug discovery and development, those who may wish to transition into the industry, or those who are already active in the industry and seek to increase their knowledge. The curriculum has been designed with the recognition that the pharmaceutical and biotechnical industries require a diversity of experience and expertise.

#### **Additional Information**

For more information about this program, visit the College of Medicine's Biomedical Graduate Studies (https://drexel.edu/medicine/admissions/overview/) page.

### **Admission Requirements**

For acceptance to the program, the applicant must have completed a four-year life science, physical science, pharmacy, or related bachelor's degree program, with a 3.0 GPA preferred. Students must fulfill all requirements for consideration as defined by the Executive Committee of the Interdisciplinary and Career-Oriented Division of the Graduate School of Biomedical Science and Professional Studies.

- · Official transcripts from all colleges and universities attended
- · Official copies of entrance test scores and official test scores from the Graduate Record Examination (GRE) for applicants to the full-time program
- · References from at least three instructors or professionals
- An application fee is required for the full-time program.
- International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. Applicants
  whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an
  acceptable score on the Test of English as a Foreign Language (TOEFL), or IELTS.

Students applying to the program will be expected to have undergraduate experience in basic chemistry, cell biology, biochemistry, and mathematics and are encouraged to have training in inorganic chemistry, organic chemistry, physics, calculus, and biology.

Visit Drexel University's Graduate Admissions (http://www.drexel.edu/grad/programs/ducom/) site for additional information regarding specific requirements for applying to the Graduate School of Biomedical Science and Professional Studies in the College of Medicine, as well as important application dates.

#### **Additional Information**

For more information on how to apply, visit Drexel's Admissions page for Biomedical Graduate Studies (https://drexel.edu/grad/programs/ducom/drugdiscovery-and-development/).

### **Degree Requirements**

The curriculum is designed to provide students with a with a comprehensive understanding of the entire process of drug discovery and development and its scientific foundation, while simultaneously offering multiple options to pursue specialized areas of interest.

## Histotechnology

Major: Histotechnology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 46.0 Classification of Instructional Programs (CIP) code: 51.1007 Standard Occupational Classification (SOC) code: 29-2011; 29-2012

### About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Science in Histotechnology program. This one-year (12month) program combines academic studies with a clinical practicum to prepare the students to perform complex tissue specimen preparations in the histology laboratory. The program provides advanced training and is designed to enable graduates to work as highly qualified histotechnologists under the supervision of pathologists.

Coursework includes histology, biochemistry, advanced histotechnology, anatomy, physiology, microbiology, medical ethics, laboratory management and leadership skills. In addition to the course work, students complete a three-month practicum designed to allow students to apply the knowledge and techniques learned during their didactic courses in a clinical hospital setting. The practicum allows the student the opportunity to perform routine as well as specialized, histotechnology techniques under the supervision of a qualified histotechnologist.

#### **Program Accreditation**

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) has established national standards for Histotechnologytraining programs. The standards include both didactic course work and clinical experiences necessary to properly educate a Histotechnologist. The Master of

Histotechnology program at Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (http://www.naacls.org/) website for more information about the professional activities of this organization.

#### **Professional Certification**

The American Society for Clinical Pathology Board of Certification (ASCP BOC) has established a national certification program for Histotechnologists. Graduates of the Master of Histotechnology program are eligible to sit for the national certification examination for Histotechnology. Visit the ASCP BOC (https://www.ascp.org/content/Board-of-Certification/) website to read more about the certification program and the professional activities of this organization.

#### **Professional Affiliation**

The National Society for Histotechnology (NSH) is a non-profit organization, committed to the advancement of Histotechnology, its practitioners and quality standards of practice through leadership, education and advocacy. Visit the NSH (https://www.nsh.org/home/) website to read more about the professional activities of this organization.

#### **Career Opportunities**

Histotechnologists are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals. Additional opportunities are available in clinical and industrial research, veterinary pathology, marine biology and forensic pathology.

#### Additional Information

For more information about this program, visit the College of Medicine's Master of Science in Histotechnology page.

#### **Admission Requirements**

A bachelor's degree in a biological or allied health science, with a cumulative GPA of approximately 2.75, is the minimum requirement for acceptance into the Master's Degree Program. Prerequisite course work includes mathematics, English composition, general chemistry, organic and/or biochemistry and biological science. Microbiology, anatomy and histology are recommended but not required.

All candidates will be required to have a formal interview with one of the program director's prior to final acceptance. Deadline for submission of the application is the second Friday in June of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- · Completed application form
- Resume
- · Official Transcripts from all schools attended or where coursework was attempted or taken
- · Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- · Self-assessment essays:
- A. Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
- B. What are your most important accomplishments?
- C. What do you expect to achieve through this program?

The application and supporting material must be received no later than the program deadline date.

#### **Additional Information**

## Immunology

Major: Immunology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.0508 Standard Occupational Classification (SOC) code: 11-9121

### About the Program

#### **Mission Statement**

The Master of Science in Immunology, offered by the Department of Microbiology and Immunology and the Institute for Molecular Medicine and Infectious Disease (IMMID), is a **non-thesis degree program**. The program provides education and training in areas of research in basic and clinical immunology and immunologically based diseases. Students in this program acquire theoretical and practical knowledge about the normal functions of the immune system and disease pathogenesis associated with immunological dysfunction. Students also learn how this knowledge is applied to develop tools for diagnosis, treatment, prognosis, and prevention of immunologically based diseases. Graduates from this program will be ready to enter the biotechnology workforce and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Immunology program is designed to provide academic and practical biotechnical knowledge in translational research, particularly in the areas of immunotherapeutics and vaccine development.

#### Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in immunology, biochemistry, genetics, and cellular and molecular biology. The program is typically completed in two full-time years (four semesters of at least nine credits) of required and elective graduate courses, and one or more experiential research components in the first or second year. The flexibility of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis and up to 4 years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate with at least 6.0 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel University, another

academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a less intensive experience spanning two semesters, or conduct an independent research project with the approval and supervision of program directors.

#### Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online—offered through Drexel University Online (https://online.drexel.edu/online-degrees/biomedical-degrees/ms-immunology/). All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty and may include live web sessions. Individual students also may choose a mix of traditional and online (hybrid) courses. The goal is to provide maximum scheduling flexibility.

#### Additional Information

For more detailed information about the curriculum and program goals, please contact either:

Stephen Jennings, PhD Email: srj32@drexel.edu

Pooja Jain, PhD Email: pj27@drexel.edu

#### **Admission Requirements**

For acceptance into the Master of Science in Immunology program, the applicant must have completed a four-year biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- · Official transcripts from all colleges and universities attended
- A current curriculum vitae (CV) or resume
- · References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research and professional experience.

Online applications are considered year-round. Potential students are encouraged to apply no later than July 1 for fall admission or December 1 for spring admission.

#### **Additional Information**

For more information about the program and to access the online application, view the Master of Science in Immunology (http://drexel.edu/medicine/ academics/Graduate-School/immunology/) page on the College of Medicine's website.

#### **Degree Requirements**

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Immunology. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course). Students should work with their program advisors to plan their course of study.

#### **Research Requirements**

The research component of the curriculum can be fulfilled by two alternative approaches. Most student choose to engage in a hands-on research internship in which a 12-week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project with the approval and supervision of program directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

#### **Program Goals**

Over the course of completing the program, students will develop

- · Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
- Working knowledge of normal functions of the immune system at the cellular and molecular level and how immunological dysfunction contributes to immunologically based disease
- Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools.
- Skills in basic, translational, or clinical research
- · Professional ethics necessary for the responsible conduct of research
- · Communication and leadership skills
- · Other soft skills (e.g., collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPs) (https://drexel.edu/provost/assessment/outcomes/dslp/) to help them build their futures.

#### **Core Intellectual and Practical Skills:**

- Communication
- · Critical and creative thinking
- Ethical reasoning
- Information literacy
- Self-directed learning
- Technology use

#### **Experiential and Applied Learning:**

- Global competence
- · Leadership
- · Professional practice

- · Research, scholarship, and creative expression
- Responsible citizenship

## Infectious Disease

Major: Infectious Disease Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.0508 Standard Occupational Classification (SOC) code: 19-1022; 19-1029

#### About the Program

#### **Mission Statement**

The Master of Science in Infectious Disease (http://www.drexel.edu/medicine/Academics/Graduate-School/Infectious-Disease/) program, offered by the Department of Microbiology and Immunology (http://www.drexel.edu/medicine/About/Departments/Microbiology-Immunology/) and by the Institute for Molecular Medicine and Infectious Disease (http://www.drexel.edu/medicine/About/Departments/Institute-for-Molecular-Medicine-Infectious-Disease/) (IMMID), provides graduate-level training in the area of infectious disease. Classroom activities, online learning, and research experiences cover fundamentals of molecular biology, cell biology, and immunology, as well as basic science, translational, and clinical aspects of diseases caused by important infectious pathogens, including SARS-CoV-2, HIV, methicillin-resistant Staphylococcus aureus (MRSA), malarial parasites, and influenza virus. Elective courses offer highly focused studies of topics relevant to infectious disease, including: vaccines and vaccine development; viral, bacterial, parasitic, and fungal pathogens; emerging pathogens; principles of biocontainment; and emerging biomedical interventions for infectious diseases.

The program is designed to prepare students for careers in infectious disease in government, industry, and academic settings. The program is ideally suited for enhancing the scientific credentials of recent college graduates, early career scientists, premedical students, employees in industry, and clinical laboratory technicians.

#### Curriculum

This non-thesis degree program comprises numerous required and elective graduate courses, as well as an elective research internship that can be completed during the course of the training program. Although most learners will complete the program in two years (four semesters) as full-time students, many opt to enroll on a part-time basis, taking three or more years to complete the degree program. Elective courses available to students in the program provide additional knowledge and expertise in areas relevant to infectious disease research, such as emerging infectious diseases, vaccines effective against infectious pathogens, biotechniques and laboratory research, and principles of biocontainment. Graduate courses in the curriculum will involve completion of examinations and other assessments, participation in seminars and journal clubs, and (if applicable) performance in the experiential learning component. The degree is conferred upon successful completion of a minimum of 36.0 credits of course work.

#### **Learning Options**

The Master of Science in Infectious Disease Program is available in two learning formats. Students can enroll in the face-to-face/hybrid program and attend classes on the Center City and Queen Lane campuses of the Drexel University College of Medicine in Philadelphia. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. Required and elective courses are offered both live (face-to-face) and online, providing the student the flexibility to formulate a hybrid plan of study that includes a mix of traditional, face-to-face courses and online courses.

The online degree program, which is offered through Drexel University Online, features the same curriculum as the face-to-face/hybrid program, including the experiential research internship. Online courses are designed with activities that maximize interactions among students and faculty, including live web sessions with faculty and guest speakers.

These different program formats provide students with maximum flexibility to meet their schedule demands and accommodate their learning preferences.

#### **Experiential Learning**

A signature element of the Program is the Research Internship in Infectious Disease. The internship encompasses one of three specific areas of research in the field of infectious disease:

- basic science discovery involving infectious bacterial, viral, fungal, or parasitic pathogens that cause human disease;
- translational research focused on the development of new approaches to diagnose, prevent, or treat infectious diseases; and
- · clinical infectious disease research focused on infectious diseases in humans.

Many students choose to engage in a hands-on research internship consisting of a 16-week research project in a laboratory at an academic institution or at a biotechnology or biopharmaceutical company. Students in the face-to-face program can choose to work in a laboratory at Drexel University or at other locations in the Greater Philadelphia area. Students in the online program can make arrangements with academic institutions or biotechnology companies at their own locations. Alternatively, traditional and online students may choose to engage in independent research projects with the approval and supervision of the Program Director.

Because the Research Internship in Infectious Disease is an elective course, students can instead choose to earn all 12 elective credits by completing lecture-based elective courses offered as part of the curriculum.

#### Additional Information

For more detailed information about the curriculum and program goals, please contact:

Fred Krebs, Ph.D. (Director) Email: fck23@drexel.edu

Visit the websites for the face-to-face/hybrid and online Master of Science in Infectious Disease programs for more information. For detailed information regarding application deadlines, the online application process, and specific requirements for applying to the College of Medicine, start by visiting Drexel University's Infectious Disease (https://drexel.edu/academics/grad-professional-programs/medicine/infectious-disease/) page.

#### **Admission Requirements**

For acceptance into the Master of Science in Infectious Disease program, the applicant must have completed a four-year biology or chemistry-related BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum undergraduate cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- · Official transcripts from all colleges and universities attended
- A personal statement that describes your career goals and reasons for pursuing an MS in Infectious Disease
- A current *curriculum vitae* (cv) or resume
- · Letters of recommendation from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores (if provided), recommendation letters, and relevant research or professional experiences.

#### **Additional Information**

Visit the websites for the face-to-face/hybrid and online Master of Science in Infectious Disease programs for more information. For detailed information regarding application deadlines, the online application process, and specific requirements for applying to the College of Medicine, start by visiting Drexel University's Infectious Disease (https://drexel.edu/academics/grad-professional-programs/medicine/infectious-disease/) page.

### **Degree Requirements**

Courses with an MIIM or IDPT designation are offered by the Drexel University College of Medicine and are taught on a semester schedule (fall and spring). Courses are available in traditional (face-to-face), hybrid, and/or online formats. Some of these traditional courses and hybrid courses are offered as evening classes at locations on either the Center City Campus or the Queen Lane Campus. While many activities in online courses can be completed asynchronously (i.e., at times that you choose), some courses include synchronous activities for which students join the class at specified days and times (as indicated in the course syllabus).

At least 36.0 credits are required to complete the program and earn a Master of Science in Infectious Disease.

IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0
MIIM 530S	Fundamentals of Molecular Medicine I	3.0
MIIM 531S	Fundamentals of Molecular Medicine II	2.0
MIIM 533S	Molecular Medicine Journal Club II	1.0

Total Credits		36.0

**Total Credits** 

### Sample Plans of Study

The following plans of study illustrate two possible paths to degree completion and graduation. Plans can also be composed for students starting the program in the spring semester and for students who want to complete the degree over more than three years. Individualized plans of study are constructed cooperatively between accepted students and the academic advisor prior to the start of the first semester. Plans of study can also be modified during a student's progress through the program to accommodate changes in a student's preferences or extracurricular circumstances.

**Total Credits 36** 

Note: Third Year Fall (Part-Time) is less than the 4.5-credit minimum required (considered half-time status) of graduate programs to be considered financial aid eligible. As a result, aid will not be disbursed to students this term.

### **Program Goals**

Upon completion of the Master of Science in Infectious Disease Program, students will have achieved the following program-level goals:

#### 1. Develop broad core knowledge in the biological sciences.

- · Demonstrate proficiency in fundamental concepts in molecular biology, biochemistry, and cell biology.
- Demonstrate proficiency in these areas as they are described and applied in the primary scientific literature.
- 2. Develop a working knowledge of infectious disease pathogens and the diseases that they cause.
  - Demonstrate basic science knowledge of pathogens that cause human disease in the fields of virology, parasitology, bacteriology, mycology, and others.
  - · Identify diseases caused by these pathogens and the mechanisms of pathogenesis.
  - Be able to critically analyze and evaluate publications in the primary literature that describe basic, translational, and clinical infectious disease research.
- 3. Develop skills in analytical and critical thinking.
  - · Develop proficiency in critical analyses of ideas and concepts related to infectious disease research documented in the primary literature.
  - Use critical thinking skills in collegial presentations and discussions of research focused on infectious diseases and the pathogens that cause them.

#### 4. Develop skills in basic, translational, and/or clinical research.

- Develop new laboratory skills or enhance pre-existing skills.
- Be proficient in collecting information and data from electronic source material and databases.
- · Apply analytical skills and critical thinking to data analyses.
- 5. Develop professional ethics necessary for the responsible conduct of research.
  - Be able to identify and evaluate professional ethical dilemmas, and discuss appropriate resolutions.
  - Apply professional ethical standards such as appropriate attribution of ideas, good recordkeeping, and truthful presentation of data/facts and conclusions.

#### 6. Develop communication and leadership skills.

- · Be proficient at developing oral and/or written comprehensive reports, presenting facts, conducting analyses, and reaching conclusions.
- Be proficient at using appropriate technologies for communication.
- · Be able to interact and work effectively with others in work settings involving cultural and demographic diversity.
- 7. Develop other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion.
  - · Develop a working knowledge of career opportunities in the desired field.
  - · Effectively present a professional profile of oneself.
  - · Be proficient at time and task management.
  - Be able to work effectively in collaborative and team-driven settings.

- · Begin the development of problem-solving skills to be used in the workplace.
- · Begin to establish a professional network.

### **Drexel Student Learning Priorities (DSLPs)**

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPs) (https://drexel.edu/provost/offices/assessment/outcomes/dslp/) to help them build their futures:

#### **Core Intellectual and Practical Skills**

- · Communication
- · Critical and creative thinking
- Ethical reasoning
- Information literacy
- · Self-directed learning
- · Technology use

#### **Experiential and Applied Learning**

- · Global competence
- · Leadership
- Professional practice
- · Research, scholarship, and creative expression
- Responsible citizenship

## **Intensive Medical Sciences**

Major: Intensive Medical Sciences Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 35.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 11-9121

#### **About the Program**

This is a one-year intensive, non-thesis special master's program for students who have completed their pre#medical school coursework and wish to enhance their credentials for medical school application by taking courses equivalent in rigor to first-year medical school coursework.

Taking highly rigorous courses comparable to the first year of medical school permits medical school admissions committees to directly evaluate a student's competence. In addition, it provides students an opportunity to test their preparation and motivation for medical school. It is intended for students who believe that their undergraduate performance did not fully reflect their academic abilities and are now prepared to compete in medical school courses and demonstrate that they can excel.

#### Additional Information

Drexel University College of Medicine Division of Pre-Medical and Pre-Health Programs Graduate School of Biomedical Sciences and Professional Studies New College Building, Room 4104 245 North 15th Street, Mail Stop 344 Philadelphia, PA 19102

Phone: 215-762-4692 Email: CoM\_MedicalSciences@drexel.edu

For more information about this program, visit the College of Medicine's Intensive Medical Sciences (https://drexel.edu/medicine/academics/graduate-school/intensive-medical-sciences/) webpage.

#### Admission Requirements

Students with an undergraduate GPA of 3.2 or higher can be considered for this program. In addition, applicants must have a minimum MCAT total score of 507 (with no section less than 126) or 511 (with no section less than 124) to be considered for the guaranteed interview option at the Drexel MD program. Due to the rigor of the program, full-time commitment to the curriculum is essential.

## **Interdisciplinary Health Sciences**

Major: Interdisciplinary Health Sciences Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 48.0 Classification of Instructional Programs (CIP) code: 51.1099 Standard Occupational Classification (SOC) code: 29-2011; 29-2012

### About the Program

The Graduate School of Biomedical Sciences and Professional Studies, Division of Pre-Medical and Pre-Health (PMPH) Programs, offers the Master of Science degree in Interdisciplinary Health Sciences (IHS). This program allows students to become stronger applicants to medical or other health professional schools by enhancing their academic credentials through a customizable biomedical curriculum. The IHS program also helps students to find and engage in meaningful community service experiences and provides an opportunity to supplement biomedical coursework with laboratory or clinical research.

IHS students complete multiple required courses throughout their first and second years. These courses provide general knowledge and training essential for a career in healthcare. Students also receive personalized guidance from a program advisor as they select courses to best meet their needs and interests from a broad range of electives. Students entering their second year in IHS select a concentration track and complete a specified number of courses within that concentration prior to graduation. In this way, the IHS curriculum is both flexible and structured in its goal of reinforcing the healthcare career interests of each student.

During the second year of IHS, students complete a capstone research project which teaches students to communicate complex scientific information and hone their critical thinking and analysis skills. Students with a dedicated interest in biomedical research may choose to complete a mentored research project in a laboratory or clinic. Alternatively, students may choose to complete an independent literature analysis project on the biomedical topic of their choice.

Upon completion of IHS, students will have a strong, integrated view of the biomedical sciences, which provides numerous advantages to graduates whether using their degree as a springboard for further professional education or for direct entry into the healthcare workforce.

Students must complete a minimum of 48.0 credits to graduate and must complete all required courses. The awarding of the Master of Science degree will be contingent upon satisfactory completion of all program requirements, including an earned GPA of no less than 3.0.

#### **Additional Information**

For more information about the program, visit the College of Medicine's MS in Interdisciplinary Health Sciences (https://drexel.edu/medicine/academics/ graduate-school/interdisciplinary-health-sciences/) webpage.

#### Admission Requirements

Applicants to the IHS program must meet the following criteria:

- · Earned a minimum undergraduate math/science GPA of 2.5
- · Successfully completed all pre-medical prerequisite courses
- Received MCAT scores in the 20<sup>th</sup>-50<sup>th</sup> percentile range or minimum GRE 50<sup>th</sup> percentile

Qualifying students participating in other PMPH Master of Science programs may have the option to transition into IHS if healthcare career goals deem the transfer appropriate.

Applicants with lower scores may be considered if they can demonstrate recent upward academic trends, or exemplary healthcare experience or community service activities.

#### Additional Information

For more information about applying to the program, visit the College of Medicine's MS in Interdisciplinary Health Sciences Admissions (https:// drexel.edu/medicine/academics/graduate-school/interdisciplinary-health-sciences/how-to-apply/) webpage.

IHS 508S	1.5 IHS 509S	1.5
Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track $^{\dagger}$	10.0 Additional credits selected from list of electives in conjunction with program director, with at least 5.0 credits coming from concentration track <sup>†</sup>	12.0
	11.5	13.5

Total Credits 48

- \* Students taking the Medical Sciences track are also required to take all IMS fall courses except for IMSP 544S, IMSP 545S, IMSP 552S.
- \*\* Please see your advisor for acceptable course numbers.
- \*\*\* Students may also take this course in the Fall of Year two with approval of the Program Director.
- + Number of credits is only a suggestion and may be split differently between Semesters.

## Laboratory Animal Science

Major: Laboratory Animal Science Degree Awarded: Master of Laboratory Animal Science (MLAS) Calendar Type: Semester Minimum Required Credits: 49.0 Classification of Instructional Programs (CIP) code: 01.8102 Standard Occupational Classification (SOC) code: 19-1011

### About the Program

The Graduate School of Biomedical Sciences and Professional Studies offers the Master of Laboratory Animal Science (MLAS) degree. The MLAS program is designed for individuals who have a bachelor's degree in animal science or a related field and who are seeking advanced career positions in laboratory animal science and laboratory animal facility management. Alternatively, the MLAS degree is also a powerful means to enhance students' credentials for admission to veterinary medical school.

The MLAS program is a full-time, two-year program that begins in August of each year. The first two years of the program consists primarily of classroom instruction, while the last semester is reserved for experiential learning. The program is flexible for traditional and non-traditional students alike due to the availability of evening courses.

#### Available Online

For individuals who are currently working in the laboratory animal science field, the MLAS program is available 100% online. Students can work full-time while completing the program part-time (6 semesters). The majority of courses are completely asynchronous, thus allowing maximum flexibility for the working professional. Please review our website (http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science/ Online-MLAScience/) for specific details about the online program.

#### Curriculum

The MLAS curriculum consists of basic science courses, laboratory animal science courses, and a practicum. The basic science courses were designed to build a solid foundation required for a successful career in laboratory animal science. The laboratory animal science courses focus on all aspects of laboratory animal science, including facility management. The practicum provides the student with the opportunity to apply the theoretical knowledge they have learned to the field of Laboratory Animal Science. The outcome is a highly trained laboratory animal science professional with a solid foundation in the sciences.

#### **Pre-Veterinary Graduate Minor**

Students desiring to attend veterinary medical school have the option to elect to complete a pre-vet minor (p. 96) within the Master of Laboratory Animal Science (MLAS) program. The addition of these courses to the MLAS program will help to further enhance the student's application to veterinary medical school by providing additional rigorous and relevant graduate level coursework.

#### Practicum

MLAS faculty and administration assist the students in identifying and securing practicum sites at universities, biotechnology organizations, and pharmaceutical companies. Practicum sites are available in Pennsylvania, New Jersey, New York, Delaware, Virginia, Kentucky, North Carolina, and Texas. The list expands every year. In many instances, the practicum sites have offered our students a permanent position within their organization upon completion of the MLAS degree.

#### **Career Opportunities**

MLAS graduates hold positions in laboratory animal facilities of universities, biotechnology companies, government agencies, and pharmaceutical companies. There they serve as veterinarians, supervisors, managers, IACUC administrators, trainers, educators, consultants, and sales representatives.

#### **Veterinary Medical School**

Successful completion of the MLAS program can also significantly improve a student's academic credentials for application to veterinary medical school. Please review our website (http://www.drexel.edu/medicine/Academics/Graduate-School/Master-of-Laboratory-Animal-Science/) for a comprehensive list of veterinary medical schools that have been attended by MLAS alumni.

#### **Additional Information**

Erin Vogelsong Program Director, MLAS Assistant Professor Graduate School of Biomedical Sciences and Professional Studies College of Medicine Drexel University 245 N. 15th St., Room 15305 Philadelphia, PA 19102 Tel. 215.762.7968 | Fax: 215-762-7961 Erin.Vogelsong@Drexel.edu | drexel.edu/medicine (http://drexel.edu/medicine/)

### **Admission Requirements**

Students will be selected on the basis of adequate educational background and veterinary/ research/ animal care experience.

Prerequisite coursework includes chemistry, biology, organic chemistry, and physics.

Candidates for admission must provide the following credentials:

- · Bachelor's degree from an accredited U.S. college or university
- Cumulative GPA of 3.0 or higher
- · General Graduate Record Exam (GRE) scores at or above the 50th percentile in all areas obtained within the last 5 years
- · Official transcript from all post-secondary institutions attended
- · Three letters of reference, two must be from science professors
- · Personal statement stating the applicant's academic and professional goals

The deadline for submission of applications is the second Friday in July of the year the student seeks admission.

### **Additional Information**

For more information, please contact:

Erin Vogelsong Program Director, MLAS Assistant Professor Graduate School of Biomedical Sciences and Professional Studies College of Medicine **Drexel University** 245 N. 15th St., Room 15305 Philadelphia, PA 19102 Tel. 215.762.7968 | Fax: 215-762-7961 Erin.Vogelsong@Drexel.edu | drexel.edu/medicine (http://drexel.edu/medicine/)

### **Degree Requirements**

The MLAS degree can be completed full-time in two years and one summer practicum, or part-time in three or less years. Students must successfully complete a minimum of 49.0 credit hours for graduation. A minimum grade point average of 3.0 is required for graduation as well as grades of "C" or better.

#### **Required Courses**

•		
MLAS 501S	Laboratory Animal Seminar	2.0
MLAS 503S	The Institutional Animal Care and Use Committee's (IACUC) Role in Animal Research	3.0
MLAS 504S	Public Outreach for Animal Research	3.0
MLAS 510S	Clinical Orientation In Laboratory Animal Facilities	1.0
MLAS 520S	Financial Mgmt In Lab Anim Sci	3.0
MLAS 521S	Arch Eng & Plan For Anim Fac	4.0
MLAS 523S	Organizational Management	3.0
MLAS 525S	Animal Anatomy	2.0
MLAS 535S	Biology & Care Of Lab Animals	4.0
MLAS 536S	Animal Models for Biomedical Research	1.0
MLAS 606S	Clinical Laboratory Techniques and Concepts	1.0
MLAS 610S	Diseases of Laboratory Animals	3.0
MLAS 801S	Laboratory Animal Practicum	12.0
Electives		
Students must select a minimu	um of 6.0 credits from the following:	6.0
MLAS 500S	Animal Nutrition	
MLAS 502S	Occupational Safety and Health in Laboratory Animal Care and Use Programs	
MLAS 513S	Biochemical Basis of Disease (Upenn)	
MLAS 514S	Hematopoiesis (Upenn)	
MLAS 529S	Molecular Genetics	
IHS 514S	Molecular Biology & Biochemistry of the Cell	
MSPA 520S	Medical Terminology	
MSPA 580S	Medical Microbiology I	
MLAS 530S	Biostats In Vet Science	
MLAS 531S	Embryology	
MLAS 545S	Fundamentals of Histology	
MSPP 511S	Concepts in Biochemistry and Cell Biology	
PHGY 503S	Graduate Physiology	
	Graduate Pharmacology	

## Sample Plan of Study

## **Medical Science**

Major: Medical Science Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 59.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 11-9121

#### About the Program

The Master of Science in Medical Science (MMS) program is a rigorous, direct-entry, two-year degree program that couples a challenging and rich curriculum with engaged and personalized student advisement. The program is designed to provide talented students with both medical knowledge and research competencies.

The first and second years of study focus on honing different skillsets. This sequence allows students to develop strong, well-rounded academic portfolios and become competitive candidates for seats in medical school or as they continue their graduate medical education.

#### **Additional Information**

Drexel University College of Medicine Division of Pre-Medical and Pre-Health Programs 245 North 15th Street, Mail Stop 344, Room 4104 NCB Philadelphia, PA 19102 215.762.4692 Email: CoM MedicalSciences@drexel.edu

### **Degree Requirements (MS)**

Students must satisfactorily complete all coursework and conduct a full year of either bench-top or clinical research with a primary investigator. Successful completion of the program requires a minimum GPA of 3.0.

Can be taken in either the fall or spring semester of second year

## Medical Science (MD/MS)

Major: Medical Science Degree Awarded: Medical Doctor/Master of Science (MD/MS) Calendar Type: Semester Minimum Total Credit Hours: 30.0 Classification of Instructional Programs (CIP) code: 26.9999 Standard Occupational Classification (SOC) code: 11-9121

#### About the Program

The MD/MS in Medical Science (MD-MS) dual-degree program is designed to prepare physician scientists for careers as lifetime learners. The program is built on the foundation that clinical medicine and biomedical research enjoy a unique synergy. Physician scientists are uniquely poised to recognize, understand, apply, and expand clinical applications of basic research or identify novel or emerging areas of scientific inquiry that are needed to support clinical efforts.

The MD/MS degree in Medical Science would accept Drexel medical students who are in good academic standing following completion of the required medical school coursework as outlined in the plan of study and transfer them into the Graduate School of Biomedical Sciences and Professional Studies where they would be enrolled in the second year of the MMS program. At the end of this year, if they successfully complete MMSP 501S, MMSP 502S, MMSP 503S, and MMSP 504S, these students are eligible for the Master of Science in Medical Science.

At the conclusion of this one-year course of study, students will transfer back to the medical school to complete their requirements for the MD degree.

#### Additional Information

# **Microbiology and Immunology**

Major: Microbiology and Immunology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 45.0 (MS, non-thesis); 54.0 (MS, thesis); Classification of Instructional Programs (CIP) code: 26.0599 Standard Occupational Classification (SOC) code: 19-1022

### About the Program

The Department of Microbiology and Immunology offers students MS and PhD degrees. The programs are designed to promote understanding of the molecular mechanisms of infectious diseases. The department has research programs in the areas of parasitic, viral, and opportunistic infections; bacterial pathogenesis and genomics; inflammation and immunology; and drug development driven by investigators with national and international reputations and with extended histories of extramural funding from the NIH, as well as other sources of funding. Students are provided with a curriculum of integrated courses that include the essentials for biomedical research as well as courses that emphasis host-pathogen interactions through a molecular pathogenesis series of courses on viruses, bacteria, fungi, and parasites, as well as immunology. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The MS program provides students a broad background in microbiology and immunology and the techniques used in microbiology and immunology research. There are both a thesis and non-thesis option for an MS degree. The thesis option combines course-work with a novel research project. The non-thesis degree program allows students to earn the degree without a research project by taking additional classes and writing a literature review paper. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program. The average amount of time to completion is two years.

#### **Additional Information**

For more information, visit the College of Medicine's Microbiology and Immunology program (https://drexel.edu/medicine/academics/graduate-school/ microbiology-immunology/) website.

#### **Admission Requirements**

Students interested in all types of pathogens (viral, bacterial, fungal, parasitic) and the host response to these interactions are encouraged to apply. There are no minimal requirements, but applicants should be competitive with regard to grades, research experience, and letters of recommendation. Applicants are encouraged to use email to contact the program director or any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine: School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

### **Additional Information**

## **Microbiology and Immunology PhD**

Major: Microbiology and Immunology Degree Awarded: Doctor of Philosophy (PhD) Calendar Type: Semester Minimum Required Credits: 132.0 Classification of Instructional Programs (CIP) code: 26.0599 Standard Occupational Classification (SOC) code: 19-1022

#### **About the Program**

The Department of Microbiology and Immunology offers students a PhD degree. The program is designed to promote understanding of the molecular mechanisms of infectious diseases. The department has research programs in the areas of parasitic, viral, and opportunistic infections; bacterial pathogenesis and genomics; inflammation and immunology; and drug development driven by investigators with national and international reputations and with extended histories of extramural funding from the NIH, as well as other sources of funding. Students are provided with a curriculum of integrated courses that include the essentials for biomedical research as well as courses that emphasis host-pathogen interactions through a molecular pathogenesis series of courses on viruses, bacteria, fungi, and parasites, as well as immunology. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The PhD program trains individuals to conduct independent hypothesis-driven research and to teach in the fields of microbiology and immunology. The program includes two years of coursework as well as original research leading to published thesis work. Laboratory rotations begin in the fall of the first year. The average amount of time to completion is five years.

# **Molecular and Cell Biology and Genetics**

Major: Molecular and Cell Biology and Genetics Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 37.0 (MS, non-thesis); 53.0 (MS, thesis); Classification of Instructional Programs (CIP) code: 26.0210 Standard Occupational Classification (SOC) code: 11-9121

### About the Program

The interdisciplinary, research-oriented Molecular and Cell Biology and Genetics program offers both MS and PhD degrees. The program provides a broad education-training program for graduate students interested in biomedical problems that cross disciplinary boundaries and offers the opportunity for students to choose from approximately 60 faculty members in 10 different departments/centers to pursue their research interests. Our curriculum and research activities are tailored to students' needs and interests. Consequently, students can pursue a diverse variety of projects that range from the design and development of new therapeutic treatment strategies to the characterization of the molecular mechanisms that underlie various cellular processes and diseases. This intensive and research-oriented program provides students with opportunities to perform cutting-edge biomedical research employing multidisciplinary strategies. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

In the MS program, the focus is on strengthening the student's grasp of molecular biology and biotechnology and on providing experience and knowledge of research methods available in this fast-expanding field. This program is designed to prepare students for competitive industry jobs and for acceptance into PhD programs. Our MS students take the same courses as our PhD students, while also gaining extensive biomedical research experience. Students who wish to continue their graduate training after the MS degree may apply to the PhD program, and their credits may be applied to the doctoral program. In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper.

### **Additional Information**

For more information, visit the College of Medicine's Molecular and Cell Biology and Genetics program (https://drexel.edu/medicine/academics/graduate-school/molecular-cell-biology-genetics/) website.

# **Admission Requirements**

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

### **Additional Information**

To learn more about applying to Drexel College of Medicine programs, visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (http://www.drexel.edu/medicine/Academics/Graduate-School/) website.

## About the Curriculum

Background courses in biochemistry, molecular and cell biology, and integrative biology are taken during the first academic year. In addition, every student carries out short research projects in three different laboratories during the first year. This exposure to research not only gives the student broad research training, but also helps the student to select a thesis advisor at the end of the first academic year. In the second year, the student begins thesis research and takes several advanced courses, tailored to the student's individual interests.

The program offers a weekly seminar series with invited external and intramural speakers who address the program's broad research interests. Journal Club members meet weekly in an informal setting to present results of interest from the current literature.

### **Courses Repeatable for Credit**

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

### **Additional Information**

For more information, including scheduling a plan of study, visit the College of Medicine's Molecular and Cell Biology and Genetics program (https:// drexel.edu/medicine/academics/graduate-school/molecular-cell-biology-genetics/) website.

# Molecular and Cell Biology and Genetics PhD

Major: Molecular and Cell Biology and Genetics Degree Awarded: Doctor of Philosophy (PhD) Calendar Type: Semester Minimum Required Credits: 127.0 Classification of Instructional Programs (CIP) code: 26.0210 Standard Occupational Classification (SOC) code: 11-9121

## About the Program

The interdisciplinary, research-oriented Molecular and Cell Biology and Genetics program offers a PhD degree. The program provides a broad education-training program for graduate students interested in biomedical problems that cross disciplinary boundaries and offers the opportunity for students to choose from approximately 60 faculty members in 10 different departments/centers to pursue their research interests. Our curriculum and research activities are tailored to students' needs and interests. Consequently, students can pursue a diverse variety of projects that range from the design and development of new therapeutic treatment strategies to the characterization of the molecular mechanisms that underlie various cellular processes and diseases. This intensive and research-oriented program provides students with opportunities to perform cutting-edge biomedical research employing multidisciplinary strategies. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

This program is research focused, with the ultimate goal of training students to become leaders of scientific research in academics and industry. In addition to completing the curriculum requirements, PhD students must pass a preliminary exam and qualifying exam at the end of their first and second years, respectively.

# **Molecular Medicine**

Major: Molecular Medicine Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 36.0 Classification of Instructional Programs (CIP) code: 26.0204 Standard Occupational Classification (SOC) code: 19-1029

## About the Program

### **Mission Statement**

The Master of Science in Molecular Medicine program, offered by the Department of Microbiology and Immunology and by the Institute for Molecular Medicine and Infectious Disease (IMMID), provides education and training in areas of research in human health at the molecular level. Students in this program acquire theoretical and practical knowledge about normal body functions and disease pathogenesis at the molecular level. Students also learn how this knowledge is applied to develop novel tools for diagnosis, treatment, prognosis, and prevention of disease. Graduates from this program will be ready to enter the biotechnology workforce and are attractive candidates for doctoral programs in science and medicine.

The Master of Science in Molecular Medicine program is designed to provide academic and practical biotechnological knowledge in translational research, particularly in the areas of molecular therapeutics and vaccine development.

### Curriculum

The two year non-thesis program encompasses fundamental requirements to establish a sound grounding in microbiology, biochemistry, genetics, and molecular biology. The program is typically completed in two full-time years (four semesters of at least 9.0 credits) of required and elective graduate courses and one or more experiential research components in the first or second year. The flexibility of the curriculum enables students to complete the degree requirement within 18 months on an accelerated basis and up to four years on a part-time basis. The successful completion of the degree will be determined by grades obtained in the graduate courses, participation in seminars and journal clubs, and performance in the research component. A minimum of 36.0 credits is required to graduate with at least 6.0 of those earned as research credits.

The experiential research component of the curriculum can be fulfilled by two alternative approaches. Most students choose to engage in an intensive 6.0 credit hands-on research internship in which a 12-16 week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in a a less intensive experience spanning two semesters, or conduct an independent research project, with the approval and supervision of program directors.

### Traditional (Face-to-Face), Hybrid, or Online Learning Options

Classes can be attended at any of Drexel College of Medicine locations: Center City and Queen Lane campuses in Philadelphia. State-of-the-art video conferencing provides real-time interactive learning at these locations. Most classes are held in the late afternoon/early evening to facilitate participation of working professionals. The program may also be completed fully online, offered through Drexel University Online. All required courses and most electives have online sections and online students experience the same curriculum as face-to-face or hybrid students. Online sections are designed to maximize interactions among students and faculty and may include live web sessions. Individual students also may choose a mix of traditional and online courses (hybrid). The goal is to provide maximum scheduling flexibility.

### **Additional Information**

For more detailed information about the curriculum and program goals, please contact either:

Pamela Norton, PhD Email: pan29@drexel.edu

Stephen Jennings, PhD Email: srj32@drexel.edu

## **Admission Requirements**

For acceptance into the Master of Science in Molecular Medicine program, the applicant must have completed a four-year, biology or chemistry-based BA or BS degree program with undergraduate coursework in biology, microbiology, immunology, chemistry, biochemistry, mathematics, and/or other related subjects. Although a minimum cumulative grade point average (GPA) of 3.00 is strongly desired, an applicant with a lower cumulative GPA will be considered if other strengths are apparent in the application.

To be considered for acceptance, an applicant must provide the following as part of a complete online application for admission:

- · Official transcripts from all colleges and universities attended
- A current curriculum vitae (CV) or resume
- · References from at least three instructors or professionals

Although standardized test scores are not required for admission, official copies of scores from the Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) will be considered if submitted as part of the application.

International applicants (non-United States citizens) must meet the same requirements for admission as students from the United States. In addition to the above requirements, applicants whose native language is not English must demonstrate the ability to speak, write, and understand the English language by submitting an acceptable score from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS).

Acceptance into the program will be decided by considering the sum of the applicant's undergraduate curriculum, cumulative GPA, GRE/MCAT scores, recommendation letters, and relevant research or professional experiences.

Online applications are considered year-round. Potential students are encouraged to apply no later that July 1 for fall admission or December 1 for spring admission.

### Additional Information

For more information about the program and to access the online application, view the College of Medicine's MS in Molecular Medicine (https:// drexel.edu/medicine/academics/graduate-school/molecular-medicine/) webpage.

# **Degree Requirements**

Through the combination of required and elective courses, a total of 36.0 credits is required to successfully obtain the degree of Masters of Science in Molecular Medicine. In order to maintain full-time student status, a minimum of 9.0 credits must be taken in any given academic semester. In most cases, there are both traditional (face-to-face) and online sections for each course. Students should work with their program advisors to plan their course of study.

### **Research Requirements**

The research component of the curriculum can be fulfilled by two alternative approaches. Most student choose to engage in a hands-on research internship in which a 12-week research program will be undertaken in a laboratory at Drexel, another academic institution, or at a biotechnology or biopharmaceutical company. Alternatively, students may choose to engage in an independent research project with the approval and supervision of program directors.

For an individualized plan of study listing the sequence of courses to be completed, students should work with their program advisor.

Required Courses		
IDPT 500S	Responsible Conduct of Research	2.0
or MIIM 503S	Biomedical Ethics	
IDPT 501S	Biostatistics I	2.0
or MIIM 517S	Applied Statistics for Biomedical Sciences	
MIIM 527S	Immunology, Immunopathology and Infectious Diseases	3.0

### **Program Goals**

Over the course of completing the program, students will develop:

- · Core knowledge of molecular and cellular disciplines that constitute biomedical sciences
- · Working knowledge of normal body functions at the molecular level and how these are altered in states of disease
- · Practical knowledge and skills that help identify gaps in the biomedical field for the development of molecular diagnostic and therapeutic tools
- · Skills in basic, translational, and/or clinical research
- · Professional ethics necessary for the responsible conduct of research
- · Communication and leadership skills
- · Other soft skills (e.g. collaboration, problem solving, career planning, networking) that facilitate career advancement and promotion

In the course of meeting these program-level goals, students will have also made progress in all of the Drexel Student Learning Priorities (DSLPs) (https://drexel.edu/provost/offices/assessment/outcomes/dslp/) to help them build their futures.

#### Core Intellectual and Practical Skills:

- Communication
- · Critical and creative thinking
- · Ethical reasoning
- Information literacy
- · Self-directed learning
- · Technology use

#### **Experiential and Applied Learning:**

- · Global competence
- · Leadership
- Professional practice
- · Research, scholarship and creative expression
- · Responsible citizenship

# Neuroscience

Major: Neuroscience Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 38.5 (MS, non-thesis); 55.5 (MS, thesis); Classification of Instructional Programs (CIP) code: 26.1501 Standard Occupational Classification (SOC) code: 11-9121

### About the Program

The College of Medicine School of Biomedical Sciences and Professional Studies offers an interdepartmental and multidisciplinary graduate program in Neuroscience leading to MS and PhD degrees. The program provides a vibrant research component for both MS and PhD degrees leading to published scientific work in reputable journals, as well as training in the panoply of research and presentation skills required to conduct and disseminate the research. Students are provided with a curriculum of integrated courses that include the essentials for biomedical research and courses that span cellular, developmental, systems, and behavioral neurosciences, as well as neuroanatomy and injury and disease of the nervous system. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The MS program provides students a broad background in neuroscience and the techniques used in neuroscience research. In addition to the thesisbased MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper. Students who wish to continue their graduate training after the MS degree may apply to the PhD program and their credits may be applied to the doctoral program.

### **Additional Information**

For more information, visit the College of Medicine's Neuroscience program (https://drexel.edu/medicine/academics/graduate-school/neuroscience/) website.

# **Admission Requirements**

Students interested in cellular, systems (including neuro-engineering,) and behavioral neuroscience are encouraged to apply. There are no minimal requirements but applicants should be competitive with regard to grades, GRE scores, research experience, and letters of recommendation. Applicants are encouraged to use email to contact any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine, School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early as decisions to accept or deny admission may be made before the official deadlines.

### **Additional Information**

To learn more about applying to Drexel College of Medicine programs, visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (https://drexel.edu/medicine/academics/graduate-school/) website.

# About the Curriculum

Students in both the PhD and MS programs begin their coursework with a core curriculum. The curriculum consists of a series of core courses that are shared by all of the biomedical graduate programs in the medical school and a series of programmatic courses. All students in the Neuroscience program must take the core curriculum, although the possibility exists for students to be excused from a particular course if they are able to prove that they already have the necessary knowledge required of the particular course.

During the second year, students select elective courses and begin their thesis research in consultation with the Advisory-Examination Committee. At the end of the second year, students take a comprehensive examination to qualify for PhD candidacy.

There are three rotations in the curriculum for which the student will be assigned a grade. The purpose of these rotations is to enable the student to select the most appropriate graduate advisor to supervise the research project for the student. The Neuroscience program director and Steering Committee will advise each student on the selection of rotations, as well as on the progress and outcome of rotations. Flexibility will be afforded in certain situations in which the student may be able to select an advisor before completing all three rotations or in situations wherein it is advisable to terminate a particular rotation early in favor of another choice.

### **Courses Repeatable for Credit**

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar, and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

## **MS Degree Requirements: Non-Thesis Option**

Required Courses

# **Neuroscience PhD**

Major: Neuroscience Degree Awarded: Doctor of Philosophy (PhD) Calendar Type: Semester Minimum Required Credits: 123.5 Classification of Instructional Programs (CIP) code: 26.1501 Standard Occupational Classification (SOC) code: 11-9121

## About the Program

The College of Medicine School of Biomedical Sciences and Professional Studies offers an interdepartmental and multidisciplinary graduate program in Neuroscience leading to the PhD degrees. The program provides a vibrant research component leading to published scientific work in reputable journals, as well as training in the panoply of research and presentation skills required to conduct and disseminate the research. Students are provided with a curriculum of integrated courses that include the essentials for biomedical research and courses that span cellular, developmental, systems, and behavioral neurosciences, as well as neuroanatomy and injury and disease of the nervous system. Upon completing these programs, students pursue careers in academic, governmental, or industrial settings.

The PhD program trains individuals to conduct independent hypothesis-driven research and to teach in the neurosciences. The program includes two years of coursework as well as original research leading to published thesis work. Laboratory rotations begin in the fall of the first year.

#### **Additional Information**

For more information, visit the College of Medicine's Neuroscience program (https://drexel.edu/medicine/academics/graduate-school/ neuroscience/) website.

### **Admission Requirements**

Students interested in cellular, systems (including neuro-engineering,) and behavioral neuroscience are encouraged to apply. There are no minimal requirements but applicants should be competitive with regard to grades, GRE scores, research experience, and letters of recommendation. Applicants are encouraged to use email to contact any of the faculty of the program with whom they may share scientific interests to discuss their suitability to the program and/or potential projects in relevant laboratories.

The Drexel University College of Medicine, School of Biomedical Sciences and Professional Studies has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early as decisions to accept or deny admission may be made before the official deadlines.

### **Additional Information**

To learn more about applying to Drexel College of Medicine programs, visit the College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (https://drexel.edu/medicine/academics/graduate-school/) website.

### About the Curriculum

Students in both the PhD and MS programs begin their coursework with a core curriculum. The curriculum consists of a series of core courses that are shared by all of the biomedical graduate programs in the medical school and a series of programmatic courses. All students in the Neuroscience program must take the core curriculum, although the possibility exists for students to be excused from a particular course if they are able to prove that they already have the necessary knowledge required of the particular course.

During the second year, students select elective courses and begin their thesis research in consultation with the Advisory-Examination Committee. At the end of the second year, students take a comprehensive examination to qualify for PhD candidacy.

There are three rotations in the curriculum for which the student will be assigned a grade. The purpose of these rotations is to enable the student to select the most appropriate graduate advisor to supervise the research project for the student. The Neuroscience program director and Steering Committee will advise each student on the selection of rotations, as well as on the progress and outcome of rotations. Flexibility will be afforded in certain situations in which the student may be able to select an advisor before completing all three rotations or in situations wherein it is advisable to terminate a particular rotation early in favor of another choice.

### **Courses Repeatable for Credit**

As well as taking all required courses, MS and PhD students may re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar, and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

### **Degree Requirements**

For additional graduation requirements, refer to the School of Biomedical Sciences and Professional Studies Handbook and the Neuroscience Program Policies and Procedures (https://drexel.edu/medicine/academics/graduate-school/neuroscience/).

During the third year, students develop a plan for their doctoral research in conjunction with their thesis advisor. A formal, written thesis proposal is then presented to the student's Thesis Advisory Committee. Acceptance of this proposal after oral examination by the Committee leads to the final stage of doctoral training. PhD candidates then spend the majority of their time on thesis research. After concluding their research, they must submit and publicly defend their thesis before the Thesis-Examination Committee.

PhD students may enroll in courses having the status "repeatable for credit" (such as journal club, seminar, and research courses) for the duration of their program in order to meet the degree completion requirement of credits.

# Pathologists' Assistant

Major: Pathologists' Assistant Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 91.0 Classification of Instructional Programs (CIP) code: 51.0811 Standard Occupational Classification (SOC) code: 29-2055

### About the Program

The School of Biomedical Sciences and Professional Studies offers the Master of Science in Pathologists' Assistant (PathA). The pathologists' assistant is an intensely trained allied health professional who provides anatomic pathology services under the direction and supervision of a pathologist. Pathologists' assistants interact with pathologists in the same manner that physicians' assistants carry out their duties under the direction of physicians in surgical and medical practice.

The PathA program offers students the opportunity to train in the highly specialized field of anatomic pathology. This two-year, full-time program begins in May of each year. The first year is comprised of the instructional portion of the program supplemented by pathology laboratory exposure. The second year of the program is composed of several hospital-based clinical rotations offering progressively responsible experience in autopsy and surgical pathology. These rotations are supplemented with informal classroom education.

### **Program Accreditation**

The National Accrediting Agency for Clinical Laboratory Sciences (NAACLS): NAACLS, in conjunction with the AAPA, has established national standards for pathologists' assistant training programs. The standards include both didactic coursework and clinical experiences necessary to properly educate a pathologists' assistant. The Master of Science in Pathologists' Assistant program at the Drexel University College of Medicine is accredited by NAACLS. Visit the NAACLS (http://www.naacls.org/) website for more information about the professional activities of this organization.

### **Professional Certification**

The American Society for Clinical Pathology Board of Registry (ASCP BOC): The ASCP BOC, in conjunction with the AAPA, has established a national certification program for pathologists' assistants. In 2005, the ASCP BOC first offered a national certification examination for pathologists' assistants. In order to be eligible for the BOC examination, applicants must be graduates of a pathologists' assistant educational program accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS). Visit the ASCP BOC (https://www.ascp.org/content/Board-of-Certification/) website to read more about the certification program and the professional activities of this organization.

### **Professional Affiliation**

The American Association of Pathologists' Assistants (AAPA): The AAPA is the only national professional organization for pathologists' assistants.

The AAPA:

- Is a not-for-profit, volunteer organization dedicated to advancing the pathologists' assistant profession by providing its members with education, networking, and professional support;
- · Supports professional competency through program accreditation and individual certification; and
- Promotes public and professional awareness of the pathologists' assistant as an integral member of the healthcare team.

Visit the AAPA (https://www.pathassist.org/) website for more additional information about this association.

### **Career Opportunities**

Pathologists' assistants are employed in community hospitals, academic centers such as medical schools and university hospitals, private pathology laboratories, medical research centers, government hospitals, and medical examiner offices.

### **Additional Information**

For more information about this program, visit the College of Medicine's Master of Science in Pathologists' Assistant (https://drexel.edu/medicine/ academics/graduate-school/pathologists-assistant-patha/) program webpage.

## **Admission Requirements**

A pathologists' assistant is someone who has the ability to relate to people, the capacity for calm and reasoned judgment, and who demonstrates a commitment to quality patient care.

The program's courses and content are ideal for:

- Recent graduates with a degree in a biological or allied health science with exposure to anatomy, physiology, chemistry, and microbiology. Previous exposure to pathology is recommended.
- · Allied health professionals, particularly cytotechnologists, histotechnologists and medical technologists

### **Admission Requirements**

Students will be selected on the basis of adequate educational background and medical experience. A bachelor's degree in a biological or allied health science with a cumulative GPA of at least 3.0 is the minimum requirement for acceptance into the program. Prerequisite coursework will include microbiology, human anatomy, physiology, mathematics, English composition, general chemistry, organic and/or biochemistry, and biological science.

All candidates will be required to have a formal interview with the Selection Committee prior to final acceptance. The deadline for submission of the application is the second Friday in February of the year in which the students plan to enroll.

Candidates for admission must provide the following credentials:

- · Completed application form
- Resume
- · Official transcripts from all college or university attended or where coursework was attempted or taken
- · Official General Graduate Record Examination (GRE) scores
- Three letters of evaluation
- Self-assessment essays:
  - · Discuss personal goals, conditions, or career aspirations that motivate you to pursue graduate study at Drexel University.
  - · What are your most important accomplishments?
  - · What do you expect to achieve through this program?

### Additional Information

# Pharmacology and Physiology

Major: Pharmacology and Physiology Degree Awarded: Master of Science (MS) Calendar Type: Semester Minimum Required Credits: 45.0 (MS, non-thesis); 62.0 (MS, thesis); Classification of Instructional Programs (CIP) code: 26.1002 Standard Occupational Classification (SOC) code: 19-1042

### About the Programs

The College of Medicine's Graduate School of Biomedical Sciences and Professional Studies offers graduate programs leading to the MS degree in Pharmacology & Physiology. The programs require independent research under the direction of departmental faculty members who are engaged in highly active research programs involving molecular, cellular, and behavioral approaches to experimental pharmacology and physiology in a strongly collaborative environment.

Students begin their coursework with a core curriculum in biomedical sciences, and immediately start laboratory rotations. Intensive graduate level pharmacology, physiology and neuropharmacology courses round out the core programmatic courses. Specialization in ion channel physiology, smooth muscle physiology, behavioral pharmacology and signal transduction processes may involve the taking of several elective courses. Each program requires the defense of a thesis based on original research.

The MS program, requiring two years of full-time study, provides a broad knowledge and technical expertise in pharmacology and physiology, allowing graduates to become partners in research in either an academic or an industrial environment. Students who wish to continue their graduate studies after the MS degree may apply to the PhD program, and their course credits may be applied to the doctoral program.

In addition to the thesis-based MS program, Drexel offers a non-thesis degree program in which students can earn the degree without a research project by taking additional classes and writing a literature review paper.

### **Additional Information**

For more information, visit the College of Medicine's Pharmacology and Physiology program (https://drexel.edu/medicine/academics/graduate-school/pharmacology-physiology/) website.

# **Admission Requirements**

Drexel University College of Medicine has a rolling admissions policy, which means that complete applications are reviewed as they are received. Applicants are therefore advised to apply early, as decisions to accept or deny admission may be made before the official deadlines.

### **Additional Information**

To learn more about applying to Drexel College of Medicine programs visit the Drexel College of Medicine's Graduate School of Biomedical Sciences and Professional Studies (http://www.drexel.edu/medicine/Academics/Graduate-School/) website.

# **Degree Requirements (MS)**

### About the Curriculum

The core curriculum is a comprehensive interdisciplinary program of study for all first-year research master's students in the Division of Biomedical Science Programs. The goal of the core curriculum is to provide a broad foundation in biomedical sciences and serve as a framework for advanced study in more specialized areas.

### **Courses Repeatable for Credit**

As well as taking all required courses, students will re-enroll in courses having the status "repeatable for credit" (such as journal club, seminar and research courses) for the duration of their program in order to meet the total number of credits required for graduation.

### **Additional Information**

For more information about the program, please visit the College of Medicine's Pharmacology and Physiology program (https://drexel.edu/medicine/ academics/graduate-school/pharmacology-physiology/) webpage.

Major: Pharmacology and Physiology Degree Awarded: Doctor of Philosophy (PhD) Calendar Type: Semester Minimum Required Credits: 128.0 Classification of Instructional Programs (CIP) code: 26.1002 Standard Occupational Classification (SOC) code: 19-1042

### About the Program

The College of Medicine's Graduate School of Biomedical Sciences and Professional Studies offers graduate programs leading to the PhD degree in Pharmacology & Physiology. The program requires independent research under the direction of departmental faculty members who are engaged in highly active research programs involving molecular, cellular, and behavioral approaches to experimental pharmacology and physiology in a strongly collaborative environment.

Students begin their coursework with a core curriculum in biomedical sciences, and immediately start laboratory rotations. Intensive graduate level pharmacology, physiology and neuropharmacology courses round out the core programmatic courses. Specialization in ion channel physiology, smooth muscle physiology, behavioral pharmacology and signal transduction processes may involve the taking of several elective courses. The program requires the defense of a thesis based on original research.

PhD candidates must pass a qualifying examination by November of their third year and they must have one accepted co-author manuscript, and one submitted first-author manuscript in peer-reviewed journals during the course of the program.

# **Graduate Minor in Clinical Research Organization and Management**

### **About the Graduate Minor**

The minor in Clinical Research Organization and Management provides exposure to several important elements involved in the development of new therapeutics. This program has been designed to help students transition to a productive career within the pharmaceutical and biotechnology industry. The program provides graduate students with an overview of the conduct of clinical investigations while introducing participants to relevant business, legal, and ethical issues.

### **Admission Requirements**

Requirements for admission are enrollment in a biomedical science, biomedical engineering, or biology graduate program and the approval of the parent program's director.

### **Program Requirements**

Required courses		
CR 515S	Intro to Clinical Trials	3.0
CR 545S	Pharmaceutical Law	3.0
Electives		3.0
Select one of the following:		
CR 500S	Epidemiology	
CR 505S	Ethical Issues in Research	
CR 512S	Fundamentals of Academic Research Administration	
CR 513S	Business Processes and Contemporary Concerns in Pharmaceutical R & D	
CR 520S	Applications of Clinical Research Biostatistics	
CR 525S	Scientific Writing and Medical Literature	
CR 535S	Current Federal Regulatory Issues in Biomedical Research	
CR 550S	Leadership Skills	
CR 565S	Contemporary Issues in Human Research Protection	
CR 570S	Principles and Practice of Pharmacovigilance	
CR 600S	Designing the Clinical Trial	
CR 612S	Fundamentals of Compliance	
CR 614S	Introduction to Clinical Pharmacology	
Total Credits		9.0

Courses not listed above may be taken as electives only with the approval of the program director.

# **Graduate Minor in Drug Discovery and Development**

### About the Graduate Minor

The graduate minor in Drug Discovery and Development provides exposure to the multiple elements involved in the discovery and development of prescription medications. It has been designed to familiarize students with important applications of biomedical research and to facilitate a transition to the pharmaceutical or biotechnology industry. It covers all aspects of drug discovery and development ranging from the identification and validation of molecular targets through to regulatory approval and commercialization. Students will also be exposed to critical clinical, legal and business aspects associated with the successful development of a marketed drug.

### **Admission Requirements**

Requirements for admission are enrollment in a biomedical science, biomedical engineering, or biology graduate program and the approval of the parent program's director.

### **Program Requirements**

# **Pre-Veterinary Graduate Minor**

### About the Graduate Minor

Students desiring to attend veterinary medical school will have the option to elect to complete a pre-vet minor within the Master of Laboratory Animal Science (MLAS) program (p. 62). The addition of these courses to the MLAS program will help to further enhance the student's application to veterinary medical school by providing additional rigorous and relevant graduate level coursework.

9.0

9.0

9.0

### **Admission Requirements**

Students will be selected on the basis of adequate educational background and veterinary/research/animal care experience.

Prerequisite coursework includes chemistry, biology, organic chemistry, and physics.

Admission into the PVET minor is primarily open to MLAS students. Admission into the minor by other program students is at the discretion of the MLAS program director in concert with the director/academic advisor of the potential applicant.

### **Program Requirements**

Choose 9.0 credits from the list below:

IHS 514S	Molecular Biology & Biochemistry of the Cell
MLAS 500S	Animal Nutrition
MLAS 545S	Fundamentals of Histology
MSPA 520S	Medical Terminology
MSPA 580S	Medical Microbiology I
MSPP 511S	Concepts in Biochemistry and Cell Biology
PHGY 503S	Graduate Physiology
PHRM 512S	Graduate Pharmacology

**Total Credits** 

# **Certificate in Clinical Research**

Certificate Level: Graduate Admissions Requirements: Bachelor's degree or higher Certificate Type: Post-Baccalaureate Number of Credits to Completion: 15.0 Instructional Delivery: Online Calendar Type: Semester Expected Time to Completion: 1.5 years Financial Aid Eligibility: Not aid eligible Classification of Instructional Program (CIP) Code: 51.0719 Standard Occupational Classification (SOC) Code: 11-9111

### About the Program

This part-time certificate program is a valuable professional resource for today's busy physicians, physician assistants, nurses, clinical fellows, research coordinators, and other individuals working in the clinical arena who want in-depth exposure to the skills and knowledge needed in the evolving clinical research field without having to commit to an entire master's program. All courses are conducted online to accommodate the needs of working professionals.

This program requires the successful completion of five graduate courses. Credits earned in the certificate program are recognized towards the Master of Science in Clinical Research Organization and Management. (http://online.drexel.edu/online-degrees/biomedical-degrees/ms-crom/)

### **Admission Requirements**

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

Cumulative GPA of 3.0 (graduate degree GPA will be considered along with the undergraduate GPA)

#### **Required documents:**

- A completed application
- · Official transcripts from all universities of colleges and other post-secondary educational institutions (including trade schools) attended
- Two letters of recommendation
- · Essay on your past successes, goals, and objectives for pursuing this program
- Resume
- · Additional requirements for international students

A telephone interview may be requested.

### **Additional Information**

Kamran Mohiuddin, M.D., M.B.A., FAPCR Director, Graduate Programs in Clinical Research km3668@drexel.edu 215-762-3812

Visit the Drexel University Online website for more program information and to apply to the certificate (http://online.drexel.edu/online-degrees/ biomedical-degrees/cert-cr/) program.

## **Program Requirements**

Intro to Clinical Trials	3.0
Pharmaceutical Law	3.0
Fundamentals of Compliance	3.0
	6.0
nent	
Scientific Writing and Medical Literature	
Designing the Clinical Trial	
Innovative Product Development	
Introduction to Clinical Pharmacology	
Regulatory, Scientific and Social Issues Affecting Biotech Research	
	Pharmaceutical Law Fundamentals of Compliance  Temperature  Scientific Writing and Medical Literature Designing the Clinical Trial Innovative Product Development Introduction to Clinical Pharmacology

Compliance and Safety Surveillance

# **Certificate in Drug Discovery and Development**

Certificate Level: Graduate Admissions Requirements: Bachelor's degree or higher Certificate Type: Post-baccalaureate Number of Credits to Completion: 15.0 Instructional Delivery: Online Calendar Type: Semester Expected Time to Completion: 2 years Financial Aid Eligibility: Aid eligible\* Classification of Instructional Program (CIP) Code: 26.1001 Standard Occupational Classification (SOC) Code: 19-1042 \*The current plan of study for this program would only allow for federal financial aid (including Federal Direct Student Loans) for terms that are at least a minimum of 4.5 credits for graduate courses and 6.0 credits for undergraduate courses. This is based on current regulations from the U.S. Department of Education.

# About the Program

The certificate in Drug Discovery and Development program provides in-depth exposure to the multiple elements involved in the discovery and development of prescription medications. This program has been designed to help students establish an enduring and productive career and advance within the pharmaceutical and biotechnology industry. It covers all aspects of drug discovery and development ranging from the identification and validation of molecular drug targets through to regulatory approval and commercialization. Students will also be exposed to critical clinical, legal and business aspects associated with the successful development of a marketed drug. There is also an extensive range of elective courses that provide specialized training in specific elements of the discovery and development process. It should be noted that this is a "stackable" certificate and all completed courses in this program can be applied towards a Master's Degree in Drug Discovery and Development.

The certificate in Drug Discovery and Development is available to individuals who have already obtained a BS or BA degree in the life, physical or health sciences who may wish to pursue industry-focused training. This includes individuals who wish to have a broader base of information about drug discovery and development, those who may wish to transition into the industry, or those who have recently transitioned into the industry. The curriculum has been designed with the recognition that the complex and specialized nature of the pharmaceutical and biotechnical industries requires a diversity of expertise.

### **Admission Requirements**

Students must meet all entrance requirements of the MS program. The applicant must have completed a four-year bachelor's degree, nursing degree or equivalent program in a relevant subject area with a preferred GPA of at least 2.75. All students must submit two confidential letters of recommendation, a personal statement explaining their interest in the program and all previous official educational transcripts. No standardized test is required for admission but if one has been taken, such as the GRE and MCAT, the scores should be submitted for review. The merit of each applicant will be evaluated by the admissions committee of the program and all qualifications, including professional experience will be taken into consideration.

# **Human Lactation Consultant**

Certificate Level: Undergraduate Admission Requirements: Associate's degree Certificate Type: Certificate Number of Credits to Completion: 16.0 Instructional Delivery: Campus Calendar Type: Semester Expected Time to Completion: 1 year Financial Aid Eligibility: Aid eligible Classification of Instructional Program (CIP) Code: 51.0815 Standard Occupational Classification (SOC) Code: 31-9099

### About the Program

The Human Lactation Consultant Program is designed to provide an opportunity for individuals interested in becoming Internationally Board Certi#ed Lactation Consultants (IBCLCs) to obtain the required 90 hours of didactic coursework and 300 hours of supervised practice to be eligible to sit for the certi#cation exam. The courses are designed for current Drexel students, practicing health care and public health professionals outside of Drexel, and others interested in entering the health professions. There is currently a strong global and national emphasis on increasing breastfeeding to promote health at the population level, prevent acute and chronic illness and decrease societal health care costs. The United States Surgeon General, the Centers for Disease Control and Prevention, Healthy People 2020, the Institutes of Medicine, the Joint Commission, Michelle Obama's Let's Move Campaign and many professional associations include breastfeeding as a key health strategy.

The certi#cate program consists of six 2-credit courses in lactation. The didactic coursework is offered in the classroom setting. The supervised practice is offered in clinical hospital and outpatient sites, as well as area WIC offices affiliated with Drexel.

Students who wish to become IBCLCs must complete all six courses. To be eligible to take the certifying exam given by the International Board of Lactation Consultant Examiners they must have also completed coursework including anatomy and physiology, biology, child growth and development, nutrition, psychology, which may be taken at Drexel or other institutions. Drexel has accreditation as a Pathway 2 Program with the Lactation Education Accreditation and Approval Review Committee.

### Admission Requirements

Applicants must have a minimum of an Associate's degree.

The International Board of Lactation Consultant Examiners requires education in 14 health science subjects in addition to education provided in human lactation and breastfeeding in the Certi#cate Program. Health Sciences courses may be completed either prior to enrolling in the Certi#cate Program, or while enrolled in the Certi#cate Program. All sciences courses must be completed before the Certi#cate in Human Lactation will be awarded.

A minimum of one quarter, term or semester of each of the following eight academic subjects must be completed at an accredited college or university:

- Biology
- Human Anatomy Human Physiology
- · Infant and Child Growth and Development Introduction to Clinical Research
- Nutrition
- · Psychology, OR Counseling Skills, OR Communication Skills Sociology, OR Cultural Sensitivity, OR Cultural Anthropology
- The remaining six subjects may be completed at an accredited college or university, OR through continuing education courses.
- · Basic Life Support Medical Documentation Medical Terminology
- · Occupational Safety and Security for Health Professionals Professional Ethics for Health Professionals
- · Universal Safety Precautions and Infection Control

A detailed description of acceptable coursework to ful#II these requirements is available on the International Board of Lactation Consultant Examiners (https://iblce.org/step-1-prepare-for-ibclc-certification/) website.

# Post-Baccalaureate Certificate in Molecular Basis of Cancer

Certificate Level: Graduate Admission Requirements: Bachelor's degree or higher Certificate Type: Post-Baccalaureate Number of Credits to Completion: 15.0 Instructional Delivery: Online Calendar Type: Semester Expected Time To Completion: 1.5 years Financial Aid Eligibility: Aid eligible Classification of Instructional Program (CIP) Code: 26.0911 Standard Occupational Classification (SOC) Code: 19-1029

### About the Program

We propose to establish a new online Post-Baccalaureate Certificate Program in Molecular Basis of Cancer (CMCA) in the Division of Interdisciplinary and Career-Oriented programs. This program will help expand Drexel's capacity to lead in remote learning, which is a major Drexel 2030 strategic initiative. This new program utilizes a major strength of College of Medicine faculty expertise in cancer research to train graduate students in basic,

translational, and clinical research in cancer biology. This training will prepare students for careers in cancer biology research. For career advancers who are already employed, the curriculum will expand their knowledge base to provide detailed understanding of the physiological basis of cancer. To accommodate these career advancer students, the curriculum is formatted as an online, asynchronous curriculum, compatible with part-time students.

### **Admission Requirements**

Applicant must have completed a four-year, biology or chemistry-based BA/BS degree program with a preferred GPA of at least 2.75, two confidential letters of recommendation, a personal statement explaining their interest in the program, a current résumé, and all previous official educational transcripts. No standardized test is required for admission. A Math and Science GPA form can be filled out through the Discover Drexel portal after the application is completed.

All documents submitted by you or on your behalf in support of this application for admission to Drexel University become the property of the University and will under no circumstances be released to you or any other party.

#### Transcripts

- Applicant must have completed a four-year, biology or chemistry-based BA/BS degree program with a preferred GPA of at least 2.75. Provide official transcripts from all colleges and universities attended.
- If your GPA is below this target, please briefly explain the conditions surrounding your GPA as a part of your essay (will not count toward the 500 word target).
- International students: If you have already graduated from your previous institution at the time of your application, please email your graduation certificate(s) attached as PDF or Microsoft Word documents to enroll@drexel.edu.

International Transcript Evaluation (international applicants only)

- · Transcripts must be evaluated by a Naces.org member.
- Applicants are responsible for supplying all necessary documentation and paying all necessary fees to have your transcripts evaluated. Please have the course-by-course evaluation sent to the mailing address listed below.

#### Standardized Test Scores

- The Graduate Record Exam (GRE) is not required for admission to the Molecular Basis of Cancer post-baccalaureate certificate program.
- TOEFL or IELTS scores are required for international applicants or applicants who earned a degree outside the U.S. Scores will be reviewed based on section scores and total scores.

#### Essay

- Please write approximately 500 words explaining your reasons for pursuing a degree from Drexel; your short-term and long-term career plans; and how your background, experience, interest, and/or values, when combined with a Drexel degree, will enable you to pursue these goals successfully.
- · Submit your essay with your application or through the Discover Drexel portal after you submit your application.

#### Resumé

· Upload your current resumé as part of your admission application or through the Discover Drexel Portal after you submit your application.

#### Letters of Recommendation

- Two letters of recommendation are required. To electronically request recommendations, you must list your recommenders and their contact
  information on your application. We advise that you follow up with your recommenders to ensure they received your recommendation request
   —
  they may need to check their junk mail folder. Additionally, it is your responsibility to confirm that your recommenders will submit letters by your
   application deadline and follow up with recommenders who have not completed their recommendations.
- Request recommendations with your application or through the Discover Drexel portal after you submit your application.

#### Application Fee

- · An application fee of \$75 U.S. is required.
- · For students who find this fee a hardship, please contact the program director.

#### Math Science GPA Form

· Complete your Math Science GPA form through the Discover Drexel portal after you submit your application.

# **Evening Post-Baccalaureate Pre-Medical Certificate Program**

Certificate Level: Undergraduate Admissions Requirements: Bachelor's degree Certificate Type: Post-Baccalaureate Number of Credits to Completion: 32.0 Instructional Delivery: Campus; Hybrid Calendar Type: Semester Expected Time to Completion: 2 years Financial Aid Eligibility: Not aid eligible Classification of Instructional Program (CIP) Code: 51.1199 Standard Occupational Classification (SOC) Code: 11-9121

## About the Program

The Graduate School of Biomedical Sciences and Professional Studies at Drexel University's College of Medicine offers the part-time Evening Post-Baccalaureate Pre-Medical certificate (PMED). This program gives individuals who hold a non-science baccalaureate degree the opportunity to continue working while they take courses in the evening to prepare themselves for medical, veterinary, dental, podiatric, chiropractic, or other allied health professional schools. This program also affords the individual who took science courses many years ago the opportunity to revisit the sciences. The structured program is the equivalent of five semesters completed in succession, delivered either face-to-face or in a hybrid format with asynchronous lectures and on-campus labs.

A linkage opportunity has been established for successful students upon completion of the PMED program. In addition, affiliation agreements include Edward Via College of Osteopathic Medicine, Touro College of Osteopathic Medicine, Philadelphia College of Osteopathic Medicine, and the Robert Wood Johnson School of Medicine.

The program consists of 5 semesters parsed out over 2 years. The curriculum offers the prerequisite science courses required by most health professional schools. During the first year, general chemistry and general physics with laboratories are offered along with an elective math course. During the second year, students take organic chemistry and general biology in the summer and fall semesters. In the final spring semester, a formal MCAT review course is offered to students, expense-free. In addition, two elective courses are offered including Molecular Biology & Biochemistry and Sociology & Psychology.

### **Admission Requirements**

Students applying to the program must have a bachelor's degree from an accredited institution in the United States. Admission into the program is competitive because of the limited number of seats. Applicants are accepted on a rolling admissions basis.

An applicant should have a minimum combined SAT score of 1000 or ACT score of 21 and a minimum undergraduate grade point average of 3.00. For those individuals far removed from the college years, additional factors, or other more recent coursework, will be considered.

Applicants to the program should have at least 6.0 semester credits of coursework in English literature and the behavioral sciences (psychology, sociology, or philosophy) as that is a requirement for admission into most health professional schools. The opportunity exists within the program to acquire these courses if a student without these courses is accepted. A strong understanding of algebra and trigonometry is a prerequisite for the program.

The program's application can be found on the College of Medicine's Evening Post-Baccalaureate Pre-Med Certificate Admissions (https://drexel.edu/medicine/academics/graduate-school/evening-post-baccalaureate-pre-medical/how-to-apply/) webpage.

# **Certificate in Quantitative Principles for Clinical Research**

Certificate Level: Graduate Admissions Requirements: Bachelor's degree or higher Certificate Type: Post-Baccalaureate Number of Credits to Completion: 9.0 Instructional Delivery: Online Calendar Type: Semester Expected Time to Completed: 1.5 years Financial Aid Eligibility: Not aid eligible Classification of Instructional Program (CIP) Code: 51.0000; 51.0719 Standard Occupational Classification (SOC) Code: 11-9111

## About the Program

This certificate of study addresses the needs of residents and fellows to attain knowledge in the basic principles of clinical research—analyzing data, understanding medical literature, and communicating results. All coursework is online, providing flexibility for the trainees and training programs.

Students completing this certificate can then apply to either the Clinical Research Organization and Management (http://online.drexel.edu/online-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-degrees/biomedical-d

### **Admissions Requirements**

A bachelor's degree from a regionally accredited institution in the United States or an equivalent international institution.

#### **Required Documents**

- · A completed application
- · Official transcripts from all universities or colleges and other post-secondary educational institutions (including trade schools) attended
- Resume
- · Additional requirements for international students

### **Program Requirements**

CR 525S Scientific Writing and Medical Literature	3.0
CR 520S Applications of Clinical Research Biostatistics	3.0
CR 500S Epidemiology	3.0
Required Courses	

### **Additional Information**

Kamran Mohiuddin, M.D., M.B.A.FAPCR Director, Graduate Programs in Clinical Research km3668@drexel.edu 215-762-3812

Visit the Drexel University Online website for additional information and to apply to the Quantitative Principles for Clinical Research (http://online.drexel.edu/online-degrees/biomedical-degrees/qpcr/) program.
